GOLDEN ZONE RESUMES

Force of Twenty Men to be Employed—Work to Continue All Winter.

C. H. Brookes who has a bond on the Golden Zone has made arrangements to work the property all winter with a good working force. Some 15 men or more have already been engaged and the working force to be employed will be about twenty men. During the past ten days various trips to the property have been made and some supplies taken up.

Considerable work has been done to provide accommodation for the men, and to this end three more cabins will be required. Work of building these will go on at once and it is the intention to team in supplies enough to do all winter so as to obviate the necessity of any heavy teaming during the winter when the snow gets very deep. The surface work to be undertaken at once will be the building of the three cabling already mentioned; putting up new shaft house and closing in the mill, and no time will be lost in getting this done so as to have the work in the mine well under way before the winter sets in.

A. Creehan will be general superintendent in charge of the work with L. H. Patten foreman.

The development work which it is their intention to carry out will be that of sinking the shaft to a depth of at least 300 feet and running drifts both ways on the 150 foot and 250 foot levels. This should give them a fair idea of what they may expect and if the property opens up satisfactorily under this it should serve to give the camp another producer.

HOW NOT TO GET ONE

The Greenwood Ledge is not likely to fall a victim to the wiles of the class who "fatten" on "working" the country press for free publicity. This is an evil that all country publishers are more or less to blame for helping to perpetuate and it is a very foolish thing to do. Often without any attempt to give the publisher a single cent of revenue in return for the favor, hundreds of dollars worth of advertising in the shape of skillfully sugar-coated pills is palmed off on the luckless publisher and he swallows them in all his serene guilelessness. Other times a little dab of paid advertising is deluged with a flood of sugar-coated dope. Now it would be quite as reasonable to ask a merchant to throw in a pair of boots with a purchase of a pair of suspenders as to ask what these people sometimes do. In fact that example would not begin to describe the disparity that often exists between the paid service and the sponged service that is to be found in many of the propositions put up to country publisher. Men who are lavish with their advertising in the city dailies taking full pages to magnify themselves and their schemes, often think that without giving to the country publisher an inch of advertising they should have their names kept before the public by harnessing up with some public utility scheme. The Gazette pleads guilty to being roped occasionally on the "public benefit" bait, but nevertheless we are not nearly as guilty as most of the others and our waste paper basket receives most of it. The Ledge says:

"The press agents are still working the country editors with free publicity dope. We are surprised that so many newspaper men grab at this stuff like a fish biting at a gilded fly. The editors who use free publicity matter do not buy many automobiles."

SUCCESSFUL OPERATION

Mexican Used Butcher Knife to Relieve Stomach Trouble—Is Dead

Los Angeles, Aug. 23.—Jose Armandez, a Mexican, is dead today as the result of having tried to relieve an attack of acute stomach trouble by performing an operation upon himself with a butcher knife.

He died at the receiving hospital, where, in his death throes, he secured a pair of scissors from a nurse and attempted to kill himself to avoid his pain.

BLAMING THE JINGOES

This Shows How That Wise Man the Sneerer is Only a Historical Repetition After All

(News-Advertiser)

An historical inquiry would probably show a lack of novelty in the charge that gun and warship makers in England are at the bottom of the demand for an adequate British navy. We have no doubt that there were people in Great Britain at the beginning of the last century who said that Nelson was fighting the French in order to make money for contractors. The ships in the firing line at Trafalgar, the muskets in the hands of the men who formed Wellington's squares the horses which the Six Hundred rode, were not presented to the British nation. They were paid for and some persons may have made a profit out of them. Mr. Larkin of Toronto and others who charge that Mr. Winston Churchill and other British ministers, that Admiral Beresford, Lord Roberts and other British commanders on sea and land, are simply promoting the enterprises of the contractors of war material, are not saying anything new. There was never a time in British history when the men defending the nation altogether, escaped the sneers of cynics and faultfinders. If these voices had been heard in Elizabeth's time the Spanish Armada would have made a successful invasion of England. If the cry had prevailed a century ago Bonaparte would have made his landing. The British nation stands because the men who sneer are always less in number and weight than the men who stand up for their country. In the record of those whom Britain honors and to whom she will pay her eternal tribute of grateful praise, there are no shirkers and sneerers. The nation always had them, but it is happy in its power to disregard and forget them.

PROTECTION AGAINST TYPHOID

Owing to the prevalence of Typhoid Fever in many parts of the Dominion of Canada, the attention of the general public is called to the protection afforded to this disease by the inoculation of Typhoid Vaccine.

The vaccine may be injected by a doctor, or in the case of a doctor not being at hand, a trained nurse could carry out the procedure. The first injection of vaccine, amounting to a few drops of a sterile liquid introduced under the skin, is followed in ten days' time by a larger injection, and for greater security a third may be given ten days after the second.

A few hours after the first injection, a little headache and slight malaise may be experienced, with tenderness about the point of inoculation. This is seldom sufficient to cause a man to stop his work, as by the next morning he usually feels as well as usual. After the second and third injections no reaction is produced, the person seldom experiencing any discomfort whatever.

It is significant that many large employers of labor have gone into this subject deeply, with gratifying results statistics having shown that of those properly inoculated practically none have taken typhoid within a year, and protection is probably afforded for a much longer period.

This method should appeal especially to friendly societies and labor unions who pay benefits to their sick members.

Typhoid vaccine may be obtained on application to the Provincial Board of Health, or from drug-stores.

W. BARTY, M. D.
Acting Secretary.

HOSPITAL DONATIONS

Mrs. Loomet, flowers, cucumbers, parsley, beets, carrots, beans, parsnips and turnips; Mrs. Mierhoffer, lettuce, savoy cabbage, corn, cucumbers, raspberries and crabapples; Mrs. Winkler, flowers; Mrs. Clare, vegetable marrows, cabbages, carrots, peas, beans, onions, beets, turnips and crabapples; Mrs. H. B. Brown, two spring chickens; Mrs. S. L. Smith, flowers, vegetable marrow, cauliflower, parsley, mint; Mrs. Hamilton, flowers; Mrs. Wirth, flowers; Mr. Collin, fresh eggs and flowers.

MINING NOTES

The Provincial Mineralogist is getting some bon-bons these days on his mines report for 1911, recently distributed. It is a comprehensive report in many particulars. Nevertheless it is capable of several very material improvements and the portion to which we would commend his special attention is the tabular. For instance, tables which have not been re-read or amended for four or five years cannot very well be considered up to date and as proof that they have not been re-read nor amended by him in that time we need only point to the fact that he has men mentioned as deputy mining recorders at certain points who have not held the office for five years. But the crowning sin in the tabular portion is the one where he persists in defying all claims of decent geography by insisting that the Nickel Plate mine is situated over in the Boundary district one hundred miles away from where it really is. The report of course still goes to the Agent General's office in London and if anyone goes there to see what the Similkameen district has produced and turns to tables IV, V, and IX, pages 88, 89, and 91, he will come to the conclusion that the Hedley Gazette has been lying when it claimed that the production of the Nickel Plate mine in the Similkameen valley and Similkameen electoral district up to June 30th, 1912 was \$4,159,310.74. This is a mighty poor way to encourage mining capital to develop the resources of the Similkameen, but of course no one must lay impious hands on the mineralogist's tables or hint at "mussing them up a bit" from time to time. They are to be considered inviolable no matter whether they dispense the claims of geography or not.

Mill foreman Clure is still over at the Jewel mine near Eholt where he is getting the stamp mill into working order. He is expected back in Hedley in a week or two more.

Boundary ore tonnage keeps on making new records of production from time to time and the increasing price of copper gives every encouragement to them to go on breaking records.

The Star says "Swede placer miners on Granite Creek have been taking good values in coarse gold, three and four dollar nuggets being quite plentiful, and a fine platinum nugget also recovered.

Robert Keffer has been examining claims on the upper Tulameen for the B. C. Copper Co. Bob will take back with him to Pullman a lot of good practical outdoor experience and mine practice to help him in the final year of his mining course.

Charles Camsell of the Canadian Geological survey came in from up the river points on Monday afternoon and expects to put in about a fortnight in this vicinity looking over the camp and keeping his data thereon strictly up to date, as well as making further investigations. He has spent a busy summer going over the route mapped out for the excursion next summer of the visiting geologists from other lands and the party who will be shown over the route by him will be fortunate in the guide whose services will be at their disposal. He has finished most of his maps and guide books and sent them in to the department. Mr. Camsell has been on Copper Mountain where development is in course and before going there he spent a couple of days in the platinum belt on the Tulameen with a couple of gentlemen who represent large concerns. These were J. E. Colby, of the firm of Baker & Co., platinum dealers of New York, and A. B. Consmaker, representing Matthy & Co., of Hatton Gardens, London, England, the largest platinum dealers in the world. The world's supply of platinum in sight is diminishing year by year while the demand for platinum is constantly increasing and it is now up to them to discover new fields. This situation may lead to extensive exploration of the platinum deposits on the Tulameen. These gentlemen were fortunate in getting hold of Mr. Camsell to go over the field with them and explain to them the geology which he has carefully worked out.

PLAYMATES KILLED CHILD

Four-Year-Old Tot Killed For Following Bigger Boys

Kansas City, Mo., Aug. 22.—Two playmates of four-year-old Joseph Timmerman, whose lifeless body was found to-day buried in underbrush in a gully in the northeastern part of the city, confessed late today to killing him. A stone, hurled when the youngster attempted to follow them on a trip into the woods, struck the lad in the temple.

John Farley and John Heinberger, both ten years old, after telling many conflicting stories, finally admitted the deed. They said they alone were responsible.

Little "Joe" was last seen alive Sunday afternoon, when he kissed his mother, Mrs. John Timmerman, wife of a railroad engineer, good bye and told her he was "going to hunt bugs."

Farley and Heinberger say that when they started on the "hunt" they gave the four-year-old child candy in an effort to get him to return home, because they did not want him with them.

When the youngster continued to follow, the older boys threw stones at him. One of the missiles struck the boy and he fell. The boys say when they saw the lad was dead, they carried him into the underbrush, where he was found to-day.

"We pulled leaves and branches and dirt over him until he was all covered up," John Heinberger sobbed out.

RECORD OF FOREIGNERS

Department of Labor Asks Employers to Keep It

Ottawa, Aug. 23—A circular has been issued by the department of labor and sent to various railway contractors on government work.

The circular contains certain regulations calculated to protect men employed on such work and it requires that all contractors, sub-contractors and other employers of labor shall keep a complete record of names, nationalities, place of birth and latest address in Canada, together with home addresses and name and local addresses of the nearest relatives of employees.

In the past such record has not been kept, and as a result many foreigners with families at home in case of death have been buried unidentified. Enquiry from waiting relatives at home in many cases have been futile.

Under the new regulations the names, addresses, etc., will be forwarded to the department of labor for reference in case of death.

Hon. Walter Long, a British parliamentarian who is on a visit to Canada, is on his way west and will visit British Columbia.

A MINISTER OF MINES

The report from Ottawa to the effect that a Mines Department would be created with a regular minister in charge whose entire time would be devoted to development of the mineral resources of the country, should be welcomed in all parts of Canada and particularly here in British Columbia which has so much at stake in her wealth in minerals. Heretofore the grouping of the Geological Survey and Mines Branch with other departments such as those of Inland Revenue and Department of Interior where they could only occupy the most subordinate positions was unsatisfactory and could not be attended with desirable results. The Mines Branch should be in charge of a departmental head who could lay some claim to special knowledge of the mining industry. Already we have noted sectional clamors here and there and claims put forth for the portfolio on behalf of certain candidates for the honor. Some papers take it for granted that the portfolio will belong to British Columbia, but those urging that claim should remember that there are other mining provinces in the dominion as well as our own and if any of these have a representative in the House of Commons who has special training or fitness for the position it would pay us better in the end as a mining province to have such a man appointed. Some may say that it is all very well for us in Yale-Cariboo who have now a representative in the Dominion Cabinet to take disinterested ground like this, but they should not forget that there was no special pleading in Yale-Cariboo last fall for the appointment of Mr. Burrell to cabinet rank and it was only because of his special fitness for the portfolio of Minister of Agriculture which obtained for him the position he now holds and which he fills with so much credit to himself and the constituency he represents, for agriculturists of other provinces are magnanimous enough to proclaim him the best man for the portfolio procurable from any of the provinces. Mr. Borden has surrounded himself with a cabinet of specialists and in framing it, many good men were set aside solely because there was no particular line in which they could specialize. The man who takes the new portfolio of Mines should be thoroughly in sympathy with the industry and possess along with the requisite knowledge of

the things that pertain to mining, a sufficient amount of that judicious optimism without which no Minister can make a success. There are men who may be classed as experts in mining who would nevertheless be unsuitable for the position, but Premier Borden can be trusted to pick out the right one and when the right man is found he can use the Geological Survey as an auxiliary to active mining to better effect than ever before. The improvement in the Survey in late years has come from within itself and has not been due to any special fostering from the Minister of the department in which it had been placed. Economic geology is the special line of the work of the Survey on which most stress should be laid by the minister in control of the department and the right use of it must result in an enormous increase in the mineral output to add to Canada's wealth.

Turbulent Vancouver Liberals of the office-seeking variety who battened and fattened off the public in the early days of the Yukon administration are reported to be averse to having the naval question taken out of politics although that is the course which the head of the Liberal party in Great Britain advises. These Vancouver Liberals must evidently think that some political advantage may accrue to them at the present juncture by appealing to the foreign elements in the Dominion against having Canada do her part as a member of the British Empire in maintaining Britain's naval supremacy. Is anything further needed to show the depths to which the professional politician in Canada is prepared to sink?

GENERAL NEWS

American mountain climbers in Alaska claim to have discovered a very large mountain in Canadian territory that is unmaped.
The suffragettes who made the attack on British ministers in Dublin are being forcibly fed to prevent them from working up a little starvation sympathy.

WATER NOTICE

For a Licence to Take and Use Water

NOTICE is hereby given that I, Robert Brown of Vernon, B.C., Indian Agent, Okanagan Agency, will apply for a licence to take and use 3 cubic feet of water out of Sasip creek, which flows in an easterly direction through Indian Reserve No. 1 and empties into the Similkameen river near Indian Reserve. The water will be directed at Sasip place and will be used for irrigation purposes on the land described as Indian Reserve No. 1.
This notice was posted on the ground on the 11th day of August, 1912. The application will be filed in the office of the Water Recorder at Fairview.
Objections may be filed with the said Water Recorder or with the Controller of Water Rights, Parliament Buildings, Victoria, B. C., 3-1 J. Romer Brown, Indian agent

Sealed Tenders address to the undersigned, and endorsed "Tender for the Construction of a Breakwater in Victoria Harbour, B. C." will be received at this office until 1.00 p.m. on Thursday, September 5th, 1912, for the construction of a Breakwater at Victoria Harbour, Victoria, B. C.

Plans, specifications and form of contract can be seen and forms of tender obtained at this Department and at the offices of W. Henderson, Resident Architect, Victoria, B. C.; G. C. Forsyth, Esq., District Engineer, New Westminster, B. C.; B. Slog, Esq., District Engineer, Toronto, Ont.; J. L. Michaud, Esq., District Engineer, Montreal, Que.; and on application to the Postmaster at Vancouver, B. C.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The department does not bind itself to accept the lowest or any tender.

By Order
R. C. DESROCHERS,
Secretary.

Department of Public Works,
Ottawa, August 8, 1912 2-2

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

Town and District.

In Hedley on August 22, to Mr. and Mrs. John Smith, a son.

James Corrigan came over from Hope last week and reports great improvement there within the past two years.

Harry Rose, road foreman, started a small gang to work up Twenty-mile last week making some repairs to enable supplies to be teamed in to the Golden Zone.

Miss Ruth Bowerman has been engaged to teach a new school opened at Five-mile and took the train to Princeton on Monday. There is a dearth of certificated teachers in the province and permits are doubtless required for a number of the schools.

H. A. Hincks has returned to England with his bride but he did not come to Hedley as the head office sent him to Victoria for the present. The fine golf courses in Victoria which are more like what he has been used to in England this summer will doubtless be appreciated by him.

Some needed repairs to the sidewalks are being made. It is surprising how quickly lumber begins to decay when laid down in board walks and as lumber is bound to get dearer year by year in this valley it is fortunate that the opportunity to get cement to take its place has come as soon as the Great Northern's peculiar ideas of doing business would let it come.

Mr. A. P. Hill has been engaged as principal and is expected along any day. School will re-open on the fourth of September as it was not thought worth while to have it begin before the Labor Day celebration. The assistant teacher has not been engaged but the Board expect that one would be on hand for opening day.

Mrs. Pazol, of Isle of Wight, Eng., who has been spending a few weeks visiting her parents Mr. and Mrs. Freeman of Princeton, spent the week end with Mr. and Mrs. Sproule. She is accompanied by her sister Miss Freeman. Both ladies play a very good game of golf and took advantage of the Hedley course during their stay.

A very distressing incident is given in another column where the practice of stone-throwing among children is responsible for another death. That a similar fatality has not occurred before now among children in Hedley is a wonder, for almost any day when snow is not on the ground the same habit is to be seen among school children going to and from school and goes on apparently unchecked by parent or teacher.

Mrs. Whiteman spent the week with Mrs. Sproule while her husband was out on the road selling coal for the Princeton Coal and Land Co. Word received from him since he left was to the effect that he had been meeting with good success and had sold several car-loads as far as he had gone. The coal scores high as a domestic coal and that is the trade they are going after as much as possible.

Jack Raitor, former G. N. R. agent at Hedley, returned on Wednesday last from a two months' lay off which he had taken for the benefit of his health which had been failing. He expected to go to work next morning but found himself unable to do so and he took the train out next day. It was his intention to go to Rochester, Minn. to undergo an operation and it is said to be doubtful whether he will come back to Hedley when he is able to resume work.

It is to be hoped the committee in charge of the drilling contest on Labor Day will take the hint given them in the Kereueos correspondence, and we are sure there are none of our readers but will agree that the complaint is a just one, for at past exhibitions of the kind here there was only a small part of those present who could see because of the tendency to crowd up on the contestants. It is just as easy to have it so that all may see if there is only some proper provision made for keeping the crowd back. Heretofore the committee have always considered that when they appoint time-keepers and judges they have done all that is required of them, but so far as the crowd is concerned that is only the smallest and least important part of it. Let us hope for the credit of the town that outsiders will have no further cause to complain that we know nothing about running a celebration but will try in the future to act with a little more circumspection and with more regard to the wishes and comfort of others than that displayed by a bunch of hogs around a trough. For that is about the only simile that will adequately describe the way it has always been at this event in the past.

On Sunday last the Misses Jackson, of the New Zealand, with George Shelder and Will Martin, came across a couple of black bears on Stirling Creek that were near enough to be struck with the fishing poles but they didn't strike. Instead each side tried to scare the other out of countenance for a few minutes, but the bears got tired of this and went off into the bush and nobody chased them very hard. There was no running nor tree climbing which often accompanies adventures of this kind. In fact most of the party were too badly frightened to exercise powers of locomotion and there was a decided feeling of relief when the bears decided to cut the acquaintance. The fishing was good up the creek but the bears made the thing too realistic.

There was danger during the past fortnight of labor troubles interfering with mining operations in the Boundary district but at last reports amicable adjustments had been made and the work is not likely to be interfered with. The sliding scale based on the price of copper which was entered into in Butte some years ago is also observed in the Boundary where almost the entire value is in copper. The latest agreements arrived at are that employees of the B. C. Copper get an increase of 25 cents per day all round while in the Granby the mine employees get an advance of 25 cents per day but not the men in the smelter who it appears had not been subjected to any reduction on the last fall of copper.

Who stole the flag rope from the Hedley school premises is something the Board of public school trustees would like to know. It is not only the cost of a new rope but the task of getting it through the pulley on the top of the flag pole that is the main trouble in connection with the affair. The presumption is that no Canadian nor British subject did it at all events, and the general surmise that some of the prairie schooner people from the south of the line who have come through here on their way north were the most likely. Not only was there the incentive of getting a good rope without paying for it which is enough in itself to move the light-fingered, but there would be for many of them the additional satisfaction of doing disrespect to the British flag.

The Oroville Gazette gives fuller particulars of the robbing of the miner, Paul Nelson, in the jail in Oroville. Nelson, it appears, had taken on a rather picturesque jag and was in a decidedly incapable condition when he was gathered in by a policeman. The person suspected of the robbing is Ed. Hayes, who left Oroville at the time when the robbing took place and was traced out to Haines' ranch. He had meanwhile left there and Haines was taken in charge for harboring a criminal. Haines confessed that Hayes had told him of robbing Nelson in the jail and that another man Jack Finlay had assisted him and they had procured a bolt cutter at the blacksmith shops to cut off the locks. Finlay was also arrested on the strength of this. The Oroville Gazette adds: "The case is one that calls for the utmost exertions of the officers to ferret out, and when the accused is apprehended, and the guilt of the perpetrators is finally established punishment shall follow swift and severe, no matter who may suffer. In the main Oroville is one of the most orderly towns in the state, but when a crime is committed here it is spread abroad and magnified to the discredit of the place. The people believe in law and order, and as a community protest against wrong doing. Too often undue publicity is given to minor offences, and this publicity reflects upon the town. In this instance a grave crime has been committed. What little evidence obtainable points to a man well known in this locality, a man whom we could hardly believe would be mixed up in an act of the kind. He may be innocent although his actions indicate guilt. His apprehension should enlist the active efforts of the officers of the law, so that the facts may be ascertained and suspicion removed from others now under a cloud."

County Court of Yale

A sitting of the County Court of Yale will be held in Fraternity Hall, Hedley, on Tuesday, October 30, at 2 o'clock p. m.
By Command

WATER NOTICE

For a Licence to Take and Use Water
Notice is hereby given that I Anton Winkler, of Hedley, B.C. will apply for a licence to take and use 2 cubic feet per second of water out of an unnamed Spring locally known as Bald Hill Slough. The water will be diverted at a point 1 mile north of Thos. Simons south line and will be used for irrigation purposes on the land described as A. Winkler's pre-emption. This notice was posted on the ground on the 13th day of May, 1912. The application will be filed in the office of the Water Recorder at Fairview.
Objections may be filed with the said Water Recorder or with the Controller of Water Rights, Parliament Buildings, Victoria, B. C.

ADVERTISE IN THE GAZETTE

Synopsis of Coal Mining Regulations

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2,000 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be stacked out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.
N.B.—Unauthorized publication of this advertisement will not be paid for.

THE KEREMEOS PAGE

KEREMEOS, the Centre of Lower Similkameen---Famed for Fruit Growing

Town and Lower Valley.

School started last Monday with a full attendance.

Hiram Ingles of White Lake came over for a couple of days last week.

A. H. Harrison is now drawing lumber to build his new cannery with.

W. Reinecock was in from Pentiction over the week end buying beef cattle.

Baptiste Surprise is in a critical condition and there is little hope for his recovery.

A. E. Humphrey, travelling inspector of immigration, is expected here in a few days.

A new constable has been appointed for this district only we have not got track of his name as yet.

Mr. Ronald Howitt and son Harry, drove over from Fairview last Thursday returning Saturday.

Miss Hazel McKenzie of Vasseaux Lake was the guest of Mrs. Kirby for a couple of days last week.

Percy and Fred Howell are doing some good improvements on their pre-emption on Green Mountain.

Tom Daly left Monday for Soap Lake where he will spend a few days, before joining the Portland colts.

The K. V. railway are shoving the work forward and expect to be linked up within eighteen months or less.

Ben Anderson of Chopaka was in town last Thursday and reports his large flock of sheep in fine condition.

Harry Tweedle went up to his pre-emption on the Ashnola to do some improvements. A Brewer accompanied him.

P. L. Wetherby of Vancouver was looking over different properties in the district last week with the idea of purchasing.

George Emory, our worthy station agent, pulled out a fine trout last Saturday measuring within a fraction of seventeen inches.

Hans Richter leaves shortly for the Calgary stampede where we believe he will compete in the broncho busting contest. If Hans rides we wish him every success.

The butchers of Pentiction will be in the beginning of next week to round up all the beef cattle in sight. We hope they won't get them all, because we can't live on peaches in the winter.

Miss Winnie and Jeanette Bagley of Spokane visited their cousin Mrs. D.J. Innis last Thursday going on to Green Mountain the following day accompanied by Mr. Forbes to spend a few days with their aunt, Mrs. L. A. Clark.

J. Schmidt and M. Simpson, representing the British Columbia Accident and Employers Liability Insurance Co., were here a few days last week writing up a few policies. The Hon. Price Ellison, minister of finance, is the president of the new company.

D. P. Quinton of Needham Market, Suffolk, Eng., arrived from the old country on Saturday last. Mr. Quinton is a brother of Ralph Quinton who was well known here before he returned to the old country a couple of years ago. Mr. Quinton expects his father to join him next summer.

Tons of peaches have gone and are going to waste through lack of transportation facilities. When this Rip Van Winkle railroad wakes up and does something we will have a market. Won't you wake up Jim and come to Keremeos and we will fill you so full of peaches that you will wish you had the road through years ago to get rid of them.

H. L. Collins, publicity agent for the Calgary Herald, was in town Monday and Tuesday looking up subscribers and also to give the subscribers here a chance for publicity in the Calgary paper. If he receives ten new subscribers, which we believe he has already got, it will mean that through a correspondent stationed here publicity of this district will be given in the Calgary Herald, twice a week or weekly as is required.

The rock drilling contest to take place at Hedley on Labor Day is anxiously awaited and it is to be hoped that the stewards in charge will see that all the spectators get a fair show of viewing the contest for on different occasions we have found that the crowd were allowed to come in so close to the contestants that only a few were able to see. Forty feet at the least should be between the contestants and the spectators thereby giving them all a show.

Daniel Samuel looks as if he is at his old trade again. He was seen riding the ranges the other day and apparently by the look of his horse he had been doing some tall riding. On being questioned as to what he was looking for said a bay horse, a few hours later when asked the same question replied that he was looking for a roan mare and colt belonging to his aunt. Looks kind of fishy in the face of it.

J. D. McDonald of Seattle has been in the district the past week looking over the Similkameen river so as to be able to report on the feasibility of putting in a number of gold dredges. Mr. McDonald is representing large capital interests, and in a week or ten days expects to give us a fuller report. After more of the company's men have looked over the proposition he thinks it won't be long before we see four or five dredges on the river but before this will take place the river will have to be drilled and it is expected this will be done this fall.

Lacrosse! Yet it's here and the boys are getting along as well as can be expected and are looking forward to a nice friendly game with Princeton on Labor Day at Hedley. This being the first game of lacrosse to be played in the Similkameen we would like to see the sports committee put up a little purse to encourage the national game especially if there are not enough teams to take part in the baseball. We would recommend in case of there not being more than two baseball teams to compete for the prize offered a portion of the stakes could go towards a purse put up for the competing lacrosse teams. We'll all come anyhow and join the sister town in making Labor Day a success.

We had the pleasure of meeting a real old-timer on Monday in the person of Thomas G. Earl of Lytton, B.C. who is making a tour of inspection for the provincial government to look into the progress of agricultural pursuits during the past six years. Up to six years ago Mr. Earl was a member of the Board of Agriculture. He is one of the few forty-niners left to tell us of the good old time as well as bad. Fifty-four years ago Mr. Earl came to B. C. to join in the gold excitement. He says it is wonderful the progress that has been made in the orchards the past six years, claiming that as far as he inspected there is no blight or disease of any kind to be seen among the trees, also saying that the Richter orchard is the finest in the world. As the G. N. train was on time it prevented us from having a longer interview with this venerable gentleman.

COPPER

The New Edition of the **COPPER HANDBOOK**, just published, is volume X, for the years 1910-1911, and required nearly eighteen months in preparation.

It has 1902 Pages containing nearly one and a half million words or about twice as much matter as the bible. There are 33 chapters, and the book covers the **Copper Industry of the World** covering: Copper History, Geology, Geography, Chemistry, Mineralogy, Mining, Milling, Leaching, Smelting, Refining, Brands, Grades, Impurities, Alloys, Uses, Substitutes, Terminology, Deposits by Districts, States, Countries and Continents, Mines in Detail, Statistics of Production, Consumption, Imports, Exports, Finances, Dividends, etc.

Vol. X of the Copper Handbook lists and describes **8,130 Mines and Companies** these descriptions ranging from 2 or 3 lines in the case of a dead company, in which case reference is made to a preceding edition giving a fuller description, up to 21 pages in the case of the Anaconda, which produces one-eighth of the copper supply of the world. The chapter giving mine descriptions, which lists the largest number of mines and companies ever given in any work of reference on mines or mining investments, has been fully revised.

The new edition of the Copper Handbook is a dozen books in one, covering all phases of the copper industry of the entire world. It is used by the managers of the mines that make ninety per cent of the world's output of copper and is used in every civilized country of the globe. It is filled with facts of vital importance to
