HEDLEY RIFLE ASSOCIATION.

Match Shot Off Last Friday Morning—Unfavorable Conditions.

Another rifle match was shot off by the Hedley Rifle Association on Friday last, when eight competitors took part. Two others entered but did not compete, and the rule requiring ten competitors was waived to allow the eight contestants to shoot on the same standing as if there were ten.

There was a little practising before hand, but most of the competitors had done no firing since the last match, several months ago. This will account in a measure for the indifferent scoring. The light was variable and so also was the wind. In fact, the range is, on the whole, a difficult one to shoot on, but nevertheless some faithful practice should witness a great improvement on this.

When conditions become a little more settled here, it is to be hoped that the Association may increase its membership, and more important is it that those who are already members may take a greater interest, both by regular payment of dues and by attendance at the matches.

On this last shoot the medal was competed for on the 200 and 400 yard ranges, and the cup as before went on the aggregate. The winner of the medal this time was E. D. Boeing, who got it on a total of 36 points for the two ranges out of a possible 50, and the cup was retained by L. C. W. Rolls on a total of 54 for three ranges, out of a possible 75.

Below is the score:

	200	300	400	Total
E. D. Boeing	18	16	18	52
T. D. Pickard	14	14	18	46
F. M. Gillespie	11	13	20	44
F. H. French	14	14	12	40
L. C. W. Rolls	15	19	20	54
H. R. Swan	13	20	14	47
J. C. R. Cootes	13	12	13	38
H. D. Barnes	17	16	18	51

Looking Out for Power.

It is learned that the gentlemen who made so thorough an examination of the Nickel Plate, were interesting themselves with the power question to the extent of taking the precaution to stake 1000 inches in Ashnola Creek. This is regarded as a favorable omen, that they have found matters so well to their liking that they are seriously considering ways and means of operating. Of course it was a wise step for them to take in any case, for there are always those who, like good old Capt. Shorts, might consider that "the surest way to success in life is to get in somebody else's road," and who, by anticipating their wants, might feel disposed to head them off by staking this water supply in advance. The staking of this water will hold it for them pending negotiations, and if the Nickel Plate is taken over, a large volume of power may be developed at comparatively light cost and transmitted to Hedley to supply the deficiency which Twenty Mile fails to produce.

During their stay in Hedley, the gentlemen created a favorable impression, and should the deal be consummated the people will look forward to much brighter times.

The Southern Route.

Engineer Amburn, who has been in charge of one of the V. V. & E. survey parties endeavoring to find a more direct route to Hope than that over the Coquihalla, reports satisfactory progress between the Skagit and Cedar Flat, the route being both easy as to grade and probable cost of construction. It had always been thought that the main difficulty in securing a feasible route over the Hope range was the descent of the western slope, but now it seems that the eastern slope is the more doubtful proposition, although the chances are still very good that a favorable route may be secured.

School in the Lower Similkameen.

Mr. W. J. Manery was in town last week, and spoke of the difficulty which they find in procuring a teacher for the assisted school which has been authorized as arranged for by Mr. Shatford some time ago. Temporary quarters had been secured, and as soon as a teacher can be rounded up the school will begin.

THE SIMILKAMEEN RIDING.

How It Looks To Its Representative In the Legislature.

After completing a tour of the Similkameen riding in which almost every settlement was visited, Mr. L. W. Shatford, M.P.P., returned to Hedley about ten days ago. To inquiries regarding the conditions prevailing in various parts of the district, Mr. Shatford replied in a manner to indicate that not only was he a close observer but had taken particular pains to ascertain what causes contributed towards or militated against advancement.

The Similkameen riding is one of the largest in the province, embracing many settlements that are at present very much out of the way, one settlement or group of settlements being so effectively cut off from others by physical barriers that some portions of the riding have very little in common with others.

The riding has a road mileage of something like 550 miles and an additional 200 miles of trails, and to obtain sufficient money from the Government each year to keep all this in order has been no easy task. With so large a mileage to provide for, the representative is made to act as buffer between the government and his constituents, for sums that may appear extortionate to the government when pressed for by a representative, may look very thin to constituents when spread out over so great a mileage of public thoroughfare. In this way the representative is often between the upper and nether millstone, and to justify his position it becomes necessary for him to get his information at first hand by going over the whole of the district to see for himself, for it is he and not the government officials who are entrusted with the expenditure of public money, who will be held responsible by the electors.

Nor is it alone the condition of existing roads that must take up the attention of the representative, for demands for the construction of new roads are always coming to him, and no amount of correspondence can explain the merits or demerits of any particular case like a personal visit. Land hunters in quest of a location look to acreage, quality of land and water supply, first of all, and these conditions secured to their satisfaction they peg out their holdings and put up their buildings before it occurs to them how they are to obtain means of egress and ingress. But soon will come the demand upon the government for a road, and this is a question which the government and the representative must determine on the principle of the greatest good to the greatest number, after the probable cost has been ascertained with a reasonable degree of accuracy. Where the number to be benefitted are few and the cost great, the representative will have an up-hill task with the government, and when he fails to secure it the wrath of the petitioner will await his return.

KETTLE RIVER.

Commencing at the eastern end of the constituency, the road upon which important settlements must depend is that from the mouth of Rock Creek running northerly up the river for ten miles to Westbridge, where the river forks into two streams, that continuing on northward being known as the main Kettle and the stream going northwesterly being termed the West Fork. This ten miles was built during the Semlin-Cotton administration at a cost of about \$12,000. A road was constructed up the main river 30 miles further to Canyon City by the owner of the township up there, who was paid by the Dunsmuir government for the work put on it. This has given good service to the ranchers on the main river, and would stand more expenditure for repairs than the government have been able to give it. The road up the West Fork, however, is the road with a history, but that history is much too long and thrilling to be given in full here. In a few months in the fall of 1900, W. C. Wells, the then Commissioner of Lands and Works, had about \$20,000 spent, which failed to complete the road to Bull Creek, half-way to Beaverdell. Only in the summer season when the river

Concluded on Page Four.

CREDITORS MEETING

Assignee S. L. Smith Meets the Creditors of the Hedley Lumber Company.

The meeting of creditors of the Hedley Lumber Company called by S. L. Smith, assignee, was held on Friday last, when a congregation that for numbers would turn the average parson green with envy, assembled.

J. A. Schubert occupied the chair and brought the meeting to order when the assignee was called on to give the meeting the result of his investigations. This Mr. Smith proceeded to do and did not draw any doleful picture, but pointed out that if the creditors would work in harmony and allow the logs to be saved into lumber there was a fair prospect of everyone getting his account in full. The most pressing matter he claimed was to protect the logs now in the river and prevent them from being swept away with any sudden rise of water. The loggers were asked whether they would be willing to allow any necessary expenditure of this kind to be taken out of the first proceeds from the estate, and all those present except the loggers withdrew for a short time to allow them to talk it over. The conference, however, was unproductive of any good for the majority proved obstinate and insisted upon their pound of flesh. They said that unless they were paid their claims in full, forthwith, they would take steps to force a sale to enable them to realize. While this might strike some of the unsecured creditors as arbitrary, no one could blame them for it. It was to protect themselves that they put on the liens, and not to pursue the matter to the end provided in the statute, would be to throw away any advantage which they possessed under their liens.

The meeting then proceeded to election of inspectors, when all the secured creditors were required to withdraw. The inspectors elected were W. F. Revely, L. W. Shatford and L. G. MacHaffie.

It is understood that the inspectors and the assignee decided to take steps at once for the protection of the logs, and that some of the more available assets were used for that purpose.

A Charming September Wedding

A quiet but very pretty wedding took place on Monday the 17th inst. at the residence of the bride's father, Atherton's Corner, B. C. when Miss Maude Elizabeth, only daughter of Mr. James Bartle, formerly of Hamilton, Ont. was united in marriage to Mr. George Nelson Cochran, contractor, of this town. The ceremony was performed by Rev. R. W. Hibbert at 3:30 o'clock. The drawing-room was tastefully decorated with cut flowers. The bride, daintily gowned in white, and carrying a handsome bouquet of roses, was given away by her father. The groom was supported by Mr. W. T. Atherton. Only the immediate relatives and friends of the bride were present. After the ceremony the wedding party adjourned to the dining room where a sumptuous wedding repast was served. Among the presents to the bride were substantial cheques from her father and Mr. W. T. Atherton. It is the intention of the newly-married couple to reside in Spokane this winter.

Again Practically Assured.

Molson Independent

It is now practically assured that steel will be laid as far as Molson by the 25th of this month. As soon as that is accomplished, it is said on good authority, ballasting will be done this far and the road between here and Midway will be turned over to the company by the contractors. It is said that a train service will at once be instituted this far.

The people of Hedley are very sorry to learn the intention of Mr. W. E. Burritt to leave Hedley for a time. Mrs. Burritt's health has not been very good of late, and, besides, the slowness of the railway in moving in this direction has been trying to those who were waiting for brisker times. Mr. and Mrs. Burritt have made many warm friends in Hedley and all will regret to see them go away, even for a brief spell.

Trees! Trees!

PLANT YOUR TREES IN THE FALL. It stands to reason that a tree planted in the fall becomes settled and ready to grow in the spring, when climatic conditions are suitable. Why plant a tree in the spring that is half dead when planted, through being out of the ground from four to six weeks, besides being over-taxed at the fumigating station, when you can

GET YOUR TREES RIGHT AT HOME

and have them already acclimatized. We have 200,000 trees now ready for planting and guarantee all trees planted in the fall.

We make a specialty of Hedges and now have on hand, ready for shipment this fall, 1,000,000 plants. When hedge is complete under our patent, it will turn all ordinary stock, such as horses, cattle and hogs, and adds beauty to the home.

Our Mr. Curtis will shortly be through the Similkameen Valley. Send your address and he will call on you.

Okanagan Nursery Co'y, Ltd.

EDUCATE THE HEATHEN.

A conference of provincial premiers will be held in Ottawa about the middle of October, when British Columbia will be represented by Premier Richard McBride who may be counted on to put up a good vigorous fight for his province.

While British Columbia more than any other province in the dominion, is deserving of better terms from the federal government, little hope can be entertained of any material advantage resulting to this province from this conference of the premiers at Ottawa.

British Columbia will meet with the consideration which they deserve from the premiers of other provinces who may be bent only on securing for themselves all that they can, regardless of right, is almost too much to hope; but the opportunity to improve the occasion for educative purposes, is one that it is well not to let slip.

For some time past opponents of public ownership and operation of public utilities in Britain have been bewailing the large increase in the sums borrowed by municipalities for local purposes. These sums are described as debts, irrespective of their nature.

Chinese government officials have the reputation of being the greatest grafters in the world, but they had better look to their laurels, now that Preston has hied himself thither.

LOCAL NEWS.

A tidy letter-head or bill-head commands attention from those with whom you do business. The Gazette print-shop can fit you out in style.

A Fairview reader asks whether an order-in-council had not been passed prohibiting the killing of otter for a term of years.

Fred G. White, formerly storekeeper and accountant at the Nickel Plate mine is now in Victoria, having left Ottawa about ten days ago.

Five work horses of the Hedley Lumber Company wandered off on Sunday night, Diligent search was made on Monday, and when evening came without any trace of them, it was thought that they had been driven off and the wires were used to head off the thief.

While in town last week, Mr. H. P. Christie's presence was taken advantage of to exercise his powers as a stipendiary magistrate in a certain case, and as a result all licensed houses have been served with notices with reference to furnishing liquor to the party prohibited.

METEOROLOGICAL.

The following are the readings showing temperature, etc., for the week ending Sept. 15th:

Table showing meteorological data for 'AT THE MINE' from Sep. 9 to 15, including Maximum and Minimum temperatures and Rainfall.

AT THE MILL.

Table showing meteorological data for 'AT THE MILL' from Sep. 9 to 15, including Maximum and Minimum temperatures and Rainfall.

The conviction of Jim Steve for supplying liquor to Charlie Squakim is likely to prove more far-reaching in its effect than was at first supposed.

MARRIED. COCHRANE—BARTLE. At Atherton's Corner on Sept. 17th, by Rev. R. W. Hibbert, George N. Cochrane to Maude E. Bartle, both of Hedley.

COAL

When buying your heater or range for winter be sure and get a coal burner, to ensure comfort and economy.

Town and District.

Mr. Lind, of Peterson Bros. & Lind, went over to Grand Forks last week.

Mrs. Greer, who has been living with her daughter, Mrs. S. L. Smith, left last week for Calgary.

W. F. Revely, agent for the Vermillion Forks Mining Company's coal, gives a good timely hint on the purchase of stoves.

Hans Richter went west this week over the Hope trail, bound for Victoria to take part in the bucking contest. Similkameen dollars will go Hans against the field.

W. C. Brown, barrister, of Ellis & Brown, Vancouver, is in town this week in the interests of the loggers who filed liens against the Hedley Lumber Company's logs.

The good people of Princeton will not thank the Vancouver World for the sensational yarn in which Mrs. Jimmy Anderson is given the credit of being the mother of Princeton.

Thirty years ago, when they laid track by hand, it didn't take three months to lay thirty miles. The modern railway builder has evidently degenerated into a species of summer coon.

Harry and Burns Bowerman left on Tuesday for Kruger Mountain. They intend to take in the fair at Spokane, and will winter on Kruger Mountain where they intend to do considerable work on their claims.

Last week there was a considerable fall of snow in the hills around the Nickel Plate. The effect is quite noticeable in the change of temperature of Hedley's water supply, which hails from that region.

For some time the provincial authorities in Vancouver have been keeping track of Adele LeCharge who has been a resident of Hedley for several months and who is a material witness in the Brothier case. Constable Ewart took her out on Wednesday.

Horace F. Evans, who is well known in his contributions to mining journals, is in town, and will remain for a short time looking over the camp. He is staying at the Hotel Hedley and may take time enough here to devote some attention to the occurrence of deposits in this camp.

Word received from Mr. Hardwick last week stated that Patsy's ailment had been pronounced by the doctors as meningitis. Nothing has been heard within the last few days to show what progress she is making towards recovery. Their many friends in Hedley will welcome favorable news.

M. J. Henry, nurseryman, of Vancouver, talked good horse sense to the Pacific Coast Association of Nurserymen on the subject of advertising. He uses the same horse sense and his wide knowledge of fruit culture in the conduct of his nursery business, and that is of the reasons why he has been so successful in pleasing his customers.

The Greenwood Times gives J. S. McLean as authority for saying on Monday, Sept. 10th, that V. V. & E. track was at McBride's and laying at the rate of a mile a day. The Midway Star quotes Davy McBride as saying on Sept. 12th that track would reach his place some time between the 12th and 15th. Where is that bloomin' track anyway?

Rev. D. F. Smith, B. A., preached his farewell sermon on Sunday evening to a well-filled house, and left on Monday for Princeton. He will preach one more Sunday in Princeton before starting out over the Hope trail for the coast. Mr. Smith has to be in Winnipeg on Oct. 14th, which will be the 25th anniversary of St. Andrew's Church of that city. It is St. Andrew's Church which is sending him as a missionary to India, and to mark their first 25 year milestone they are undertaking the support of a missionary in that field. Mr. Smith will be ordained in Winnipeg, and in proceeding to India will go by way of the the Orkney Islands to visit his mother there.

Miss Eliza Bromley, who is probably the most skillful and fearless cow-girl in the valley, met with an accident last week which fortunately did not result as seriously as it might have done. In their band of horses was an outlaw colt which none of the men folks had succeeded in riding, and by common consent they all declined tackling it any further, but Miss Bromley determined to try it. After the beast failed to dislodge her, it dropped suddenly and started to roll over. In this way it caught her before she could get clear of it. A few rather severe bruises were sustained, but no serious injuries resulted from the little adventure.

Mr. and Mrs. J. J. Marks have taken up house in town. They have leased a house on the East side of the creek.

Government Agent Hugh Hunter was in town last week in conference with Mr Christie on assessment matters.

Several car loads of V. V. & E. construction material have arrived at Cloverdale to begin construction at the west end.

The assighee and inspectors of the Hedley Lumber Co. have let a contract to Harry Swan and Frank Logsdon for cribbing to protect the logs in the river.

Greenwood papers seem confident that the Midway and Vernon is to move. No details, however, are given out as to who the capitalists are who are investigating the proposition.

V. V. & E. Engineer Amburn with his wife and children came down from Princeton on Tuesday, and took the stage out on Wednesday morning to connect with Royer's stage at Keremeos for Midway. Mr Amburn is going to Oregon and expects to be absent for a few months.

Mr. and Mrs. Emil F. Voigt, of Voigt's Camp were in town Monday. Mr. Voigt's disappointment at the delay in railway construction is very marked, and like others he is wholly at a loss to see the reason for it.

Mr. H. P. Christie, S. M. land commissioner at Ashcroft, was in town last week examining into assessment with a view to equalization. The work being done by him in this connection is almost analogous with that performed by the county valuator in the eastern provinces, where in order to put all municipalities in a county on an equal basis for the purpose of levying the county tax, it was found advisable to have the one board of valuator appraise the assessment value of all. In his valuation on this trip it is understood that Mr Christie took cognizance of business conditions and deferred any radical changes in the way of increase of assessment until actual movement in real estate establish higher values.

GIBBON and McDONALD Proprietors

Quality in Clothing

When purchasing a suit of clothes, the most important point to be considered is the "quality" of the material used and the care taken in its manufacture.

Campbell's Clothing

This brand is acknowledged by all dealers to be the best on the market, and in offering it to the public we have every confidence in its reliability. Made in all the latest styles and of first-class material. See our stock of ready-mades—or let us show you samples, and have your suit made to measure.
