**COQUIHALLA CONTRACT LET**  
McArthur Brothers Will Build From Summit to Hope

MacArthur Bros. Company of New York will build the last section of the Kettle Valley Railway from the summit of the Hope range down the valley of the Coquihalla river to the town of Hope on the Fraser river, a distance of 38 miles. A contract will be signed following the execution of an agreement between the Kettle Valley Company, the Great Northern and its subsidiary company, the V. V. & E. Railway Company, which owns an almost continuous line of track from Abbotsford, in the Lower Fraser Valley, to Laurier, a point in the Boundary district along the international boundary line.

The Coquihalla link, about to be built, will be owned and operated by the Kettle Valley Company, but the V. V. & E. will have equal running rights thereon as it is contributing a share of the cost of construction. Below Hope the Kettle Valley will cross the Fraser river on a steel bridge to the opposite bank and there effect a junction with the main line of the C. P. R. Survey and soundings for the bridge have already been made.

The opening of the tenders yesterday brought many contractors and subcontractors to this city. An examination of the bids by Messrs. A. McCulloch, chief engineer of the Kettle Valley line, Mr. Alexander Stewart, assistant chief engineer of the Great Northern, and Mr. J. H. Kennedy, chief engineer of the V. V. & E. Railway, disclosed the fact that the New York company had submitted the lowest tender and it was decided to recommend an award of a contract accordingly. Mr. J. J. Warren, president of the Kettle Valley Railway, presided at the joint conference.

### Very Heavy Work.

The Coquihalla section, considering its short length, will probably be the heaviest railway work ever undertaken in British Columbia. The thirty-eight miles of track will cost, it is estimated, about \$3,000,000. For a considerable distance the expenditure will exceed \$100,000 a mile. In that short distance, no less than twelve tunnels will have to be driven. It is estimated that the contractors will have to invest \$200,000 in a wagon road along the route for the purpose of getting in equipment and supplies.

Mr. F. C. Hitchcock, vice-president and general manager of MacArthur Brothers Company, has been at the Hotel Vancouver for several days awaiting the result of the joint conference of the various railways interested in the undertaking. He will lose no time in organizing his forces and making a start at wagon road construction at both ends of the route simultaneously with the assembling of grading outfits. Camps will be established at short distance apart in order to expedite the entire work. The early completion of a thirteen-mile section of the Kettle Valley line from Coldwater Junction westward to the summit of the Hope Mountains by Messrs. Twohy Bros. will enable the New York company to move in outfits by rail. Coldwater Junction is the point where will converge the Kettle Valley branch line from Merritt in Nicola Valley, there connecting with the Spences bridge extension of the C. P. R. to Merritt; the V. V. & E. main line from the Boundary and Okanagan districts, and the main line of the Kettle Valley line extending eastward through the Similkameen and Okanagan to a connection with the C. P. R. at Midway in the Boundary district. The V. V. & E. now operates a train service from Princeton direct to Spokane, a distance of over 300 miles. It will also have running rights over the thirteen-mile section of the Kettle Valley line from the summit of the Hope Mountains to Coldwater Junction.

### Finish Next Year.

The contract just awarded calls for the completion of the Coquihalla section of thirty-eight miles before November 1, 1914. This last gap will be a link in two rail systems giving direct rail communication between Vancouver and all of Southern British Columbia to the Alberta boundary line.

**MINING MEN VISIT HEDLEY**  
Representatives of One of Strongest Corporations See Nickel Plate

Last week Camp Hedley was honored with a visit from W. W. Mein, consulting engineer of the Canadian Mining and Exploration Company, Limited, and his assistant, Ralph Stokes, M. E. They came in on Thursday and remained until Saturday and during that time they visited the Nickel Plate mine and workings as the guests of the Hedley Gold Mining Co. They also paid a visit to the Kingston mine apparently on behalf of the company which they represent.

The Canadian Mining and Exploration Company Limited is made up of men who carry the greatest weight in financial circles in the United States and Canada. Among Canadians on the Board of Directors are men like Sir E. B. Osler, Sir Edmund Walker, Sir William McKenzie, Wallace Nesbitt, D. Coulson, D. Fasken, H. S. Holt and others, while United States directors embrace men like A. Monell, W. E. Corey, P. A. Rockefeller, J. R. DeLamar, C. L. Denison, E. C. Converse and others.

Several of these men are heavily interested in the Hedley Gold Mining Co. and more of them in Exploration Syndicate No. 2 which holds bonds on properties in this camp now being explored by Mr. Beam and his force of diamond drillers in Camp Clifton. That Messrs. Mein and Stokes were much impressed with what they saw in the Nickel Plate is well known and the fact that they went to see the Kingston is evidence that Mr. Chabon who holds a bond on the Kingston has put the proposition up to a concern that can stand a heavy outlay for development purposes without feeling it and also a concern that is made up of men who are no strangers to Camp Hedley and its splendid record.

The Canadian Mining and Exploration Company Limited was organized in May 1912 with a capitalization of \$5,000,000 consisting of 1000 shares of \$5,000 each. Of these 1000 shares, 500 have been issued, realizing in cash \$2,500,000. The annual income from the investment of such a sum is enough in itself to accomplish great results when wisely expended in investigating and examining promising properties that may be submitted to them. During the eight months of 1912 they had 428 properties submitted to them of which 285 were in Canada, 110 in the United States, 21 in Mexico, 6 in Central America, 4 in South America, 1 in the Malay States and 1 in South Africa. By the end of 1913 this number will doubtless have increased several times over and the chances of securing among them a few bonanzas very greatly increased. Among the properties receiving preliminary inspection from them on this trip was a property in Fairview which was doubtless the Susie, and very likely that circumstance accounts for their presence in this vicinity at this time.

### PRESENTED TO THE KING

Hon. Martin Burrell, Federal minister of agriculture, who is now on a trip to England, was presented to King George a few days ago. On Tuesday, with Finance Minister White he attended the meeting of the imperial defence committee, over which Premier Asquith presided.

It promises to revolutionize transportation methods in that vast region, placing the coast merchant in direct communication with the Similkameen, Okanagan, Boundary and Kootenays and terminating the routing of goods to those sections by the present roundabout routes via Revelstoke and Spokane.

MacArthur Bros. Company is one of the oldest contracting firms in the United States. It was organized 86 years ago. It has carried out many important works. At present the company has a \$30,000,000 contract in connection with the New York City aqueduct improvements and is also building the Coos Bay branch of the Southern Pacific in Oregon, a distance of 100 miles as well as the El Paso and Southern, known as the Phelps Dodge line, in the Southwestern states.

**DISTRICT PUBLISHERS MEET**  
Okanagan Printers' Guild Assemble at Penticton and Are Royally Entertained at the Lake Town

The Okanagan Printers' Guild which are included all the offices in the Okanagan Valley with membership in the Similkameen as well as in Penticton on Friday last. There are at present eight offices in the association and all were represented.

Those present were: L. J. Balfour, business manager of the Vernon Press; H. M. Walker, Enderby Press; Mohr, Armstrong Advertiser; G. Rose, Kelowna Courier; J. M. Leavelle, Orchard City Record, Kelowna; R. White, Summerland Review; J. D. Tompkins, Penticton Herald and A. Mcgraw, Hedley Gazette. There was also present another newspaperman, Mr. F. E. Trautman from the vice-president's office of the C. P. R. whose presence and the part he took in the deliberations, lent additional interest to the meeting. Just as the association has created a better feeling among the publishers themselves by having them come together and discuss matters pertaining to their work and the difficulties that are to be encountered in it, in like manner it is better for the railways and the press to get together to compare notes and have each learn something of the other's difficulties and the other's view point. The impression is general that the railways will not allow any information regarding wrecks and other troubles of that kind to get out if they can help it, and in that respect a good many of the publishers were disposed to share the general impression. Mr. Trautman, however, did much to disabuse the minds of those present who may have thought so. It was not the facts relating to those unfortunate occurrences that the railways did not want to have get out, but it was the things that were not facts that hurt them most when cast abroad in the public prints. It is to avoid that kind of thing that he is authorized by the vice-president to go to the newspapermen where assembled in their conventions and be perfectly frank with them. When they wanted any information from the C. P. R. for their papers on any subject at all which is of public interest they were told by Mr. Trautman where to go for the facts. Other matters were brought forward by Mr. Trautman which made it plain to the newspapermen who listened to him that the C. P. R. under its present government and management is not indifferent to public opinion but the very contrary, and all those who heard him were impressed by his frankness and fairness. This circumstance we believe to be of interest to the public to know and that is why we have referred to it as fully as we have.

Sessions were held on Friday which took up the whole of the forenoon and until 5:30 in the afternoon. Mr. Ball was re-elected president and Mr. Walker secretary-treasurer.

### THE AUTO DRIVE

By appointment with the president of the Penticton Board of Trade the visiting pressmen met a committee from the Board of Trade and were taken in autos for a drive to the principal points of interest. The first stop made in the trip of inspection was the new \$60,000 school building which is practically completed and will be ready for occupancy on the re-opening of school after the holidays. It is a handsome brick building of eight classrooms with wide roomy corridors on the ground floor and large convocation hall upstairs, and all the appointments for ventilation, heating, fire alarms, fire escapes etc. appear to be the very latest and most effective methods.

Main Street, the leading thoroughfare, runs from Penticton straight southward to Dog Lake on which there is a fine beach and a stretch of beautiful park land extending to the shore, while orchards extend along the benches to the east the entire distance and also down the east side of the lake for a piece. The drive over the benches was a revelation. No one would think while passing up and down the valley on the main road that these benches were nearly so wide, but when up over them the situation takes on an

Continued on Page Two.

**PENTICTON SECURES CONVENTION**

West Canada Irrigation Association Meet There in 1914

The West Canada Irrigation Association held its 1913 convention at Lakeview last week and a hard pull was made for the convention for next year. The two principal aspirants, Kamloops and Penticton, and each conducted a vigorous lobby during the progress of the convention, but Penticton won out.

The task of taking care of the convention which will fall on the people of Penticton will be no light one, but they are equal to it. Besides, they possess many other advantages which no doubt weighed in their favor, and not the least of them was the excellent hotel accommodation which they have in the Lincoln. It is also confidently believed that there will be railway connection by the Kettle Valley with points in Southern British Columbia and Southern Alberta by that time.

### ANOTHER DRILLING MATCH

Hedley was not allowed to have the monopoly of the excitement over drilling matches and on Sunday evening last another contest took place up at the mine. We have not learned what was the amount of the wager but the contestants were Jack Trewelab and W. Liddicoat, miners of the Nickel Plate. The time allowed was 12 minutes for each.

The one man Stevens sharpened the steel for both. Billy Trimble turned for Liddicoat and Yorky turned for Trewelab. The rock was a dark gray granite of much the same texture as that used in Hedley and as all the steel stood without any breakages the conditions were about as even as they could very well be. The winner was Trewelab who put down a hole 23.7-16 inches deep while his opponent drilled 22.5-16. He has figured in other contests both here and in Rossland and if he keeps in training until Labor Day and is careful to avoid all excesses between now and then and has a good partner to help him out, he stand a very good chance of finishing pretty near the top on that occasion, for that 26 odd inches was a tidy performance for 12 minutes drilling straight away.

### DALTON-LINGDREN

The following paragraph taken from the social and personal page of the Vancouver Province will be read with special interest in Hedley.

"At the residence of Mr. William Godfrey, West Point Grey, on Tuesday, August 5th, the marriage was solemnized of Miss Olivia Lundgren of Vancouver to Mr. Charles Dalton, manager of the Bank of British North America, Hedley, B. C. The ceremony was performed by the Rev. Professor Truempert, rector of the parish. The bride who was given away by Mr. W. Godfrey, looked charming in a grey travelling suit, and carried a bouquet of white roses. Her bridesmaid was Miss Dorothy Godfrey, while the groom was supported by Mr. Edward Godfrey. A small reception was held after the ceremony, amongst whom were the Rev. and Mrs. Cartwright, Mrs. Edward Cartwright, Mrs. Burpee, Mrs. Wilson, Mr. and Mrs. Chapman, Mr. Statham, Mr. Colin Harvey, Miss Kathleen Farrell and a few others."

### HOSPITAL DONATIONS

The following list of donations to the hospital is acknowledged by the patron:  
Mrs. Mierhoffer, cauliflower, carrots, lettuce and flowers; Mrs. Clare, beets, cauliflower, carrots, lettuce, radishes, apples, turnips, spinach, onions, peas, beans, potatoes; Mrs. Bowenman, fresh trout; Mrs. Winkler, turnips, carrots and flowers; Mrs. Loouner, flowers; Mrs. Forbes, flowers; Mrs. Ross Allen, flowers; Mrs. Hamilton, flowers; Mrs. Brass, flowers; Mrs. Wirth, flowers; Mrs. Boeing, flowers; Mrs. S. L. Smith, flowers; Mrs. G. P. Jones, flowers; Mr. Cameron, lemons, ice-cream; Mrs. E. M. Daly, Keremecos, box of apples.

### The Hedley Gazette

and  
Similkameen Advertiser.

### THE PROSPECTOR'S OPPORTUNITY

The statement is frequently made that it is in times of money tightness the mining industry is most likely to come into its own. That at all events has frequently proven to be so, and we need not go any farther for an example than in the case of a mine in the Similkameen riding which enjoys the distinction of being the first lode gold mine in British Columbia to pay regular dividends. The mine referred to was the Cariboo in Camp McKinney. It was in 1893 when times were shockingly bad in the United States and not as good in Canada as could be desired, the owners of the Cariboo who were Spokane men were pretty hard up financially. Believing that the Cariboo would pull them out if they could realize on a little of the gold that they knew to be in the property, they bought a second-hand stamp mill on credit and got together a crew of miners who were told that they were to get no pay if it did not come out of the ore. The merchants furnished supplies on pretty much the same kind of layout. The ten stamps were taken in over the snow, there being no roads at that time, and without a building over them to shelter the batteries, the stamps began to drop in April 1894 on rich surface rock and a few months run put them all out of their troubles. The property turned out \$1,700,000 in bullion before it was shut down and paid about \$500,000 of it in dividends.

There is not lacking the evidence that money is available today for the development of promising prospects if the owners will only listen to reason. Men who understand mining and have money to invest in unproved properties are prepared to take a risk; but no more risk than is necessary, and they require the moneyless owner to take a little of the risk as well. It is useless to expect that any mining investors who know what they are doing and what they can do, will pay out cash for the mere privilege of spending a lot more money on a property that may not be worth a bean. Mining investors do not do business in that way any more, and the camps that are long in opening up are the ones where the majority of promising claims are held by men who have no money to work with; no stomach to work themselves without it, and no sense to see that it will be to their own interest to give all the time re-

quired to prove up their properties when men who have the money and who know how, are willing to take a chance.

The visit here last week of men from the Canadian Mining and Exploration Co. who are already favorably disposed towards the camp, is an acquaintance which should be cultivated, and the golden way to cultivate a desirable acquaintance is through the exercise of sweet reasonableness. It is the prospector's opportunity; what will he do with it?

### DISTRICT PUBLISHERS MEET

Continued from Page one.

altogether different appearance. There are on the benches themselves no less than three main roads running north and south and fruit farms all planted to orchards stretching off on either side and on them are handsome comfortable residences showing that the owners have settled down to fruit growing as their avocation. So rapid has been the growth of these trees, none of which are more than eight years' old, that in many cases it is difficult to see the houses embowered among the trees loaded down with their wealth of fruit. The orchards on these benches between Dog Lake and Okanagan Lake do not stop at Pentiction as we go northward but extend past Pentiction for about four or five miles more on the way to Naramatta.

The ground obtained for golf links was passed on the way but the course has not yet been laid out.

The line of the Kettle Valley Railway traverses this part of the bench but is lower down than most of the orchards.

### THE BANQUET

Neither did the hospitality of the Board of Trade terminate with this delightful tour of sight-seeing, but the pressmen were bidden to a complimentary banquet in their honor at the Hotel Incola where they were further entertained by the board.

Mr. E. W. Mutch, the president of the Board, occupied the chair and after a dainty banquet which did credit to the cuisine of the Incola had been partaken of, he bade the visitors a hearty welcome in a neat speech which was in good taste and marked by sound sense.

He called on the newspapermen in turn and elicited from each their appreciation of the kindness which had been extended and the honor done them, as well as expressions of surprise and admiration at the evidences of advancement in the town and its surroundings, the editors of the Enderby Press and the Kelowna Courier being particularly felicitous. Here also Mr. Troutman shone to good advantage and gave the guests some very good ideas to carry away.

With a live progressive organization like the Board of Trade to look after their interests it is not much wonder that the town of Pentiction has thriven as it has.

### METEOROLOGICAL.

On August 17th the City of Dawson will celebrate the discovery of gold there. It was on that day in 1893 that gold was discovered in the creeks there.

### SAVE THE REMNANT

#### Extermination of Wood Buffalo by Timber Wolves

Investigations carried on by the Forestry Branch of the Dominion Government have proven conclusively that several large herds of wild buffalo are still to be found in the hilly country on the northern boundary of Alberta, in the neighborhood of the Slave river. A party working under the direction of Mr. A. J. Bell, the government agent at Fort Smith, made a study of the habits and obtained photographs of these buffalo, which are identical in appearance with the former buffalo of the plains, the remnants of which were forced to seek shelter in the timbered fastnesses of the north.

These wood-buffalo when fully grown are able to defend themselves against their natural enemies, but in the winter before the young yearlings have attained full strength, they frequently fall victims to the timber wolves. Bands of these wolves hover around the flanks of the buffalo herds as they pass in single file from one feeding ground to another, waiting for the opportunity to cut off a young animal and drive it from the beaten trail into the deep snow, where it is unable either to escape or to defend itself.

Partly eaten carcasses are found by the investigating party which clearly indicated that the wolves were the cause. These grey timber wolves are of large size and are very numerous in this region where they menace the existence, not only of the wood-buffalo, but of other game as well. The Dominion government already offers a bounty of twenty dollars apiece for their destruction, but so sparsely inhabited is the region and so clever are the wolves in avoiding traps, that the present bounty has had little effect in reducing their numbers. It is possible that the Dominion government will raise the bounty here to forty dollars in the hope of ridding the regions of these pests, and of preventing the extinction of the last wild bison in existence.

Alex Robinson has taken a bond on the Sally mine at Beaverdell for Victoria parties.

The Dominion Powder Company is building a powder factory at Abbotsford.

John Knudson and H. B. Meausette have a deposit of Iceland spar at the mouth of the Ashnola River which goes high in calcium carbonate. Two analyses were made which yielded 97.16 and 99.8 per cent of carbonate of lime.

There is said to be a big rush to the new placer diggings discovered on Shushanna Creek in the Yukon.

### DON'T TAKE CHANCES.

### BUY GOODS OF KNOWN QUALITY

By HOLLAND.

HISTORY is full of warnings about buying a pig in a poke. This is only another way of saying that one should buy articles of known merit—articles that will bear inspection.

The manufacturer who advertises his goods thereby shows his confidence in them. He would not spend money to tell of their merits unless they had merits. His advertisement is an invitation to you to test his sincerity by testing his goods.

You take no chances in purchasing goods advertised in this paper. The advertisement is a guarantee of quality. Insist on having the genuine articles. Something said to be "just as good" is never so good. Get the genuine—the kind that is advertised.

ADVERTISING ELIMINATES RISK.

### Synopsis of Coal Mining Regulations

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2,000 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and may the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,  
Deputy Minister of the Interior.

### WATER NOTICE

For a Licence to Store or Pen Back Water

NOTICE is hereby given that The South Kelowna Land Co. Ltd. of Kelowna, B.C. will apply for a licence to store or pen back 1485 acre feet of water from Hydraulic and Sterling Creeks, streams flowing in a North Westerly direction and emptying into Mission Creek near N. W. 1 Sec. 6, T. 27. The water will be stored in a reservoir of 871 acre feet capacity, built at head of Hydraulic Creek and will be used for Agricultural purposes under a notice of application for a licence to take and use water posted herewith on the land described as Part B, 1, Sec. 22, T. N. W. 1 Sec. 23, N. 1 Sec. 14, all in T. 27; The W. 1 Sec. 23, T. 27; S. E. 1 Sec. 3, S. W. 1 Sec. 2, W. 1 Sec. 1, all in T. 26.

This notice was posted on the ground on the 26th day of July 1913. The application will be filed in the office of the Water Recorder at Fairview and Vernon.

Objections may be filed with the said Water Recorder or with the Controller of Water Rights, Parliament Buildings, Victoria, B. C.

### WATER NOTICE

For a Licence to Take and Use Water

Notice is hereby given that The South Kelowna Land Co. Ltd., of Kelowna, B. C. will apply for a licence to take and use 1485 Acre feet of water out of Hydraulic Creek, which flows in a North Westerly direction and empties into Mission Creek near N. W. 1 Sec. 6, T. 27. The water will be diverted at South Kelowna Land Co.'s intake dam on Hydraulic Creek and will be used for Agricultural purposes on the land described as Part B, 1, Sec. 22, T. N. W. 1 Sec. 23, N. 1 Sec. 14, all in T. 27; W. 1 Sec. 23, T. 27; S. E. 1 Sec. 3, S. W. 1 Sec. 2, W. 1 Sec. 1, all in T. 26.

This notice was posted on the ground on the 17th day of July 1913. The application will be filed in the office of the Water Recorder at Fairview and Vernon, B. C.

Objections may be filed with the said Water Recorder, or the Controller of Water Rights, Parliament Buildings, Victoria, B. C.

**Town and District.**

F. H. French and A. Horswill and their families drove through to Otter Lake last Sunday.

Mrs. Bartlett and Mrs. Brookes who have been visiting Mrs. Bartlett's mother, Mrs. Soukup, left on Thursday last for Medford, Wis.

C. F. Cooke, merchant of Granite Creek and Coalmont, has bought in the Granite Creek hotel premises that was sold by sheriff sale last week.

The British Columbia Portland Cement Company are making shipments of their cement to points in the Kootenays. The first carload went to Nelson.

Miss Winnie Olmsted, formerly teacher in the city schools of Coeur d'Alene, has taken a position with Mr. and Mrs. R. Wheeler as governess and entered on her duties here.

Rev. Father Conant of Kamloops was in the valley last week. He came in to see Chief Charlie Allison who has not been making the progress for recovery that was hoped for.

E. D. Boeing returned on Friday from Granite Creek and spent Sunday in Hedley. The bridge which they were building there over the Tulameen is nearing completion and will be finished in about a week.

Rev. E. R. Bartlett, formerly Anglican pastor at Hedley, figures prominently in the cricket matches down at the coast where he played for the New Westminster team and could be counted on for a substantial score.

If a man is sufficiently industrious in his search for trouble he can generally count on finding some. Jim Grant, a farmer in the Marion valley after a diligent hunt for that commodity and running his head up against all and sundry, is at present engaged entertaining the sheriff on his premises.

Mr. and Mrs. C. P. Dalton arrived in Hedley on Saturday from Penticton where they had been stopping for a few days at the Hotel Incola and enjoying the cool breezes from Okanagan Lake. Mr. Dalton has been receiving the warm congratulations of his friends in Hedley since his return. The Gazette offers warmest congratulations.

The work of renovating and fixing up the Methodist church began last week and will be completed in about a week or ten days more. The work is being done by Mr. Beale and Mr. Stephenson. The partition at the back has been taken out and the walls and ceilings are being papered and the woodwork painted. The outside will also come in for some attention and a general improvement effected.

The new teacher for the junior department of the Hedley school is Miss Nettie Walker of London, Ont., who taught last at Banff in Alberta. She has had six years experience in teaching, one of which was in a high school in Ontario, and holds first-class non-professional certificate in all the provinces. She is also qualified to teach singing and the Board are satisfied that they have been fortunate in securing her services.

A terrific wind which appeared to come down Twenty-mile disturbed a good many from their slumbers on Thursday night last. Those along Kingstom Avenue scarcely felt it at all, but Ellis and Cavston streets and the eastern part of the town surely did. The chairs from the church which were piled up on the platform outside during the progress of renovation proved tempting playthings to the wind and were scattered about the lot.

The musical part of the church work which has for some time made a marked improvement in the services continues to draw larger congregations. There is now a good chon of eighteen voices and in some instances rare musical talent is displayed. They have been practising for some time and it is the intention to give something special on Sunday 24th inst. in connection with the re-opening of the church, with a concert on the Monday evening following.

There are all kinds of hogs and the time hog who cares nothing about the time he wastes for other people is one of the most exasperating. One of these, a drummer from a Vancouver house, kept six other people waiting for 40 minutes on him. Six times 40 minutes makes four hours which he expected the others to give for his sole benefit and maintain their serenity. And when he had finished and leisurely mounted to his place on the auto there was nothing in the shape of apology from him, nor even a gleam of gratitude towards anybody seen to float across his porcine visage.

Mrs. S. E. Hamilton and baby Wallace left for Vernon on Thursday.

Miss Blake of Victoria who formerly taught in Hedley has been engaged to teach in Princeton. The Princeton School Board are to be congratulated on securing her services. When here some four years ago or more, she was then teaching on a third-class certificate but she has since obtained higher grade and had a normal school training. As a teacher she did excellent work here in Hedley and with the professional training she has since received as well as a experience gained, she should prove an acquisition to the staff.

Keremeos peaches are coming on nicely and larger quantities of ripe ones are being shipped out day by day. Kootenay and Boundary are taking about all they can supply and it is difficult to get any here in the valley. Last week when coming through Keremeos the editor was presented by Mr. Donald McCallum with a box of beauties grown in his orchard. They were all of them perfect beauties—ripe, large and luscious. Some of those weighed after we reached home, went nine ounces and there were doubtless many more that would go over that. Mr. McCallum rather modestly requested that no mention be made of them, but loyalty to the valley and the fruit it can produce makes us loth to deprive it of the credit which is due, and Mr. McCallum has our hearty thanks for the toothsome gift.

The auto route from Keremeos to Penticton is all the while growing in popularity and a considerable volume of the passenger traffic between the Similkameen and the coast now goes over the C.P.R. from Penticton because of it. The excellent roads and the efficient auto service contribute their share to the general result and another thing which counts is the fact that the C. P. R. looks more carefully after the comfort of its patrons and can land them in Vancouver at 8.35 a. m. while those going over the Great Northern and having to submit to the Oroville layover do not get there until four o'clock in the afternoon. Those who are going to Victoria lose almost a day by going over the Great Northern as the C.P.R. lands its passengers in Vancouver in time to catch the morning boat for Victoria. The time taken for the run from Keremeos to Penticton by the seven passenger Cadillac car of Tweddle's auto line driven by Gordon Pyne rarely if ever exceeds an hour and forty-five minutes and it is not an uncommon thing for him to cut 20 minutes off that time.

Two charges for violation of the Liquor Licence Act were laid by Constable Pritchard against the Hotel Similkameen. The offences were committed on July 31st. and consisted in having his blinds down so that a clear view of the interior of the bar was obstructed, and in permitting liquor to be drunk on the premises after 11 o'clock at night. The charges came up for hearing on Saturday before A. Megraw and resulted in a fine of \$25.00 and costs for each offence. The conviction was for a first offence and the defendant erred through lack of understanding the requirements of the law. It is the first conviction of a licensee for violation of the Liquor Licence Act which has taken place in Hedley since a licence was first granted here, and that circumstance influenced to a great extent in making the fine less than is generally given in like cases. It may seem strange that men engaged in any line of business should not be conversant with the law relating to that business, but nevertheless it is so, and there is no reason to think that this is altogether an isolated case. The liquor law is continually being changed and the policy of the Attorney-general's department with reference to distributing of the statutes would seem as if the object was to keep the public in ignorance of changes in the law rather than to give them warning.

Hedley Miners' Union has taken hold of the Labor Day Celebration with a vim and are presenting an interesting programme. Of course it was not to be expected that every arrangement made would meet the approval of all, and we understand that the lacrosse team of Keremeos were displeased that no provision was announced for a lacrosse match. It happens that lacrosse is the only game played this year in Keremeos and Princeton and the devotees of the game in these places were disposed to see in it a studied plan to shut them out, but that is rather a morbid conclusion that is scarcely warranted under the circumstances and the reprisal talked of—to take their team through

to Princeton that day and play a lacrosse match in Princeton—is something which we hope they will think better of, for things done out of pique never in the long run afford much satisfaction to anybody. For years in this valley Hedley was the only place where there was organized labor to whom Labor day meant anything, but now the operations at Copper Mountain have changed that, and when the celebration is run this year by the Union it is but natural that the sports which are most popular among the members in Hedley and Copper Mountain should be given the most prominence. Neither is it fully settled that there is to be no lacrosse and arrangements for a game may yet be made. The Union has taken hold of the sports arrangements with commendable energy and townspeople are ready to render whatever assistance may be required of them.

## Town and Lower Valley.

The second round of haying is in full swing.

Hiram Inglee of White Lake was a visitor to town on Monday.

Ezra Mills is having extensive alterations done on his residence on Sixth Ave.

Peter McIntosh of Fairview has sold his saw mill to a party from close to Nighthawk.

H. O. Johnson of Oroville arrived on Monday to plaster the W. H. Armstrong house.

Jack Hewatt of Fairview is spending a few days of his holidays with George Kirby.

Major Megraw passed through on Thursday on his way to Penticton. He returned on Saturday.

Mrs. F. B. Burke of Vancouver came in Friday the 8th to spend a holiday with her brother J. A. Brown.

Mrs. Vader arrived home last week after spending a very pleasant two weeks with her sister at Molson, Wash.

Miss Graham left for her home in Vancouver last Wednesday after spending a very pleasant time on the ranch.

H. B. Meausette of Princeton came down on Monday evening's train to go to work on the W. H. Armstrong new residence.

The Susie mine at Fairview after having six men working on it the best part of the summer has closed down for the present.

George W. Cooper has been appointed fire warden of this district in place of Louis Goodchap, who resigned a few weeks ago.

A large roller was unloaded Monday by Jack Young's road crew. This will be used on the road between Keremeos and Hedley.

William, better known as "Bill" Bradley floated down from the Fairview summit to let the town know he is still alive and kicking.

Mr. Yarbrough of Vancouver spent the week end with Mr. J. A. Brown before going up to Hedley where he will work with the diamond drilling outfit.

Mr. and Mrs. Frith and children, Miss Ethel and Joe Bromley and Miss Margaret Clarke left Saturday for Osoyoos Lake where they will spend a couple of weeks' vacation.

The monthly meeting of the Similkameen Women's Institute will be held at Mrs. Frith's on Thursday the 28th of August at 3 p.m. Business—paper bag cooking, pickling, etc.

Dr. Masters of Oroville and Mr. Ritter of Loomis drove in Saturday in their Ford cars. They were accompanied by their wives and friends and intend to put in a couple of weeks camping and touring in the valleys.

Mike Costello and Tom Anderson blew in from the summit of Sixteen Mile. They have been out on a prospecting trip but they didn't say much about what they found but started out again. I hope there is something on that will cause a little excitement.

Dr. William Thomson has purchased the pure bred Percheron stallion "Sapete" from Frank Damaer, of Myncester. This horse was a prize winning colt at the Societe Hippique Percheronne, France. He is a great sire having left a splendid lot of colts in the Myncester district.

Graham Jones, of Spokane, and party, in his Oldsmobile car, and C. R. Anderson and party of Victoria arrived in town Sunday after having made the trip from the coast via Spokane. They were returning there by way of the Nicola Valley. They are just out on a pleasure trip and say they have had fine weather all through and seen some most enjoyable sights on their way.

On Tuesday afternoon of last week there was an unusual storm struck part of the lower valley. Torrents of rain fell doing serious damage to roads, fences and gardens. Fences were overturned just below Joe Armstrong's, on the Armstrong Ferry road, by a rush of water as it came down the mountain side. It washed out gardens and rendered about a mile of road completely impassible for wheel traffic. This rain storm was immediately followed by a hail storm which beat down hay and grain in its course making a swath about a mile

wide. It directed its course across the valley about half a mile below Manery's. R. J. McCurdy's road gang had to suspend regular work and put in three days clearing up the damage.

Mr. and Mrs. Richardson and Mr. and Mrs. Stevens of Summerland drove over Sunday, paying Mr. J. A. Brown a visit, and also driving through to Hedley from where they returned Monday. The year before last Mr. Stevens made a few car shipments of apples to Australia, and last year he increased his orders considerably, and this year he hopes to do likewise, and put a large quantity of Similkameen apples in the Antipodes. McIntosh Reds, Wealthys and Jonathans, will be the most acceptable as these apples are now well known for looks, flavor and splendid keeping qualities, and as there is a considerable quantity of these grown here, it will be of great benefit to many of the growers to get in on this market. Mr. Stevens who is an interested grower at Summerland had the pleasure of being shown round the orchards in the district and thought after seeing them that they were in fine shape and quite a little further advanced than in the other districts, especially with regard to the peach crop.

## THE DISTRICT FRUIT CROP.

Production May Not Reach That of 1912 But Quality is Better and More Will Be Marketed.

A writer from Penticton dealing with the crop prospects in the Vancouver Province says:

"For the past month plenty of sunlight has given color and flavor to the various fruits that were given ample opportunity to develop earlier in the year by the exceptionally moist condition of the soil, caused by a rainfall heavier than that recorded in any previous year in the dry belt. It may be mentioned in this connection that in June nearly four inches of rain fell, a precipitation which is almost exactly three times as great as in 1907, the year of the heaviest rainfall previous to the present season. The heavy rainfall has been a great boon to the growers, who are saved the trouble of much irrigation as a consequence.

The estimated crop which is to come from the entire lake district of the valley has been placed at 800 carloads, to be drawn from the following districts in approximately the proportions given: Penticton, 126 carloads; Vernon, 250; Kelowna, 255; Peachland, 50; and Summerland 120.

The above estimate does not include the amount of fruit consumed locally in the various districts, nor does it take into consideration the extreme northerly conservative one as far as marketing is concerned, as numerous small districts such as Kaleden, and small bench tracts at points along the lake, will probably make up 150 or 200 carloads of different fruits, bringing the total production for the lake district in the valley for market to 1000 carloads, the greater amount of which will be composed of peaches.

## Frosts Did Little Harm.

The heavy frosts which obtained in the valley early in May did very little damage, contrary to erroneous reports published at that time. A percentage of the early peaches were damaged, and the blooms of the pear trees and cherry trees were touched to an extent in certain sections. These frosts left Penticton, Kelowna, Peachland and Vernon practically untouched, but it is understood that some slight damage was done in the vicinity of Summerland, at Kaleden, and in several isolated orchards on Shingle creek, near Penticton."

## BRITISH COLUMBIA SOUND

Prominent Banker Thinks This Province Progressing Well, in Spite of Tight Money

"The situation in British Columbia is not a bit worse than any other continent," declared Mr. Campbell Sweeney, superintendent of branches of the Bank of Montreal, a few days since, at Montreal. "Business is sound and the development of the province is proceeding apace.

"I should say that there are few of the Canadian provinces in a more healthy condition than British Columbia

## STANDARD FRUIT BOXES

During July the inspectors of the department of agriculture, headed by Chief Inspector L. G. Clarke, were strictly enforcing the law with respect to the use of standard size fruit boxes.

The standard Canadian box is a 4-5 quart, 56.5 cubic inches, or 2.5 quart, 27.75 cubic inches. During the early part of the season when only California fruit was offering, the inspectors were disposed to take a lenient view of the matter, but as our fruit came on the market, the "short" boxes from south of the line were promptly dealt with. Puyallup dealers are perturbed over the adoption of a similar law in Chicago. The Washington state legislature at its last session passed similar legislation, but although it was intended to come into effect at once, it was found that to prevent hardship it would have to be suspended until the first of the year. The dealers had already stocked up with smaller boxes.

## FIND THE SINNER

Dairymen in Fairness to Customers and for Their Own Profit Should Keep Close Tab

When a disastrous railway accident occurs the whole trend of the enquiry is to ascertain the cause, so that measures may be taken to prevent a recurrence of the wreck. If a fault is noticed in any workshop is not the particular delinquent sought out? Every traveler on a steamer pays passage money; the several branches in a department store are all expected to show a profit on the year's business. So the dairy farmer will do well to enquire as to whether he has any delinquents in his present herd of cows, perhaps one or two are in a fair way to wreck his fortunes, their passage money may be paid by some better producers, for often two or three out of every herd of twenty cows show no profit at all on the year's production of fat.

Plenty of cows in June and July gave over one thousand pounds of milk and over thirty-five pounds of fat. What dairyman would voluntarily keep the kind of cows that yielded only twenty-four pounds of milk during last month? Yet some men got only that much from a great many cows in Ontario and Quebec. This is the point: Each dairy cow has a certain responsibility, that of producing plenty of milk and fat at a profit. So, also, has the dairyman his responsibility, that of knowing his cows do not shirk theirs. His business is to know what each cow does; she won't tell, he has to keep individual records to find out. They cost little, they do much.

The Susie claim at Camp Fairview has been under development for the past few months and is now under option to an Eastern corporation. Steve Mangott was in charge of the work.
