MR. SHATFORD'S VISIT

On Wednesday night of last week L. W. Shatford, M.P.P., accompanied by H. A. Turner, road supervisor, in the latter's auto, reached Hedley. Mr. Shatford had only arrived in Penticton a few days before, from the coast, where he has been all winter, but he lost no time in getting out to see how things were prospering in his district and to size up the situation so far as expenditure of the district appropriation is concerned.

He knew before starting out that he was a bit early for the season and that the roads would not permit of getting over very much of it at this time. They found the going a bit hard between Penticton and Keremeos over the Green Mountain summit, but as Tweddle's auto has been covering the route for the past for night they had no particular difficulty in getting through.

Mr. Shatford is looking particularly fit after his strenuous winter's work, and he seems specially pleased at being able to shake off the onerous duties of general manager of the Bank of Vancouver which in addition to his parliamentary duties made very heavy work for him.

When asked what he was going to do with all of that \$375,000 appropriation he had succeeded in getting for his district this year he said the public had little idea how much it really cost to put even an old travelled road in proper shape and up to the high standard that the present day road called for, and while the appropriation this year was \$85,000 more than ever before it could all be used and used carefully and judiciously and still there would be roads left that would be found to have fallen short of the amount of attention they should have. In going over some of them at this season of the year the defects could more easily be seen and some idea formed of what was needed to make them stand up to what was required of them at all seasons of the year.

With regard to work in this district he was quite satisfied that there was no district in the province that was getting better value for the money expended and very few of them that were getting anything like as good value. He was perfectly in accord with the standard of road set by the Public Works Department and was better satisfied with it now in seeing at this season of the year how much more quickly roads thus built became firm and fit for heavy traffic.

The bulk of the work this year will be put on the main leading roads of the district and pieces of new road road here and there through the district where most urgently needed in opening up new country would be built. One piece of new road that is being built is that on the eastern side of Dog lake which will make a better road down the valley and also afford an outlet to new settlers, and another piece of new road which will soon have to be built will accommodate ranchers to the south and east of Green Mountain and provide a winter road over the divide.

The main bridges which will be built this year will be at Granite Creek, Princeton and Penticton.

He thought it was too early to get through as far as Tulameen and as he had to go into the Lower Similkameen and Lower Okanagan he deemed it advisable to defer a little his trip further west and east. As for going over in the Kettle river section he did not think it would be practicable attempt to make it before May. In June Mr. Shatford expects to leave for the old country and he has a good deal to take up his time in the interval.

He felt that he was fortunate in having Mr. Turner to depend on to see that the work in the district was carried on to the best advantage. They intended to go over the district thoroughly and discuss the needs of the various sections before he left.

The International Harvester Company of Auburn, N. Y., threaten to remove their cordage factory to Germany because of the action of the labor unions in connection with the recent strike difficulties with their employees. Nearly all the market for the output of their factory is now in Germany.

IS THERE A MAN IN THE MOON?

It Would Be Well for Other Politicians to Be Able to Show as Clear as One

The Liberals declare that the Conservatives have no mandate from the people to back them up as regards their present Naval Policy. Such is not the case. Mr. Borden has a direct mandate from the Canadian people to do just what he is attempting and determined to do. In his manifesto issued on August 14, 1911, prior to the last general election Mr. Borden made the emphatic declaration that if he was elected Premier of Canada he would go to Britain and thoroughly inquire into the conditions and if convinced there was a need for assistance he would come back and ask Parliament for a money vote to meet that need. In so far as a permanent naval policy was concerned, he declared at the same time that when it would be formulated he would lay it before the people of Canada and give them an opportunity to express their views at the polls. In view of these facts Mr. Borden's present course is entirely consistent.

Did Laurier have a mandate before he committed the country to the building of the C. T. R. in the manner he did in refusing to allow the electors to have any say. If Cox couldn't wait in 1904 the Empire cannot wait now with Germany aiming to the teeth and threatening her very existence.

Did Laurier have a mandate when he wasted public money on the Rainbow and the Niobe? Why then, should Borden's mandate be questioned now?

HOW THEY WOULD BUILD IT

Canada Hasn't Forgotten the Transcontinental Railway, to Cost 15 Millions. Has Been Made to Cost Nearly 300 Millions

The Laurier proposal is that the old Liberal Government be restored to power for the purpose of spending at least \$35,000,000 in Canada on the construction of two fleet units. If the people of Canada reversed their verdict of September, 1911, and gave the Liberal party a chance to spend the money, there is no doubt that—money would be spent.

It is not out of place to ask how far the thirty-five millions would go, and what the country would get for the money. Under the plan which is to be carried out by the Borden government the country will get for the money the three finest and most formidable fighting ships in the world, a great and perhaps a deciding factor in the naval defence of not only Canada but of the whole British Empire.

GREAT WORK IF—

Under the Laurier plan the country is to spend in the construction of two fleet units a sum which would not be much more than sufficient to build one fleet unit in Canada.

That would be great work. Unfortunately for the proposal, the record of the Laurier government is not a record of getting work done at half its normal cost. Twice the normal cost would be nearer the mark, and that would mean \$35,000,000 spent on half a fleet unit.

THE LAURIER WAY

The Laurier way of spending public money has been exemplified.

In the Quebec Bridge disaster. In the construction of the National Transcontinental Railway at four hundred per cent. more than its estimated cost.

In the erection of the Laurier tower which fell down and the Museum Tower which is breaking away from the main building.

In the creation of huge fortunes for middlemen.

GENERAL NEWS

Large portions of the suburbs of Winnipeg are under water from a recent flood of the Red river.

Emigrants are leaving Scotland at the rate of 2000 per week.

The government has given notice of the closure because of the obstructive attitude of the opposition being persisted in.

A DELICATE OPERATION

Dr. McEwen Removes Piece of Skull Bone Penetrating the Brain of Patient

A very delicate operation was performed here on Saturday morning in the Hedley hospital when Dr. McEwen operated on Tommy Corrigan and removed a piece of the skull bone which was pressing down into the brain. In last issue we referred to a seizure which the patient had when he fell unconscious as the result of a little undue excitement at a party. Last week again he was on the roof down at Roll's store helping to make repairs when another attack came on him and but for the fact that B. Rols noticed him and caught him in time he would have fallen off the roof. The injury which produced these attacks occurred twelve years ago when he was six years old and was caused by a fall which he had when he was running after a dog that he and Maurice Daly had harnessed. He could not let go the line and when he fell he hit his head against a stone. He was knocked senseless at the time and remained unconscious for some time but after he regained consciousness little more was thought of it and no inconvenience was felt from it until the seizure of a little more than two weeks ago.

When Dr. McEwen was advised of this attack and the narrow escape from falling off the roof he decided to operate and find out the exact state of affairs and he sent to Princeton for Dr. McCaffery to be present and assist. In cutting through the skull bone he found that it had thickened very much at the point of injury and could see that quite a large section which had been forced in by the blow and was adhering to another section of the skull than that which he had removed by the incision, was penetrating down into the brain, he concluded that it would be best to get it away without further delay. To do so it was necessary to press down in between the brain and the jagged point of this piece of invading bone so as to protect the brain from injury from the bone while detaching the latter from the section of skull to which it was adhering. Its removal was accomplished successfully without any apparent injury to the brain, and the patient has been doing well ever since. The incision in the skull has been kept open which is considered the safer plan and less apt to give rise to unfavorable after effects. The patient was kept as quiet as possible for a few days following the operation although it was somewhat difficult to do so as he was feeling strong and fit and could not see any necessity for the restraint.

The operation was an exceedingly delicate one and was cleverly and carefully done. The doctor's wide experience as house surgeon in the Vancouver General Hospital for so many years evidently stood him in good service in this case as well, although the limited facilities of a small hospital like that in Hedley must have been felt by him and added to the strain until the job was successfully accomplished.

GENERAL NEWS

The C. P. R. have planned an extensive building programme for the west which is to give them four distinct routes from Winnipeg to the coast. One of them includes a sixteen mile tunnel in the Rockies at Kicking Horse which will cut five miles off the distance and reduce the grade from two and one half per cent. to less than one per cent.

H. C. McLeod, formerly general manager of the Bank of Nova Scotia, gave important testimony before the committee of the House of Commons on the new Bank Act. He endorses strongly the plan of an independent audit.

Hon. G. E. Foster now in Australia seems to have been successful in stirring up some reciprocity sentiment and there is now an urgent demand on the part of electors for freer trade with Canada.

President Huerta of Mexico has decided that it will be safer for him to resign the job.

AFTER BIG FISH

A Rossland Man Proposed to Go Gunning for Rulers

Wm. Milson, an Englishman, aged 49 years, is in custody in Spokane, on the charge of insanity. He mailed a package containing clippings and a disconnected communication to President Wilson challenging him to fight a duel. On January 2nd he challenged Sir Richard McBride to a duel, and swore vengeance on the Canadian executive for some fancied grievance. The package addressed to President Wilson was opened in the Spokane postoffice, and he was placed under arrest. Milson worked in the mines here for several years and left this city about five years ago. He bore a splendid reputation while here, and is reported by his friends to be the soul of honor. If he was selling a piece of real estate he would not misrepresent it for any consideration in order to close the deal, and was steady and reliable in his work as well as in his business transactions. He has property in various cities in the province, including Rossland, Grand Forks, Fernie and Vancouver, and is fairly well off. On religion, alone, he was somewhat erratic and irrational. It is probable that he will be deported, if he is not committed to a Washington asylum for the insane. — Rossland Miner.

NOW BE VIGILANT

From This on Strict Watch Must Be Kept to Protect Forests From Fire

Officers of the Forest Branch Victoria are already laying the field plans for the ranging staff for the coming summer. It is expected that the members of the service will have one of the most difficult years in the history of the province, because of the heavy growth of weeds and grass last fall, the strong probability of a dry spring, and the great amount of lumbering, slashing, railroad and road construction, land clearing and settlement which has been going on in the province since wet weather set in at the end of last summer.

Steps have been taken during the winter to ensure that railway construction gangs and tie cutters shall properly safeguard their operations. There has been adopted a requirement that a strip 300 feet broad shall be cleared of inflammable material after the cutting of the right of way. The fire danger around new construction has been shown by every line in Canada to be greater than in any other operation.

Great devastation resulted many years ago, when little heed was paid to the forest, and it was a matter of small moment whether it burned down or not. But conditions are changed, and now the provincial authorities are co-operating with the railroads in suppressing what is one of the greatest possible economic losses to the company, and to the Government and the people alike. The cost of a very efficient patrol along the lines of construction is a mere bagatelle as compared with the losses prevented. The policy of the Forest Branch is to invest money during the period of greatest danger. Once the line is through and the right of way cleared there is relatively small risk, and development of the country can proceed without the tremendous losses which are apparent in every quarter of the country. A patrol at least as efficient as that established in the past year is to be maintained this year on the new railroads in course of construction. One foot patrolman to each ten miles of track, with additional men on speeders will be required.

The lumbermen and government are working together to the same end in the case of logging operations. The principle upon which the officers of the Forest Branch are working is the one which is becoming universally recognized; namely, that slash is going to burn at some time, and that usually it can be controlled if its disposal is attended to in proper season. Slash burned under supervision means the safety of the woods; if on the other hand it is allowed to lie and become accidentally ignited it may form the basis of a forest fire which will change into barren wastes the rich areas which it is expected to develop.

EDITORIAL COMMENTS

The German Reichstag have accepted and passed the army increase but the English Liberals of the Haldane stripe will continue to preach the idea that Germany has only the most pacific intentions and goodwill towards the rest of Europe and Great Britain in particular.

Evil communications corrupt good manners as well as good morals and if the mother of Zelle Emmerson, American, now in England, ever had any manners that could be classed either good or indifferent, she has lost them all in hobnobbing with the English viragoes among the suffragettes.

When staunch Liberals like Senator Ellis, of the St. John Globe, deprecates the action of the Liberals in holding up the business of the House and endorses the wisdom of the course proposed in applying the closure it is easily to be seen why Sir Wilfrid Laurier and those of his supporters of the Pugsley type are in doubt as to whether their friends in Senate will endorse them in the course they have seen fit to follow.

The sentence of the court in giving Mrs. Pankhurst three years in the pen was a righteous judgment and if it erred at all it was on the side of too great leniency considering the gravity of the woman's offence and the abominable character of her behavior for several years past. The question is can the weak-backed head of the Department of Justice be depended on to enforce it regardless of her capers. In view of his actions in the past it is quite too much to expect that Minister McKenna can be counted on to do his duty. He has admitted that a craving for notoriety and a desire to be forever in the public eye is almost the whole of the suffragettes' propaganda, and yet he has no more sense than to allow those of them who have been jailed to write the abominable stuff and nonsense to their friends on the outside which they do. Once the prison doors close on them there should be no more heard of them or from them until the term for which they have been sentenced has run, and if they choose to starve themselves to death that is their own affair and the country will be many times the better without them.

When writing Advertisers Please Mention the Gazette.

Canada is this year receiving a larger influx of immigration from Britain than ever before (it is to be hoped for Canada's sake that the number of radicals among them is as few as possible) and it shows that there is a growing tendency on the part of Britain's emigrants to stay with the flag. One newspaper report of the passenger list of one steamer told of the entire second cabin capacity of the steamer being taken up with British emigrants and that many who wanted second cabin had to take steerage. This all means that the class of immigrants we are now getting from Britain are people of some means and the mechanics among them are skilled labor. While this is good for Canada and is no loss to the empire it means very great loss to Britain herself that so many of her best people are finding conditions unbearable there and have to seek betterment of their positions in the colonies. Yet the lesson it teaches fails to convey anything to the average British elector who will persist in clinging to a system of trade that is leaving them farther behind their competitors year by year. The radicals in argument will even boast of the scarcity of skilled labor which this exodus is causing and have the impudence to urge it as an evidence that the country is going ahead because the number of the unemployed is thus becoming fewer.

TENDERS WANTED

TENDERS will be received up to April 16th for the erection of a blacksmith and machine shop—labor only.

Synopsis of Coal Mining Regulations

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2,500 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion lands.

W. W. CORY,
Deputy Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

COUNTY COURT, YALE

A sitting of the County Court of Yale will be held at the Court House, Princeton, Wednesday 23rd day of April, 1913, at the hour of 2 o'clock in the afternoon.

Be Suspicious

BE suspicious of that of which nobody is proud. Be suspicious of the mere low-price argument offered in favor of an article with no reputation, no backer, no guarantor.

Better buy the thing you know and can trust, than an article unbranded and unvouched for.

The branded shoe, made by a maker with a reputation, is a safer shoe to buy than the one made in an unknown factory by an unknown maker.

The underwear made by a firm whose name is as familiar to you as your own, is worth more to you than underwear nameless or labelled by a maker of whom you have never heard.

Tea sealed in a packet bearing the name of a reputable firm is to be preferred to tea of which the packer is not sufficiently proud to advertise its quality.

That in which much money has been invested to make or keep it good is worth more than that on which nothing or but little has been spent.

Peace of mind is worth something, just as quality is. Buy peace of mind.

When you buy anything worth while buying, buy that of which you know—from advertisements, or from other dependable acquaintance. Buy the article with the "money back" guarantee—with the pledge of a known name behind it.

Put your faith in the advertisements appearing in good newspapers. Beware of the article that cannot stand the spot-light of publicity. The commodity an advertiser backs with his own money is something worth your buying.

Advice regarding your advertising problems is available through any good advertising agency or the Secretary of the Canadian Press Association, Room 503 Lumsden Building. Enquiry involves no obligation on your part—so write, if interested.

Town and District.

Work has commenced on the road and some repair work is in progress to the west of the town.

Constable Sproule returned from Kamloops on Monday accompanied by Mrs. Sproule who was spending a few weeks with friends on the coast.

Gardening operations have been all the go during the last fortnight and the outlook now is that Hedley is going to have some pretty nice gardens this year.

The auto car which F. H. French is getting is an Overland and the demand for the car is so great that they will be unable to supply him before the end of this month.

E. D. Boeing went up to Granite Creek the end of the week to begin work on the new bridge. He was accompanied by Messrs. Forbes and Bowerman and Mr. Brass went up this week.

The School Magazine edited for the British Columbia Education Department by Capt. Clive Phillips Wolley keeps up its interest and is well calculated to foster a healthy patriotic sentiment in the youth of this province.

J. D. Tomkins is the new editor of the Pentiction Herald as successor to Mr. Williamson and the breezy character of last week's issue as well as the thorough manner in which the paper covered the local field show that it is in good hands.

Mr. E. H. Hobbs is not going to be back in Hedley and Mr. C. P. Dalton who has been in charge of the Hedley branch of the Bank of B.N.A. has been appointed in his place as acting manager. The Hedley branch is starting quite a few of the bank men off on their managerial careers.

J. T. Armstrong, of Pentiction who was an old Hedleyite but left here six years ago, came in on Tuesday and will remain a few days. Mr. Armstrong reports Pentiction prosperous. He went there at a very favorable time and was fortunate in annexing some of the prosperity which was going.

A number of writs have been issued against the Gold Plate Mines Co. by parties on the coast among whom are a couple of gentlemen with the handle "Rev." to their names and another plaintiff is Eva P. Wishard. Just where they are going to come in or do come in is something that nobody here is prepared to say.

The auto upon which G. H. Turner will give practical demonstrations to his class arrived in Hedley on Sunday from up the valley. The machine is somewhat of an invalid but it will serve the purpose all the better for the infirmities it may possess, for medical students would be up against it if there were no hospitals nor patients.

The good old game of cricket is being introduced into Hedley and may henceforth be a claimant for public favor with the other sports. The difficulty will be to get a good pitch and coconut matting may be the easiest solution. A cricket set has been procured and a few small practices have been held. If the game sticks here it is possible that Princeton or Keremeos will also form a club.

It is reported that the Minister of Public Works has fully decided to have the western portion of the trans-provincial auto road built by contract owing to unsatisfactory work on that portion of it last year. It is hoped that before the end of the working season of 1913 the working gangs from east and west will have met on the Roche river and the Hope-Princeton link be completed.

Billy Lonsdale returned to Hedley on Monday after an absence of about a year. After a stay of a month or two in London he went to South Africa and worked on some of the properties there. On a former occasion he spent several years on the mining plants of leading South African properties but Camp Hedley looks good to him yet and his Hedley friends are glad to see him back.

While an auto is often a liability rather than an asset to many who buy them even when they have paid cash for them, it does not follow that this is so in all cases, but the very reverse. An instance of this may be seen in the case of the machine driven all last year by road supervisor Turner and again on the roads this spring. Compared with his costs of the year before for horse hire and hotel bills there was a good wide margin of saving every month in favor of the auto. Then the supervision was much more thorough because of it for he covered three times the amount of ground and was able to visit every road gang in the district much oftener than before.

Mr. W. T. Shatford now on tour through South America has kindly remembered the editor of the Gazette with an occasional picture postcard from different points along the route. Those already received described local scenes in Bolivia and Peru. His descriptive letters appearing in the Pentiction Herald make very interesting reading and if he had them collected and issued in book form there are many who would be very glad to procure a copy. Mr. Shatford is a close observer and nothing bearing on the material progress of a place escapes his notice.

Vancouver papers stated last week that J. J. Warren, president of the Kettle Valley, denied that there was any strike in the construction camps or any trouble with the I.W.W. As the Pentiction Herald which is on the ground and should be in a position to know had given out in the issue before the last that the I.W.W. had succeeded in tying up the camps around Naramatta, it is difficult to see what object the president can have in handing out such information to the papers in Vancouver. It surely cannot be that the contractors whose work had been stopped have kept this information from the president of the road. Evidently the public are getting a "bum steer" on the question from some source.

The secretary of the British Columbia Portland Cement Co. has found it advisable to correct some of the more flagrant lies in circulation among the knockers. One of these is the misstatement that the Cement company are in any way responsible for the misrepresentations that have been made by irresponsible agents of the East Princeton townsites. That is an enterprise that the company do not own and have nothing whatever to do with. As long as investors in British Columbia Portland Cement Company's bonds and stock are satisfied with their investment it is nobody else's business and if there be any of them that are dissatisfied and are foolish enough to offer their holdings at a discount, they will find takers very readily.

J. A. Schubert came down from Tulameen on Monday and is spending a few days in town looking over his Hedley interests. Mr. Schubert says that before he left there were evidences that the work on the Great Northern would be pushed much more briskly than they have been doing all winter. Several of the leading contractors are taking the work away from subs. who have not been making the progress desired. The track is to be extended on to Tulameen shortly so as to lessen the haul in taking in supplies and they expect to have the steel in Tulameen early in June. From present appearances he does not think it likely that the K. V. will do much building on the Tulameen but will keep their line further north. At all events they do not seem to be doing anything in the way of negotiating right-of-way along the route which they surveyed last year.

There has been a good deal of concern among golfers during the past few days because of the rumor that the fencing of the Indian reservation to the west of the town portended the prohibition of further golf playing on the reserve. Inquiries made from the Indians themselves confirmed the report that a change in the policy was to be expected but nothing definite could be gleaned as to the nature of the demand that would be made by the Indians until after a meeting of the band had been held to decide the matter. So far as the fencing goes there is nothing about that to interfere with the playing and instead of doing any harm it is likely to be more of an advantage than disadvantage, and it is hoped that unless the Indians are very unreasonable a satisfactory arrangement for all parties will be arrived at. If on the other hand they should prove obdurate the matter is not likely to drop there.

A. D. Broomfield of Princeton was in town on Monday. He was on his way back from the West Fork of Kettle River where he had driven last week. Railway construction which has been in progress there all winter on the Kettle Valley line is making times fairly prosperous on the river and there is considerable logging being done as well. The construction trains which had been discontinued during the winter have started in again this week and track-laying will be resumed beyond Carmi on the 15th, to lay as far through as Hydraulic which is 26 miles beyond Carmi. The track-laying force will not be a very large one and it is expected that by the time the steel reaches Hydraulic the contracts between there and the summit will be completed and the

track-laying may continue right on. There is also some little mining in progress and a shipment of two carloads of ore from the Bounty on Wallace mountain has been waiting at Beavercreek for shipment ever since last January.

METEOROLOGICAL.

The following are the readings showing temperature, etc., for the week ending Apr. 5, 1913:

AT THE MINE.

THE KEREMEOS PAGE

KEREMEOS, the Centre of Lower Similkameen---Famed for Fruit Growing

Town and Lower Valley.

K. G. Brown of Princeton was a visitor to town last Monday.

After a dreary winter has struck the valley in good style.

Anyone not acquainted with the new game laws, will find a notice in the post office.

Mrs. Jack Thomas will move over to town for the summer to enable her son Buster to attend school.

Corn is ten cents a can wholesale in Vancouver while in Spokane four cans for a quarter of a dollar is the retail price.

Hill Innis left Monday for his pre-emption on Trout creek where he intends making extensive improvements this summer.

The Keremeos Land Company have a number of men working on the irrigation ditch preparing it for the summer operations.

Mr. O. H. Carle is down with a bad attack of la grippe. We trust his recovery will be quick and that he will soon be able to return to work again.

D. J. Taylor of Winnipeg, managing director of the Similkameen Valley Fruit Lands Co. Ltd., arrived in town last Saturday and will stay a few days at the home ranch.

Game warden Schissler after being away for a couple of weeks in the Ashnola district arrived in Keremeos on Monday 7th. He reports considerable snow in the mountains.

About forty Chinamen are at work on the G. N. tracks between here and Similkameen. During the renewing of ties two of the men had the misfortune to lose a finger apiece.

A. E. Hargreaves and his two sons, Frank and Roy, went up to their pre-emptions on the Ashnola river on Friday. Mr. Hargreaves returned Saturday evening leaving the boys to do some improvements on his and their places.

Mrs. Hewitt of Fairview returned from Princeton where she spent a short while with friends there. She and her son left on Friday evening's train for Oroville where she will be met by her husband and driven home to Fairview.

Now is the time to give us some of your printing. We can turn out as good a job as there is in the country. Anything you like from a visiting card to a large poster. Get in the game and advertise; you will certainly get your money's worth back.

At a general assembly of the Presbyterian Church in Toronto it was decided to extend an invitation to all ministers of that Church to come to Toronto some time in June. All expenses will be paid both for themselves and their wives. The Rev. A. H. Cameron hopes to be present at this great assembly.

Mr. and Mrs. Sproule of Hedley came in on the auto from Penticton on Monday going up to Hedley the same day. Mrs. Sproule has been visiting at the coast for some time. She was very glad to get back to the Similkameen as the weather at this time of the year is not to be compared with our sultry climate.

L. W. Shatford, our worthy member, accompanied by H. A. Turner paid the district a visit last Wednesday and Thursday staying overnight Thursday in Keremeos and proceeding to Oroville the following morning. During the visit he was only able to go as far as Hedley but in the near future hopes to return and go right through the western part of the riding. Mr. Turner while here gave instructions for the road foremen to get out their gangs right away, and in consequence foreman R. J. McCurdy and Danny McEachern are now at work, the former and his crew are working between the town and the Centre, and the latter between the Centre and the forks of the road, both doing repair work.

The closing meeting of the K.K.K. on Thursday 3rd was a great success in every respect about seventy people being present. The pantomime and dialogue were very funny and much appreciated. A splendid review of McBeth was given by Rev. G. McKenzie which was attentively listened to. After a delicious serving of ice cream and cake the meeting came to a close at 11:30. The programme was as follows: Opening song; Minutes; Bangle by P. F. Quant and R. Smith; Review

of McBeth by Rev. McKenzie; Reading by Mrs. D. J. Innis; Recitation by Miss Vader; Instrumental duet by Messrs. Young and Johnson; Recitation by Miss Genivieve Boyd; Letter seeking game; Pantomime "Everybody works but Father"; Guessing contest "old sayings"; Dialogue "Bachelor's Hall Medley"; game "Names of Magazines"; refreshments, God save the King.

A GOAT MARKET

Department of Agriculture to Bring Buyers and Sellers Together

During the past few months the Live Stock Branch of the Dominion Department of Agriculture has been in receipt of numerous inquiries as to where it might be possible to purchase either Angora or Milch goats. It would appear that in many parts of the Dominion the demand for these useful and profitable animals is rapidly developing and that those who at present have any surplus stock can find a ready sale for them if a channel of communication between supply and demand is established. Accordingly as a means of starting a convenient directory of Canadian breeders of Angora goats and Milch goats, the Live Stock Commissioner will be pleased to receive from such breeders information regarding their respective flocks covering the following points: 1. Kind and number of goats kept. 2. Usual number for sale each year. 3. Approximately the prices asked. 4. If possible a brief statement regarding expenses found necessary and the returns which may be expected by one engaged in raising this class of stock. Communications supplying the above information should be addressed to the Live Stock Commissioner, Ottawa, Ontario. Such letters do not require postage.

NOTICE

SIMILKAMEEN LAND DISTRICT DISTRICT OF YATES

TAKE Notice that I, Amos Charles Kennedy, of Keremeos Centre, B.C., rancher intend to apply for permission to purchase the following described lands:

Commencing at a post planted on the north boundary of Lot 288 (being also the south boundary of Lot 289) at a point about twenty chains west of the north-east corner of Lot 288 and being at an angle of said Lot 289; thence westerly following the north boundary of Lot 288, a distance of 15 chains more or less to a point true south of the south-west corner of said Lot 289; thence north to said corner of Lot 289; thence north-easterly following the southern boundary of Lot 288, a distance of 8 chains more or less to an angle in said southern boundary of Lot 288; thence south-easterly following the said southern boundary of Lot 289 to a point true north of the point of commencement; thence south to the point of commencement, containing 35 acres more or less.

YOU WANT THE BEST IT ALWAYS PAYS BEST

There are Two Kinds of Printing

The one is turned out by the man who believes that anything goes, but the other by the one who values the reputation of his establishment too highly to allow any work to go out which will not do him credit.

There is just as good work being done in country offices as in the cities, and often as poor work in the cities as in the worst country shops

In Prices the country office can do just as well for you and you save the express. The city printer may get his stock a trifle cheaper by saving the local freight, but his rent and other overhead expenses are higher, and in the end he is obliged to charge as much or more than the country printer will charge for the same class of work.

THE HEDLEY GAZETTE

is prepared to do any kind of work that may come along. No order too small and none too large.
