land of B. C.

M. J. HENRY,

3010 Westminster Road, Vancouver.

### KEREMEOS NOTES.

Mr. Carmichael of the E. T. Bank lost his gold watch and chain on Saturday night. The hour of his saddle may have caught the chain and whiskered the watch out of his pocket. It was found by an honest man.

Dr. Schou of Princeton was registered at the Central hotel on Thursday.

The Orangemen had an all night session here on November 5th. There was no gunpowder plot, but at midnight an excellent supper was served by Mrs. Peter Bromley and enjoyed by the members of the Order.

Malcolm McAuley received through his partner Mr. Potts of Minneapolis a most satisfactory report of an assay of ore taken from their claim on Cedar Creek.

There is some howling in the camp of the Philistines at Oroville but the respectable citizens rejoice and defend the right.

J. R. Shaw would no doubt like to have his fine piano, furniture etc. in his own house. The car with the furniture arrived last week and the new house will appear later.

Rev. Mr. Hibbert and editor Clement of Penticton are in town.

St. Nicholas is expected to visit Keremeos two days before Christmas.

The special service in the school house here on Sunday was well attended and in every way interesting. Rev. Hibbert's sermons are always appreciated in Keremeos.

The Grand Master of the L. O. order will be here Nov. 19th. He will meet the members of Similkameen lodge No. 1770 at 8 o'clock that evening.

Rev. Mr. Cameron made a drive of 32 miles on Saturday, conducted one and attended two other services in Penticton on Sunday, returned to Keremeos on Monday and at 8 o'clock that evening married Flossie Allen, of Fairview, to C. B. Martin, of Phoenix.

Rev. Mr. Cameron and Mrs. J. R. Shaw, superintendent of the Keremeos Sunday School are invited to attend the S. S. Convention at Oroville on Nov. 19th and 20th.

Mr. Bruin has the lumber on hand for a cabin for himself. He will build on a part of Mr. Bromley's lot.

The Rev. Mr. Cameron was more than pleased with the reception by the Methodists at Penticton.

Mr. Cochrane of Barkerville, representing the Great West Harness Co., accompanied by his wife and two children is registered at the Hotel Keremeos. They made the trip by democrat from Barkerville to Keremeos, via Savona, 500 miles, and enjoyed it very much.

Not till Friday was there anything to say against the weather. However, the cold now complained of would be considered delightful Indian summer weather in Manitoba and the Yukon. Five teams will be at work this week on the Eastern section of the big water ditch.

Our new post office at the V. V. & E. station is not up to the mark for the town of Keremeos. The Ottawa Government are decidedly slow in doing work for the new town. Why should the office be without lock and other boxes? The general election for the Dominion will soon be on the program.

### RANCHER BURNT OUT.

Fire Destroys Dwelling of R. J. Wynne a Short Distance from Hedley.

On Saturday, word came to town that R. J. Wynne, who has been living on his ranch up on the mountain to the west of the town, had lost his dwelling-house as the result of a fire which occurred on Friday evening. Mr. Wynne was in Hedley at the time and Mrs. Wynne was out on the hills bringing in the cows. The little boy, 4 years old, was alone in the house and all that can be learned as to what had caused the trouble was from the little boy's story, which was to the effect that the fire had gone out and he went to light it with matches, when the place got on fire. When Mrs. Wynne got back the house which was of logs was pretty well demolished and there was no longer any opportunity to save anything, but the thing which frightened her most was that the little boy was nowhere to be seen, and it looked as if he had perished in the flames. In a little while, however, he was found. When he saw the house was on fire he became frightened and ran off and hid. There was no insurance on the building, and everything they had was burnt up with the house. It was a clear lick-up of both larder and wardrobe, and not a shred to show from it except a heap of smouldering ashes.

### MONTHLY RIFLE MATCH.

The November shoot of the Hedley Rifle Association, or the first installment thereof, took place on the 10th, that being the regular day for it. Only two members turned out and they had the satisfaction of establishing a new record for the club in scoring, that record being no less important than having low score equal 62 points out of a possible 75, or 82.6%.

While the light was good, there was a variable wind on a portion of the range, and the elevation was altogether abnormal, making the sighters in most cases outers. A disadvantage too at the 300 yard range was the use of a spotting disc that was too small for the distance, leaving the competitor in doubt as to the exact location of his shots.

As the possession of both cup and medal is at stake in this November shoot, having been won before twice in succession by A. Megraw, it is the wish of those who have already competed to allow other members to have a whack at it still, if they will name a day before hand when it will be convenient for them to shoot. The medal is this time contested on the 200 and 400 yard ranges, so that for the cup it is necessary to make 64 out of 75 to win and 63 to tie; and for the medal 46 out of 50 to win and 45 to tie, which is by no means impossible to do or improbable may be done.

The scores in detail, omitting sighters, were as follows:

200 YARDS.	
A. Megraw	5 5 4 5 5 - 24
G. H. Sproule	3 5 5 5 3 - 21
300 YARDS.	
A. Megraw	3 4 4 3 4 - 18
G. H. Sproule	4 3 5 3 5 - 20
400 YARDS.	
A. Megraw	5 3 4 4 5 - 21
G. H. Sproule	2 4 5 5 5 - 21

While the average minimum temperature for last week figures out in favor of Hedley as against the readings up at the mine, and also the mean temperature for the week showed it to be warmer down here, it will be seen that the readings show that for five days out of the seven it was warmer up at the mine.

J. H. Kennedy, chief engineer of the V. V. & E. and L. M. Hale, engineer on construction, spent a couple of days here last week looking after construction work now in progress on this end of the line. Work is progressing as vigorously as the force available will permit, and will be pushed on to completion as quickly as they can manage to do so. When asked about the reported activity of the Great Northern between Michel and Calgary, Mr. Kennedy confirmed the report that they had three strong parties of surveyors in the field there now.

### THE GIPSY TRAIL.

A Kipling Waif That Has Never Appeared in Any of His Published Works.

Away back in the late eighties, a poem by Kipling entitled "The Gipsy Trail" appeared in an English magazine. The charm about it was so distinctive that the writer cut it out and for years packed it about with other scraps in a small pocket wallet, but finally by some mischance lost it, and only a few stray stanzas were remembered. Not until 1897 was it recovered when Tom Scott, an old tillicum whom the writer had met at the Kingston School of Mines and who graduated that spring from that institution, came along. Scott was on his way to Granite Creek, and remained over in McKinney, where we two spent a "night with Kipling," and during the powwow the loss of The Gipsy Trail was referred to, when Scott said that he had it in his kit and would copy it out and send it when he got back. This he did and the writer still has the copy in Scott's handwriting. The next summer, Jno. Nelson, the present managing director of the Victoria Times, then a reporter on the Times, came along and took a copy from Scott's copy as did also "Wings" a few months later. Why Kipling did not include the poem in his "Seven Seas" nor yet in "The Five Nations," is something the writer could never understand, for it certainly is worthy of being rescued from oblivion. That one metaphor, "Where the besom of God is the wild west wind Sweeping the sea floors white," should surely appeal for mercy from the most hard-hearted author.

### THE GIPSY TRAIL.

The white moth to the closing vine  
And the bee to the open clover,  
And the Gipsy blood to the Gipsy blood,  
Ever the wild world over.

Ever the wide world over, lass,  
Ever the trail held true,  
Over the world and under the world  
And back at last to you.

Out of the dark of the Gorigo camp,  
Out of the grime and the gray,  
(Morning waits at the end of the world)  
Gipsy, come away!

The wild bear to the sun dried swamp  
And the red crane to her reed,  
And the Romany lass to the Romany lad  
By the tie of a roving breed.

Morning waits at the end of the world  
Where the winds unaltered play,  
Nipping the flanks of their plunging ranks  
Where the wild sea horses neigh.

The pied snake to the rifted rock,  
The buck to the stony plain,  
And the Romany lass to the Romany lad  
And both to the road again.

Both to the road again, again,  
Out of the clean sea track,  
Follow the cross of the Gipsy trail  
Over the world and back.

Follow the Romany patteran  
North where the blue bergs sail,  
And the bows are grey with frozen spray  
And the masts are shod with mail.

Follow the Romany patteran  
Sheer to the Austral light,  
Where the besom of God is the wild west wind  
Sweeping the sea floors white.

Follow the Romany patteran  
West to the sinking sun,  
Till the junk sails lift through the houseless  
drift

And the East and the West are one.

Follow the Romany patteran  
East where the silence broods  
By a purple wave on an open beach  
In the hush of the Mahim woods.

The wild hawk to the wind swept sky,  
The deer to the wholesome world,  
And the heart of a man to the heart of a maid  
As it was in the days of old.

The heart of a man to the heart of a maid,  
Light of my tents, be fleet!  
Morning waits at the end of the world  
And the world is all at our feet.

RUDYARD KIPLING.

### HE SET A DATE.

A merchant in a Wisconsin town who had a Swedish clerk sent him out to do some collecting. When he returned from an unsuccessful trip he reported:

"Yim Yonson say he vill pay ven he sells hes hogs. Yim Olsson, he vill pay ven he sell him wheat, and Bill Pack say he vill pay in January."

"Well," said the boss, "that's the first time Bill ever set a date to pay. Did he really say he would pay in January?"

"Well, aye tank so," said the clerk. "He say it ban a dam cold day ven you get dat money. I tank dat ban in January."—Harper's Weekly.

### MICHEL TO CALGARY.

Great Northern Extending its Line to Cover That Territory

Canadian wheat evidently looks good to the Great Northern which is extending its Crow's Nest line on to Calgary from Michel.

Three locating parties of G. N. R. surveyors are now in the field beyond Michel with Calgary as their objective point. Great Northern rails are to reach Michel this month, and so anxious were the officials to accomplish this that they have been gathering up all the rails they could find distributed on other sections of their system that were not in immediate use. The rails which were intended for the section of the V. V. & E. between Keremeos and Princeton, and were stored in a material yard a little west of Midway, were picked up about six weeks ago and hauled out again for use on the Crow's Nest section.

It is to be hoped that they will replace them shortly so as to be ready for track-laying between here and Keremeos when the grade is completed a few months hence. Lack of rails was a constant cause of delay to track-laying between Midway and Oroville and when finally a sufficient supply to carry the track on to Princeton was piled up in the material yard, it was thought that all trouble from that source was at an end, and perhaps it was, but there would be more assurance of it, if the next two months the same quantity of track material as was taken away were laid down either in the material yard near Midway, or at some point north of Chompaka. Then it would be ready for use when required. So far as this section of the road is concerned it is just the difference between a bird in the hand and a bird in the bush.

### CURIOUS BEHAVIOR OF 20-MILE

The Ebbe and Flow Almost as Constant as Tides in the Sea.

The water of Twenty-mile has been behaving very peculiarly during the past ten days. It begins to slacken off about 8:30 a.m. each day, and dwindles down until evening, getting gradually less and necessitating hanging up some of the stamps. By about 8:30 p. m. it has got so low that only 15 stamps of the forty are dropping and the town light has to be shut off, as well as those up at the mine. Then about half past eight the flume man on the upper station phones down that a regular wave of water has swept down, and before nine it has reached the penstock, enabling them to bring all the batteries into play and run both compressor and generators to their fullest capacity for the next twelve hours, with both overflows running over.

The explanation of the occurrence is not altogether clear, but it is more than probable that the heavy frosts at night have something to do with it. If it were in the spring of the year when there was a large supply of snow in the hills the reason would be obvious, but at present when there is no snow and when we have been for a couple of months and are still enjoying a delightful spell of bright sunny weather; cold at nights but dry, warm and bright in the day time, the reason is not so clear. Possibly the marshy reservoirs that feed the creek are affected by the frost and hold back the water by the damming of slush ice, and the break-away occurs each day from the influence of the warm sun. When the marshes cake over with ice and the water establishes courses underneath, the flow will doubtless become more regular. While a somewhat similar difficulty was experienced in former years, it has never been so marked as at the present time.

A new building in the form of an open shed has been placed at the south end of the Daly Reduction Co.'s mill for storing concentrates. It is so situated that the concentrates can be trammed to it from the mill, and is most convenient for loading on the freight wagons, and is well calculated to get rid of as much moisture as possible, which is a consideration where cost of freight on haulage is high.

# The Hedley Gazette

and  
Similkameen Advertiser.

Issued on Thursdays, by the HEDLEY GAZETTE PRINTING AND PUBLISHING COMPANY, Limited, at Hedley, B. C.

### Subscriptions in Advance

Per Year, \$2.00  
Six Months, \$1.00

### Advertising Rates

Measurement, 12 lines to the inch.  
**Land Notices**—Certificates of improvement, etc. \$7.00 for 60-day notices, and \$5.00 for 30-day notices.  
**Transient Advertisements**—not exceeding one inch, \$1.00 for one insertion, 25 cents for each subsequent insertion. Over one inch, 10 cents per line for first insertion and 5 cents per line for each subsequent insertion. Transients payable in advance.  
**Contract Advertisements**—One inch per month \$1.25; over 1 inch and up to 4 inches, \$1.00 per inch per month. To constant advertisers taking larger space than four inches, on application, rates will be given of reduced charges, based on size of space and length of time.  
Advertisements will be changed once every month if advertiser desires, without any extra charge. For changes oftener than once a month the price of composition will be charged at regular rates.  
Changes for contract advertisements should be in the office by noon on Tuesday to secure attention for that week's issue.

### MORE BARNES-KING.

The Barnes-King business is now in an interesting stage—the stage of denials and explanations. Where the charges are reckless the denials can be made with plausibility, effectiveness and perhaps safety; and the three denials that have so far appeared, if trustworthy, would indicate that most of the original charges were reckless and hap-hazard. The denials thus far are from Walter Harvey Weed, Wm. Word and R. B. Lamb. Later on may come the disclosure stage, and when all have had their say, the public will be in a position to judge between those making the charges and those denying and explaining, or in any way concerned therewith. One man upon whom there seems to be a disposition to lay much of the blame, is dead, and cannot defend himself, and another is physically unfit to bear the burden at present resting upon him with any degree of justice to himself. These circumstances may be taken advantage of by those who are endeavoring to shift the blame off their own shoulders; and if so it remains to be seen whether any friends of these men may be in a position to contribute anything in the way of information which will enable the public to judge righteously. Walter Harvey Weed's denial was flat and emphatic, and accepting it to be true as we are bound to do until it is proven different, it is difficult to see why his name should have been brought into the affair at all. Mr. Word's explanation seems clear and straightforward, and appears to justify anything that he has said or done in connection with the property, and R. B. Lamb's letter in the Engineering and Mining Journal of Nov. 2nd will convince all Hedley readers that he has lost none of the skill in letter-writing for which he was always noted. That the plausibility of his letter has caught the editor of the Engineering and Mining Journal is most evident from the editorial comment upon it made therein. The most prominent feature of Mr. Lamb's letter and the Journal's comment thereon, which will appeal to people in Hedley where Mr. Lamb is better known than he appears to be to the editor of the Engineering and Mining Journal, is that with the extraordinary bull-headed luck which has so far followed him, he has been able to turn to his advantage a combination of circumstances that would crush any ordinary mortal. In the first place a man who only two years ago emerged from utter obscur-

ity is dead in luck to have his name associated publicly, no matter in what connection, with those of Walter Harvey Weed and William F. Word. That very association appears to have fooled even the editor of the Engineering and Mining Journal who apparently takes it for granted that a man so associated must have some standing in the mining world, when in reality the position he occupied was, over a year ago, before there was any talk of the Barnes-King, described by the Gazette as that of a man who by bull-headed luck and gall succeeded in getting himself pitchforked into a position that he was in no wise fitted to fill. Now the recent report on the Barnes-King made by Gillie and Goodale cast most serious reflection upon the management of the Barnes-King by R. B. Lamb. They told of an utterly useless three-compartment shaft that he had put down at great expense to the company, and they told of large quantities of machinery that had arrived on the ground, ordered by R. B. Lamb, "enough," as Gillie is reported to have said, "to equip the Anaconda mine." But R. B. Lamb says in his skilfully worded letter, "My connection with the property was purely professional, and I was in a position in respect to the mine similar to that of a doctor to a sick patient who has little hope of recovery, but who still needs attention." Now, was a useless three-compartment shaft, wrongly placed, or the huge orders given for "machinery enough to equip the Anaconda mine," just the kind of medicine to administer to the sick patient so uniquely and pathetically described by Mr. Lamb, or perhaps we should now say Dr. Lamb?

Another apparently strange feature of Lamb's letter is the liberty which he takes in giving to the public information regarding ore values that a mining engineer of any standing, or in whom professional trust and confidence had been reposed, would not do. Walter Harvey Weed and William F. Word in their explanations carefully avoided doing so. Such breach of confidence or privilege is scarcely what one would expect from a mining engineer or even anyone claiming to be a mining engineer.

Still another feature of Mr. Lamb's letter which people in Hedley will be disposed to regard with suspicion is his claim that as far back as January of the present year he had found the condition of the mine to be serious because of the extremely low grade of ore, and that he had advised the company to that effect. If this be so, how comes it that months after this he was writing such glowing accounts of the prospects of the mine back to Hedley and inducing employees of the Duly Reduction Co. to quit their jobs here and go to him in Kendall, Mont., to work on the Barnes-King? Whence also those rumors of unlimited quantities of \$20 ore which Lamb had in the Barnes-King, referred to by those employees who moved their families out, some of them as late as April 15th; yet Mr. Lamb says in his letter that on April 3rd he had measured up and found that there was only \$121,798.00 worth of ore in the mine that would go over \$3 per ton. Surely he was not brutal enough to take Billy Bragg away from a job in Hedley where he was getting \$4.00 per day, to move his large family of little ones, off to Montana to work on a property that he, as Dr. Lamb, said was a patient sick, with little hope of recovery. And if Mr. Lamb was writing in this strain to Hedley it is dollars to doughnuts that some telegrams and letters of a like nature were going to New York, that may yet be up inconveniently, as an illustration that it is not always safe to attempt to wrong even dead or sick men.

One would think also that a publication such as the Engineering and Mining Journal would make some inquiries as to the status of a man who without any technical training is posing as a mining engineer, before endorsing editorially either him or his

views to the extent which was done in the Journal of November 2nd. How he has been smuggled into membership in the A. I. M. E. is something for Walter Harvey Weed and J. Park Channing to explain for both names have been mentioned in connection with turning the trick for him.

A gentleman who has recently returned from Spokane was speaking the other day of the effect of the money crisis, and said that in Spokane there was only one bank out of which currency could be obtained, and that was the Bank of Montreal. All the other banks would do was to issue clearing receipts for any paper which they would accept; but in the Bank of Montreal the business of the branch was conducted precisely as it had always been done, and there was no difference now from what had always been in vogue ever since the bank opened up a branch there several years ago. This circumstance, he said, had occasioned a great deal of comment, and was bringing home to the people of Spokane, and other citizens of the United States, a due sense of the difference between Canadian and American banking institutions. It certainly is a plain object lesson, and drives home a truth that permits of no gainsaying. For years, Canadians have grown to feel that they possess one of the best banking systems in the world, and this impression is strengthened with every financial crisis that comes along. At times—and especially in eras of greatest prosperity—we are often disposed to chafe under what we may term the closed-mindedness of Canadian banks that adhere to strict, safe rules of doing business; but when a financial crisis comes and we read of financial institutions in other countries being bowled over like nine-pins, or doing unheard-of things like the issuance of treasury receipts instead of currency, while our own banks go on in the even tenor of their way without a ripple on the surface to mark the slightest disturbance underneath, we too can profit by the object-lesson, and see that the banks that can stay with us through foul weather as well as through fair, are after all the best kind to do business with. The rules to which they make us knuckle down may seem unamiably irksome at times, but they are wholesome in the long run.

### Notice of Forfeiture.

To W. James Sinclair and any person or persons to whom he may have transferred any interest in the "Sacramento" mineral claim, situated on Nickel Plate mountain, in the Osoyoos Division of Yale District.

YOU are hereby required to take notice that I have expended for assessment and for recording certificate of work on the above named claim, \$100.00 being the expenditure necessary to enable me to hold said claim, and you are hereby required to contribute your share or proportion of such expenditure, together with all costs of advertising. If you fail or refuse to contribute such amount, including advertising, within ninety (90) days of first publication of this notice in the Hedley Gazette, your interest will become vested in me, your co-owner, under the provisions of the "Mineral Act and Amending Acts."  
Dated this 17th day of October, 1907.  
41-14 W. A. HAINING.

### Notice of Forfeiture

To Joseph McDermott and any person or persons to whom he may have transferred his interest in the Edwin Fractional Mineral Claim, situated on Nickel Plate mountain, in the Osoyoos Division of Yale District.

YOU are hereby required to take notice that I have expended for assessment and for recording certificate of work on the above named claim, \$100.00 being the expenditure necessary to enable me to hold said claim, and you are hereby required to contribute your share or proportion of such expenditure together with all costs of advertising. If you fail or refuse to contribute such amount, including advertising, within 90 days of first publication of this notice in the Hedley Gazette, your interest will become vested in me, your co-owner, under the provisions of the "Mineral Act and Amending Acts."  
Dated this 5th day of Sept., 1907.  
31-11 GEORGE H. CAHILL.

### NOTICE.

#### Certificate of Improvements.

"KING EDWARD" and "NIGHTHAWK" Mineral Claims, situated in the Osoyoos Mining Division of Yale District. Where located: On Sussup Creek.

TAKE NOTICE that I, R. H. Parkinson, free miner's certificate No. B 3675, intend, sixty days from date hereof, to apply to the Mining Recorder for Certificates of Improvements, for the purpose of obtaining Crown Grants of the above claims.  
And take notice that action, under Section 37, must be commenced before the issuance of such Certificates of Improvements.  
Dated this 28th day of October, A.D. 1907.  
43-10 R. H. PARKINSON.

meals may be served at all hours. In  
future, the object of this manage-  
ment in establishing a lunch counter  
is to minimize the cost of serving  
and give the trade the benefit of the  
saving, and at the same time produce  
a Bill of Fare equal to those provided  
along the main line of the C. P. R.,  
where provisions are much cheaper  
than in Hedley. And having secured  
the services of a professional Chef  
of wide experience in the C. P. R.'s  
service, both in lunch counters and  
dining cars. This fact should be a  
sufficient guarantee to the public.  
See hand bills! Our Bill of Fare is  
complete and our prices graduated  
to suit anyone. Prices ranging from  
15c. up for a "life preserver"; for 25c.  
you get a "lighter," or for \$1.00 you  
get a "swell." Give us a trial! We  
want your patronage. Call for what  
you want; pay for what you get only.

D. G. HACKNEY, Proprietor.

### Town and District.

Angus Stewart returned on Saturday night from a trip to his old home in Nova Scotia.

Rev. J. Thurburn Conn will deliver a lecture in the church on Friday evening next. Everybody welcome.

Geo. Gilbert and H. A. Hincks are paying their respects to the game up Fifteen mile this week.

C. C. Cochrane, of Barkerville, B.C., representing the Northwest Saddlery Co. was in town this week. He was accompanied by his wife and two children.

The first venison of the season to reach town was a couple of carcasses brought in few days ago that George Bowerman and W. J. Forbes downed up Twenty-mile.

Several pre-emptions have been staked up Twenty mile during the past few weeks. In fact all the ground traversed by the new wagon road has been covered.

If the weather be favorable on that date there is likely to be a good representation from Hedley to the Pauline Johnson entertainment in Keremeos on Saturday night.

W. J. Clement of the Pentiction Press was in town Sunday, having ridden horseback over from Pentiction via the Nickel Plate. He went down to Keremeos Sunday evening.

Boiler Inspector G. J. McGouin was in town at the beginning of the week, and on Monday morning inspected the boilers of the Daly Reduction Co.'s auxiliary steam plant, which is not in use except for heating purposes.

Now is the time to see that your stove pipes are cleaned out thoroughly especially if they have been used for a season or two. If old pipes that are loaded up with soot catch fire, the chances are that not only the pipes but the shanty will get a burn-out.

August F. Jackson, of Rossland, owner of the New Zealand Hotel in Hedley, is spending a few weeks in town. Mr. Jackson says that the drop in copper has made itself felt in all the big low grade camps whose principal output is copper.

Dr. Cross, veterinary dentist, was in town this week on a professional visit. Dr. Cross has done a large amount of veterinary dental work this summer in the Similkameen and Okanagan, and also about Spokane, where he has been for the past few weeks.

Jas. McDougall in charge of No. 2 camp of V. V. & E. construction a short distance below Hedley was in town on Monday evening. He reports the work progressing favorably, considering the number of men employed, and expects that the force will soon be materially increased.

Engineer Hale and Mrs. Hale arrived in town on Monday night from Keremeos, and have taken Dr. McEwen's residence on Kingston Ave. As the heaviest part of construction work between here and Keremeos is at this end of the route, it will be more convenient for him to reside in Hedley.

J. H. Hickling of the Vermillion Forks Mining Co which owns the townsite of Princeton and coal measures nearby was in town last week on his way out. The Vermillion Forks Co. are considering the matter of developing power on the Similkameen above Princeton.

There is a great probability that with the change of time card on the Great Northern which is to take effect on the 17th, a change may be made in the running of trains between Oroville and Keremeos. The probable time for arrival of the daily train at Keremeos will be 8:30 a. m., and departure 4:30 p. m.

There is stronger incentive than ever for taking daily exercise at the wood pile. The householder who pays \$7.00 a cord for wood and then has to pay for cutting it up into stove lengths will kick mighty hard against giving more than \$2.00 additional for getting it sawed up. No matter whether the bucksaw artist be white or yellow he is prepared to hold up the lucky or luckless owner of the wood pile for sawing it into stove-wood lengths. Under these circumstances physical culture a la woodpile bids fair to become immensely popular in Hedley this winter.

#### NOTICE TO ELECTRIC LIGHT USERS.

OWING to a shortage of power, it may be necessary to the operation of the plants of this Company that the Town Lighting Service be discontinued at any moment during the next four months, either temporarily or for the period named. Users of the light are therefore notified hereby to prepare for such an emergency. Whenever possible, two flashes of the lamps will be given ten minutes before the circuit is opened.

Our prices are lower for the same quality of work than elsewhere.

Don't take our word for it. Send us a trial order. The plates prove it.

**BRITISH COLUMBIA  
ENGRAVING CO., VICTORIA, B. C.**

FOSTER'S WEATHER BULLETIN

Washington, D. C., Nov. 2. -- Last bulletin gave forecasts of disturbance to cross continent Oct. 31 to Nov. 4, warm wave Oct. 30 to Nov. 3, cool wave Nov. 2 to 6. Next disturbance will reach Pacific coast about 5, cross west of Rockies by close of 6, great central valleys 7 to 9, eastern states 10. Warm wave will cross west of Rockies about 5, great central valleys 7, eastern states 9. Cool wave will cross west of Rockies about 8, great central valleys 10, eastern states 12.

This disturbance will follow a period of very cool weather and will cause a great rise in temperatures, particularly in Texas and southern states eastward. Indications are that the storm center will come through Texas, Louisiana, Tennessee, Kentucky, thence through New England and the cool wave north of that route.

Following this disturbance the temperatures will make a great fall reaching the lowest point not far from Nov. 23, and about that time extreme southern sections will get unusually severe frosts. The first dip near Nov. 11 will not go to low temperatures; the second, about 17, will be a cold wave, and the third, about 23, will be a severe cold wave. Rainfall, including snows, will largely increase from Nov. 8 to 23.

About Nov. 2 a wave of summer weather is expected, but it will be short-lived. Immediately following that date will come the first cold wave and blizzard of the month. It will strike western Canada, northern and mid-latitude states and will at least reach northern section of the cotton belt. All weather features will be radical and all sections of the continent will feel the effects of this disturbance. The closing feature will be several days of unusually cold weather.

First half of November temperatures will average about normal, very cold near 6 and very warm near 13. These dates are for meridian 90 as the weather changes move eastward across the continent. Last half of November will average much colder than usual, the moderate temperature waves reaching meridian 90 near 20, 26 and Dec. 2, and the cold waves near 23 and 29.

Being a little behind with my calculations for 1908 crop weather, I have not advised as to fall sowing of winter grains. In next bulletin I hope to say something on that subject. In mid-latitude and southern states indications are that December will be a favorable month for sowing winter grains. I will soon be able to advise as to the most profitable grains to produce in 1908.

November weather will be dominated by the great planet Jupiter. Mercury, though much smaller, will, on account of its fleetness, dispute Jupiter's right to rule the magnetic waves, and Venus will come in as a third-rate power. These planets are great magnets and the laws of magnetism apply in determining which of the planets control. It is not always easy to decide which planet will control our weather, but we have no difficulty in deciding which has controlled. The weather records make it plain enough in all cases of past weather and the only method by which we can find the laws of planetary meteorology is to study the weather records in relation to planetary positions. Mercury passes between the earth and sun November 14, and the earth passes between Jupiter and the sun January 29. Take the weeks of which these dates are central days and you will find radical extremes in the weather. Dangerous storms and earthquakes are probable near these dates.

34-10 GEORGE H. CAHILL

Open Your Eyes.

The habit of going through the world with the eyes shut is an inveterate one, common in all times. In old time the prophets and the great Teacher himself reproached their disciples with this failing. "Eyes have ye, and see not," said they. True, it was a failure to perceive spiritual truth in their case. All our faculties, bodily, mental, spiritual, are given to us for use, and we are held to be responsible for neglect of them, as was that servant in the parable who went and hid in the earth that talent that his lord had entrusted to him. Sufficient stress is not laid upon the use and abuse of our bodily faculties or the neglect of them. Do but consider how much pleasure we debar ourselves from when we shut up this the chief of Five Gateways of Knowledge. How beautiful is the world in the cool, clear, luminous air of early dawn, and yet how many, think you, have ever stopped to take in that beauty, if they by chance have been abroad at that hour?—Exchange.

British Military Dulls.

It has often been demonstrated that the schoolmaster is needed among the British officers. Some queer, quaint efforts at composition have been made in brigade orders. A certain major ordained not long ago this: "Reveille will be at 3:30 a. m. The brigade will parade at 4 a. m. The brigade will move at 4:15 a. m. The sun will rise at 5 a. m." It was during the guerrilla war of 1901-02, after the building of the blockhouses, that it became necessary to check the habit of the men of sleeping outside the blockhouses for the sake of coolness and comfort. A certain staff officer thereupon issued the following quaint order: "No one is permitted to sleep outside the blockhouses except the sentries." Though the intention of this order is clear, its phraseology is not, "Men on outpost duty are forbidden to strike matches on the sky line."
