## LINKING UP AT PENTICTON

K. V. Sections East and West from Okanagan Lake Being Hitched Up

Messrs. Schacht Bros., contractors, who have been awarded the contract for grading three miles of the Kettle Valley Railway right-of-way between Scott's lot on the eastern bench and the round-house, have commenced operations and about seventy-five men are being employed with twelve teams in levelling the grade preparatory to ballasting and track laying.

Owing to some litigation between the railway company and property owners, the construction of this line has not been preceded with. Now, however, the company can take expropriation proceedings and have possession of the land providing they deposit a sufficient amount with the registrar to cover the cost of the land appropriated. The claim of the property owners will be decided by arbitration.

A feature of the construction work on the new piece of grade is an automatic digger which digs up the dirt and loads wagons at the same time. This machine is equal to the work accomplished by a crew of fifty men.

The Trout Creek bridge which is the highest trestle bridge in British Columbia has been practically completed and rails will soon be laid. Trains will then cross the bridge which will link up the north and south sections of the line between Osprey lake and Penticton.

Work is proceeding rapidly at the round-house, and matters in regard to railway construction are active generally. —Penticton Herald

## OUT OF TUNE

Oroville's Paddy Roosky Takes Picturesque Flight Into Realm of Finance

"He praised unblushingly her notes. For he was false as they."

—Kipling.

The appended picture of destitution taken from the Oroville Gazette will, we are sure, prove interesting to those in this district who were dull enough not to have noticed any trace of the woes of which the Professor unburdened himself. In Hedley at all events we appear to have been particularly dense, for while there has never been any very noticeable scarcity of money, and all who were at all anxious to pay their debts have generally had the wherewithal to do it, we were foolish enough to imagine that in the period of which the Professor complains, times appeared to us to be better. But here is what he says:

"Prof. T. H. Granville returned to Oroville Tuesday. The show going public will remember the professor, for he had charge of the musical end of the Lyric theatre for months, and supplied excellent music in that position. Prof. Granville had an idea that there was a better show across the line, and last winter accepted a position in a moving picture theatre at Penticton. He has lived more recently at Vancouver. No man was ever happier at getting back to his old home than the professor. He is simply overjoyed at being back in Oroville. He paints a harrowing word picture of conditions over the border. All who can do so are getting out of the country, and all who cannot, want to, according to his report. The boom was overdone in Canada, and now money is a stranger to most pockets. Improvements are suspended, houses are vacant, prices of real estate, so long fictitious have slumped, and the bottom has fallen out of the erstwhile good times. He says the only people working in Vancouver are Hindoos, Chinamen and Japanese. He says that several hundred people want to come to Washington, and many of them have their eyes on Oroville."

We don't profess to know anything about the Professor's musical attainments but if his conception of musical notes is no better than his ability to size up a financial or industrial situation, there will be some wierd caterwauling from the orchestra in Oroville's Orpheum this winter.

The last of the International Geological Congress excursions returned from the northern part of the province last week.

## LIKE OUR MOUNTED POLICE

Tell-Tale Comparisons Made Between Conduct of Affairs at Shushanna and Clonidike

"Had Alaska a system of mounted police similar to that of Canada, the tragic tales of the trail between McCarthy and the Shushanna, or Chisman River, would never have been told. There would have been no deaths at the fording of the streams on the way; the illy-equipped Chechaco would not be stumbling along the trail without food and facing a winter during which he must either starve or steal, and the government would not be appealed to later on to rescue these illy-prepared persons. I have advocated for many years a system of policing, Alaska similar to that which Canadian authorities have installed in the Yukon territory and British Columbia."

So declared Thomas Riggs, who returned to Seattle a few days since, after having completed the final inspection of the boundary line between Canada and Alaska, from the Yukon River to the Pacific Ocean. Riggs has been in charge of the American survey party and will be in charge of the final map work which will require another year to complete.

## K. R. & S. O. PIONEERS MEET

The Annual meeting of the Kettle River and South Okanagan Pioneer Society took place last Thursday evening at Larsen's Hall, Riverside.

The gathering of Pioneers from all parts of the Boundary was eloquent to the fact that the Society is a real live institution, many of the old timers travelling long distances to have the pleasure of enjoying a few hours with the friends of earlier days. It was a real pleasure to witness, and still more to participate in the hearty greeting of old friends not seen for years—time had dealt kindly with these veterans, the passing years had whitened the heads of many but the old time vim was still there, either a tribute to good constitutions or to the ozone of B. C. Numerous autos had brought the guests from more distant points in a few hours, a passing tribute to the changed conditions of travel, from the time when it would have taken a day's hard ride on the hurricane deck of a cayuse to accomplish the same distance.

A meeting for routine work and the election of officers for the ensuing year was called to order by the retiring President, Mr. John McLaren—Mr. Arthur Roberts, Secy. having read the minutes of the previous meeting; the member for Greenwood, Mr. J. R. Jackson, in a few well chosen words, referred to the passing away of one of our members. A small grant was voted for the benefit of an old timer and the meeting was brought to a close by an election of officers, Mr. Ernest Spraggett being elected President and Mr. Arthur Roberts re-elected Secretary, while the final act of collecting dues was followed by a move to the dinner table, where the Pioneers gave evidence that they still possessed good appetites.

After the good things provided by the host, Mr. Sam Larsen, had been thoroughly enjoyed, conversation flowed more freely and the evening proved far too short for many of the old timers, who accustomed to the all night sessions of earlier celebrations, failed to appreciate the time regulation imposed by the new Liquor Act. A proposition was made to collect and embody in a sketch the events of the fifty years from who had actually taken a part and the writer will be very pleased to receive reminiscences from his pioneer friends and endeavour to arrange them in chronologic order, for the benefit of the members of a society bound together by good fellowship and ever ready to assist in the good cause of charity.

H. N.

The Phoenix Pioneer says that Hidden Creek is expected to produce 40 lbs of copper to the ton which on a 17c basis price would yield \$8.00 per ton in copper in addition to the gold contents of the ore. Granby shares are expected to go to \$100 per share in consequence.

## PRAIRIE CROP WILL AID B. C.

Hon. Martin Burrell Declares Effect on Province Can Hardly Be Overestimated

Ottawa, Sept. 27.—That the splendid crop in the Prairie Provinces will have a more favorable effect on the British Columbia business and trade conditions is the opinion of Hon. Martin Burrell, Minister of Agriculture.

"In every Canadian heart," said Mr. Burrell to a press correspondent today, "there is deep thankfulness that the safety of the magnificent crop of our three Prairie Provinces is now assured."

"Greater in quantity, better in quality than ever before, the great tide of wheat is flowing from the far distant farms to the railways, to the elevators, to the shops, bringing a well earned reward to the man who is doing the foundational work of our country in the far off fields."

## RENEWAL OF CONFIDENCE

"Bringing relief to those concerned with the financial affairs of Canada and bringing also a renewal of confidence in the stability and vast resources of our common country. In Great Britain deep satisfaction will be felt in the industrial life of Canada, itself, East and West, and the relief the stimulus will give will be equally great."

"To those of us who have spent years in British Columbia watching its amazing development, faith in its future is unshakable, the magnitude and variety of its resources enabling such a province to withstand hard times better than those countries where prosperity depends so largely on one or two staple industries."

## BOUND TO FEEL PINCH

"But in a widespread time of financial tightness, the pinch was bound to come to a country where the phenomenal expansion, though based soundly, necessitates large expenditures and large borrowings. Inter-provincial trade always tremendously important, is yearly becoming more so, and the favorable effect on British Columbia of the splendid crop of the prairies can hardly be overestimated. "It means ability to purchase a vastly increased quantity of British Columbia products. It means an influx of investors and a swelling of investments."

## BRIDGE-BUILDING PROGRAMME

Mr. Girdwood has given a statement with regard to the bridges that are expected to be completed this fall. The department is taking advantage of the low water and the good weather that prevails during the autumn.

"The Eagle River bridges will be built at once," says Mr. Girdwood.

"The bridge over the North Fork of the Eagle River one mile west of Taft will be a Howe truss span 110ft. long.

"The bridge over Eagle River at Malakwa will be 140ft. Howe truss span.

"The bridge at Sicamous over the Eagle River will be 140ft. Howe truss span.

"All of the above are on the proposed Revelstoke-Okanagan Road.

"The swing bridge at Mara is being rushed to completion and will be completed this month.

"Timber has been shipped for the bridge over the North Thompson River one mile north of the Barrier River and construction will be rushed to completion.

"The bridge at Princeton over the Tulameen River will be 160 ft. Howe truss with concrete abutments, and will take the place of old structure.

Work has commenced on this bridge, and will be rushed to completion.

"The bridges at Penticton on Front Street, a piled structure, will be rushed to completion.

"Construction will commence on 150 ft. swing bridge over the Okanagan River and will be completed as soon as possible."

Mr. Girdwood says that the proposed bridge at Sorento, near the English Church, will probably be built next spring.

There has been a flurry in Consolidated mining shares in the east and the stock has been changing hands recently at 83 ex-dividend.

## ROCK DRILLING CONTESTS

Sensational Work Done at the Nelson Fair by Contesting Teams

The big prize hung out for the rock drilling contest at the Nelson Fair produced a high class of drilling and all the teams entering had some claims to class. The rock there is somewhat softer than that used in Hedley which accounts to some extent for the greater depth drilled, but nevertheless the big factor in the greater depth must have been the calibre of the men who made it. Anderson and Sebba of Roseland who won first money in Hedley on Labor Day with some 33 odd inches bettered this in the Nelson rock by something over 36 inches. The winners at Nelson were two Silverton teams. The one taking first prize was Erickson and Johnson who made a new record in that class of rock by drilling 44 inches in the 15 minutes, while the other, Silverton team, Carmichael & Tinney drilled 42 1/2.

## RARE SUNSET EFFECT

September of 1913 should go down in the records as one of the finest that has been experienced in this portion of the province. There has just been frost enough to give the requisite fancy coloring to vegetation and most of the sunsets have been fine. That on Friday evening last was unique. It seemed to have been produced by some peculiar coloring matter in or arrangement of the clouds in the western sky which threw a soft yet vivid radiance around the mountain tops to the east. Climax bluff was bathed in a light that would have defied the brush of the most noted painter to have reproduced; for after all, mere paint is weak when employed to show some of Nature's best color effects. The peculiar feature on this occasion was that it was most striking quite late on in the evening after it was quite dusk down in the valley and the lights were all burning in Hedley. The prevailing shade was that which one sees when awakened in the night and the light from a burning building is reflected on surrounding objects. Climax bluff and the jutting rugged rocky ribs or mountain promontories around Camp Clifton were all enveloped in this soft uncanny hue, while the line between this and the sombre mountain side of the canyon beneath was quite sharply drawn. Altogether it was an effect which one might live for decades in the valley and not see again.

## NEGLECTING THEIR OPPORTUNITIES

British Manufacturers Slow to Take Advantage of What Canada Offers

London, Sept. 25.—Leo Scheff, who has just completed a three months' tour from coast to coast in Canada gives some remarkable facts as to the amazingly rapid expansion and commercial growth of Canada during the last twelve months. This was Mr. Scheff's fourth visit to Canada and as he used a motor he was able to go right into the heart of the country.

At the outset of the interview he referred to the development of innumerable small towns and villages, among which he instances Medicine Hat. Since his visit last year the town boasts of having built one of the largest flour mills in Canada, from which it supplies enormous quantities of flour to China and Japan, the sacks being marked in Chinese and Japanese characters. Medicine Hat, he says is but typical of the city that makes itself by enterprising local government.

He regretted to notice that a majority of new factories were of American origin and thought it high time that British manufacturers should seize the great opportunities that Canada has to offer English manufacturers in Medicine Hat, Moose Jaw, Winnipeg, Edmonton, Lethbridge, and other cities in Manitoba, Alberta, and Saskatchewan.

Mr. Scheff is enthusiastic about the good work being carried on by home reunion associations, which have dealt out loans with liberality and have not lost a single penny.

**IN AID OF CIVIL POWER**

It may be the fashion in certain quarters at the present to blackguard the militia and to inveigh against employment of them in aid of the civil power to quell disturbances of any kind that are shown to be beyond the ability of the officers of the civil law to cope with; but if ever the wisdom of maintaining an armed force and of making provision for using them in aid of the civil power, was plainly demonstrated, it was in the case of the recent riots in Nanaimo. This duty laid upon the militia by the laws of the land, is one of the most trying that they can be called upon to perform; and if ever it was skillfully, tactfully and humanely done it was by the Victoria and Vancouver troops who brought order out of chaos in Nanaimo. Blood had been spilled by lawless ruffians, and women and children driven from their homes to die of starvation or exposure. But after the troops arrived on the scene not another life was sacrificed; and if there were any who had reason to bless those level-headed commanding officers and the men under them, it was the rioters themselves, many of whom, there is the best of reason to believe, were saved from themselves and are to-day free from the crime of murder, which they would not have been if they had been left to themselves for a single day or even part of a day longer. Attorney-general Bowser may at times exhibit wrong-headedness and make his mistakes, but he made no mistake that time. Apart from the higher principle involved and looking at the question only from the lower plane of mere expediency, it would have been a calamity to the mining industry in this province to let the impression go abroad that the Dominion or any province in it was too weak to maintain order and protect life and property within its bounds. In Hedley would we have had outside capital come and invest three quarters of a million before they took out a dollar if the investor had not been given reason to believe that property rights and human life were safe from mob violence? It is hoped that the occasion may be far distant when it may again be necessary to call on the armed forces of the country to maintain order and enforce the civil law, but if the occasion should recur, let us hope that as level-headed commanding officers and as thorough soldiers will be

on hand to discharge the duty as well as it has just been done.

**HOME RULE AND PAUPERS**

A strong argument is put up by the men of Ulster to show that the present status of Ireland in the United Kingdom of Great Britain and Ireland has nothing whatever to do with any lack, or fancied lack, of prosperity in the green isle, but quite the reverse; and if the south of Ireland does not make the satisfactory showing which it might, other causes than her present status under the British government must be sought. The feature to which they draw attention in order to illustrate this point is the pauper rate. Belfast is prosperous and she enjoys no advantage over the rest of Ireland, England, Scotland or Wales and yet her pauper rate is the lowest of all. Taking all other cities, towns and industrial districts in the three kingdoms and comparing the pauper rate with that of Belfast it is seen that while Belfast has 92 paupers for every 10,000 population, Dublin, the centre of agitation for Home Rule, has 273 for every 10,000 of population, or in round numbers about three to one of Belfast's showing. Only one other city in the United Kingdom has less than 100 paupers in every 10,000 of population and that is Bradford in England with a pauper rate of 99 in 10,000. One other comparison may be made and that is to compare Belfast with the average of all the rest of Ireland outside of Belfast, and when this is done it is seen that Belfast's rate is just exactly half that average, for she has a rate of 92 in 10,000 against an average of 184 for all the rest of Ireland outside the Belfast district. When Belfast can make a showing like this under Ireland's present status in the United Kingdom, why place her under the domination of the pauper breeding methods which have produced such a class of mendicants as is to be found in Dublin?

**WATER NOTICE**

APPLICATION for a Licence to take and use Water will be made under the "Water Act" of British Columbia, as follows:—

- The name of the applicant is The Similkameen Water Works Company, Limited.
- The address of the applicant is Hedley, B. C.
- The name of the stream is The Twenty-Mile Creek. The stream has its source in Stray Horse Lake, flows in a southerly direction, and empties into the Similkameen River about one mile from Hedley.
- The water is to be diverted from the stream on the East side, about 3,200 feet up the creek from Hedley.
- The purpose for which the water is to be used is domestic.
- The land on which the water is to be used is described as follows:—The unincorporated town of Hedley and vicinity.
- The quantity of water applied for is as follows:—10,000 gallons a day.
- This notice was posted on the ground on the 3rd day of Sept. 1913.
- A copy of this notice and an application pursuant thereto and to the requirements of the "Water Act" will be filed in the office of the Water Recorder at Princeton.

Objections to the application may be filed with the Comptroller of Water Rights, Parliament Buildings, Victoria.

Everything Fresh and Everything Good

**CREELMAN & LYALL**

FRASER BLOCK HEDLEY, B. C.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Wharf Summerland, B. C." will be received at this office until 4.00 p. m., on Tuesday, October 21, 1913, for the construction of a Wharf at Summerland, B. C.

Plans, specification and form of contract can be seen and forms of tender obtained at this Department and at the offices of F. W. Aylmer Esq., District Engineer, Chase, B. C., and on application to the Postmaster at Summerland, B. C.

Persons tendering are notified that tenders will not be considered unless made out on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupations, and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works equal to ten per cent. (10 p.c.) of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order  
 R. C. DESROCHERS,  
 Secretary.

Department of Public Works,  
 Ottawa, September 16th, 1913

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

**Synopsis of Coal Mining Regulations**

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1.00 an acre. Not more than 2,500 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,  
 Deputy Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

**Sale of Crown Granted Mineral Claims for Delinquent Taxes in the Princeton Assessment District**

I hereby give notice that on Monday the 3rd day of November, 1913, at the hour of 2 o'clock in the afternoon, at the Court House, Princeton, I shall offer for sale at public auction the Crown Granted Mineral Claims herein after set out, of the persons in the said list hereinafter set out for delinquent taxes unpaid by said persons on the 30th day of June, A. D., 1913, and for costs of advertising said sale, if the total amount due is not sooner paid.

Dated at Princeton, B. C., this 26th day of September, 1913.

HUGH HUNTER,  
 Collector Princeton Assessment District.

**Town and District.**

Maurice Daly of Keremeos was in town on Monday.

The hour for church service will change to 7:30 on Sunday evening next.

Mrs. F. H. Parsons, of Princeton, spent the week-end with Dr. and Mrs. McEwen.

The licence fee for moving picture shows in Greenwood has been increased from \$50 to \$100.

A. McGibbon was laid up with a sore foot this week. Erysipelas from a wound in the shin is the cause of the trouble.

W. Symons got a fine eight point buck on Sunday beyond the Nickel Plate which was claimed to weigh about 250 lbs.

Constable Sproule went to Princeton on Monday and it being Coalmont day, managed to get back by the return train the same afternoon.

Don't forget that the Gazette has the last word in Christmas greeting cards. Call and see the designs and don't delay too long in placing your order.

The Ladies' Auxiliary of the Anglican Church propose holding sewing meetings on Wednesday afternoons to which all the ladies of the town are invited.

Mr. Cansell after a busy week in Camp Hedley left on Monday for Princeton and Tulameen and might possibly go to Summit camp before going east again to Ottawa.

Miss McDonald from Rossland came over here last week to see her brother Jack McDonald of the diamond drill crew. She is the guest of Mrs. McKinnon on Kingston avenue.

Frank Bailey was in town last week with a supply of his pamphlet "The Valley of Sunshine" and disposed of a number of copies besides leaving a supply in the stores on sale at 35c per copy.

There were no Vancouver papers on Saturday which indicated that something had gone wrong with the mails between here and the coast. These little lapses disjuncting the service occur quite frequently.

We notice by the Princeton Star that Robt. Stevenson got a nasty fall off the sidewalk in Princeton on a dark Sunday night while on his way to church service. Poorly lit streets are a dangerous thing for everybody and particularly for aged people.

H. C. N. Etches of Keremeos spent the week end in Hedley and tried his hand at golf on the Hedley links. Seeing a fine field before him from the tee on Primrose Way he took a swipe at the ball which forthwith vanished from human sight and has never been seen on earth since.

Paddy Murray is taking a two weeks' lay-off from his job on the battery floor which he has been holding down steadily for a long time. He left the beginning of the week for Nelson and Spokane, but before going he put in some stiff work with the pick and shovel helping to get the rink in shape.

Messrs. T. Walter Bean and G. P. Jones went out on Sunday in the company's car, the former going to Vernon and the latter to Summerland. Mr. Bean expected to meet Mr. C. A. Congdon of Duluth who is one of the Directors of the Hedley Gold Mining Company and is coming in to see the Nickel Plate.

Mr. and Mrs. L. K. Farr entertained the members of the choir on Tuesday evening when about twenty were present for the whole evening and a jolly time was spent. They expect to leave Hedley in about another month and will be very much missed both for the service they have rendered in church work and for their own social worth.

The Greenwood Fair management wrote over to ascertain the probability of a Hedley team going over for the drilling competition to be held there. The chance for complying with the request was not particularly bright, as ambition in that line has not been soaring of late and the departure of J. Bean deprived the camp of its principal aspirant for professionalism.

About thirty went up to the mine on Friday night from Hedley to attend the dance which was held in the new store and warehouse building recently completed near the mouth of No. 4 tunnel. The floor looked too tempting to allow the space to be taken up with counters, shelves, goods etc. until it had been duly dedicated by means of a social hop. All the ladies at the mine were present with a fair representation of the fair sex from Hedley and a jolly time resulted.

L. W. Shattford M. P. P. was in Amsterdam on September 14th and was leaving that night for Berlin. A picture postcard showing the quaint dress and wooden shoes of the Hollanders is interesting in the extreme and gives some idea of the variety in dress and customs he will meet with in his travels.

The executive committee of the Golf Club met on Thursday evening last and arranged for fixing up the greens a bit. Other attractions during the summer season and uncertainty in reference to the club ground interfered with the season's play and prevented a sufficiently accurate revision of the handicaps to permit of playing off this year for the cup donated by the Honorary President Mr. I. L. Merrill. The fall is always a favorite season for golf and a little fixing up of the greens will be necessary for satisfactory play.

It is comforting to know that Mr. J. H. Kennedy is hopeful of the possibility of making the through trip by rail over the V. V. & E. from Hedley to Vancouver for Christmas 1913. When Mr. Kennedy has reason to doubt a thing he is generally non-committal and he has a faculty of steering clear of dates. Mr. Kennedy can build roads as fast as anybody else when he has a free hand, and this was shown in the short time it took him to complete the road from Grand Forks to Phoenix. Unfortunately Wall Street and St. Paul conspired to prevent him from making any more records so far as the road to the coast is concerned.

The past week has seen work well advanced on the rink. The ditch has been dug to accommodate the water pipe and most of the levelling has been done. It has all been accomplished by volunteer labor on the part of members of the Hockey and Skating Club who have put in spare hours, and on Sunday they were out in force for a regular bee. Post holes have yet to be dug for the fence and the balance of the levelling done. This will be small in comparison with what has already been done. The mistakes of last year will be guarded against as much as possible and if November and December are favorable for the making of ice, the winter game will be in full swing a month or two earlier than last winter.

The old Hedley Meat Market facing north on Webster St. has been given a half turn to face westward on Scott Avenue, and an addition of 30 feet square is being built to the rear to make it suitable for a moving picture theater which will be used by the purchaser, J. K. Fraser, for that purpose. This will give him a building 64 feet long and 30 feet wide in the rear part with a width of 25 feet in the rest of the hall. Boeing & Brass have the contract and expect to have it ready for occupation in about three weeks or less. In all probability it will serve for other shows as well as the moving pictures, for a stage and dressing rooms are being provided for in the new addition. In all probability it may also be given a sloping floor.

Mr. T. Walter Bean has piloted a good many down the canyon from Camp Clifton, and a sort of meditative subdued expression has been evident in the face of each. The soreness resulting from the physical exertion of the trip was a theme that none of the pilgrims cared to discuss. One of them was Mr. Cansell whom we saw next morning after the trip was made, and we all know what sort of a greyhound Mr. Cansell is when it comes to getting over the hills. But it is only fair to Mr. Cansell to explain that he was breaking in a pair of new shoes, and that was the main ground for complaint which he had to charge up to the trip. When Mr. Cansell was told that the Gazette intended making the trip shortly with Mr. Bean he pulled a half-amused, half-pitying grin that was suggestively expressive. But we'll see what we'll see.

H. A. Turner, road supervisor for the Similkameen district, was in town on Monday accompanied by E. P. Girdwood, Provincial engineer for Kamloops, Revelstoke, Okanagan and Similkameen districts. Mr. Turner had to see his foreman in different parts of the district with regard to the suspension of work for the season, and Mr. Girdwood has still a number of bridges under construction which he is anxious to have completed this fall while the water in the streams is low. H. Rose's road gang suspended work on Saturday and began to bring in supplies and camp and road building equipment to Hedley for storage until the work is resumed in the spring. The season on this portion has been much shorter than in other parts of the riding owing to several weeks' delay of the local gang getting to work in the spring.

### MINING NOTES

Rossland was visited with a severe storm on equinox day accompanied with lightning, thunder, rain hail and terrific wind which twisted the Miner's Union hall out of shape and did much other damage.

The Triune group of mineral claims south-west of Oroville has been bonded to Pennsylvania capitalists. The Triune is a free gold proposition and a few years ago produced several substantial gold bricks by means of a small stamp mill erected on the property. The only mining done then was some gophering of the rich surface deposits. The death of one of the three owners, the bankruptcy of another and lack of cash of the third prevented further work and the inevitable long shut down resulted. The present bondholders made a careful examination and sampling before taking the bond and the consideration is said to be \$100,000.

Buy an Eastman Kodak and let the pictures, made from your own point of view, keep the story of your personal impressions. Eastman Kodaks and supplies on sale at L. C. Rolls & Co. at Eastman prices.

## Plumbing and Heating, Sheet Metal Work Tinsmithing

Shop corner Angela Ave. and Bridge St., in 'Murdock's blacksmith shop.'

Work guaranteed. Consult us about your work

## Women's Fine Footwear

Women "Who Know" appreciate the value of Footwear in which comfort is combined with style

The popularity of Invictus Shoes for women is based on their fitting qualities and refined tasteful style.

Such a combination makes the Invictus Shoe worthy of your consideration. Why not permit us to show you some of our new styles.

To introduce these shoes to the women of Hedley, we are giving away free, one pair of Penman's celebrated "Pen-Angle" hose, with each pair of shoes for the next thirty days only.

H. G. Freeman, sole Agent, Hedley.

# THE KEREMEOS PAGE

## KEREMEOS, the Centre of Lower Similkameen---Famed for Fruit Growing

### Town and Lower Valley.

The Solo Club now meets seven nights in the week.

Mrs. Dave Innis is paying a visit to her mother, Mrs. Clarke, at Green Mountain.

W. B. Raincock of Penticton left Monday with a car load of horses for Edmonton.

T. B. Cave of Penticton was in town Monday looking after the shipping of horses consigned to Edmonton.

S. C. Brooks of the Bank of Montreal, Princeton, spent the week end as the guest of Mr. and Mrs. J. A. Brown.

Mrs. George Emory and children returned from Hancock, Mich., after spending about nine weeks at her old home.

Mr. and Mrs. W. H. Armstrong and the Misses Woodrow, after spending a most delightful two weeks' stay in the valley, returned to the coast on Sunday.

Nothing stirring these days to give us any bright ideas of how to gather up more items of interest. If you know anything don't be greedy. Ooze out a trifle.

R. H. Carmichael returned from the coast Saturday after spending a very enjoyable vacation. Mr. Bailey who has been relieving him during the past three weeks left Monday the 29th for Victoria.

Hurry up Nelson Daily News and get those premiums out or send a typewritten notice so that this correspondent of the H. G. won't have to answer so many questions, or may be change the premium to a phonograph that will say, "Everything jake, coming along O. K."

On Friday Walter Frith and his son went out on a fishing trip. Starting from the second railway river bridge up the river they fished down to Ashnola siding and brought back a very fine string of trout and white fish. Some of the trout measured fourteen inches in length.

With the swiftness of the hand that deceives the eye apples are being picked for the various markets on every lot in the district. Of course we mean where there are apples for there are a few lots still on the market unimproved that will go up in price like a Kansas cyclone when the railroad hits the coast.

On the 24th of September C. A. C. Stewart accompanied by his wife and Miss Killick, A. C. Gahan and G. Mason motored over from Penticton. The party visited the claims of W. J. Armstrong in the lower valley. Mr. Armstrong, who met the party, was in town the same day showing samples of ore, which, if there is a body of the same material of the samples produced, he will soon be on the road to a big fortune.

Benjamin R. Barlow hied himself off to Oroville and there on the 26th ult he was married to Mrs. Louise Mary Bills. The ceremony was performed by Rev. Mr. Morton of the Methodist Episcopal church and Mr. and Mrs. Barlow have returned to Keremeos accompanied by the bride's daughter, Miss Kathleen Bills. Ben is receiving the congratulations of his friends which is joined in by the Keremeos correspondent who bestows his blessing and contributes an old shoe.

A. B. Campbell drove over to Similkameen on the 25th accompanied by Wm. Armstrong, W. Christolm of Penticton and W. B. Hine of Okanagan Falls. Everybody seems to be getting the mining fever in the Penticton district, for this party was also taking a nanitch over Billy's claims. From our point we wish the development of claims in the district a little more than has been done in the past few years. No little excitement has been caused in the past by some person of repute quietly getting off at our modest village, and after maybe panning a little gold or staking a claim or two, slide out as easy as they come in. The stuff is here but needs a little lure. Money is the root of all evil; so root, you lobsters, root.

Hedley is doing more than talking rink and hockey. They are more than getting there and working with a will that would put a town of five times its size to shame. From 15 to 20 warm enthusiasts turned in with picks and shovels and when last seen by the writer were digging a ditch around the school house so as to enable them

to get a better water supply than they had last year. If a preacher and a printer had been there all trades and professions would have been represented. It certainly was fine to see the boys drilling like an experienced gang. Only one had a collar on, but he was making the dirt fly. Of course Tommy had a collar on, because he was dishing out liquid refreshments to the, I was going to say wage-slaves; but guess I better shuffle the cards again for there is no wages in this—just love. May good luck follow you in your earnestness to show others what good a bunch of clean sports can do to keep the games of any town up to standard. The rink when completed will be about 68x100 feet. Now, Keremeos, let's get in the game and have a well represented meeting to discuss the building of a new rink that will be a credit to us. Last year a splendid start was made and a lot of good work done. This year with the experience gained we can go ahead and do things. We want to be able to give the Hedley boys as good a rink to play on, as undoubtedly they will give us.

#### OKANAGAN FALLS

The house of Oscar McKinnon is almost completed.

There are now two automobiles and one Ford in this burg.

The son of Mr. Joe Graham met with a bad accident while playing with a cartridge. By some unknown way the cartridge exploded blowing away part of the hand.

There was a meeting Saturday to discuss the question of railway lands in the district and a petition was drawn up whereby the government was petitioned to have said lands opened up.

#### GRADING, PACKING AND MARKING FRUIT

While the great majority of our fruit growers and shippers are endeavouring, usually successfully, to live fully up to the requirements of the Fruit Marks Act (Inspection & Sales Act, Part 9), it is to be regretted that some fruit is still being poorly packed and improperly graded, and some fruit packages are falsely marked.

The Dominion Fruit Inspectors in the Province and in the Prairies, are successfully securing the marking of imported fruit, as required by the new laws passed at the request of the B. C. Fruit Growers' Association. There has not been a similar readiness to observe the law on the part of our own fruit growers, which puts the Association and fruit growers, generally, in an unfair position. All B. C. growers should be willing to assist the Association in its efforts to protect the industry, by themselves meeting the law's requirements. Their violations are due, doubtless, to ignorance of what is required. We urge every packer and shipper of fruit to procure a copy of the act from the Chief Dominion Inspector, R. G. L. Clarke, 155 Water Street, Vancouver, and to read and master its contents. This must result in a better pack of fruit, better prices and a higher reputation, which, in turn, insures more stable markets in future years.

Some of our growers are liable to prosecution for violation of the Act; we hope that the number of such cases will diminish, because the prosecution of the individual hurts not only himself but the reputation of B. C. fruit growers collectively.

Growers and packers should also secure copies of the circulars on 'Methods of Fruit Picking and Handling' and 'Fruit Packing', issued by the Provincial Department of Agriculture, obtainable on request from the Department at Victoria or from any Assistant Horticulturist. The Act states the law's requirements; the circulars outline the methods of picking, handling, grading and packing to meet the requirements of the law and the market.

There must be continual progress in the methods of preparing fruit for the market, if our fruit industry is to overcome its keen competition and take its place as one of the principal industries of the Province. There must also be continued effort by all our growers to keep our fruit pack honest and uniformly reliable, and to raise the standard higher each year. The more favorable markets and prices of the current season, tempt many to relax their efforts, resulting in lower grades. The bad results of this practice are liable to be severely felt next season, when the expected bumper crops over the Northwest States will make the markets much more critical towards poor packing than this year.

R. M. WINSLOW,  
Provincial Horticulturist,
