FRENCH SOLDIERS BUILDING A HUT IN THE ARGONNE FOREST

Prior to the present war armies were rapidly moved about, the soldiers using tents for shelter. The use of trenches entailing a large amount of work and slow progress has caused many shelters of a permanent character to be built.

Local Syndicate Will Operate Cannery

Arrangements Made to Lease Local Building for Season

It will be good news to the people of Kelowna and district that there is every prospect of the cannery being operated this year as usual. Ever since the liquidation of the old company efforts have been made in various quarters to formulate some scheme of keeping the plant going. Not only is it highly necessary that the farmer should have every possible outlet for his produce, but the operation of the cannery provides a pay-roll which would be welcome indeed to many during this time of depression.

The difficulty, of course, has been the financing, but thanks to the real practical local patriotism displayed by a number of business men in town even this difficulty has been so far overcome, that it is definitely announced that operations will very shortly be commenced.

Ten thousand dollars has been subscribed by the small local syndicate which has been formed. This consists of Messrs. D. Leckie, D. W. Sutherland, D. Lloyd-Jones, P. B. Willits, & Co., Geo. Ritchie, W. Haug, E. L. Cross, T. Bulman and Dr. Boyce, with possibly a tenth. By subscribing \$1000 each a substantial capital sum was thus created, and backed by promises of aid from wholesale houses, an agreement has been entered into with the liquidator to take over the plant for a year. At the end of that time should the success of the enterprise warrant it some more permanent arrangement will be entered into.

I.O.G.T. WEEKLY MEETING

Last Tuesday was "apple night" at the Good Templar's meeting. The program, which consisted of songs, readings and recitations, all about apples was highly enjoyed by all present. After the program apples were handed around.

Next Tuesday night will be an open night when anyone who likes to enjoy a good time will be welcome. A splendid program has been arranged which will begin about 8 o'clock. Everyone is welcome and a special invitation is extended to all who are interested in temperance work. Everything is entirely free. After the program refreshments will be dispensed.

Vernon Wins Lacrosse Game

The local intermediate lacrosse team journeyed up to Vernon today and crossed sticks with the Veronites in the return game early this afternoon, meeting defeat by the score of 6 to 4. Owing to other sports that had been arranged the game was called very early and a number of the players of the Kelowna team reached the field just in time to play and started in without even a minute to warm up or stretch their weary limbs after the trip up and to this fact they lay the greatest share of credit for their defeat as the Veronites secured four goals in the first quarter before Kelowna could get going.

In the second Kelowna scored one and the third quarter resulted in one more for each side. The final quarter netted Kelowna two and Vernon one bringing the final total up to six to four in favor of the home team.

The game was very clean throughout and after the first quarter, which was rather loose and slow as far as Kelowna was concerned was as good a game as has been seen in the valley in some time.

Mr. E. L. Ward motored up to Vernon last Friday in company with Mr. J. B. Michell and his son of Kamloops who had been on a business visit to Kelowna.

Mr. M. Heron brought into the office this week a fine sample of wheat from his ranch. Grain has done remarkably well this year in the district and the sample measures over four feet in height, and was cut over a week ago.

Traffic Opens on Kettle Valley Railway

Banquet Held in Penticton to Celebrate Event

The opening of the traffic on the recently completed Kettle Valley Railway was celebrated Monday evening at Penticton with a grand banquet, at which many important railroad and government officials and leading representatives from all parts of the valley were present. The guests numbered about 150 persons, and included Mr. J. J. Warren, president of the road, and Mr. O. C. Fisher, superintendent and traffic manager, the Hon. Thos. Taylor, provincial minister of lands and railways, Mr. Duncan Ross, ex-M.P., Bishop Doull, etc. Mayor Jones, Mr. W. G. Benson, and Mr. S. T. Elliott attended from Kelowna.

The commencement of the banquet was delayed until about seven o'clock in the evening owing to the late arrival of the train from the east and was continued until nearly four o'clock the following morning.

It must have been a proud moment for President J. J. Warren, says the Penticton Herald, as the banquet speakers poured upon him a host of compliments upon the able way in which he, with Chief Engineer McCulloch, had carried on the construction of the 275 mile line from Milway to Merritt during the past five years.

As the speakers rightly said, the occasion was one of hardly less consequence to the district than the actual founding of the town. It marked the actual linking up of the Okanagan and the coast, of this valley and the Boundary and Kootenay. It meant the coming of a new short line, not only to the big cities of the west, but also to the prairie land to the east. It meant added development in Southern British Columbia in mining, lumbering and mixed farming. It was destined to bring about added prosperity to the coast and therefore additional wealth to the Okanagan; it meant the diverting of traffic of Southern British Columbia from American roads to a Canadian line.

ZEPPELINS REACH LONDON AND DROP NINETY BOMBS

The much talked of and much feared Zeppelin raids on London have finally been carried to an accomplished fact, and ninety bombs were dropped on the metropolitan area Monday night.

Four persons were killed and a few were injured.

Little damage was done to property and no public buildings were struck.

The raid has brought a recrudescence of the anti-German demonstrations of the mob.

The feeling against Germans is acute. Crowds have attacked German shops and special constables have had to be called out to deal with the people.

Rutland News

Mr. George Cross left on Monday last for an interesting trip to the east.

An omission in last week's account of the flag raising was the satisfactory amount of \$15.00 raised for the soldiers' sock fund.

Mrs. Dilworth and Miss Flossie Dilworth returned last week after spending an extended to Calgary and Victoria.

The young people are holding a picnic at Scotty Creek and the scholars of Mr. Warden's room are gathering at the Mission Creek. The old folks still keep on working.

Mr. J. F. Burne paid a visit to Vernon this week.

The Vernon Farmers' Institute are arranging a picnic to the Experimental Farm at Summerland, and are extending an invitation to the Kelowna Institute.

CONDITION OF MAIN TRENCH AFTER SPRING THAW

The above photo shows one of the large trenches which is used as an avenue to the smaller trenches. Note the depth and the swelling French soldier despite the water.

30,000 Skilled Laborers Wanted in England

The demand for skilled labor in the old country is becoming a matter of extreme urgency to the government, and inducements are being offered to get men from Canada to go over to work in the ammunition factories or in other lines where their services may be necessary. Messrs. Barnes and Wyndham have been sent out as representatives of the British government with the object of touring the country in the search for men. Mr. Barnes is a labor M. P., while Mr. Wyndham is a member of the British Board of Trade. Their itinerary embraces most of the principle cities and industrial centres. They are to be in Calgary June 15th, Kamloops 20th, Vancouver 21st and Victoria 23rd.

Philharmonic Concert

The Philharmonic Society held another of their high-class concerts last Tuesday evening and although the attendance was perhaps, due to a variety of circumstances, not so great as might have been desired, as a musical event the concert was a decided triumph.

The orchestral selections were exceedingly clever in their rendering, and sufficiently varied. The soloists were Miss Frances Pearson, L.R.A.M., and Mrs. A. L. Soames, both of whom were enthusiastically encored. Miss Allison Hogarth, who contributed pianoforte selections, and Mr. Drury Pryce on the violin, met with the usual appreciative reception.

BIRTHS

- CROSKELL.—To Mr. and Mrs. John Croskell on May 18th, a daughter.
- AVENDER.—To Mr. and Mrs. Frank Avender, on May 21st, a daughter.
- LaFRANC.—To Mr. and Mrs. Joseph LaFranc on May 22nd, a son.
- MOON.—To Mr. and Mrs. Chas. Moon on May 26th, a daughter.
- PITCAIRN.—To Mr. and Mrs. J. K. Pitcairn, on May 27th, a son.
- NOTT.—To Mr. and Mrs. Wm. Nott, on May 31st, a son.
- MURDOCK.—To Mr. and Mrs. E. Murdock on May 31st, a son.

Creamery Plant is Thoroughly Up-to-Date

Remainder of Machinery Arrived and in Operation

The remainder of the plant for the new creamery arrived last Friday and after a day or two spent in installing and cleaning a start has been made, though of course it may be some little time before things are in full swing.

Everybody who has visited the creamery so far has expressed the greatest approval, and certainly it would be difficult to get together a neater and more compact and yet up-to-date plant. Everything is planned and arranged for the most expeditious and thoroughly sanitary handling of the work.

The cream as it is received is weighed and the weight recorded. If it is sour cream destined for butter making it is placed in the ripener, a most ingenious contrivance for pasteurizing and bringing the cream to the proper stage for churning. It is a large metal lined tank, thoroughly insulated to maintain the temperature. In it revolves, by electric power a spiral pipe through which can be passed steam for heating the cream, or ice cold water for cooling it as may be required.

From the ripener the cream is passed along a pipe direct to the churn. This churn is perhaps one of the most up-to-date pieces of machinery in the country, involving improvements which have only just been placed on the market. It is made by the well-known DeLaval firm who indeed have supplied most of the plant.

A feature of the churn which will perhaps surprise many is that the butter is not only churned, but worked, washed, and finished right in the churn, and is only removed to be moulded into bricks ready for sale.

A boiler to the rear of the building furnishes steam under pressure which is carried to various points, alongside the water pipe and so connected that live steam, hot water at any temperature, or perfectly cold water can be had instantly for washing cans and other uses.

Samples are taken from each consignment of cream as it enters and is placed in bottles. Each farmer has his own bottle, into which a sample is placed of every shipment of cream he sends. Periodically these samples are tested for percentage of butter fat and upon the result of the test the amount due to the farmer is based. A steam driven Babcock tester is provided for this purpose. Many enquiries have been made as to the price to be paid for cream, but it has not yet been possible to give more than mere approximate figures. One thing is certain, however, that as the creamery is established, primarily for the benefit of the farmers, every possible cent will be given to them for their product.

Terrific Explosion Shakes City of Seattle

With a terrific explosion which shook the city of Seattle to its foundations, a scow-load of fifteen tons of dynamite, destined for Vladivostok, Russia, was exploded last Sunday morning in the harbor outside the city. Windows were broken wholesale and buildings partially wrecked. Walter R. Thayer, local manager of the Burns Detective Agency, openly avows his belief that the explosion was deliberately planned and executed. He states that German operatives have been working between Seattle and B. C. using every possible means to embarrass the enemies of Germany.

New Battalion Authorised

Official authorization for the formation of another infantry battalion in the province has been received by district headquarters at Victoria, but it is understood that recruiting for the 62nd, as the new force will be designated, will not be started until the troops at present mobilized at the coast have been transferred to the Vernon camp.

Col. J. Duff Stuart is brigadier and commandant of the provincial camp at Vernon.

The 54th battalion, the new regiment being raised in the Kootenays and Boundary district for overseas service will soon be enlisted up to full strength. The regiment will train with the 11th C.M.R.'s the 47th and the other British Columbia units at the Vernon camp.

NEW TWO-CENT POSTCARDS

The postal authorities are now issuing two-cent post cards. These, when posted require no additional war stamp. Money orders for prisoners of war in Austria-Hungary and Germany may now be issued free of commission. This applies to British, French, Belgian, Russian and Serbian prisoners. Money orders may also be issued in favor of prisoners or war held by the British or French governments. Direct parcel post with France, which was suspended last August, has been resumed. Regular steamship communication will shortly be maintained between Honolulu and Fanning Island. Mail for Fanning Island (not including parcels) is forwarded to Honolulu for onward transmission.

News concerning the wounds received by "Billy" Wilson at the front have been received by his parents here stating that he was wounded by a shrapnell shell which burst close to him, which lacerated the right side of his face and his right hand. "Billy" says he is being sent to England and as soon as he is able will be sent home.

Farewell Party Tendered Mr. G. R. S. Blackaby

The home of Mr. H. D. Riggs on Ethel street was the scene of a very pleasant farewell social to Mr. G. R. S. Blackaby last Friday evening. Mr. Blackaby, who has enlisted in the 54th Regiment for service at the front, has made many friends during the two and a half years he has been in the city. As a member of the Baptist church he has thrown himself wholeheartedly into its various activities and although quite a young man he has been entrusted with responsible duties which are usually the task of older men. He was president of the Young People's Society for two seasons and has been the life and soul of it. He has also been teacher of the boys class in the Sunday school and the gap created by his departure in this direction will be hard to fill for he is one of the few really adapted for teaching boys. And so it came about that a large crowd assembled at Mr. Riggs' home to show their appreciation of his many services. After various games had been indulged in a short program was gone through, the Rev. A. Evans, acting pastor of the church expressing the regret of those present at Mr. Blackaby's pending departure for training and spoke highly of the services he had rendered to the church. Mr. Blackaby replied in a few well chosen words and after refreshments had been partaken of the National Anthem was sung, after which three cheers were given for him and the singing of "For He's a Jolly Good Fellow" brought the farewell party to its close.

A. M. Dalgleish returned today from a business visit to the coast.

Mrs. Capt. Temple and child returned to Kelowna on Tuesday. Capt. Temple expecting being on his way to the old country in a few days.

Mr. H. J. Hewatson went up to Vernon yesterday, having received a commission in the B. C. Horse. Mr. Hewatson has already seen considerable experience as a soldier, having gone through the South African campaign. Mr. F. Reynolds has also received a commission in the same regiment and went up Tuesday.

The secretary of the Aquatic Association reports that members are coming in well this year in spite of pessimistic anticipations. A large number of country folks have taken advantage of the reduced price of family tickets, which have been made five dollars instead of ten as hitherto for persons outside the city. The bathing is now opening in good earnest, with the advent of the fine warm weather. Mr. A. Edwards is in attendance at all times. Boats too may be hired with fishing tackle complete for those who would try their skill or their luck with the trout. Weekly dances are held in the pavilion and are well attended.

Building of the Kettle Valley Line

The following account of the circumstances attending the construction of the Kettle Valley railway, just opened to traffic, and furnishing an alternative route to and from the Okanagan is from the current issue of the Pentiction Herald, which issued a special number in honor of the occasion:

The Kettle Valley Railway Company, a subsidiary company of the C. P.R., started its work in 1910, when Chief Engineer Andrew McCulloch put a number of assistants at work on locating. Owing to the urgent desire for railway construction which was manifested by the people of the Kootenay, Boundary and Southern Okanagan districts, following upon the decision of the provincial government to aid in the construction of the line, it was deemed advisable to carry grading close to the heels of the locating surveyors. This was done at Merritt and Midway, where the country is comparatively flat.

The first grading on the line, which extends from Midway to Merritt with a cut-off to Hope, was done at the Merritt end on July, 1910, by the Macdonnell Gzowski Company, which received a contract for grading from Merritt, south to the Otter Creek summit, a distance of thirty miles. This grading was finished in 1911.

The next work was done at Midway, where Rice & Co. had a contract for thirty-five miles of grading west from Midway. This was started in 1910 and finished the next year.

Surveys on the route were carried on for two years, there being insufficient time to complete them before construction, so therefore the surveying and the grading went on simultaneously. Not a little difficulty was experienced in getting the final location lines as the Kettle Valley Railway, instead of running with mountain chains, runs against them, so to speak, crossing three, the Kettle Valley-Okanagan, the Okanagan-Similkameen and the Hope range.

In 1911 a grading contract was given to Rice & Co., from mile 25, west to Midway, which was reached the same year, on to mile 75, known as Hydraulic summit. This work was finished in 1912, with the exception of the bridges, which were built in 1913.

Rice & Co. also got a contract in 1911 for the section of grading from Pentiction to Osprey Lake, which was completed the following year.

The contract for the stretch from Hydraulic summit west to Pentiction, a distance of 58½ miles, was let that same year to Grant, Smith & Co., and finished in 1912.

On the other end of the line Twoby Bros. got a grading contract for 13 miles of line from Coldwater Junction on the Hope cut-off to Coquihalla summit. This was finished the next year.

In 1912 McArthur Bros., obtained a grading contract for 40 miles of line from Coquihalla summit west to Hope, which was finished in 1914, with the exception of a number of bridges.

In 1913 a contract was awarded Guthrie, McDougall & Co., for the grading on the line from Osprey Lake to Pentiction, a distance of 31 miles. No work was done on this until the following year, when autumn saw it finished.

The above brief review carries the line construction through the grading end of it.

The first steel was laid in 1910, when ten miles of it was put down by Macdonnell, Gzowski & Co., south from Merritt. In 1911 Rice & Co., laid 35 miles of steel west from Midway and another 20 miles was laid on the Merritt end by the contractors there.

In 1912 Pentiction saw its first steel seven miles being laid west to Trout Creek canyon by Kettle Valley workmen, together with one-half miles from the local dock to the yards. Another 11 miles of steel was added on the Rice contract stretch from Mile 25, west of Midway, to Mile 46.

The year 1913 saw the finishing of steel from Mile 46, west of Midway to Mile 75, Hydraulic summit, by the railway itself, K.V.R., workmen that same year also laying seven miles of steel from Hydraulic summit to wards Pentiction. In addition, the K.V.R., finished steel laying from Trout Creek to Mile 40 west of Pentiction, being to Osprey Lake, and rails as well as 11 miles on the Twoby Bros., grading contract from Coldwater Junction to Coquihalla summit.

Last year, 1914, steel was finished by the K. V. R., between Pentiction and Hydraulic summit, 51 miles being laid. Two additional miles of rails were also put down by the railway on the Twoby Bros. contract at Coquihalla and three miles on the McArthur Bros., section over the Coquihalla summit. Another two miles was laid at the Hope end, from the C. P. R. tracks to the river bridge there. It can thus be seen that at the same time as the railway carried on grading in one section it was hurrying rail-laying in another. Furthermore, while the line was being built between Midway and Merritt contractors and railway workmen were pushing ahead the work on the Hope cut-off in order to have it finished as quickly as possible after the other line.

This year steel was finished from Osprey Lake to Princeton.

This year also another eight miles of steel was laid at the Hope end of the Hope cut-off, and two miles more was laid at the upper end, leaving 25 miles more steel to be laid to finish the cut-off line. This work will certainly be finished this year.

An interesting feature of the K.V.R. work was the telegraph line construction. Last year the Pentiction Electric Co., built 58 miles of telegraph from Pentiction to Hydraulic summit, Rice & Co., having built 75 miles from Hydraulic summit to Midway. Rice & Co., also built from Pentiction to Osprey Lake. This year Mr. J. J. Dunn, of Pentiction, has the contract for 84 miles from Osprey Lake to Hope. The section from Osprey Lake to Princeton has already been finished.

The Kettle Valley Railway company is now asking for tenders for the construction of snow sheds on the Coquihalla line to Hope, to be built this year.

The big bridges on the Kettle Valley line will be among the objects of greatest interest to the traveller on the new southern B. C. steel highway.

The biggest bridge of all is, of course, the one hung over the Fraser river at Hope, where the cut-off line turns eastward from the C. P. R. main line into the Hope Mountains. This structure is 960 feet long, having four steel spans of 240 feet each. A highway for pedestrians and vehicles is provided above the railway track deck of the bridge. The concrete piers and foundation work were built by Armstrong and Morrison, of Vancouver, and the steel superstructure, by the Canadian Bridge Co. The bridge was finished this year.

The highest bridge on the K. V. R. is that at Trout Creek canyon, a few miles out of Pentiction. It is 245 feet above the water. The steel work on the bridge, which was built in 1913 is 250 feet long and the approaches 450, making a total length of 700 feet. Rice & Co., built the foundations and woodwork and the Canada Foundry Co., put in the steel superstructure. Two or three of the bridges now under way in the Hope cut-off section are worthy of more than passing interest. There is one over Ladang Creek which is 220 feet high and 600 feet long. McArthur Bros., have the foundation work and the Canadian Bridge Co., the steel. Another bridge over Slide Creek, is 400 feet long, having a single span of 320 feet. McArthur Bros., are building the foundations, while the steel work is in the hands of the Dominion Bridge Co.

Canyon Creek, east of Pentiction, is bridged by a wooden trestle, which is no less than 180 feet high.

SYNOPSIS OF COAL MINING REGULATIONS

Coal mining rights of the Dominion in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the Northwest Territories, and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2,500 acres will be leased to one applicant.

Applications for the lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns shall be furnished at least once a year.

The lease will include the coal mining rights only, but the leasee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10 an acre.

For full information application should be made to the secretary of the Department of the Interior, Ottawa, or to the Agent or Sub-Agent of Dominion lands.

W. W. CORY.

Deputy Minister of the Interior.

Printed Butter Wrappers

According to the new Dominion Government regulations all farmers who sell butter either to the stores or privately, are required to have it properly covered in a wrapper on which MUST appear in prominent letters the words "DAIRY BUTTER."

The fact is also emphasized that all butter in such packages must be of the full net weight of sixteen ounces, and in default of same a fine of from \$10 to \$30 for each offence is imposed. Why butter must be so labelled even when mixed with dairy butter, and dairy butter retains its label though it be mixed with the creamery product.

You can be supplied with neatly-printed wrappers for your butter at the Kelowna Record Office, for the following prices:

100	PAPER & PRINTING INCLUDED	\$1.50
200	" "	2.00
500	" "	2.75
1000	" "	3.75

These prices include Both the Paper, which is the best obtainable for the purpose, and the Printing of same. Please note this.

Kelowna Record

Put More Brains into Farming

The best of farmers realize very keenly the supreme importance of wise and efficient farm management. It means so much to the final outcome. The man who is a student of his farm very soon gains the conviction that the subject is bigger than he is; that he needs all the help, both physical and mental, that he can employ to make things come out right. And then, with the best of forecast, he is subject to the hazard of the weather which often sets back and thwarts him in his wisest and best endeavors. As one farmer once remarked to us who was formerly a railway engineer and a good one too: "I used to think that railroading could beat any vocation in compelling a man to keep his wits on their feet all the time; but farming if you do it right, can beat the railway twice over."

Some men get discouraged in trying to do as well as they know. There are so many hindrances in the way. But there is this to be said of the farm: It is a place for the best trained brain, the wisest foresight and the largest use of what science has to give if we but know it, and there is no place for better business management than the farm. Farmers as a rule do not appreciate the possibilities of their own farms. Farming has not been considered a learned profession. From father to son for many generations it has not been thought necessary to be well educated in farming. It is for that reason that you see so few young men developing their minds and making an intellectual study of this pursuit.

But conditions are changing. The expense of living is increasing, the soil is growing less and less productive in the hands of nine out of ten farmers, the requirements of town life and the hope of winning a big fortune are taking away the best intellectual product of the farm. The mistaken notion that a man can never win distinction in society by being a farmer misleads a host of young men who are raised on the farm. And then there is the strange unreasonable idea that thousands of farmers have that there is no need of giving their sons special education for farming. They are willing to spend their hard earnings to send a boy through college to make, very likely, only a third rate lawyer or doctor of him. Such farmers lack a true appreciation of the possibilities of first class farming to start

Airships for the Farm

The owner of a ranch of more than seventy-five thousand acres in Montana, who says he was the first man in the state to get an automobile, has started east to buy an airship.

He says it used to take him over a week to inspect his broad estate from horseback and that the automobile proved a great improvement in this respect. He has six sheep herds to watch—and their keepers also. But the roads are bad and he wants a conveyance that will not be dependant upon them. "There are no bad roads in the sky," he declares, "and a fellow can just skim over the woods and mountain peaks and muddy roads and everything else—and do it in half a day."

This all sounds very fine, but any airman could tell the Montana ranch owner that there are "bad roads" in the sky as well as on the earth, and he will do well to look out for them.

The Dutch war minister announced in parliament that a bill is being prepared providing for universal compulsory military training. This measure would increase the army to approximately 1,000,000 men.

Among the victims of the sinking of the "Lusitania" was Mr. Kenneth J. Morrison, president and manager of the Morrison Steel and Wire Co., Ltd. New Westminster, and president of the British Columbia Manufacturers' Association. The deceased was a brother of Reeve M. N. Morrison of Peachland.

Both they and their boys see only the work side of farming. They do not see that there is a still more strenuous work side to every other pursuit if a man wins its best rewards.

But the light of a truer conception of what real farming means to the farmer himself, to his mind as well as his hands, is dawning on the world. If special attention and training is worth anything anywhere it is worth it on the farm. Because so many farmers do not see this great truth, farming is what it is, soil impoverishment is what it is, and the state of individual mentality on the farm and the low profit of farming is what it is.—Hoard's Dairyman.

Botanical Notes

The following list of wild flowers is a continuation of the list published on May 20th:

31.—Red-stemmed Dogwood. (Cornus stolonifera). Shrub. Leaves opposite; cream-white flowers in flat spreading cymes. Petals and stamens 4. Berries white or lead-colored, (sometimes found blue.)

32.—Small-flowered Collinsia. (Collinsia parviflora). Fig-wort family. Corolla irregular, white and bright blue. Leaves oblong, opposite (or verticillate).

33.—Purple Vetch. (Vicia americana). Climber, 3 or 4 feet. Oblong leaflets 8 to 14. One of the most charming of very common wild flowers. The colors vary from magenta lilac, in buds, to Bishop's violet, pansy violet, bright blue and aniline blue, and when dry becomes indigo blue.

34.—Heart-leaf Arnica. (Arnica cordifolia). A handsome yellow composite flower, over an inch across. The plant is soft and fragrant.

35.—Cut-leaved Mustard. (Sisymbrium incisum). Flowers yellow. A tall and somewhat handsome road-side weed, 1 to 4 feet high.

36.—Involved Fly-Honeysuckle. (Lonicera in voluta). Shrub, with opposite ovals, pointed leaves. The bractlets surrounding the yellow flower are conspicuous.

37.—Bicknell's Geranium. (Geranium Bicknellii). Grows to a foot or more in height. The pale purple flowers are about half an inch across and are not numerous. The 5 petals are slightly cleft.

38.—Mountain-lover. (Pachystima myrsinites). A low ever-green shrub, on wooded slopes. Flowers small, petals 4, pale green or pink.

Orders placed with Canadian manufacturers by the British war office for the manufacture of shells have already amounted to more than \$154,000,000. This announcement was made by Colonel A. Bertram, chairman of the shell committee, in a recent interview with the "Journal of Commerce", Montreal. Since February when the committee began shipping the shells, the average daily shipment has grown from 500 to 10,000 shells, said Colonel Bertram. Already 430,000 have been shipped from Canada. By July it is hoped that the daily average will amount to 40,000.

How Seeds Travel

Some seeds make journeys with wings, and others travel from place to place by attaching themselves to the clothes of men or the hair of animals; still others make their journey in the stomach of birds. These are facts that will interest the young people who are taking an interest in agriculture and are working in a garden at home or at school. According to the United States Department of Agriculture's specialist, the seed as the starting point in the life cycle of a plant may well be studied first by young gardeners.

The seeds of the maple tree are particularly interesting. They are provided with wings, and when they become detached from the parent tree a gentle breeze will carry them a considerable distance from the branch to which they are attached. There are many forms and modifications of the winged seed, as the linden, the hornbeam, the elm, and the pine. These are all common trees from which seeds for illustrative purposes can be secured.

Some seeds are also provided with parachutes or umbrellas, not for protection from rain and storm, but for purposes of locomotion. The seeds of the thistle, the milkweed, and the dandelion, in fact, the seeds of all plants which have a cottony growth, are provided for these aerial journeys.

Besides these, some seeds are provided with hooked appendages by which they can attach themselves to the clothing of men or to the hair of animals, so that they become transported from place to place. Other seeds have hard seed coats, or shells, which are covered in many cases by edible fruit. The fruits are eaten by birds, but the seeds are not digested, and in this way become distributed from place to place. The groves of cedar which are characteristic of the landscape in many sections of the country, it will be noted, are chiefly placed among the lines of fences or fence rows. The fruit of the cedar is an edible one, but the seed is not digested, and in this the existence of these hedge rows of cedars is explained. Cherries, grapes, and other fruits are to a considerable extent disseminated in like manner.

The hard nuts of our nut-bearing trees are not used as food by birds or large animals, but are usually sought by squirrels and small rodent, which are in the habit of gathering and burying them in various places or storing them in large quantities for winter use. The result is that a considerable percentage of those which are buried in this manner are never rediscovered by those hiding them, and in time nature causes the hard shell to crack and open, and the warmth and moisture of the soil brings the germ contained in the kernel into life, and a tree springs into existence. It will be noted that the nuts which were buried by the squirrels did not germinate immediately after being buried, but waited until the warm weather of the spring came before they put forth their tender shoots. This is not because they willed it, but because the hard outer walls of the shell would not admit the air and water to the germ, so as to stimulate its growth.

It was necessary that the shell be frozen and broken by the action of the frosts and the weather before moisture could gain an entrance to cause the swelling of the germ. This peculiarity when taken advantage of commercially is called stratification. Seeds with hard shells, such as cherries, peaches, plums, and the like, have to be stratified—that is, they must be planted in the fall where the plants are to grow, or they must be packed away in boxes of sand in a position where they will freeze and remain frozen during the winter, in order that they may germinate the following spring. If seeds of this character are stored and kept dry during the winter they will not germinate if planted in the spring. Seeds with thin coats, however, like peas beans, etc, if treated in like manner, will be destroyed by the action of the cold, and no plants will result from planting them in the autumn. Such seeds must, from the nature of the case, be retained in a dry and comparatively warm place during the winter season in order that their vitality may not be destroyed.

A decided economy in fuel consumption is effected by using nickelled steel in

McClary's Kootenay Range oven. It attracts and holds the heat far better than most oven materials. See the McClary dealer. On Sale at the Morrison-Thompson Hardware Co., Ltd.

TOWN AND COUNTRY NOTES

Mr. J. J. Warren, president of the K.V.R., passed through yesterday on a visit to Okanagan Centre.

Chief Thomas left yesterday for New Westminster with a patient for the provincial asylum.

The hospital nursing staff will not receive on Friday, June 4th, nor again this season.

Mrs. P. L. Bird will not receive on Friday, June 4th, nor again this season.

Mr. and Mrs. E. Wilde left Wednesday morning for the Old Country. Mr. Wilde has been on the staff of the Royal Bank for some time past.

Mr. A. L. Moreland, formerly with D. Leckie's hardware store left this week to take up his new duties as accountant and secretary-treasurer of the Summerland Fruit Union.

The Ladies' Aid of the Methodist church are arranging a Strawberry and Ice Cream Festival for Thursday, June 17th, at the City Park, both afternoon and evening. All are welcome. Go and have a good time.

Miss Dorothy Warnock, of Galt, Ontario, is staying in Kelowna for a few days as the guest of Miss Katie Lloyd Jones. Miss Warnock is on her return home from a tour of California in which she visited the exposition.

Miss Lena Wilson left this morning on a three-weeks vacation at the coast where she goes to join her sister, Mabel, well known to Kelowna residents. While away Miss Wilson will also act as a delegate from the Kelowna Rebekah Lodge.

"A Juvenile Sale" will be held on Saturday, June 19th at the Old English Church grounds and any articles of house furnishings, antique pottery, implements, tools, poultry, eggs, hams, live stock, and in fact anything but old clothes will be accepted and auctioned off. Tea will be served at the usual price.

The Baptist Young People's Society held their last regular meeting on Monday, the subject being "Missions." An interesting time was spent in discussion of this important phase of Christian work. The last meeting of the society will be held next Monday when the members and friends will hold a "Hard Times" social.

Bills are out announcing a grand celebration at Penticton on July 1st, under the auspices of the Penticton Turf Club. The program will include horse races, athletic sports, aquatic sports, etc. The Penticton brass band will be in attendance during the day. J. H. Heales is the secretary of the club.

Another Kelowna man's name appears among the wounded in the casualty lists this week in the person of Walter Charman. Mr. Charman was formerly employed at the livery barn of Mr. P. Brooke.

The Woman's Christian Temperance Union will meet at the home of Mrs. C. Wilson on Tuesday, June 8th, at 3 p.m.

Chas. Harvey, jr. left Tuesday morning for the coast where he has accepted a position with the Ford Motor Co. at New Westminster.

A special invitation is extended to Baptist friends for next Sunday morning when the communion will be dispensed. There is also some important business to be met by church members.

Mrs. H. H. Millie who, we are glad to hear has made rapid recovery from her recent illness left yesterday afternoon for Penticton, where she will be the guest of Mrs. Johnston.

Mrs. Davis, of Glenmore, and her two children left yesterday morning for England. They are to sail via the "Athenian" from Montreal on the 16th inst. Mrs. Davis had the misfortune to lose her husband by death a few weeks ago.

The Children's Aquatic Fete in the Park on Saturday next promises to be a big success. The park itself is delightful at the present time and has never before looked so attractive. Every child in the district should come and join in the games and have a ride on the lake.

Dan McMillan underwent a serious operation last week in a local barber shop when he had his hair amputated. Dan came through feeling fine but has suffered much torture since owing to the fact that all his friends insist in removing his hat and exposing the colossal dome.

The local intermediate lacrosse club left shortly after noon today for Vernon, by auto, where they will play the second game of the season with the northern town.

COUNTRY GIRL'S HOSPITAL AID HOLD SALE OF WORK

Once more, by the kind permission of Mr. Challenor, his pretty garden at Woodlawn was lent to the Country Girl's Hospital Aid last Saturday where the weather proving better than our fears brought a sunny afternoon and many friends to the sale and tea held by the members of the society.

The stall reserved for articles made for the competition proved of great interest and the articles themselves so uniformly good that a second prize was awarded. The first was won by Miss Shaylor for a dainty, embroidered muslin matinee coat, and the second by Miss Coads for a prettily worked child's frock.

There were many other articles and useful devices besides some produce sent from the gardens and ovens of members and friends, which together with the sale of tea tickets, helped to realize the satisfactory sum of \$76.35.

The society wish to thank all those who so kindly gave their assistance in various ways which helped in making the affair such a success.

Schools Baseball League

RUTLAND AGAIN DEFEATS PUBLIC SCHOOL

Rutland won another game from the Public school team at Rutland last Saturday afternoon and now have a comfortable lead in the pennant race.

The game was one of those marked throughout with sensational fielding stunts, and even the Public school team displayed wonderful skill, in fact for the first time this season, in spite of the fact that they were defeated by a score of 12 to 4 they looked like a real ball team and played a far better game than the score would indicate. They are, of course, weak in the pitching department and many of the players, although good in their own class are not big and strong enough to contest successfully with the other and larger teams of the league. They are, however putting up a game but losing fight, much the same as the Rutlanders did last season, and perhaps their efforts will yet win them a game before the close of the season. Rutland, it will be remembered won the last game of the league last year, the only win of the season.

HIGH SCHOOL LOSE TO ELLISON

The game at the city park last Saturday afternoon between Ellison and the high school was indeed one for blood, as each team needed the game to have a chance at the much coveted pennant.

The High school team started out strong and took the lead in the openings, but held it for only a short time as Ellison began hitting the ball and forged ahead in the fourth inning and were not again overtaken.

Both teams played good ball but the game was what may be termed a pitcher's battle with Sutherland and Kincaid opposing each other. Kincaid however had one of his good days and slightly outpitched Sutherland, although on a couple occasions he too was hit pretty freely, but each time tightened up before too much damage was done.

The feature of the game was the hitting of Munford, who appeared to like Sutherland's pitching. He secured a single, a double and a home run out of four trips to the plate.

The final score was 13 to 9 in favor of Ellison. This crowded the High school team down into third place in the league standing, Ellison going into second place.

Following is the standing, including last Saturday's games:

SATURDAY'S GAMES

The games this week are: Rutland at High school. Ellison at Public school.

Where is the Enemy?

(By Dr. C. W. Saleeby, in the Daily Chronicle, London.)

The drunkard is not our enemy in himself. Certainly we are his. We license alcohol, provide temptation at every corner, recite the words 'Lead us not into temptation' at part of our national religion, and then punish our victim. We should pity him, and be ashamed of ourselves, and humbly thankful to our heredity and environment that we are not in his case.

The publican is not our enemy in himself. The Registrar-General's figures prove that the publican and his servants practise the most dangerous of trades. Constantly exposed to temptation they often fall—being human—and when trades and occupations are compared, these poor fellows head the lists of mortality. Little need is there for us to attack them, who nurse so dread an enemy within their own bosoms. They must be compensated now.

The public house is not our enemy in itself. The object of this argument is to direct our action by clearing our minds. What is the matter with public houses? They are conveniently placed resorts for talk and leisure and amusement and play, all admirable things, and they dispense food and drink, whitout which no living thing can live. Why should they be closed now, when they can perform such invaluable national functions? When more than now did the nation need convenient places for shelter, rest, entertainment and refreshment? There they are, completely fitted, and the publican and his servants in attendance. Let us use and be grateful for them.

Alcohol is the enemy. Let us provoke no civil war nor recrimination, but unite against the common enemy.

We have too often abused and attacked the drunkard, or the publican, or the public house, instead of the real enemy of all men. And I appeal to temperance people that we rid ourselves of this blot upon our character.

Sugar is an invaluable food and fuel for the muscles, and the other motors and furnaces of the body. The yeast plant turns it into alcohol and carbonic acid, two poisons directly injurious to every form of animal life.

THE ARMY WORM

The army worm, probably above all other kinds of insects which increase in enormous numbers periodically, causes widespread anxiety among the farmers when it appears suddenly in a locality, and in a very short time completely destroys fields of oats and other grains. The Entomological Branch of the Department of Agriculture has just issued Bulletin No. 9, on the army worm, prepared by Mr. Arthur Gibson, chief assistant entomologist, who has charge of investigations on insects affecting field crops. In this publication of 34 pages a full description is given of the remarkable outbreak of this notorious caterpillar which occurred in eastern Canada in 1914. The recent outbreak was the most severe of any which occurred in Canada, and the damage caused is estimated at \$300,000, five-sixths of which took place in the province of Ontario. The value of the trenching method of control was amply demonstrated. No matter how big the advancing army of worms were, it was shown that crops could be saved from their ravages. In the bulletin the insect is described in all its stages, and methods of controlling it are given. A full discussion is included on the life-history and habits of the worm, its food plants, natural enemies, etc.

Germany has invented a cheap, short-range torpedo for use against transports and other unarmed ships. It has range of from 1,000 to 1,500 yards and instead of carrying 250 to 300 pounds of gun cotton takes but 100 pounds, or less, and needs but simple mechanism.

Kamloops has been suffering from an epidemic of fires, seven occurring in one night last week. Some of the fires were undoubtedly of incendiary origin and suspicions are entertained that alien enemies may be at the bottom of them.

Rumors are persistently being circulated that a German spy caused the explosion which destroyed the Steamer Princess Irene at Shearwater with a loss of more than three hundred lives. The Admiralty has ordered an investigation of the disaster, but it is declared that the explosion will surely be found to have been due to an accident. Outside of bits of floating wreckage there is no trace of the Irene in the harbor. The explosion which wiped out the crew of two hundred and fifty, and seventy-eight dockyard employees, literally bled the steamer to atoms.

Improving the Dairy Cow

Many of the dairy cows one sees in herds all over the country do not pay for their keep. We are all aware that animals which are always ailing and are bad doers are not worth keeping, and the majority of farmers get rid of such animals as hastily as they can. Not so, however, with those animals which are always eating, look well, and make excellent beef animals, but which only give their quart or so of milk per day. These, for some reason or other, many keep on year after year, quite oblivious, it would seem, of the fact that the sooner they were sold for beef the better, not only for the benefit of the farmers but also for that of the community at large. A deep milking cow can easily give \$50 worth of milk more per annum than a poor milker. We are probably not so aware of the fact that we may easily lose money on the inferior animal all her days, and eventually sell her for less money for beef than we might have done at the commencement of her unremunerative career. Not only does such an animal eat valuable food, but she also occupies a space that should be taken by a superior animal.

The cows one should keep in the herd are those of a strong constitution, good thrivers and deep milkers. The giving of large quantities of milk produces a great strain on an animal, and only those with strong constitutions can withstand it. It matters little or nothing to the ordinary farmer as to the other points in his animals so long as they fulfil those given above.

The best way, and the cheapest, for a farmer to improve his dairy stock is by breeding his own cattle, selecting these from the most profitable members of his herd. To ascertain the animals from which to breed he should certainly keep milk records. If any of the cows, in the case of Shorthorns, give less than 600 gallons per annum he should get rid of them.

Milk records are of little value to the farmer who keeps them unless he takes advantage of the information they give, and carefully weeds out undesirable animals. How can one expect to improve a herd of dairy cattle by keeping all the animals in the herd? This may seem an incredible thing for a farmer who keeps milk records to do, and yet I have known several who did it. Rather than produce a somewhat smaller supply of milk at an increased profit they keep on the unremunerative animals and so produce more milk, but at less profit, eventually than they would have done had they produced the smaller quantity. Surely if a farmer can produce a certain quantity of milk per day with a clear profit upon every gallon of milk he obtains, he is well advised to produce this quantity, and no more, if by keeping a few more animals he produces more milk but loses upon every extra drop he raises.

BUILDING SILOS

For the purpose of showing farmers throughout the province the advantage of using silage for the winter feeding of farm animals, the Livestock Branch of the Department of Agriculture will superintend the construction of silos in a number of agricultural centres of British Columbia, during the next few weeks. The places that will be visited are: Burton, Arrow Lakes, Revelstoke, Kelowna, Ladysmith, Summerland, Penticton, Salt Spring Island, Armstrong, Dennison Station and Ladner.

One of the requirements is that the farm on which the proposed silo would be built grow five acres of fodder corn.

The purpose of this work is to introduce the silo to various districts of the province where it may prove profitable, and to demonstrate to the farmers that a serviceable silo may be constructed at comparatively low cost. The use of silos in many parts of the continent has proved to be not only an admirable, but an indispensable factor to the modern farm for storing green food and fodder.

During the fall of the year silo filling demonstrations will be conducted at a number of points in British Columbia by a staff of the Livestock Branch for the purpose of illustrating the proper methods of filling.

Hay in car lots will now be admitted into Canada from Minnesota, also North and South Dakota. Such importations had been prohibited on account of the foot and mouth disease.

The longer the milk remains in the udder the more it is impoverished by absorption. Any irregularities in the milking or management of the cows, will tend to lessen the milk flow and cut the profits.

Considerations for the Business Men

WE have devoted a considerable amount of both time and space in trying to convince the general public of the unprofitable plan of buying their supplies from mail order houses, and thus sending money OUT of their own town and receiving no more than they could get for it at home. The same principle applies to the business man in the matter of Printing. There are some who have not considered this. They get their Printing orders executed by outside offices, and yet expect the people of their home town to quit the mail order houses and deal with them.

We have every facility for doing all kinds of Commercial and High-Class Printing, and by giving us your orders you will not only boost your own town but directly help your own business by keeping money circulating at home.

WANTED!

FOR SALE

FOR SALE. Lefevre estate. Now is your chance for a good improved ranch, the best buy in the Okanagan. One hundred and forty-three acres, all fenced, a fine creek runs through the property, best of land, with its own irrigation system, in the heart of the Orchard district, on the main road, only three miles from Kelowna mail delivered at door every day. "Tommy Atkins" pleaded exemption from church parade on the ground that he was an agnostic. The sergeant-major assumed an expression of innocent interest. "Don't you believe in the Ten Commandments?" he mildly asked the bold freethinker. "Not one, sir," was the reply. "What! Not the rule about keeping the Sabbath?" "No sir." "Ah, well, you're the very man I've been looking for to scrub out the canteen."

The people of Naramata are about to organize themselves into a water and light municipality. For the present they believe this will serve their purpose better than organizing as a municipal district. The proposition is now ready to be submitted to the government for approval, following which bonds will be tendered the Okanagan Trust Company for its water distribution system and franchise, and electric light system.

The Bank of England has received 8,000,000 sovereigns from abroad, believed to be the first instalment of £20,000,000 coming from Paris to form part of a credit of £60,000,000 which the French government is arranging in London in payment for war material and other goods. Remainder of the credit is expected to take the form of treasury notes.

RUMORS STARTED IN FUN CAUSE MUCH ANXIETY

Last Thursday a couple well known young men weighed anchor and started out on a cruise to Okanagan landing, with the intention of visiting Vernon and spending a few hours there on business and pleasure.

Before starting they apparently underestimated the long journey in the small craft and informed many of their friends they would probably return that night, but when news came to hand late that evening that they only reached Vernon shortly before supper time, tired and hungry they decided to remain over and return the following day. This they did, but got a late start on Friday afternoon, telephoning however before leaving, so as not to cause any undue anxiety to friends and relatives, stating that they would not arrive home until late.

On the following morning, when nothing had been heard from the craft there is little wonder at the uneasiness on the part of their home folk. This gave rise to much inquiry and resulted in someone, no doubt in a spirit of fun expressing the opinion that the small craft had been torpedoed or struck a floating mine and had gone down with all on board. This led later to a rumor being circulated that the men had been drowned and created an immense amount of excitement among the people of the city and nervousness among the relatives of the men, who it appears ran into some rough weather near Wilson's landing where they tied up for the night and reached Kelowna on Saturday shortly before noon to relieve the severe strain upon their wives and friends.

The boys reported having a splendid time and pleaded not guilty to any knowledge of the anxiety they had caused and further were loud in their condemnation of persons, who not knowing any facts, had started rumors of this kind to cause such anxiety among their own people.

At Armstrong the Canadian Northern railway recently paid the Indians for right-of-way, and as a result there is a boom in Ford cars. The day of the cayuse is passing.

Descriptions are published of vitriol sprayers with which, as previously reported, the Germans are providing the Austrian troops. The vitriol is carried on the backs of soldiers in cylinders. When turned on, a jet of vitriol is thrown to a distance of thirty paces, and each cylinder contains sufficient liquid to maintain a continuous stream for one minute.

The May circular of the New York City National Bank gives facts regarding the present situation in European finance, particularly that of the beligerents. It says the war loans to date stand as follows: Great Britain \$2,725,000,000; France, \$1,802,400,000; Russia, \$1,065,000,000; Germany, \$3,491,400,000, and Austria Hungary, \$730,000,000, a total of \$9,613,400,000.

Twelve powerful airships, claimed to be improvements over anything of the air-fighting type ever floated have been completed in England. These machines are to attack German fortresses and naval bases. According to the English claim, the new type of dirigibles have remedied the defects of the Zeppelins and have vastly improved on the offensive possibilities of the German craft.

The German Chemical Society in Berlin discussed on April 27, a proposal to strike from the list of its honorary members the name of Sir William Ramsay, the British scientist on account of his criticism of Germany and German science. A resolution finally was passed against a large majority vote postponing the matter until after the war, when an opportunity will be offered to Sir William to explain the remarks attributed to him.

Were Clergy Used to Serve Personal Ends

Considerable doubt as to the sincerity on the attack upon the government contained in Mr. Moses Cotsworth's pamphlet, "The Crisis of B.C." is expressed in an editorial of "The Western Methodist Recorder." The Recorder is supposed to be the organ of the Methodist church of the province and its utterances naturally reflect the opinion of the majority of the clergy of that denomination here. The editorial committee is composed of Rev. W. J. Sippell of Vancouver and Rev. J. P. Hicks of Victoria.

Under the heading: "The Crisis in B. C." The Recorder says: "The pamphlet bearing this title, issued recently by the Ministerial Union of the Lower Mainland of British Columbia, and a public meeting under the same auspices at Vancouver seem to have caused a mild sensation. The pamphlet, which was prepared by Mr. M. B. Cotsworth, and bears the endorsement of the Revs. N. A. Harkness, A. E. Cooke, R. F. Stillman, W. S. A. Crux and A. M. O'Donnell, is a somewhat fierce onslaught upon the Provincial Administration, charging flagrant exploitation of the natural resources of the province.

"Whether the charges are substantially true or false we are not in a position to say. If they are true, the guilty parties should not escape the penalty of public humiliation; and we hope now that the actual facts will be disclosed.

"On the face of it, however, the attack looks too bitter to be sincere and suggests that the ministers have been used to accomplish the personal designs of the author of the pamphlet and perhaps the party politicians.

"We ministers are supposed to be rather easily susceptible in such matters, and if it is true that some have already admitted that they had not personally inquired into the facts (notwithstanding the "Foreword" of the pamphlet) but had accepted simply the statement of Mr. Cotsworth, the crusade will have little effect upon public opinion."

TRENCH RABBITS

Three hundred children of Belgian farmers living near the fighting line—172 of them girls and 148 boys—have been taken to Paris. Hundreds of children have been brought into the capital from Belgian, French and British camps in recent months. Many of the children are orphans or have been separated from their parents through the exigencies of war. Many of the waifs had been cared for by the soldiers who call them, "trench rabbits." Some of them have been actually sheltered in bombproofs. Nearly all those just arrived carried toys which had been made for them by their soldier guardians.

Large numbers of them have been wounded by shells during the fighting in Northern France. About ninety have been treated in one large hospital near Armentieres. Some of them have lost legs. One little boy who was a special favorite of a detachment of the American ambulance, had more toys given him than any other child in the neighborhood. He has now been brought to the American hospital in Paris. This boy's mother was killed by a shell. His father is serving in the French army.

Cherries are already being snipped in small quantities from Pasculand.

Vendors of oil stocks pay a license of \$25 a day at Grand Forks.

Claiming that \$699,603.99 is due them on account of the construction of a section of the Kettle Valley railroad, east of Penticton, and that the amount is the unpaid balance of the price for the work, Grant, Smith & Company, contractors, have taken out a supreme court writ against the Kettle Valley Railroad Company, and sue for the amount named.

Antone Kuepferle, formerly of Brooklyn, N.Y., who was on trial in London, charged with being a German spy, suicided by hanging in his cell at Brixton prison. Kuepferle left a note saying in part: "I am a soldier with a rank I don't desire to state. I have had a fair trial, but am unable to stand the strain any longer. I'm taking the law into my own hands. I don't wish to ascend the scaffold."

Between 7,000 and 9,000 boxes of Okanagan apples, or about 14 car-loads, according to present plans, will be shipped to South Africa this fall by the Okanagan United Growers. Space on the Canada Cape line has been arranged for, and in all about 10,000 boxes will be sent to that market by our Valley organization.

C., I, Arthur Peabody, intend to apply for a renewal of my licence to sell liquor by retail in the premises known as the Palace Hotel, situated on the north side of Bernard avenue, between Water street and Pendoz street, in the City of Kelowna, B. C. 25-29

—The—
Biscuit Business

It is getting increasingly hard to obtain the English Biscuits that the people want. With the increased demand in Europe, the increased cost of production, and the increased insurance caused by the present conditions, the matter of getting a complete stock is practically an impossibility. However, we have lately received a small shipment of the well-known Huntley & Palmer lines, a few of which we mention:

Coronation, Folkestone, Kindergarten, Alexander, Alphabet, Osborne, Arrowroot, Abernethy and Wheatmeal, at 40c per pound, and Popular Mixed and Golden Snaps, at 25c per pound.

The Canadian manufacturers have quickly appreciated the condition of affairs and have come forward with several lines to meet the scarcity of English Biscuits. The leaders of the Biscuit business in Canada who are Christie, Brown & Co., have made four new lines which are particularly acceptable. They are Polo, Sugar Shortbread, Nice, and Sovereign Fruit, all of which sell at 50c per pound. We also have ten or a dozen of the regular lines at 25c per pound, and every biscuit that Christie makes is good.
