AND SIMILKAMEEN ADVERTISER.

VOLUME X.

HEDLEY, B. C., THURSDAY, JANUARY 29, 1914.

NUMBER 4.

**Dr. C. A. JACKSON**  
DENTIST  
(18 years practice in Vancouver.)  
S. O. L. Co.'s Block  
PENTICTON, B. C.

**JAS. GLARKE**  
Watchmaker  
HEDLEY, B. C.  
Clocks and Watches for Sale.

N. THOMPSON PHONE SEYMOUR 5913  
MGR. WESTERN CANADA  
**Cammell Laird & Co. Ltd.**  
Steel Manufacturers  
Sheffield, Eng.  
Offices and Warehouse, 817-83 Beatty Street  
Vancouver, B. C.

**Hedley Miners' and Millmen's Union, No. 161, W. F. of M.**  
Regular meetings of the Hedley Local No. 161 are held on the first and third Wednesday in the month in Fraternity hall and the second and fourth Wednesday at the N. P. Mine.  
O. M. STEVENS President T. R. WILLEY Fin-Secretary.

**A. F. & A. M.**  
REGULAR monthly meetings of Hedley Lodge No. 43, A. F. & A. M. are held on the second Friday in each month in Fraternity hall, Hedley. Visiting brethren are cordially invited to attend.  
A. CREELMAN, W. M. H. G. FREEMAN, Secretary.

**MODERN WOODMEN OF AMERICA**  
Hedley Local Camp meets in Fraternity Hall the first Thursday only in the month.  
R. J. CORRIGAN, Concl. H. G. FREEMAN, Clerk.

**L. O. L.**  
Regular monthly meetings of Hedley Lodge 174 are held on the third Monday in every month in Fraternity Hall. Visiting brethren are cordially invited to attend.  
S. KNOWLES, W. M. C. CHRISTINIA, Sec't.

**DR. J. L. MASTERS**  
DENTIST  
Will be at Home office in Oroville, 1st to 20th of each month.  
Office on North Main Street.

**P. W. GREGORY**

## HOSPITAL BENEFIT BALL

Well Up in Line With All Its Predecessors

COSTUMES BETTER THAN BEFORE

Hospital Funds Benefit to Extent of \$262  
—Good Representation From Outside Points—Committee Pleased with Results

The annual hospital ball for 1914 which took place on Friday 27th in the hall over the Hedley Trading Company's store was one of the best that have yet been held, and from a financial standpoint was eminently satisfactory, as it gave a net revenue of \$262.00, the total receipts being \$318.00 and the expenses \$56.00. There has perhaps been larger attendance in some former years, but the company present on this occasion was really larger than the hall could comfortably accommodate.

Keremeos as usual was well represented and those from the fruit town who took it in were only a small part of the number who extended their aid by the purchase of tickets. There were some who intended to have come up but were disappointed by the breakdown of the auto they were counting on bringing them. Princeton also contributed half a dozen and the Nickel Plate mine, Bromley's and Fifteen Mile were represented.

Many remarked the superiority of the costumes over those of former years, and among the maskers, while there may not have been any one or more characters which monopolized the attention of the onlookers, there were a number of them very amusing and none as unsightly as have sometimes been seen. In fact if there had been prizes given, the judges would have had a difficult task in deciding the awards.

The orchestra consisting of violin, cornet and piano played respectively by W. Daly, S. Gibson and G. Stevens rendered excellent music. For the supper which was given at the Grand Union the same plan was adopted as last year, and was found to work well.

### HOW CANADA CAN HELP

Government Guards Oil Against Repetition of Mistake Made with Nickel

Ottawa, Jan. 21.—The new oil regulations which have been prepared by Hon. Dr. Roche were approved by the cabinet council yesterday. There are several clauses of an imperial nature looking to the question of defence, and designed to conserve the oil resources of Canada for the use in time of war or emergency of the British Admiralty.

One regulation requires that any company holding a lease under the regulations shall at all times, remain a British company, registered in either Great Britain or Canada, and having its chief places of business within His Majesty's dominions.

The chairman of the company and a majority of the directors shall always be British subjects, and "the company shall not at any time be or become, directly controlled by foreigners or a foreign corporation."

This is to enable the crown to obtain in time of war a reliable supply of oil fuel when most needed, and also to prevent speculators taking advantage of an emergency to put a prohibitive price in force.

Another section of the regulations gives the crown power to assume control in time of emergency, of any lease or works, and to operate and maintain them. The compensation in such a case is to be fixed by the Exchequer Court.

A further proposed clause was to prohibit all export of oil from Canada in time of war. However, the justice department has ruled that such a regulation can not be put in force by order in council, and that a change will have to be made in the Export Act by Parliament. This legislation will probably be passed this session.

### PROGRESS ON DAM

River Boulders Resist Piling and it is Likely to be Dispensed With

It is pretty evident from the experience obtained during the past week in the attempt to drive sheet piling in the foundation of the dam, that the thing is impracticable and the boulders in the river bed will not permit it. In that case it does not appear as if they are needed and the engineer who designed the dam expressed the same conclusion when here. Mr. Jones, however, is taking the safe plan of advising him of how matters stand in connection with the pile-driving and obtaining his sanction officially to dispense with it. During the time they were trying to get the piles down only a small portion of the former gang were required, but when sanction of the engineer is obtained to dispense with the piling the decision will in all probability be to get down the ditches in which the piles were to be driven, a few feet deeper, before putting in the cement, and to do this it is probable that all of the former gang will be put on again. Things are in shape for speedy handling of material when the work of concreting the main portion of the dam begins. Instead of taking the run of the pit and trusting to the proportions of sand and gravel being right, provision is made for the speedy sifting of it so that the proportions may be obtained absolutely correct, and in this way they may obtain the strongest possible quality of concrete. It begins to look as if they will now easily attain the amount of progress they were counting on making before the period of high water begins.

### A DISTASTEFUL DUTY

"These are slanders: never yet was noble man but made ignoble talk. He makes no friend who never made a foe."  
LANCLOTT AND ELAINE.

Just as Joseph Chamberlain said when compelled to rise in the British House of Commons to defend his reputation against foul slanders, promulgated first on the political hustings and in the press and later in a more timid and modified form in the shape of a resolution introduced in the House, that "it should not be necessary for him after his long service as a member of the House to have to assure his fellow members that he was no thief", in like manner it should not be necessary for the editor of this paper at this time to have to assure the residents of a district in which he has lived for over twenty years, that he is no scoundrel. It is in the more timid form of innuendo that the personal honor of the editor of the Gazette was assailed in last issue of the Princeton Star by both the editor of that paper and by an anonymous assailant at present working his devilry around Keremeos. We have been advised to take no notice of it, and while there is some wisdom in the advice we do not think it would be fair to us to deprive the public of the opportunity to know the truth in connection with the McKinney slur. No charges are made, but hints of dishonesty are thrown out in the shape of references to wireless in Hedley and something else in Camp McKinney which is not specified, but the implication is unmistakable that the public are being given to understand that in some way the workingman was defrauded by the editor of this paper. The same thing reached our ears here a few years ago when the direct statement was made that the men working on the mining property there on which the editor had charge as manager, had been cheated out of their wages. The editor was manager for some time of a property in that camp and as such, paid out for labor and supplies over \$15,000 and there was not an hour's labor done on the property by any workingman for which he did not receive payment in full, nor a dollar's worth of supplies that was not paid for. When the property was shut down in the early spring of 1900 there was less than half a month's time coming to the mine crew. Payments up to this time were all made by cheque on the Bank of Montreal, Vernon, the funds being supplied directly to that Bank by the head office of the company in

Continued on Page four

### MINERAL PRODUCTION OF THE PROVINCE

Total Output of British Columbia Mines For Last Year is Close to Thirty Millions

The total mineral production of the province for the calendar year 1913 will be slightly less than \$30,000,000 according to estimates prepared in the last few days by the Department of Mines at Victoria.

"The value of the mineral products the last year will be approximately \$29,550,000 which is nearly \$2,500,000 less than the production for the year previous" said Fleet Robinson, provincial mineralogist, in a review of the year's workings of the department.

"This decrease is due to a shortage of \$1,900,000 in the coal mining industry caused by the labor troubles on Vancouver Island during the summer, and a shortage of \$650,000 from the metalliferous mines, due to decrease of some \$1,160,000 in copper output and \$25,000 in zinc which are however partly compensated for by increase in the output of gold, silver, and lead.

"A portion of the metalliferous deficit is due to a fall in the market price of metals as shown in the following table of average yearly prices of different metals:

1913—Silver, 58.81 cents per oz; lead 4.35 cents per lb; copper 15.25 cents per lb; zinc 6.94 cents per lb.  
1912—Silver, 60.83 cents per oz; lead 4.47 cents per lb; copper 16.34 cents per lb; zinc 6.94 cents per lb.

### PLACER GOLD

"With regard to placer gold the output this year will be about up to the average for the past few years amounting to \$540,000. From information at present received by the department there are indications that the Atlin district has done somewhat better than usual during the past season, while Cariboo, the only other important placer camp, has fallen somewhat below its normal output last year. The combined total output will amount to \$6,000,000.

"Silver will show an increase of nearly \$93,000 over last year despite the drop in market quotations of one cent an ounce. The total production of this metal reaching \$1,900,000.

"The production of lead will amount to approximately \$1,850,000 an increase of over \$40,000 due to a successful season in the Slocan country, and the mining activity of the Consolidated Mining and Smelting company at Trail.

"With regard to copper there is every indication at present that there will be a decreased production, and as the price of copper has dropped a little over one cent a pound there will be a considerable decrease in the total value. This year's output will amount to about 7,250,000 a decrease from last year nearly \$1,150,000 and of this deficit the drop in market price is responsible for nearly \$450,000.

"The chief producers who are located in the Boundary District, have about maintained their tonnage of ore mined but by the inauguration of improved methods of treatment have been enabled to treat ores lower in copper than formerly. The development now taking place in Coast copper mines will guarantee a very material increase in the production of this metal in the coming year.

### ZINC PRODUCED

"The past year showed an increase in the quantity of zinc produced but since the market price has dropped one and a third cents a pound, amounting to about 20 per cent in the price of the crude metal the value of the products this year will show a decrease of over \$25,000 and will amount to about \$290,000."

### SOFT-SOAPING 'EM

The hotels in Hope have adopted the use of liquid soap. The reason is the experience of one of the best hotels. A guest, also a very prominent citizen, developed the habit of eating while asleep, and consumed huge quantities of the solid creamy material. It is entirely in his interest that the change to a less appetizing form of cleansing emollient has been made.

### ENCOURAGE HOME INDUSTRY

### REDUCING CANADA'S DEBT

Some Telling Figures Are Presented by Finance Minister

In reply to the speeches of opposition members criticising the borrowings of the present government Finance Minister White after showing how much Canada's trade had expanded since the present government took office, went in detail into a contrast of the borrowings of Finance Minister Fielding with those of his own and very much to the disadvantage of Mr. Fielding. On the debt he said:

"The net debt of Canada on October 11th, 1911, the day when we came into power, was \$321,000,000. The net debt on December 31st, 1913, was \$303,000,000 or \$18,000,000 less than when this government took office. Mr. White added that at the end of the fiscal year 1914, the net debt would be less than that of three years ago.

Continuing he said that in addition to the direct debt added by the Liberals they introduced a system of indirect debt. The Liberals had introduced the principle of guaranteeing bonds. The Canadian Northern Ontario and the Canadian Northern Railway had received guarantees of fifty-five million dollars and the G. T. P. guarantees of seventy millions or a total contingent liability of 125,000,000.

In the session before the Conservatives came into power the Liberal government guaranteed the C.N.R. to the extent of thirty-five million dollars. He described the financing of the government by which they agreed to implement the G. T. P. in the sale of its bonds for any amount which they brought below par, as grotesque. One of the first things that he had to do as Minister of Finance was to pay over \$5,000,000 on account of this implementing clause for which in return he received absolutely nothing.

To save this waste and to prevent the G. T. P. bonds going on the English market at a sacrifice he had introduced legislation to give the government power to purchase the bonds. In this way he had repaid the loss sustained by reason of the financial blundering of the old government. During the past year he had invested \$22,000,000 in these bonds. This was where the surplus had gone.

### COST OF N. T. RAILWAY

When he considered that the N.T.R. instead of costing sixty million dollars, as estimated, had cost over two hundred millions and when he considered the borrowings of his predecessor he could not help but think that saving reproving sin would be consistency itself compared with the honorable gentleman.

There had been unusual borrowing this year, the minister added. If there had been nothing but ordinary expenditure they would have closed with a surplus. But at the end of last session a larger programme had been undertaken. There had been subsidies to pay, together with half the loan to the G.T.P., while \$22,000,000 of G.T.P. bonds had been bought in. To do all that, it had been necessary to do some borrowing. The total borrowing was \$43,000,000.

### PIPE FREEZING IS PREVENTED

One of the most annoying and troublesome things to be met each winter in farm and country life is the question of frozen water pipes, writes a contributor to the Country Gentleman. This is especially so in districts where there is no gas line and where plumbing is unprotected and open.

Each winter for several years I was given all kinds of trouble and extra work in this way as soon as the thermometer reached the freezing point or lower. After much experimenting I finally hit upon the easiest, most inexpensive and surest way to keep the frost off the pipes. I have recommended it to many persons who have tried it and found it saves many repair bills.

Melt an equal quantity of petrolatum—vaseline—and of paraffin wax together and after wiping the pipes perfectly dry apply with an old brush a thick coat of this mixture while it is hot. An old lamp or torch will easily keep in a liquid state. You will find that no matter how cold the weather may get the frost cannot penetrate this coat of grease. I have used this on water pipes that ran along the ground unprotected and not once during the coldest weather did they freeze up or give me the least trouble.

PRUNING SCHOOLS

The Department of Agriculture, in accordance with its policy of past years, of providing means whereby the fruit growers may receive special training in the more difficult branches of their work, has decided to hold pruning schools at a number of points during the coming winter.

The local organization will also provide an orchard or orchards, where the instructor may hold the pruning classes, and a room or hall in which the lectures may be held. Besides the actual practice in the orchard of which the course will consist chiefly, where the pupils will prune trees under the supervision of the instructor, there will be several lectures on the following subjects: The theory of pruning, formation of fruit buds, pruning as related to plant growth, top grafting, undesirable varieties, and first aid to injured trees.

MINING NOTES

The price of silver is on the increase and is near the 60 cent mark. Concerning the outlook for silver the house of Pixley & Abell of London has the following: "A very important point to consider in the future of silver is the diminution of actual supply which has been taking place within the past six months. It is reckoned that about one third of the annual world's production of silver comes from Mexico, but the disturbances there have so gravely interfered with the trade of the country and the means of communication that for the past half year the total imports of silver from the North American continent, representing the output of the United States, Canada and Mexico, have fallen short of the first six months by about \$10,000,000 compared with the second half of 1912 it is about \$17,000,000, and there is no present expectation of improvement.

J. L. Harper, a prominent mining man of Republic camp has been looking over Kruger Mountain and has bonded the Golden Chariot property and is negotiating for others. Extensive development is to follow on approved lines. The property is in British Columbia but near the boundary line and the town of Oroville stands to benefit by its development. Speaking of it the Oroville Gazette says: "The renewal of work on the Golden Chariot along the vigorous lines inaugurated by Mr. Harper means much for both the mining interests of this locality, and for the town of Oroville, so fortunately situated in its relation to Kruger mountain. The benefits will be felt immediately by giving employment to a large force of highly paid miners, and by attracting attention to other mining properties that are equally as promising as the Chariot. But the greater benefits are yet to come should Mr. Harper succeed in making a profitable mine. Let there be one producer on Kruger Mountain and half a dozen will speedily follow. for the mineral belt on that mountain is extensive, and there are several claims in an advanced stage of development that have as fair a promise of making mines as the Chariot. Moreover, success on Kruger under improved methods of procedure insures success by the same means in other nearby mineral zones. One producer will be followed by other producers, and there is no industry that will so largely contribute to the rapid building up of a flourishing city as mines that are paying dividends to the operators and thus sustaining a large payroll. The lands about Oroville are undoubtedly the stable and never failing backing of the place, but for quick action in insuring results in the way of city building an outputting mine of large capacity is more potent than rich broad acres and a vast number of them.

1836 THE BANK OF 1914 British North America

78 Years in Business. Capital and Surplus \$7,786,666. Teach the Children the Value of Money If your children learn, while growing, not only how to spend money wisely, but how, by self-denial, to save something for the future, you will have started them on the road to financial success.

HOTEL SIMILKAMEEN HEDLEY, B. C. An Up-to-date First-Class Hotel RATES MODERATE F. J. DOLLEMORE Proprietor.

BIG SUPRISE TO MANY IN HEDLEY Local people are surprised at the QUICK results received from simple buck thorn bark, glycerine, etc., as mixed in Adler-i-ka, the German appendicitis remedy. F. M. Gillespie, druggist, states that this remedy antiseptizes the digestive system and draws off the impurities so thoroughly that A SINGLE DOSE removes sour stomach, gas on the stomach and constipation INSTANTLY.

NOTICE SIMILKAMEEN LAND DISTRICT DISTRICT OF YALE TAKE Notice Mae Evelyn Haynes, occupant married woman, of Fairview, intends to apply for permission to purchase eighty acres of land in the Similkameen Land Division as follows: Commencing at the south-west corner of Lot 2865 thence west forty chains, thence north twenty chains, thence east forty chains, thence south twenty chains to point of commencement, containing eighty acres more or less. MAE EVELYN HAYNES per Val. C. Haynes, agent. November 21st, 1913.

**Town and District.**

Miss Eva Cambell is visiting friends in town.

Mrs. Dalton left for Vancouver on Wednesday of last week for a visit of six weeks with Mrs. Godfrey.

Chief constable Simpson of Greenwood who is making a tour through the district was in Hedley on Friday last.

Track-laying has begun on the Kettle Valley east from Penticton and is to be continued to Hydraulic Summit.

Conductor Getsey of the Great Northern on the Oroville-Coummoné run is enjoying a six weeks' holiday in Texas.

Elmer Coile was married at Republic last week to Miss Pearl Strong. Coile was formerly assistant electrician in this camp.

The Princeton basketball team will be down on Friday night for the return match which will be played in the Star Theatre.

A special general meeting of the B. C. Portland Cement Co. will be held in Vancouver on Feb. 5th. to put the institution on its feet.

Lost—In Hedley a gold watch chain with fob attached, and bearing crest; each link of chain is stamped '99'. Finder will please leave it at this office.

T. D. Pickard arrived in town yesterday. He has not been here since October 1912 and will spend a few days looking over his interests in the camp.

Mrs. George H. Sproule left for the coast on Wednesday last to look after private interests there. She accompanied Mrs. Dalton who went out the same day.

R. Wheeler has received a month's extension and will not be back for a few weeks yet. His mother is very ill and he does not care to leave her at the present time.

T. R. Willey returned the end of the week where he attended a convention of No. 6 district of the Western Federation at Nelson as a delegate from the Hedley union.

J. D. Sword a well-known mining promoter was drowned off a yacht near Valdez on the Pacific coast recently. He formerly resided in Rossland and made occasional visits to Camp McKinney.

A masquerade carnival will be held on the Hedley rink on Monday, February 2nd. Prizes will be given for the best ladies' and gents' costumes and best comic costumes; also for boys' and girls' costumes. General admission 25 cents.

The rink is in excellent shape at present, the frosts of the past week being taken full advantage of to get it in shape. Every night it is crowded with skaters of both sexes and all ages, shapes and sizes. The hockey team have also had a number of good practices and the rink season is at present at its height.

A. Robertson, manager of the B. C. Portland Cement Company's plant at Princeton, was in Vernon on Thursday of last week, after a trip to Vancouver to confer with the directors of the company. New machinery is to be installed at the Princeton plant, and the properties will be extensively opened up.—Vernon News.

W. A. McLean who has had charge of the work on the dam was laid up for a few days with an attack of grippe. Long hours on an outside job of that kind in all kinds of weather which may be expected at this time of the year is, trying. He was sufficiently recovered by Monday morning to be back again on the work.

The annual general meeting of the Hedley Hospital Society was held on Tuesday evening and a board of directors for the year elected. The only change in the board was the substitution of C. P. Dalton for H. G. Freeman who was not present at the meeting. Fuller reference with financial statement will appear next week.

Our thanks are due to Lou Rolls for a copy of the Shaughnessy Heights Golf Club score card. He had the privilege of witnessing the match which was played by the two English champions Vardon and Ray against the two Vancouver professionals. He declared it great golf but it made him long for "an other round of the good old Hedley Links."

The first accident at the dam befel a workman named Waddell who on Saturday evening had his foot badly lacerated by coming in contact with the pump. He had on a new pair of boots that were slippery and in working near the pump he slipped under it and his toes were caught under the crank shaft. The wound was dressed by Dr. McEwen and although badly lacerated the foot may pull through without amputation.

Some are of the opinion that we were in error last week in stating that Dick James had gone to San Francisco and they express their belief that he is in the Boundary. It may be so; all we know about it is that he supplied us the information himself a few hours before train time, and it was reasonable to conclude that he ought to know.

The people of Penticton jumped at conclusions when they inferred that Mrs. Greenhill and Mrs. Caldwell were concerned in the infanticide case near Moosejaw when a Mrs. John Caldwell and a Mrs. Greenman were sentenced to ten years each. Mrs. Honey (formerly Mrs. Marie F. Caldwell) writes to the Penticton Herald making the correction.

Always deal with those who think enough of your trade to ask for it, and the surest way to get the worth of your money is to read carefully the announcement of those who invite your trade in their advertisements. The day is past when merchants advertise what they are not prepared to carry out.

There are some ski experts among the Miners up at the Nickel Plate, for we notice by the Rossland Miner that the carnival committee in that town are trying to get in communication with the ski men at Hedley with a view to having them go over there to take part in the carnival. What is the matter with the rink committee here getting the men to give an exhibition of ski jumping here some time this winter if deep enough snow can be secured to make it safe? Most of the people in Hedley have never seen ski jumping and it would be an attraction that would be appreciated.

Dr. McEwen, Dominion quarantine officer, doesn't intend to stand for any monkeying with vaccination certificates. He has found out that certificates were being furnished in Oroville bearing the name of Dr. Howse on dates when that gentleman was known to be in Seattle and Spokane and he has given orders to the officers on the trains to accept no more certificates bearing his name. It was just such loose fool work as that which allowed small-pox to get the start which it did in Oroville and elsewhere in the same county. Now there is believed to be a case in Chopaca which came over from Molson and vigilance becomes necessary to keep the disease from again spreading to this side of the line.

**METEOROLOGICAL.**

**PRINCETON ASSESSMENT DISTRICT**

Notice is hereby given that a Court of Revision and Appeal, under the "Taxation Act" and "Public Schools Act," will be held in the Court-house at Princeton, on Friday, the 6th day of February, A. D. 1914, at 11 a. m.

Dated at Princeton this 16th day of January, A. D. 1913.

33 F. TEMPLE CORNWALL,  
Judge of the Court of Revision and Appeal

The name of Stratheona bids fair to be perpetuated in the form of another celebrated case like the Tiebhorne. A claimant from Brookline, Mass., claims relationship as son and a share of the estate.
