

## Discuss Alien Immigration From New Angle

### Plea Made for Better Treatment of Japanese Settlers

Quite a new and interesting light was thrown upon the much discussed Asiatic problem in a discussion which took place last Friday at the meeting of the Equal Franchise League.

Mr. R. B. Kerr's review of the question of the question of Asiatic immigration showed the pressure from old and thickly populated countries for access to new and sparsely populated areas. The population of the world being 1,600 millions, Asia now holds more than half, 850 millions, China having 400 millions, and India, which is much smaller than Canada, 350 millions. Europe has 400 millions, while Canada with about the same area, has only 7 millions. Since 1835, when Froude visited Australia, and an increase of many millions in a century was prophesied, the population has risen from three millions to only four millions. The thinly-populated new countries are owned by Europeans; Spanish and Portuguese in South America, French in the fine territory of the north of Africa, and British in many parts of the world. Germany, however, has not had the access to Africa that she wanted, and has complained that she "has no place in the sun." Japan, with 70 millions, has no outlet to the empty places of the earth.

Foreigners coming into our colonies continued Mr. Kerr, are troubled with having to learn our language, and in addition to this, we do not give the Asiatics a respectful welcome. The question of intermarriage was a difficulty, but it was more imaginary than real. Even intermarriage with a really lower race, the negro, has not been proved to produce poor heredity. The famous novelist, Alexandre Dumas was a quarter negro, and his son was also famous. It had been said that Asiatics always work for low wages, but the Chinaman would raise his standard of living if he was encouraged to join unions. Some complained of Orientals sending money out of the country, but if we allowed the wives and families of these people to come in they would not send their earnings away.

Mr. C. E. Weeks pointed out the difficulties of the farmer competing with Asiatic labor, and feared the lowering of the standard of living. He expressed the hope that the cooperative method would help us.

Mr. K. Iwashita, a well-known local Japanese merchant, being called upon to speak, replied first to the question of intermarriage, saying that these have proved satisfactory, especially as shown in about three hundred marriages between Japanese men and American women, and the offspring was robust. He claimed that the Japanese do not send much money away; only about \$20 per capita annually is remitted to Japan, and probably the Chinese send about the same to their families. It was, he said, because the farmers discriminate against them and that they knew not what would come next day, that they could not put their hard-earned money into real estate or furniture here. If the antagonistic feeling was removed, Orientals would make good citizens. The patriotic

(Continued on Page 4.)

## Annual Meeting of Hospital Society

### Local Institution Holds its Own in Spite of Difficulties

The annual meeting of the Hospital Society was held last Friday afternoon in the Board of Trade rooms. In the absence of the president, Mr. P. B. Willits, at the coast, Mr. G. S. McKenzie presided.

In his report the secretary referred to the several changes which had taken place in the staff during the year. There had been no regular canvass for funds made. Owing to the many demands made for funds from other organizations, it had been deemed advisable to endeavor to make a stronger effort to collect accounts, and in that way to make the Hospital pay its own way instead of calling upon the public for funds.

The total number of patients treated during the past year had been 150, 41 of them for operations, 18 for medical treatment, and the balance of 41 in the maternity hospital. The total number of days treatment was 2043, 1428 in the general hospital, and 615 in the maternity branch.

During the year a refrigerator room had been built in, and storm windows and doors had been added.

In closing his report the secretary thanked all who had assisted in any manner during the past year. The year had been a very trying one, and if it had not been for the persistent attention of the president, as well as of the rest of the board, the financial condition would not be in as flourishing condition as the balance sheet showed.

Following the adoption of the financial statement the election of directors was proceeded with, resulting in the following board being appointed: Messrs. D. Leckie, G. B. Binger, N. D. McTavish, G. Meikle, H. Burth, G. S. McKenzie, M. Heron, W. Haug, E. R. Bailey, J. Leathley, J. W. Jones, E. W. Wilkinson, G. A. Fisher, D. W. Sutherland, and P. DuMoulin. Mr. R. E. Denison was elected auditor.

A hearty vote of thanks was passed to the retiring president, Mr. P. B. Willits, for the good work which he had done, not only last year, but during all the time he had been on the Hospital board, and regrets were expressed that he should have found it necessary to drop the work for the present.

Thanks were also given to the various ladies' associations who had been of valuable assistance, to the retiring directors and executive, and also to the matron and hospital staff.

At a subsequent meeting of the directors Mr. D. Leckie was elected president, with Mr. G. B. Binger vice-president, Mr. N. D. McTavish treasurer,

A gigantic scheme for the purchase by the British government of 200 million acres of land in Alberta, Saskatchewan, Manitoba, and British Columbia, to be developed as a means of paying off the Empire's war debt, is being put before the public by a newly formed Empire Resources Committee, of which Earl Grey, Lord Desborough, Lord Plymouth, Lord Selborne, Rudyard Kipling, Rt. Hon. Horace Plunkett, Rt. Hon. Sir Starr Jameson, Colonel Grant Morden, Moreton Frewen, M. P., and other leading men are members.

## Local Farming Progress Reviewed at Farmers' Institute Annual Meeting

### President L. E. Taylor Gives Interesting Survey of Farming Conditions in the District—New Officers Elected for Year

The annual meeting of the Kelowna Farmers' Institute was held last Saturday afternoon, Mr. Lionel E. Taylor being the retiring president in the chair.

In his introductory remarks, the chairman referred to some of the activities of the Institute during the past year. Amongst other things they had done all in their power to secure the appointment of a separate weed inspector for the Kelowna district. The government had not found this feasible but had appointed a new man for the Valley, who had done good work.

Reference was also made to the appointment at the last Central Institute convention of an advisory board to advise the government on all matters pertaining to the work of the Institute. Out of this had grown the formation of "district Institutes," so that the Central convention would be relieved of a great deal of discussion of purely local interest.

During the year five Packing Schools had been held at East Kelowna, Rutland, and Kelowna, with a total attendance of 62, and a Packing School at Glenmore with an attendance of 11.

In March Messrs. Abbott and Fleck had addressed a meeting on the subject of the marketing and processing of fruit, and in February a banquet had been held in conjunction with the Women's Institute, which had proved a very great success, being attended by 175 people. The net proceeds of the latter had been \$21.50, which had been divided between the two Institutes.

Three directors' and one executive meeting had been held during the year, and on December 5th a special meeting had been held for the purpose of forming a District Institute. That meeting was addressed by the deputy minister of agriculture, Mr. W. E. Scott, Mr. W. J. Gibson, Mr. G. H. Hopkins, and others. Important resolutions were passed and forwarded to the government and other Institutes in the Valley on the following subjects: Extension of school holidays, labor bureau, fruit packing, agricultural reading matter for schools, experiments in onion growing, and the appointment of an agricultural supervisor for the schools.

Competitions were held for orchards, onions, and corn, but the potato competition was withdrawn.

Last June the directors decided to rent the Board of Trade room for permanent quarters, and arrangements were made to sublet the front office to the District Horticulturist. The new arrangements had proved eminently satisfactory, the rents obtained by hiring the room for other meetings, etc., having recouped the Institute for the rent paid to the Board of Trade. A library was maintained and a full stock of bulletins was always on hand.

The Institute had been most fortunate in securing the services of Mr. R. L. Dalglish as secretary, and it was entirely due to his energies that the work of the Institute had been carried on so successfully during the year. It was of the greatest advantage to the farmers to be able to consult the secretary any afternoon they pleased at

the Institute rooms, and the privilege had been made good use of.

The government had purchased up-to-date alfalfa and clover seed thresher during the year, and had placed it at the disposal of the farmers here. A seed cleaner and grader was on its way here now.

Preliminary inquiries made by the secretary had resulted in obtaining Dominion government bulls being obtained for Rutland and Okanagan Mission.

Mr. Taylor went on to review the progress of agriculture generally in the district during the past year. Taken as a whole he thought the farmers had probably had the most successful year in the history of the district. Fruit prices had been good, and the total output larger than in any previous year. Some districts suffered considerably from the severe winter, in some cases the orchards being practically wiped out, and in others the yield reduced to a minimum. On the other hand many hundreds of acres of young orchard came through the winter with practically no loss.

The export markets had been strong, and no doubt the large quantity of fruit exported had helped to relieve any over-supply on the prairies.

The question of cold storage was becoming every year more of a live issue, and there was no doubt in his mind that some scheme would have to be evolved in the near future.

The vegetable market had been a strong feature during the year. Onion growers reaped a rich harvest, and potatoes were above the average price. The early frost in the fall caused considerable damage to the tomato crops, and the canner supply fell far short of requirements. Other truck crops proved more profitable than usual, probably owing to the largely increased production.

The apple evaporator was able to handle a large bulk of cull fruit, and its value would be more appreciated by the growers than it is. In his opinion a good deal more fruit should go to the evaporator than does at present, instead of being shipped out to other provinces. It is very detrimental to any market to have a flood of low-grade produce.

### PROGRESS OF DAIRYING

Dairying had made rapid strides, thanks to the firm establishment of a creamery during the year. The 74,211 lbs. of butter were manufactured and sold by the creamery during the year, in addition to ice cream and cream. The average price paid to the farmers for butter fat, a high price for normal times, and one that will compare favorably with any other creamery in Canada. A great deal, observed Mr. Taylor, might be said as to improved methods which should be adopted by dairy farmers both in the care of their stock and their cream. The necessity of providing succulent winter feed was becoming more apparent every year, and he was pleased to note that seven new silos had been erected during the year, bringing the total up to over twenty, and with prospects of many more being erected during the next twelve months. There were still very few farmers who weighed their milk. Without this it was impossible to tell which cows were profitable and which were boarders. The time had fully arrived for the establishment of a cow-testing association in the district.

The hay crop was below the average but prices were higher. A considerable amount of hay was shipped out to the coast. There was a large falling off of grain production partly owing to unfavorable weather conditions. More grain should be grown in the district, especially barley for pig feed.

This year was most unfavorable for maturing corn on bottom lands, but at least two good crops were matured on lighter lands.

There was no doubt in his mind that corn could be successfully grown here on a large scale at a good profit. There was a great demand for good corn seed in Canada. Over 250,000 acres were seeded annually, and a large proportion of the corn growing districts of the west to certain of the

## Local Creamery Butter Wins Notable Success

### Kelowna Takes First Prize in Competition Open to Province

The superiority of Kelowna's Creamery output has been strikingly shown by the success of the exhibit sent to the butter competition in connection with the convention of the provincial Dairymen's Association held last week in Nanaimo. In competition with many of the largest and oldest established creameries in the province, Kelowna Creamery carried off first prize for butter prints. The prize for butter solids was only missed by the loss of a few points on a question of preparation of the exhibit.

The Creamery company, and especially the manager, Mr. S. Thomas, are to be congratulated on this very satisfactory result.

The convention itself was full of interest for all dairymen and the farmers of the district will no doubt look forward with interest to the special convention which is to be held in Kelowna in September, when the competition will be repeated.

Mr. M. Heron was elected a director of the Association for the coming year. There were also present from Kelowna Messrs. P. B. Willits, W. G. Benson, D. W. Sutherland, and J. L. Pridham.

Amongst the resolutions passed by the convention was one asking the government to resume the systematic testing of dairy herds for tuberculosis at the earliest possible moment.

The public school at Salmon arm was destroyed by fire this week.

The local curlers have been having good times lately, the cold weather having given them a good sheet of ice at the rink. Visitors are up today from Penticton taking part in a few friendly games with the local enthusiasts.

ducing good seed every year.

### SEED GROWING

He believed there was no place in Canada where seed of all kinds could be produced better than in this valley, and he looked to a great future for the industry here.

It could not be too strongly impressed upon farmers to use only the best seed. It was the utmost folly to purchase second grade seed in order to make a saving of a few cents or dollars per acre, which was all it ever amounted to. It was an established fact that locally grown seed, properly acclimated, is infinitely superior to seed from other localities. It is also a mistaken idea to suppose that seed requires constant changing; this is not the case if you select your seed every year.

Every endeavor was being made to increase production to supply war requirements, and with the prevalent scarcity of labor this could best be done by sowing only the best seed, properly cleaned and graded.

### LIVESTOCK

Cattle were slowly increasing in numbers and in quality by the use of good sires, but prices had not advanced at the same rate as for other farm products. Pigs had made a very large increase, partly attributable to the dairy business. Several carloads of fat pigs were shipped to the coast at 9½ to 10½ live weight.

There had been a firm demand for horses from outside buyers at moderate prices, and there was every prospect for a considerable rise in prices with a greater demand. The poultry industry was making headway, especially as regards the quality of the birds kept, but the supply of eggs throughout the year was not equal to the demand.

### LABOR SHORTAGE

Turning from his review of the farming industry during the past year, Mr. Taylor went on to consider some of the difficulties ahead. There was likely to be considerable shortage of labor, both for ranch work and fruit picking. This matter had been discussed at many meetings, and he was of the opinion that the most likely solution would be the formation of a labor bureau under government supervision.

The orchards of the valley, he said, had now arrived at such an age when it became imperative to take stringent

(Continued on Page 4.)

## St. Michael's Church Annual Vestry Meeting

### In Spite of Difficulties Financial Conditions Were Encouraging

The annual vestry meeting of the parish of St. Michael and All Angels was held on Wednesday evening, January 24th and was presided over by the rector, Archdeacon Greene.

In his yearly report he reviewed the work of the parish in its various branches, specially commending the work of the choir, the junior and senior W.A., and the Chancel Guild for their substantial aid given to the parish funds. Particular mention was made of the work of the juniors in defraying the expense of matting for the centre aisle of the church. He thanked the retiring wardens and church committee for their valuable help in the executive work of the parish. Mr. Beale and Mr. Whiffin were heartily commended, the former for his earnest work in the Sunday-school, the latter for his work in building the organ which is giving increased satisfaction.

Mr. G. A. Fisher then read the wardens' financial report. He said that despite many difficulties the current expenses had been met, the Synod and M. S. C. C. assessments had been fully paid, and on the whole conditions were very encouraging.

The election of officers was then proceeded with. Lay delegates, Messrs. F. A. Taylor, P. DuMoulin and L. E. Taylor. The rector regretted that Mr. Carruthers, owing to increased duties and residence about four miles out of town, was obliged to decline the office of Rector's Warden. He had, however, found an excellent successor in Mr. J. R. Beale, and Mr. G. A. Fisher was unanimously elected People's Warden, an onerous post which he has filled with entire satisfaction. The congregation is fortunate in having one who is so deeply interested in the work of the church.

The following were elected as sidemen: Messrs. R. E. Denison, P. DuMoulin, L. E. Taylor, A. Whiffin, F. V. Royle, F. W. Groves, A. C. Poole, D. Lloyd-Jones, C. Johnson; Auditor, Mr. R. E. Denison.

Hearty votes of thanks were passed to the retiring wardens and church committee, to the honorary auditor, Mr. Denison, Mr. Beale, Mr. Whiffin, the organist, Miss Edgell, the choir, the junior and senior W.A., and Chancel Guild. The rector then pronounced the blessing thus bringing a very successful meeting to a close.

The Rutland United Farmers have arranged a "smoker" for Monday next, February 5th, to be held in the schoolhouse. A hearty invitation is extended to members of kindred organizations throughout the district. Refreshments, tobacco and a good programme is being provided free. The affair will start at 8 p.m.

Mr. J. A. Bigger returned last week-end from a visit to Winnipeg.

Bishop Du Pencier returns to New Westminster, B.C., in April. He has been serving as chaplain at the front.

The Hon. Ralph Smith, provincial minister of finance, recently told a delegation that he was considering the question of placing a tax on theatre tickets. It is possible that the government will levy a tax which will be divided with the municipalities in the districts where the money is collected.

The Dresden arsenal has been blown up and one thousand women and young girls killed, according to a letter taken from a German soldier dated December 30. The letter was written from Dresden, and the writer said that all the windows within a radius of twelve miles were broken by the explosion. He added that the authorities were keeping the news secret, and that no railroad tickets were being issued for Dresden except for urgent reasons.

Wilson Landing and  
Westside Notes

(From our own Correspondent.)

Mr. Chesbro, of Kelowna, came over on Saturday's boat, and is a guest at the Lakeview hotel.

Among the visitors to Kelowna Saturday were: Mr. and Mrs. A. Joslyn, Mr. J. H. Campbell and daughter Geraldine, Messrs. Duncan, Lindstrom Steels, Ball, Dobbin and Nicol, snr., Pte. J. Tolhurst, and the Misses Davidson.

The Patriotic Fund collector, Mr. Ball, was on his usual monthly round last week. We can but keep the ball rolling, its bound to strike a prize sooner or later.

At the services on Sunday Pastor Rowland made an urgent appeal to his congregation for funds for the general liabilities of the Presbyterian church. After the return of the plate to the table you could see by the look on his face he felt like saying Gloria in Excelsis!

Before Pte. J. Tolhurst goes away it would be a good thing to have a basket social, say next Wednesday, with two objects in view. First, to show our esteem for the returned wounded, second, to make a collection for a clock for the schoolhouse, a very much needed article, so come along and bring your basket, and either speak a piece or sing a song.

Now that the moon has returned once more to lighten our darkness tobogganing by lime light seems to be the craze among the young people. Bob sleighs, planks, ladders, anything that will slide, are being brought into requisition, and by the peals of laughter that can be heard, they are certainly enjoying themselves. Go to!

Mr. and Mrs. G. W. Martin, who have been staying here while Mr. Martin built a house on the Dundas ranch, have once more shook the dust (or rather snow) of Westbank from their feet. We say come back, for we are the better for your visit by a nice little house, and would call to your mind the mystic number of a certain brotherhood—490.

Some people seem to think that Westbank is not on the map at all. This cannot be said of the several collectors who have been rounding us up this past week, for they sure found us. One gentleman, Mr. Estabrook, of Summeiland, spent two days here collecting for the Y.M.C.A. overseas branch, which I am sure is worthy of all our support, and it sure is a pity if we cannot supply the boys with a cup of cocoa and a bun when they are perhaps giving their all for us. It is said he went away with a good wad.

We really wondered what Mr. Gellatly meant last fall by making such a large hole on his Bushrie ranch. We find that he lined it with lumber, laid a railway track into it, and has still two hundred tons of potatoes, and two cars of onions stored in it. Just add electric light and then it will be complete. He estimates it will pay for itself this season. He seems to have all kinds of orders for his produce, even Chicago asking him to send all the potatoes he can ship.

Mr. Everett Hogan, of the Soil and Crop Department of Agriculture, was a visitor to Gellatly this week bringing with him the government seed cleaner we saw illustrated in the Agricultural Journal last month, which was to be loaned to those having small seeds to clean. Mr. Gellatly, having a large quantity of onion parsnip and other seed to clean, had applied to the government for the loan of it. It is to go to Kelowna afterwards, so if you have any seed to clean now is your time.

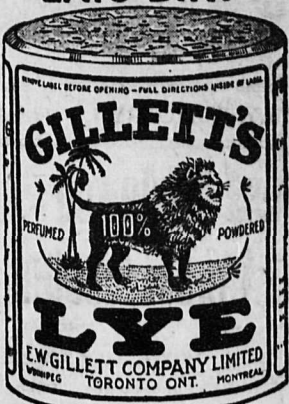

A special meeting of the directors of the Farmers' Institute was held at the home of the secretary, Mr. Russell, who had several matters of interest to bring before the board with resolutions which it was necessary to bring to their notice from J. R. Brown and the Kelowna Institute, and one dealing with the unjust way the Agricultural Credit and Loan Commission Act in regard to applicants for loans, which must have more or less effect on members of every Institute in the province. These are to be forwarded to the advisory board to be placed before the Minister of Agriculture. One other resolution was passed on to the general meeting of the Institute, viz.: "Shall the Japanese who are in our midst be allowed to become members of the Institute."

Total exemption from income tax has been secured for Canadians serving in any military capacity within the British Isles.

A proposal to establish a protectorate in the Holy Land under the American flag is being mooted as a solution of the most difficult problem in the tangled political situation in the near east.

A return laid on the table of the House at Ottawa, shows that the expenditure of the public works department during the fiscal year 1915-6, amounted to \$19,539,298, which is a decrease of about ten millions as compared with the previous year.

Fire which swept through a section of the business district of Pittsburg destroyed a dozen or more buildings with a loss estimated at from \$3,000,000 to \$4,000,000. Four firemen were seriously hurt and a dozen or more so badly injured that they were removed to hospitals.

GILLETT'S LYE  
EATS DIRTOrders for  
Local  
Scouts

"BE PREPARED"

Kelowna Troop  
Troop First; Self Last

Edited by Pioneer. Jan. 30th, '17

Orders by command for week ending 10th Feb. 1917.

Each patrol will parade during the week at least once, at the call of its leader.

The patrol leaders and seconds will parade at the clubroom on Wednesday the 7th instant at 7.15 p. m. All scouts formerly attached to the Troop who have not passed their tenderfoot or second class tests by the 31st of January, yet who wish to re-join the Troop, will kindly attend at this parade, and state their reasons for not having passed.

There seems to be some misunderstanding in connection with entering the daily good turns in the diaries with which each scout in the Troop has been provided. If a scout does not perform a good turn daily, he is not living up to the Scout Law. In other words he is breaking his scout's promise. While the good turn performed on any particular day may seem a very small one, still enter it up in your diary. This is a Troop order and you know the seventh Scout Law.

We must be getting into our new quarters soon, and for that purpose shall shortly hold a working bee, to fix up the same. We want some book shelves in the house, and this is a splendid opportunity for some one in the Troop to do the Troop a good turn. The lumber will be supplied by the Troop.

Whilst speaking of good turns, a very frequent one performed, is the act of removing pieces of banana or orange peel from the pavement, thereby perhaps saving someone from a nasty fall. The other day, however, we saw a scout in the Troop doing the opposite. He was peeling an orange and generously distributing the peeling all over the pavement in front of the confectioner's store, which he had just patronised.

Not Enough Scoutmasters

(Victoria Headquarters) Recently we heard murmurs from the east to the effect that the war was making great inroads into the supply of scoutmasters. Now the cry is taken up in the west. The commissioner from Alberta, Mr. Justice W. L. Walsh, writing to the Honorary Dominion Secretary, says:

"We are doing what we can to further the movement in this Province but the war has made such demands upon the young men available for the position of scoutmaster that we are finding it very difficult to keep the troops alive in the smaller places. The secretary placed before us yesterday a list of nearly a dozen villages in which there are good troops but positively not a man in the place to take charge of them. A considerable number of new troops have been formed, however, throughout the province and considering everything we have no reason to be dissatisfied with the progress we are making." In some parts of Canada there are so few Masters that three and four Troops are being run by one scoutmaster. This applies pretty much to almost every part of the Dominion.

"Archibald had been called up in his group, and on his first parade watched with some anxiety the recruits being numbered.

"Ten, eleven, twelve," roared the recruits.

"Ain't yer got a number?" inquired the sergeant fiercely of Archibald.

"E-thirteen," stammered the raw one.

"What!" bellowed the sergeant. "E-thirteen indeed. D'you think I'm drilling a bally lot of submarines?"

Women will not be permitted to practise law in England if the lawyers can prevent them. The general council of the bar overwhelmingly defeated a resolution asking the general council to "consider a report upon the desirability of making provision for the administration of duly qualified women to the profession."

## TOWN AND COUNTRY NOTES

Mr. and Mrs. W. E. Mitchell and family left for England Saturday.

Pte. Wm. Halliday was in town this week on a short furlough.

A mean trick was played at the post office last Friday by someone who stole the lamps from their sockets.

Mr. Alec. McQuarrie is the latest recruit to devote himself to the service of his country. He has this week joined up with the B.C. Horse at Vernon.

A dance is to be given by the Fire Brigade in Morrison's Hall next Thursday evening, February 1st. Come and spend a pleasant evening. Cards and light refreshments. Per couple 75c. 10-1

Messrs. Hudson, Stocks & Co. have been making some alterations in their store this past week, and have occupied the upstairs of the building which is being fitted as a studio, whilst the ground floor will be used as showroom and office. When finished they expect to have one of the best studios in the interior.

The inhabitants of Woodlawn apparently have a hard time to raise their live stock. What with the activities of sneak thieves and marauding dogs and cats, the poultry and rabbit fancier's life is not a happy one in that district. The latest one is a rabbit killing terrier and this pest has scored quite a bag lately, one man losing sixteen rabbits in a single night.

The sudden drop in the temperature this week caused havoc with the water pipes and the plumbers have been kept busy thawing them out. The snowfall which has now succeeded the cold snap will be welcomed by a great many people who have hauling to do, particularly by those who have piles of logs ready cut and awaiting sleighing to get them to the lake.

### Local Choir to Render Part of Handel's "Messiah"

It is a long time since any efforts have been made by local societies to provide the people of the city with an evening's music and since the much deplored destruction of the Opera House nothing in the way of a concert either sacred or secular, has been thought of. After the most successful "Messiah" evening given some eighteen months ago by the combined Methodist and Baptist choirs, an attempt was made by the Philharmonic Society to put the oratorio on in its entirety, which proved abortive and the practises were discontinued much to the regret of many who attended sheerly for the desire for good music.

Seeing that nothing further has been attempted by the local churches the Baptist choir have decided to renew practice and render part three of the "Messiah" on Good Friday. Mrs. F. A. Pedlar, L.R.A.M., has kindly consented to conduct and has called the first practice for Tuesday evening next, in the Baptist church, at 7.45 sharp.

The choir wish it to be distinctly understood that their effort is independent of the church, though the evening's proceeds will be donated to the special effort being made to entirely the church of debt, and that a cordial invitation is extended to all who may care to attend next Tuesday; it is absolutely non-sectarian and undenominational. Quite a number have already promised support.

Dr. Gaddes returned last Friday from San Diego.

At the Women's Institute meeting to be held on February 3rd, in the Oddfellows' Hall, Miss Moule will give a demonstration and Mrs. Braden will sing. Tea will be served by the executive.

The Rev. A. Evans will conduct services at the Baptist church next Sunday. In the morning he will speak on "The Upward Look," and in the evening on "The Constraining Love of the Gospel." The evening music will include a male trio.

The name of W. Wilson, Kelowna, appears in yesterday's casualties. This is Corporal Wilson, brother to "Billy," who has received a gunshot wound in the right leg according to official advice sent to his parents. We are glad to hear it is not rated as serious.

Remember the dance in aid of the Red Cross Thursday, February 8th, in Morrison's Hall. This is to be an informal affair and a splendid program of old-fashioned dances has been arranged which will begin promptly at nine o'clock. A good time is assured all who come. Refreshments served.

A noticeable importation of selected stock poultry was made by Mr. A. W. Cooke, of Benvenuto, last week. It comprised four White Wyandotte cockerels related to last year's winning pen in the International Egg-Laying Contest, at Victoria, and two Buff Orpington cockerels testing 220 egg type under the Hogan system and one Buff Orpington cock testing 242 under the same system.

Lieut. R. H. Gilbert, of the 253rd Queens University Highlanders, was in town yesterday on a recruiting mission for his unit which is authorized to recruit throughout the Dominion. Lieut. Gilbert is in charge of recruiting for the Queens Highlanders, for B.C. The latest unit authorized to the University in recognition of her services to the country, is a kilted battalion of infantry under the command of Lieut.-Col. (Professor) P. Campbell. The Queens Highlanders are equipped with a very smart uniform, wearing the Balmoral with feathers, regulation doublet, and the khaki kilt. Puttees and khaki bluchers will also be worn.

### Rutland News

(From our own Correspondent.)

Everett and Elwood Fleming have enlisted in the medical corps and left for Victoria Monday.

Mr. J. M. Clever, who has been visiting his father, Mr. A. J. Clever, left on Tuesday for his home in Washtucna, Wash.

Mrs. Gordon Caspell returned from Portland, Oregon, last Thursday. Her friends are glad to know her health has greatly improved.

The Women's Institute will meet at the school on Thursday, February 8th, at 3 p.m. Programme includes an essay by Miss Lett on "Economics in the Home," Cup and Saucer Shower; Music; Roll Call; Valentine Quotations.

## FARMERS' INSTITUTE ANNUAL MEETING

(Continued from Page 1.)

measures to combat insect pests. The number of spraying machines available was totally inadequate, and he had outlined a scheme for the cooperative purchase of machines on easy terms which he hoped shortly to lay before the government.

One of the most serious problems which fruit-growers and others were up against even now was the keeping up of the fertility of the soil. The system adopted by many growers of trying to get the most out of fruit and in addition out of truck crops without putting anything back into the soil was most unreasonable, and must lead to impoverishment of the soil. It was all very well apparently for a few years, but when the trees began to bear really big crops the bad results would be seen in the smallness of the fruit. It was absolutely necessary for the continuous production of good fruit either to dress the land heavily with manure or to turn under green crops.

To produce the best results in dairying it was necessary to grade up the stock. There were too many scrub cows in the district. These should be bred to registered bulls and the old stock weeded out as the growing stock came in. Dairying was a paying business only when carried on with good stock.

The financial report for the year was then read showing expenditures of \$495.28 with receipts of \$491.75, or a loss of \$3.53. With a balance carried over from last year, however, the books still showed a surplus of \$32.24.

The election of a board of directors resulted in the selection of the following: Messrs. L. E. Taylor, A. W. Cook, C. Rogerson, M. Hererson, G. Seon, P. A. Lewis, W. G. Schell, W. C. Spencer, W. D. Walker, and A. Day.

Mr. E. Wilkinson was elected auditor and the following as representatives to the District Institute of South Okanagan: Messrs. L. E. Taylor, A. W. Dalglish, M. Hererson, and A. W. Cook.

A communication from Mr. W. E. Scott announcing the decision of the government to discontinue the allowance formerly made to secretaries of Farmers' Institutes, brought up the necessity of raising more funds, and it was decided to raise the annual subscription to the Institute to one dollar this sum to include a year's subscription to the Agricultural Journal, published monthly by the department of agriculture.

Mr. Taylor went into further detail regarding the proposal for the cooperative purchase of power sprayers. The plan was for the Institute to finance the purchase of the machines by borrowing money from the government. For full bearing orchards one machine would be needed for each fifty acres, and would cost about \$500. The loan would be repaid to the Institute by a charge, estimated at \$2.30 per acre per annum against the purchasers.

## SYNOPSIS OF COAL MINING REGULATIONS

Coal mining rights of the Dominion in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the Northwest Territories, and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2,500 acres will be leased to one applicant.

Applications for the lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory, the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the right applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns shall be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10 an acre.

For full information application should be made to the secretary of the Department of the Interior, Ottawa, or to the Agent or Sub-Agent of Dominion lands.

W. W. COBY.

Deputy Minister of the Interior.

N. B.—Unauthorized publication of this advertisement will not be paid for.

## DISCUSS ALIEN IMMIGRATION FROM NEW ANGLE

(Continued from Page 1.)

the feeling of the Japanese need not be feared, continued Mr. Iwasaki. A Japanese M. P. visiting Hawaii, and addressing the Japanese there lately, urged them to acquire citizenship there. They could be patriotic toward both countries, but in case of war, they would side with their adopted country. The race question, he said, was certainly greater than any other question, except that of capital and labor, but the collisions between races might be compared to two mighty rivers, which when they first met, showed great upheavals in their struggles for confluence, but soon flowed peacefully together in one course.

Replying to questions, Mr. Iwasaki remarked that settlers in a new country when meeting with good treatment soon rose to their improved condition. Even the poor Irish, who had been used to having the pig in the park, could make their homes into the best, and have a piano where the pig had been. He referred to the disappointment felt by the Japanese when they came to America and found that Christians acted so differently from the teaching of Christian missionaries in Japan. A friend of his, a bank clerk in Los Angeles, had asked for admission to the Y.M.C.A. He was granted it on one condition—that he would not use the swimming pool. His friend was dumbfounded, said Mr. Iwasaki, and no longer wished to join the Y.M.C.A., adding that the Japanese were noted for their cleanliness.

At this meeting a resolution was unanimously passed that Hindus and naturalized Japanese ought to have the franchise.

Another point of interest discussed was regarding the mode of election for city offices. A man defeated as candidate for the office of mayor was thereby excluded altogether from the city council. There was no legal difficulty to prevent a candidate for mayor also offering as alderman.

A protest was raised against the multiplicity of farmers' organizations, and a resolution was passed asking the government to make investigations looking to the amalgamation of some of these.

A proposal was mooted for the formation of a "Junior Institute," and it was decided to see if the cooperation of the different school teachers of the district could be secured for such a scheme.

## PUBLIC WARNING

Fire Whistle Syren

It has been found necessary to make a test of the City's Fire Alarm and the public are warned to pay no attention to Syren which will be blown on Monday next, the 5th of February, immediately following the usual noon whistle, and every Monday noon thereafter.

The Public are also requested not to call up the Power House for information regarding Fires, as this habit works a hardship on the engineers on duty at the time as they are extremely busy then, all their attention being needed for the Pumps, Engines and Boilers.

D. W. SUTHERLAND, Mayor.

Our motto: "Quality and Service"

"Produce more in 1917"—Hon. Martin Burrell, Dominion Minister of Finance.

## ROYAL STANDARD FIELD SEEDS

WE are extending our already extensive field seed business for 1917. It is the desire of the Canadian Government that the people produce as much as possible during the ensuing year, and we are arranging with the leading dealers throughout British Columbia and Alberta to carry a complete line of ROYAL STANDARD FIELD SEEDS. These seeds are the choicest it is possible to secure in the World's Market. They are Government inspected and carefully selected for purity.

Seeds should be purchased early as prices inevitably advance as the Season progresses. In all probability the market will be short and it will be difficult later in the year to make purchases.

Order ROYAL STANDARD Field Seeds NOW. If your dealer cannot supply you write us and we will ship to you direct.

WRITE TODAY FOR FULL INFORMATION AND PRICE LIST

Vancouver Milling & Grain Co., Ltd.  
VANCOUVER, B.C.

## Printed Butter Wrappers

According to the new Dominion Government regulations all farmers who sell butter either to the stores or privately, are required to have it properly covered in a wrapper on which MUST appear in prominent letters the words "DAIRY BUTTER."

The fact is also emphasized that all butter in such packages must be of the full net weight of sixteen ounces, and in default of same a fine of from \$10 to \$30 for each offence is imposed. When butter must be so labelled even when mixed with dairy butter, and dairy butter retains its label though it be mixed with the creamery product.

You can be supplied with neatly-printed wrappers for your butter at the Kelowna Record Office, for the following prices:

100 PAPER & PRINTING INCLUDED	\$1.50
200 " "	2.00
500 " "	3.15
1000 " "	4.50

These prices include Both the Paper, which is the best obtainable for the purpose, and the Printing of same. Please note this.

Owing to the extraordinary rise in the price of butter parchment (which has gone up over 100 per cent) we have been reluctantly obliged to raise our prices slightly. Nearly all this paper was previously manufactured in Belgium, and needless to say this supply has been entirely cut off. Unfortunately there is no guarantee against further increases, indeed, they are more than likely.

## Kelowna Record
