CANADA'S TARIFF COMMISSION

Will the Government Allow the Old Fogies to Thwart Them in This Reform?

Monetary Times
Little has been heard as to the appointment of the proposed tariff commission, since the bill was stopped by the Senate. The matter will be raised during an early session of parliament. Several names have been suggested regarding the personnel of the commission, but it is safe to say that the Dominion Government has not yet seriously considered this phase of the question. No tariff board will be satisfactory to both Eastern and Western Canada unless a representative is appointed from each of those broad divisions.

The manufacturers last year expressed their desire for the early appointment of a commission. This action was not taken, they stated, with a view to obtaining a general revision of the tariff upwards, but with the idea that the manufacturers had nothing to fear from a thorough investigation by such an independent tribunal into the conditions of protection in Canada. On the other hand, the manufacturers were satisfied an investigation would establish that the progress of the country could only be maintained by the various interests, such as agriculture, fishing, lumbering, mining, and manufacturing, being afforded adequate protection, thereby encouraging the investment of capital and ensuring the employee a commensurate wage for his labor.

The United States has in operation a tariff board. It is entirely without compulsory powers, and depends for the success of its investigations upon the co-operation of the people in the lines of industry being investigated. It cannot call hearings and force the giving of testimony, nor can it demand the throwing open of the books of corporations for investigation. The experts of the board can only request that facilities be extended to them. The board professes that it does not need coercive powers. To judge from experience to date the work of the board is welcomed by manufacturers—at least by United States manufacturers.

The scope and powers of the proposed Canadian tariff commission have already been defined by Hon. W. T. White, Minister of Finance, as follows:
1. To make, under the direction of the Minister of Finance, in respect of any goods produced in or imported into Canada inquiry as to: (a) The price and the cost of raw materials in Canada and elsewhere, and the cost of transportation thereof from the place of production to the place of use or consumption; (b) the cost of production in Canada and elsewhere; (c) the cost of transportation from the place of production to the place of use or consumption, whether in Canada or elsewhere; (d) the cost, efficiency and conditions of labor in Canada and elsewhere; (e) the prices received by producers, manufacturers, wholesale dealers, retailers and other distributors in Canada and elsewhere; (f) all conditions and factors which effect or enter into the cost of production and the price to the consumers in Canada; (g) generally all the conditions affecting production, manufacture cost and price in Canada as compared with other countries, and to report to the Minister.

2. To make inquiry into any other matter upon which the minister desires information in relation to any goods, which, if brought into Canada or produced in Canada, are subject to or exempt from duties of Customs, and to report to the Minister.

3. To hold, when empowered by the Governor-in-Council, an inquiry under section twelve of the Customs tariff, 1907, in the same manner as the Judge of the Exchequer Court or any other Judge therein referred to may hold inquiry when so empowered.

4. To inquire into any other matter or thing in relation to the trade or commerce of Canada which the Governor-in-Council sees fit to refer to the commission for inquiry and report.

The commissioners are to be given power to summon witnesses and to take evidence.

In the meantime, several industries, notably the steel and woolen, are preparing important matter for presentation to the new tariff authority.

NICKEL PLATE IMPROVEMENTS

Extensive Course of Mine Development—Additions to Power Plant

During the visit to the camp last week of the President and Vice-president of the Hedley Gold Mining Co. the affairs of the company were pretty thoroughly gone into and some important decisions as to future operations were arrived at. The principal thing that occupied their attention was the mine itself, and with the fairly complete data at hand obtained from development and from prospecting, by diamond drill they were prepared to lay out a course of permanent development that augurs a long era of prosperity for the mine.

The principal thing decided on in this line was the laying out of a new incline from No. 4 tunnel to be named the "Dickson Incline." Its importance and the part it is to play in the future working of the mine is evident from the fact that it is to be of double skip capacity with man-way besides. This incline will serve for the numerous new ore bodies located in the low levels and it may be extended indefinitely to serve for future discoveries of other new ore bodies; the existence of which is now practically a certainty.

In the matter of power the main policy is yet under consideration and advisement but in the meantime the immediate congestion or overstrain is to be eased by the addition of another 150 horse power boiler to the battery already in place.

THE DEMOCRATS AND RECIPROCITY

Woodrow Wilson Makes Frank Admission—Taft Was Equally Frank If Less Complimentary

Gov. Woodrow Wilson, the Democratic candidate for the presidency of the United States, speaking at New Haven, Connecticut, on the 25th of September, said in regard to reciprocity:

"I was very much interested in some of the reasons given by our friends across the Canadian border for being very shy about the reciprocity agreements. They said, 'We are not sure whether these agreements will lead, and we don't care to associate too closely with the economic conditions of the United States until those conditions are as modern as ours.'"

"When I resented this and asked for particulars I had to retire from the debate, because I found that they had adjusted their economic development to conditions which we had not yet found a way to meet in the United States."

This is the Democratic pronouncement. It is hardly necessary to recall President Taft's views, which were published last April, when his historic letter to Mr. Roosevelt was made public. In that document he said, speaking of reciprocity, that it would make Canada an adjunct of the United States, and added:

"It would transfer all their important business to Chicago and New York, with their bank credits and everything else, and it would increase greatly the demand of Canada for our manufactures. I see this is an argument against reciprocity made in Canada, and I think it is a good one."

CAVE CANUM

Something for Dog-Owners to Consider

Here is something that may be of interest to dog owners here. A recent supreme court decision outlines responsibilities of owners of dogs. The decision was a case where action had been brought to recover damages from the owner of a dog that barked and frightened the plaintiff's horse. The plaintiff was thrown and injured, and brought suit for \$1500 damages. The jury gave him a verdict for that amount, and the owner of the dog appealed to the Supreme Court. The Supreme Court sustained the verdict, and said in strong words that the owners of barking and vicious dogs are responsible for all damages caused by such dogs, and the owners keep them at their own peril.

Boundary hockey teams are being organized for the season's play.

MONK MAY LEAVE CABINET

Out of Harmony with Government on Part of Naval Policy

Ottawa, Oct. 17.—That the resignation of Hon. F. D. Monk is now in the hands of Premier Borden and that it will shortly go into effect, is practically certain. The probable early retirement of the Minister of Public Works has been the subject of much speculation today in the Capital and, while there is a general agreement to the effect that he will cease to be a minister, there is nothing definite as to just when the resignation will go into effect.

The reason for Mr. Monk's retirement from the Cabinet is that he believes the government should submit its emergency naval proposals to a plebiscite of the Canadian people. As the majority of the members of the Cabinet are opposed to such a proposal, Mr. Monk will seek retirement.

The general impression is that the minister will not accept a place on the bench, but will retain his seat in parliament. Apart from his disagreement with the majority of his colleagues on the navy question, it can be safely stated that Mr. Monk has never been enamored with his position as Minister of Public Works. A man of fine scholastic attainments and a student, he has found the burden of detail of the Department of Public Works a wearisome load which he will not be sorry to lay down.

The Cabinet Council met this afternoon and again this evening but there was no announcement as to the date of the opening of parliament.

THE METAL MONEL

What It Is and What Are Its Uses

Monetary Times
Monel metal, an alloy of nickel and copper, which has been placed on the market by the Canadian Copper Company, and which is produced by that company without separating the metals or either of them from the matte has aroused great interest. It is asserted that the proportions in which the nickel and copper occur in the Canadian Copper Company's ores are almost precisely those required for the alloy, which are about 67 per cent. nickel and 27 per cent. copper, and that by careful attention to the furnace charge a Bessemer matte can be produced within one per cent. of that required in making Monel metal. Considerable quantities of this alloy are now coming into use. It is claimed to possess great strength and to be practically non-corrodible. It has been employed as castings in the manufacture of propellers for vessels of the United States navy and private yachts, in pump linings, steam turbine nozzles and valve fittings for superheated steam, in dairy machinery, refrigerating plants, and pickling apparatus in steel mills; in rod form, for pump rods, bolt and nut stock, steam turbine parts stock for drop forgings, electrical apparatus, motor boat shafting, pickle pins for valve stems; as sheets, for roofing railway terminals and other large buildings, for mine screens and chutes, smelter roofs, skylights and window frames, boat sheathings, cooking utensils and chemical apparatus, also for steam turbine blades; in the form of wire for wire cloth, motor cycle spokes, rope for mine hoists and cableways, nails, screws, rivets, etc.; and many other applications where high tensile strength, combined with non-corrosive features are essential.

GENERAL NEWS

British manufacturers of ammunition have been able to capture a contract for the supply of shells to the United States government.

The tariff reform party in Britain are getting ready for the fray and contributions for the campaign fund are coming in satisfactorily from the more ardent imperialists.

Blonde Eskimos in the Yukon is the latest find engaging the attention of anthropologists.

Point Grey is opposing the erection of Shaughnessy Heights into a separate municipality.
Federal parliament may not meet until January.

PENTICTON OUT FOR TRADE

People of Lake Town are Petitioning for Completion of C. P. R. Link from Proctor to Kootenay Landing

Penticton, B. C. Oct. 18.—At the regular meeting of the Penticton board of trade a letter was read from the secretary of the Nelson board stating that they had discussed the question of the probability of getting the Canadian Pacific railway to undertake the early construction of the Proctor-Kootenay Landing connection.

In view of the fact that it is here understood that in consideration of the Balfour hotel being built the Nelson board of trade had foregone their privilege of urging and practically forcing the immediate construction of this portion of the line for three years. E. W. Mutch was of the opinion that the matter should be taken up with the Dominion government. He considered that the whole southern country was vitally interested in the building of this link in the new southern main line, and that irrespective of any agreement made with the Nelson board of trade by the C. P. R. the immediate construction of the road should be urged by the government. It was finally decided to await developments. Should the president of the C. P. R. not make a favorable announcement on the occasion of his trip through the Kootenay it is probable that the Penticton board will petition the government to take some action in the matter and ask the assistance of all boards of trade in southern British Columbia who may happen to be interested.

GENERAL NEWS

Mexican affairs are reaching a crisis again and President Madero is having a hard time to hold on.

The Supreme Court of Canada has been asked to interpret the B. N. A. Act as to the relative positions of the Federal and Local governments on the control of the fisheries both coast and river. The B. C. government contend that the Act gives them the power to pass regulations controlling the fisheries within their boundaries.

Roseland Miners' Union passed a resolution disapproving of the action of merchants in increasing the cost of commodities.

The Bank of England has raised the rate of discount one per cent.

Keir Hardie says that men in Canada who get less than \$3.00 per day could do as well in Britain as they can here.

Vancouver is to have a fifteen storey building and work is to commence on it in the spring. It is to be erected on the southwest corner of Richards and Hastings.

METEOROLOGICAL

WHAT IS TREASON?

A little bit ago we heard a great deal of the threat made in Britain to proceed against Bonar Law for treason because he had publicly commended the people of Ulster for their resolve to have nothing to do with Redmond's home rule but to remain loyal to the Empire. What shall we say of Sir Wilfrid Laurier in Canada for his real treason to the state in continuing to advocate a scheme which President Taft said in a letter to Ex-president Roosevelt

"would transfer all their (Canada's) important business to Chicago and New York, with their bank credits and everything else, and it would increase greatly the demand of Canada for our manufactures. I see this is an argument against reciprocity made in Canada and I think it is a good one."

If it is treason to play into the hands of a foreign state against the interests of one's own country, who will deny in the face of what Taft has said that Laurier was guilty of treason in his advocacy of reciprocity over a year ago? But he is doubly so now in continuing it. No one knows better than Sir Wilfrid Laurier that he kept outside manufacturers from establishing works in Canada by his free trade and unrestricted reciprocity contentions between 1878 and 1896, and it was not until in 1897 he adopted the protective policy he had condemned all those years that manufacturers in the United States who wanted the Canadian market saw they had to move across the border, as they had no more to hope from the Liberal party upon whom they depended to give them the Canadian market. He knows also that from the day he announced in the House of Commons in January 1911 his intention to introduce a bill to give effect to the bargain made by Fielding and Patterson, the movement of manufacturers from the United States into Canada abruptly ceased until after the conspiracy had been given its quietus on September 21, 1911. He knows why his supporter German of Welland refused to follow him on his reciprocity scheme and he has only to inquire into the industrial history of the town of Welland for five years prior to that day in January 1911 and what it was between that date and September 21, 1911. Clearly his only object must now be to prevent any more manufacturers from coming in by making them think the Liberals may get into

power again shortly and give them the Canadian market without the necessity of establishing factories on this side. If that be not treason to Canada, what is?

CONCERNING ROAD BUILDING

British Columbia is coming in for a good deal of eulogy these times on the excellence of the roads she is building and the Minister of Public Works seems to have made good his right to the title "Good Roads Taylor". The following portion of a paragraph taken from Editor Dallam's write up of a trip to Pentiction in his paper, the Oroville Gazette, will show how the appearance of our roads struck the editor from the south who has always been noted for fairness and breadth when dealing with matters either at home or abroad. The Gazette says: "Further it would be to the everlasting advantage of the country as a whole if the commissioners and engineer would make a trip over the British Columbia roads, after bumping the bumps on this side of the line, and learn from these northern neighbors how to make good roads. They sure have the system down fine on the other side. The good road is not only a joy to those who have occasion through choice or necessity to use it in travelling either on pleasure or business, but it is an important contributor in adding value to property, because any kind of property is more desirable in a country of good roads than in a country where the roads are neglected. Possibly one of the reasons for the settlement of the Pentiction country is the excellency of the roads leading in and out of it."

From here to Pentiction the roads are as solid and smooth as wagon roads can be made. There are no ruts, or wash outs, and it would be difficult to find a stone larger than a marble in the roadway, unless on some new section where crushed rock is being used as a macadam. Of course the Canadians have more money to make roads than the residents of this country, but when one looks back upon the years and years during which vast sums have been shamefully thrown away in useless road making, it would seem that even with the money at command had it been applied intelligently by persons with a knowledge of road making, something better in the way of roads than what are now in use would have resulted."

Without desire to butt in we would like to offer a few observations by way of explaining what we think are some of the reasons why Editor Dallam has found things as he has and has had occasion in his fairness to give us premier position in the comparisons he has made. To our mind the difference lies in the two systems and when our neighbors have to complain of being compelled to bump over inferior roads they are merely paying one of the penalties they must suffer for the great liberty (so-called) which they enjoy. It is an old adage that "what is everybody's business is nobody's business" and when, as we are told, the elective system in most of the states is carried to the extent of electing road supervisors and foremen the average supervisor whose one aim is to make himself popular enough to be elected is in a very poor position to do the right thing in the way of road building even if he should happen to know how, which in nine cases out of ten he doesn't. Here, however, in unorganized districts not under municipal control the government builds the roads and has to answer to the people for the job they make of it. The people on their part try to pick out the best men they can get to represent them in parliament—men who are held to be honest and who have shown aptitude in the conduct of their own business, and when once they choose them it results they want and not the right to dabble into or interfere with ways and means for securing the results.

The building of the roads in the province is allotted to one member of the cabinet, who in this case is the Minister of Public Works, and he in turn is held responsible by the Premier for results in the conduct of his department. To produce these results he must have capable men to do the work required, and he retains the ser-

VICES of competent engineers in his department and in each district a competent district supervisor of roads. The responsibility of choosing these latter he asks the representatives to share with him by recommending a suitable man. This man must also produce results and for that reason he is given the choice and appointment of his own foremen in the various localities of the district instead of having the people elect them for him. These foremen must carry out the orders of the district supervisor who in turn consults the departmental engineers. That in brief is the system we work under.

Now the Similkameen electoral district in which Editor Dallam found the roads which took his fancy, happens to have in Mr. Shatford a representative who is after results and at every session of the Legislature he sees that his district gets its share of the money appropriation for roads. Then he sees that the money is being properly expended and to that end makes several visits a year to every part of the district to see the roads for himself and keeps closely in touch at all times with the district supervisor of roads and with the departmental engineers and Minister of Public Works.

In a few rare cases we sometimes hear a little clamor from unthinking people, especially some from across the line, who want the right to elect their road foremen, but the mass of the people on this side who have the privilege of using good roads do not take them seriously and pride themselves on the ability to know a good thing when they have it.

WATER NOTICE

For a Licence to Take and Use Water
Notice is hereby given that the Similkameen Power Co., Ltd., of Vancouver, B.C. will apply for a licence to take and use 50 cubic feet per second of water out of Ashnola River, which flows in a north-easterly direction and empties into the Similkameen river near Keweenaw. The water will be diverted at the second canyon and will be used for power purposes on the land described as Oliver's pre-emption and within a radius of 40 miles.
This notice was posted on the ground on the 14th day of October, 1912. The application will be filed in the office of the Water Recorder at Fairview, B. C.
Objections may be filed with the said Water Recorder or with the Controller of Water Rights, Parliament Buildings, Victoria, B. C. Similkameen Power Co. Ltd. H. G. Spague

WATER NOTICE

For a Licence to Take and Use Water
Notice is hereby given that Gold Plate Mines Limited, Non-Personal Liability, of Hedley, B. C. will apply for a licence to take and use two thousand gallons of water out of an unnamed creek, which flows in a south-westerly direction through a marsh about 1000 feet east of Lot 962, and empties into the north fork of Twenty-mile creek near juncture of the north and east forks thereof. The water will be diverted at a point about 1000 east of the southeast corner of said Lot 962 and will be used for mining purposes on the land described as Lots 922, 908, 901, 905.
This notice was posted on the ground on the 23rd day of Sept., 1912. The application will be filed in the office of the Water Recorder at Fairview.
Objections may be filed with the said Water Recorder or with the Controller of Water Rights, Parliament Buildings, Victoria, B. C. GOLD PLATE MINES, LIMITED Non-Personal Liability C. H. Brooks

Town and District.

T. D. Pickard returned again to the coast on Saturday.

J. F. Mosby, secretary of the Gold Plate Mines Co. operating the Golden Zone, has spent the past week in Hedley and at the mine.

The Vernon News of twenty years ago mentions R. L. Cavston among the purchasers of thoroughbred cattle at Jas. T. Steel's sale in Vernon.

The tote roads for the building of the portion of the Kettle Valley east of Penticton has given wagon road communication between Kelowna and Naramatta.

Harold Townsend was one of the Similkameen "all stars" who played lacrosse at Penticton last Friday and brought back the scalps of the team encountered over there.

Mr. and Mrs. Joyner left on Monday for Seattle where they will spend the winter. In the spring they expect to go to California. E. H. Williams will move into the Rodgers house this week.

The snowfall at the end of last week tempted a number of local hunters into the hills but they say the deer are still far back in the mountains. S. E. Hamilton got a fine buck and J. T. Naff jr got one a few days before.

A four-horse team has been busy during the past week hauling piping and supplies to the Golden Zone. Work is in progress underground and most of the surface has been completed. When the piping is in place they will be ready to start the mill.

Hermann Zibler went out on Monday bound for the Old Men's Home at Kamloops. For many years he would not consent to go but when he took the notion at last he was very keen to get off and was as impatient as a child to get on the way.

Alex Kellet is superintendent of construction on the Pacific and Great Eastern which Pat Welch and his company have the contract of buildings and he is now making arrangements for prosecution of the work in the vicinity of Lillooet.

Monday next will be Thanksgiving Day and by way of suggestion cranberries are on display in the grocery stores. It is presumed that the turkey which will be necessary to complete the combination is being groomed somewhere else even if he has managed to keep out of sight and will not fail his part when the day comes around.

A meeting will be held to-night (Thursday) at Roll's store at eight o'clock to complete organization for a skating rink. Everybody who is interested in winter sports is urgently requested to attend in order that arrangements may be completed and everything put in readiness to take advantage of the first cold snap.

A wind from the south with its steering gear headed up Twenty-mile and the barometric pressure low gives townspeople an opportunity to know something of the chemical products of decomposition of the coal used in the company's furnaces. A little experience of this is apt to make people think that a smelter located on the flat might not have proven the boon that was expected of it and its failure to connect may have been a blessing in disguise after all.

Carl Hairsine, traveller for the Western Canada Flour Mills Co., came in on Saturday and received the congratulations of his Hedley friends on the auspicious event which occurred a week ago in Vancouver when he joined the ranks of the benedicts. There is no josh about it for he brought the evidence along in the person of Mrs. Hairsine herself and showed her the beauties of Hedley. They Sundayed here and were blessed with fine weather for a trip up to the mine. The Gazette wishes the happy couple long life and prosperity.

Cattle continue to come down the river in large numbers without anyone driving them and a large band of them paraded the golf links all day Sunday. Some complain of a pugnacious bull in the bunch that always showed an inclination to open hostilities without even a declaration of war. In one case he squared up to a couple armed with rifles who were on their way out into the hills after deer. Had he come on too persistently and insisted on close-in-fighting he would likely have got a few bullets in his carcase, and would have had nobody to blame but his own fool self. For no person is required to allow himself to be gored to death when he has a rifle along. A couple of years ago George Lyon had an ugly experience with a vicious animal that strayed into the field from a bunch that was passing up the

river and but for his presence of mind and quick foot-work in dodging the beast's rushes until he could make the fence, he would have been killed. There was a day in the Similkameen when nothing was thought of animals of that kind running at large but that day is passed. The valley is now settled and the people have a right to claim some reasonable degree of immunity from risk of that sort.

Mr. J. L. Merrill, President of the Hedley Gold Mining Co., Mr. W. B. Dickson, vice-president, and Mr. Carlton Merrill, the president's son, went out again on Friday after spending about three days at the mine, the works and in the office. During their stay also they made a trip a few miles up the Similkameen to look over the situation where the company have been contemplating the matter of developing some more power from the Similkameen river and also went over to where diamond drill prospecting is proceeding under the Windfall bond. Their time being so much taken up the president and vice-president had little opportunity for anything else and even the golf links with the greens retouched was unable to tempt Mr. Merrill to take an afternoon off for his favorite diversion. This was Mr. Dickson's first trip in here, and to see more of the province he went out by way of Penticton. He has spent many years on the working staff of the American Steel Trust of which he is the Vice-president and was one of the old guard in the concern in the days when old Andy of Skibo was the dominant spirit. For Mr. Carnegie all the veterans of the industry still retain the warmest regard and this circumstance possibly explains in a great measure the enormous success which attended the operations of that industry. It is to be hoped Mr. Dickson will find time in the near future for another visit to Hedley.

Mr. C. H. Brookes was asked the other day as to present position of matters in connection with the charge of embezzlement preferred against him from New York and showed the editor a bunch of telegrams he had sent the authorities in New York from Hedley since the 10th of September. The substance of all the telegrams was asking for an explanation of why the authorities were meddling in a civil dispute about stock which had nothing to do with the criminal code and begging them to either proceed with the charge against him or withdraw it. Only one reply could be pulled out of them to the whole sheaf of telegrams and letters and that was a letter from district attorney Whitman asking Mr. Brookes to call at his office in New York some time during the week beginning Nov. 10th to talk matters over with him. The Becker case now in the limelight taken along with this affair leaves no other conclusion than that they have a rotten conception of the administration of justice in the land of liberty. If Mr. Brookes has transgressed the laws of the United States he should be punished. There is a law providing for the extradition of law-breakers and why is it not used? If he does anything wrong on this side of the line let us hope that Canadian law will not be similarly prostituted.

We are now in for many long dark nights but Roll's is selling out his business and offers a \$15.00 "Brite-lite" for a few days at \$0.75 cash. You cannot land them here wholesale at this figure.

Hedley, October 7th, 1912.

Sealed Tenders addressed to the undersigned, and endorsed "Tender for Wharf at Seymour Arm, B. C." will be received at this office until 4.00 p. m. on Tuesday, October 23rd, 1912, for the construction of a Pile Bent Wharf at Seymour Arm, District of Cariboo, B. C.

Plans, specifications and form of contract can be seen and forms of tender obtained at this Department and at the offices of C. C. Worsfold, Esq. District Engineer, New Westminster B. C.; F. W. Aylmer, Esq. District Engineer, Chase B. C.; and on application to the Postmaster at Vancouver, B. C.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation, and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent (10%) of the amount of the tender, which will be forfeited if the persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender is not accepted the cheque will be returned.

The department does not bind itself to accept the lowest or any tender.

By Order

H. C. DESROCHERS,

Secretary.

THE KEREMEOS PAGE

KEREMEOS, the Centre of Lower Similkameen---Famed for Fruit Growing

Town and Lower Valley.

J. A. Brown went up to Princeton on a business trip last Monday.

F. H. Parsons of Penticton was in town Monday meeting his old friends.

H. B. Meausette and Jack Knudson are up the Ashnola on a mowitch hunt.

Mr. McEwish of Coalmont spent a few days in town and district last week.

J. M. Young and Earl Howse are getting the telephone line in shape for the winter.

Look out for the big dance to take place in the town hall on November first. See bills.

Mrs. Daly and party got back from their hunting trip last Monday with a good supply of venison.

George Louden is back from his visit to the coast and reports Vancouver far ahead of any of the coast cities.

N. A. Rogers of Salmon Arm was in town last Thursday looking into the possibilities of starting a furniture store here.

Miss Harvey, nurse, Miss Irene T. Palmer and A. Lucas accompanied L. A. Rathvon to Keremeos one day last week on an auto trip from Penticton.

Last Friday H. S. Keating of Edmonton brought in a number of horses from across the line to go to the railroad construction camps west of here.

C. E. Shaw, C. E., came down from Granite Creek and spent the week end with R. L. Cawston. Mr. Shaw is at present surveying the East Coalmont townsite.

Harry Parker of Fairview drove over on Sunday accompanied by Mrs. Ronald Hewat and Miss Rita Kirby who has been staying with Mrs. Hewat for the past week.

A. E. Hargreaves returned Thursday from Edmonton. George, his eldest son, who had a narrow escape from death this summer through a bad fall, is progressing favorably and is now out of danger.

At the meeting of the Liberal-Conservative Association held Saturday President Daniel McCurdy was appointed as a delegate to attend the Provincial L. C. A. meeting at Revelstoke 24th and 25th. The matter of dredging the river was again taken up at the meeting.

The Tally Ho horn on the Welby auto stage does not at all please many driving teams around the district. Most horses are by this time well used to passing autos but when they are approached by this row it is worse than their first scare of the auto. A warning in time is all that is required, and all automobile drivers should pass teams, especially on these mountain roads, with as little noise as possible.

A team of lacrosse players representing the Similkameen valley went over to play a team from Penticton. Eight players came in on Thursday evening's train from the west, namely two from Tulameen, two Coalmont, three Princeton and one Hedley, and were taken in the Tweddle auto stage to Penticton the same evening. The Keremeos quartette did not get away until 10:20 next morning so had very little time to get limbered up before the game commenced. At 2 p. m. the teams lined up on the field. Penticton wearing green sweaters and Similkameen white, and after some little delay the game commenced. Penticton started off with a rush and in the first minute opened the scoring. After the face-off Penticton made another fine attempt but this time the defence of Similkameen was ready and cleared in fine style. The centre getting the rubber passed well forward which enabled the attacks to get in some good play which resulted in Hunter equalizing. Quarter time score, one all. Second quarter opened with some smart play among the Penticton attacks and in less than two minutes they added another to their tally. After the face-off Similkameen through

God Lyall evened up again only to see Penticton take the lead once more; this was a fast quarter and everyone was playing good lacrosse. Both goalkeepers were a credit to the teams, as they were meeting and clearing shot after shot. Half time arrived with Penticton in the lead 3-2. The third quarter opened fast, both teams on attack and defence were working good, but Similkameen did not seem to be

over-exerting themselves until Penticton scored again then it seemed as if something had struck them; the defence closed and held Penticton attacks down, the ball travelled towards the Penticton goal and after some real good combination Heinbecker put one past the post. Three quarter time came with Penticton still in the lead 4-3. A very short interval was taken and the boys were at it again, Penticton was tiring it could be plainly seen but kept on giving lots of trouble to the defence. Similkameen's attacks were now passing beautifully, time after time they shot at goal only to be intercepted by the home custodian. With eight more minutes to play Keeler took a fine pass and planted number four for Similkameen. Two minutes after the face off Hunter scored the winning goal for Similkameen and after two more minutes play the whistle sounded leaving Similkameen the victors by 5 goals to four. The line up was as follows.

Similkameen position Penticton
G. Lyall Inside Home H. Prentice
C. Keeler Outside Home E. Prentice
H. Hunter 1st home V. Hagerman
H. Etches 2nd home H. Baker
H. Townsend 3rd home H. Robinson
H. Heinbecker centre E. Adamson
C. Henderson 3rd defence W. Raincock
E. Henderson 2nd defence T. Sullivan
C. Wardell 1st defence G. Maybec
F. Horswell cover point H. Hansford
R. Carmichael point A. Robertson
K. C. Brown goal A. McIntosh
Referee, Martin, New Westminster.

There is unrest among the coal miners of the Crows Nest and another strike is feared.

Manager for B.C. Local Agent

Synopsis of Coal Mining Regulations

COAL mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2,500 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.
N.B.-Unauthorized publication of this advertisement will not be paid for.
