## PROVINCIAL LEGISLATURE

Members are Provided With Abundance of Information to Guide Them

### SANITATION A LIVE QUESTION

Regulating Pool Rooms—Those Who Create Trouble Must Help to Pay the Piper—Civil Service Remuneration Receives Overhauling.

(Special Correspondence to the Gazette)  
Victoria, B.C., Feb. 1, 1913—Startling revelations of unsanitary conditions surrounding the supply and distribution of milk in various portions of the province and particularly in the cities of New Westminster and Vancouver, and in the Kamloops district were brought to light on Monday, when, after an investigation covering a period of six months or more, the Milk Commission, consisting of Frederick J. Coulthard of New Westminster, Dr. Anson Knight, B.S., of Sardis, and Dr. A. P. Proctor of Vancouver, placed the result of their researches before the Legislature.

The report pointed out that as a result of application to the mortality records it had been found that the death rate among infants in the province was alarmingly high. The mortality among infants in the various cities being as follows:—Vancouver, 49 out of a total death rate of all ages of 1,719; Victoria, 18 out of 617; New Westminster, 8 out of 506; Kamloops, 18 out of 551; Nanaimo, 8 of 272.

Nearly every portion of the province was visited by the Commission in the course of their investigation and data was also secured from the larger cities of Eastern Canada relative to the regulations and restrictions in vogue for controlling the distribution of milk.

Included in the report which was very extensive and covered no less than 77 closely typewritten pages were recommendations and findings of the commission which provided for a more rigid inspection of imported cattle, supervision of sanitary methods in transporting the fluid from place to place, the restriction of importation, particularly in low grade products and the appointment of analysts empowered to make compulsory tests, as well as provisions for destroying cattle infected with tuberculosis.

At the conclusion of the report a very startling disclosure was made in a report which Dr. A. L. McQuarrie, the medical health officer for the city of New Westminster had made to the commission regarding the recent outbreak of scarlet fever in that city.

Dr. McQuarrie's report read as follows:

"On the afternoon of Saturday, Jan. 4th, one case of scarlet fever was reported to the department, on Monday another case was brought in and on Tuesday six cases reported, on Wednesday six more. From the latter date to the 17th instant thirty-five sufferers from the disease were brought in, and from that time to January 21st only two cases have broken out.

"On investigation into the cause of the epidemic it was found that three city dealers were supplying the families affected, with milk secured on one farm in Surrey.

"On inspecting the particular farm from whence the supply emanated it was found that the proprietor's two children were in the desquamative stage of scarlet fever. Quarantine was immediately made and the morning supply of milk which was just going out to New Westminster destroyed."

Another important proposed piece of legislation brought before the House on Monday was an amendment to the Pool Rooms Regulation Act, which stood in the name of the Attorney-General.

Mr. Bowser pointed out in presenting the amendment that whereas the manner in which many of the pool rooms were being operated in the province was far from satisfactory.

It had been found necessary to provide added police protection for localities where these businesses were being conducted. It was only right therefore that the proprietors should be made to bear some proportion of the cost. Under the amendment a flat rate of \$50 per year will be charged on all pool rooms, in place of the rate of the \$5 per table formerly in vogue.

While tranquility pervaded a peaceful session of the house on Tuesday afternoon the Hon. Dr. Young secured the approval of the members and carried the second reading of his bill to amend the Civil Service Act.

This bill provides for a general increase in the standard of Civil Service salaries to the extent of \$15 per month, and \$5 additional per month each succeeding year. The act now in force provides a salary of \$85 per month for junior clerks and stenographers entering the service, their salaries being raised \$4 monthly each year until a maximum of \$75 is reached. Direct as well as merit increase will also be made, and if the legislation is made operative clerks receiving \$85 per month will be given \$15 in addition and a \$6 merit increase, bringing their salaries up to \$106 instead of \$85.

In a few brief remarks about the amendment before moving its second reading Hon. Dr. Young pointed out that in ratio with the high cost of living the salaries paid in the B.C. Civil Service were entirely too low, and the amendment had been consequently drafted with a view of placing the government employees on an equal footing with the civil servants of the old country.

## DAME NATURE'S DIRTY TRICK

That "Delicate Problem in Professional Ethics and Commercial Expediency"—Oh Dear! Oh Dear! Oh Dear!

F. A. Ross has a grievance. The Nickel Plate has turned out a big mine with a bright future in plain sight and Mr. Ross is on record that it was to be shut down in eighteen months from the end of 1907 or in two years from that date at the very most. Then again there have been certain individuals who have had the temerity to presume that there might be something outside the limits proscribed by Mr. Ross where all commercial values should have ceased to exist and they have succeeded in showing up enormous reserves of pay ore that will keep the present plant going for long years to come. Where Nature and man conspire to throw a fellow down in this rude fashion why shouldn't he have a grievance?

At a recent mining congress in Spokane Prof. Stewart gave a paper on the microscopic examination of rock sections and Mr. Ross was down to lead in the discussion on the paper. All he said about rock sections was little indeed and the attention he gave to the subject matter dealt with in the paper was less. But here is what he did say.

"In exploratory work especially, whether of examination prior to purchase or undertaken in the development of ore reserves, the part played by microscopic analysis of rock sections is most important. Yet there are instances in which geological theories must fail in advance of exploratory work and the discovery of 'the law of the camp.' Such instances are those in which detached ore bodies, or shoots, lie in different planes, or horizons, as they do in Nickel Plate mountain, Hedley, B. C. Here, the tilted and contorted sedimentaries are penetrated and parted along their bedding planes by spurs and sheets of monzonite that have so altered and silicified the limestones at points of contact as entirely to mask their identity to the naked eye and to cause experienced geologists to classify them as quartzites, by which name they were known for years, before rock sections were made, just as the monzonites were called andesites. Microscopic analysis showed the presence of the critical minerals and indicated deep-seated action, resulting

in the formation of true contact metamorphic deposits of arsenical pyrites carrying gold and presenting peculiar and unique mining and geological problems as well as a delicate problem in professional ethics and commercial expediency.

"Prior to 1909, when the property changed hands, there was but one known ore-bearing horizon on this property, nor was any other discovered until some two years later. When, therefore, this known horizon, or contact, showed signs of exhaustion and when systematic surface prospecting and extensive underground exploration had failed to open up new ore bodies, a comprehensive plan for development became necessary and, owing to the absence of guiding indications, such as veins, fissures, mineralizing dykes, et cetera, the preliminary estimates of the possible cost of this work ran very high. Pay ore might occur anywhere in depth, or nowhere at all. So far as could be foreseen it meant a detailed exploration of the entire mountain and the odds against finding pay ore with a minimum of work and expense appeared very great. Moreover, competent geologists had already been consulted and there seemed to be no hope of aid either from analogous reasoning or geological deduction inasmuch as this formation is unique, according to the best authorities.

Consequently, without a reasonably positive assurance of success, which could not, of course, be given, the owners were reluctant to authorize the expenditure, especially since it had become necessary to remodel the entire plant owing to the disappearance of free gold with depth. They determined, therefore, to sell at a profit on their investment to others who stood ready to purchase, on the showing at that time, and to take the very long 'mining chance' that remained. The new owners entered at once upon the necessary expenditures for plant improvement and development and, after some two years' work, when the old workings were practically exhausted, were very fortunate in finding another ore-bearing horizon or contact, several hundred feet below the lowest of the old workings, thereby prolonging the life of the property and once more proving the fact that long odds sometimes win out. Now the ethical question and the commercial expediency involved in this case, was this:—In cases of grave doubt should managers advise and encourage heavy expenditures solely on the basis of the 'mining chance,' thereby risking a total loss, or should they advise for safety and an assured profit? At first sight there would seem to be but one answer to such a question, assuming of course that the first duty of a manager to his principals is to protect them from ultimate loss.

"Yet, as every one knows, mine owners in general more readily forgive advice that causes heavy loss when ore does not materialize than they do advice that loses them the profit others may make out of ground they once owned, notwithstanding the fact that the percentage of cases under the first condition is vastly in excess of that under the second, as the history of mining conclusively shows.

"It is precisely this peculiarity of human nature that decides many examining engineers, mine managers and geologists in taking long chances on unduly favorable predictions. It is true that conditions are gradually changing in this respect as regards the heavier mining investors. These men are learning to appreciate conscientious reports and conservative advice and they value accordingly the advice of the manager which will protect them from ultimate loss, regardless of future showings, but with the general investing public it is still as it always has been; optimism is expected and demanded and the only unpardonable sin is advice that loses a possible profit that others realize, no matter how long the odds.

"To return then to Prof. Stewart's excellent paper, the aids offered by rock sections in exploratory work cited by him would doubtless fall in formations similar to the one just described—at least in advance of exploratory work sufficient to demonstrate the law of the camp if this were possible, which at present writing and in this instance appears doubtful."

## MET HIS WATERLOO

C. H. Brooks Roughly Handled in Vancouver Court and Finds Way of Transgressor Hard.

(News-Advertiser, Jan. 31st, 1913.)  
Mr. C. H. Brooks, a mining stock vendor, who has been advertising stock in the Golden Zone mine at Hedley, B.C., in Vancouver papers, appeared yesterday in the Small Debts Court, when Magistrate Alexander described his activities as "one more effort to put one across on the public."

Incidentally the case established the right of a newspaper to reject advertising copy which it considered against the public interest, notwithstanding that a contract may have been entered into to carry a given amount of advertising.

The case was brought by the News-Advertiser against Brooks to recover the amount of a full page advertisement which his agents inserted in this paper on January 11. This advertisement was the first of a series of ten, but after its appearance the management refused to carry any more, because of the extravagant nature of the claims made and the failure of Brooks to establish a credit.

Brooks refused to pay the bill, alleging breach of contract on the part of the paper, and alleging that as the remainder of the series was not run the advertisement was of no value to him.

The "News-Advertiser" thereupon brought suit against him for the amount of its claim.

Counsel for Brooks sought to establish a verbal contract with the advertising solicitor who made the contract that he was to have thirty days credit. The court, however, ruled first that the signed contract submitted, clearly established the right of the paper to payment "on demand," and, second, that the paper was free to decline any copy of which its management did not approve.

On cross-examination, Mr. W. H. D. Ladner, of Bowser, Reid and Wallbridge, appearing for the "News-Advertiser," justified the refusal of the paper to carry Brooks' advertising by a grilling inquiry.

Brooks admitted having been arrested in Boston, Mass., by U.S. government authorities for fraudulent use of the mails, of having pleaded guilty in June 1911, and of having been fined \$2,500.

He admitted being in the grain and brokerage business in St. Louis, but denied he had agreed to pay 6 per cent a month dividends. He remembered that he had some indictments against him there, but denied knowing what it was for, nor would he admit it was for grand larceny.

He did, however, recall being arrested later in the year for fraudulent use of the mails by U.S. authorities and sentenced to 18 months imprisonment.

Did you serve that sentence? asked Mr. Ladner.

"No," replied Brooks, "I went to Washington, and President Roosevelt pardoned me, and I sent Senator Burton of Kansas to penitentiary instead."

"As a matter of fact," pursued Mr. Ladner, "was not your imprisonment commuted to a fine of \$1500 by President Roosevelt, for turning 'rounder' on Senator Burton?"

This the witness at first denied, but finally admitted.

He at first denied that he had used an assumed name, but afterwards recalled that he registered at Boston on one occasion as J. C. Gilmore.

Mr. Ladner then asked the witness if he was not to-day in contempt of court in New York through proceedings on a judgment of \$18,000. He at first denied that he had ever been served with papers in this case, but after a sharp reminder by the court, he recalled that such was the case.

His hurried departure from New York, he explained, was due to having his ticket bought.

"This was in January, 1912," said the court, "Has it taken you a year to go back?"

Brooks' operations in Mexico and at Oroville, Washington, were also recalled by counsel, who described Brooks' methods of those of a get-rich-

**HE KNEW TOO MUCH**

The plaint of Mr. F. A. Ross appearing in another column will make interesting reading to all who are conversant with the history of operations and development in the Nickel Plate. Briefly summarized, Mr. Ross is practically admitting that some explanation is due from him for having done his employers out of a valuable mine because of his inability to size up the situation after about three years as manager. But his managerial sin was not altogether negative in character and its heinousness lay not in not knowing but in knowing too much about it—in his own mind, of course. He concocted a unique geological theory that the ore body of the Nickel Plate mine lay in a certain form which he variously described at different times as a sugar bowl, a berry dish and a saucer, and he promulgated this doctrine with all the assurance of a Delphic (delf-ic) oracle. So obsessed was he of the sageness of that conclusion of his that he was ready to snap the head off anyone who would hint the advisability of seeking values beyond the bottom or rim of his metaphorical crockery ware.

Now we regret that lack of space prevents us taking up Mr. Ross' contentions analytically—paragraph by paragraph and sentence by sentence for it would make a Jim dandy theme for exploitation in that particular way. Suffer it to say that he made a great blunder or series of blunders here and he would be much better off if he would forget it himself and allow others to do likewise rather than making sorry attempts to prove that wrong was right at this late date. We have frequently heard doctors make much of the tommyrot that they call "professional ethics" which will prevent one doctor from approaching within forty rods of another's patient or cadaver, and even lawyers are given to prate about it in their trade, but to expect a mine manager to keep away from a piece of ground where common sense tells him he should find pay ore because his predecessor held peculiar theories forbidding it, would surely be going the limit. And as for "commercial expediency" if it be "commercially expedient" to get out the pay ore year after without doing a foot of development REISE and then advise the owners to

throw away a good property on the strength of an erroneously preconceived idea born of pessimism and an unduly expanded ego, then it would be prudent for owners to have their managers try some expediency for a change. What Mr. Ross has undertaken to hand out as statements of fact are mere deductions based on supposition and if set side by side with the real facts now fully proven it would make him look like thirty cents. He says the present owners "took the long chance" in mining. They did nothing of the kind. They took the option on the property at a valuation based on Mr. Ross' short vision of the ore in sight at that time. They provided themselves ample time for testing and went to work with diamond drills and pick and shovel, but declined the sugar bowl theory which was being thrown in gratis, and in four months they had shown up a quantity of ore which Mr. Ross knew nothing about that made the consideration stipulated in the option look like buying big silver dollars for fifteen cents apiece with a quarter million dollar mining plant thrown in for luck; and this is what Mr. Ross would have his hearers believe was "commercial expediency" on his part. If this was taking "the long chance" in mining then what would the short chance require?

Many others of his remarks call for refutation but lack of space forbids.

We do not wish it to be inferred that we regard Mr. Ross incapable. On the contrary, he would be a most desirable man at the head of some manufacturing establishment where cheese-paring economy would count, or as an insurance loss adjuster where seeing small would be a valuable attribute. And even in mining, if a property were fully proven for many years at cut and extraction was all that was required he would nicely fill the bill, but he was the wrong man for the Nickel Plate at a time so critical in its history; and any man with such a super-saturation of pessimism in his make-up becomes an impossibility as a mine manager in the transition period between prospect stage and the permanent mine, for of him it may truly be said:

"He either fears his fate too much,  
Or his desires are small,  
Who dares not put it to the touch,  
To win or lose it all."

If the McBride government had never done anything else for the advancement of British Columbia the one act of providing for the appointment of an audit officer who will be the servant of parliament and will not be subject to dismissal by the cabinet in power, would in itself be sufficient to give them the credit of initiating a reform which is one of the most noted that have been brought about in the history of the Legislature.

**MET HIS WATERLOO**

Continued from Page One  
quick operator, who took money from an unsuspecting public.

The advertising writer, who had prepared the advertisements was placed on the stand by Brooks and stated that the facts brought out in the proceedings were all news to him.

"In face of them, if you were a newspaper publisher would you carry this advertisement?" asked Mr. Ladner.

"I certainly would not," replied the witness emphatically.

The magistrate in summing up found that the "News-Advertiser had acted in the public interest in refusing to carry the advertisement, and that Brooks must pay for the advertisement that did appear, with costs.

**GOLF CLUB REMEMBERED**

Golf in Hedley is receiving a pronounced boost this year by the magnanimous treatment of the honorary president Mr. I. L. Merrill, who has donated a handsome costly cup for competition among members of the club. The competition is to be a handicap so that every member of the club will have an equal chance at it, and it will be up to the executive of the club

as soon as the spring opens to take hold of the matter of revision of the club handicaps in a thorough impartial manner so that no advantage will be given to any one and the competition be decided strictly on its merits. The club has all along benefitted by the generous assistance of its honorary president from time to time and this latest evidence of his generous interest in the game and the welfare of the club is bound to bear good fruit in making golf more popular in Hedley than ever before.

OF THE

**Mutual Life of Canada**

"The Largest Amount of Assurance  
for the Least Possible Outlay."

The reasons why they can do this are:—

1. The Expense Rate of this company is unusually low—considerably lower than many other Canadian Companies.
2. Its Death Rate is remarkably favorable—being only about one-half of the amount "expected" and provided for, showing careful selection of lives.
3. Its High-Class Investments have been such that in the 41 years during which the Company has been doing business, not one dollar received from its Policy-holders has been lost out of the millions invested for their security.

These conditions produce large profits, and large profits mean good results to Policy-holders. A policy in this Company pays.

W. J. TWISS A. MEGRAW  
Vancouver Local Agent  
Manager for B.C.

**Town and District.**

The ice harvest has pretty nearly all been gathered in and most of the ice houses have been filled. The quality of the ice has been very fair in most cases. This is about the earliest completion of ice storing operations for several winters past.

Messrs. G. P. Jones and B. W. Knowles went up the river one day last week to make observations and measurements of the Similkameen with a view to preparing data and estimates upon the development of the amount of water power available. They had a current meter with them and the river is now so low that they can safely count on the present showing of the river to be the minimum of power that may at any time be looked for.

The people of Hedley have a fine musical treat in store in Mrs. J. A. Brown's concert to-morrow evening. The Gazette has seen the programme and can vouch for its excellence.

W. A. McDonald, the youth from across the line who was caught trying to rake in some easy money by writing out cheques without having any money to his credit and cashing them with whoever would supply money on them, was given his hearing at Princeton on Friday last before C. E. Thomas, J.P., and committed on two counts. Constable Sproule left for Kamloops with him on Saturday. He stands a good chance to put in three years in the pen for it.

Latest reports indicate that the finishing touches are soon to be put on the installation of machinery in the cement plant at East Princeton and the manufacture of cement will begin in a few weeks.

The executive of the Hedley Golf Club met on Thursday evening last at the Hotel Similkameen to consider the expressed wishes of some of the members of the club for a dance. A committee was appointed to take the thing in hand and it is understood that some time shortly after Easter, which this year comes early, the event will come off.

Tickets for Mrs. J. A. Brown's concert are on sale at the City Drugstore. In addition to most of the talent formerly appearing in the concert here Miss Irwin of Princeton will make her first appearance before a Hedley audience, and Mrs. J. A. Brown and Miss Daly have some new gems in their repertoire. W. M. Daly has also put in faithful practice on the violin in the past two years and the audience may look for something special in his playing on this occasion.

A few months ago a youth with a rapid flow of words and capacity for reeling off on unconscionable amount of guff in one breath canvassed the town for a map of B.C. The map was said to be then in course of preparation and hence no sample could be submitted. It was sold on subscription and the price was to be on a sort of sliding scale according to the number subscribed for, the maximum to be something like seven dollars and the larger the number subscribed for the lower the price would be. The maps were delivered last week and it is, of course to be expected that the subscribers were all tapped for the maximum price. We have not seen the map but some of the victims declare that it is the cheapest kind of an affair, and would be dear at four bits.

A. H. Brown, the pioneer metallurgist of the Nickel Plate, who had the honor and responsibility of working out the problem of ore treatment in Hedley, is now with Hudson Bay mine in Cobalt, which is one of the very best producers in that camp. The Engineering and Mining Journal tells of an examination of a property which he was making in Deloro township with a view to taking an option for his company.

Easter is coming so early this year that Lent has come on us like a thief in the night. Yesterday was Ash Wednesday and for a spell of forty days those who wish to observe the times and seasons will only have to fall back a few weeks to pick up again the good resolution habit they were supposed to be familiar with at the beginning of the year.

The new Chief Constable for the district as successor to the late Chief Dinsmore is J. Simpson of Kaslo.

Hockey is getting brisk in the valley. Princeton plays in Keameos to-day and here to-morrow.

The Granby Company have let contracts for \$1,200,000 in connection with the building of their smelter on Observatory Inlet.

**AMERICAN RAW FURS BRING HIGHEST PRICES IN HISTORY**

A. B. Shubert, Inc., Chicago, U.S.A., the largest house in the world dealing exclusively in American raw furs, in a letter to the editor says in part as follows:

Raw furs are bringing extremely high prices. Why not? Boom times are on. Bumper crops have been harvested. Men are employed every where at good wages. Never in history was a dollar worth so little. Raw furs are bringing the highest prices ever known and any trapper with a few traps can surely make good wages—because the consumer is buying furs, for the simple reason that they are more fashionable this season than ever before.

Do the trappers and collectors of raw furs ever consider the part the modern circular house of to-day has had to do with making the present extremely high market price of American raw furs? Does the trapper and collector realize how this advance over the extremely low price of years ago is maintained by the valuable information the trapper and collector get through the advertising matter that is mailed out by the large circular houses? The competition of the large circular houses created for the collection of American raw furs, if it were to cease, would surely put the profit of the trapper down 50 per cent. It would cut the profit in half and possibly the price of American raw furs would drift back to the days of Astor and others of his kind—the old-time buyers of American raw furs, who considered a cup of sugar as all a beaver skin was worth and that was all they paid for it. The sale of furs, so bought, laid the foundation of these vast fortunes.

Mr. A. B. Shubert, president of A. B. Shubert, Inc., Chicago, U.S.A., one of the very few expert buffalo robe buyers of the old school now living tells us "that in the early days \$2 to \$2.50 average was considered a top price for buffalo robes. In Montana, beaver were sold by the truck load at \$1.50 per pound, for parchment hunched skins (about \$2 to \$2.75 each) and the Montana and Canadian wolf sold for 50c to 75c average and so on down the list of American raw furs."

The circular house by sending out price lists and through advertising matter created the competition of to-day—competition created the advance prices of American raw furs of to-day. The large circular houses let the light in on the real value of American raw furs and cut down the excess of profits of the distributor of raw furs and caused the distributor to pay real value and real money for raw furs and of course the trader with his string of beads, barrel of sugar and chest of tea had to get out of the game or do the fur business in a modern way.

The collection of American raw furs, on some articles, is one half of what it was years ago. There is a shortage in most every article. This was brought about by the extremely high prices that have been paid in the last few years. It encouraged men to trap furs. A good trapper can make better wages on the trap line than he can by hiring out. It is really wonderful what progress has been made in the fur business and the tremendous advance in price.

**FORESTS SET ASIDE FOR USE OF PUBLIC**

The former erroneous impression that forest reserves are areas set apart by the government to be reserved from use and development is giving way to the correct view that they are for the general use of the public.

The Dominion Forestry Branch is desirous of spreading this idea abroad, and with this end in view has inaugurated the policy of surveying summer resort lots around convenient lakes in forest reserves. These lots are of two kinds, viz., building lots and camping lots, so that the demands of both cottagers and campers may be met. Such lots are leased to the public for a term of years at a very nominal figure. It is hoped that in this way a start may be made in bringing to the public a realization of the opportunities and advantages which the reservation of these great areas of the public domain affords the country at large.

A good example of such a resort is seen in British Columbia where a site has been laid out at Trout Lake, in the Long Lake forest reserve. This reserve is situated in the Kamloops district of the railway belt.

Trout Lake, at an altitude of 4,100 feet, is an ideal retreat for the residents of the towns and cities of the dry belt. Here they may escape the oppressive heat and drought of the summer season, and at the same time

enjoy some of the finest fishing to be had anywhere in Canada. Already many people have secured building lots and it is expected that in a very short time a large and flourishing summer colony will be established at this point.

**IN THE SUPREME COURT OF BRITISH COLUMBIA**

**IN PROBATE**  
IN THE MATTER OF JOHN QUIGLEY DECEASED  
AND  
IN THE MATTER OF THE "OFFICIAL ADMINISTRATORS ACT."

NOTICE IS HEREBY GIVEN that by an Order made by His Honor D. Murphy, Judge of this Honourable Court, dated the 20th day of October, A.D. 1912, the undersigned was appointed Administrator of all and singular the estate and effects of the above named John Quigley, late of Fairview, in the County of Yale, in the Province of British Columbia, deceased, Executor, who died intestate on or about the 24th day of April, A.D. 1912.

All persons having claims against the estate of the said deceased are required to send the same with the particulars thereof duly verified to the undersigned on or before the 15th day of March, A.D. 1913, and all persons indebted to the said deceased are required to pay the amount of such indebtedness to the undersigned forthwith.

Dated this 3rd day of February, A.D. 1913.  
JOSEPH A. BROWN,  
Official Administrator for the County Court,  
District of Similkameen, Kootenays, B.C.

**NOTICE**

SIMILKAMEEN LAND DISTRICT  
DISTRICT OF YALE

**Synopsis of Coal Mining Regulations**

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2,500 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. COYR,  
Deputy Minister of the Interior.

KEREMEOS, the Centre of Lower Similkameen---Famed for Fruit Growing

## Town and Lower Valley.

Mrs. W. C. Bowen has been laid up at home with a bad attack of muscular rheumatism for the past week, and now although far from well is able to be out of bed and around a little.

The fourth assembly dance held in the Town Hall last Friday was a great success. All arrangements were carried out successfully by the committee in charge. The floor was in first class condition and it was declared to be the best dance of the season. Among the visitors present were Mrs. Sproule, Mrs. T. Rotherham, Miss French, Miss Bradshaw, Miss A. Innis, Messrs. J. Rotherham, M. Hilliard, M. Hill, H. Townsend, H. Innis, L. Rotherham, J. McDonald, E. Laingard, C. Laing, J. Lyall, M. Brown, D. DeYoung, T. Barrett, J. A. Rafter, W. H. Lyall of Hedley; Mr. and Mrs. Del Young, Miss Irwin, K. C. Brown, G. Lyall, Floyd Turner, of Princeton; Ross Fleming of Tulameen; Miss Boone, Miss Malone, Harvey Boone, C. S. Malone, F. J. Phelps, J. Phelps, H. Parker of Fairview; Mr. and Mrs. H. Richter, Mrs. and Misses Sinclair, Miss Linton, Miss W. Manney, Austin Linton, F. Willmot of the Lower Similkameen.

Friday, Feb. 14th, the Oddfellows of Princeton will give a ball in the Thomas-Hall of that place.

Chin Kee, the old time Keremeos Chinaman, intends to give a supper and dance the date of which will be announced later. For a number of years past Chin Kee has given a dance at Richter's hall, which have always been well attended and enjoyed.

Thirteen of our Hedley friends came through on the big stage with Hill Innis driving the four-horse team. It was a great treat to see so many turn out.

George Loudon went down on Monday's train to visit his parents at Nighthawk.

Miss Kirby is visiting Mrs. C. A. E. Shaw in Greenwood.

F. S. Stevens, who has been with A. B. Howse & Co. of Princeton for some time past stayed off a day here before proceeding to Vancouver, at which place he will join the staff of the Canadian Bank of Commerce.

Mrs. L. A. Keeler was a visitor to Princeton for a couple of days last week.

In October 31st items it was mentioned that a gentleman by the name of T. C. Eades was here soliciting names for the purchase of a first-class map of the three Western Provinces. The understanding was that if one thousand names in B.C. could be got the price would be \$7.50 and if more added than that the price would drop accordingly. Lately H. B. Fleming, partner of the aforesaid gentleman, came to deliver the goods, and strange to say out of this vast Province, had the nerve to say, they had within a few of the thousand mark and as your name is down with your own signature, \$7.50 please. Does this not look queer, that one man travelling over the province should only get that many names.

The Tweddle Auto put in its appearance on Friday last, after a couple of weeks' lay off.

D. J. Innis drove to Naramata Monday on business. He has two four-horse teams working for the K.V.R. contractors.

Mrs. George Sproule, Miss French, Miss Bradshaw of Hedley and Miss Irwin of Princeton have been spending a few pleasant days as the guests of Mrs. J. A. Brown.

George Emory, our genial station agent, was taken sick last Saturday and had to discontinue work. He is feeling better now, and although he should not be out of the house, he is again plugging at Jim Hill's business. The telegraph business was partly kept up during his absence by the Hedley agent, who jumped in to help out, receiving messages and relaying them to the Daily Reduction Co., who in turn relayed to Hedley and Keremeos government telephone office, and from these places they were despatched north or west as the case may be. The kindness shown, especially by the Hedley relayers, made it so that the public's telegrams were delayed but very little.

Mr. and Mrs. F. B. Gibson invited a number of their friends to their home to spend a few hours last Tuesday. The evening was most enjoyably spent in many kinds of games.

Ross Fleming of Coalmont spent the week end with his uncle, W. M. Frith.

Hedley vs. Keremeos Hockey match was played here last Friday. By rushing things the first few minutes of the game enabled Keremeos to score the first goal, but the lead was not kept for long for Hedley through Townsend and Innis put through the equalizing goal before the first quarter was ended. The second quarter was strenuously contested, both teams were working hard but it could be seen that Keremeos was losing ice and only managed to hold off the visitors until half time. The third quarter was a calamity for the home team, resulting in three more goals being added by the Hedley sextette. Keremeos managed to notch a goal this quarter owing to the visitors' custodian getting rattled and putting the puck through his own goal. The last period showed Hedley to advantage, their forwards breaking through continually and had it not been for the good goal-keeping of Beach Cawston the score would have been heavier. Keremeos worked hard but seemed to lose control of the puck at shooting distance. The winners added two more goals to their score thus making the game stand at the call of time Hedley 6 Keremeos 2. The line up was as follows:

KEREMEOS	HEDLEY
B. Cawston goal	E. Laing
F. S. Stevens point	M. Hill
R. Carmichael c. point	I. Robertson
A. Tingley r. wing	J. McDonald
W. Frith centre	H. Townsend
C. Kerler l. wing	H. Innis

Notes—The best team won. The north side of the ice was under water. About 100 spectators were present. Keremeos must practice more if they hope to hold up their end.

Dr. Richards will be at Innis' Barn, Keremeos, on Monday next, to purchase broken saddle horses under 15½ hands high.

## FOUND

RED and White Aged Cow, double dappled. Branded on left hip. Owner can have same by paying expenses. H. McGuffie, Provincial Constable, Keremeos.

## WATER NOTICE

For a Licence to Take and Use Water Notice is hereby given that the British Development Company Limited of Vancouver, B.C. will apply for a licence to take and use 50 cubic feet per second of water out of the Ashnola River, which flows in a northerly direction and empties into the Similkameen river near Keremeos. The water will be diverted at the second canyon and will be used for power purposes on the land described as Oliver's pre-emption and within a radius of 10 miles.

This notice was posted on the ground on the 25th day of December, 1912. The application will be filed in the office of the Water Recorder at Fairview, B. C.

Objections may be filed with the said Water Recorder or with the Controller of Water Rights, Parliament Buildings, Victoria, B. C. British Development Co. Ltd. H. G. Sprague
