MEMBERS RETURNS TO COAST

Conditions are Prosperous Declares Mr. Shatford and Outlook in Regard to Mining Development is Brightened by Railway Activity

Following the completion of a two week's tour, during which time he visited practically every portion of the Similkameen electoral district, Mr. L. W. Shatford, M. P., returned to the coast on Monday, having interests there which demand his attention. He will visit the interior again in about two weeks' time.

Mr. Shatford's tour was in connection with the mapping out of this year's road work for the Similkameen, which is provided for by the government appropriation made at the recent sessions of the legislature, and as has been his custom since his election as representative for the district, he personally inspects all the proposed improvements. He was accompanied on the tour by Mr. A. H. Turner, the road superintendent.

Tulameen, Coalmont, Granite Creek, Hedley, Princeton, Kefemeos, Fairview, Okanagan Falls and Kaleden, were among the points visited by the member, and Bridesville, Rock Creek and Westbridge in the Kettle River district were also touched. Mr. Shatford had intended to visit Carnii, and made every effort to do so, but, unfortunately the high water in the Kettle River had washed away a portion of the road, and it was found impossible to get through.

Mr. Shatford states that business conditions are particularly favorable in the Similkameen at the present time, and that railway development is giving a stimulus to the operation of such industries as mining and agriculture. In the former industry in particular there was every indication of greater activity, which better transportation facilities were making possible.

BOHUNK MINERS

Writing in the Mining and Scientific Press from Juneau Alaska a man signing himself "Traveller," says previous contributors have overlooked the most important feature of the discussion on "What is the matter with prospecting?" He says it is the class of labor at present employed in the mines. He continues:

"Fifteen years ago you could make a shift boss out of practically any man in the mine. Today, go into the stope of any mines in the larger districts and ask the first man you meet a question about the mine and two-thirds of the time you will be greeted with a blank expression and a shake of the head. Go up to the shaft when the shift is going to work or stop into the office of a labor agent and listen to the inquiries of 'Catch a job dis morn?' Then try to imagine these men as prospectors. To these men a steady job where they save a considerable portion of their wages, and look forward to a home in the old country as an ideal, is all sufficient. They do not even know whether they are working in a gold or a copper mine. It is the job they want, without any reference to where it is so long as it pays. There is no interest or fascination to their work. As this type of labor now represents about two-thirds of the men around the mines, it is easy to see the reason for the decrease of the number who were willing to 'stake a pal' or 'take a chance' themselves ten years ago. Whisper in any of our Alaskan towns that gold has been found on some of the creeks hitherto unknown, and every English speaking miner that can get away is off on the stampede and the 'bohunk' grabs the job that is left. The new camps are settled and work by the day may be obtained. Thus with the decrease of the easily found placers or (lodes,) the American turns his attention to other lines and the foreigner settles down to the routine."

The crucifixion of 250 Mohammedan Albanians carries one back to the advent of Christianity.

The bill introduced in the house of commons yesterday to prevent fake advertising is one that should meet with general approval.

HEDLEYITE IN AERIAL PLANE

Mr. E. H. Williams Was Passenger With Mr. Hamel and Vivian Describes Flight

The sensations of a blind man flying in an aeroplane at 60 miles an hour were vividly described at Hedley yesterday afternoon by Mr. Eliot Williams, an Englishman who became blind while on a voyage from British Columbia to this country recently, was a passenger with Mr. Hamel on a short flight at the London Aerodrome yesterday afternoon. Although he has been blind only some three months, Mr. Williams has never seen an aeroplane. Flying round the aerodrome for about six minutes at the rate of 60 miles an hour, Mr. Williams had only disappointment to express at the brevity of the flight. "Why, it seemed scarcely more than a minute," he said afterwards, "but it was a great sensation. I could see nothing, but I felt a white mist around me all the time. I guess that is the greatest gale I have ever been in." He continued—"When I held my head up to the air I had to gasp for breath. It seemed as if I were riding on the back of a sea gull. The great bird seemed to rise and fall with a terrific heave." Mr. Williams was full of enthusiasm about his flight, but he wished that he could only have been able to see. "Ah!" he exclaimed, "what a greater sensation it would have been if I could have seen the ground moving underneath and the people looking up."—Glasgow Herald.

MAY'S ROD AND GUN

Rod and Gun for May is out with, as usual, an attractive bill of fare for the sportsman. The Dogs of the North, A Hunting Trip to Pocologan, N. B., The History of the Canoe, Building a Sectional Boat, The Swamp Maiden, The Roughneck Fishing Club, Obnoxious Fishing in Lakes and Ponds, Ideal Trout Fishing in Ontario Waters are some of the articles worth special mention while the regular departments are well maintained and the whole of interests to both Canadian and American sportsmen. W. J. Taylor, Limited Publisher, Woodstock, Ont., issues this Canadian outdoor magazine.

GENERAL NEWS

That traces of radium have been found in various portions of the Peace River Block, located east of the foothills and west of Edmonton, is the effect of a report being circulated in that city. Several persons have reported its existence in the district, and it is said there is quite a movement at the present time of interested parties toward the Peace River Block.

TRAGEDY AT MERRITT

Indian Women Murdered in Drunken Debauch—Murderer Attempts to Escape but Returns

On Saturday afternoon, April 25th, there occurred a horrible tragedy at the Indian Reserve, an Indian woman named Mary Spring being foully murdered by a well known Indian by name of Tullear. This Indian has on several occasions been brought before the court for his assaulting conduct and has always been looked upon by the authorities as being a dangerous man.

The murder which took place on Saturday afternoon last was undoubtedly the outcome of a drunken debauch in which apparently the Indian woman joined, Tullear ending the spree by cutting the woman's throat and then attempting to escape.

This attempt he evidently abandoned, returning to the scene of his debauch and endeavoring to cut his own throat, being overpowered and held by other Indians in the Reserve until the arrival of P. C. King to the scene on horseback and arresting him.

Dr. Tutill had upon the alarm being given hastily hurried to the Reserve but on arrival found the woman beyond all human aid.

Her remains were brought into the city and lay resting in Mr. N. J. Barwick's undertaking parlors until Tuesday morning last, when they were taken by her relatives and friends to Shulus cemetery and buried. The Indian was brought into the city by Police Constable King and locked up in the Provincial jail, where he remained until brought before Magistrate Morgan, with Chief Constable Barr of Ashcroft acting on behalf of the Crown as prosecutor. At this preliminary trial accused was committed to stand trial at the next assizes in Kamloops, next month.—Merritt Herald.

MINING NOTES

A large force is engaged at the Granby mines at Hidden creek, and at the concentrating and smelting plant, between 700 and 800 men being employed in the various operations. Officials of the company claim that their plant is the most up-to-date and the best equipped on the American continent.

The ore was struck last week on the lower level of the Lucky Thought mine, on Four-mile. It is of a much better grade than the shipment made from the same mine about a month ago.

The most important mining deal in the Kaslo district for a year past was closed last week when \$12,000 was paid on a bond covering the Cork properties and certain timber and water rights and a quantity of mined zinc ore. W. E. Zwychey of Kaslo and W. P. Tierney of Vancouver are among those who are interested. The Cork mine is on the south fork of Kaslo creek. There is a 100 ton concentrator on the property.

A big deal was put through recently whereby a Philadelphia company takes over the big gold quartz property at Surf Inlet on Vancouver Island. The price is said to be \$800,000, and the purchasers are the Tonopah-Belmont company. The property is located about 25 miles inland. It is a free milling gold proposition, and there is an immense tonnage in sight. A big revival of mining and general business is looked for on the island.

The first shipment of copper from the Granby Consolidated Mining & Smelting Company's plant at Hidden creek was brought down from the north to Vancouver a few days ago and was sent to a large refining company in New York. There were 930 bars in the consignment, the metal weighing 122 tons, and being valued at 15c per pound. It is stated that now that the plant is in operation there will probably be two shipments sent out a month, of between 400 and 500 tons each. The bars are practically pure copper, or what is known in mining parlance as "blister" copper. The other one per cent is a mixture of gold and silver.

SHATFORD SPEAKS ON GOOD PROSPECTS

Members for Similkameen Looks For Busy Year in Interior of Province

Vancouver, B. C., May 6.—"With promise of a bumper fruit crop and with mining prospects, increasingly bright I look for a busy year in the Similkameen and Okanagan districts," said L. W. Shatford, M.P.P., today.

Mr. Shatford has just reached the city after a trip through his electoral riding. The Similkameen member believes that construction work on the Kettle Valley line will be advanced to such an extent that service to the coast via the Nicola branch of the Canada Pacific railway will be provided about the end of the year. The Hope mountain cut-off on the Kettle Valley line will require nearly another year of work, however.

When this railway provides access through to the coast there will be something approaching a boom in the Boundary, Kettle Valley, Similkameen and Okanagan sections and Kootenay will feel the benefits coming from closer connection with the coast, he declares. In the Similkameen electoral district there will be additional advantages received by reason of the fact that the finishing of the work on the Kettle Valley line will allow the Vancouver, Victoria & Eastern trains to get through to the coast via the Kettle Valley and the Canadian Northern lines.

HOME RULE CRISIS IN ULSTER

The political pot in Ulster seems likely to come to a boil over the excitement of some gun-running exploits which have been successfully pulled off during the past week, and the British cabinet is finding itself face to face with a serious situation.

A consignment of about forty thousand rifles and half a million rounds of ammunition from Germany is said to have been landed by a mysterious German steamer at isolated points on the coast of Ulster and distributed by means of two hundred automobiles to various headquarters of the Ulster "Volunteers". Those Ulstermen who declare themselves determined to offer armed resistance to the introduction of Home Rule mobilized and guarded the landing places and roads until the distribution of arms was completed. The police were powerless to interfere and all means of communication were temporarily interrupted by the Ulster Volunteers during the distribution.

The Irish Nationalist volunteers, a body similar in organization to the Ulster Unionist Volunteers, made matters even with their political opponents by successfully landing a large consignment of arms. The weapons, which are said to have been brought from America, were taken ashore at a remote spot on the coast of County Donegal, in the far west of Ulster. The size of the consignment is unknown, but it is believed to have been considerable, although not equalling the 40,000 rifles and 500,000 rounds of ammunition the Unionists received.

MINING NOTES

An English syndicate is having an area on Graham Island prospected for coal, F. C. Green of Seattle being in charge of the work. The ground is being drilled.

A leading Vancouver trust company has in hand the organization of a company and the finding of capital to develop the salt deposits on the Skeena river, and if arrangements are completed works will be established there which will supply the fisheries, meat supply firms, dairies and industrial farms on the coast with what salt is required. This is likely to develop into an important industry.

The profits of the Britannia mine on Howe sound last year amounted to 44 per cent on the capital stock. The capacity of the mill was doubled during the year and a higher grade product obtained. The new mill in course of construction will have a capacity of from 1,500 to 1,800 tons a day, making the total capacity of the plant 2,500 tons a day. It is intended to have the new plant completed and in operation by the end of this year.

BACK TO THE LAND

The familiar cry "back to the land," is apt to become somewhat monotonous, but repetition has its uses not the least of which is to attract attention. It is easy enough however to cry "back to the land" but not so easy to accomplish that highly desirable purpose. Man can not even begin to live by manufacturing alone. Agriculture must be pursued for agriculture is the source of all industry. Men grew corn long before he manufactured steel or even copper. Woman plucked apples for consumption long before she adorned herself. Civilization in its advance seems to have reversed the process. Today man thinks of manufactures first and then of corn, while women infinitely prefers clothes to apples.

The backbone of any community is its agricultural population. It is more of a fixture. A man can not desert his agriculture holding in the same way he can desert his industrial job. He has built up with much labor something which gives him a return and in giving him that return it is of great value to the whole community. He is a regular purchaser in the local market. He wants clothes and all the other necessities of life. The more he can make out of his farming the better for the community, for he adds to its purchasing power. As a rule he does not take his money elsewhere to spend it but invests it in the things he knows and understands. The last half century has seen a tremendous draining of the youth of all highly civilized land into the towns. The great advance of manufactures has attracted them like the candle the moth. The closer packing of the community and the opportunity for meeting more people has inevitably drawn the ambitious and the restless. Country life has seemed dull. Dozens of stories have dealt with this phase of the problem—literature too has stimulated the minds of its readers and made them long for the excitements of which they read. Undoubtedly reading has been largely responsible for the discontent with country life. To day it is recognized that unless the land can be made attractive it is useless to shout in people's ears "back to the land." The first task is to find in the country the attraction which will exercise the same magnetic influence on the mind as the city.

THE NEW GOVERNOR-GENERAL

It is officially announced that Prince Alexander of Teck is to succeed the Duke of Connaught as governor-general of Canada. By all Ca-

nadians this announcement will be received with gratification. The Duke of Connaught has set a precedent which His Majesty evidently feels it is wise to live up to. The brother of the late King Edward is to be followed by the brother of Queen Mary. Prince Alexander is to prove that to be royal one must also be efficient. The Duke has set an example as well as a precedent and it will be no easy task for the Prince to follow in the footsteps of such a popular governor-general. The Duke came to Canada not unknown. But the Prince is a stranger and Canada is apt to be very critical of strangers, especially if they be of royal blood. That is natural, for we expect much of our royal family and are apt to forget that being royal does not prevent one being human. The Duke of Connaught brought with him his wife and the Princess Patricia. His family undoubtedly added much to his popularity and in this respect once more Canada is extremely fortunate. In the Princess Alexander of Teck Canada will have one of the most lovable of all princesses. Her popularity in Great Britain is very great. She is the sister of the reigning duke of Saxe-Coburg and Gotha and first cousin of the Queen of the Netherlands. Her father was the youngest son of the late Queen Victoria and his early death cast a gloom over the people of Great Britain with whom he was extremely popular. He had great charm of manner which has been inherited by his daughter, who is said to be a very democratic and attractive personage.

Prince Alexander is a soldier and was A. D. C. to Colonel Mahon in South Africa. As such he was at the relief of Mafeking and won his D. S. O. He is just 40, tall and good-looking. He has shown considerable organizing ability in the various duties which have fallen to him since King George's accession made him brother-in-law to the King. He has been married nine years and has two children. Thus Canada gets a royal young couple as representative of the King. They will be very welcome.

His Flower Fairy

By KATE M. CLEARY

Copyright, 1904, by Kate M. Cleary

They were not there when he had left the room.
Percival Craig, the new rector of St. Sebastian's, paused with his hand on the back of the swivel chair which he had been about to give a preparatory twirl before sitting down.
"Another evidence of personal good will," he murmured, his fair, expressive face brightening almost boyishly with gratification. "Verily, my line seem to have fallen in pleasant places."
One would have conceded that fact knowing how cultured the mind, how generous the hearts and how high the standard of rectitude among the parishioners of St. Sebastian's. The pastor preceding the present incumbent had grown old in their service. While he had been beloved, it was pleasant to the congregation to welcome the advent of a younger man, one whose opinions, although progressive, were free from the taint of irreverence and whose family connections were all that the most fastidious among them could desire.
This morning, the first that Craig had deliberately settled down to work in his study, he had been called to the door for a few minutes. Now, on his return he found things precisely as he left them, except that on the ponderous table open upon his desk lay a slender sheaf of hyacinths, heliotrope of hue freshly cut and fragrant.
"Mrs. Mason!" The footsteps passing through the hall ceased. "Step here please!"
His housekeeper, ruddy checked and gray haired, looked in at the door.
"Did you put these flowers here, Mrs. Mason?"
"Not I, sir!"
"Maybe Ellen did," he hazarded.
"She's been washing windows upstairs this hour back, sir," returned Mrs. Mason. And, muttering something about her custards, she disappeared.
"Strange!" commented the Rev. Percival. But the pleased smile still lingered around his mouth when he had put the delicate spikes in water and was reading the solemn looking book.
Before the hyacinths had faded there was another floral surprise for the new

rector. This time it was a rose that lay on the printed page—a pink, softly growing, velvety rose—that made him think of Alys Ward. He had met her a few times since coming to his new parish, and he found himself most persistently haunted from the first by her demure beauty and pretty, graceful ways.
He rang the bell.
"Has any one called to see me this morning, Mrs. Mason?"
"No one, sir." Mrs. Mason regarded him admiringly. He was a fine representative of the church militant. That straight, soldierly figure, square shoulders and proudly carried head would have looked well leading a regiment.
For several days after the finding of the rose instead of loitering in the dining room to read the morning papers Mr. Craig brought them with him directly to the study. The rose drooped. He shook the loosening petals in the big book. There was no odorous successor. But one morning he was summoned to the bedside of a hypochondriac acquaintance who was undergoing one of his periodical attacks of dissolution. Striding absentmindedly into the study on his return, he stopped short, his nostrils assailed by a perfume elusive as exquisite.
"Violets!" he exclaimed. "Violets!"
Violets there were—a blue drift of them across the open pages of the learned book.
This time, in the absence of Mrs. Mason, he interrogated Ellen—and with more success.
"Sure, 'tis a slip uv a colleen do be after bringin' them!" declared Ellen, who was fresh from the Emerald Isle and a new acquisition in the clerical household. "Her name do be Ward, they tell me. She lives in the great house beyond."

"That will do," said the Rev. Mr. Percival hastily. But he did not read in the wide volume that day. Instead he sat a long time looking dreamily at the violets and wondering—oh, the most marvelous things!
Although he had been much flattered by women, he had scant share of conceit. So at the close of his reverie he sighed. He could attribute to naught save pure neighborliness the gifts of the girl to whom his love had gone out almost at first sight. Nevertheless, when the violets were withered, on two successive mornings he left the house with much ostentation and soon thereafter noiselessly let himself into the hall. On the second morning there was a flurry of white by the study table as he abruptly entered the room, then a fall and a cry of pain. Instantly he sprang across the floor—to pick up the slim little lassie of six, who lay with a bunch of lilies of the valley clasped tightly in her tiny fingers.
"I didn't want you to—know 'twas me!" she sobbed. "I always brought them to old Mr. Snowdon. Mrs. Mason used to let me in. And he never knew 'twas me. He used to tell me the fairies or—maybe just one fairy—brought them to him. And I'd laugh and laugh. Ouch!" She colored hotly with the pain. "My foot got hurted!"
"I'll carry you home," Percival assured her tenderly. "You liked Mr. Snowdon (who, by the way, was the predecessor of the Rev. Mr. Craig), you liked him very much?"
"Yes. Maybe I'll like you, too, some time. Alys—she's my sister—says you are most—most—I forget. It was a long word. But it means nice. Tommy Brown says Mr. Snowdon only pretended he didn't know about me being the fairy. Isn't Tommy a horrid boy?"
"Horrid!" assented Percival Craig.
"Don't be frightened, Miss Alys!" For she had come flying down the steps at sight of him and his burden.
"Fairies always get well quickly," he assured little May. "I intend coming to see you every day until you can come to see me."
"Do," begged the child from the shelter of her sister's arms. "But you won't ever think I'm a real fairy now."
Alys laid her on the sofa and went out to telephone the doctor.
"Oh, yes; I will if you help me to get my wish. Good fairies always help mortals."
"What is your wish?"
"I want you to coax dear Alys to marry me and have you for flower girl!"
"That's easy. Alys will do anything for me," declared May complacently. "Say—I remember that word now. It was attractive."
"Good little fairy!" cried Craig and hastened off. In his study he gently, picked up the blossoms she had insisted on leaving. He recalled the look in Alys Ward's eyes when she had taken May from him, and his pulse thrilled. "Good little sister!" he said. "Dear little fairy flower girl!"

Not a Flier.
"What bird is it," asked the school inspector, "that is found in Africa and, although it has wings, cannot fly?"
The class was unable to answer this very puzzling question. Thinking to encourage them, the inspector offered a sixpence to the little boy or girl who could tell him. After a brief hesitation a little girl of five years put up her hand.
"Well, my little dear," said the inspector, "what is it?"
"Please, sir, a dead un."—London Fun.

Keremeos Centre.

Mrs. J. Maitthoffer left on Tuesday
for a short visit to Oroville.

Mr. F. H. French and family motor-
ed over to Penticton on Tuesday.

Mr. Earl Brown is visiting his sister,
Mrs. Frank French for a few days.

School Inspector Anstie was in town
on Thursday, visiting the school here.

Dr. and Mrs. McEwen were visitors
to Princeton between trains on Tues-
day.

Rev. Father Conant, Catholic priest
of Kamloops, was in the valley this
week.

L. H. Patten of Keremeos Centre
was a visitor in town between trains
on Tuesday.

Mrs. G. H. Whiteinan of Princeton
is spending a few days in town as the
guest of Mrs. Sproule.

Messrs. I. L. Merrill, T. Walter
Beam and G. P. Jones went out to
Riverside on Monday.

Jack Corrigan left town on Monday
for Camp Clifton where he will put in
the summer diamond drilling.

Don't forget the dance that is being
given in Fraternity hall by the band
boys. The band orchestra will furnish
the music.

Mrs. John French, of Vancouver,
who has been visiting her nephews,
Frank and George French, for the
past week, left for her home on Tues-
day.

If you are intending to take a trip
abroad see H. E. Hansen about your
ticket. He can supply you with a
ticket on any line by which you wish
to travel.

The band orchestra played at the
moving pictures on Thursday evening
last. The orchestra is fast rounding
in shape under the leadership of Prof.
Warren Glaze.

The work on the dam and the grad-
ing of the right-of-way for the flume
was closed down this week. It is un-
derstood that the balance of the work
will be done by contract.

A couple of large boulders that had
been loosened by the heavy rains came
down by the overflow on Saturday
and carried trees and everything in
their paths down into the creek.

On Sunday morning a match game
of golf was played between Mrs.
Rotherham and P. Murray and Miss
Jackson and W. K. Pollock. The
former couple won by one hole.

John Lodge and Walter McDonald
brought down the hide of the silver
fox, which they were fortunate enough
to trap last winter near the Nickel
Plate mine, to Hedley on Saturday.

Roy Corrigan is expected in town in
a few days. Wm. Corrigan had a
letter from his father in Hope the
other day and he said that Roy was
leaving in a few days along with some
other boys on the trip over the Hope
trail.

Messrs. Whiteinan and Mansfield
are trying to get the Princetonites
interested enough in golf to organize
a club and lay out links. We wish
them success and can say that anyone
taking up this game will never regret
it.

The heavy rains on Friday and Sat-
urday started the rocks rolling on the
hill sides and one went through the
flume. The break was between the
cabin and the head-gate and did not
do much damage. A couple of hours
work repaired the damage.

The Building Committee of the
Church of England announce that
they have purchased two lots at the
corner of Webster Street and Daly
Avenue. As soon as the building
fund will warrant a church will be
erected.

On Wednesday morning an accident
occurred at the Nickel Plate mine
caused by a quick fuse and in which
two miners were hurt. The injuries
received are mostly bruises and a
few cuts and are not of a serious nature.
The two men were Ed. Williams and
Axel Olend, and they are at present in
the Hedley Hospital.

On Sunday evening while enjoying
a spin in his auto Homer McLean
accompanied by his father and sister
and Mr. F. M. Gillespie startled a big
bald headed eagle that was resting on
one of the fence posts near Lyon's
ranch. The occupants of the car say
they could have hit it with a rock.

The diamond drilling on the group
of claims that are under bond to the
New York Syndicate No. 2, in which
a number of the Hedley Gold Mining
Company's stock holders are interest-
ed, was started again this week. Mr.
Beam will superintend the work again
this summer.

Mr. L. L. Woods, piano tuner and
builder, arrived in Hedley on Wednes-
day's train and is prepared to do any
work in these lines. He comes here
highly recommended by Prof. Warren
Glaze and he guarantees satisfaction.

Mrs. Elizabeth M. Daly announces
the engagement of her niece, Ellen
Corrigan to Mr. Wallace Knowles.
The marriage will take place in St.
Andrews Church at Keremeos, B. C.,
at four o'clock, June 1st, 1914. All
friends are cordially invited to attend
the marriage ceremony and the recep-
tion at the "Willows" immediately
afterward.

Dan McKinnon and Nick Pickard
have staked a claim on the Sterling
creek slope and have been doing de-
velopment work on it. They have a
small stringer of ore carrying good
values but there is not enough work
done to be able to tell much about it.
They have had some samples of the
vein assayed and these gave an aver-
age value of \$34.00.

Messrs. I. L. Merrill, president of the
Hedley Gold Mining Company, and T.
Walter Beam came in Thursday of
last week and have been busy ever
since looking over the holdings of the
company. On Friday Mr. Beam took
Mr. Merrill over to Camp Clifton and
they returned to Hedley by Twenty-
Mile canyon and Mr. Merrill has felt
the effects of his tramp ever since.
While here Mr. Merrill enjoyed a
round of the Hedley links.

GENERAL NEWS

The British government will partici-
pate in the Panama-Pacific exposition
at San Francisco. This is distinctly
in the interests of good fellowship.

GIVES INSTANT ACTION

F. M. Gillespie, druggist reports
that A SINGLE DOSE of simple
