Weekly Meeting of City Council

All City Work to be Paid for by the Hour

The lack of a uniform schedule of wages for labor employed by the city in connection with the construction of the sidewalks and the grading and gravelling of the streets and other city work was commented upon at the regular meeting of the council last Friday morning.

It was found on examining the wage were paid 33 1-3 cents per hour while hour for all ordinary ,abor, others received only 30 cents for the same class of work.

The statement was made that plenty of men could be got at the present time for 25 cents per hour. Objection was raised to this however, that the city should not take advantage of the present hard times to pay lower wages. The cost of living had gone up in recent years, and it was not considered advisable to go below 30 cents per hour for all ordinary lgbor.

The payment of teams was also discussed. Ald. Taylor contended that the city was paying a higher rate than private individuals. Plenty of ranchers and others, he said, were hiring teams at $6 per day of ten hours, while the city was paying $6.50 per day for nine hours, which worked out over $7.20 per day of ten hours. He did not see why the city should pay more than others.

Alderman Sutherland thought that the most satisfactory way to pay for teams and men too, was by the hour, and only for the actual time they were on the job. He believed it was the custom to charge for a certain amount of time occupied by teams in getting to and from the stables.

The question of wages generally occupied the attention of the council for some time, the following resolution being eventually adopted. "That all labor, including teams be paid for by the hour, the rate per hour to be recommended to the council by the various committees."

Mr. W. C. Fuller waited upon the council with a grievance respecting the opening of Water street from Lake avenue through to Willow avenue. He wished to know why the council had failed to carry out its agreement to agreement to grade the street which

C.P.R. Leases Telephone Company's Line

We understand that arrangements have been made between the C.P.R. and the Okanagan Telephone Co., whereby the former company lease a line from Vernon to Kelowna and points down the lake. Operators have been engaged today in fitting up the connections at the C.P.R. office, and it is expected that everything will be ready for transacting business within a couple of weeks time.

This arrangement, as was pointed out in the "Record" a few weeks ago, will obviate the relaying of messages at Vernon, which at the present time cost 25 cents for each ordinary message.

It is stated that the leasing of the wire is only a temporary arrangement as the C.P.R. intend to build a new line later on along the shores of the lake to Penticton.

The C.P.R. are rebuilding the telegraph line between Sicamous and the Landing, and will instal a complete east and west telegraph system along the Kettle Valley line.

Salving of Empress Steamer is Probable

Operations are in progress to recover the bodies imprisoned in the sunken Empress of Ireland.

According to a Toronto dispatch, a large financial house, which is heavily interested in Canadian Pacific Railway securities, are reported to have received advices from an authoritative source in Montreal that the vessel would be raised. The report states that a diver went down to the wreck and carefully examined the exterior of the hull. cut in her side will not be a difficult It is stated that his report is that the matter to repair, and that the ship is not so extensively damaged as might be imagined.

Impressive Funeral at Kelowna

Late Mrs. Rembler Paul Laid to Rest in Hillside Grave

"I should like to live and die here myself."

This was a remark of one who attended the impressive funeral of Mrs. Rembler Paul last Sunday afternoon. The speaker was referring to the natural beauty of the surroundings near Knox Mountain, where Mr. Rembler Paul some time ago built a family vault on his property there, and which would mark the last resting place on earth of his long life companion and himself. The patriarchal appearance of the old man, with his flowing white beard, heading the procession up the steep hill from the lake's side, will long live in the memories of those present. It is safe to say that never before has such an exceedingly touching spectacle been witnessed in this district.

CONVEYED ON BARGE

Silently and amid every manifestation of sorrow the moorings of the barge conveying the remains were cast off from the wharf and the craft slowly headed its way up the lake, followed by a large number of mourners in launches. In the brilliant sunshine of an early summer's afternoon with scarce a ripple on the lake's surface, the sight presented was indeed a remarkable one and will long be remembered by those present. In recollection it recalled more than one old legendary story. There was something infinitely touching and pathetic in the whole scene.

Among those gathered on the wharf were His Worship, the Mayor and May-

Tragic Death of Wm. J. Curtis

Succumbs to Heart Seizure

A large circle of friends will be pained and grieved to hear of the very sudden death, owing to heart failure of Mr. Wm. J. Curtis, which occurred on Friday evening last at Peachland.

Deceased was well-known in the valley for the past twelve years and visited Kelowna at regular intervals in the course of his profession as organ and piano tuner. He was in the city so recently as Thursday last and by a strange coincidence remarked to his intimate friend, Mr. W. S. Fuller, that that visit would be his last as he intended settling on his five acre chicken ranch at Vancouver and taking life a little easier. The deceased who always made a point of staying at Mr. Fuller's house when he was in Kelowna talked enthusiastically on this subject during his visit last week, and plied Mrf Fuller with a hundred and one questions on the management of poultry.

The end came with tragic swiftness. It appears that after tuning a number of instruments he had supper with Mr. Towne of Peachland, and afterwards proceeded with Mr. Seth David son to spend the night at the latter's residence. Immediately upon reaching the house Mr. Curtis, without uttering a single word collapsed, and notwithstanding prompt medical aid expired.

The shock will come all the more to his many friends as he always appeared to enjoy the best of health. On his last trip to Chilliwack a short time ago, however, he was seized with a fainting fit, and upon his return to Vancouver consulted a physician, but was assured that his heart was all right.

Mr. Curtis, who was in his sixty-seventh year, leaves a widow and four grown up daughters, two of whom are married.

The remains have been removed to Vancouver where the funeral will take place.

Mr. C. R. Goss announces that he is opening a fruit and vegetable market on Ellis street north, and in order to suit the convenience of many residents, it is his intention to make regular rounds of the district. Mr. Goss is prepared to make arrangements with growers to sell their produce on commission.

BRINGING DEAD TO QUEBEC

Scene atthe C.P.R. wharf at Quebec, showing the Lady Grey, with the sailors carrying the bodies of those which the Lady Grey picked up in the icy waters of the Gulf of St. Lawrence after the Empress of Ireland had sunk to the bottom. The Lady Grey steamed into Quebec with her freight of dead amid a funereal silence. Crowds of people, many of them anxious relatives and friends of passengers on the lost steamer, awaited her coming. After the coffins were carried onto the wharf, which had been turned into a temporary morgue, the crowd filed by in silent review, with only a moan now now and then from someone who had identified a loved one, to break toe silence.

Fire Brigade Prove Efficient in Handling Big Blaze

Prompt Measures Successful in Saving Large Number of Valuable Horses When Livery Barn Burns

One of the worst conflagrations that has ever visited Kelowna occurred on Saturday last, when the whole past portion of Max Jenkins & Co.'s livery establishment was gutted. Owing to the inflamable nature of much of the contents, the fire in a few minutes gained such a hold that it was easily seen that the whole building was in imminent danger of being destroyed, and it speaks well for our local brigade that their yeoman service was instrumental in saving the west side of the building and a very considerable portion of the stock, No less praise is due to the company's employees and others who at great personal risk liberated the frantic horses.

A MAD STAMPEDE

The whole thing occurred so suddenly that actually before the fire alarm was sounded, dense volumes of smoke and flames were pouring out of the building. With heroic promptness attendants cut loose the frantic horses--over thirty in number—and a mad stampede to safety ensued. The odds of serious injury in this operation were great and it is gratifying to state that only one of the willing band was hurt, and that, we understand, not seriously.

Buggies and harnesses, and other paraphernalia were in the meantime being shot out of the building with lightning rapidity, and all the goods stored on the ground floor were, by the prompt measures adopted, saved.

SEEN MILES AWAY

So great was the blaze that Mr. D. Lloyd-Jones who was at a remote part of Bear Creek at the time returned in haste, feeling sure that it must be the timber yards that were on fire. His anxiety, however, was relieved upon reaching the side of the lake, but he was not convinced that the whole hotel block was not on fire until a considerable way across the lake.

FIRE DISCOVERED BY NEWBY

Claud Newby—who by the way is a member of the fire brigade—happened to be passing the stables just after noon, and noticed smoke issuing from the rear end of the building. He immediately turned in an alarm from the Lakeview Hotel, and afterwards proceeded with all speed to the fire hall. His prompt action undoubted,ycause of the fire is unknown. did much to mitigate the damage, as the first reel was on the spot within a few minutes of his giving the alarm.

Within as many more minutes the whole brigade were on the scene, and assisted by a host of willing helpers, five streams of water were brought to bear on the conflagration. The fire was evidently most fierce in one of the rear lofts immediately underneath the roof, and concentrated efforts were brought to bear upon this spot. The fire spread so rapidly, however that in the space of ten minutes, it was apparent that the whole underneath portion of the roof was ablaze. Notwithstanding the fact that tons of water were being pumped into the fire at one time the efforts of the brigade seemed to be of no avail. Huge tongues of flame, finding an outlet from the roof shot up into the air with a terrible roar, scattering burning embers in every direction.

SUCCESSFUL EFFORTS

Noticing that the east end of the roof and building were doomed, Mr. Geo. E. Ritchie mounted a ladder and axe in hand cut a hole in the west end of the roof through which volumes of water were poured. In this action he was followed by others, and this, coupled with the efforts of the brigade inside had the result of preventing the fire spreading to the Abbott street end of the building.

Drenched to the skin the boys worked on and half an hour after the outbreak was reported it was noticeable that the fire, slowly but surely was being got under control, much to the relief of a number of people who were on the roof of the Lakeview hotel and who had valiantly been working in deluging that building with water. It was certainly a close call for the horses. Another three minutes delay, and they would all have perished.

COVERED BY INSURANCE

It is undisputed that if the building had not been of concrete, and the roof covered with specially prepared material, which as it were held the fire, and which greatly assisted the efforts of the brigade, that much damage to adjoining property would have resulted.

The damage to the building and stock is estimated at about $6,000, which is covered by insurance. The

Retail Merchants Hold Convention

Many Interesting Matters Under Discussion

The Retail Merchants' Convention, held at Vernon Tuesday and Wednesday proved an eminently successful gathering, over one hundred members being present, of whom fifteen were from Kelowna.

The occasion was the visit of the provincial officers of the B.C. Association, and assembled to meet them were men engaged in the retail trade from Salmon Arm to Penticton.

Amongst those attending the convention from Kelowna were Messrs. K. F. Oxley (president of the local branch), A. M. Dalgleish, W. M. Parker, J. Ball, M. A. Alsgard, Geo. S. McKenzie F. Davis, G. A. McKay, W. Haug, D. D. Campbell, W. Ludlow, D. C. Foster H. F. Bicks, J. B. Knowles, and C.H. Jackson (local secret

The convention was held in the Oddfellows' Hall, Mayor Smith of Vernon welcoming the visitors on behalf of the city.

Mr. C. J. Wilson, president of the Vernon branch of the Retail Merchants Association, extended a welcome from the merchants of the city.

Vice-president J. N. Harvey, in replying, spoke in eulogistic terms of the apparent air of prosperity which seemed to permeate the whole of the Okanagan, and which he thought was most encouraging.

The most important address of the convention was delivered by President F. W. Welch, of Vancouver, who spoke of the aims, objects, and benefits of the Retail Merchants' Association of B.C. He referred enthusiastically to the benefits accruing to the retail merchant from organization. It was

(Continued on Page Nine)

Express Co. Improve Fruit Handling Methods

Reduction in Charges to Prairie Points

Considerable improvements are to be effected in the handling of Dominion Express packages this season. In previous years the custom has been to collect most of the express in the morning, a little before boat time. On account of greatly increased business this year the bulk of the packages will be collected in the afternoon which will mean that an up-to-date receiving room with the most modern ventilating appliances has been rendered necessary, and carpenters are now busily engaged in making the necessary alterations at the wharf.

NEW TRUCKS ON ORDER

We are informed by the local agent, Mr. MacIntyre that fifty new trucks have been ordered for various towns on the lake, of which Kelowna will receive almost half. This will give the company here 100 trucks altogether to deal with the traffic. The benefit of these trucks is obvious, more especially in the case of soft fruits, as there is only one handling, the trucks being placed direct on board the boat and not unloaded until they are wheeled alongside the train at the Landing.

REDUCTION IN CHARGES

This season there will be a special reduction to a number of points in Alberta, the rate being reduced from $2.25 to $2.10 per 100 pounds.

Film Competition Result

There were many entrants in the competition inaugurated by the manager of the Opera House for the most appropriate title for the moving picture films which he is now manufacturing. The object, as previously stated, was to give the films a suitable name which would distinguish the brand from any other class on the market.

Several of the suggestions bore the hall-mark of originality, and it was only after very careful consideration that the honors were equally divided between Mr. J. E. Lloyd and Mr. Neil Gregory. In neither case, however, was a thoroughly suitable name suggested and Mr. Duncan has himself decided that all reels dealing with local happenings shall be issued as theCanadian Animated Gazette. Other special films will bear the trade name "Okanagan Films," and will be known as the product of the Okanagan Film Manufacturing Co., Kelowna, B.C.

A consolation prize of a free pass for a month was awarded to Mrs. J. Saucier and Miss Beata Lloyd-Jones.

Magnificent Offer of Kelowna Resident

Scheme to Provide for Aged and Infirm

Perhaps very few people even in Kelowna know of the fine estate that Mrf Rembler Paul has, close to Kelowna, and which he is prepared to give to the city as an asylum for the aged and infirm.

His sad bereavement was doubtless the cause of his making a further reference to this matter the other day. With the exception of one and a half acres for a private burial ground, he is willing to deed over to the city 164 acres for the purpose indicated above if the government will contribute an equal amount to what Mr. Paul is prepared to donate—apart from the actual gift of the land—for clearing the property and for payment of taxes. His scheme is to make provision for people, who owing to circumstances beyond their control are in their old age in want, the only condition being that they must have resided within ten miles of Kelowna—on either side of the lake—for at least five years, and are known to be respectable.

SCHEME WELL UNDER WAY.

Although some time has elapsed since Mr. Paul first mentioned his project, when scoffers impertinently remarked that there were no old people in Kelowna, he has nevertheless been working quietly and unostentatiously on his scheme and he has already done much in the way of bringing the property under cultivation. It is unquestionably one of the beauty spots of the valley, with an uninterrupted view of the lake and surrounding country. A house containing five bed rooms, living room and kitchen has already been built, and another containing ten or twelve bed rooms is about to be erected.

It will therefore be seen that even now—if the scheme were put into operation—that considerable accommodation could be afforded.

Mr. Paul's contention is this, that with the ultimate development of the district there is bound, in time to be a number of old people who through no fault of their own—owing to illness disease, and other causes—are left without a helping hand, and it is with the object of making their thorny path easier that he is prepared to act in such a magnanimous manner.

INTERESTING CAREER

The life history of Mr. Rembler Paul reads like a romance. 65 years ago—he is now in his 82nd year— he was in a humble way connected with the old Kingston, Ont., "British Wig" in Dr. Barker's time. After a year and a half he made up his mind that there was not very much money in journalism—at least on the Kingston publication—and, to use his words, quitted ink slinging.

Coming west, he eventually settled in Regina when that city could only boast of a few tents. Here fortune smiled upon his commercial efforts, and he was one of the few who made a large fortune out of the old Banff coal mine.

Mr. Paul has travelled extensively in later years in search of a land like the ancient Phoenicians,w here sunshine and health were beyond all doubt and in this connection he is an unqualified booster for Kelowna. "This valley" he remarked to the writer the other day "is the California of Canada. There is no getting away from it. I have traveled far and wide, but here, right in Kelowna we have one of the finest climates in the world. The place will be filled with people coming from the north-west seeking a more genial clime, and from the coast where it is so wet and damp, and Kelowna and the Okanagan some day will be acknowledged as the California of the Dominion.

Kamloops succeeded in beating Vernon yesterday at Vernon by 2—0

Mrs. D. J. Welsh was a passenger to Vernon this morning.

Mr. and Mrs. Brisbain have gone to visit friends in Ontario.

This special privilege is granted for the purpose of advertising the city and district.

If anything were needed to prove the efficiency of Kelowna's volunteer fire brigade it was certainly afforded at Saturday's blaze. It was a splendid object lesson of promptitude and training, of daring and courage which would have done credit to any city. Notwithstanding the fierceness of the outbreak, within thirty-five minutes of the time that the call was turned in the fire had been got under control.

Efficiency means much, and in the case of fire protection cannot be overestimated. In western towns especially, where there are so many frame buildings, any lacking in this respect would be fatal. It is therefore gratifying to find that our fire-brigade boys have once more risen to the occasion; they have added further lustre to their excellent record, and have again demonstrated that they are thoroughly competent. Too much praise cannot be bestowed upon this earnest band of workers, who, without thought of any pecuniary gain, risk life and limb in the protection of our city.

The efforts of the brigade were greatly assisted by the splendid water supply. A pressure of 115 to 120 pounds was maintained throughout the conflagration.

The fact that Kelowna is now in a position to deal so effectually with outbreaks of fire should certainly help to strengthen the argument which was raised at the last Board of Trade meeting that the time is now ripe for seeking a reduction in our fire insurance rates. Much money has been expended in fixing hydrants all over the city; we have a plentiful supply of water; a brigade second to none in the interior of British Columbia; and our equipment, excellent though it is will shortly be supplemented by a motor truck. Surely all these improvements are worthy of consideration, and should unquestionably be strongly urged by the city.

We print this week a dispatch from the old country in which it will be noted that the London County council have turned down flat the question of including sex hygiene in the curriculum of public schools.

This matter has from time to time been discussed locally, and many will doubtless be interested to learn what that august body, easily the most important and distinguished educational organization in the world, has to say in connection with what is admitted to be a difficult and much debated problem.

The board referred to have been repeatedly urged to allow the teaching of sex hygiene in schools. Finally it was petitioned to do so, and at a recent meeting the matter was debated. The result was a practically unanimous refusal, accompanied by the statement that the council believed it would do far more harm than good to accede to the wish of the petitioners.

That the decision arrived at will meet with general approval, not merely in the old country but throughout the Empire is certain, and will find favor with the majority of parents and guardians, who have studied the question even superficially. As the London County council point out, while it might be necessary in the case of some of the elder scholars to impart certain information, this should be done either in the home or privately by the teachers, as a matter of discretion. To include it in the curriculum would be forcing upon the attention of many scholars a knowledge of matters which parents alone had the right to discuss with them.

Not long ago the writers attention was drawn to a certain pamphlet, a sort of catechism, published in the interests of the few eratics who are anxious to exploit a dangerous subject under the guise of a purity crusade and which to any sane parent or guardian was, to put it very mildly indeed, exceedingly obnoxious and diametrically opposed to what the great majority of the parents would allow to fall into the hands of children. The decision of the London County council is one which will commend itself we feel sure to almost all school trustees.

That Canadian sentiment is largely if not unanimously in favor of Oriental exclusion goes without saying. But not until the Komagata Mara incident has the subject caused so much attention. The question is more acute in British Columbia than in any other part of the Dominion, because this we all know is the only province which has suffered from an Oriental invasion and possibly the only province whose climatic conditions render it attractive to the Oriental.

In a recent interview Sir Richard McBride remarked:

"While we must, of course, recognize that these men are British subjects, fair and full consideration must be given to the local and domestic sides af the issue. We have the right to determine who shall and who shall not enter this country—who shall become part of our household, as it were. I do not believe that a crisis will be precipitated in India if these immigrants are refused entry, as has been suggested in some quarters. The British government has successfully governed India for many years and has built up and developed a vast trade under its jurisdiction.

"I know of no reason why the surplus population of India should seek to settle in this country against our wish. We concede the right of the Indian government to refuse admission to Canadians if it so desired and so we should be able to reserve the same right."

Sentiment throughout Canada is growing in the direction of the policy so strongly adhered to by one provincial legislature and backed up by Ottawa. Hitherto the subject has been regarded as one of wages—of the displacement of white labor by the Oriental—but a wider conception is now being attracted to the question and which is not one merely based on the economic grounds; the grave and vital question is racial. Already we have too many of Gurdit Singh's tribe here. Right throughout this province we have a plethora of Japs and Chinese. Let us cry a halt while it is yet time to say that Canadians shall inherit "God's own country."

THE DEAD THAT SLEEP

Toll for the dead? Nay, mourn for those who weep
The loss of dear ones who have gone before;
Resting awhile, perhaps, in ocean's deep
Until they wake upon a brighter shore.

'Tis hard for us whose eyes are blind with tears
To see the mercy in this quick demise
Or recognize the wisdom, beyond fears,
Of Him who holds us 'neath His kindly eyes.

They who have gone, have oftimes prayed that He
Would take them at His own sweet will to be
With Him in that place where no mourning is;
But life's full gladness thro' eternity.

They live, they live! 'Tis we the living dead
Who need the prayers and sympathy of all
Our loved ones who for pity's sake will watch
And wait till we, at last, answer His call.

Let us then help to ease the pain of those
Whose hearts in this catastrophe have bled,—
Bring light to them that when their own days close
They may rejoice. Toll for the living dead.

SYDNEY H. OLD.

Kelowna, B. C., June 7, 1914.

Written by request in re the loss of the "Empress of Ireland."

Wedding Bells

METCALFE-HUBIE

A pretty wedding took place on Thursday last at the Anglican church, when Miss Catherine Hubie was married to Mr. John Laird Metcalfe, of Benvoulin. The Rev T. Greene performed the ceremony. The bride was attended by the little Misses Margaret Sutcliffe and Joan Russell, as bridesmaids, and the best man was Mr. Wm. Metcalfe. The bride was gowned in white satin with tunic of white lace and train trimmed with true lovers knots and orange blossom, and was given away by her cousin, Mr. Douglas Cameron.

The church was tastefully decorated, and after the ceremony a reception was held at the Guisichan, over 100 guests being present. The honeymoon will be spent in touring many parts of the province. Upon their return they will take up their residence at Benvoulin.

GREEN-OWENS

At the Anglican church, Tuesday last the marriage took place between Mr. H. Green and Miss Mary Elizabeth Owens. The happy couple left by the morning boat for Vernon. The Rev. Thos. Greene officiated.

HAPPY IS the woman who is never unprepared; who can always lay a nice appetising meal or light luncheon before any guest—unexpected or not. Her friends praise her for her housewifely qualities and she feels that delightful satisfaction which can only come from hospitality perfectly done.

The secret lies in having a well chosen selection of canned goods and table dainties always at hand. Look over our stock (the best of the kind in the town) and make a selection to-day. Then put your fear in the cupboard for you will be prepared for any company—come when it may.

SYNOPSIS OF COAL MINING REGULATIONS

Coal mining rights of the Dominion in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the Northwest Territories, and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for the lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10 an acre.

For full information application should be made to the secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion lands.

W. W. CORY.
Deputy Minister of the Interior.

N.B.— Unauthorized publication of this advertisement will not be paid

NOTICE

In the Matter of the "Drainage, Dyking and Irrigation Act, 1913," and in the Matter of the Okanagan District.

The following petition, signed by a majority of the owners in value of the herein described property will, on the 30th day of June, 1914 be presented to the Lieutenant-Governor in Council under section 9, of the "Drainage, Dyking and Irrigation Act, 1913."

PETITION

To the Lieutenant-Governor in Council of the Province of British Columbia:

The petition of the undersigned humbly showeth:—

1. That your petitioners constitute a majority in value of the owners of the following described lands, that is to say: Lots numbered 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 65, 66, 67, 68, 69, of plan numbered 426; all of plans numbered 425 and 264; all of which properties are situate in the Osoyoos Division of the Yale District in the Province of British Columbia and contain approximately 1337 acres.

2. That your petitioners are desirous of having the said lands reclaimed and improved by drainage, by the execution of the following works: the laying of a concrete tile drain from sloughs situated on the lands described as plans numbered 425 and 264 in the Rutland District, in a westerly direction to Mill Creek.

3. That your petitioners desire to appoint as Commissioners for the carrying out of the said works the following: Willis Frederick Schell, A. C. Loosemore and Earl Clever.

4. That your petitioners desire to name the said district "Rutland Drainage District."

And your petitioners, as in duty bound, shall ever pray, etc.

(signed)

WILLIS FREDERICK SCHELL.
A. C. LOOSEMORE.
EARL CLEVER.

News From Far and Near

A steady and increasing flow of gas has been struck at Hall's Landing, B. C., near Revelstoke.

: : :

A rich strike of ore bearing free gold and copper five miles south-west of Fort George has started a big rush for claims.

: : :

The contract for the interior storage elevator at Calgary has been awarded to Janse Bros. & Co., Calgary, for $788,000. The elevator will be of 2,500,000 bushels capacity and will be ready for the next year's crop.

: : :

Approximately 2000 gallons of oil gushed from the Dingman well in 18 minutes before a large delegation of city officials and oil experts. Five barrels of this oil were sealed on the spot and forwarded to Winnipeg, where Alderman Frast is proceeding to refute the rumors that the well is a fake.

: : :

Prof. Geo. L. Parker of the zoology department of Harvard University, one of the three men appointed by the government to investigate the conditions of the seal colony in the vicinity of the Pribyloff Islands, has left for Seattle to sail on the Revenue Cutter McCullough. He will remain in the Behring Sea until August 18th.

: : :

A whole carload of live bees has recently arrived at Clover Bar station, twelve miles east of Edmonton on the Grand Trunk Pacific railway, the shipment coming from Sear, Michigan. P. H. Orth, of Clover Bar, who imported the bees, is evidently going into the industry of bee keeping on a large scale and the vegetation of Alberta gives every hope of success.

: : :

During the season of 1913, two million nine hundred and six thousand, four hundred barrels of apples were grown in the Dominion, according to statistics compiled by the Department of Trade and Commerce. Of this total two million barrels were grown in the province of Ontario, or over two-thirds of all the apples produced in the country.

: : :

A naval courtmartial sentenced Vice-Admiral Matsumoto to three years' imprisonment for accepting $200,000 from a British shipbuilder, the Vickers company, which built the Japanese battleship cruiser Kongo, costing about $13,640,000. The court ordered the confiscation of the sum which the officer illegally accepted. Captain Sawasaki is also sentenced to a year's imprisonment.

: : :

The announcement has been made that Hon. L. P. Pelletier, postmaster-general has entered into a new agreement with the Empire of Japan for the direct exchange of parcels with which the present rate of 20 cents a pound will be reduced to 12 cents a pound, and the present limit of weight of 7 pounds increased to 11 pounds. The new agreement is to take effect from September 1, 1914.

: : :

According to a Winnipeg dispatch, Mr. George Bury, vice-president of the Canadian Pacific left recently for Vancouver on his first regular inspection trip of the company's lines this year. He will pay particular attention to the Okanagan and the Weyburn-Lethbridge lines and will inspect the Kettle Valley railway progress with a view to rushing the line to completion this summer or in the early autumn.

: : :

British Columbia paid duty and inspection charges amounting to more than $86,000 on apples, pears and peaches during the year 1913, according to statistics compiled by Fruit Inspector Clarke of Vancouver. The apple duty inspection charges came to $49,000 last year; the charges for peaches was $29,608.70 and for pears $8,171.25.

A total of 309,676 boxes of apples were imported, 35,575 boxes of pears, 41,375 boxes of plums, and 7,688 boxes of prunes, besides 38,180 boxes of peaches and 31,158 boxes of apricots. Vancouver alone consumed 99 carloads of peaches last season.

: : :

The department of labor's index number of wholesale prices stood at 136.8 for April, as compared with 136.7 for March and 136.2 in April 1913. Eggs and butter declined steeply, grains averaged lower, cattle and beef were easier, hogs, potatoes, sugar and molasses declined, while some metals were lower. Fodder, canned salmon, onions, flour, oatmeal, raw cotton, and horsehides advanced, and raw furs averaged higher. In retail prices a general decline in eggs and butter was the chief feature. Beef advanced in several localities, but veal, pork, sugar and coal and wood tended downward.

The official announcement of reorganization of the British Columbia Packers' Association has just been announced. The British Columbia Fishing & Packing Co. Ltd., with Dominion charter has been incorporated with a capital of $25,000,000. The latter company offer to exchange the shares of the former on the basis of one share for two of the Dominion company to all classes of shares of the Packers' Association Company.

: : :

A bulletin issued from the poultry branch at Ottawa by the Dominion Livestock commissioner, this week impresses on all poultry keepers the advisability of getting rid of their male birds now that the breeding season is over. Infertile eggs are longest and fetch accordingly higher prices. By selling now higher prices may be obtained for roosters than later on in the summer. From now on these birds are non-producers and feeding them is an unnecessary expense.

: : :

A new Canadian government loan is being underwritten in London, comprising $25,000,000 in 4 per cents at 98. The previous Dominion of Canada loan floated there was for $29,000,000 in December last when 17 per cent was taken up by the public and 83 per cent left with the underwriters. The October loan for $15,000,000 was subscribed by the public to the extent of 43 per cent. Gilt edged stocks show considerable weakness on news of this latest issue.

: : :

In sixty-nine countries and colonies two hundred thousand soldiers of the Salvation Army spoke thirty-four different languages on Sunday last in the memorial services conducted the world over in honor of those of the Empress dead who belonged to that organization It is estimated that about 2,700,000 people gathered in all the citadels and buildings of the Army to mourn for the one hundred and thirty-eight of the army that went down in the waters of the St. Lawrence with the Empress of Ireland.

: : :

That the government has no intention of relaxing in any way the regulations with regard to the entry of Orientals into British Columbia, is indicated by the fact that a new order-in-council has been passed making still more rigid the present prohibitions. The present order-in-council prohibiting the entry of all artisans and laborers for six months has been extended to include two new ports in British Columbia, namely, Newport, near Vancouver, and Alberni, on Vancouver island.

: : :

The minister of finance at St. Petersburg has informed the budget committee of the duma that Russia, within the next five years must spend $3,700,000,000 for the army and navy. The budget for the current year for the army and navy amounts to nearly $500,000,000. Excluding the cost of strategic railways the empire has spent $2,580,000,000 in the last six years and lately proposed enormous increases in order to meet the German growth of armaments.

: : :

How to deal with the growing menace of the militant suffragette agitation is becoming a problem of tremendous import, not only for the government, but for the community at large. All efforts of their well-wishers to persuade the militants that they were retarding instead of advancing the cause have been in vain; they are convinced that nothing but force will achieve their aims, and they have been applying themselves with renewed vigor to outrages.

: : :

Rose-colored snow fell recently in the Alps, chiefly on the mountains (11,887 ft.) in the Canton of Glarus. On analysing the snow it was found to be impregnated with minute particles of sand. It is thought that this is the aftermath of the great storm above the Sahara, which blew large quantities of sand recently across the sea and the Italian Alps to the Swiss mountains, descending on the white slopes in "yellow snow". The "rose snow", however has hung in the upper air several weeks before falling.

: : :

An invention which is declared will give Germany the lead in aerial warfare is being thoroughly tested by military experts. The apparatus which is the invention of an army officer, enables a machine gun to be mounted on an aeroplane in front of the pilot, who will thus be able to control both the gun and the machine. The gun can be turned in any direction, and can be used against an enemy beneath. So far, it is stated the experiments have been most successful.

In the supplementary estimates recently brought down by the Dominion legislature, appears two items of $17,500 and $5,000 respectively. The former amount is for further telegraph and telephone extensions in the southern Okanagan, and the latter amount is for improving a navigable channel in the Okanagan river.

: : :

Trade reports for the Dominion generally are to the effect that there are indications of a return to normal business conditions. The remarkably favorable agricultural conditions in western Canada are stimulating confidence in all directions. The outlook for all kinds of crops in the Pacific States of the union are reported as never better. Dun's Review says of American trade conditions: "Low merchandise stocks at distributing centres, cheap money and the favorable crop outlook are the chief factors operating to create a more cheerful sentiment regarding the future."

: : :

Practically nothing may be recovered by those who lost relatives or baggage in the Titanic disaster as a result of a decision of the Supreme court. The court held that the liability of the Oceanic Steam Navigation Company against the $13,000,000 in claims against it as owner of the Titanic is limited in suits in the United States by the American Limited Liability law of 1851 to the value of the salvage recovered and to the freight and passage money received on the Titanic's voyage. That amounts in all to about $91,000. The decision in no way effects suits against the owners in other countries.

: : :

An editorial printed in the "El Imparcial", the most influential and the most widely read paper in Spain, declares Colonel Roosevelt's approaching visit is undesirable. The "El Imparcial" editorial reads that Colonel Roosevelt fought as a volunteer against the Spaniards, and declares that his actions were most unfriendly toward Spain. The paper also reminds its readers of the strong anti-Spanish sentiment which prevailed in the United States at that time, and says that in a circus performance in New York a trained monkey was exhibited, trampling on the Spanish flag, to the huge delight of the audience.

: : :

Mrs. E. Parker, of Edmonton, Alta., has reason to believe that 23 is a lucky number, no matter how strong a hoodoo it may seem to others. She met her husband on the 23rd, became engaged on the 23rd of the next month was married on Friday, the 23rd, bought a lot in Medicine Hat numbered 23 on which a house was built the number of which ended with 23, left Medicine Hat for Edmonton on the 23rd; when taking a trip to the Old Country last month she chose the Donaldson liner Cassandra because it sailed from Montreal on May 23rd, rather than the Empress of Ireland, which was wrecked, and the Royal Edward, which struck an iceberg.

: : :

Shamrock IV., Sir Thomas Lipton's new challenger for the America's Cup has just been for her first sail-stretching spin in the vicinity of Spithead. She was accompanied by Shamrock III The wind was light and fluky, and inadequate to test the capabilities of the challenger. Under her huge mainsail and her sloop foresail she manoeuvred handily, however, and picked up way quickly after tacking. The towering mast of the new yacht dwarfed that of the old Shamrock.

Sir Thomas Lipton was on board the challenger, together with Charles E. Nicholson, her designer, and William P. Burton, the amateur yachtsman, who is to command her in American waters.

: : :

Much anxiety is being caused in French official and political circles by the possibility of a new German military law enacting a furrther increase of military forces. The German War Minister's denial is considered as very alarming, since it specifically denies the news of a new law for the present, but not for the immediate future, as was announced. "The words of the German minister of war contain so many negative as well as positive assertions that it is indeed very difficult to strike a balance. M. Jaures, points out that Germany can, without increasing the term of service in her army, by using all her recruits, ensure a numerical superiority identical with that which decided France to increase her military term of service from two to three years. "We are in exactly the same position as we were in before the enactment of the Three Years Bill" he declares.

TOWN AND COUNTRY NOTES

Mr. B. P. Little paid a visit to Vernon Saturday last.

* * *

Mrs. F. M. Buckland will not receive again this season.

* * *

Mr. Archibald of Victoria, brother of Mrs. D. MacFarlane is paying a visit to Kelowna this week.

* * *

There will be a band concert at the park tomorrow (Friday) evening commencing at 8 o'clock.

* * *

Mrs. Pelton went to visit friends at Penticton, travelling down the lake by Tuesday afternoon's boat.

* * *

Church of England service will be held next Sunday at 3 o'clock at East Kelowna school house.

* * *

Mr. M. Hereron has just deserted his old-time horse and buggy and purchased a Ford automobile.

* * *

Miss Cummings has gone to Armstrong on a visit to friends and relatives.

* * *

Mr. C. Dunning, one of the tellers of the Bank of Commerce has gone to Sherbrooke, Que., on his holidays.

* * *

Mr. Kickley, manager of the "Ford" Co.'s branch at Vancouver was in Kelowna Monday.

* * *

Mr. W. B. Harris, C.P.R. car service distribution agent was in Kelowna on Monday making arrangements for the coming season's operations.

* * *

Mr. Hector Mills Heyland, who has for some time past been with Capt. Harmon on his ranch, returned to the old country Wednesday.

* * *

The usual monthly early morning service will be held at St. Andrew's church, Okanagan Mission, next Sunday morning at 8 o'clock.

* * *

Mr. and Mrs. D. Williams of Calgary were in town Tuesday. Mr. Williams is connected with the Maclean Publishing Company.

* * *

The Country Girl's Hospital Aid will meet at the home of Mrs. Seon, foot of Cadder avenue on Saturday afternoon, June 13th at 3 o'clock.

* * *

Mr. Rembler Paul hesires to thank all friends for their kind sympathy and for the many floral tributes sent on the occasion of his recent bereavement.

* * *

In the Methodist church on Sunday morning the pastor will speak on "The Third Cardinal Virtue" and in the evening Mr. Alfred Crowcroft will deliver an address.

* * *

Mr. Angus McMillan, late of the Oak Hall, went to Vancouver on Friday last. He has entered into a partnership with Mr. Paul Pitner and they will operate a moving picture business.

* * *

Mr. T. N. Morrison left Kelowna on Friday for Montreal on a business trip. His wife will accompany him as far as Weyburn, Sask., where she will spend the summer with relatives.

* * *

Mrs. Fred Nicholson, of Kamloops, who has been staying with her parents, Mr. and Mrs. John Dalgleish, during her father's recent illness, returned to her home on Saturday. Mr. Dalgleish is now able to be about.

* * *

Mr. E. C. Scott, who a few years ago sold out his hardware store to Messrs. Dalgleish & Harding was in town Monday. He is traveling for a firm of china manufacturers and visited Kelowna in connection with his business.

* * *

Mr. Thompson, of the Morrin & Thompson Co., of Phoenix, distributors of the "Overland" cars for eastern B. C., was in town this week. While here the Burbank Motor Co., placed an order for two cars, one of which will be here Monday.

* * *

Overheard at the recent Vernon manoeuvres: Sergeant (doubtful as to whether he has distributed rifles to all the men)— "You without arms 'old up your 'ands!"

: : :

Quite a furore was caused on Bernard avenue Tuesday morning by the appearance of an Irish jaunting car. In recollection memories of Killarney were conjured up in the minds of many as the smart little turnout rolled gaily along; but then what is Killarney compared to our magnificent Okanagan Lake?

The steam roller has been at work during the past week improving the drives in the park.

* * *

Mr. Frank Knapton is moving his boot repairing business from the rear of Tait's shoe store, and is opening a separate workshop next door.

* * *

Much has been added to the attractiveness of the Palace Hotel during the past week by the new coat of paint which is being applied.

* * *

The finishing touches to the new steamer Sicamous are being rapidly proceeded with, and the vessel will be ready to be put into commission in the course of a few weeks. It is more than probable that before actually being placed on the service that a number of residents at the principal points up the lake will be invited to have a run down to Penticton and back.

* * *

The Ladies' Hospital Aid will hold their annual Talent Tea at the Aquatic Pavilion next Tuesday afternoon, June 16th from 3.30 to 6 o'clock when tea will be served at the regular charge of 25 cents, and ladies working for the Talent Fund will make their returns. In the evening there will be a dance in aid of the Talent Fund. Admission 50 cents a couple. There is a heavy demand upon the "Aid" for assistance in furnishing the new wing at the hospital and the ladies ask for your generous patronage, afternoon and evening.

THANKS

We wish to express our deep appreciation of all who assisted in any way whatever at the severe fire on Saturday last. We realize that had it not been far the willing hands so freely extended to help in all ways that the loss must have been total.

Our numerous friends who offered us stable accommodation we wish to thank also, and last but not least the city fire brigade (The Smoke Eaters). They dih some wonderful fire fighting. Examples of grit and determination were shown on every hand, and had it not been for their efforts some neighboring buildings would have been involved in the fire.

MAX JENKINS & CO.

LOCAL BOWLERS MEET IN SPECIAL MATCH GAMES

Much excitement has been created during the past week by special match games at the Dreamland bowling alleys. On Friday night of last week a special match was arranged between Hockett and Mildenhall. The contestants rolled five games, total pins to count, and in this match Mildenhall won over his apponnent by a margin of 24 pins. His average for the five games was 176 2-5.

Thirsting for revenge a return match was played Tuesday night and strange to say the tables were reverses and Hockett was the winner by exactly 24 pins, the same number by which he was defeated last Friday.

As each of the men have now won a series, no doubt a rubber will be played in the near future to decide who's who.

In last night's contest Hockett got away to a good start while Mildenhall lost nearly 100 pins in the first two games in which he drew a number of bad splits, but after this he pressed hard and picked up remarkably toward the finish, but the lead was too great to overcome.

Following were the scores last night: Hockett, 183. 169, 146, 214, 179, total 890.

Mildenhall 132, 123, 174, 200, 237, total 866.

Rules for Picking, Grading and Packing Berries

STRAWBERRIES

The Horticultural Branch of the Department of Agriculture has issued the following circular in connection with the picking, grading, and shipping of strawberries and raspberries, which, as the season is just commencing, will doubtless be read with interest by growers.

1.—Make picking as soon as the color of the berries indicates the proper market maturity. For long express shipments should be made when berries show about one-third color, the degree of color depending upon the distance of the market.

2.—Make frequent pickings, going over the vines on alternate days. Immediately after a period of rain go over the whole patch, cleaning up all the fruit and sending the fruit that is fit to the cannery.

3.—Pirk in the cool part of the day if possible and do not allow the fruit to stand in the sun or dust after it has been picked. Carry the stands to the packing shed at once after they have been filled.

4.—Each picker should be provided with stands holding six cups. Remove the berries from the vine by breaking the stem over the fore-finger in giving the berry a little side motion. Do not injure the berry in anyway, either by pressure or by tearing it loose from the calyx or "hull". Pick the vines clean and place soft berries in separate cups for the cannery, throwing the culls away.

5.—Pack the berries in a cool shed having plenty of light. Before packing remove the berries from the picking cups, placing them upon a cloth covered packing frame. Be sure the berries are perfectly dry before packing. Forcing currents over the berries while they are upon the frames removes all moisture, brings out the lustre on the fruit and leaves it in a cool condition.

6.—Use experienced packers. For long distance shipments make at least three grades (A). Distance market grade, using only sound partially colored fruit. (B). Local market grade, using sound and well colored fruit. (C) Cannery grade, which includes a good quality of ripe fruit. All berries showing the least indication of decay or deterioration are culls and must be thrown away. Such berries will spoil the rest of the crate.

7.—To determine the proper color that berries should have for long distance shipment by express the best plan is to study the train schedules and determine the amount of time it will require the berries to arrive at the destination. Pick several cups of berries at different stages of maturity and place them in a temperature of 65 degrees. At the end of the given time inspect the berries and determine which is in the best shape. For this test the cups should be wrapped up in newspaper and the time of the test should be two or three days over the actual train time.

8.—When packing for market use uniform sizes of berries, placing them in clean, new cups. Have the top layer of berries come slightly above the outside edge of the cups and have the rows faced evenly so as to give an attractive appearance.

9.—As soon as packed place the cups in the crate and keep in a cool place. In nailing on covers use four nails to the cleat. Do not nail superfluously as it irritates the consumer and detracts from the packer's reputation.

10.—Cool the berries down to 60 degrees before shipping. This may be done by leaving the fruit in the night air and shipping in the morning.

RASPBERRIES

1.—Pick the berries as soon as the fruit will slip off the core without crumbling or mashing. Every berry that is red must come off the vine.

2.—Pickers must use small carriers attached to the waist so as to hold the cups. Pick directly into the shipping cup and never transfer from one receptacle to another any raspberries that are to be shipped, have a separate cup for cannery berries. Throw away any berries showing decay. Do not put one over-ripe berry in the shipping cup as it will spoil the rest and the market condition of the whole crate will be ruined.

3.—Berries should not be picked while the bushes are damp, either from dew, rain, or fog, except for cannery purposes.

4.—See that the cups are filled full, having all the corners filled to the top.

5.—Pickers must not pinch the berries, nor hold them in the hand to be crushed. The berry should be taken firmly between the fore-finger and the thumb, with a lateral twist removed from the core and placed directly in the shipping cup. Pinching makes a red discoloration after the berry has been on the market a few days, which is followed by premature softening and decay.

6.—As soon as picked place the cups in the crate which should be kept in a cool place. Never allow berries to stand in the sun or dust after being picked. For express shipments cool the berries to 60 degrees by fanning with night air and ship the following morning.

Benvoulin Notes

(From our own Correspondent.)

An impressive memorial service, for those who lost their lives in the recent terrible disaster, which overtook the "Empress of Ireland", was held in the Presbyterian church, Benvoulin last Sunday evening.

The pulpit was suitably draped and a large Union Jack heavily enswathed in black was suspended on the wall behind the pulpit.

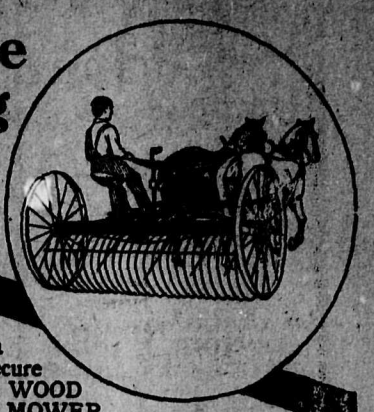
The church was filled to capacity with a sympathetic and attentive audience. The hymns and scripture lessons chosen were in perfect harmony with the occasion, and led up to the thought of the sermon, the text of which was taken from James 4: 14. "For what is your life? It is even a vapour, that appeareth for a little time, and then vanisheth away."

In his discourse the Rev. W. T. Beattie emphasized first "The preciousness of life" drawing illustrations from the recent lamentable tragedy of the "Empress". He repudiated the idea that this love of life is the result of civilization or the product of wealth and happiness. He affirmed that the desire to live is a divine instinct in man, and that Christ came to give life more abundantly.

He next dealt with the fact that "Life is irrevocable." What is done is done. We cannot do as the painter who touches up his faulty picture.

The preacher closed with the thought of the "Uncertainty of life" and again drew illustrations from the "Empress" disaster. He urged his audience to accept the proferred "Gift of God", eternal life in Jesus Christ.

Own These Haying Helpers This Year



Decide that you'll no longer labor under a handicap at haying time. Secure the services of these FROST & WOOD HAYMAKERS, "GIANT NO. 8 MOWER and TIGER SELF DUMP RAKE." For twenty years and more these machines have saved time, money, labor and horse flesh for thousands of progressive farmers. They are worthy representatives of our line of

COCKSHUTT IMPLEMENTS

Frost & Wood Mowers are not merely fair weather machines. They're right there with the power and cutting ability when other mowers are apt to fall down. Put a Frost & Wood mower to work in a heavy or tangled crop and watch how easily it handles the job. You can start it anywhere in the field and the knives will begin cutting the instant the horses move forward. "Flying Starts" are not necessary. The Giant No. 8 has great driving power because of the simple and compact arrangement of the gears. Smooth running and light draft are assured by a plentiful supply of large Roller Bearings. It will give you the kind of satisfaction you are looking for.

The Tiger Self Dump Rake is the best Self Dump Rake made. It has given satisfaction for many haying seasons. The teeth are made of a special grade of steel, that has proven by test, the best adapted to withstand heavy work and hard usage. They are carefully shaped to do the most efficient work.

The "TIGER" is strongly constructed throughout, frame, wheels and braces are all made of high quality steel, so there is nothing about it to get out of order An investment in a Frost & Wood Rake is profitable. With ordinary care it will last a great many years and will pay you large dividends of satisfaction each year at Haying Time. We will be glad to let you have further information about this or any other line of Farm Implements and Equipment.

News of Local Sport

Vernon Wins From Kelowna 9 to 4

The baseball game at the Agricultural Association grounds between the local club and Vernon easily proved that Kelowna, in her present crippled condition and without a pitcher are not able to clash with the other clubs in the B. C. I. league with any success, and the game went to Vernon by a score of 9 to 4.

The local club was switched around considerably, hoping to strengthen the defense as far as possible, but playing out of their regular position the boys best efforts were weak against the timely hitting of the visitors.

Davis started the game for Kelowna and pitched six innings when he retired with the score standing 4 to 2 in favor of Vernon. Purdy finished the game on the mound and the Vernonites hit the ball at will, scoring five runs off his delivery in the last three innings. Pierce worked behind the bat, thus it was necessary to bring Henning in to second base and Powless to short.

Only a fair crowd was present to see the contest, owing, no doubt to the previous day being a holiday and the stores remaining open during the afternoon of the game.

The game was called at 5 o'clock with Treadgold behind the plate and McIvor on the bases and their decisions met with the approval of both teams and the spectators.

Following is the score by innings
Vernon . . . . . 2 1 0 0 1 0 5 0 0—9
Kelowna . . . . . 1 0 0 2 0 0 1 0 0—4

The game at Revelstoke last Friday against Kamloops resulted in a 3 to 2 victory for the home team.

Following is the standing of the clubs:

	P	W	L	Pct.
Kamloops	7	7	2	.725
Kelowna	7	3	4	.429
Vernon	7	3	4	.429
Revelstoke	7	2	5	.283

HIGH SCHOOL DEFEATS ELLISON WHILE PUBLIC SCHOOL WINS AT RUTLAND

The High School again defeated the Ellison club at the park on Saturday afternoon by a score of 20 to 7. Quite a crowd had gathered to see what was expected to be a hard game, but which proved to be rather one-sided.

During the past month the Ellison club have been coming strong and it was thought that the High School club were in for another defeat, but Kincaid, who has been off for a week or so was himself again and the Ellison boys had little chance against him. Patterson worked in splendid form behind the plate.

Carney pitched for Ellison and was hit hard and often, but the ragged support behind was responsible, to a large extent for a total of 20 runs scored by the home club.

The game between the Public School and Rutland at Rutland was also won by the city club, the score being 13 to 6.

Only two weeks more remain to finish the schedule of the Schools League and at present it looks as though the High School will carry off the pennant as only a miracle will give Rutland a victory over them next Saturday. However should Rutland turn the trick and the Public school defeat Ellison the two city teams would be tie. The teams meet in the last game of the season and should the Public School defeat the High School a tie will result in which case another game would have to be played to decide the winner of the pennant.

Next Saturday Rutland will meet the High School at the park at 2.30 and Ellison will clash with the Public School at 3.45.

Following is the standing of the league to date:

	P	W	L	Pct.
High School	10	8	2	.800
Public School	10	7	3	.700
Ellison	10	5	5	.500
Rutland	10	0	10	.000

LOCAL WRESTLER LEAVES TO SEEK MATCHES

Clarence Eklund, the local wrestler, accompanied by Mrs. Eklund, herself no mean exponent of the wrestling game left last week for an extended trip through the boundary country and the prairies. He may also go south into the United States looking for a match with Mike Yokell the Salt Lake City wrestler.

No definite itinerary of the tour is known as he will go wherever he can secure matches with good men, only one bout being definitely scheduled to take place at Vanguard, Sask, late in July. He will also try to obtain bouts with Geo. Walker and Walter Miller while on the prairies.

In some of the cities visited Mr. and Mrs. Eklund will give exhibitions of wrestling and bag punching and as both are very clever artists the Okanagan valley, and Kelowna in particular will get much valuable publicity.

Accompanyinh Mr. and Mrs. Eklund is Mr. Harry Small, well known to local people, who will do advance work for the couple, scheduling bouts when and where he can.

Kelowna Cricketers Win From Vernon

The first cricket match of the season was played at the city park on Saturday last, when the Vernon team were defeated by the local club. Kelowna won the toss and started to bat. The play was very steady for a time and at lunch time the score was only 29 for two wickets. This however was partially due to the fire at the livery barn which attracted so many of the players that the game had to wait till some of them returned. After lunch the scoring was much quicker, the total soon reaching 86. Greensted was top scorer with 21.

On Vernon going to bat they found the bowling of Packer and Rowley too difficult for them to make more than 60. This score would have been considerably smaller but for a good stand for the last wicket, which put on nearly 20 runs. The catch by which Mitchell dismissed Moore was a particularly good one, except for this the fielding was rather scrappy. This will no doubt be cured by practice.

In the second innings Kelowna made 79 runs for 7 wickets.

The team wants a good deal of practice, but when it has had this it should be able to defeat any team in the valley.

ENO'S FRUIT SALT

Nature's Purifier

EVERYONE is at times subjected to the necessity of breathing bad air, either in stores, on the street cars or elsewhere. And, when one considers that it takes but two and a half minutes for every drop of blood in the body to become affected by this bad air, the importance of a safe and effective purifying agent is apparent.

Eno's "Fruit Salt" may be safely taken at any time by young or old, for the prevention of disease and the preservation of health by one of Nature's own laws.

Order a bottle TO-DAY from your dealer.

Prepared only by
J. C. ENO, Ltd., "Fruit Salt" Works, London, England

Big Development Scheme for Peace River

The plans of the Pacific, Peace River and Athabasca Railway, in which Mr. D. A. Thomas, the Welsh coal owner, is interested, have now been made public. The capital of the new railway is stated to be $15,000,000, with a bonding privilege of $50,000 a mile. The Peace River Tramway and Navigation Company, an allied concern, is capitalized at 1,000,000 with a bonding privilege of $35,000 a mile. The proposed route of the railway is from the mouth of the Naas River, in northern British Columbia, across the watershed of the Naas and Skena rivers, along the Skena and Bear rivers, to Bear Lake. It will then cross the divide to the Driftwood river, proceed through Hogem Pass to the Omineca river, thence to the Finley branch of the Peace river and along the main channel of the Peace to Vermilion rapids. Thence it will proceed to Fort McMurray and Prince Albert, Sask.

The development of the coal and oil lands is a prominent feature in the company's plans. The first section of the line from the Pacific end will tap the anthracite deposits in the Ground Hog district. When complete, from Prince Albert to the Pacific, the new railway will provide the most northerly east and west route across the western portion of the Dominion.

World's Best Dairy Cow

The Guernsey cow May Rilma has given in 365 days 19,639 pounds of milk, which contained 1059 pounds of butter fat. This cow is owned by the famous Chesterbrook Farm the home of Captain E. B. Cassatt, at Berwyn, Pa. She was, says "Farm Life" bred and raised at the farm, and her year's work has been carefully supervised under the regulations for the advanced register of Guernsey cattle conducted by the American Guernsey Cattle Club.

While officially supervised by the representatives of the Pennsylvania Agricultural Experiment Station, her work has also been checked by six similar institutions in other states, and by a representative of the Dairy Division of the United States Department of Agriculture. This record surpasses that of any cow of all the dairy breeds in the world. May Rilma is producing more butter fat in her thirteenth month than in her first, thus widening the distance beyond her nearest competitor and more firmly establishing herself as "Queen of the Dairy World."

Newfoundland to Ireland in Twenty Hours

Mr. Gustave Hamel intends to make an attempt to fly across the Atlantic this summer in a Martynside monoplane. The flight will probably be made from Newfoundland, and as the distance from there to Galway— measured from the Straits of Belle Isle to Clifden— is 1600 miles, it is calculated that the trip would occupy about 20 hours. The Martynside now under construction will be capable of a speed of from 80 to 85 miles an hour, in still air, and will fly for 25 hours if necessary.

Accompanying Mr. Hamel will be an experienced navigator—an officer of one of the great steamship lines who has made many voyages across the Atlantic—and Mr. Hamel, thus piloted, will fly in the track of the Trans-Atlantic liners. The airmen therefore are not likely to be out of sight of some ship for more than a short interval.

The machine is not a seaplane, and and has no floats; but if the aviators should be compelled to descend the huge wings of the machine would keep it afloat for a sufficient time to enable them to be rescued. Additional buoyancy will be obtained from the huge tank, which at the start will contain 350 gallons of petrol, while there is also a watertight compartment having floatational capacity of nearly twice the full load of the machine. Rockets and a telescopic signal mast will be carried in case of emergency. The engine will be 215 horse power

Communication With Mars

"Life of Mars" was the subject of an interesting lecture delivered recently before the members of the Occult Club by Professor A. Bickerton, president of the London Astronomical Society.

Professor Bickerton said that the snows of the mountains on Mars are being used to provide water for the canals and for irrigation purposes in the desert portions of the planet. Life there is so advanced that there is a perfect state of communism, there being no sections or sects, but all people working on a one-family basis. In their endeavors to spread their psychic powers, the Martians are trying to communicate with the people of this earth by means of enormous dynamic forces, which produce great flashes of light. He expressed the opinion that the development of the psychic powers will make human superhuman, with six or seven senses. He predicted that in the future not too remote, earth men will be in communication with Mars.

Smuggling Up-to-Date

Smuggling valuables by means of fast motor cars, armored for the purpose, has become very prevalent in France. The customs authorities lately observed two cars, evidently engaged in smuggling, traversing the Belgian frontier at Blanc Mission on a dark night. As they did not obey the summons to stop, officers immediately started in pursuit on bicycles and in another car. Arriving at Marcoing the smugglers put up their vehicles in the stables of a house belonging to a man named Touchard, who lived at Cambrai. The revenue men soon surrounded the building, but were seen by one of the gang, who had been watching while his companions were sleeping. The man at once cranked up one of their cars and launched it at full speed against the officers on the other side of an iron paling which it broke through. While confusion reigned amongst the besiegers, the smugglers made good their escape by the back door and across the countryside, leaving both cars in the hands of the customs officers. Up to the present there is no clue to these audacious fly-by-nights.

Increase in C.P.R. Fire Fighting Staff

The Forestry Branch of the Canadian Pacific Railway has assigned three men to handle fire inspection work for the company on its lines in British Columbia, and three additional men on its eastern lines, in Ontario, Quebec, Maine and New Brunswick. These men not only make investigations for the purpose of collecting information to be used in fire claim cases; what is more important they also help to prevent the occurrence and the spread of fire by personally meeting sectionmen and other employees of the company and thus ensuring that the men are fully informed regarding the very strict instructions issued by the General Manager relative to the reporting and extinguishing, by railway employees, of fires occurring along rights of way. These inspectors also assist the Operating department in securing efficient action in connection with the requirements of the Railway Commission relative to the maintenance of special patrols in forest sections, and the removal of inflamable debris from the company's right of way. Under this method of organization, it is expected that much better results will be obtained than formerly.

Will Not Teach Sex Hygiene in Elementary Schools

The education committee of the London county council has decided that under no circumstances shall sex hygiene be introduced into class teaching in the elementary schools. This decision was reached after a long investigation and the examination of a large number of the teachers.

The evidence was almost wholly against the proposition. Dealing with the objection to include such a subject in the curriculum, the report of the committee mentions, in the first place, that the knowledge of such matters among children depends very largely upon the type of home from which they have been drawn.

It would be a task of the greatest difficulty to teach the subject satisfactorily in class, since, while to some children the facts are already known, there are others to whom the knowledge might come as a shock. Then a method of treatment of this subject which might benefit one child might harm another! In the second place speaking of these subjects in class must tend to break down the children's natural modesty and reserve.

Nevertheless, the report agrees that some such instruction might be given to children over 14 in the higher schools and evening institutes, and it is suggested that pamphlets dealing with the subject should be given to girls leaving the elementary schools.

Frost Damage in Niagara District

EASTERN PEACH CROP INJURED

The reports, as published in the Canadian Horticulturist and elsewhere that the peach crop of the Niagara district had been seriously injured by the cold weather last winter led Dominion Fruit Commissioner D. Johnson to send a representative to the Niagara district to investigate conditions. It was found that throughout the Niagara district the situation is a serious one. It is safe to predict that the crop of commercial peaches will be the lightest that has been harvested in twenty-five years.

Following mild weather during December and the earlier part of January, the temperature dropped on January 13th and 14th to between nine and eighteen degrees below zero, depending on the location, and was followed one month later by a similar cold period. The January frost was the cause of most of the injury, since a number of the buds had swollen during the previous six weeks. The cold spell in February also did damage. Throughout the Niagara peninsula the peach buds were greatly injured.

In some orchards not a live bud could be seen, and where there were any live buds they were on trees of no commercial value, or trees which had been protected to some extent from frost by proximity to water. Along the shores of Lake Ontario, between Winona and Jordan, there was a scattering of buds on Triumphs and Longhursts. At Queenston on the Niagara River, a few buds were found on Englo's Mammoth and Triumph. In several orchards live buds of white flesh sorts were found, usually on the upper branches, and never more than a dozen on a tree. There is no section in which the injury was not great. More good buds were seen at Queenston than at any other point in the peninsula, and even there the number was so small that the amount of fruit produced will necessarily be part

There are certain features that are worthy of consideration, inasmuch as they are the only ones upon which to base the probability that there will be a few peaches. The most important one is the development of retarded fruit buds. A comparatively large number of very small buds were found at several points throughout the district. These, on account of their size, were not so greatly affected by the extreme fluctuations in temperature. At the time of inspection they were still small, but there is some likelihood that a percentage of them will later develop and blossom, in that they do not show the dark centre which is characteristic of the larger and frozen buds.

In the second place, there are many orchards which are within a very short distance of either Lake Ontario or the Niagara River, and on account of the protectian which they received from frost through more equable temperature, were found to bear a scattering of live buds. Only a few of these orchards were examined, and the conditions found in them must apply to other orchards in which conditions may be as good or even better than in those inspected.

Thirdly, it was noted that in cases where any buds had survived the winter, they were more often located in the upper branches of the tree than in the lower limbs. The tendency of frost is to settle, and in some cases a difference of from three to five degrees in temperature is noted between the ground level and a point fifteen feet higher. It is possible, then, that many growers, making a hurried inspection of their orchards, would overlook the upper branches and presume from an inspection of only the lower ones that the crop was an entire failure.

OTHER DISTRICTS

The injury to Lambton county has not been so great as in the Niagara district, although here, too, the crop has been much reduced by frost. The white flesh varieties and Snooks have a fair percentage of live buds. Commercial varieties have not such a good showing, but the feature noted—that buds on lower branches were more severely injured than upper ones—was particularly noticeable here. The crop in Lambton county has never been a large one— comparatively— and this year will be materially lessened. The fact that the injury was not so serious as in the Niagara peninsula may be credited to the fact that the county escaped the severity of the January frost and was only affected to any serious extent by the later one in February. Consequently, many of the hardier buds escaped injury, and on the varieties mentioned the indications are that a fair crop will be harvested and that even on the more commercial sorts the crop will not be a complete failure.

In the Essex peninsula the prospects are that a full crop of all varieties will be produced. In some instances the fruit will have to be thinned. The entire southwestern portion of Ontario seems to have escaped the worst of the cold weather, and the lowest tempera-

DISEASES OF POTATOES

As a means of diminishing the number of diseased potatoes to be planted in Canada this year, the botanical branch, Dominion department of Agriculture, has recently issued a splendidly illustrated folder, Farmers' Circular No. 4, entitled "Potato Diseases transmitted by the use of unsound tubers.' The folder contains 12 illustrations showing, in natural colors, representations of specimens of diseased potatoes Diseases and other blemishes represented are potato canker, powdery scab, hollow potato, internal brown streak, little potato disease, dry rot, wet rot, common potato scab, and stem end rot. Specific reference is made to the two dreaded diseases, potato canker and powdery scab, the latter of which occurs already in Canada, and should be carefully avoided.

The folder points out that, under the Destructive Insect and Pest Act of Canada, any person using for seed potatoes infected by potato canker or powdery scab is liable to prosecution. Potato growers who suspect the presence of either of the latter diseases are requested to send specimens to the Dominion Botanist, Central Experimental Farm, Ottawa. This folder, prepared by Dr. H. T. Gussow, Dominion Botanist, will be sent to those who apply for it to the Publication Branch of the Department of Agriculture at Ottawa.

REBEL GENERAL WATCHES NURSES CARE FOR WOUNDED

A youthful rebel, being treated by White Cross nurses at Tampico, with General Pable Gonzales in the background looking on. While the Federals suffered a heavier loss in the Battle of Tampico than did the rebels, a large number of rebels, some of them mere boys in their teens, were wounded. The white cross nurses at Tampico have been attending these wounded rebels as well as the wounded Federals who were left behind. The hospital work has been under the supervision of General Gonzales, who has shown more consideration for the wounded men than the Federal officers have shown their disabled soldiers.

The Manufacturer's Problem Solved!

THE solution will be found on page 4 of "The Elevator," a new book just off the press. We want to place a copy of this Book in the hands of every progressive manufacturer in the country.

It may prove to be worth hundreds of dollars to YOU. In its pages appear many illustrations and suggestions for manufacturers, retailers, jobbers and wholesalers, any one of which may be the solution of your individual problem. The successful manufacturer owes much of his success to the intelligent arrangement of his plant and the elimination of needless effort and wasted energy. This Book points the way to bigger profits and greater efficiency. Write to-day for YOUR copy.

RETAIL MERCHANTS MEET IN CONVENTION

(Continued from Page 1.)

only in this way that favorable legislation could be obtained. The efforts of merchants in previous years to secure legislation for the redress of their grievances had merely been made by individuals and had produced but little effect. By combining as an association they were enabled more effectually to draw the attention of the government to many palpably inequitable laws affecting the retail merchants of the province.

A large percentage of the taxes, he said, were paid by retail merchants, and he claimed they were entitled to more consideration. It was estimated that the one hundred thousand merchants engaged in the retail trade in Canada carried no less than five hundred million dollars worth of stock. By the co-operation of this numerical strength and wealth of capital it was no wonder that the government were beginning to take cognizance of their claims.

Mr. C. B. Hume, of Revelstoke, who was the next speaker, told of the work of the Association in his city. Mr. W. Foreman, of Armstrong, advocated the plan of doing business on a cash basis mentioning that he had recently adopt this method in his own business with great success.

Mr. Geo. S. McKenzie spoke of the work of the branch in Kelowna which he said, was in a flourishing condition and was of great benefit to the merchants. Credit ratings, especially, were now being handled more intelligently and effectually than ever before.

Mr. Tyler, of Salmon Arm, raised the question as to the right of a government-aided co-operative organization to compete with local merchants in the retail trade. In Salmon Arm, he remarked, the fruit exchange had recently formed a subsidiary company known as the S.A.F.E. Co., Limited, in which fifty per cent. of the stock was held by the fruit exchange. This company had developed into a general retail merchandizing business, selling groceries, hardware, clothing, etc., and in a circular which had recently been sent to all the residents in the district it was stated that the company intended including drugs and various other goods, in fact they intended to sell anything and everything they could handle. The merchants of Salmon Arm, said Mr. Tyler, had no objection to anyone going into business in competition with them, but they had a strong objection to such competitors as the company referred to, which was running its business on funds borrowed from the government at 4 per cent.

Mr. Tyler's views were endorsed by many other merchants present, and it was stated that a deputation would proceed to Victoria to place the matter before the Attorney-General.

On Tuesday evening the visitors were entertained by the Vernon Merchants' Association to a banquet in the Royal Hotel, and on Wednesday an automoaile trip to Kelowna was arranged for the benefit of the visitors from the coast.

Rutland News

(From our own Correspondent.)

The Methodist Ladies' Aid are holding a strawberry and ice cream social at the parsonage on Friday the 26th.

The Rev. W. T. Beattie will occupy the Presbyterian pulpit at Rutland on Sunday next and take as his subject for discussion, "The Reasonableness of Prayer." A hearty invitation is extended to all.

The school trustees would like to remind rate payers that their taxes are subject to a 10 per cent discount up to the end of this month. By paying them promptly they will not only save money for themselves, but also a good deal of financial worry for the trustee board.

The Rutland Presbyterian Ladies' Aid will hold an ice-cream and strawberry social at the home of Mrs. R. J. Sproule an Thursday evening, June 18 commencing at 7 p.m. A charge of 25 cents for adults and 10 cents for children will be made at the gate. Cake sandwiches and tea will be served free. A musical program will be given. All welcome.

As Mr. and Mrs. S. Gray and Arthur were driving home last night after a visit to friends, their horse unexpectedly shied at something in the road and swerving round suddenly upset the buggy. In the mix-up Mrs. Gray was badly bruised and cut about the face, though happily not seriously injured, while Mr. Gray received a most severe shaking.

Rev. Gordon Tanner, B.A., the new pastor of the Methodist church at Rutland received from his congregation at South Kitsilano, Vanrouver, an address and purse on the eve of his departure from the city. Mr. Tanner is a splendid speaker and the presentation shows his popularity on his late charge. Through the indisposition of his son Mr. Tanner will not be on hand on Sabbath, but instead Rev. J. C. Switzer of Kelowna will preach at Ellison in the afternoon and at Rutland in the evening.

THE FARMER AND ADVERTISING

Many farmers are losing many dollars every year because of a lack of judicious advertising.

Much fine stock that could be used for breeding purposes is sold on the market because there is no local demand and the owner makes no effort to find a buyer, who would be glad to give him dollars more than he receives.

Pure bred poultry goes to the huckster when a dollar's worth of advertising in the local paper would make you $10 and the person who purchased from you would be saved an equal amount, as the big breeder must be paid for reputation.

Thousands of bushels of seed corn are shipped and fed, while poorer quality, in some section, goes into the ground. Your nearest neighbor may not know you have something to sell unless you advertise the fact.—Optimist, Lathrop, Mo.

ONE BRIDGE MEXICANS WILL NOT BLOW UP

This is the railway bridge at La Trejor, a few miles outside of Vera Cruz, and considered one of the most strategic points in the vicinity of the Mexican port. At La Trejor is situated the water plant which supplies the city with drinking water. Also at this point the railway runs directly into the high hills. The bridge is across a rather deep gorge and its destruction would mean a considerable delay for the American army in case a march was ordered on Mexico City. For this reason General Funston has placed a heavy guard at the bridge and a close watch is kept over the actions of Mexicans in the neighborhood. Since the blowing up of the San Francisco bridge 28 miles from Vera Cruz, all traffic over the Interoceanic railway, the narrow gauge road, into Mexico City has been cut off. The bridge pictured above is on the broad gauge line, which also runs to Mexico City.

Amusements

"JUST KIDS"

It was only a dream story in pictures, acted entirely by children "Just Kids" but a story to grip and hold your interest through two reels of the finest "kid" picture ever produced. This clever novelty film will be shown in the special program on Saturday at the Opera House. The program also includes some new local pictures and a feature reel giving an exhibition of modern ball room dances.

"HOW TO TANGO"

Just how to dance the Tango, Maxixe, Hesitation Waltz, Turkey Trot and other modern dances correctly will be illustrated in an interesting film to be shown at the Opera House on Saturday night. Allen & Sebastion, the famous New York ball room dancing experts, performed before the camera for the benefit of movie patrons desirous of learning "Just how to do it." This film positively can not be held over and will be shown only on Saturday afternoon and evening.

BUMPER FRUIT CROP IN THE OKANAGAN

"The fruit crop for British Columbia for the year 1914 is now practically certain to exceed in quantity that of 1913 by about 25 per cent. Fruit crops generally will be heavy," declares Mr. R. M. Winslow at Vancouver the other day. Mr. Winslow's statement is based on confidential reports from officials throughout the various fruit district of the province.

Last year's fruit crop in the province weighed 27,760,000 pounds, and brought the growers a sum of $1,003,000. This year's crop should mean that the fruit growers of the Okanagan particularly will have at least $250,000 more to divide up than they did last year without in any way increasing the cost of the fruit to the consumer. Better marketing facilities to prevent wastage and dumping, and the recent order of the Dominion railway board in its western freight rates decision are expected this year to bring benefits both to the grower and the consuming public.

ROYALTY IN AWKWARD FIX

There was an awkward moment one day last week during the visit of King George, Queen Mary and Princess Mary to former King Manuel at Twickenham.

It is customary at dinner and lunch at Twickenham for some member of Manuel's household to propose a toast to the speedy restoration of the dethroned monarch. When the toast was proposed at lunch, the king's equerry explained that neither King George nor any member of the royal family could drink the toast nor associate themselves with the wish expressed.

The toast was then drunk by everyone standing, except the Buckingham palace party.

Some 40 schooners were wrecked and 20 or more fishermen lost their lives, in a storm that swept the coast of northern New Brunswick and Chaleurs Bay Friday night. Nearly all the boats were blown ashore on Miscou and Shippegan islands, remote points on the coast. All were French-Canadian and Arcadian fishermen.

Auction Sale

In the matter of GEO. A. BOWSER, Insolvent, the following will be sold by Auction at

J. C. Stockwell's Auction Rooms

WEEKLY MEETING OF CITY COUNCIL

(Continued from Page 1.)

had been made a year and a half ago. Mr. Fuller stated indignantly that the fact that this grading had not been done had prevented him from selling any of his property, and had meant considerable financial inconvenience to him.

The records of the matter were looked up, the city clerk reading the minutes of a meeting held in December, 1912 at which Mr. Fuller and Mr. C. Quinn, who owned adjoining property had attended.

It appeared that Mr. Fuller and Mr. Quinn in subdividing their property had each promised to give 33 feet for the street, but owing to a bend in the street Mr. Fuller had to give a little more land than Mr. Quinn. In consideration of this Mr. Quinn had agreed to pay the whole cost amounting to $200 of the filling of a slough which the council required before the street could be opened. It was pointed out that this filling had not been done and also that Mr. Fuller had not by any registered plan or deed given the city possession of his half of the street.

Mayor Jones assured Mr. Fuller that as soon as he had had the necessary subdivision plan passed showing the portion handed over to the city for the street and the $200 had been paid the council would take the work in hand.

It was decided to grant the application of Mr. W. Haug to purchase 1000 feet of the city's 4-inch sewer pipe, a resolution being passed fixing the price to be charged at 14 cents per foot.

The following accounts were then passed for payment:

IMPRESSIVE FUNERAL AT KELOWNA

(Continued from Page 1.)

oress, Mr. and Mrs. D. Leckie. Mr. and Mrs. Jas. Harvey Sr., Mr. Chas. Harvey, Mrs. F. R. E. DeHart, Mr. D. Lloyd-Jones, Mr. and Mrs. W. Lloyd-Jones, Mrs. Wm. Haug, Dr. Huycke and a large number of other representative citizens. The pall bearers were Aldermen D. W. Sutherland, and Messrs. F. R. E. DeHart, Geo. E. Ritchie, Wm. Haug, John Fletcher and D. Lloyd-Jones.

The greater portion of those on the wharf followed in the specially chartered launches to the private burial ground, where the Rev. Thos. Greene officiated.

A LINK WITH THE PAST

The deceased was born in the town of Little York, now the city of Toronto, in November 1831. She was therefore in her 83rd year, and had she lived until the twenty-eighth of next month would have been married 61 years. For several years past the late Mrs. Rembler Paul had been in failing health; indeed ever since Mr. Paul came to Kelowna, nine years ago she had been practically an invalid and for the greater portion of the time more or less bed ridden.

The tomb, which is of concrete with a marble base is built into the side of a hill. No madding noise pervades the stillness; the twitter of the birds, the sighing of the leaves of the trees are the only companions of this hill-side grave, a fitting place to commune with nature and nature's God. Here truly the weary are at rest.

Mr. Rembler Paul desires to express his thanks to his many friends for their expressions of condolence in his bereavement, and for the many beautiful wreaths. He also wishes to thank those who attended the funeral.

Automobile Accident on Vernon Road

Another serious automobile mishap occurred on the Vernon Road Sunday afternoon. It appears that as Dr. Van Kleek and a party from Armstrong were proceeding home, at a dangerous turn of the road near Oyama the car collided with another car coming to Kelowna and driven by Mr. D. B. Johnstone of Kamloops. The latter's brakes were applied so suddenly that Mrs. Johnstone, who was in the front seat, was shot ten feet into the air and sustained considerable internal injuries. The doctor was also thrown out and practically wedged between the two cars. He was not, however, severely injured. The other occupants, with the exception of Mrs. Johnstone escaped with a severe shaking. The automobiles were considerably damaged.

Mr. H. C. Bennett, official photographer for the C.P.R., who has been here taking views of the Kelowna district, left by this morning's boat.

Have you seen what we do?

Here are some things we DON'T DO

1 We DON'T use our laundry as a dwelling.
2 We DON'T sleep on the dirty linen.
3 We DON'T wash the linen with our hands.
4 We DON'T rub, which means we don't wear out the clothes.
5 We DON'T use any bleach except on obdurate stains.
6 We DON'T wring or twist the clothes—we extract the water by centrifugal force.
7 We DON'T iron everything and sprinkle by hand, we do all possible ironing by machinery.
8 We DON'T carry your clean linen home on our backs, even though they ARE clean.
9 We DON'T charge for our work at unreasonable rates.
10 We DON'T send our money across the Pacific.
