ANOTHER PIONEER GONE

The Greenwood Ledge says that Thomas Raby, aged 80 years had been found dead in his cabin on China creek on Saturday 18th inst. The Ledge evidentally means at White Bar on the North Fork of Rock Creek which is in the eastern part of the Similkameen riding and the Thomas Raby referred to must evidently be our old "cousin Jack" friend who has been placer mining on Rock Creek for over twenty years and will be remembered among the old placer miners who washed gold on Granite Creek during the excitement in that camp before he transferred his activities to Rock Creek. Peace to his ashes. He was about the toughest and most wiry piece of man flesh to be found anywhere and not a lazy bone in his body. At 75 years he would make a bigger showing in the day with pick and shovel than most of the younger men of one-third his age. He had a high sense of honor and was proud as Lucifer and we doubt if there is a man in the country who can say that he knows of Tom Raby ever doing a dishonorable action or beating any man out of a cent. It is not likely that he has left more of this world's goods than will be enough to bury him but that doesn't matter and detracts nothing from the real manhood of the man He simply lived his own life in his own way, content with his dog companions of which he always had one; they died one by one of old age, their master being all their years their most devoted slave. Long after he is gone tales will be told of how he toiled on the Creek living on bacon himself and buying fresh beef for his dog Benny.

"He prayeth well; who loveth well
Both man and bird and beast.
He prayest best who loveth best
All things both great and small:
For the dear God who loveth us
He made and loveth all."

HEDLEY GOLD MINING CO.

Gratifying Report of a Successful Year—Mine and Works in Fine Shape

To the President and Stockholders.
Hedley Gold Mining Company,
New York City.

Gentlemen;

I beg to report progress for the year 1910, as follows:

Mining on your property has been carried on continuously and 46,828 tons of ore mined and milled.

For the first four months, practically no development work was done owing to shortage of power. Such shortage is obviated for the future by the new Auxiliary Steam Plant. During the last eight months the development work that has been done was mostly confined to extending the present ore bodies and testing the ground adjacent.

The ore for the mill has been stoped from several sections of the mine and proves the estimate of ore reserves of August 13th, 1909, to be very conservative, both as to tonnage and values.

The ore broken for the year is about 16,000 in excess of the ore shipped to the mill and is lying in the stopes. This broken ore will averege $13.00 per ton.

IN THE NICKEL PLATE PROPERTY

In the No. 4 Adit Tunnel, 65 feet of drifting on the strike to the north has been done, showing payable ore all the way.

From the same level an incline shaft has been sunk 85 feet to the dip and is in payable ore all the way.

A raise through the andesite was put up and connections made with the Upper Nickel Plate workings. Also, a raise 93 feet on a new ore body lying under the main ore body. This new ore has proven to be 14 feet between walls averages $12.50 per ton.

IN SUNNYSIDE NO. 4

The main incline has been sunk to a depth of 490 feet. At 270 feet a station was cut and a 300 foot drift ran to connect with Sunnyside No. 3. In this drift payable ore was struck at 200 feet and continued for 75 feet. At about the centre of the ore a raise was put up for 20 feet; the ore averaging 14.00 per ton. The incline is still going down and will probably cut the Sunnyside No. 3 main ore body.

IN SUNNYSIDE NO. 3

Development work and stoking in this property has proven the ore values and tonnage to be well above the estimate. The north drift has been extended 25 feet, connections made with Sunnyside No 4 and a raise put up 112 feet in ore of about $12.00 grade. The main Incline Shaft has been sunk 135 feet, and a station cut and level opened at 110 feet. On this level the ore has been drifted on for 75 feet and has proved to be of a grade between $12.00 and $14.00 per ton. We are raising to the level above, also sinking the main Incline.

IN SUNNYSIDE NO. 2

The usual tonnage of 44 tons per day has been maintained, the ore averaging about $12.50 per ton.

Prospecting has been done on the Bull Dog Claim and payable ore found near the surface. 330 feet of drifting has since been done and shows a promising formation, but so far this property is not in shape to ship ore. Work has been discontinued until Spring, when the payable ore shown in the drill holes will be proven.

Diamond Drill prospecting has been done on the Silver Plate Claim and shows promising results. Preparation is now being made to drift to the payable section, as shown in the drill core.

During the year 3,000 feet of Electric Tramway, connecting the Nickel Plate No. 4 tunnel with the main line, has been built. This work was not included in the original estimate for reconstruction but was decided on after finding the new ore body in the lower levels.

A precedent has been established; the ore in the lower levels is as rich as on the surface.

During the year your tramways, which are 17,000 feet long, have been put in first class shape. All the trestles were reinforced and the machinery repaired and put in good shape.

The flume carrying water to the mill, about 12,000 feet long, has been repaired and put in fairly good condition.

AT THE MILL

Many changes have been made, three 150 H. P. Return Tubular Boilers have been installed, together with a complete system of pumps, pipes, feed-water heaters, etc., which, together with the old boilers make 750 horse-power available.

Suitable coal bins and houses have been erected and a new six inch pipe 7000 feet long laid to supply water to the boilers, condensers and the mill.

The old Rand Compressor has been rebuilt and is now a Cross Compound Condensing Steam and two stage 20 drill Air Compressor. It is also connected to a suitable Pelton Wheel so as to use steam, water, or both.

The two old Straight Line Compressors have been moved to a new foundation and piped ready for emergency.

The old 100 K. W. Generator has been repaired and is now in good shape.

There has also been installed a 360 K.W. A. C. Generator, direct connected to a Goldie and McCulloch 500 H.P. Corlis Condensing Engine on one end of the shaft, and a 500 H. P. Dobel wheel at the other, both fitted with the latest governing devices. This will permit of using water, steam or both on this unit, and should be economical and insure continuous operation.

The power house has been extended and a complete fire protection system installed.

Every unit in the mill is now connected to the power plant and is being successfully operated with electric motors.

The Batteries have been lined up and repaired and put in good order. Bunker Hill Screens have been installed to classify the product before passing to the tube mill which is erected and ready to run.

A complete system of Classifiers and Hydraulic Sizers, together with the necessary piping, etc., has been installed, also 12 Deister Tables for slime concentration.

The new Merrill Precipitation Presses and the Oliver Filter Presses are doing good work.

All the pumps, etc., are connected to suitable induction Motors, and the shops, tramways, etc., are being operated from the new plant.

During the year changes were made to the old mill which increased the tonnage from 120 tons per day to 145 tons and as soon as the motors arrive for the tube mill, the plant will be operated to its full capacity.

Considerable extra repairing and renewing have been done and we have overrun our estimate of cost of reconstruction; but, as we consider the mine has every appearance of permanency, and as there is more ore in sight today than ever before since the property was first opened in 1898, we considered it wise to do the work well.

Owing to strikes beyond our control the installation of the machinery has been delayed.

Yours very truly,
GOMER P. JONES
General Superintendent.

Continued on Page Three

DETAILS OF THE DISCOVERY

Diamonds on Tulameen of Scientific Rather Than Commercial Importance

Prof. R. W. Brock, director of the geological survey, announced yesterday that diamonds have been discovered by the survey in a British Columbia rock, the first recorded discovery of diamonds in Canada.

"The rock carrying the crystals is a peridotite of the variety known as dunite, consisting of olivine and chromite," said Prof. Brock. "The rock specimens in which diamonds were found were collected by Mr. Chas. Camsell, on Olivine mountain near the Tulameen river, where Mr. Camsell has been making a geological examination on behalf of the survey. Samples of the rock were submitted to Mr. R. A. A. Johnson, mineralogist of the survey, to ascertain the nature of the chromium minerals. In the course of his examination, Mr. Johnson secured some insoluble fragments of crystals which appeared to be diamonds." More of this material was separated out and a series of tests conducted by Mr. Johnson establishes beyond doubt the nature of the materials.

"The individuals so far extracted, from a number of samples, are small, none of them being larger than an ordinary pin-head but many appear under the microscope to be clear and bright and of good quality, though some are yellowish or brownish.

"The diamonds found occur in the chromite and not in the olivine of the rock. The chromite occurs as short irregular veinlike segregations an inch or more in width, in irregular masses and as small disseminated grains through the rock. Gold and platinum also occur in the chromite.

"On account of the small size of the diamonds, and the irregular distribution of the chromite, the discovery is of scientific rather than of commercial importance.

"It is possible that the placer deposits found in the streams draining peridotite rock-mass may contain stones of greater size, although the fact that placer mining for gold and platinum has been carried on for a number of years without such a discovery having been made, tends to lessen the possibility, as stones of commercial size in the sluice boxes would be apt to attract the attention of the miners.

"The peridotite in which the diamonds occur is often weathered to serpentine. It is interesting to note that it is closely related to the rocks which form the matrix for the Arkansas diamonds and for the South African. The discovery of diamonds in British Columbia was not altogether unexpected by the survey, officials working there have for some time been on the lookout for them. Some years ago, the present director obtained some microscope crystals which were believed to be diamonds and which gave positive results in all tests to which they could be submitted, as a result of which prospectors were notified to be on the lookout for diamonds in British Columbia. The present discovery, however, is the first in Canada which can be definitely announced.

THE MAN OUT ON BAIL

McConnell of the Saturday Sunset, the man out on bail, continues to be nasty. If he were not out on bail he might not be able to be nasty, so it may be a case of "making hay while the sun shines." The commission of Justice of the Peace held by the Editor of the Gazette seems to worry the Sunset editor. For his information we may tell him that the editor asked the Attorney-General's department to be relieved of the commission and its responsibilities after a full statement was made to him of the circumstances and all the correspondence and other documents connected with the wireless agency offered for his inspection or the inspection of anyone whom he might appoint. His reply was a request for us to reconsider the matter of resigning and an expression of the belief that no culpability was attached. McConnell's continued treatment of the circumstance shows him to be a man of so irresponsible and dangerous nature that it begins to look as if the court was in error in leaving him as he is—out on bail.

McCONNELL LOGIC

Behold the Syllogism—Here are the Premises, Note the Conclusion

Mr. Maxwell Smith referring to McConnell of the Sunset as "an uncouth and unprincipled individual" likened his type to "festering pimples on the posterior of humanity which when healed up in one spot only break out in another"

The Gazette without note or comment by way of affirmation or denial further than a modified application or suggestion to other satellites of the type, said: "Mr. Maxwell Smith has likened Bruce of the Saturday Sunset to a festering pimple on the posterior of humanity."

Ergo, the editor of the Gazette is enlisted with Maxwell Smith and the ratepayers of Grandview in moving an isolation hospital up a mountain side.

STANDING THE TEST

Various English publications have had very nice things to say of Hon. Price Ellison, Minster of Finance and Agriculture in Premier McBride's cabinet, and while these must be gratifying to the Minster, they are even more so to his friends. The latest appreciation in an English paper is an apt eulogy which aims at analysis in the columns of Vanity Fair. That publication incidentall touches a little on the strenuousness of his early life but Price's friends could go deeper in that phase of it, for therein, to them, lies his great strength when they contrast his present position with that of twenty years ago and less. Advancement has not swollen his head a whit and there is not a pinch of the snob in his make-up. If he had occasion to do so he could go through the streets of Vernon to-morrow in overalls, coatless and with a single suspender and feel quite as unabashed and natural as of old; and none of his old tillicums of those days could meet him on the sidewalks of Victoria today without receiving as hearty a greeting as ever they did, no matter in what company the Minister of Finance might be at the time. This may seem a trivial estimate or test of worth but it is not. In fact it is a test for strength of character and true worth that there are only too few of our public men who will measure up to. Hospitality is one of the duties which social convention lays upon the public man and there will doubtless be many instances in which Price Ellison will respond to it when the guest who partakes will contrast the circumstance with a similar experience associated with the blazing embers of a camp fire in some old-time Okanagan cow camp. Only a few days ago when discussing his preferment with mutual friends the incident of the ungracious attack made upon him by Parker Williams came up and this friend remarked "when Parker Williams undertakes to follow Price Ellison all day on a trail he will find himself long before night a mighty tired man." Indeed when Parker Williams' blatant spirit demagoguery prompted him to identify Price Ellison with the sumptuous-living pampered rich and himself as the champion of the toilers he never shot wider of the mark nor indulged in a more rank piece of the forensic humbug for which he has become so noted.

THE ANNUAL REPORT

The financial statement and report of the year's operations of the Hedley Gold Mining Co. makes very interesting reading. The first thing that will strike anyone who has lived here under the new and the old regime is the entire change of policy in the matter of publicity. Verily the age when you must "only whisper it" is happily past. And now when we are able to see in plain figures year by year just what is being done the old policy of secrecy and mystery appears sillier than ever and the wonder is, what did they expect to gain by it?

It is pleasing to note the plain, unequivocal language of the general superintendent, Mr. G. P. Jones, in reporting on the present and future of the mine. Where he describes the present condition of the mine each property is taken in turn and in not a single case is there anything to warrant any ground for pessimism. In view of this what are we to think of either the capability or the sincerity of the former two managers in seeking to deceive both their principals and the public in the manner they appear to have done?

In contrasting the two policies how much better is it for the company itself to let the truth be known and thus head off a lot of absurd surmises and exaggerated ideas on the part of the public whose suspicions were sure to be aroused by a policy of mystery and secrecy.

A very comfortable feature of the report too is the statement that so far there has not been noticed any tendency for decrease in value of the ore as greater depth is attained. This is an encouraging feature for the holders of other mining properties in the camp and should also be an incentive for them to endeavor to have something done to show that they too, have the goods.

METEOROLOGICAL.

Water Notice

NOTICE is hereby given that an application will be made under Part V of the "Water Act, 1909," to obtain a licence in the Similkameen Division of Yale district.

a—The name, address and occupation of the applicant, Steve Mangott, Fairview, rancher.

b—The name of the lake, steam, or source (if unnamed, the description is) a spring situate about 1500 feet west of Lot 746.

c—The point of diversion at the spring

d—The quantity of water applied for (in cubic feet per second) 1-5th of a cubic foot.

e—The character of the proposed works, pipe

f—The premises on which the water is to be used (describe same) on the "post", mineral claim.

g—The purposes for which the water is to be used Domestic

i—Area of Crown land intended to be occupied by the proposed works width of pipe for 1500 feet.

k—This notice was posted on the 11th day of March, 1911 and application will be made to the Commissioner on the 11th day of April, 1911.

STEVE MANGOTT
Fairview, B. C.

DISTRICT OF YALE

TAKE NOTICE that Henry Stanger, of Wakefield, England, occupation, doctor, intends to apply for permission to purchase the following described lands.

Commencing at a post planted at the centre of Sec 18, Tp. 51, thence west 80 chains, thence south 60 chains, thence east 80 chains, thence north 60 chains to point of commencement and containing 480 acres more or less.

HENRY STANGER
10-10 Chas de B. Green, agent.
Dated March 8th, 1911

NOTICE TO CONTRACTORS

KALEDEN SCHOOL

SEALED Tenders, superscribed "Tender for Kaleden School", will be received by the Honourable the Minister of Public Works up to noon on Friday; the 7th day of April, 1911, for the erection and completion of a two-room school building at Kaleden, near Penticton, in the Similkameen Electoral District.

Plans, specifications, contract, and forms of tender may be seen on and after the 14th day of April, 1911, at the offices of A. G. Hatfield, Esq., Secretary to the school board, Kaleden, B. C., Government Agent, Fairview, and Department of Public Works, Victoria.

Each proposal must be accompanied by an accepted bank cheque or certificate of deposit on a charter bank of Canada, made payable to the Honorable the Minister of Public Works, for the sum of $250, which shall be forfeited if the party tendering decline to enter into contract when called upon to do so, or if he fails to complete the work contracted for. The cheques or certificates of deposit of unsuccessful tenders will be returned to them upon the execution of the contract.

Tenders will not be considered unless made out on the forms supplied, signed with the actual signature of the tenderer, and enclosed in the envelope furnished.

The lowest or any tender not necessarily accepted,

F. C. GAMBLE
Public Works Engineer.
Department of Public Works.
Victoria, B.C., 9th March, 1911 10-1

NOTICE

TENDERS will be received by the undersigned up to the 22nd day of April, 191 at 5 p. m. for the purchase of Block 27, subdivision of Lot 541, Group one, New Westminster District, situated in the City of Vancouver and being the site of the old Provincial Court House. Each tender must be enclosed in a registered letter and must be addressed to the undersigned, and plainly marked, "Tender for old Vancouver Court House Site", and must be accompanied by an accepted cheque for ten per cent of the first payment of the purchase money. Payment for the property will be accepted in instalments of one-quarter of the purchase money. The first of such instalments to be paid within thirty days after the acceptance of the tender, and the other three annually thereafter, with interest at the rate of 6 per cent per annum. In the event of the person whose tender is accepted failing to complete the first instalment within thirty days of the notice of such acceptance the sale to him will be cancelled and his ten per cent deposit forfeited. The cheques of unsuccessful tenderers will be returned. The highest or any tender will not necessarily be accepted. No commissions of any kind will be allowed.

Town and District.

Frank McKinley was down from Granite Creek this week.

RANCH FOR SALE—Good ranch on the Similkameen river, convenient to Hedley. Young bearing orchard. For particulars apply at the Gazette office

An entertainment will be given on Easter Monday in Fraternity hall by the Sunday School. Proceeds in aid of the Sunday school.

The Great Northern work train continues to operate in this vicinity getting the track and bridges ready to stand the high water.

Mr. J. A. Schubert went to the coast last week and while there will purchase the stock for his new store in Coalmont.

J. P. Pollock, school inspector, visited Hedley school a few days ago and expressed his satisfaction with the standing of the school.

The open season for trout began on Saturday last and already the local fishermen are getting together material for thrilling fish stories.

Bob Innis was in town for a few days this week. He has been teaming in the north country on the Cariboo road for the last two seasons.

Gardening is in evidence all over the town and a good deal of planting has already been done. Hedley is becoming noted for the beauty of its flower gardens.

F. J. Sauve, of the big store at Keremeos, was in town on Monday between trains and reports spring work under way at Keremeos, with the fruit-growers busy on their lots.

There are no less than eight applications for divorce pending in Okanagan County, Washington state. Does this indicate that marriage is a failure or a joke with our neighbors across the line?

L. G. MacHaffie opened a branch of the Bank of B. N. A. at Quesnel. The management is to be taken by R. A. Chester, who was manager at Greenwood before the bank closed up their office there. Mr. MacHaffie goes back to South Fort George.

The preacher always remembers on Sunday night the things he meant to say and didn't. In like manner the news editor is often horrified to find out after the paper is off that some event or some person had not received the notice intended.

Steamboat fever is beginning to operate among some of the prospectors in this vicinity, who are talking about making a trip in there and trying to get some ground. From some of the transactions that have already taken place at the coast in Steamboat claims it looks as if ground is all that is required.

Last week marked the pulling off of several individual golf matches in the ladder series, following challenges on the part of ambitious members to advance their standing on the ladder. Rolls challenged Hincks and a close game followed in which Hincks won 2 up and 1 to play. Williams challenged Rolls and Rolls won the match 3 up. Whiteman challenged Williams and two matches were played, both of which ended up ties. Whiteman is starting in strong this spring and if he improves during the season at the rate he has begun he should be able to give a good account of himself before the summer is over.

Mental & Co., hypnotists, etc., in town hall, Keremeos, April 3rd and Fraternity hall, Hedley, 6th and 7th. Prices 75c. and $1.00.

In spite of the fact that the nights have continued cold and the mean temperature for each week has been considerably lower than the corresponding weeks of former years the water supply of Twenty-mile has been increasing steadily and is already almost sufficient to drive all the works with but little aid from the auxiliary steam plant.

On Wednesday of last week a frame stable over on Cawston street, used by W. Simons went up in smoke about midafternoon. The fire was first noticed by Hill Innis when he drove the bus up to the Similkameen preparatory to starting for the train but it was too far gone to save There was a horse in the stable at the time which they managed to get out singed from nose to tail but a quantity of hay and some harness was burned. There was no insurance,

The fir trees which showed the ill effects of the caterpillar raid last summer show no signs of recuperating and are evidently in for making a die of it. In addition also it has been noticed that some other trees that had not begun to wither last year are showing signs of dying this spring. As yet nothing has been done towards combating the evil and there is a fair prospect of the nuisance being worse than ever this year. A town the size of Hedley that is not incorporated is up against it in a score of ways. As things stand there seems to be no authority to compel destruction of the infected trees or to take other precaution for protection of those still surviving.

BORN

In Hedley, March 18th, to Mr. and Mrs. J. A. Schubert—a daughter.

A NEW DEPARTMENT OF C.N.R.

The new Immigration Office of the Canadian Northern Railway has been opened at 52 Scott Block, Winnipeg, and is described by the City press as already a very busy spot. Mr. Thomas Howell, head of the Department, with the experience of several years in Immigration work to guide him, is conducting a propaganda in Great Britain that has enabled him to secure the finest class of immigrant who have ever come to Canada. The Royal Line Steamers have their full accommodation taken for all sailings well into the summer. Mr. Hawley of the Winnipeg Office, is claiming a large proportion of Farm Hands and Domestics for the West, and if the applications from those desiring help are as prompt and in as sufficient numbers as already seems assured, the labor problem will not be such an acute one for this and following seasons. Application forms will be supplied by addressing W. A. Hawley, 52 Scott Block, Winnipeg.

THE KEREMEOS PAGE

KEREMEOS, the Centre of Lower Similkameen---- Famed for Fruit Growing

Town and Lower Valley.

F. J. Sauve made a business trip to Hedley on Monday, between trains.

Danny McCurdy of Princeton was a visitor to the lower valley on Thursday last.

R. Gibson was a visitor to Princeton and Hedley during the latter part of last week, spending a day in each.

After the meeting of this week the K. K. K. Club will disband for the summer season to resume next fall.

Croakers are with us again and they revel in telling wonderful stories of the destruction caused by the Similkameen in the Spring of long ago.

Charlie Loudon left last week for Loomis where he will enter into cattle ranching with his brother Paul on their father's ranch. May the increase of their herds be great.

The equinoxial gales, although a little late in coming arrived alright, alright. With them was a drop in temperature, which was anything but welcome after the summer-like weather which we had been having.

When a husky tramp asks you for a handout introduce him to the woodpile and when he has earned a square meal allow him to get outside of it. Charity of that kind will cover a multitude of lies.

M. C. McAulay and family left Keremeos last week for Kelowna, where we understand Mac has a job with his old tilicum, George Cawston, supplying irrigation construction camps with meat. We wish Mac success in his new home.

The lusty zephyr that sauntered down the valley on Tuesday broke into the post office and Keremeos Hotel. Entrance in both cases was effected through the windows. The damage was confined to a little broken window glass.

Mr. Holman, of Kelowna, who recently delivered the lecture here on tobacco growing has been seriously ill at the Central hotel with pneumonia ever since, and on Saturday last was joined by Mrs. Holman who will remain and nurse him. The day of Mr. Holman's arrival and during the lecture he complained of not feeling well.

Mrs. G. S. Loudon returned from Hedley on Thursday of last week accompanied by Baby Loudon. Her sister, Mrs. Clarke of Summerland, who has been visiting her at Hedley also accompanied her and will spend a few weeks at the Centre before returning home. George will now be able to enjoy all the comforts of a home.

Joe Cooper who announced his intention of leaving Keremeos last week to take a job in the round-house at Oroville and was so reported in our items of last issue, altered his mind and will remain in Keremeos. Joe, as becomes a youth from across the line, is some ball player and his presence on the Keremeos nine for the coming season will be a source of strength.

There was quite a family re-union at the home of Mrs. Innis during the week-end. Bob was over from Ashcroft, Jim was back from Penticton, Hill was down from Hedley and Ella was down from Princeton. On Monday they scattered again. Hilliard who has had charge of his brother's stables in Hedley expects to leave at the end of the month to join Bob at Asheroft.

The explorers, Bob McCurdy and H. H. Bartlett, returned last week from their trip up the Ashnola. They went as far as the summit looking into the valley of the Pasayton river, which is a tributary of the Roache, and claim that a pass through that part of the country can be effected without climbing above an altitude of 5000 feet. Mr. Bartlett staked for purchase about 2000 acres of land near the headwaters of the Ashnola.

To the second time during the past year the public school inspector visited our school and for the second time, we understand, expressed a desire to see the secretary-treasurer of the school board. "That's us," and we can assure the inspector that we will be very pleased to see him any time he is around and discuss school matters with him, but our salary as secretary-treasurer is not sufficiently large to take the time off when we happen to be busy and another thing our travelling expenses are not provided for. In such a case we shall continue to play the part of the mountain.

APPEARANCES COUNT

What Interest will you draw on your personal capital this spring?

How much will your appearance add to your chances of promotion or success?

Take a look at the fellows on the street to-day—and note what a big difference clothing makes in their power to attract or repel your interest.

Look prosperous and you will be prosperous. Good Clothing makes you "Look Good," "Feel Good," and "Make Good." Your bank account will also be bigger if you buy your clothes here. We give you the equal of custom clothes at ready-to-wear prices.

FOR SALE--Sittings of eggs from pure bred imported strains, such as "Shoemaker's" of Freeport, Ill. and "Purdy's" of Ferry, Wash. White Orpington, (limited number) at $3.00 per sitting. Buff Orpington $1.50 per sitting. White Leghorn $1 per sitting. Brown Leghorn, $1 per sitting. T. C. Brooke Keremeos, B. C.

Mr. E. D. Fargo left on Saturday via Tweddle special for Penticton on his way to the Cariboo, where he will resume his duties as accountant for the John Hopp Company. Mr. Fargo is looking forward to his return to this valley to engage in the pleasant life of a fruit grower. He has his four lots cleared, plowed and fenced and has arranged with the Land Company for seeding and caring for them for the season.

At the close of the evening service on Sunday Rev. Mr. Cameron announced that the amount subscribed toward completing the tower on the church building and painting had reached the very satisfactory figure of $165.50, including 26 subscriptions of $5 each. This is almost enough to provide for painting the building inside as well as out, and an effort is being made to secure the small additional amount required among the ladies: the married ladies contributing $1.00 each and the single ladies 50c.

It has been suggested that Keremeos have a "clean-up" day. The suggestion is a good one and we hope some enterprising citizen will try and start the ball rolling. A little tidying-up would greatly enhance the appearance of the place in the eyes of visitors and besides is necessary from a sanitary point of view. If this were done by citizens there is no telling but that it might prove an incentive to the Townsite Company to brush the vacant lots on Block 79 and thus allow an unobstructed view from the main street to the depot, which will not be possible under present conditions once the leaves are on the tress.

There are a few cheap real estate guys in the lower portion of the Okanagan, particularly around Penticton, who when it comes to "knocking" have the man with the big sledge hammer faded to a frazzle. Needless to say that their knocking is chiefly directed against the Similkameen for they realize that if a prospective land buyer once gets over the divide into this valley gone are their chances of unloading on him. That their methods are too often effective cannot be doubted, but occasionally they knock at the wrong door and a pilgrim comes through and relates the wonderful tales he has heard in Penticton of the terrors of life in this peaceful vale and of the hobgoblins which beset the way of the traveller who has the temerity to make the drive across.

Marvellous Mental and his company of clever entertainers have been packing opera houses all over B. C. and return dates have been the request everywhere; they will surely delight the theatre goers of Hedley and Keremeos. The Bellingham Herald has the following to say about Mysterious Mental. "Mental is the talk of the town and he completely bewildered and dumfounded a fascinated audience at the Bellingham theatre last night. The hypnotism and magic surpassed anything of its kind that has ever been seen in this city and the audience fairly gasped at the marvelous physical power and mind reading ability of this wonderful man. There is not a weak spot in the entire show.
