CAMP HEDLEY'S OUTPUT

Some Figures to Show that Ore to the Value of Four Millions has been Extracted.

In another column we reproduce a portion of an article on the camp which appeared in the Nelson News. The article is in point of accuracy one of the best that have appeared in outside papers but there are one or two points in it that require revision and the principal one is the underestimate made in the value of the ore produced, which is placed as being only between \$2,500,000 and \$2,700,000 up to the end of 1911. There have also been one or two other instances during the past year or two where similar write-ups have understated the production, and as the Gazette has on more than one occasion claimed that the output was over three millions for that time and the editor has also claimed in conversation with strangers that the output of the camp to the middle of 1912 is a little better than four millions, we cannot in justice to ourselves allow any more of these understatements to go unchallenged.

Either we are right or we have been wrong in this matter and it is now up to us to produce figures to bear out our contention and justify the claims we have made. We have always contended that the truth about Hedley was good enough without trying to stretch it any and we have refused on occasions to countenance wild statements on output that were farther

above the mark than these figures in the Nelson News are below the mark. Up to December 31st, 1907, the output was 107,153 tons of value \$1,027,229.49. They represented an assay value of \$15.10 per ton with a recovery of \$13.95 per ton and a profit over working expenses of \$8.22 per ton. As that covered a period which included the gossan it was of course not to be expected that as high values would be maintained in subsequent years. Those figures are absolutely correct and are undisputed. It is not necessary to say where or under what circumstances they were obtained further than that they were given out under circumstances where it was not in the interests of those giving them out to make them a cent more than they were, but the reverse.

Now it is not difficult to show what was the output and value in the years that followed. All that is necessary is to take the Minister of Mines report year by year and we have it so far as the tonnage is concerned and as for values the report for 1907 issued in the middle of 1908 places the value per ton at "about \$14.00" which corresponds very closely with the \$13.95 recovery already referred to. But discarding that valuation and taking the recovery returns year-by-year which we now give it stands as follows:

Value up to end of 1907.....	\$1,017,229.49
1908, 44,068 tons at \$13.35 per ton.....	588,307.80
1909, 31,100 tons at 11.58 per ton.....	360,138.00
1910, 44,828 tons at 12.31 per ton.....	551,832.68
1911, 57,815 tons at 11.90 per ton.....	608,201.85
Allowing for first half 1912 the same as first half 1911.....	346,600.92
Total.....	\$4,157,310.74

BASEBALL MATCH

Hedley Ball-tossers Turn the Tables on Their Opponents From Keremeos

Keremeos base-batters came up on Sunday last in two auto loads to play another game with the Hedley team and this time were not as fortunate in turning the trick as on the former occasion. Neither side were able to put all their best men in the field and as a result there were weak patches in both. Tom Daly played for Keremeos but did not pitch, which restriction was necessary to make the game even enough to be interesting. Maurice Daly hurled for Keremeos and Billy Corrigan for Hedley. In the earlier spasms the teams played fairly even with Keremeos having a trifle the best of the argument, but in the seventh inning the Keremeos pitcher took on a load of trouble in which his opponents were permitted to get five runs over the home plate which was more than half their entire tally for the match. Billy Corrigan was hit rather freely in the beginning of the game but tightened up later on and treated the visitors to sundry duck egg innings. The last innings was pitched by Messenger whose control was not equal to his speed and a few got passes. The biggest cause for complaint which the fans had against him, however, was not in his pitching but his erratic ideas of base-running which is a failing that has become chronic with him. Whenever he gets on the path he is seized with an irresistible suicidal mania and is almost sure to die between bases very shortly thereafter; for no matter whether there be two out, one out or none at all, the gruesome taking off has to eventuate. And what is still more exasperating to the fans, he experiences no chagrin at the untimely end but seems to have the impression that there has been something meritorious in the rash act with all its ghastliness. The error column was liberally filled up by players on both sides, and while there were some snappy plays at times there were some other muffs and bad pegs that would be sinful enough for any day in the week let alone on Sunday.

Following is the line-up and score:

Hedley position	Keremeos
Knowles	Robertson
Corrigan	M. Daly
Messenger	T. Daly
Martin	Keeler
French	W. Daly
Rotherham	Hargreaves
Freeman	Bronley
Clare	Shean
Bowerman	Burnley
Hedley	0 0 2 1 0 0 5 10-9
Keremeos	2 0 0 1 0 0 0 1-4

TROUBLE AMONG RANCHERS

Danny McLaughlin laid a complaint against Thos. Sirois in which he accused him of going to his cabin up on the mountain some time about or after midnight on Saturday night or Sunday morning and firing a shot which awakened him and which he did not know whether it had been fired into the cabin or not. Afterwards an attempt was made to force his door and a voice which he claimed to know was Sirois asked him to come out, and among other remarks threatened to kill him if he did not get off the place. Trouble has existed between them for some time but this seemed to be carrying it a trifle too far and when the information was laid a warrant for Sirois' arrest was issued, but the constable on going up and getting a story from Sirois which was directly opposite to the information laid took on himself to conclude that the information which had been sworn to was false and accordingly made no arrest. A hearing was arranged for Tuesday when Danny gave the evidence summarized above, only in much more detail. Sirois gave evidence in his own defence and his story was that he had left Hedley at 11 o'clock Saturday night, rode up the hill and got to Danny's when it was breaking day. He found Danny at that hour inside his fence and Danny began accusing him of paying the surveyor \$100 to place the line so as to take some of his best land and afterwards began throwing rocks at him and hit his horse on the neck. Neither the complainant nor the constable who is supposed to procure evidence in all criminal cases before they are brought up for hearing had thought it necessary to have anything more than these two contradictory stories and the bench concluded to dismiss the case. Nevertheless Sirois' story for a dozen most obvious reasons carried so many marks of improbability and the complainant seemed to be so thoroughly afraid of the defendant that it was deemed necessary to have Sirois bound over in his own recognition to keep the peace.

The provincial cabinet is meeting this week on the return of the Premier and Attorney-general from the north country.

Anglo-phobia has again broken out virulently in the German press.

THE NICKEL PLATE MINE

Descriptive Write-Up of Mine and Works, by

REPRESENTATIVE OF NELSON NEWS

The Property As It Appears to Outsider—Extent of Development and Trend of Ore Bodies.

The Hedley Gold Mining company purchased the Daly Reduction company's mine and plant in 1900. At the end of 1911 the mine had produced 231,000 tons of ore, valued at between \$2,500,000 and \$2,700,000. Last year the company paid 25 per cent. dividends and showed a surplus \$303,000, paying 11 per cent. the year before, which is certainly a magnificent showing. The whole plant has been put in excellent condition. The increase in dividends is due entirely to more efficient handling of the ore and the saving of a greater percentage of the values due to changes in the mill.

FIVE ORE BODIES WORKED

The ore bodies that have been worked so far are five in number, while there are two more on which nothing but development work has been done. There are four on the Sunnyside and three on the Nickel Plate claim, the latter being superimposed. There are also some showings on the Bulldog claim.

The ore bodies lie in the Nickel Plate formation, which is 900 feet thick and composed of altered sedimentaries cut by tongues of andesite running out from a main andesite core, which cuts through the whole formation. These tongues of andesite have flowed for the most part along the bedding planes in the line and seemingly did not disturb them to any great extent. The andesite is impregnated with arsenide of iron, which carries very little values, but the lime is highly altered to lime silicate, hornfels or granite epidote calcite, carrying arsenide of iron and gold. Most of the gold is carried by the arsenides, but near the surface considerable of it has been converted into free gold by oxidation.

The No. 1 ore body on the Sunnyside has been worked as has the No. 2 which lay under the andesite. In the No. 3 Sunnyside the andesite crosses the formation. This ore body has been only partially worked out and needs more development. The mineralization extends outward from the andesite for a short distance, when the unaltered lime appears and the values cease. The No. 4 has been developed by a shaft 700 feet on the dip and it is intended to sink this shaft 300 feet more and diamond drill from drifts at the bottom as the ore bodies opened up have not been as large as expected.

WIDE ORE BODY

On the Nickel Plate the main ore body is about 175 feet wide and from 25 to 45 feet thick, and dips into the hill at an angle of 24 degrees, which is the dip of the formation. It has been opened up for a distance of 1,100 feet on the dip by tunnels. No. 4 tunnel is the lowest and all the ore below it will be worked from winzes.

The ore is stoped by the pillar system similar to that in use by the Granby.

The second ore body is separated from the first by a sheet of andesite from 18 to 25 feet in thickness and is of about the same width of the upper ore body. It will be stoped in the same manner as the upper one, the andesite being left as a roof and pillars left vertically under those in the upper stoppe. It has been proven by raises, drifts and diamond drill holes to extend down for 500 feet, where it is cut off by the second and third andesite sheets meeting. It comes in again about 300 feet further down. The third ore body is patchy and not much has been done on it except diamond drilling. A winze from the fourth level sunk 210 feet on an incline is just opening it up.

The No. 1 ore body is being opened up near the surface by raises, but practically no ore has been mined from it yet. The ore is mined across the ore body till it gets of too low a

grade. The average grade of the ore is kept at from \$9 to \$11 per ton, although a much lower grade of ore could be handled at a good profit, as the company is able to pay 25 per cent dividends on the present output.

MUCH ORE DEVELOPED

The ore is hard and very tough. The drilling is all done by heavy machine drills and frequent bull-dozing is resorted to to break up the boulders. There are several thousand tons kept broken ahead in the stopes and with the ore developed there is sufficient to keep the mill running for some years to come.

The company has taken a lease and bond on the Windfall group from L. W. Shatford, F. H. French, G. Turner, T. D. Pickard and L. G. McHaffie. The group comprises the Windfall, Morning, Czar, Big Horn and Winchester fraction. They are within 1,200 feet of the nearest workings in the direction of the dip of the formation. The main andesite flow, which cuts the formation and from which the sheets come which bear such a definite relation to the ore bodies, lies between this group and the Nickel Plate. As this main andesite intrusion will cut off the Nickel Plate ore bodies unless the same conditions exist on the other side or there is an ore body alongside of the main flow going down with it, it is the intention of the company to diamond drill these claims very thoroughly to find out whether these same conditions exist or not at depth on the other side of the flow.

Besides these claims, the company has others extending over several miles, so that it has an immense amount of ground to prospect yet, which may or may not prove profitable.

TRANSPORTATION METHODS

The ore is brought from the mine, which is about 4,500 feet above the mill, by an electric tramway 7,000 feet long, in trains of from 10 to 12 wooden dump cars of two tons capacity, to the bins at the head of the incline gravity surface tramway. Power is supplied for the haulage locomotives by a 100-horsepower Westinghouse motor direct connected to a 75 Kilo-Watt direct current 500-volt generator and a 50-horsepower Westinghouse motor direct connected to a 45 Kilo-Watt 500-volt generator. The incline gravity surface tramway is 9,300 feet long, using two stages. The skips hold five and one-half tons and are lowered with a one inch steel cable controlled by friction brakes on the drums.

The skips have two links and are lowered from the upper station to the intermediate with the cable in one link and the cable for the lower part is then connected with the other link. A hook on a half inch cable on a hand windlass is then hooked through the first link and the slack taken off the upper cable so it can be disconnected. The three rails, with the four rails at the three meeting points are laid on ties on the ground, except where hollows are crossed, when they are carried on trestles.

The skips dump into a bin above the mill, from which they are taken by another similar incline gravity tramway, about 500 feet long to the mill bins. The idea of this is that the main tram does not point towards the mill and in case one of the skips break away it would not go down through the mill, but plunge harmlessly down the hill.

There is also a surface tramway from the head of the main tramway to the shops run by a small hoisting engine to hoist supplies for the mine to the foot of the main tram. An average of 36 skips per day are lowered by the main tramway and provide sufficient tonnage for the mill.

Premier McBride announced before he left on his trip to the north that there was on deposit to the credit of the Province of British Columbia, in various banks the sum of \$9,000,000. He rejoiced in the good financial standing of the province and its excellent credit abroad and deplored the actions of reckless parties who were not sufficiently careful to try to maintain that credit but were ready to imperil it by trying to dispose of questionable schemes. He announced that Canadian Northern trains would be running to Yale in a couple of months and he had been assured by Mr. Bury that double tracking of the C. P. R. would go on from Winnipeg to the coast without interruption.

Town and District.

Mrs. M. K. Rodgers leaves for her home in Seattle in a few days.

Mr. and Mrs. McEwen, sr., went to Keremeos on Monday's train to have a look over that part of the valley.

Rev. Father Comant was in Hedley over Sunday and on Monday morning held mass for members of the R. C. church.

Harold Townsend arrived in town on Tuesday and has taken his old job as clerk in the store of Shatfords Limited.

Hedley boasts some very pretty flower gardens and lawns and Kingston Avenue can hold its own with the best of them.

The West Yale Review tells of a mishap to Luke Gibson of that place, formerly of Princeton, who was injured by his horse falling on him.

The first of the Keremeos peaches came up the valley last week and from now on there should be a generous supply lasting well on into September, or later.

The selection of Grand Forks as a joint railway divisional point for the C. P. R. and Kettle Valley has been approved and work is shortly to start on erection of a ten stall round house.

Anton Winkler shows specimens of some very fine cherries grown on his ranch up on the mountain. In a few years the product of the mountain sides and mountain tops in this vicinity is likely to prove a revelation.

Rev. A. H. Cameron is expecting a visit shortly from his sister and niece who live in Calgary. His sister was advised by her doctor to try the Okanagan for a while but in all probability they will prefer the Similkameen instead and luxuriate among the orchards of ambrosial Keremeos.

Track-laying has recommenced on the Kettle Valley Railway and the track which was laid up the West Fork as far as Peanut Point is expected to get through Beaverdell in less than a fortnight and reach Carni about a week later, making 57 miles of steel all told west of Midway.

Summerland and the whole Okanagan have suffered irreparable loss in the death of R. H. Agur of that place who died very suddenly last week. Deceased was one of the leading fruit-growers of the Okanagan and was president of the B. C. Fruit-growers Association.

The secretary of the I. W. W. is reported to have re-appeared on the C. N. R. grade in the Fraser canyon and as a result the local constables are preparing to get busy. Both the country and the railways have already been put to great loss by allowing too much latitude to worthless disturbers of that kind and some swift summary work would now seem to be timely.

T. Walter Beam of Denver, Col., came in on Tuesday and is having a look over the Nickel Plate and meeting old Hedley friends who are always pleased to see him back. He was over in the Kootenay and when that near Hedley took advantage of the opportunity to pay a visit to the Bonanza which he was so largely instrumental in picking up for the present owners three years ago.

The Remington Typewriter Co. has taken over the Monarch, its factory, patent rights and all its assets and will merge the two concerns under one general management. The visibility features of the Monarch with its extreme lightness of touch and adaptability for general work will make its product of special value to the Remington people, and the wide sales organization of the Remington will be able to push the Monarch output in a manner that it was never pushed before.

In less than a week congratulations will be in order for Mr. H. A. Hineks, for on July 30th he will lead to the altar a young lady in North Birmingham, England. The wedded couple will spend a couple of weeks at Killarney and on August 13th they will sail for Canada. Mr. Hineks' many Hedley friends offer hearty congratulations. The Gazette adds a fatherly blessing.

Last week James Turner who formerly worked at the Nickel Plate came over from Bridesville where he had been working in the hayfields and after imbibing too freely armed himself with a bottle. Out of said bottle he ministered to the thirsty wants of Yorky who is on the interdicted list and therein lay his undoing. Constable Sproule had him up and as he pleaded guilty he was given the minimum fine provided by the new Liquor Act which is \$100 and in default of payment of the fine was awarded two months in jail.

John T. Prather a rancher between White Lake and Kaleden died rather suddenly on Sunday night of a seizure which appeared to be apoplectic in its nature. The funeral took place on Tuesday at Fairview and was largely attended. Deceased was well known in the district, having been engaged in farming there for nearly fifteen years and was among the most progressive of the early settlers.

The Alberta and Eastern British Columbia Press Association is meeting at Nelson this week where the Nelson Press Club is doing itself proud in the splendid entertainment they are providing for their visitors. It is unfortunate that the constant grind prevents many members of the craft from taking in these functions and helping to knit closer the ties of friendship which should bind those engaged in so great a work.

There was insufficient attendance at the annual school meeting on the 13th and it was adjourned for two weeks. By that time it is expected that word will be received from the department in reference to the superior school for which application had been made, there being a sufficient number of pupils in the valley who had passed the entrance and the greater number of them being located in Hedley. Should the superior school be granted it is improbable that Mrs. Thain will be back. She has been very successful in her preparation of pupils for the entrance as well as in bringing on those in the lower classes but could not conform to the departmental regulation with reference to taking the higher room in a superior school and the Board despair of there being any chance of her accepting the lower room under the circumstances.

WATER RIGHTS BRANCH
Take notice that the Board of Investigation acting under Part III of the "Water Act" will meet at the times and places hereinafter mentioned to hear and determine claims to water rights on streams in their respective vicinities, existing on the 12th day of March 1899.
On the 6th day of August, 1912, at 1 o'clock in the afternoon, at Grand Forks.
On the 7th day of August, 1912, at 3:30 o'clock in the afternoon, at Greenwood.
On the 9th day of August, 1912, at 2 o'clock in the afternoon, at Princeton.
On the 19th day of August, 1912, at 1:30 o'clock in the afternoon, at Keremeos.
On the 12th day of August, 1912, at 10 o'clock in the forenoon, at the Government Agent's Office, Fairview.
On the 13th day of August, 1912, at 10 o'clock in the forenoon, at Pentiction.
Parties who presented claims to the Board in 1910 and have received licences in substitution of the records need not present any statement of claim.
Dated at Victoria, B. C. the 18th day of June, 1912.
By order of the Board of Investigation,
J. F. ARMSTRONG
Acting Comptroller of Water Rights.

Synopsis of Coal Mining Regulations

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2,500 acres will be leased to one applicant.
Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.
In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.
Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.
The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.
The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre.
For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.
W. W. CORY,
Deputy Minister of the Interior.
N.B.—Unauthorized publication of this advertisement will not be paid for.

TO CANADIAN ARCHITECTS

Competition for New University Buildings to be Erected at Point Grey, near Vancouver, British Columbia
The Government of British Columbia invite Competitive Plans for the general scheme and design for the proposed new University, together with more detailed Plans for the buildings to be erected first at an estimated cost of \$1,500,000.
Prizes of \$10,000 will be given for the most successful Designs submitted.
Particulars of the competition and plan of site may be obtained on request from the undersigned.
The designs to be sent in by July 31st, 1912 addressed to:
THE MINISTER OF EDUCATION,
Parliament Buildings,
Victoria, British Columbia

WATER NOTICE

For a Licence to Take and Use Water
Notice is hereby given that Anton Winkler, of Hedley, B. C. will apply for a licence to take and use 2 cubic feet per second of water out of an unnamed spring locally known as Bald Hill Slough. The water will be diverted at a point 1 mile north of Elms, Sims' south line and will be used for irrigation purposes on the land described as A. Winkler's pre-emption.
This notice was posted on the ground on the 13th day of May, 1912. The application will be filed in the office of the Water Recorder at Fairview.
Objections may be filed with the said Water Recorder or with the Controller of Water Rights, Parliament Buildings, Victoria, B. C.

THE KEREMEOS PAGE

KEREMEOS, the Centre of Lower Similkameen---Famed for Fruit Growing

Town and Lower Valley.

George Cawston is down with a bad attack of rheumatism.

Ronald Hewat of Fairview was a visitor Wednesday last.

Alex has a bike now and so has Herb. Regular trips will now be made down the valley.

Tom Sing Lung is held up in Vancouver again on account of having to pass another young chick.

Mr. and Mrs. Graham of Vancouver and daughter will spend a month or six weeks on their ranch.

Mrs. (Rev.) J. A. Cleland of Penticton and two children are visiting Mrs. J. J. Armstrong at Maplehurst.

Clare Murphy of Carberry and Arthur Murphy of Winnipeg are visiting their uncle, J. J. Armstrong.

Mrs. Daniel McCurdy and daughter of Similkameen spent Wednesday of last week with Mrs. Knowles of Olalla.

Although there are no handbills out Max Swain Theatrical Co. of New York will play Keremeos, Thursday 25th inst. in the town hall.

Mr. Topham Richardson of London, Eng., and brother of Frank Richardson of Penticton, passed through Friday on his way to Penticton. He had just come through from Independence, Oregon, where he has large interests.

Miss A. Cusick, who has been staying with Mrs. A. E. Hargreaves for the past two years returned to her parents' home at Settler, Alta. While with us Miss Cusick was greatly liked, and it was with sorrow that her many friends saw her departure and only hope that she will be able to return at some future date.

Max Ewart, who has been provincial constable at Keremeos for the past six years or more, resigned his position to take the job as immigration officer at Penticton. During his tenure of office here he did some efficient constabulary work, notably in connection with cleaning out a gang of horse thieves that had been infesting the lower valley and some of the captures he made at times were clever.

J. A. Brown and R. H. Carmichael returned Monday after spending a few pleasant days' outing at Eagle Lake. Fishing was the main item on the programme, and although many fishy stories happen on such trips, they brought home some of the goods to show. Some of the trout they had measured as much as twenty inches which was only an infant in comparison with one R. H. nearly got.

J. J. Armstrong returned Friday after having a successful business trip in the Boundary country with relation to disposing of fruits etc. Many markets are open now to Keremeos produce and it now depends entirely on the fruitgrower himself how he handles his crop for shipment. This is of the greatest importance as buyers will not receive any fruits that are not put up to standard.

On Saturday last Mrs. Daly, Miss Daly, Miss Corrigan and George Allison returned from a delightful holiday spent around Princeton and at Eagle Lake. They brought home some fine trout weighing from a pound and a half to three pounds and measuring from fourteen to twenty inches. They claim of all the holidays spent along the Tuhameen in the past they never enjoyed themselves as much as they did this time.

Mr. and Mrs. A. G. Lawless of Lakefield, Ontario, are visiting Mrs. P. Bromley. Mrs. Lawless is a younger sister of Mrs. Bromley and they had not seen each other for many years. They are delighted with the west in general having spent a few weeks at different places along the line on their way out. After spending another week in Keremeos they will go to Vancouver where they will spend a week or two before returning home.

The baseball team met with a sad defeat at the hands of the miners by a score of 9 to 4. On account of too many vaudeville acts and evening concerts and irrigation stunts, there is no wonder that everything was not as it should or would have been. Another thing we would like to mention is the fact that Keremeos has always been told in the past that its members of any club have always behaved in a gentlemanly manner, but if things don't alter we will have no good name to go away with. There is no need of rowdysm of any description, and those that want to spoil the good intentions of the others should be politely told to keep off the grass.

Crooker's meat shop was broken into about 230 Wednesday morning and \$7.50 cash taken. The entry was apparently made by the back door, although a broken window looked as if a speedy exit had been made by that route. There is evidently some one in the vicinity who is practising amateur burglary and the sooner he is spotted the better.

Now is the time to plan your trip to the Federal Capital Central Canada Exhibition, monster fair of the east, to be held jointly with the

DOMINION EXHIBITION OTTAWA SEPTEMBER 5th & 6th, 1912
