Hedley's Fire Department Has Its Baptism by Fire

NEW ZEALAND HOTEL IS BURNED

But Not In Ashes—Only Charred Timbers and Some Heaps of Cinders Was the Worst the Firefiend Could Do—Many Narrow Escapes—Thousands of Dollars Worth of Property Saved by a Few Hundred in Fire Apparatus.

Hedley has had its first serious fire and considering the narrow escapes from loss of life and the saving of a great part of the town from destruction there is a feeling of intense satisfaction that the matter has terminated as it has.

On Thursday morning last a little after five o'clock fire was discovered in the kitchen of the New Zealand hotel. So far as can be learned it was first noticed from the outside by the man who lights the fires in the Grand Union, although it is possible that Jack Way saw it at about the same time or perhaps a little before. Way was in the habit of kindling the fires in the New Zealand in the morning and his room was off the kitchen. On that morning he had got up about 4:30 a. m. and kindled a fire in the kitchen range and went back to bed. He was awakened by the smell of smoke and on going out to see the cause, found the walls and floor around the range in flames when he tried to waken the house. Meanwhile the man from the Grand Union seeing the light went out and he says he could have put it out then if he could have obtained a few pails of water but in his excitement failed to get it, although the tap was there and also the big emergency pipe with hose attached on both floors.

Between boarders and transients the house was full that night and while many of them were awakened by the pounding on their doors and the call of fire they were not told that the fire was in the house and consequently were not hurrying as much as they would otherwise have done. Harry Rose was among the first of the boarders to be aroused as his bedroom was nearest the point where the fire broke through to the upper floor. He tried to put the fire out but could make no headway and it spread so quickly that he had no time to go back to his room to endeavor to save anything but lost all his effects except what he had on him.

John Jackson, the proprietor was among the first who had been aroused and he and some others went along the halls arousing all the inmates and among them the members of his own family who had the narrowest escapes of any. His wife and daughters trying to gather up some of their clothing and personal belongings and not knowing that the flames were spreading so rapidly had a narrow squeak of it for when Annie and Emily Jackson got to the bottom of the stairway they were met by a sheet of flame in the lower hall-way and they had to be dragged out through it. Mrs. Jackson undertook to save her purse in which there were several hundred dollars and grabbed her little granddaughter but was afraid to face the sheet of fire in the lower hall-way. She couldn't descend the rope and carry the child at the same time and was afraid to drop the child from the upper window to those below. At this time Jackson was outside the building and he went back in through the fire and upstairs to where Mrs. Jackson and the baby were, and after directing Mrs. Jackson to go down on the rope which she did, he dashed down the stairs again with the baby into the flames and shielding her under his arm as much as he could, he got through. The baby escaped with singed hair and clothing but Jackson was pretty badly burnt on the hands and neck. Mrs. Jackson dropped her purse after all and it was burned.

Many of the guests of the house had to escape by the ropes supplied in their bedrooms.

Some delay seems to have taken place in the blowing of the mill

BURNING WORDS FROM ROOT

Another Prominent American Cannot Be Silent While Politicians Trample Country's Honor in the Mire

New York, Nov. 21.—"We are approaching a question which will test the willingness of the American people to be true to the ideals of self government, showing that a Democracy can be honorable and just," declared U. S. Senator Root tonight, in referring to Panama Canal tolls, while speaking at the annual dinner of the Chamber of Commerce of the State of New York.

Discussing the situation that has arisen with Great Britain because of the treaty under which she has taken exception to the imposition of tolls on British ships while American vessels pass free, Senator Root declared that if we refuse to arbitrate this issue the United States will be in the position of the merchant that is known to all the world to be false to his promises.

"We would stand in the light of our multitude of declarations for arbitration and peace, discredited, dishonored hypocrites, with the fair name of America blackened, with the self-respect of America gone, with the influence of America for advancement along the pathway of progress, of civilization, annulled, dishonored and disgraced. That question stands among us, and no true American can fail to raise his voice against his influence upon that question for his country's honor."

A PINT OF HORSE POWER

Oliver Wendell Holmes once asked a scientific friend how soon it would be possible for him to "buy a pint of horse power at the corner grocery." This conceit of the general philosopher does not seem such a mirage when we reflect upon the new revelation in physical science—Radium—the enormous energy and nearly everlasting potentiality that are stored in so small a space. If the energy that Radium is calculated to exert in 100,000 years could be concentrated in a few days, an ounce of radium would drive a 50 horse power motor car around the world at thirty miles per hour; or, a gramme (less than 1/30th of an ounce) would raise 500 tons a mile high. Chas. Allen Munn, editor of the Scientific American, says, "Radium is destined to disturb the equipose of our leaders of science and shake our whole system of chemical physics to its very foundation."

METEOROLOGICAL.

B. C.'s BANNER GOLD MINE

Continuation of Mexican Journal's Write-Up of the Nickel Plate

GEOLOGY OF THE CAMP GIVEN

Apt and Technical Description of the Reduction Works—The Writer Brings Mill Improvements Down to Date.

(Continued from last week.)

In the same relative position to the diorite as to the gabros, but apparently not in payable quantities. Quartz porphyry occurs more or less as vertical dikes 1 foot to 6 feet wide, cutting the ore bodies. 28 species of minerals have been observed in the ore body, viz.: gold, silver, platinum, nickel, cobalt, tetradymite, pyrite, arsenopyrite, molybdenite, galena, chalcocyanide, pyrrhotite, Quartz, Magnetite, limonite, calcite, feldspars, pyroxene, wollastonite, amphibole, garnet, epidote, Axinite, apatite, sericite, chlorite, erythrite.

The sedimentary rocks consist of interbedded limestones and quartzites called by Camshell the Nickel Plate Formation and referred by Dawson to the Carboniferous Age. Underlying the Nickel Plate Formation are interbedded limestones, cherty quartzites, argillites, tuffs and breccias resting on massive limestone, the base of which is cut off by granite intrusion.

Overlying the Nickel Plate Formation are beds of volcanic material, fine tuffs, coarse breccias regularly bedded and indicating deposition in water with a maximum thickness of about 1,200 feet. This formation has been partly eroded from the Nickel Mine, exposing the ore bodies. It is believed that extensive faulting has taken place, which will no doubt render considerable geological investigation necessary to explore the ore bearing regions of the camp. Payable ore has been developed along a north and south general zone about 4,500 feet in length. About 350,000 tons of ore averaging about \$12 per ton have been mined along this zone, and about \$4,000,000 has been recovered in gold bullion. It is interesting to note that new ore bodies have been discovered in the same relative positions to the white gabros as the original ore body. Some of these ore shoots have been proven to a depth of about 800 feet, and in places payable ore is mined about 80 feet in width.

The company owns a very large amount of unprospected ground that will no doubt give a long life to this property. 20 to 45 per cent of the assay value was recovered by amalgamation in the upper levels. It is not believed that there is any secondary enrichment in these ore deposits, but the ore occurs as primary deposit. Some of the richest gold ore appears associated with nickel. Some ores carry 5 per cent nickel and 20 to 40 ounces in gold. This usually occurs in bunches, and the nickel and cobalt cut no commercial figure.

REDUCTION WORKS AND POWER PLANT

The Daily Reduction Company, Ltd., owns the electric railway, the incline tramway, the mill and cyanide plant and the power plant, which are situated in the Similkameen Valley about four miles from the mine, 4000 feet below it, or at an altitude of over 1,700 feet.

MILL AND CYANIDE PLANT

The ore is received from the gravity tramway in a 200-ton ore bin. From there it falls by gravity over a grizzly to a 10"x20" Parrel Type jaw crusher, and the oversize from this crusher goes to a 6"x20" Parrel crusher, then by a short horizontal conveyor to a 1,500-ton storage bin.

There are 40 stamps (1,050 lbs.) 7 1/2 to 8" drop—102 times per minute, in narrow Homestake type mortars weighing 8,000 lbs. each. 12 mesh screens are used with a stamp duty of 4.7 tons.

A magnet has recently been placed over the conveyor belt from the rock crushers, and the "tramp steel" is taken out here, making a great im-

CHANGE OF BUSINESS

As will be noted in another column the business of Shatford's Limited is being taken over by F. H. French who has been manager here ever since the business was opened out by the firm of W. T. Shatford & Co. in 1902.

Later on when the present large store was completed the firm name was changed and additional stockholders taken in to conform with the Companies' Act under which the business was incorporated, and it became known as Shatfords Limited. What name the present owner will choose for the business has, possibly not yet been decided on by himself, but in any case the name of Shatford will no longer be used in whatever name may be chosen. It is now over twenty years since W. T. Shatford opened out in Vernon the first general store to do business under that name in British Columbia and it will be twenty years next spring since L. W. Shatford came out from the east to join him in the enterprise and took charge of the new branch store which they opened out in Fairview in the spring of 1893. A few years later they opened another branch in Camp McKinney which flourished in the palmy days of that camp and was closed when the fortunes of the camp no longer warranted the continuance, and Hedley offered a more tempting field. Thus they have been mercantile pioneers on the skinnish line all these years and with the taking over of the Hedley business which was on a larger scale than any of the others the last connection of the original business ceases to exist, and only the millinery store of S. A. Shatford in Vernon which was from the first a separate concern remains to keep the name before the public in a mercantile way. A long course of honorable dealing and strict business methods has always given them a strong hold on the confidence of the public and Mr. French who has been for sixteen years in the employ and ever since the corporation of Shatfords Limited was formed, associated with them as partner, has also his share of credit in building and maintaining the high reputation they have enjoyed. That he will continue to enjoy that confidence goes without saying and his friends will wish him every success.

It is his intention to enlarge the stock and specialize in groceries and men's furnishings.

Improvement in preventing stamp stems breaking. It would be a still greater improvement if this magnet could be placed before the crushers, so as to allow the crusher to be set up closer for fine crushing, as the stamp duty raises with finer stamp feed.

The product goes to a hydraulic classifier, the coarse going to corrugated belt vanners and sand size to plain belt vanners and the slimes to No. 3 Deister tables. The concentrates carry 10 to 12 ozs. gold. The tailings from the concentrates are classified and the slimes go to the slimes plant and the sands to a 5"x22" Gates Tube Mill.

The product from the Gates Tube Mill goes to the Deister concentrators. Tailings from the concentrators are treated in the cyanide plant. The sands are treated in 5"x33" leaching tanks—treated 5 days in the upper tanks, then dropped into the lower tanks, requiring a total leaching period of 10 to 12 days. The slimes are treated in six conical bottom slime tanks, all connected up with 6" pipe to a centrifugal pump for agitation. Zinc dust is used for precipitating the gold with a Merrill filter press. The Oliver filter presses are used for the slimes. The mill was originally designed for tube mill regrinding, but for some reason the Daily Estate refused to allow these mills to be put in, and it was done only after the new owners, The Hedley Gold Mining Co., took over the property. Up to this time over \$500,000 had been lost in coarse tailings carrying from \$2 to \$5 per ton in gold, which was sluiced into the river and lost.

The Minister of Railways denies that he is giving any authority to the G. T. P. to run any of their lines to divert Canadian traffic into United States territory.

AN INIQUITOUS LAW

One of the worst pieces of legislation ever put on the statutes of this province, although it was done in pre-McBride days, was the measure to legalize champerty. It was a bid of Joe Martin's which he was determined to bring about, and by specious reasoning and special pleading, when socialism was more of a dominant factor in the legislation of the province than it is now, he managed to squeeze it through. The law allows a slyster lawyer to take up cases on spec. and divvy up the spoils with the litigant. All that is necessary is to find some man of means with a weak spot or fancied weak spot in his commercial armor and then get some irresponsible without a bean who can be twisted into some kind of shape to fit as a litigant or plaintiff and forthwith sail in for the rich man's money-bags in true piratical fashion. Perhaps it was some such case which Byron had in mind when in describing a real sea pirate in Don Juan he ex-cusingly remarks that in "pursuing his watery journey He merely practised as a sea-attorney"

The quotation may not be verbatim as it is years since we have seen the couplet or thought of it, but that was the gist and it will serve to illustrate our meaning for all present purposes. The more beanless and irresponsible the man may be who is chosen to fill the role of plaintiff the more accurately he will personate the man whom Joe Martin had in mind when in his special pleading for the bill he begged of the legislature to pass it in order that the poor man might obtain legal assistance to fight the rich man in the court. Now the poorer the plaintiff the loss he can be made to lose if his case should go against him and if he should happen to win it will be clear gain for him and the lawyer. One has only to look about to see many of the cases that come up in court that are clearly the result of the champerty law and the sooner it is either repealed

or amended the better. One amendment at all events that should be made to it is to compel the lawyer who takes the case on spec. to put up security for costs. The best men in the legal profession do not want the champerty law for it throws them open to suspicion that they may be practising it. The piratical ones, however, do want it. The best class of client will not trust them and they have to look for something else from another class.

In view of what Hedley has been able to demonstrate to the insurance underwriters in the matter of our position to deal with any serious fire it is now up to them to give the town a special rating, or at least some modification of the present tariff. The amount of money which was saved to the insurance companies by the fire protection provided in Hedley by the citizens through voluntary subscriptions would pay the insurance premiums from this town for possibly twenty years to come. This was surely a good turn that was done them from Hedley and they have a right to reciprocate it.

TESTED AND FOUND FIT

whistle for the general alarm. The night watchman failed to notice the fire until he was told of it by others, and many who heard the whistle complain that it was not blown like a fire alarm and might be taken for the ordinary seven o'clock whistle. Nevertheless the members of the brigade made a very creditable turnout as soon as they got the alarm but by that time the flames were bursting out of both roof and sides and no fire department in the province could have saved the hotel after the fire had got such a headway. A line of hose was run from the hydrant at the corner of Irene Street and Scott Avenue, and two lines from the one at the corner of the livery stable, and in addition to the 600 feet of hose belonging to the town fire equipment a quantity was brought over from the mill and thus three lines were playing on the burning building and on those in greatest danger near by. Fortunately there was no wind or the brigade would have had a much worse job on their hands. But at one time it looked serious enough as it was.

Wind or no wind cinders were carried on to the lawn on Kingston Ave. nearly half a mile away. The boards on the livery stable were burning; the eaves of the Grand Union hotel were browned and the pitch boiled out of the painted siding; Schubert's building was on fire at one time but doused out with a stream from one of the hose lines directed on the spot. John Ash's cabin about 15 or 20 feet in rear of the hotel had all the shingles burned off it and the siding half burned through during the intervals it was left to itself while the hose lines were playing elsewhere, but it was not allowed to burn and not a thing burned or injured inside of it. A few feet distant was Schubert's large stable with the loft full of hay and the gable open exposing the hay to the showers of sparks from the burning hotel a few feet away.

Too much credit cannot be given to the fire company for the way they managed things and the plucky manner in which they stuck to their work exposed to the heat and the drenching without proper clothing, and too much praise cannot be given to the apparatus with which they were provided, inexpensive and unpretentious though it may be. Some places wait until the town is burned down before they do anything and Hedley came pretty nearly doing the same. Fortunately, however, they didn't or the most of the business portion of the town would now be in ashes. Those who contributed last summer to the purchase of the outfit must now derive a heap of satisfaction from it and those who have not yet contributed should potlatch now according to their means and the property interests they may have at stake. There are many things yet required to be added to what we have. Now that winter is coming on shelter must be provided for the hose cart and hose, and rubber goods are needed for the men.

Not only the saving of the buildings

around bore testimony to the efficiency of the fire apparatus and the way it was handled but the ruins of the burnt building itself. There is scarcely a painful pile of black cinders and partially burned pieces of board, while the wooden foundation is almost all intact and in places large sections of the flooring unburnt but supporting huge heaps of partially burned debris. Jackson's gold watch was taken out of the ruins unharmed and the watch still going. Two sets of golf sticks which were standing in the hallway did not even have the wooden handles burned when they were dug out of the ruins.

There was \$5000 insurance of which it is understood that all or most of it was on the building. The salvage was practically nil beyond the few personal belongings dug out of the ruins, so there will be little or no room for haggling of any kind on the part of the companies carrying it.

The effect of the fire so far as the licence is concerned is of course regrettable for it is generally known and admitted in the town that no hotel keeper who has ever been in Hedley has obeyed the law as faithfully as Jackson did. There was never any Sunday selling nor gambling; the hotel was never a rendezvous for tin horns nor lawless creatures of any kind and there was never any affiliation with the red light district nor selling of booze to Siwashes. Whatever Jackson may decide on doing now, it will be a distinct loss to have one so law-abiding go out of the business here, for every man who will respect the law as he has always tried to do is bound to have a healthful influence on others.

NOTES

The fire alarm provision is the weak point at present in Hedley's fire protection. The plowshare gong is a failure, and a good fire bell or some other means is needed. Fire drill is needed too with the night watchman and night shift at the mill so that quicker action may be got on the whistle and high pressure turned on without someone having to go up to tell them to turn it on. The fire blast on the whistle should be different from any other so that there will be no mistaking it.

There is not a plank of the sidewalk between the New Zealand Hotel and Schubert's store that is burned and some of the planks of the hotel platform itself are unburned. Who says Hedley hasn't fire protection?

The meekest and most insignificant looking thing to be seen the morning after the fire was the home-made hose reel which was sitting in the middle of the street opposite the livery stable. The casual observer who did not know what it was or what it could do, wouldn't have given \$15 for it; but there it was sitting within easy reach of over \$75,000 worth of property it saved. There wasn't even a speck of red paint anywhere about it to help it to blow its own horn or say "look at me", but there were citizens who were proud of it nevertheless.

WATER NOTICE

For a Licence to Take and Use Water

NOTICE is here given that Frederick Howell, of Keremosis, B. C., Rancher, will apply for a licence to take and use 100 inches of water out of Sheep Creek, which flows in an easterly direction through Lot 336 and empties into Okanagan Lake Penticton. The water will be diverted at about 20 chains west of S. W. corner of Lot 336 and will be used for irrigation purposes on the land described as Fred Howell's pre-emption.

This notice was posted on the ground on the 4th day of October, 1912. The application will be filed in the office of the Water Recorder at Fairview.

Objections may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C.

FRED HOWELL

WATER NOTICE

For a Licence to Take and Use Water

NOTICE is hereby given that the Similkameen Sheep Power Co., Ltd., of Vancouver, B. C., will apply for a licence to take and use 50 cubic feet per second of water out of Ashnola River, which flows in a north-easterly direction and empties into the Similkameen river near Keremosis. The water will be diverted at the second canyon and will be used for power purposes on the land described as Oliver's pre-emption and within a radius of 40 miles.

This notice was posted on the ground on the 11th day of October, 1912. The application will be filed in the office of the Water Recorder at Fairview, B. C.

Objections may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B. C.

WATER NOTICE

For a Licence to Take and Use Water

NOTICE is hereby given that The Daily Hedley Gazette Co., of Hedley, B. C., will apply for a licence to take and use 100 c. ft. per second of water out of the Similkameen river, which flows in a southerly direction through Hedley, B. C. and empties in the Okanagan river near Oraville. The water will be diverted at a point on or between lot 483 and lot 280 and will be used for power purposes on the land described as Lot 280.

This notice was posted on the ground on the 16th day of November, 1912. The application will be filed in the office of the Water Commissioner at Fairview, B. C.

Objections may be filed with the said Water Commissioner, or the Controller of Water Rights, Parliament Buildings, Victoria, B. C.

Town and District.

Frank Bailey of Princeton is in town this week.

At Hedley on November 21st 1912, to Mr. and Mrs. A. J. King, a daughter.

One of the reasons given for the fine mild November is the preparation of the skating rink in readiness for winter frost.

The only thing now to interfere with golfing is the shortness of the days. The weather and the condition of the links are both ideal.

If T. D. Pickard has a double then T. D. No. 2 was in town last week selling autos. All that was lacking was T. D.'s josh and banter.

Dr. Jackson, dentist, arrived on Friday last and put in a few busy days. He had engagements with patients in his regular practice at Penticton and had to hurry back.

It doesn't pay after all to jump hotel bills and play the deadbeat generally. One individual found this out in Hedley last week after numerous pressing invitations to pay in advance.

The Princeton Star started up quite a vigorous little snudge last week to smoke out some vermin. These disagreeable little demonstrations become necessary sometimes in the interests of the public.

Today is Thanksgiving day over in the United States and all hands are filling up on turkey. Whether they have reason to be thankful on the outcome of the elections is a matter upon which there will be room for difference of opinion.

Owing to Rev. A. H. Cameron being called to Calgary by the death of his sister there was no Presbyterian service held here on Sunday evening last. Word is received from Mr. Cameron to the effect that he will not be back before Dec. 31st and his next service in Hedley will be on January 5th.

There is rejoicing in Oroville for they have at last received assurance that steel is to be laid on the grade between Oroville southward to Paterson. This piece of grade was made four years ago or more and has been given time to grow and mature several good crops of weeds.

Jimmy Riordan, the king of Billy Goat Mountain, spent Sunday in Hedley. He had just come down from his summer resort and left about 15 inches of snow there, to find dry dust on the streets of Hedley. He prefers not to run the risk of freezing any more fingers off and has come down a few weeks earlier this year.

Don't forget the English bell-ringers in aid of the hospital on Saturday Dec. 7th. This is a high-class troupe of entertainers. There are a great many in the company and all of them artists, John Cosgrove is bringing them here and it is well known that he has a faculty for nosing out the best.

There is a Nickle Plate in Rosland Camp which is being worked in a small way under lease. While the production does not mount up into very large figures the values are quite prepossessing. A recent shipment of a carload of the ore gave a return of a little better than \$50 per ton after transportation and smelter charges had been paid.

The date of the Woodman's ball has been changed to Wednesday Dec. 18th and in that way it will not conflict with the Hospital benefit entertainment to be given on Friday Dec. 21st. The Woodmen committee are busy perfecting arrangements and nothing will be left undone to make the occasion a pronounced success.

During the excitement of the fire last week a bushing of one of the hose nozzles was handed to a bystander to be taken care of. Unfortunately the one who gave it cannot recollect the party to whom it was given, and possibly the one to whom it was given put it in his pocket and has forgotten about it. Will the party who has it kindly return.

A predatory owl has all this fall had designs on the poultry yards of Kingston Avenue and with each visit had been greeted with a volley which made him drop his prey. It is always on moonlight nights he makes his invasions but, since the first volley was fired at him in mid-air and he managed to escape, he takes care now in making his get away to keep along the ground where it is too dark to see him.

Clark, the erstwhile publisher of the Coalton Courier, was up before local magistrates in Princeton on Monday last charged with burglarizing the premises of his benefactor, F. P. Cook, and was sent up for trial to a higher court.

On Saturday morning the manure heap in rear of the livery stable was doing a little smoking on its own account. At first some who saw it thought the smoke was due to heating of the manure but there was a suspicious odour of smoke accompanying it and when dug into with a fork the pile was found to be all on fire underneath. This fire had evidently caught from the burning hotel across the way two mornings before, and had smouldered there all that time.

I. A. Dinsmore, chief licence inspector, was in town last week making his round of inspection for the general renewal of hotel licences a month hence. He reached Hedley just in time to see one of the hotels snuffed out here. His interpretation of the Liquor Licence Act is that the destruction of a hotel by fire lapses the licence, and the licensee in order to obtain another must begin DE NOVO as if no prior licence had been in existence.

District road supervisor Turner was in town last week accompanied by Engineer Cleveland who is keeping close tabs on the surveyors who are laying out the route of the trans-provincial auto truck road. Mr. Cleveland expects that next season will see much larger gangs worked on this road especially on the unspanned portion of the road between here and the coast and also on other links in the province where there are now no roads in existence. Once the gap between Princeton and the coast is completed there will then be communication by means of existing roads for a long distance east.

The latest advices from the Golden Zone storm centre at Victoria are more assuring and begin to breathe of unity and sweet concord. If they should prove authentic it is a consummation devoutly to be wished. Heretofore the news has all been of wars, and rumors of war, and numerous communications by post and wire told of the elimination of first one and then another until "elimination" was becoming a stock word in town. It was fast getting as funny and as engrossing as a tale from Dickens and one began to associate these numerous "eliminations" with the "pulverization" of our old friend Uriah.

A rather serious breakdown in the smaller of the two crushers at the mill has been cutting down the tonnage milled and spoiled the chance of making an exceptionally good record this month. While the powerful magnet on the conveyors has saved a great deal of trouble in the batteries by fishing out pieces of steel which the miners contrive to send down in the ore, the crushers have no such protection and must take all that comes. They generally manage to masticate ordinary doses of steel but when it comes to grinding the heads of stone hammers there is likely to be a broken jaw or two if not worse.

The committee of management for the cemetery held a meeting on Monday night and decided on raising, by subscription, the sum of \$400 for cemetery purposes including the fencing of the grounds. The deeds of the ground have been made out by the company and forwarded here and everything is now clear to go ahead. The land is not coming out of the allotment made to M.K. Rodgers as some have understood but out of the company's portion, and it is they who are making it over to the town for cemetery purposes. It is hoped that all will contribute liberally for it is better to have over the amount estimated than under. It can all be laid out to advantage.

The Gazette has had the assurance that the Granby Bay townsite advertised here two weeks ago is a genuine business proposition. There is no land nearer the Hidden Creek mine that is fit to be sold to the public as town lots and the promoters of the Granby Townsite are men who can be depended on to do the fair thing. Neither is there any strained relations between them and the operators of the Hidden Creek mine who is owned by a concern that is too big and has other interests too great to warrant them dabbling in townsiteing, by offering lots to the public even if they had suitable land to spare for that purpose. The statements made in the Phoenix Pioneer to which we referred appears to have been altogether incorrect. Granby Bay townsite is not two miles distant from the smelter but only 800 feet and is not across the bay but on the same side.

Maple Sugar makes the best Maple Syrup and during the cold weather goes fine with the cakes. Get some at 10 lbs - 20c a lb, 6 lbs for \$1.00.

ADVERTISE IN THE GAZETTE

J. W. Whiteley of Vancouver provincial organizer of the Loyal Orange Association, paid an official visit to the local Orange Lodge last Saturday evening. In an interesting address Mr. Whiteley gave an account of the progress of the Order in British Columbia, and throughout the Dominion. In four years the membership had doubled in British Columbia and there are now eighty-one lodges in the province. He had organized nine new lodges already this year and expected to organize three more before the year closed. Last year there were eighty-nine new lodges organized in the Dominion of Canada and after deducting all losses from guy cause whatsoever there was a net increase in membership of over ten thousand. Mr. Whiteley predicted that the report for 1912 would eclipse that of 1911 and would show that the present year had been a record one for the Association, both in the province and the Dominion. During the evening one candidate was initiated, two advanced to the purple, two to the blue, and two to the Royal Arch Purple degree. The election of officers for the ensuing year took place, and resulted as follows:

- W. M., H. F. Jones
- D. M., Sam Knowles
- Chap., E. J. Thomas
- Rec. and Fin. Sec'y, G. H. Turner
- Treasurer, Geo. H. Sproule
- Lect., A. J. King
- D. of Cer., H. Rose

Committee: Geo. Riddle, N. Pickard, T. R. Willey, Wm. Lonsdale, Ben Barlow.

FREE Fine Engraving in Sepia of the Borden Cabinet for Readers of the "News-Advertiser."

EVERYONE wants a picture of the members of the Government of Canada. The "News-Advertiser" has had prepared for the exclusive use of its readers in this province a large engraved plate of Rt. Hon. R. L. Borden and his Ministers.

The group is redrawn from the latest photographs of the eighteen Ministers, who compose the advisers of His Royal Highness the Governor-General. It is printed in sepia on heavy board ready for framing, and will be of the greatest educational value in the home, the school and the library.

The Prime Minister, HON. R. L. BORDEN, occupies a central position, and is shown standing at the head of the Council Table. Seated about him are his colleagues.

Dimly in the background the features of Sir John Macdonald look down on his successors.

How to Obtain the Picture

This fine engraving, of which a limited number have been prepared, will be sent

FREE OF CHARGE

to new subscribers, or to old subscribers, who renew their subscriptions for one year (\$3.00).

For out of town subscribers the picture will be tacked and postage prepaid.

Non-subscribers may obtain copies on payment of 50 cents. If mailed, ten cents extra for tubing and postage.

Applications and remittances (cash must accompany order), must be made to

The Circulation Manager
"News-Advertiser," Vancouver.

Hedley, B. C. November, 25th, 1912.

To Our Customers:

Mr. Frank H. French, who has since the establishment of our Hedley business been its manager, takes over our stock in trade on December 1st.

We take the opportunity, in bidding farewell as a business firm, to express our deep appreciation of the valued patronage so liberally extended and the consideration shown us throughout all the years we did business in the Similkameen District.

We bespeak for our successor the same generous measure of support you have accorded us.

We thank you and assure you that your business relations with Mr. French will be fully as satisfactory as they were with us.

KEREMEOS, the Centre of Lower Similkameen---Famed for Fruit Growing

Town and Lower Valley.

Don't forget the dance in the town hall on Thursday evening.

Malcolm McCauley and Tom Daly started for Kelowna with a fine bunch of cattle.

I. A. Dinsmore, chief of police and licence inspector, was in town a couple of days last week.

Welby's auto is again on the road and will run regular trips as long as the roads stay in their present good condition.

Married—On Tuesday last by the Rev. G.T. MacKenzie, Thomas Francis Smitheram of Oklat and Annie Antwine of Pentiction.

C. E. Burtch, W. Raincock and E. Prentice of Pentiction were in town and district on Tuesday and Wednesday, buying beef cattle.

Professor Brownell's around town again hale and hearty and is prepared to tune up anything from a sewing machine to a Grand Opera piano.

George Haggard, the stage driver, received a nasty kick from a horse in the livery barn last Sunday and it was lucky for him he did not get very badly hurt.

Mrs. L. A. Clarke after spending a few days with her daughter Mrs. D.J. Innis went up to Hedley on Wednesday to visit her elder daughter Mrs. Forbes.

The drill belonging to Willis and Osgood is merely working away on the river near Chopaka and the continued prospecting of the river is going steadily on.

Mrs. Margaret Cameron, mother of Mrs. W. H. Cameron, who has been very unwell the past week, we are pleased to report is now convalescent and is able to be up and around again.

On Sunday evening last many of the residents were rudely awakened by a series of war whoops and the sound of galloping but are at a loss to know just who was performing these wild west stunts in the middle of the night.

While the chain gang were digging out a foundation near the cal-hoose this last week they ran across a seam of coal but as it was only four inches in depth we don't think we will be able to get our winter supply of fuel from it.

Malcolm McCauley of Kelowna rode into town Thursday last renewing old acquaintances and scouring the country for beef cattle. Beef at the present is in great demand and it is pretty hard to get any quantity together. William Terbusket is asking \$70 per head for his.

At 2 p. m. on Saturday the trans-provincial road survey party put in a hub at the centre of Seventh Avenue and Seventh St. It just being 43.4 miles on the new line from the end of the bridge crossing the Tahameen river at Princeton to this point.

It is wonderful to see some of the apples picked last Saturday that were on the tops of trees at the Richter orchard as well as some at George Louden's place. They were in splendid condition and did not show any difference from those picked in September and October.

H. A. Turner, road superintendent; C. E. Cleveland, chief engineer trans-provincial road survey; O. S. Williams, engineer in charge; and H. Parker came over in an auto from Pentiction last Friday and after spending a little time on the line of survey, proceeded to Oroville.

Mr. and Mrs. Meausette and family left on the morning's train for East Princeton where they will make their future home. During their stay here of nearly five years in Keremeos they made many life long friends who were sorry to see them leave town, but knowing that they are moving to a new and growing town wish them the best of success in the new surroundings.

J. W. Whiteley, organizer of the Loyal Orange Lodge in B. C. and Grand Lecturer of the association in the Dominion, gave a splendid address in the Town Hall on Monday evening last to a large gathering. The speech Mr. Whiteley delivered was the finest ever heard in Keremeos on Orangeism, its aims and obligations. After the meeting the Brethren adjourned to the lodge room and four new members were initiated in the blue and purple degrees.

Keremeos is to have a fine open air skating rink this winter, that is if Jack Frost permits. Two meetings have taken place, committees have been formed, and the work is under way. Saturday afternoon Albert Mactier and Dave Innis were working with plough and scraper on the ground laid out by the committee.

Sealed Tenders addressed to the undersigned, and endorsed "Tender for Public Building at Greenwood, B. C." will be received at this office until 4:00 p. m. on Monday, December 9th, 1912, for the construction of a Public Building at Greenwood, B. C.

Plans, specifications and form of contract can be seen and forms of tender obtained at this Department and at the office of Mr. Wm. Henderson, Resident Architect, Victoria, B. C. and at the Post Office, Greenwood, B. C.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation, and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent (10 p.c.) of the amount of the tender, which will be forfeited if the persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender is not accepted the cheque will be returned.

The department does not bind itself to accept the lowest or any tender.

By Order
R. C. DESROCHERS,
Secretary.

Manager for B.C. Local Agent

Synopsis of Coal Mining Regulations

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2,500 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$100 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.
N.B.—Unauthorized publication of this advertisement will not be paid for.

NOTICE

NOTICE is hereby given that on the 24th day of December 1912, application will be made to the Superintendent of Provincial Police for the transfer of the licence for the sale of liquor by retail in and upon the premises known as the Keremeos Hotel situated at Keremeos, British Columbia, from George Kirby to Ada Frances Kirby of Keremeos, B. C.
Dated October 10th, 1912.
