

Expert to Study Irrigation Conditions Here

Gathering Information for Purposes of New Irrigation Act

At the instance of Hon. W. R. Ross, Minister of Lands, H. W. Grunsky, an expert from the United States Department of Agriculture has been visiting the Okanagan Valley with a view to solving some of the knotty problems connected with irrigation matters. Mr. Grunsky arrived in Kelowna on the 4th, leaving for down the valley on the 6th., but will return on the 10th. He is anxious to meet all persons who are interested in the formation of irrigation districts. In an interview with the representatives of the Record Mr. Grunsky explained his visit as follows:

"I have been detailed by the Hon. W. R. Ross, Minister of Lands to make a study of conditions in this valley with special reference to passage of a public irrigation corporation bill at the coming sessions of the provincial parliament.

"The object of such a law is to enable the farmers to organize and own and operate their own water-supply systems. A similar bill was introduced by Minister Ross at the last session of the legislature, but in order to have it meet with the fullest possible discussion and criticism its final passage was deferred for a year."

"This bill took middle ground on the question of how far the government should go in aid of irrigation enterprises. While the government is not called upon to lend, either its money or its credit outright; it assists the farmers in getting organized and it makes those preliminary surveys and investigations which are so difficult for individuals to undertake, and yet which are so necessary to have in forming an intelligent opinion of the feasibility of any project.

"It is likely that such a law will give a great impetus to irrigated agriculture and will benefit the whole province inasmuch as it will make possible a closer cooperation among water-users."

Items from Ellison

(From our own Correspondent.)

Now that haying is over once more, we can take a look around and observe what is being done in the district. We note with great surprise that one of our well known ranchers had the unique, if doubtful, honor of being able to cut two crops of timothy from the same land in one week, it wasn't the excellence of the land, that did it, although it is of the finest, but owing to the hired man having set the cutter in the mower too high. Perhaps a course of lessons on farming and farm implements from a correspondent school would obviate such mistakes in future, what do you think J.?

One well known man broke a section out of his mower knife and as he failed to notice it, a long thin line of grass kept on waving in the breeze, mutely betraying the want of observation by the operator. A cow bell attached to the mower is a wonderful antidote for sleepiness. Try one next year G.—

A harvest home celebration was kept at Mr. M. Hereron's on Tuesday night last when a number of friends gathered together to enjoy the hospitality of Mr. and Mrs. M. Hereron. A very pleasant evening was spent by the guests and the hope was expressed that this would not be the last of such functions.

LACROSSE

The local lacrosse team meet the Armstrong team again this afternoon at Boyce's field in another Okanagan League fixture. The game will be called sharp at 4 o'clock and from present indications will be one of the best exhibitions of the national game to be played in the interior this year. There is a splendid brand of lacrosse being played by the league this year and each team are putting up hard fights to gain possession of the valuable cups which are emblematic of the league championship. Armstrong met defeat at the hands of the local team on their last visit to the Orchard City and they are coming determined to "get back" at the Kelowna boys, while the Kelowna boys are just as determined to add another victory to their already good-sized string.

Valuable Polo Pony Burned To Death In Stable Fire

BRIGADE RECEIVED EARLY SUNDAY MORNING CALL

A fire broke out on Sunday morning in a stable belonging to Mr. L. Holman, on Richter Street, which entailed the entire loss of the building and also a valuable polo pony, the property of Mr. H. G. Pangman, manager of the Bank of Commerce. No cause of the outbreak is definitely known but the hour of seven o'clock indicates that some person may have taken shelter there during the wet weather of the previous night and been careless in the disposal of matches, etc., on quitting the premises.

The alarm was turned in by telephone on the intimation of Mr. J. McMillan who aroused Mr. A. Edwards. The door being locked, the latter brought an axe, and cut a hole in the side of the building in an attempt to save the horse, but was prevented from making further progress by a rush of flames from within. In the meantime a hose reel arrived from the fire station but owing to there being no teams about at that hour it had to be pulled by hand; consequently the flames had secured a good hold before the water could be turned on. Mr. P. Brooke's Livery stable turned out a team as promptly as possible, but it was hitched up to a vehicle too light to propel the second hose reel and by the time it was transferred to a stronger vehicle, a car had arrived and undertook to act as transport. Some of the firemen who reside some distance away, arrived late at the station owing partly to the undecided nature of the syren which first gave the alarm. These boarded the car which sped away along Eli Avenue and Richter Street to the scene of the fire, but it was evident on arrival that the building could not be saved so the brigade confined their efforts to putting out the smoking and charred remains of the building, the walls of which were packed with saw dust. When the smoke and steam had been subdued the scorched and shrivelled body of the unfortunate horse was visible in what had been the centre of three single stalls. Its struggles and terror must have been pitiable in the extreme, for it had evidently turned round in the stall, probably after the halter shank had been burned through.

BAND CONCERT

Following is the program for tomorrow night's band concert at the city park:

- March "Hamlin Rifles" Hall
- Overture "The Beautiful Princess"
- Caprice, "Espagnol" Tuppe
- Waltz "Euseno Seducer" Rosa
- Humoreske No. 7 Dvorak
- Dance Parisienne "Scattering of the Roses" Heger
- Selection from "Firefly" Prime
- March "Invincible Eagle" Sousa

GOD SAVE THE KING
N. BORNHOLDT, Conductor

The Sunshine Club of the junior Bible class of Whelan Methodist church (in the Ellison school district) have undertaken to provide funds to build a driving shed and for this purpose are holding an ice cream and raspberry social at the church grounds on Thursday evening, Aug. 7th.

The Aquatic Association has made arrangements for the hiring of a number of costumes suitable for the carnival on the second night of the Regatta, i.e. Thursday next, and these may be hired at Crawford's store.

Mr. T. Morrison and family left on Tuesday afternoon for a brief visit to Harrison Hot Springs. They traveled by auto as far as Ashcroft from which point the will continue their journey by rail.

Births

- BENMORE—On Monday, Aug. 4th, to the wife of Geo. C. Benmore, a son.
- MEIKLE—On Tuesday, Aug. 5th, to the wife of Geo. Meikle, a son.
- MEUGENS—On Saturday, July 26th, to the wife of A. L. Meugens, a son.

COUNCIL GRANTS LOAN TO BUILD MATERNITY WING TO HOSPITAL

PROPOSED ADDITION WILL COST \$8,000 TO \$10,000. LOCAL CONCERN AND AID TO OUTSIDE INDUSTRIES.

The council met Friday last with a full attendance.

The principal matter under consideration was a request from the Kelowna Hospital Society for a loan of \$4,000 from the city's sinking fund towards the cost of erecting a new maternity wing.

Ald. Sutherland explained that the Hospital Society had found it necessary to proceed with the extension, which would cost between eight and ten thousand dollars. The provincial government would stand one-half of the expense and had undertaken to give one dollar for every dollar raised locally. In some cities, continued Ald. Sutherland, debentures had been floated to provide the necessary funds to put up hospitals, but the local society was not asking for anything of the kind. They simply wanted a straight loan with good security. The hospital had assets amounting to some thing like \$30,000.

It was mentioned in discussion that the city still had power to loan out of its sinking fund, although it was quite probable that that privilege would soon be removed by an amendment of the act as the municipal commission had reported very strongly against the practise.

A resolution was eventually passed, that a five-year loan of \$4,000 be made to the Hospital Society at 8 per cent.

A letter was read from Mr. Geo. L. Allan, president of the Kelowna Growers' Exchange, in reference to the recent application from a Spokane firm for assistance from the city in establishing a cider and vinegar factory in Kelowna. Mr. Allan pointed out that associations such as the Growers' Exchange, incorporated under the Agricultural Associations Act, were expressly empowered to employ money loaned by the government for the purpose of setting up factories to deal with the bye products of the fruit industry. Ranchers in other districts and especially in the state of Idaho, had found that such factories, run on co-operative lines, had done much to make fruit growing more profitable, and it was hoped that in the near future the Kelowna Growers' Exchange might do something to realize profits from a similar source for the growers in the district. The question of dealing with by-products was at present under consideration and would be investigated more thoroughly when the busy season was over.

The directors, concluded the letter, had no desire to discourage competition but wished to lay the above facts before the council.

The fire brigade sent a request that the fire hydrants of the city should be tested at least once a month. Ald.

Calder was asked to see that this was done.

The election of a delegate to the Irrigation Convention at Lethbridge was discussed and it was decided to authorize Dr. Dickson, who was also going for the Board of Trade, to represent the council.

The clerk was instructed to send a telegram to the secretary of the Irrigation Association conveying the council's best wishes for a successful convention.

Mayor Jones made reference to the visit last week of Superintendent McKay of the C.P.R., and his request that the city make provision for lighting the car wharf and tracks at night so that the men could see to handle the cars after dark. The company had promised to supply all poles needed. Mr. McKay had said that his company were determined to have the service satisfactory this year and were making arrangements to supply all the refrigerator cars needed for the fruit shipments. They wanted the various cities to co-operate with them as far as possible in the matter.

Ald. Sutherland mentioned that during a recent visit to Kamloops he had made enquiry into the cost of the cluster lights which had been installed in the main streets there. Several people were advocating these for Kelowna. He found that 157 of these lamp standards had been put in at a cost of \$24,000 or \$153 each, complete and installed.

- The Finance committee recommended payment of the following accounts:—
- K. Schmidt, work on pole line \$ 6.00
 - Palmer & Rogerson, park and street acct., for July 100.55
 - Chas. Stewart, work on streets 69.00
 - H. A. Maidment, work on street 78.00
 - F. Swanson, work on street 108.00
 - J. Tarvis, work on street 54.00
 - G. H. Dunn, petty cash for July as per vouchers 41.40
 - H. P. Horrocks, supplies for police department 66.50
 - C.P.R., freight 373.01
 - G. Whelan, W 10 ft. of lot 1, block 8, map 431 424.00
 - Kelowna Land & Orchard Co. W. 10 ft. of blocks 22 & 24 map 186 530.00
 - F. Allen, sewer work 3.00
 - G. McPhee, sewer work 59.80
 - G. H. Dunn, city clerk, salary 150.00
 - D. N. Boyle, clerk, salary 90.00
 - W. H. Rennie, clerk, salary 80.00
 - P. T. Dunn, assessor & collector 100.00
 - R. Sutherland, Chief constable 125.00
 - G. Mackay, Night constable 85.00
 - J. A. Bigger, building inspector 15.00
 - A. R. Davey, scavenger 166.66
 - G. F. Teal, waterworks con. 100.00
 - Dr. H.L.A. Keller, office rent 35.00
 - Morrison-Thompson Hardware Co. June supplies 405.35

NEW EXHIBITION BUILDING CONTRACT LET

FINE MODERN STRUCTURE WILL BE READY FOR THIS YEAR'S FALL FAIR.

The contract for the new Agricultural and Trades Association exhibition building has been let to Mr. H. M. Raymer, and the work is to be commenced at once and rushed forward so as to be ready for the coming fall fair which takes place Sept. 22 to 24.

The plans have been prepared by Mr. P. M. Jullien, of Vancouver and show a large and handsome structure of an imposing design, with a frontage on Ellis street of 101½ feet and a depth of 61½ feet. The site chosen is that at present occupied by the old building which is to be moved further north and used entirely for the poultry section, which has shown a remarkable development during the last year or two. The wing which was added to the old building a couple of years ago is to be detached and moved some distance away where it will be fitted up as a ladies' resting room.

The new building besides being designed in a more modern and elaborate style, provides greatly increased accommodation. It is to be built of heavy timber framing, finished on the outside with white stucco, which will give it the appearance of masonry. The roofing will be red.

The principal entrance on Ellis St. will be the most striking feature of

the design. It will be 28 feet wide, projecting 14 feet from the main building and will be surmounted by a semi-circular roof supported by massive looking columns and elaborate cornice and embellishments. On one side of the entrance will be an office for the use of the officials of the exhibition, and on the other a stairway leading to the balcony, which commands a view of the whole interior. The roof will be lofty, the centre part which rises higher than the rest being 32 feet from the floor.

The building is to be set back some distance from Ellis street allowing room for a semi-circular carriage drive and the front is also to be laid out with lawn and shrubs.

The A. & T. Association are to be congratulated on this new move which has been made possible by the generous assistance of the provincial government, and the provision of these new quarters, will, it is hoped give a still greater impetus to the work of the fall fair. From indication so far, it seems likely that the fair this year will be on a larger scale than ever, and certainly the secretary, Mr. Washburn and various members of the committees are working hard to make it so.

Kelowna Ball Team Breaks Even With Revelstoke

LOCAL TEAM PLAYS FINE BALL AWAY FROM HOME

On Tuesday afternoon three autos, carrying the Kelowna ball team and their supporters left the city for a drive to Salmon Arm where they took the train for Revelstoke, in which city they played two games of ball yesterday, winning the first game by a score of 5 to 0 and losing the second in the tenth inning 5 to 4.

The three cars, driven by Alec Purvis, Geo. Bowser and Alec McQuarrie made the trip, both going and coming in their usual, fast, careful and comfortable manner.

The first game at Revelstoke was called at 10.30 in the morning.

The teams took the field with the sky threatening, but the rain held off until nearly noon and the game was finished. Bingman was in the box for Revelstoke while Henning worked on the mound for Kelowna, and it was surely the Henning of old, for the way he made "mince-meat" of the Revelstoke heavy hitters was good to see. One after another of the opposing sluggers walked to the plate, took three healthy swings at the atmosphere and then meandered back to the seat on the bench. The rest of them who were fortunate enough to get the bat in the right place for Henning to hit it sent weak efforts to the fast fielding Kelowna infield. No less than nineteen chances were taken on the Kelowna infield with a single slip and that was truly a "slip". This was credited to Patten at third, who played a steady game, but owing to the terrible rain storms of the previous night, leaving the grounds very sticky and slippery so that the players spike shoes were of but little use "slipped" on fielding a bunt down the third base line and was unable to make a throw until the runner has reached the initial sack in safety.

Casad, at first took three hard hit balls in his usual graceful manner and at the plate he secured two home runs and a nice single out of four times up. F. Henning at second accepted seven chances without a "slip." Purdy took five and Patten four. The fielding was fast and clean throughout. The outfield played in the same manner and Holgerson's "jumping-the-fence" stunt and return of a hard drive in the first inning was the most sensational feature of the days play. "Slim" can sure travel and, as a hurdler, jumping barbed-wire fenced he proved yesterday that he has few equals.

Every man on the Kelowna team played fine ball and Kelly in his first appearance in a Kelowna uniform played a steady game behind the bat and gave the pitchers the confidence and much-needed support on the receiving end.

Patten came in contact with Derr's spikes in the ninth inning and received injuries which necessitated in his being replaced at third by Kincaid, who finished the game. Patten, after being carefully attended by Dr. Hamilton played in the second game.

Cookram of Revelstoke and Webb of Kelowna acted as umpires.

The score by innings.

Kelowna 2 1 0 3 0 1 0 1—8
Revelstoke 0 0 0 0 0 0 0 0—0

SECOND GAME

The second game started in the rain at 4.30 with Webb on the firing line for Revelstoke and Davis working for Kelowna. Kelowna took the lead in the second inning and held the home team in check 1 to 0 until a heavy downpour of rain in the sixth when Davis found it impossible to use his curve ball to any advantage, as he could not grip the ball. In this inning Revelstoke secured three hits at a critical time and scored four runs, making the score 4 to 1 in favor of the home team. After the rain had let up enough to permit of play being resumed Henning was again sent to the mound and held the Revelstoke team in check while the locals began a sure and steady climb, gaining one by one the runs which they were behind until the ninth inning they secured the two runs needed to tie the score. They were unable to score in the tenth and with two down in Revelstokes half of the tenth White hit a low liner to right centre which bounded over the fence and scored Wright with the winning run.

The score
Kelowna 0 1 0 0 0 0 1 2 0—4
Revelstoke 0 0 0 0 0 4 0 0 1—5

Deputation Inspect Road Building in District

Experimental Stretch of Road Near City is Finest in Valley

For the purpose of inspecting the experimental stretch of road which is being macadamised by the government under the direction of Road Superintendent Hamilton Lang and the local foreman, Mr. Geo. Munford, a party consisting of Mayor Weight and Alderman T. K. Smith, of Armstrong and Mr. Henderson, of the Coldstream Municipality, accompanied by Mr. Lang, motored down last week and a representative of the "Record" was privileged to accompany the party on their tour of the district.

The new piece of road referred to, about a mile in all, from the Kelowna city limits along the main Vernon road to near Barlee's place, is being used to test out methods of preparing the road bed which is more ambitious and incidentally more costly than has yet been attempted in the valley. Instead of the usual somewhat makeshift methods of merely grading the dirt road, and covering it with a layer of gravel or shale rock, methods more closely conforming with the recognized macadamising process are being used. The government rock crushing plant and steam roller has been brought into requisition, and the material is being graded into different sizes. After carefully levelling a heavy layer of the coarsest material is first laid and well rolled. Over this is then spread a covering of rock of a medium grade and again rolled. The finer gravel is well worked into this surface with brooms and after repeated wettings and rollings a road surface is produced, which is a pleasure to see and a still greater pleasure to travel upon. The coarseness of the foundation material gives that facility for drainage of surface water which has been lacking in road making methods so far, and it is confidently expected that the life of the road will be increased a good many times. The process is expensive compared with past practices. Cost figures are not yet available but Mr. Lang is confident that the extra care used will fully justify itself, and prove in the long run much more economical.

The party also paid a visit to South Okanagan where Mr. Munford has in hand the improvement of a stretch of road from the tennis court to the Belle Vue Hotel. This road is being straightened and widened, and will no doubt prove of great advantage to that part of the district. A feature of this undertaking is the construction of three concrete bridges, which are a great advance on the old style of timber structures.

The journey was made on the Lake Shore Road, the scenic beauty of which was much admired by the visitors. Those Kelowna residents who have not yet travelled along this road have no idea of the great asset which it has added to Kelowna's attractions as a tourist centre.

Mr. Lang and his party afterwards crossed the lake by the ferry to continue their journey south to Penticton. It was Mr. Lang's intention, it might be mentioned, to move the government rock crusher and steam roller to Penticton as soon as the work here is finished, he having undertaken to carry on some road building work for that municipality.

In reference to the baseball game at Kamloops last Wednesday afternoon, the newspapers of that city are very flattering in their praise of the Kelowna club. The Sentinel goes into a lengthy report of the game and gives each and every member of the local club due praise for his ability. The report is too long to permit of its being reproduced here. They say, however, "The game was clean and fast and entirely free from heated arguments; indeed, it would be a matter for congratulation were all the other teams of the Interior League to adopt the same sportsmanlike attitude and conduct as did Kelowna yesterday."

The "Standard" says in part: "With one or two exceptions Kelowna has at present an excellent line-up, but the boys lack team work, which will probably be overcome with more practice. It really was not brilliant ball playing that won Kamloops the game, but simply "horse-shoe luck."

At the reception given to the officers of the battle cruiser "New Zealand" recently in Vancouver, Captain Halsey of that ship took occasion to defend the people of Canada against the charge of disloyalty.

The immediate cause of the gallant Captain's remarks was contained in the ill-considered comments of the Mayor of North Vancouver against the failure of the senate to ratify the Borden Navy Bill.

It is unfortunate that this question of loyalty or disloyalty should be brought up in connection with the bill referred to. No fair-minded man will in his sane moments deny that there are as many staunch imperialists, at least amongst the English-speaking people of Canada, on one side of politics as on the other. The chief cause of difference is the way in which this feeling shall be practically expressed.

We do not for a moment consider that the senate or even the opposition in the lower House represents the true

feeling of the party for which they are supposed to speak. Party politics in Canada unfortunately has taken very seriously, and to be a good politician one must sink ones personal feelings, even feelings as sacred as love of country, in order to further party interests.

It is difficult for an old-countryman to appreciate the point of view of an ordinary Canadian born Britisher. We are a people with a profound belief in the enormous possibilities of our development in the future. Yet we have perhaps more than the native born Briton, an intense sentimental regard for the old land. We revere her institutions, her laws, her literature, her great statesmen, and her great soldiers. We are, however, entirely democratic, and a duke or an earl as such is no more to us than the measure of what he is as a man, and of what he can do.

We are a self-satisfied people, and often narrow and provincial in our view, but with all our failings, we have vision, and we can see that with our immense and fertile country, we are destined, even compelled, to become a great, numerous, and influential people. We resent any aspersions on our loyalty, and yet our loyalty is different from that of the Briton born. We are loyal to the Empire, and consider ourselves as much a part of it as a native of Cornwall or of Cromarty considers himself a Briton. A Captain Halsey may presume to defend us against the charge of disloyalty to Britain, but he is wrong. We are loyal to that greater Britain of which we form a part, and in our eyes, a very prominent part. Moreover we look forward unconsciously to the time when it will be just as congruous for us to bring an accusation of disloyalty against a native Englishman as for him to accuse us of that sentiment.

This is the real Empire, this feeling of oneness, and nothing is so subversive of the Empire idea as any attempt to subordinate one part of the whole in order to elevate another.

A party of Scottish school teachers have sailed from Glasgow for Canada. The object of the visit is to inspect schools of all grades in the Dominion. The company will afterwards proceed to the United States and visit Philadelphia, Boston and New York.

Wolves and Buffalo

Investigations carried on by the forestry branch of the Dominion Government have proven conclusively that several large herds of wild buffalo are still to be found in the hilly country on the northern boundary of Alberta, in the neighborhood of the Slave River. A party working under the direction of Mr. A. J. Bell, the government agent at Fort Smith, made a study of the habits and obtained photographs of these buffalo, which are identical in appearance with the former buffalo of the plains, the remnants of which were forced to seek shelter in the timbered fastnesses of the north.

These wood-buffalo when full grown are able to defend themselves against their natural enemies, but in the winter before the young yearlings have attained full strength, they frequently fall victims to the timber wolves. Large bands of these wolves hover around the flanks of the buffalo herds as they pass in single file from one feeding ground to another, waiting for the opportunity to cut off a young animal and drive it from the beaten trail into the deep snow, where it is unable either to escape or to defend itself.

Partly eaten carcasses were found by the investigating party which clearly indicated that the wolves were the cause. These grey timber wolves are of large size and are very strong and very numerous in this region where they menace the existence, not only of the wood-buffalo, but of other game as well. The Dominion Government already offers a bounty of twenty dollars apiece for their destruction, but so sparsely inhabited is the region and so clever are the wolves in avoiding traps, that the present bounty has had little effect in reducing their numbers. It is possible that the Dominion Government will raise the bounty here to forty dollars in the hope of ridding the regions of these pests, and of preventing the extinction of the last wild bison in existence.

Samuel Brighthouse, one of the first aldermen of the city of Vancouver and one of the two original owners of the "old Granville townsite", which includes what was the original site of the city of Vancouver has just died in the Isle of Wight. With William Hailstone, now living in England, he was in the early days owner of property now assessed at over \$30,000,000.

Planting Season, 1913-14

"RELIABLE" NURSERY STOCK

I am offering a limited number of trees in standard varieties, all grown in my own Nurseries, and guaranteed true to name and free from disease or frost injury. My trees are all "Budded Stock on 3-Year Old Roots," which require 2 years to produce from the time the imported French Seedling is planted out, and should not be confounded with piece root grafts made in a cellar during winter and sold the following season.

I most cordially invite all intending purchasers and others to inspect my stock and winter storage system at "CLOVERDALE" (located on the road to Vernon opposite 25 mile post). My experience in growing orchards is that budded trees are unquestionably superior to those root grafted.

Save One Ton of Coal in Every Six

The Economizer will do it.

While the cost of living has undoubtedly been growing greater, at the same time it is true there are some inventions that will offset this increased cost of living, and the careful housewife takes advantage of these inventions.

On every Gurney-Oxford range there is an Economizer which controls not only the drafts but also the entire combustion or burning of fuel to create heat.

This Economizer will save 1 ton of coal in every 6 that you would use with the ordinary range.

The Economizer is a simple device, absolute in its control. By merely moving the lever you can obtain any degree of even heat in the oven. This insures the satisfaction of always having light, delicately crusted bread and biscuits.

The kitchen fire ceases to be a worry if the Economizer is on your stove.

The Gurney-Oxford is the final result of experimental thought. Science has given it a Divided Flue, a new Special Grate, and a Spoiler attachment.

This Gurney-Oxford range is primarily a saver of money, time, and energy.

D. LECKIE, KELOWNA

Four Years of Victory

For the Fourth Successive Year the annual endurance run of the New Jersey Motor-Cycle Club, May 30-31, was a sweeping YALE victory. Four YALES started and all four finished in good shape, the only machine that had all starters to finish.

The big team trophy was won by the Yale team, George Riechey, P. W. Stevens and O. W. Stevens. It was a clean-cut victory with no other machine able even to give close competition, for no other team had all three riders to finish the gruelling two-day, 450-mile grind over towering hills and primitive roads. The test was so severe that it brought YALE superiority out prominently.

One winning might be called luck or accident, but when the same machine wins decisively year after year, as the YALE has in this annual New Jersey content, it is convincing proof of its superior road ability. The "Big Y" is the kind of machine YOU want. Stop at this store and have us show you.

How to Swim in Six Lessons

Persistence and determination, together with an intelligent understanding of the strokes, will teach any woman to swim in time.

There are three strokes easy enough in themselves; but the trick is to do them in unison; that is, with legs and arms at the same time; and to do them automatically—which is only accomplished by practice over and over.

Now for the strokes: At the count of one, the body is drawn up like a frog; legs bent at the knees and knees pressed close to the torso; arms bent at the elbow and palms of the hands close together.

apart in the slightest during the stroke three, so much speed will be lost. The hands may be bent slightly to form a sort of a scoop as the water is pushed backward in the semi-circle but at strokes one and two the fingers are kept straight and the palms are close together.

When you are able to do the strokes together with one foot on the bottom, get some friend to place a finger under your chin and practise with both feet off the bottom.

One more suggestion! Keep the neck well bent backward. The face only needs to be out of the water. The shoulders should be completely submerged, and the higher the chin is thrust, and the neck bent back, the straighter will the body lie in the water and the easier and faster will be the stroke.

Bridge Over Trout Creek

Difficulties attending the completion of the foundations for false work for the new steel bridge over Trout Creek which is being built by the Kettle Valley Railway, have now been practically overcome and the wooden structure which represents the primary portion of the bridge work now reaches from the bottom of the canyon to the top, a height of about two thousand feet.

Child Burned to Death While at Play

The little son of Ronald Hewat, the provincial assessor at Fairview, suffered a horrible death from fire on Monday when he was playing about the Hewat home.

RICHMOND'S

CASH STORE

SPECIAL PRICES

are our leading feature. Our sale is over, but to keep our friends' attention directed to this store, we are making a leading feature of specially pricing seasonable merchandise. As a special inducement we are offering **10 per cent. off all regular lines** and on many new lines a still greater sacrifice will be made. August is generally a quiet month, but we do not propose to have any quiet months. Our cash system of doing business does away with much expense entailed in conducting a credit store. We are naturally able to sell at a very much finer margin than we should otherwise be able to do. We draw special attention to the following lines of

Boots and Shoes, Dry Goods and Men's Wear

Dry Goods Department

We have just received a shipment of Lady Overall Aprons. They are made in pretty stripe Gingham and in plain colors of Navy, Old Rose, Alice, etc., suitably trimmed, very full in size. Prices from \$1.00 to \$1.50

NOVELTY LACE COLLARS

We have some exceptionally pretty designs in Bulgarian collars, these are quite the latest. The prices are quite reasonable. From 95c. to \$1.50

CORSETS

We are sole agents for the D. & A. Corset Co. and have just received our fall shipment, every number and size in stock now. Prices from 75c. to \$3.75

SATIN UNDERSKIRTS

A very special line in fine Duchess Satin 9-in. n pleating at foot, in colors of Cream, Royal, Alice Paddy and Tan. Special \$2.50

LADIES' DRESSES

All our stock of Ladies Dresses, in both muslins and cloth. Styles offered at great reductions. These include a few pretty muslins with pink and blue spot effects. Reg. values up to \$15.00. Special prices from \$5.75

CHILDREN'S WASH DRESSES

Only a few left but they are good. Sizes are from six to twelve years. We are prepared to cut the prices on these goods to the very lowest possible mark. They are in both white with colored embroidery and in self colors of pink, blue, etc.

That we succeeded in convincing the public that we were selling good boots and shoes for less than they can be bought for elsewhere is evidenced by the enormous quantities that we have disposed of during our sale. If you were not there come in during Regatta week and let us convince you.

MEN'S BOOTS

30 pairs Men's Tan, Leather-lined Boots (Doctors special). Goodyear welt, two full soles, under heel. Water proof and Solid in every respect. Reg. price \$7.00 a pair. To clear at \$5.50 a pair
30 pairs Men's Water proof Black Box Calf. Leather lined, Bluchers, same as above. Worth \$7.00. To clear at \$5.50

Men's White Canvas. Bluchers, just the thing for the hot weather. Regular \$2.75. Our price . . . \$1.95

Men's Vacation Oxfords, White Duck uppers, Rubber soles. Sale Price \$1.25

Men's Outing Bals. White Duck \$1.25

Men's Red Fox Tennis or Yachting Bluchers. Extra heavy rubber soles. To clear at \$1.65

LADIES' AND CHILDREN'S BOOTS

We have a great number of Ladies Oxfords and Slippers. Small sizes. Worth \$3.00 to \$4.50 per pair. We have dumped them all on the bargain counter at \$1.50 a pair.

30 pairs of Ladies Slippers. Odd sizes. Clearing at \$1.00

The Fashion Shoe for Women. Gun Metal, button. Goodyear welt. Regular \$5.00 to clear at . . . \$2.95

Black Dongola Blucher. Patent toe. Short Vamp. Very stylish boot. To clear at \$2.75

Ladies Patent Bluchers. Sizes 3 to 7. Regular \$4.50 Sale price \$2.75

Infants Boots. Sizes 1 to 7. Per pair 75c.

Children and Girls Boots, all sizes. Entire line to be cleared out at greatly reduced prices to make room for new fall goods, which are arriving by every boat.

Special Clearance Sale of Odd Suits

After our great sale of men's suits we have on hand 38 odd suits. To keep our stock clean, we have decided to sell all these odd suits for less than cost price. Made up in Scotch and English tweeds in neat patterns. Regular \$15.00, \$18.00 \$25.00 and \$30.00. Yours while they last for \$10.00

MEN'S KHAKI DRILL SHIRTS

Special line of men's Khaki drill shirts, extra large body, double stitched, felled seams, re-inforced throughout. Special \$1.25

Men's Black Sateen Shirts, made up of extra strong sateen, double stitched, large body. Special . . \$1.00

OUTING SHIRTS \$1.00

Flannelette Outing Shirts, Cream color ground with blue, heliotrope and black stripe, workmanship guaranteed. Special \$1.00

MEN'S SOFT WOOL SOX 25c.

These are closely knit from a soft wool yarn, snug fitting, ribbed cuff extra spliced heel and toe. Special 25c. per pair

MEN'S CASHMERE SOCKS 35c.

Men's Pen Angle Black Cashmere Sox, spliced heel and toe. 35c.
Men's Silk Lisle Sox in Black and Tan shades. fast color. Special 1 25c.

Boy Scout Notes

BY MAGISTER

Badges (Continued)

Printer

Must print a handbill set up by himself, and must know the names of the different types and sizes of paper and be able to compose by hand or machine, and understand the use of hand or power printing machines.

Prospector

Must have a general knowledge of the various periods of the formation of the earth's crust, and which are water bearing rocks. Must understand stratification, dip and faults. Must be able to identify: (1) twenty different minerals in their natural state (2) twenty different fossils and know to what period they belong.

Rescuer

Must perform four methods of rescue and three of release in the water, the drowning subject in the rescue methods being carried at least two yards. He must be able to demonstrate the Schafer method of resuscitation and the promotion of warmth and circulation, and if a Sea Scout, must be able to work the rocket apparatus.

Sea Fisherman

Must have a practical knowledge of the various methods of catching sea-fish for the market by means of trawls, nets and lines, and of catching shell-fish. He must have had experience of at least three of these methods, one of which shall be by trawl, and must know the mercantile code of signals.

Signaller

Must pass tests in both sending and receiving in semaphore and Morse signalling, by flag. Minimum rate, twenty-four letters per minute. Give and read signals by sound; make correct smoke and flame signals with fires.

Show the proper method of signalling with the staff as in the hand-book.

Stalker

Must take a series of twenty photographs of wild animals or birds from life, and develop and print them himself, and must be able to give particulars of their lives, habits and markings.

Starman

Must have a general knowledge of the nature and movements of the stars and be able to point out and name six principal constellations, find the north by means of other stars than the Pole star, in case of that star being obscured by clouds etc., and tell the hour of the night by the stars or moon.

Must also have a general knowledge of the relative positions and movements of the earth, sun and moon, and of tides, eclipses, meteors, comets, sun spots and planets.

Surveyor

Must map correctly from the country itself, the main features of half a mile of road, with 440 yards each side, to a scale of two feet to the mile and afterwards re-draw the same map from memory.

Measure the height of a tree, telegraph pole, and church steeple, describing the method adopted.

Measure the width of a river and the distance apart of two objects, a known distance away and unapproachable.

Be able to measure a gradient. Understand what is meant by X.L., H.L., R.F., contours, conventional signs of ordnance, survey and scales.

Swimmer

Must swim 50 yards with clothes on (shirt, trousers and socks as a minimum), and be able to undress in the water. He must swim (without clothes) 100 yards on breast and 50 yards on the back with the hands either clasped or the arms folded in front of the body. He must be able to dive and pick up small objects from the bottom.

Watchman

Must know every rock and shoal within the five fathom line on a four-mile stretch of coast near his headquarters. He must know the rise and fall of tides, both spring and neap, and how to ascertain the time of high and low water. He must know when the moon rises or sets, and its quarter. He must know the set of the currents at all times of tide. He must know all spots of danger to bathers or visitors, such as quick sands, and places where they are liable to be cut off by the tide, and what to do if they get into difficulties. He must know the best landing places for boats and where they can find shelter in bad weather.

Arguments for Thinning Fruit

First, the average size of the fruit left on the trees is increased; this is the most obvious result of thinning. Trees overburdened with fruit produce a greater percentage of small-sized apples. The increase in size of the remainder, after the first or second pickings of Bartlett pears is made, is a striking instance of the increase in size when the number of fruit is reduced.

Second, the fruit borne, is more uniform in size and shape. On the overloaded tree there is much variation in size, and especially where two or more fruits remain on a spur they are invariable in shape as well. The fruit from the side blossoms of the cluster are in many varieties much different from those from the centre blossoms, usually being flatter in shape and having a considerably longer stem. Uniformity in size and shape is an important essential of commercial perfection.

Third, the color is materially bettered, more uniform, and comes earlier. The remarkable increase in color which occurs when a first picking is made from heavily bearing trees of even the winter varieties, such as Jonathan and Wagner, furnishes a striking confirmation of this point. While color seems largely related to sunshine, it is a well known fact that on a heavily loaded tree the fruit has less color, less evenly distributed, and more slowly acquired.

Fourth, thinning improves the quality. This is especially the case when the soil is deficient in moisture or plant food.

Fifth, the fruit is freer of diseases and insect pests, because wormy apples, limbruised or diseased fruit of any kind, can be removed at thinning time. On plums and peaches in moist regions, fruit thinned so that no two touch when fully grown are much freer of brown rot.

Sixth, the removal of mis-shaped fruit lowers the percentage of low-grade fruit.

Seventh, thinning prevents premature dropping. Premature dropping is quite largely due to the inability of the tree to supply moisture to an excessive crop.

Eighth, the load of fruit is more evenly distributed, and this is a very important feature in preventing the breaking down of trees.

Ninth, the cost of picking is reduced considerably, and the labor of packing is divided more evenly over the season. That is an important advantage where the supply of labor is deficient in packing time. The costs of packing and grading are also much lessened.

Tenth, less fertility is removed from the soil. A ton of apples takes out approximately 1.2 lb. of nitrogen, 1.6 lb. of potash, and 6 lb. of phosphoric acid. A ton of pears moves the same amount of nitrogen, and about twice as much of the other elements. The seeds take the great bulk of these amounts, the pulp of the fruit taking but a small portion. As the number of seeds is roughly in proportion to the number of apples, and not to their size, the removal of fruit leaves a much greater supply of plant food for the balance of the crop.

On June 28 there were in London 99,258 persons receiving indoor and outdoor poor relief, a decrease of 4,360 in the number for the corresponding day last year.

He must know the marks of fishing boats which frequent the coast and the national flags of ships which pass. He must know the lighthouses which can be seen from his strip of coast and describe the lights they exhibit. He must know the beacons, storm signals, coast guard stations, steam tugs, life boats and rocket apparatus, the nearest telegraph offices, telephones and addresses of doctors available from each point, and also the mercantile code of signals.

Woodman

Must fell a tree properly with a felling axe, and know how to use a saw for felling a big tree; the different species of trees by their appearance, and their respective uses as timber; know a well grown tree, (i.e., one useful for timber) from a bad one; know the trade names and dimensions of planks, scantlings, etc., and know how to measure lumber; know the general principals of levering, hauling, stacking timber and bark, usual in the locality; sharpen axe on grindstone and know how to use wedges.

SCOUT NOTES

Tests have been passed by T. Buck, R. Keller and A. DeMoulin for "Cyclist" badges, which have been awarded.

Other badges received for issue are tenderfoot badges and service stars, which are waiting to be claimed by those who have earned them.

TOWN AND COUNTRY NOTES

Mr. J. M. Robertson motored over from Kamloops to spend a brief visit with friends in the city.

Miss May Dalgleish of Kamloops is spending a few weeks holiday with her brother, Mr. A. Dalgleish here.

Dr. Knox returned on Sunday afternoon from the coast where he has spent several weeks on both business and pleasure.

The foundations have been laid for the big new warehouse building on Lawrence avenue. It has 100 feet frontage and extends back to the lane the full length of the lot.

Mr. H. E. Ridley, roadman of the Ford Motor Co., was in town this week end, and reports of the new cars sold in B.C., this year 50 per cent are Fords.

Rev. D. J. Welsh, of the Baptist church and Rev. A. Dunn, of the Presbyterian church changed pulpits on Sunday evening last. They addressed large congregations in each church.

The first Sunday trip of the north-bound steamer was made on Sunday last and a great many availed themselves of the opportunity of spending the day on the water and visiting Vernon.

A young Russian employee of the railway camps died this week at the Okanagan Mission hospital of which he had been an inmate for some two months. He was buried Tuesday at the Kelowna cemetery.

The Inland Motor Freight Co. have moved their motor trucks down to Penticton, where they have taken a contract to haul some 400,000 feet of bridge timbers for the Kettle Valley Railway Co.

A pony which had broken from its hitching post made things lively along Main street Monday evening. It travelled the whole length of the street on the sidewalk in front of the stores at racing speed. No one was hurt but some of the promenaders had to duck pretty hastily into doorways to avoid getting upset.

On Thursday last the staff of the McKenzie Co.'s store celebrated the first anniversary of the company's existence by a picnic to Gellatly's. The party numbering 16 left on a launch early in the afternoon and returned at 8 p.m., having had such an enjoyable time that the event will become an annual affair.

The secretary of the Dramatic Society tells us that the following scores of "San Toy" have not yet been returned him: Nos. 4, 7, 8, 11, 15, 20, 23, 27, 32, 33, and 35. These scores have to be forwarded to New York, and if not turned in by Saturday morning, the Society will hold the members concerned responsible for the express charges, etc. If desired, the copies may be purchased for \$1.50.

Arrangements have been made with the management of the Opera House to show a number of interesting moving pictures in the grand stand on each evening of the Regatta. The programmes given in the grand stand last year were particularly good, and an open-air entertainment of this kind certainly ought to prove a very pleasant feature. Music will be furnished by the City Band.

The Regatta committee are to be congratulated upon securing the services of a famous acrobat in DeOlney, who is described as the "human fly." This gentleman has made a big reputation for himself during the past few years in the North West States, performing at many of the big fairs and exhibitions, and also on the big time Vaudeville circuits. He is an all-round acrobat and gymnast, but his aerial flying trapeze work is his big stunt, from which he has been dubbed the "human fly." By special arrangement with the manager of the Opera House, DeOlney, in addition to performing in front of the grand stand each afternoon of the Regatta, will give an entirely different programme of acrobatic feats in the Opera House each night. DeOlney's sensational feats will be only one of the many new features introduced at the Regatta this year. In fact, we don't see how anybody can coax themselves to stay away.

Leckie can supply you with the famous high up batteries.

The Misses Reeves of Winnipeg, are guests of Miss Anna Knight.

Three of the members of the new Okanagan Motor Cycle Club made the trip to Enderby Sunday.

Owing to the financial stringency the city of Brandon closed down all municipal work and discharged 300 men.

Mrs. T. Edwards, of Truro, Nova Scotia, is in the city visiting her sister, Mrs. C. A. Washburn, Pendozi street.

Miss Wilde, stenographer with the firm of Burne & Temple returned last week from a month's holiday, spent at the coast.

Mr. G. E. Nobles, the architect engaged upon the new school premises, arrived in town on Monday, and expressed himself highly satisfied at the work being carried on.

Mr. Ben. Skinner, of Edmonton is in town spending a week's holiday with friends here. He expects to leave Kelowna tomorrow morning for California where he will spend a few weeks before returning to Edmonton.

Mr. Thos. Cunningham, provincial fruit inspector, was in town the other day. Mr. Cunningham reports that the most stringent precautions are being used this year to prevent the importation of fruit from the American side which shows any sign of pest or disease. Up to the present there have been rejected 1069 cases of pears, 483 of peaches, 1302 of tomatoes, 117 of apples, and 124 of plums. The apples, pears, and plums were infected with Codlin moth, the peaches with the peach worm, and the tomatoes with the canker rot. The department is determined to do everything possible to protect the fruit-grower in this all-important matter.

Mr. and Mrs. J. C. Stockwell left this week for a lengthy visit to their old home in the Province of Quebec. Mr. H. J. Williams has moved his office over to the auction room, and he will look after affairs there until Mr. Stockwell's return.

SYNOPSIS OF COAL MINING REGULATIONS

Coal mining rights of the Dominion in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the Northwest Territories, and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for the lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lease may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10 an acre.

For full information application should be made to the secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,

Deputy Minister of the Interior.

Loading a Big Gun

As Seen From The Turret of a Battleship.

In a little book, entitled "With the Fleet," (Grant Richards is, not), Mr. Filson Young describes in a few graphic sentences the loading of a big gun on one of our battleships.

The order, he writes, is given to load. Someone touches a lever, and with a hiss a mass of bright steel turns and twists back, and the breech of the gun gapes open. Another touch on the lever, and from beside you a hydraulic ram shoots out like a golden tongue into the breech, and immediately shoots back again. All is clear. Now, at your very feet, a hole gapes in the floor of the turret; there is a slat and crash of metal and as you look down into the hole you see a small lift travelling up with incredible rapidity, and infernal clatter, bearing on it the ponderous projectile, weighing more than 70wt., and in another compartment, the two cartridges of cordite.

Up comes the lift, locks itself with a crash, and spills out the projectile on a metal tray in line with the open breech. The golden tongue of the rammer shoots out again, and pushes the projectile into the gaping breech, extending itself apparently indefinitely until the projectile has disappeared. The lift shifts a little, bringing into line with the gun its other compartment, which contains the two half-charges — each a cylinder holding 130 pounds of cordite. Out shoots the ram again, with no more respect for than that if they had been sponges, and pushes them steadily home behind the projectile; and having done its deadly business, retires again out of the way to be ready for another cycle of the same operations.

Half a turn of the wheel, and the breech block swings home with a sigh and a click. "Right gun loaded sir." Now you wait in suspense, and a voice from the conning tower gives the range — eight thousand five hundred yards. The gun-layer in his quiet corner has all this time never taken his eye from the glass. He turns one wheel, and the whole turret swings round over the ship's quarter; he turns another, and with a little hiss and sigh of imprisoned water the whole mighty tonnage of the gun, sweetly balanced on its trunnions, rises and tilts itself to the push of the hydraulic press. This range is decreasing by some thirty yards a second, since the target is a ship approaching us at a speed equal to our own—fifteen knots—and as the falling ranges are given the gun-metal wheel is turned an eighth of a quarter of an inch and the muzzle of the gun sinks down a little as gently as a falling leaf. The sights are reported "on" the gun laid, and the word we have been waiting for is sharply given — "Fire!" The gun-layer pulls a trigger no bigger than that of a pistol, and the projectile was a dummy one, made of wood covered with leather, and there was no cordite in the cartridge! If it had been otherwise.

Vancouver Street Railwaymen's union have passed a resolution ordering that all members of the militia among its members must either quit the militia or leave the union. Twenty members of the Highlander's regiment here are street railway men.

Letters of a Self-raised Office Boy to His Pal

In which Jimmy tells of Kelowna happenings to Mr. Sidney Harper, of Vancouver, B.C.

Dear Sid,—Listen, my lad, and I'll spin you a yarn, a tale of the mighty deep, and the perils of those who go down to the sea in ships.

Once upon a time the Boss says to me, "Jimmy, I fain apicnicing would go." "Aye! aye! sir," says I, "sed where might we be going on this picnic?" "Down the Lake about ten or twelve miles," says he, "is a fertile point of land jutting out into the Lake, owned by a canny Scot named Gellatly. It's here, my lad, we will go."

On the appointed day the happy crowd gathered at the wharf. Ah! little did we reckon, as we clambered aboard the spacious yacht which was to bear us to our destination, of the terrible dangers which must be borne before we cast anchor again in the peaceful harbor of Kelowna.

The halter was cast loose, and we steamed, or rather I should say, gascolined, majestically out on the heaving bosom of the vasty deep. The voyage out went as smoothly as the first year of married life—not one accident to mar our enjoyment. In due course of time we arrived at the picnic ground, which nestles in the mouth of a canon of great natural beauty.

We spent the day as our various fancies dictated—swimming, playing quoits, climbing about the rocks, and last, but far from least, in eating.

Speaking of eating calls to my mind one particular cake some kind lady had brouhht. Mother in her palmerst days never made a cake better than this one.

As I was saying before that cake interrupted me, we had one grand time and about seven o'clock it was decided we had better start for home. We strolled back to the boat in the gathering dusk, got aboard, and started merrily on our homeward way. After going about two miles, the starboard turbine, with the gasp of a lost soul, quit like a yellow dog. The engineer made frantic attempts to get the fool thing going again, but they were of no avail.

Picture to yourself the scene! The boat-load of helpless picnics, drifting slowly at the mercy of the waves towards a bleak and rock-bound coast, while to the south of us, vast banks of lowering cloud were gathering, foretelling the coming of the storm. It was at this point that "Throw out the Life-line" was sung by special request by the Azon; Quartette of Kelowna, who were present on this festive occasion. Suddenly, above the staccato crash of the thunder, we heard the stentorian voice of the skipper—"Heave, ho! my lads! All hands man the clothes line, take seven reefs in the flying jib-boom; I think we are due for a squall."

After a look at some of the ladies present, I says to the skipper, says I, "Cap, is this squall going to be outside or inside this boat?"

The storm broke with the fury of a pack of maddened wolves, the thunder roared, the lightning flashed, and the waves rolled mountains high. So big were the waves, in fact, that they swept over our poop deck (whatever that is). Just then, across the heaving billows, the Captain spied a wharf "Ah! Ha!" he cried, in accents wild, "Fear not, fair ones, I will save you yet!" With these brave words, he grasped a rope firmly in his pearly teeth, sprang overboard in at least two feet of water, and swam madly to the shore. I forgot to state that the Captain was accompanied by another gentleman in his leap for life, but he requests that his name be withheld, "because," he said, "I don't want anyone trying to hand any medals to me."

Soon we were safely moored to the wharf, and our worst troubles were over. The Captain phoned to Kelowna, and we were dragged ignominiously at the end of a halter.

No one suffered any ill effects from the trip, although I noticed one sweet young debutante who, when it was roughest, was compelled to find solace in a lemon which some one kindly handed her.

Next week is Regatta week, and we are going to have as a special attraction every night "The Marvellous De Olney," the human fly. He does some of the most death-defying and hair-raising stunts—wonderful heel-drops, trapeze swings, balancing leaps, and break-away drops of 25 feet or more to the ground below. He is also to give a matinee on Wednesday and Thursday in front of the grand stand. We will now close this tale of woe. Oh! Sid, I forgot, we are having the most beautiful weather in Kelowna just now. Better come and get a slice.

JIMMY.

Fire completely destroyed the "City Hotel" at Revelstoke on Tuesday night. One body was discovered in the ruins and it is thought that two others, who are missing, perished in the consumed building which was a wooden frame building and burned very rapidly.

little paint will make a Big Difference in the Appearance of your House

The value of your house—your own standing in the community—are often judged by the appearance of your house.

And a few dollars spent in painting your house at regular intervals will go a long way towards enhancing the value of your property and gaining added standing for yourself.

Bapco Pure Paint

is no higher in first cost than ordinary paints—and far more lasting and durable in the long run.

"What in the world shall we have for dinner?"

This question is being asked by nearly every woman in Kelowna at the breakfast table. This meat business is a tough proposition during the hot weather anyway, and we have anticipated this fact and have ordered

Practically Everything in Canned & Bottled Meats

that is made

Clark's & Heinz baked Beans, Clark's Corned Beef, Roast Beef, Roast Mutton, Ready Lunch Beef, English Brawn, Jellied Veal, Cambridge Sausage, Beefsteak and Onions, Corned Beef Hash, Stewed Kidney, Pigs Feet, Lunch Tongue, Ox Tongue and Pastes for sandwiches innumerable

You have only tried a few of these and they are all good. Our pure food laws compel the manufacturers to put them up that way

In Glass we have a full line of St. Ivel goods, well known by all Old Country people as the best, cleanest and purest of Bottled Meats

Don't kill yourself by the fire. Buy canned meat. It's good

Moose Jaw Finances

Moose Jaw, Sask., July 29.—There is great indignation in Moose Jaw just now over certain attacks which have been made against the credit of the city. The city council has passed a resolution unanimously condemning a local paper, "The Evening Times", for its front page editorial on the financial conditions of the city.

In part, the resolution reads as follows:—"That this council desires to place on record its strong disapproval on the article published recently, owing to its gross misstatements of local conditions, wherein the credit of the city and its business men is impugned, and that a copy of this resolution be forwarded to the board of trade with the request that support be given this motion with a view to restoring confidence in the city which has been seriously impaired by the publication aforesaid."

Mayor Pascoe emphatically denies the report published in a local paper announcing that the city's bankers (the Canadian Bank of Commerce,) have refused to accept cheques drawn by the city. "Any inconvenience that has been experienced in connection with the city's financial arrangements has been caused by our inability to dispose of the city's debentures," said the mayor.

DON'T TRUST

to memory to preserve the changing likeness of your growing boy or girl. Memory plays strange tricks sometimes.

A good PHOTOGRAPH every year or so will keep an accurate record of the subtle changes in their development.

—and what a satisfaction that little collection will be to you and to them in after years.

CALL AT

GRAY'S STUDIO

ROWCLIEFE BLOCK

Thursday, Friday and Saturday 10 to 5

Well gowned women are careful to have two or three corsets in constant wear.

A slight difference in the model will make all the difference in the set and drape of an evening gown—or a tailor-made.

When buying your new gown, it is a good idea to get a C/C a la Grace to go with it.

à la Grace

CORSETS

are made in many styles and many sizes to suit fashion's every possible requirement. Each model gives perfect ease and comfort to the wearer.

Models 693, 575 and 715 are suitable for slim, girlish figures.

For medium figures we recommend Models 705, 727 and 837

Models 666, 777 and 633 are best for fully developed figures.

THE following are illustrations of some of the popular models for 1913 and among them will be found styles suitable for the different figures, all made with that care and precision which has made the name C-C a la Grace famous. To every pair is given that minute detail of manufacture necessary to a perfect corset: the best of materials in the construction and proper inspection as to workmanship, so that each pair is fully guaranteed in every particular. See that the name C-C a la Grace is on every pair.

A medium low bust model with long soft skirt, suitable for the average figure, trimmed with embroidery and made of an extra fine quality coutil, in sizes 18 to 28

Decado, special model for full and stout figures, hip-reducing straps, medium bust, special quality coutil, wide duplex steels, extra strong corset, sizes 20 to 36

Maternity waist, in fine coutil, front, side and back lacings, sizes 20 to 30

Very popular low bust model, with long skirt, made in fine quality coutil, suitable for average and full figures, sizes 18 to 30

THOMAS LAWSON, Ltd.
