MORE MACHINERY ARRIVING
New Engine to Drive the Large Dynamo
Now at Hand

During the past week another consignment of new machinery for the Hedley Gold Mining Co. came to hand the most important part of it being the new compound condensing Corliss engine which in the auxiliary steam plant is to furnish all the motive power outside the supplying of compressed air for the drills at the mine, that being furnished by the big air compressor installed last spring and utilizing either steam or water or both.

This new engine, however, will only work with steam and during the time that water power is available its work will be done by a separate water wheel which is yet to come. The engine now here is a 21x30 compound condensing Corliss engine, built by the Goldie & McCulloch people of Galt, Ont. It will be required to drive the electric trolley line at the mine, and furnish juice for all the various electric motors in the mill including the stamps, yanners, crushers, tube mill, Deister tables, filter presses, classifiers, pumps etc.

It is a machine with ample reserve power and capable of the highest degree of efficiency for long periods without a moment's cessation. The bed plate of it alone weighs about ten tons. It is to be placed at the south end of the power house along side the generator it is to drive and connected with it direct, while the water wheel which is to relieve it will be placed at the other side of the generator.

The water wheel will not be here for some time yet as the manufacturers were held up by a moulder's strike and will not be able to ship before the 6th of Sept. which will leave it pretty late in the fall before it can get here to be installed. The generator has also been later in coming than was counted on but will likely be here before the water wheel. Meanwhile the cement foundations for both of them are being made ready for them.

THE C. P. R.'s PROTEST

What May Result if Railway Commission Sustains the Objection.

The Nicola Valley News is entering the field of railway prophesy and in a recent issue appeared:

"The Canadian Northern Railway will come south from Kamloops through the Nicola country and on over the Hope into Vancouver," declared one well known railroad man in conversation with the News at Vancouver yesterday. And recent developments seem to confirm him for indications now point very strongly towards the adoption of the Nicola route.

The Canadian Pacific Railway has made formal objections to the Thompson and Fraser route for the Canadian Northern on the ground that there is not room for two lines in different parts of the canyon. The matter has been sent before the railway commission and it is the popular opinion that the latter will sustain the objection and force the Canadian Northern to abandon the route. An engineer from the commission is now conducting an investigation.

And this is just what the Canadian Northern has sought for some time. They are pledged to follow the Thompson and Fraser route and they cannot abandon the route without breaking faith.

Canadian Northern engineers from England, who are financially interested in the project went over the proposed route a short time ago and on their return to the old country entered a vigorous protest against the Thompson and Fraser route condemning it as absurd.

Contracts have been awarded for those portions of the line up as far as Hope and down the North Thompson as far as Kamloops leaving a gap with two alternative routes. But there was no plausible means of escaping the Thompson route.

The local route is nearly forty miles shorter than the Thompson route and one of the aims of the Canadian Northern in taking it is to block the Grand Trunk Pacific.

DEAL ON FOR KINGSTON

Property is Bonded to Redeemable Trust Co., of Boston

MEANS MUCH FOR HEDLEY

Three Claims of Group Have Excellent Showings on Each—Lots of Pay Ore Now on Dumps

After a long wait the people of Hedley learn with much satisfaction that the Kingston mine in this camp is at last to be given a chance to join the list of producers.

A telegram was received yesterday by A. Creelman representing the Redeemable Trust Co., that a bond had been taken by his company on the Hedley properties of the Kingston Gold and Copper Mining Co. owning the Kingston, Warhorse, Metropolitan and Grand View mineral claims and that arrangements were being made to begin extensive exploratory work to open up the properties.

The consideration and the other conditions of the bond are not known even to Mr. Creelman, all the arrangements in connection with the bond having been made at a conference held in Boston between the Redeemable Trust Co. and representatives of the Kingston Co. who had gone down to Boston from Quebec which is the headquarters of the Kingston Co.

The Kingston Gold and Copper Mining Co. of which W. A. Marsh of Quebec is president, own the above mentioned claims on the steep mountain side overlooking Hedley and in plain view from Hedley streets. On the various properties of the group a great deal of development has been done and considerable high grade ore was encountered leaving ore dumps on various parts of the group the value of which will possibly exceed \$10,000 (indeed one small dump of \$100 ore was conservatively estimated to go \$4000). The wonder has always been that a property of such exceptionally good showing (for the ore is not confined to a few spots but is widely distributed) should have been allowed to remain idle a single day after the railway reached the town, for all the development was done before the railway was built up the valley. A disorganized condition of the company and the fact that the heaviest stockholders were not mining men is the only explanation that can be given.

INTEREST IN GOLF INCREASES

Anyone who saw the turnout for golf on Saturday could have little difficulty in deciding that the game had caught on in Hedley. On that occasion there were players enough out to man five sets of foursomes, or rather, four sets of foursomes and one threesome, one of the gentlemen who had been drawn failing to turn out.

The principal feature of the day's play, however, apart from the fine turnout was the general improvement in the play as all the scores were better than on any previous trial of mixed foursomes.

The best score made during the day was that made by C. E. Oliver and Miss Emily Jackson in the last set which finished out, their opponents being S. E. Hamilton and Mrs. Jamieson, and the scores after deduction of handicaps being 29 to 39. The second honors went to A. Megraw and Miss Fraser who had for their opponents H. A. Hincks and Miss Myrtle McLean scores after deduction of handicaps 32 to 40. The winners of third were G. H. Whiteman and Miss Williams who beat M. Hetrick and Miss Bond, scores after deduction of handicaps, 33 to 43. In the fourth set L. C. Rolls and Mrs. Gillespie beat Homer McLean and Mrs. Rotherham, score after deduction of handicaps, 34 to 43. In the threesome Mrs. Mamilton played against F. H. French and Mrs. Jones and was allowed double her handicap; scores, Mrs. Hamilton 43 and opponents 43.

COBDENITES WATCH CANADA.

Punch Pokes Fun at Idea of Canada's Premier Making Header for Free Trade

London, August 24.—Sir Wilfrid Laurier's tour in Western Canada continues to attract attention in political circles in Great Britain. The free trade party, in particular, is making all the capital it can from the demand of the western farmers for a change in the tariff system. Free trade journals affect to regard the movement as the awakening of Canada to what has been called by protectionists the blessings of unrestricted imports.

The secretary of the free trade union, who was recently in the Dominion, in an interview says that the high tariff cause in Canada is losing adherents every day. He adds that protection is the secret of the disease in the purchasing power of the masses, and that the masses are beginning to realize the fact.

Even the "only serious paper in Great Britain"—Punch—has a pleasant jibe at the Canadian premier. It represents him as a moth flitting over the wheat fields of Western Canada while the free trade star sheds its light upon him. Sir Wilfrid is remarking "Well, after all, it is a long way off; there is no risk of singeing my wings just yet." The cartoon is entitled, "The Desire of the Moth for the Star."

A NOTED ORCHARD

The Old Okanagan, Smith Place Pleases the Oroville Gazette

An example of what even a shamefully neglected fruit orchard in the Okanagan or Similkameen can do is seen in the case of the old Okanagan Smith place on Osoyoos Lake which a few years ago was allowed to run wild year after year, but is now responding to the better care being given it by the Bowerman Brothers. The Oroville Gazette has the following to say concerning a visit paid to it.

"The orchard is a part of an Indian allotment, and is leased by the government for the benefit of the single living heir, now a young girl. The present lessees are George and Harry Bowerman, and it was through the courtesy of Mr. Geo. Bowerman that the writer had an opportunity to inspect the orchard recently. After seeing it he urges every resident of Oroville who can do so to do likewise. It will be a revelation. The orchard is indisputable evidence of the richness of the soil. Here is an orchard that has performed the function of production for nearly 50 years. The boles of those trees are of mighty girth. The enormous branches extend upward and outward like a monarch of the forest, and just now bend low beneath a burden of the choicest fruit. It is a wonderful sight, and this orchard in itself is convincing proof that for fruit growing there is no locality that can surpass the land immediately surrounding Oroville. It is easy to suppose that with the indolence and indifference of the early pioneer, and no other help than that that could be obtained from the Indian hangers on, who have no reputation for industry, this orchard had little attention in the early years of its growth, and has been sadly neglected in more recent years by those leasing the land. Yet in spite of this indifferent attention in the past, which has been supplanted by intelligent care and attention under the present lease, no orchard could look to be in a more flourishing state, and certainly could not be a more fruitful producer. Off of one tree alone Mr. Bowerman picked two ton of apples this month, and there are others that look as though they would yield an equal amount. The fruit consists of apples and pears, and Smith selected a good variety, there being the Blue Parnasin, Spitzenburg, Yellow Bellflower, Twenty-ounce Pippin and other well-known commercial apples."

Fort Frances, Ont., is to have a large pulp and paper industry as the result of the policy of the Whitney government in insisting that all the pulp taken off government lands in that province be manufactured into paper in the province.

EDITORIAL COMMENTS

It is a mournful as well as humili-
ating fact that loud as we have all
been talking of conservation the des-
truction of forest areas by fire goes
on without abatement. It is true the
present has been a particularly dry
summer over a considerable portion of
the continent, but there have been
other seasons quite as dry that were
not attended with the appalling des-
truction of life and property that have
marked this year, and yet we had
scarcely got through talking of the
Washington joint conference on con-
servation and the beneficent results
which were to follow when the Idaho
and Montana fires broke out and were
allowed to pass beyond all control.
The intention of the government of
both countries was wise, laudable
and sincere, but the measures adopt-
ed to secure their end appear to have
been rather ineffective. Thus far (with
the exception of the Fernie disaster
of three years ago) British Columbia
has escaped serious harm but it is well
known that the machinery for fire
fighting is far short of what it should
be. A chief fire warden for the pro-
vince has been appointed and already
he has made reports on the fires that
have occurred and has estimated the
amount of loss occasioned, but while
that information is desirable it should
be considered of secondary importance
to that of seeing that every effort is
made to prevent fires, deal summarily
with those who are responsible for
setting them and take the most effec-
tive method of extinguishing them
after they have been set. Absolute
attention to detail is what is required
until organization has been perfected,
and it is of more importance that the
chief warden should see that his local
wardens are capable and doing their
duty than that he should spend his
time with clerical work. Men who are
put on to fight fire should be looked
after both to see that they do their
work and that they are provided with
such food and shelter as may enable
them to do their work as it should be
done. Their employment can be only
temporary and it is absurd to expect
them to work for the same pay as a
man on a steady job or without pro-
vision being made for his food. In
some states their fire laws make pro-
vision for compelling men to go out
and fight fire when notified the warden
to do so. This is a delicate point in
that it would seem to interfere with
the individual rights of the citizen,
and if wardens are granted such pow-
ers it is necessary that they be men
who can be trusted with such powers.
There are many things to be attended
to before our fire fighting machinery
is made as effective as it should be
and the sooner the government sets
about making it so the better for
everybody.

Water Notice

NOTICE is hereby given that an applica-
tion will be made under Part V of the "Water
Act, 1908," to obtain a license in the Similka-
meen Division of Yale District.

(a) The name, address and occupation of the
applicant, E. L. STEVES, Rock Creek, contrac-
tor.

(b) The name of the lake, stream or source
of water, the description of Lost Horse
Creek, Kettle River.

(c) The point of diversion about 30 chains
from the confluence of Lost Horse Creek with
the Kettle River.

(d) The quantity of water applied for (in
cubic feet per second) 2 cubic feet.

(e) The character of the proposed works,
dam and ditch.

(f) The premises on which the water is to be
used (describe same) Lot 1071s containing 120
acres.

(g) The purposes for which the water is to
be used Domestic and Agricultural.

(h) If for irrigation describe the land intend-
ed to be irrigated, giving acreage 120 acres.

(i) Area of Crown land intended to be oc-
cupied by the proposed works—none.

(k) This notice was posted on the 16th day
of Aug. 1910 and application will be made to
the Commissioner on the 16th day of Sept., 1910.

(l) Give the names and addresses of any
riparian proprietors or licensees who or whose
lands are to be affected by the proposed
works, either above or below the outlet.

ADVERTISE IN THE GAZETTE!

Town and District.

A. F. Rankin has taken an interest with G. M. Gemmill in the drug business in Merritt.

Archie Aberdeen has returned from the Similkameen where he has been doing assessment work.—Ledger.

John Lind left for Spokane on Wednesday of last week with his family. His house has been taken by H. H. Messenger.

J. A. Schubert left for Nelson on Friday last to meet Sir Wilfrid Laurier and hear him speak at Monday night's meeting.

Mrs. E. D. Boeing and her little daughter Lois returned last week from a three weeks visit to Mr. and Mrs. Bowerman at Osoyoos Lake.

Mr. Rolis was awarded the selling rights on the grounds for Sept. 5th and 6th. He is making preparations to keep the public well supplied at all points.

The Ladies' Hospital Auxiliary will meet in the Union hall on Friday, 2nd inst., at 2.30 p. m. for the regular monthly meeting. All members are requested to attend.

For the convenience of some of the shooters from the outside it has been decided to hold the trap shoot for the Shatford cup on the afternoon of the first day's sports.

Constable Ewart was at Princeton last week and reports bad fires in the vicinity of Otter flat. The Italian Motia who was stabbed at No. 2 camp the week before is still in a dangerous condition.

S. L. Smith, accountant for the Hedley Gold Mining Co., was called to Spokane on Thursday of last week because of the serious illness of Mrs. Smith who went there for treatment some weeks ago.

Placer mining is being carried on between Oroville and Nighthawk on the lower Similkameen, by the Golden Sands Mining Co. who are using an electric pump to wash the gravel through the sluice boxes.

Mrs. Thain, Hedley's new teacher, arrived on Friday last and school reopened on Monday with a larger roll of pupils than have ever attended before, as there were several additions to the school population during the holidays.

It does not look as if Hedley is likely to have any ball team competing for the baseball prize, but it is reported that Princeton will try conclusions with Oroville and are likely to put up a stiff game as they have secured the services of Tommy Daly as pitcher and Charlie Armstrong for either first or second base. If they have a catcher able to handle Tommy's delivery they should be able to put up a tidy game.

Mr. Herbert Hogg, of Vancouver B. C., inspector of agencies for the Columbia Fire Insurance Company, was in town last week in the interests of his company. The Columbia is a non-board company and has on its board of directors some of the leading business men of Vancouver among whom may be mentioned E. H. Heaps, R. P. McLennan, of the firm of McLennan, McFeely & Co. and S. H. Reid of the law firm of Bowser, Reid and Wallbridge. These men do not believe in insurance monopoly and resent the dictation of the underwriters hence their revolt and their connection with strong non-board concerns like the Columbia and the Hudson Bay.

The Harold Nelson company drew a very good house on Thursday night of last week when they presented "Pierre of the Plains" in which the leading role of Pierre is taken by Harold Nelson himself. Those who have revelled in the delightful pen pictures of life on the great plains as depicted by Sir Gilbert Parker in his two books "Pierre and His People" and "A Romany of the Snows" could not fail to have been delighted with the interpretation given to the character "Pierre" whose impersonation at the hands of this actor was superb. To those who look to lighter melodrama or Vaudeville to be amused and are not disposed to appreciate the literary value of a piece of that kind, it may have been in some respects disappointing, but to an admirer of Parker's western stories it furnished an excellent evening's entertainment. It was a piece in which to test the genius and the versatility of an actor, and very few of those who can make a tolerable success of more or less difficult roles in modern melodrama could have attempted it at all. It must have been difficult to dramatise and still more difficult to stage. The part "Jen Galbraith" taken by Miss Grace Johnson while not in many respects as showy as the female parts in which actresses are asked to star was nevertheless a faithful interpretation of the "Jen" which Parker has given us.

SALE COMMENCES MONDAY, AUGUST 22nd

SHATFORD'S LTD.

L. C. Rolis has offered a prize of a handsome leather-backed score book to the lady who stands highest on a ladder competition to be completed by the 30th of September. As there are now about a dozen ladies here who are playing golf, the present competition should heighten the interest among them and result in some good faithful practice during the coming month, which is the ideal time of the year for golf.

Penticton carried two by-laws last week that will have an important bearing on the town's prosperity. One was to grant to the Kettle Valley railroad fore shore site for station grounds and docks and the other was to purchase an irrigation and domestic water supply system for the town. Both were carried almost unanimously. With such a spirit of unanimity and progressiveness Penticton's outlook is indeed bright.

A tiny diminutive envelope inclosing a card marked "Mr. and Mrs. Isaac Lincoln Merrill" and underneath the name line, another, "Isaac Lincoln Merrill Jr." and at the bottom the date "August the twentieth," was received by the Gazette this week. At first ye editor was mystified but by and by the light dawned. The envelope was post-stamped at Camden, Maine. Thus I. L. Jr., the future golfer, is a down east Maine Yankee, and the Gazette hopes he will be as ardent a devotee of the game as his father. To Mr. and Mrs. Merrill the Gazette extends congratulations.

The Great Northern evidently came to see the folly of their increased freight schedule from this camp which put forward a rate almost doubling the cost of shipping out concentrates and have now agreed to restore the old rate. Had they not done so it is practically a foregone conclusion that they would have lost all that trade, for otherwise arrangements would have been made forthwith to treat the concentrates locally. It is fortunate, however, that the old rate has been restored as it will leave the Hedley Gold Mining Co. free to push on their improvements in other directions, without having to undertake the making of provision for local treatment of the concentrates at a time when they have so many other things to engage all their attention. They are at present giving the railway company a good volume of business in hauling in machinery without having an imposition of additional burdens laid on them in the matter of immediate disposal of the concentrates. It is important also for the camp that the Ry. Co. have come to see the mistake of killing for themselves the goose that was laying the golden eggs, for it would lessen the inducement on the part of capital to take hold of other property and it is to the interests of the railway at the present time to give all the encouragement they can instead of strangling enterprise by imposing unwise and unnecessary burdens.

The Wheat crop already harvested in the three prairie provinces has been conservatively placed at over one hundred million bushels. This is not bad for a failure.

THE KEREMEOS PAGE

KEREMEOS, the Centre of Lower Similkameen---Famed for Fruit Growing

Town and Lower Valley.

J. R. Shaw left on Monday on a business trip to the Kootenay.

W. H. Armstrong and a large party from the coast will arrive in Keremeos next week.

At Keeler's Dining Room, you can get a good meal for 35 cents, or a meat ticket good for 21 meals, for \$6.50.

Miss McMullen, who has been spending her vacation with friends at Vernon and Nelson, re-opened school here on Monday. There was a good attendance of scholars.

Porter Gibson leaves on Thursday for Regina going by way of Pentiction and the C. P. R. We regret that circumstances are such as to render it necessary for Mr. Gibson to leave the valley.

Mr. Kinney, of Butte, Montana, is spending a week in Keremeos awaiting the return of his brother, Rev. G. B. Kinney, whom he came over to visit. Rev. Mr. Kinney has wired to say that he will be back on Saturday, and though no announcement is made it is expected that Methodist service will be held in the church on Sunday, morning and evening.

A blind man and his daughter were in town last week. It appears that the old gentleman has recently come out from Ireland in search of a brother who was supposed to be living at Nelson but had moved to Midway. In going from Nelson to Midway they had taken the wrong route going around by Revelstoke and the Okanagan to Pentiction and from there to Keremeos by stage.

A pest, which the ranchers in the lower valley will have to wage war against, has made its appearance in flocks of small birds, somewhat resembling black birds in color and size, which attacks the apples as they begin to color in the orchards. Last week we had occasion to visit the ranch of R. J. Armstrong in the lower valley and saw in his orchard a splendid crop of fine apples almost totally ruined by these destructive birds. They attack the late winter apples quite as much as the earlier varieties. Near Keremeos where the country is divided into smaller holdings and more densely populated the birds have not done any appreciable damage though an occasional apple bearing their trade mark may be found.

Ashmola John was in town on Tuesday and accompanied by another Swash was given a ride in Armstrong's motor car, their curiosity getting the better of their natural mistrust of the halo horse vehicle. Old John was a noted brave in his younger days and despite the many winters that have left their hoarfrost on his raven locks, is still considered pretty "skookum" but before he finished with his auto ride the starch was knocked clean out of him and the manner in which he gripped his companion with one hand and the seat of the car with the other indicated pretty clearly that he would much prefer riding a bucking cayuse. Our knowledge of Chinook did not enable us to understand all that the venerable chief said in describing his experience but to illustrate his feelings he rattled his knees together in a manner that was very eloquent.

Attached to Saturday's train was a special car carrying a party of six prominent G. N. Railway officials including the heads of several departments of the western division. On the return trip from Princeton the train was held here long enough to enable the party to drive out and visit a number of fruit lots; sample the fruits and secure direct and accurate knowledge of the development that has been going on here during the past few years. Several of the party had visited the district, two or three years ago and were greatly impressed at the change since then; the quantity of fruit already produced and its exceedingly fine quality. They ate all they could, pocketed more and expressed an intention of securing portions of land in a district that could produce such luscious fruit. Apart from the sale of several fruit lots, which will result, their visit will prove a benefit to the district inasmuch as they are all men whose recommendations will carry weight and they were made to realize as they never had before, the importance of getting this valley linked up with the coast and providing an outlet for its extensive and varied products.

F. Schneider returned last week from a brief trip to Vancouver accompanied by two gentlemen who were looking for improved fruit lots and who made some tempting offers for properties around Keremeos which caught their fancy. The owners, however, were not anxious to sell and they left without effecting a purchase. They were greatly taken with the valley throughout and expressed their determination on leaving to return again and invest.

Having decided to return east the undersigned will offer for sale the following list of stock and effects. 1 brown mare with foal at side (Clyde) 1 good cow due to calve in October, 1 heifer calf, 3 months old; 45 Pure bred barred rock hens, 50 pure bred barred rock chickens, 1 heavy wagon gear suitable for 1 horse, 1 set team harness, 1 Peerless Incubator and brooder, nearly new; 1 Wheelbarrow new; 1 scythe, cross-cut saw, shovels, hoes and a number of tools, 1 ton of good oats, 2 water barrels, wash tubs, Dairy utensils including milk pails, cans, churn, 8 gal bowl and print, 1 grand Jewel coal or wood stove together with pipes, kettles and pans, 1 new wash boiler, 1 glass front cupboard, 1 extension table 8 feet, new; 1 standard sewing machine, nearly new, 8 kitchen chairs, 2 rockers, 1 iron bed spring and mattress, 4 1/2 ft.; 2 iron bed spring, 3 1/2 ft.; 4 yds inlaid linoleum, 2 yds wide, A quantity of dishes, jars and crocks. John Breadner, Lot 19, Sub-division 457.

TRAGEDY NEAR MERRIT

Nicola Cowboy Stabs an Indian and Then Kills Himself

Merritt, B. C., Aug. 20.—Bob Patten, one of the best-known cowboys in the district, butchered an Indian with a knife and then killed himself with a revolver. The tragedy occurred near the reservation at Quilchena and the police are now investigating. Shuppion, the Indian, will likely die as he is terribly lacerated about the abdomen. A drunken brawl was the cause of the trouble that resulted so fatally. Patten pulled a knife and after committing the crime did away with himself, apparently under the impression that his quarry was dead.

GENERAL NEWS

The salmon run on the Fraser has proven disappointing thus far.

While Idaho was being devastated by a forest fire Montana had a snow-fall.

County Court of Yale

SITTINGS of the County Court of Yale will be held as follows, viz: At Fraternity Hall, Hadley, on Thursday 13th day of October 1910; and at the Court House, Princeton, Saturday 15th day of October, 1910, at the hour of eleven o'clock in the forenoon of each day.

NOTICE TO DELINQUENT CO-OWNERS.

To H. F. Cleland or to any person or persons to whom he may have transferred his interest in the Bohlin and Spahr Fraction mineral claims situate at Chilly on Keremeos Creek in the Osoyoos Mining Division of Yale District.

You are hereby notified that I have expended two hundred and five dollars in labor and improvements on the above mentioned claims in order to hold the said claims under the provisions of the Mineral Act, the said labor being done for the year ending 15th of August, 1910, and if within 30 days from the date of this notice, you fail or refuse to contribute your proportion of such expenditures together with all costs of advertising, your interest in said mineral claims will be the property of the undersigned under Section 1 of Mineral Act Amendment Act 1909.

Dated this 25th day of August, 1910.
