A CHRISTMAS BOX

In Addition to the Customary Quarterly Dividend of Three Per Cent

NICKEL PLATE KEEPS IT UP

A Wonderful Showing in the Face of the Extensive Improvements Being Made--And the Mine Pays It All

The people of Hedley are becoming accustomed to the quarterly announcement of a three per cent dividend on the part of the Hedley Gold Mining Co., from the operations on the Nickel Plate and Sunnysides properties., but in view of the heavy outlay this year in development and for new equipment they would not have been surprised to see the dividend cut a bit or even passed altogether, but when head office aannounces that not only is the usual three per cent quarterly to be paid but an additional dividend of two per cent, the moral effect of such an announcement comes as a sort of Christmas box to all, whether they own stock or not.

This additional two per cent makes the dividend for the year 14% which is extraordinary in the face of the heavy expenditures for new equipment. Manager Jones has his predecessors badly beaten on both output and saving. Next year is likely to be a hummer. Below is the official notice to stockholders.

HEDLEY GOLD MINING CO.
42 Broadway, New York, Dec. 8, '10

A quarterly dividend of three per cent (3%) and an additional dividend of two per cent (2%) has this day been declared on the outstanding capital stock of this Company, payable Dec. 31, 1910, to stockholders of record at 3:00 o'clock p. m., Dec. 16, 1910.

Transfer books will be closed on Friday, Dec. 16, 1910, at 3:00 o clock p. m. and reopened on Tuesday, January 3, 1911, at 10:00 o'clock a. m.

PRODDING THEM UP

Minister Price Ellison Tells British to Get a Move on.

Price Ellison, minister of finance in British Columbia, is at present in England on provincial business but not for money-borrowing purposes. He was present at the Royal Horticultural Show and had the satisfaction of seeing the triumph of British Columbia fruit at the exhibition.

With other celebrities he spoke at the Canadian club dinner in London and an associated press despatch has the following concerning his speech.

"The toast to the Dominion was responded to by Price Ellison who said that he was a Manchester man by birth, a Canadian by adoption and a Chamberlainite and imperialist by choice. Amid much laughter and cheering he stated that Canada wanted the old country to "get a move on.' "We don't want to have any dealings with the United States, which made Britain a dumping ground," he added. The preference for Great Britain had been endorsed by all parties and preferential trade was sure to come. The British isles he stated, dropped in Canada would need an exploration party to find them. Englishmen don't realize that Canada will soon have a population greater than the United States. Mr. Ellison devoted the greater part of his remarks to Canadian politics and the resources of the country.

"The toast of the guests was responded to by Judge Grantham, who on a recent visit to Canada said that he had expected to see a colony and had found a nation more united and loyal than the United Kindgom which should adopt somewhat of a more congenial tone towards the Dominion. He deplored the ignorant action of British statesmen in the past and added that the Alaskan boundary sale was a standing disgrace. Canada will be an immense strength to the empire if justice is done her.

"C. E. Drummond, also responded fresh from speaking on Lancashire platforms. He stated that when asked why he had butted in at the elections, he replied for the same reason that Canadians had butted in in South Africa, namely, the real interest of the empire.

WHY NOT THE POLLOCK?

The Outlook Equally Encouraging to Many of the Paying Mines Being Worked To-day

As an example of the meritorious properties in proved camps that are going begging to-day for capital to develop them while investors are chasing after will-o-the-wisps, J. Gladden showed us this week some figures from a report of the Simmer & Jack mine in the Transvaal which is paying good dividends on six dollar rock from a three foot vein from which the ore has to be elevated from deep levels

Now the Pollock will give a better average than six dollar ore while the deposit is apparently much larger than that worked on the Simmer & Jack and no deep mining would be required for years to come.

But distant fields are always green and the public are invariably partial to the bird in the bush.

MAY HUNT BEAVER NEXT YEAR

Vancouver Province)

Such has been the exceptional increase in the number of beaver in the province since the close season was declared six years ago that it is deemed probable the government authorities will allow a partial open season late next year.

At the time the restrictions were placed beavers were almost extinct in British Columbia, but at the present time, declares Game Warden Bryan Williams, there is hardly a stream in the province lacking a colony of the Canadian national animal, and there are also portions of the province they have increased to such an extent as to create a nuisance in some places. Indeed in severa nstances permits have been granted lately to farmers to trap them owing to the fact that they were doing damage on the farms.

At the present time the close season covers only that part of the province south of the fifty-fifth parallel being, roughly speaking a line drawn east and west at the junction of the Blackwater and Fraser rivers. North of that boundary Indians and settlers have been altowed to do a certain amount of trapping. The close season in the southern part of British Columbia expires on November 1 next and after that date it is thought likely that the government authorities will take away the restrictions for a limited time.

It is not by any means the intention declares Mr. Williams, to have free and unreserved trapping nor even to outline the limited destruction of the beaver for any considerable length of time for the department proposes to keep this nearly-exterminated animal as plentiful as possible in this part of Canada.

It was thought for some time when the close season was declared that the beavers had been almost entirely extinct for years but almost as soon as the ban was placed upon the hunters and little animals began to multiply until now they are very numerous.

Any open season to be declared at all for next autumn and the year following will be aimed, it is stated, at permitting the trapping of beaver in places where they are becoming a nuisance, but preserving them elsewhere, such as in the irrigated districts where their dams on the streams have proven the means of conserving the water for the benefit of the rancher desiring to run irrigation ditches. No shooting whatever, though, will be allowed in Southern British Columbia next spring, however, as has been thought generally.

AUXILIARY EXTENDS THANKS

The Ladies Hospital Auxiliary extend their thanks to the people of Hedley for kind support extended them in the late bazaar and also in other appeals they have made since the Auxiliary was formed.

The total receipts to date have been $586.25 and expenses for materials etc. $244.20 leaving a balance of $342.05 which it is their intention to expend in furnishings for the hospital including linen etc.

THE KETTLE VALLEY SURVEY

Engineers Are Meeting With Good Success in Getting Favorable Grade.

The Penticton Herald has the following in reference to operations of the K. V. Engineers on the range between Penticton and the West Fork of the Kettle River.

"Locating parties have been at work for some time on the east slope of the Penticton range, and it is now expected that the construction gangs will be able to lay the steel up the east slope of the mountains on a grade averaging little more than one per cent, for the greater part of the distance covered. As previously pointed out, if the present general plan is adhered to when construction is commenced; the railway will sweep into Penticton from the east in an elongated horseshoe the apex of which will be somewhere southeast of Kelowna while the arms will be represented by the ascent and descent of the railway on the east and west sides of the mountains respectively.

"Many difficulties have however, yet to be faced in locating the road from the summit into Penticton and as winter is now approaching this part of the surveying will soon have to be abandoned for the season.

"During the winter the company plans to survey in the town and on the Benches.

NEW MAP OF BRITISH COLUMBIA

A new map of the province of British Columbia has just been issued by the Department of the Interior, Ottawa, which will assist in meeting the demand for complete and up-to-date information. This map, which is on a scale of 35 miles to the inch, shows not only the whole province but portions of each of the following:—Yukon and the North West territories on the north, Alberta on the east, the United States on the south and Alaska on the west. All information of a general nature, which the scale will admit of, is shown, including railway stations and all important points. The boundaries of the Dominion Railway belt and the Dominion Land Agencies into which it is divided, are clearly shown. All township and range lines of the Dominion Land system of survey, with corresponding numbers, are shown in this district. The Dominion Electoral Divisions throughout the province are also shown.

All railways in operation and the Grand Trunk Pacific line as located, are shown.

The Yukon Telegraph line can be traced on the map all the way from Ashcroft to Dawson City in the Yukon.

A copy may be obtained from the Chief Geographer of the Department of the Interior.

EDITORIAL COMMENTS

William O'Brien's olive branch to the protestant Irish of the north in the hour of his victory in Cork over the hosts of Redmond proclaims him the patriot. Home rule for Ireland on the lines sought by O'Brien is a question deserving of the most earnest consideraton of British statesmen. There is none of the race and creed hatred in it which characterizes the Redmond brand of so-called patriotism. In fact he seems to show more of the statesman than does either Asquith or Lloyd-George. With O'Brien leading a local Irish government on "college green." it begins to look as if the protestants of Ulster could count on a square deal

At Vernon they have a delightful waterworks tangle which is going to cost the city heaps of money before they get through with it. At present an appropriate subject for the local literary societies to take up for debate would be as to whether it is more dangerons to go without expert opinion than to employ an expert. Just now the city is enjoying the additional luxury of experts experting its experts and discovering not altogether a wild-cat but another wild beast of prey with wings. The Mormon fathers had to pay the piper for engineering by revelation when engineer and prophet Brigham Young had them build a canal in which the water was required to run uphill, because, he said, the Lord had told him to lay it out that way. But not quite so modest as Brigham was the Vernon city fathers' expert, for instead of giving the Lord any credit for the ditches dug to convey imaginary water from dry streams, he wanted it all (the credit not the water) for himself. The Gazette hereby exculpates and absolves the News from any blame which might ordinarily attach to the heinous crime of saying "I told you so." To have resisted the temptation under the circumstances would have been superhuman.

During the past eighteen months a temperance movement has been transforming the drink habits of all classes in the north of Ireland and its beneficial effects are most apparent among the working men whose families are becoming comfortable and prosperous in consequence. The "Father Matthew" in this case is a presbyterian minister named Patterson and his method consists in getting people to work temperance as well as talk it. The movement is called the "Catch My Pal" movement. Some of the figures given to show the effect it has already produced are astounding.

Water Notice

Notice is hereby given that an application will be made under Part V., Sec. 23, of the "Water Act", 1909, to obtain a licence in the Similkameen Division of Yale District.

29-37 Richmond Street West - - Toronto, Canada.

Town and District.

A quantity of good dry wood for sale. Apply Innis' livery barn.

There will be a turkey shoot at Keremeos Centre on Monday Dec. 26th and a dance in the evening.

Dr. and Mrs. McEwen left for Spokane the middle of last week for a short holiday. They returned Tuesday

There is at present only one patient in the hospital which speaks well for the health bill of the town and district.

The open season for deer expired last night and those who were unable to secure a trophy while it lasted will have to wait until next year.

Ed. Wheaden left on Tuesday for his home in Nova Scotia where he has a wife and family from whom he has been absent for eighteen years.

A SNAP—$750 cash buys two houses and lots in Hedley drawing a rental of $18.00 per month. This offer is only good for ten days.—F. H. French.

The Christmas entertainment for the children of the Sunday School will be held on Friday evening. December 23rd, when a Christmas tree will be provided.

December will have two new moons. It has had one already and will come in for another on the 31st. Now what kind of Christmas weather should that bring?

Fred M. Wells, in company with S. S. Fowler and three miners had a thrilling experience with a pack of about 40 wolves that were after them on Queen Charlotte Island.

H. H. Messenger went out hunting at the end of last week in company with F. E. Burr and in about a couple of days he had his limit of five deer and had to quit. When he left Burr had two and working faithfully to get his limit as well.

Mrs. Farrish, of Vancouver, accompanied by her little son, master Harry, arrived on Friday last to spend the Christmas holidays with her mother, Mrs. Reveley. Her husband, the doctor will arrive in time to have his Christmas dinner in Hedley.

Don't forget the hospital ball on January. The reason the committee give for preferring a plain ball to a masquerade was that the amount of expense entailed in getting up costumes would do more good if applied to augment the hospital fund.

L. C. Rolls has the editor's thanks for a rare juicy cut of venison which was the product of his rifle about a week ago. The rifle he used a diminutive Luger combination pistol and carbine was innocent enough in appearance but it was capable of taking down big game and at good long range.

A fortnight of good golf in Hedley in December is in inself a strong recommendation for the climate of the Similkameen. Even the snap at the end of the week seemed to improve it for golf for the balls travelled long distances over the frozen ground and there was not a vestige of snow or anything to hinder full enjoyment of the game.

The Improvements to the hospital are nearing completion and will now require only a few days more. When fully completed they will allow for the admission of a few more patients and afford better accommodation for the hospital staff. The furnishing of the new apartments will now be a matter for the consideration of the board and also may afford an opportunity for some philanthropically inclined citizen to help on a good cause.

The first of the calendars for 1911 to come to hand is an extremely handsome one given out by J. A. Schubert to his customers. It is a beautiful bit of woodland landscape entitled "Drifting Leaves" painted by Howard Gay. The bare maples and beeches and the beautiful autumnal tints of the leaves which strew the ground to the edge of a glassy lakelet in which objects are mirrored, will bring back many a menory of similar scenes in the eartern provinces.

On Monday last the sun struck low water mark so far as shortening up in the evening is concerned, To-day it stays up a minute longer than on Monday and a week from today it will have gained up two more minutes, but in the mornings they will continue to shorten up for over a fortnight yet and it will be about the fourth of January before a minute has been gained in the morning. By that time the evenings will have lengthened out 15 minutes but the mornings in that time will have shortened up 8 minutes leaving a net gain of 7 minutes at that time.

Maxwell Smith's Fruit Magazine for December is to hand with the full official report of the Vancouver Apple show and the list of prize winners. The report is handsomely illustrated showing the display as a whole and by individual booths. The Keremeos booth in the picture shows up in fine shape. In the prize list also Keremeos and other parts of the district appear to good advantage. Of individual exhibitors the most successful appears to have been De Hart of Kelowna whose winnings total up to about $1300.

Oroville lost a valuable and highly esteemed citizen in the death of County Judge Peck which took place in Spokane last week. He had filled the office for Okanagan county for but a brief spell, being appointed to the position by the Governor of the state on the death of the former incumbent of the office to fill out the term until the regular time for election of a new judge. Deceared was an intimate friend of Mr. and Mrs. Creelman who spent Christmas of 1909 with him and Mrs. Peck.

There will be special Masonic service on Sunday, Christmas, when special music will be provided and Rev. A. H. Cameron the chaplain of the lodge will preach. They aim to have the service on the Sunday nearest to the festival of St. John the evangelist, December 27th, and this year it falls on Christmas day. A number of visiting brethern from Keremeos and Princeton are expected and Mrs. J. A. Brown, of Keremeos, has kindly agreed to take charge of the special music and sing a voluntary herself, which is ample evidence of the treat in store.

On Monday night a couple of cases came up for hearing in the local court but important evidence being lacking in each case they were remanded for a days to enable witnesses and exhibits to be procured. One was a case of cattle stealing and the other a case of petty larceny. In the first, James Steves was charged with stealing a cow and calf off the Princeton range and selling to P. Burns and Co. The cow belonged to Moeace an old Indian woman down at the mission near here. The other case was against the Indian Felix who was charged with stealing a grip and clothing belonging to Geo. Allison and Billy Daly. The grip was lost out of the rig over a year ago and Felix and another Indian who drove up behind were suspected of getting it although they denied it at the time, but evidence which has come up since, led to the laying of the charge.

Princeton business men took action last week to secure a good winter trail through to Steamboat camp, which showed thet they were alive to the situation, and their anbition to be for Steamboat what Seattle was to the Klondike is commendable. No matter whether Steamboat will amount to anything or not the amount of boosting it has received is bound to create a certain amount of travel there and Princeton may just as well reap the benefit of it as Hope or any other poinf on the west of the Hope range. Wherever there is abundance of smoke it is reasonable to assume that there is some fire and it is to be hoped that the Steamboat smoke which has issued in such huge volume from certain quarters in Vancouver may follow the natural rule and be attended with a commensurate amount of genuine combustion. The name, however, is a bit ominous and suggests fog or some other form or forms of water vapor sometimes mistaken for smoke that may owe their origin to natural causes other than those usually comprehended in the term combustion.

THE KEREMEOS PAGE

KEREMEOS, the Centre of Lower Similkameen---Famed for Fruit Growing

Town and Lower Valley.

Mrs. Crooker was in Oroville on Wednesday last returning home Thursday.

George Kirby is remodelling the ground floor of the Keremeos Hotel and putting in extensive improvements.

Mrs. Keeler entertained the young people of Keremeos on Friday evening last. A delightful time was spent by all present.

G. G. Keeler has rented the old building on Sixth street, formerly occupied by the E. T. bank, and is using it as a store room for flour and feed.

Billy Cohen has sold his ranch up the Keremeos valley to Mr. George London and intends moving into Olalla, where he has purchased a house and lot belonging to Mark Spencer.

Facts like these speak for themselves. O. H. Carle has recently shipped over ten ton of petatoes and other vegetables from Keremeos, in the Similkameen to Penticton, in the Okanagan.

A Christmas Tree entertainment will be held in the Town Hall on Friday, Dec. 23rd. A splended and varied program will be arranged, which will be rendered by the children. A good time is guaranteed and everybody will be welcome.

Harry Armstrong of the A. E. Howse Co., Princeton spent Sunday with his parents Mr. and Mrs. J. J. Armstrong. Harry leaves this week for Merritt, where the Howse Co. is opening up in business of which he will assume the management.

Word has been received that Mr. Richter was taken ill on his arrival in California, where he and Mrs. Richter have gone to spend the winter. We trust that his recovery will be rapid and that his sojourn in the south will be both pleasant and beneficial to his health.

The latest news received of James Reith, one time partner of Harry Tweddle in the Central hotel, states that his health is better than it has been for a long time. His many friends here will be glad to know that he is improving and will wish him many happy days.

Danny McCurdy who has charge of O. H. Carle's business in Princeton, was in town on Friday last. In the upper valley they have had snow for some time and been able to indulge in all kinds of winter pastimes. It was while engaged in the friendly act of washing a companion's face with "the beautiful" that Danny slipped and sustained a dislocation of the knee joint, which now prevents him from attending to the usual routine of business.

The fruit-growers of Keremeos are respectfully requested to attend a meeting of the local association to be held in the Keremeos Land Company's office on Saturday afternoon next. Herein fail not as we understand that much business of an important nature will come up, and the president is anxious that all hands be on deck.

At a meeting of the Keremeos board of trade, held on Wednesday evening of last week a resolution was passed favoring the holding of a joint meeting of the boards of Princeton, Hedley and Keremeos with a view to evolving some method of getting after the Great Northern Railway Company through the local and federal governments. It is hoped that the three boards may be able to act in concert.

Only ten days more till Christmas and ranchers around Keremeos are still plowing and working in their gardens and orchards. If the people on the outside only knew what a climate we had in here and if Uncle Jim Hill would only make some definite announcement as to when he intends to forge the connecting link in the V. V. & E. (Vague, Variable and Epileptic) standing room would still be at a premium. Personally; we have never wavered in our faith that the Hill intentions are good and that the not very distant future will see the long-looked-for connection established but it is, to say the least, a little tough that the development of the valley should be retarded and capital discouraged from coming in for lack of some definite promise on the part of those at whose mercy we are. Only last week at a meeting of the Vancouver Board of Trade, when that body was endorsing a resolution passed by the Princeton Board, urging the government to take some action in the matter, a member, named Norman McLean gave expression to the opinion that the Great Northern did not intend to build through. Such an expression, coming from such a source will do more to discourage capital from coming in here than a little. We note that the various boards of trade in the valley—Princeton, Hedley and Keremeos—are taking the matter up, and if they can accomplish no more than induce the government to wring from the Great Northern a definite promise as to their intentions they will have accomplished a very useful purpose.

WATER NOTICE

NOTICE is hereby given that an application will be made under part V. of the "Water Act, 1909," to obtain a licence in the Osoyoos Division of Yale District.

(a) The name, address and occupation of the applicant: E. A. Hargreaves, Keremeos, B. C.

(b) The name of the lake, stream or source (if unnamed, the description is) Big Horse Creek, rising on south slope of Crater mountain.

(c) The point of diversion one quarter mile from mouth of creek

(d) The quantity of water applied for (in cubic feet per second) one cubic foot.

(e) The character of the proposed works, Irrigation ditch for domestic and Irrigation purpose.

(f) The premises on which the water is to be used, Pre-emption of E. A. Hargreaves.

(g) The purposes for which the water is to be used Domestic and Irrigation

(h) If for irrigation describe the land intended to be irrigated, giving acreage, pre-emption of E. A. Hargreaves, 160 acres of land.

(k) This notice was posted on the 4th day on November, 1910, and application will be applied for to the Commissioner on the 4th day of Dec. 1910.
