

Meeting of City Council

City Will Loan Sinking Fund at 8 per cent.

There was a full attendance of the council Monday morning.

The correspondence, which was read first, included a letter from Messrs. Aemilius Jarvis and Co. in reference to the purchase of city debentures; a letter from the Rev. D. Campbell, of Enderby, thanking the city for the use of the park for their Sunday-school excursion, and the mayor for the kind attention and hospitality shown them; from the Hon. Martin Burrell, in reference to the lowering of the lake.

The following accounts were handed to the finance committee for payment:

Dominion Express Co.	9.00
Joe Alexander, work on water wa.	17.15
Joe Smith, raising electric li't poles	.83
C. Lancaster ditto	.83
J. Lindstrom ditto	.83
K. Smith ditto	.83
B. C. Anti-Tuberculosis Society, care of N. Krumer	21.00
Board of Works paysheet, ending June 22, 1912	1171.00

The C.P.R. submitted a blue print map of their trackage to the north of town, with some recent additions to accommodate the new cannery. The city was asked to ratify the plans which had to be submitted to the railway commissioners.

Some question arose as to whether the consent of property owners concerned had been obtained for the extensions of the tracks, and it was thought advisable to make some inquiries on the point. Dr. Boyce was summoned by telephone and a consultation held which elicited the information that the lots had been sold subject to the right-of-way for the company's tracks.

A resolution was passed approving the plans.

A sub-division of plan of Blocks 44 and 45, Map 462, adjoining the exhibition grounds on the north and belonging to the D. W. Crowley Co., was submitted and passed.

A rough draft of a sub-division of the Bertram corner, owned by Messrs. Elliott and Copeland, was handed in by Mr. Copeland.

Consideration was also given to the matter of lending the city's accumulated sinking fund.

Mayor Jones mentioned the city had now power to loan the money on approved first mortgages and it seemed advisable to take advantage of it. Before any steps could be taken, however, the council would have to appoint valuers. Applications were already in for three loans which appropriated \$10,000 of the \$18,000 available.

The following resolution was passed: "That the city loan 75 per cent. of its sinking fund on first mortgages bearing interest at the rate of 8 per cent. per annum. Loans to be appraised, and passed by the council."

Several suggestions were made as to the appointment of valuers, and it was finally decided to leave this in the hands of the finance committee.

Ald. Copeland reported having investigated the application of Mr. H. G. Meugens for a crossing, and had found that it was a private crossing into his own lot which was asked for. It was the usual custom for owners to provide these at their own expense.

Ald. Copeland also mentioned a complaint which had been made to him of water having backed up over a street rendering some kind of a temporary plank bridge necessary. He pointed out in this connection that it would be advisable for the council, before passing new subdivision plans, to go over the ground and inspect the proposed streets. Many plans had been put in lately with streets requiring very extensive fills, and he thought these should be put in by the owners, a suggestion which met with general approval.

Mr. E. Newby waited on the council to ask if any objection would be raised to his firm enlarging their boat-building premises. More room was necessary and they contemplated putting up on the side nearest the shore a corrugated iron building.

Mr. Newby was informed that no other formality would be needed but the regular permit from the building inspector.

Ald. Copeland had some remarks to make on the street work of the Board of Works. He said he would like, if funds allowed, to put in a little more work on Pendozi street. They had done a good deal of work there and it seemed hard to have to break off at the present point. There were other places, however, which needed attention.

Ald. Millie asked and received three months leave of absence, which he intended to spend on a holiday for the benefit of his health.

He also mentioned the jumping net which had been requested by the fire brigade, and hoped the council would see its way to getting one, as it was very much needed.

The committee were requested to obtain prices and other information.

The fire committee also arranged to go over the city with the fire chief to ascertain where new hydrants were needed. Several requests had been made and these were to be investigated.

Ald. Sutherland mentioned that the Light Committee had placed an order with the sawmill company for 1000 cords of slabs as fuel for the winter.

Ald. Blackwood stated that the Parks Committee were cutting a considerable amount of wood from the clearing of the new recreation ground, and suggested that the city make use of it at the power house.

Ald. Sutherland brought up the question of the day load which was now running at the power house. He said that last year all kinds of complaints had been made about the city not having a day service. People had raised a big howl about wanting to put in motors, but so far none had been put in. The new electric irons, heaters, etc., which were used had made no appreciable difference to the light bills.

Replying to a question he said they had no intention of discontinuing the service, but he thought people should endeavor to take more advantage of it.

The meeting then adjourned.

The council held a special meeting Wednesday to consider an amendment to the subdivision plan recently submitted by the Kelowna Land & Orchard Co., and passed by the council.

The reason for the amendment was an objection from Mr. R. B. Kerr, who informed the council that he was the owner of property shown on the plan as subdivided into five lots. As he did not wish to subdivide his property at present he requested the council to amend the plan and show his property all as one lot.

Mr. R. H. Parkinson said the K. L. O. Co. did not learn of Mr. Kerr's objection until the plan was presented to him for signature. As no plan of subdivision can be registered without the signatures of the registered owners of the land affected, the company were anxious to comply with Mr. Kerr's request.

Ald. Blackwood asked Mr. Parkinson whether an agreement had been made between the company and Mr. G. F. Budden in reference to some land in dispute and affected by the plan.

Mr. Parkinson said the company was quite satisfied with its title and intends to apply for registration of the plan immediately. It was probable that Mr. Budden would file an objection with the Land Registrar against the registration of the plan, in spite of the fact that Mr. J. F. Burne had convinced the chief clerk to Mr. McIntyre, (who was acting for Mr. Budden in the matter) that the latter had no legal right to the land.

A resolution was passed authorizing the amendment to the plan.

The induction of the new minister of the Presbyterian church, Rev. A. Dunn, B. D., will take place this evening in the Church at eight o'clock. The following ministers are expected to take part in the service: Rev. G. M. Milligan, D.D. of Toronto, Rev. R. J. Wilson, M.A. of Vancouver, Rev. C. O. Main, B.D. of Vernon and Rev. Mr. Daly of Summerland.

New Subdivision Has Magnificent View

The unprecedented activity in local real estate has brought many fine sub-divisions on the market, and none seems to promise better, from a strictly residential point of view, than that of "Lakeview" on the hill to the east of town.

Messrs. Duggan and Davies have acted together in securing 26½ acres of land immediately adjoining the Bankhead ranch, and on a gentle rise from which is obtained an uninterrupted view of the city and the stretch of lake beyond.

The property, contains some 110 lots, which are shortly to be placed on the market by Messrs. Bevan, Gore and Elliott, of Victoria, who have undertaken its sale. This firm is to conduct an extensive advertising campaign at the coast and back east, and incidentally Kelowna should get a good boost from their efforts. The lots will no doubt find a ready market owing to their attractive situation, and their close proximity to town, the main street, Bernard avenue, running through them some half-mile only from the city. City water and electric light is already to the edge of the property and the main streets are already levelled and graded. The price of the lots ranges from \$250 to \$600.

Mr. R. G. White, representing the selling agents, is expected here during the next few days.

Probable New C.P.R. Hotel on Shuswap Lake

A large hotel, to be built at some point on Shuswap lake, is stated to be one of the items on the programme the C.P.R. intends to carry into effect in the very near future. Many sightseers prefer to travel only in daylight through the mountains and as some of the most attractive scenery in the west is that east of Kamloops, it is intended to make the daylight run both east and west, terminate at a suitable point west of Sicamous and east of Kamloops, and it is understood a location will be found on Shuswap lake and Chase is named as the possible location. Sicamous hotel is too small for the purpose intended and it is stated that the new hotel proposed will have accommodation for 300 guests.

Promotions at Mission Creek School

From 1st Primer to 2nd Primer, Michel Mornac, Violet Gordon.
From 2nd Primer to 1st Reader, Beatrice McClure, Constance Gillard.
From 1st Reader to 2nd Reader, Roxie McClure.
From 2nd Reader to Junior 3rd, Alice Goward, Alice de Pfyffer, Cyril Gillard, Annie Swardy.
From Junior 3rd to Senior 3rd, Ruby Lytle.
Promoted on condition owing to absence:—
From Junior 3rd to Senior 3rd, Charlie de Pfyffer, George Swardy.
From Senior 3rd to Junior 4th, Sidney Lytle.

The annual patriotic service in connection with the Presbyterian Sunday School, will be held on July 7th. This will take the place of the regular morning service at 11 o'clock.

Rev. A. Dunn, B. D. will preach in the Presbyterian Church next Sunday, both morning and evening. There will be special music.

A party of five, including Mr. T. P. Hill, motored down from Vernon Sunday last to attend the funeral of the late Mr. D. McCrae. They returned the same evening.

Have you read A. W. Barber & Co.'s advertisement, if you haven't do so.

Don't forget the Over Seas meeting Thursday evening next at 8 o'clock in Raymer's Hall. A musical programme has been arranged. The organiser, Mr. Evelyn Wrench will address the meeting. Ladies and gentlemen interested in the club are cordially invited.

Plans Selected for New School

Lethbridge Architect Submits Winning Designs

The Board of School Trustees held a meeting Monday last at 8 p.m., when several important matters were dealt with, chief amongst which was the acceptance of a plan for the new school building, that submitted by Mr. G. E. Nobles, of Lethbridge, being selected from some seven or eight others. The plan shows a handsomely-designed school with ten rooms and assembly hall.

Several changes in the teaching staff at the conclusion of the present term were discussed and applications considered. Miss F. M. Currie, who was formerly on the staff but lately in Vancouver, was appointed at a salary of \$85 per month. The resignation of Mrs. K. A. Graham was accepted.

It was decided to offer Mr. C. Fulton the position of first assistant to the public school principal at a salary of \$90 per month. Mr. L. V. Roger's salary was increased by \$5 per month from July 1st.

The secretary was instructed to advertise in the "Toronto Globe" and "Vancouver Province" for three teachers, two for the junior grade and one for the intermediate grade.

The following accounts were passed for payment:—

Kelowna Furniture Co., 45 adjustable desks	226.15
W. H. Paisley, removing ashes	9.00
City of Kelowna, water and scavenging for public school	4.92
Ditto for high school	7.84
D. Leckie, 53 feet of hose, with couplings and sprinkler	13.85
T. Lawson, Ltd., janitor's supplies	.70
O.K. Lumber Co., lumber for fence repairs	2.39

Country Girls' Festival

What proved to be a most successful event was the holding of a (at the present time popular) strawberry and ice cream festival on Saturday last under the auspices of the Country Girls' Hospital Aid. Mr. Reekie very kindly placed his lawn and automobile at the disposal of the ladies and various friends residing on the bench made generous gifts of fruits and cakes. A musical programme which drew much applause was rendered at intervals by the following friends: Mrs. Lindsay, Mrs. Rose, Mrs. P. Brooke, Mrs. Dunn, Mrs. Shaw, Mrs. Soames, Miss Crowcroft, Messrs. Soames, Tollitt, Wallace, and Moodie, whilst a male quartette was given by Messrs. Pedlar, Good, Weeks and Wade.

The ladies wish to thank all the friends who so readily helped to make the occasion such a success. The proceeds totalled about \$60.

Mr. W. Gay, of Rutland, returned Tuesday from the coast.

The Public School closing exercises take place to-morrow, commencing at 10 o'clock. Parents and friends of the scholars are invited.

Messrs. R. and B. Gardom, prominent Vancouver real estate men, and Mrs. Gardom, sister to Mrs. R. H. Parkinson, have been staying in town for the past few days visiting friends.

Mr. J. L. Doyle has resigned his position as customs officer. The business of the office has increased so rapidly during the few months in which it has been established, that Mr. Doyle found the work becoming too heavy for him. Mr. Albert Boyer, who has acted for some time as assistant, has been appointed to fill the vacancy.

Mr. Jay W. Nelson, representing the Sask-Alta Realty Company of Calgary, Alta., is in the city selling Moosejaw property. He has interested a number of the best people in town in his property and expects to do a very good business. The property Mr. Nelson is selling is in the direct line of growth of Moosejaw, which in six months will have a payroll of \$1,000,000 per month. As Mr. Nelson states the property can be handled on very easy terms and is a splendid buy at present prices.

Government Grant to Dominion Exhibition

The Dominion Government has voted \$50,000 for the purpose of making the Central Canada Exhibition, Ottawa, September 5th to 16 an event of national character.

The Dominion Exhibition has now come to Ontario for the second time. It was held in New Westminster, B. C. in 1905. Every year it grows in importance. Hon. Martin Burrell, minister of agriculture, who was the first to grant the application of the Ottawa exhibition management for the national grant is taking much interest in the approaching event, and his co-operation is thoroughly appreciated. One of his last acts was to instruct the experimental farm to prepare a suitable display from the government's chief agricultural station.

Chief amongst the improvements adopted for the Dominion Exhibition is the increase of all cash prizes by 50 per cent. A total of \$25,000 will be paid out to live stock men, farmers, fruit growers and other competitors. Not only will the money awards attract a monster collection of entries but the business advantage of showing at this big exhibition is appealing to all interests. Manufacturers will fill four acres of space in the pavilions. To accommodate the large displays a new \$100,000 machinery hall has been erected. More space is demanded for live stock, the number of horse entries being estimated at five hundred.

Railway companies enlarged the territory over which low rates will prevail, the area now being extended west to Port Arthur.

The Exhibition Association pays freight on all exhibits coming from beyond a radius of 100 miles of Ottawa. Any one of these shipments returning direct home will be carried free by the railways.

In keeping with all other improvements, innovations have been made in the amusement line. There will be daily balloon ascensions, fifty midway shows, scores of vaudeville stars, chariot races, horse races, famous bands including the Scots Guards of London, Eng., military pageant and fireworks.

Obituary

It is with the deepest regret that we have to chronicle the death last night of little Edythe Robison, daughter of Mr. and Mrs. George Robison, of Glenn Avenue. The little girl, who was nearing her tenth birthday, had been ill only for about two weeks. At first it was thought that her complaint was measles but symptoms of typhoid developed and in spite of the utmost care and attention which has been lavished on her, she gradually grew worse, her heart failing at the last to stand the strain put upon it.

The sad occurrence has cast a gloom upon her playmates in the neighbourhood and at the school, and the greatest sympathy will be extended to the bereaved parents, especially to Mrs. Robison to whom little Edythe was beginning to be a great help and comfort. She was a bright, yet thoughtful child and fond of school, one of her chief regrets during her illness being the fact that she was unable to take part in the examinations. She was comforted, however, by the message that she had been passed owing to the creditable nature of her work during the past year.

The funeral is to take place from the house on Saturday at 2.30

After a brief illness, D. McCrae passed away on Saturday last at "The Garth," where he has been stopping since coming to the city from Vernon about three weeks ago. The funeral took place on Sunday afternoon, the service being conducted by Rev. J. Ball.

Mr. A. Patterson and family desire to express their sincere thanks for the kind sympathy extended to them from all sides in their sad bereavement.

Indian Outrages Alarm Nicola

As the direct result of the failure to bring to punishment to Clinton Indians who murdered a half-breed and a constable, says a Merritt despatch, Indians of the same tribe have become restless and outrages are becoming common.

On Sunday last Squamish, one of the best known hunters in the Nicola, was murdered in his home on the Springs rancherie. George Toodlak, an Indian twenty-four years old, is in jail charged with the murder, and his wife, whom he also attacked, is in a dying condition.

On the same morning another outrage occurred in the district. As Joe Coutlie, foreman of the Douglas Lake Cattle Company, was starting from Merritt to go home, an Indian jumped up behind him on his saddle, pinioned his arms and stabbed him no less than ten times. Eyewitnesses, when they recovered from their surprise, went to his rescue, but the Indian escaped. Coutlie was taken to the hospital.

Thursday last, during a thunderstorm, Constable Smith was shot at and later Chief Strang arrested a man who was boasting he would get the constable next time. He declared the policeman had shot one of his friends at Ashcroft. It took five men to place the Indian in jail, and during the struggle Chief Strang was bitten on the arm and hand.

Masonic Grand Officers Elected

Two hundred and fifty Masonic representatives from all parts of British Columbia met last Friday in grand lodge at the Vancouver Masonic temple and elected officers for the ensuing year.

The officers elected are: Mr. J. M. Rudd, Nanaimo, grand master; Mr. A. H. Skey, Kamloops, re-elected grand senior warden; Mr. James Stark, Vancouver, grand junior warden; Dr. DeWolf Smith, New Westminster, re-elected grand secretary; Mr. H. H. Watson, M.L.A., Vancouver, re-elected grand treasurer; Mr. T. Michel, senior grand tyler; and Mr. F. J. Burd, immediate past grand master.

The Australian government has inaugurated a bonus system for all babies born in Australia. The bonus for each child is to be \$250.

Edward Stowe, the Salmon Arm farmer, charged with the murder of an aged neighbour, John Cavan, in February last was found not guilty at Nanaimo Friday.

Winnipeg has been chosen as next year's place of meeting by the International Association of Real Estate Dealers of America which finished its convention Saturday at Louisville, Ky.

The fifteenth Republican national convention at the end of a long and tumultuous session re-nominated William H. Taft, of Ohio, for president, and James S. Sherman, of New York, for vice-president. President Taft received 561 of the 1,078 votes in the convention, or 21 more than a majority. Former President Roosevelt was nominated for president on an independent ticket.

Between 15 and 20 persons were drowned, and a number injured when a fifty-foot wharf at Eagle Park Grand Island, Niagara river, collapsed under the weight of 250 persons, precipitating them into twelve feet of water.

As part of its plan for the electrification of its line from Calgary to Vancouver, the C.P.R. has taken up the water rights of the Adams river a few miles from Chase. The river is very swift and carries an immense volume of water at all seasons of the year. It is estimated that 100,000 horse power may be developed at two different points along its course.

Birth

TODD.—On Thursday, June 10th, to the wife of Mr. A. Todd, a son.

Who Can Attend Irrigation Convention

It is seldom so representative a gathering of men of influence in all the many spheres of agricultural activity is got together as will be present at the coming irrigation convention.

The basis of representation established by the constitution is as follows:--

The Governor-General of Canada, Members of the Dominion Cabinet, the senate and the House of Commons, the Dominion Commissioner of Irrigation, Director of Forestry, the Director and Superintendent of Dominion Experimental Farms, five representatives of the Canadian Society of Engineers, two representatives from each Canadian railway, and one from each agricultural paper in Canada.

From the provinces of Manitoba, Saskatchewan, Alberta and British Columbia:--

The Lieutenant-Governors, the Members of Legislatures, the Deputy Ministers of Provincial Departments, Provincial Irrigation Commissioners, Chief Forester of the Province of British Columbia, three each of all Irrigation and Irrigation Colonization Companies, two each of all Agricultural, Forestry and Live Stock Associations, five each from all cities, appointed by the Mayor, two each for Boards of Trade and similar organizations, two each from all town, village, or rural municipalities, to be appointed by the Mayor, Reeve or Overseer, two each for all Canadian Clubs, to be appointed by the president, the Superintendent, or representative appointed by him, for each experimental or demonstration farm, three representatives from other irrigation associations to be appointed by their presidents.

In addition to representatives as set forth in the foregoing list, all interested in irrigation and agriculture will be welcome.

The number of homestead entries made during the month of April in Manitoba, Saskatchewan, Alberta and British Columbia was 4451. Of the settlers making entry 1199 were American, 598 English, 100 Scotch, 39 Irish, 132 German, 313 Austrian, 14 Dutch, 149 Swedish, 207 Norwegian, and 209 Russian. Of the total number 1216 were Canadians 351 from Ontario, and 310 from Quebec. Manitoba received 405 of these homestead entries, Saskatchewan 2263, Alberta 1684 and British Columbia 29.

Armstrong will have the distinction of holding first aeroplane flight in the interior. On July 1st Stark, the great Canadian aviator, will make two flights. This will no doubt be a great attraction and it is certain to draw a big crowd.

The C. P. R. has engaged the services of five Swiss guides to head the parties of tourists who wish to climb the mountains in the vicinity of Glacier, Banff and Laggan. The guides are fresh from the Alps, and know the mountaineering game from all angles. They with their families will occupy cottages at Golden.

BUILDER

Decorating & General House Repairs

General House Repairs will be speedily attended to and absolute satisfaction guaranteed. Call at office if in town, phone or write if at home.

When your child has whooping cough be careful to keep the cough loose and expectoration easy by giving Chamberlain's Cough Remedy as may be required. This remedy will also liquify the tough mucus and make it easier to expectorate. It has been used successfully in many epidemics and is safe and sure. For sale by all dealers.

IN THE SCIENTIFIC WORLD

A QUICK FREIGHT HANDLER

Easy and Inexpensive Method of Handling Goods to and from Storage Flats.

Some more expeditious means of handling goods in warehouses, whether they be crates, boxes, bales, or what not, has long been necessary to supplant the slow, antiquated methods of doing this by manual labour, especially in regard to transit between building and street. This has been found in a new type of simple conveyer that has recently been devised, and which is now in successful operation. It comprises a number of trestles supporting a continuous series of wheels or rollers, carried on two rails like a light, narrow-gauge railway. The wheels are employed when boxes have to be handled, and the rollers for bales and crates. The system works entirely by gravitation, a fall of about thirty inches in one hundred feet being advocated. Demonstrations with this simple appliance have sufficed to prove that goods can be expeditiously and safely transported by this means, and that sharp curves can be negotiated successfully. In a lofty building where goods have to be discharged from different levels the same system is adopted spirally, the gradient being so arranged that the descending goods do not acquire an unnecessary downward impetus. The conveyer has been adopted on one of the wharves of Thames-side, and another larger installation is in operation at a Belfast factory, this latter plant handling packages weighing up to five hundred-weight. The system is stated to be far cheaper and more efficient than the ordinary belt conveyer, the cost of installation being very low.

THE GLOW-WORM'S LIGHT

Learned Men Differ in Opinion as to the Source and Nature of the Light.

French entomologists have been just lately devoting much attention to the study of the glow-worm, particularly with reference to the source and nature of its light. It is found that both male and female are luminous, although in the former the light is much feebler. Even the eggs and larvae are faintly luminous. The light is produced on the last three segments of the abdomen. It may perhaps be worth pointing out that the glow-worm is not a worm, but an insect belonging to the great order of beetles the Coleoptera. Luminosity among insects indeed is chiefly found in the beetle order. The Mexican fireflies Pyrophorus, for example, are beetles. Some of them give out sufficient light to read by. Waterton sometimes used them in this way to write up his diary when wandering in the South American forests.

In adult life the glow-worm is a vegetarian, feeding on tender leaves of plants, but while a grub it is carnivorous, feeding on snails and slugs. The light of the glow-worm and fireflies has been called phosphorescent and attributed to phosphorus. Jousset de Belleme has stated his conviction that it is phosphoretted hydrogen gas stored up in the cellular tissues and in communication with the nervous and respiratory systems.

Fabre finds that phosphorus does not enter into the composition of the luminous substance of the glow-worm. Under the microscope it is seen to be a sort of white plaster covering the epidermis and full of branching tubes.

The Manchurian Bean.

The "Japan Herald" has drawn attention to the fact that Manchurian beans were formerly used only to make tofu, miso, and soy. About fifty years ago Chinese near Tiehling and Kalyuan first produced oil from them by a process similar to that employed for sesame and linseed. This oil was used for fuel and for cooking, and the residual for bean-cake fodder. In the winter of 1908 it began to be exported into Europe, where it was found to be better than cottonseed for fuel, soap-making, and feeding cattle. This success has marvellously increased the area devoted to the growing of the beans, and has caused the farmers in the north of Manchuria to give up wheat-raising. The Shantung farmers discovered that bean-cake was a first-rate fertiliser, and after the war with China this bean-cake was largely exported to Japan. The oil is used in Manchuria for lighting, lubricating, and cooking, and in south China in making waterproof cloth, paper umbrellas, and lanterns, and is often mixed with lacquer for making varnish and printing-ink. The Chinese hit upon the principle of rotation of leguminous with cereal crops quite accidentally, without knowing anything of the scientific explanation.

Vibration-Proof Electric Lamp

One of the drawbacks to the metallic filament incandescent electric lamp is the extreme fragility of the filament. The average lamp, if submitted to a jar or vibration such as occurs in a large manufactory where machinery is running, is apt to break down. This disadvantage counteracts the many attractive features which the lamp possesses. A recent invention seeks to obviate this defect. In this case the strands of the filament, instead of being looped over hooks, as is the usual practice, are passed through small rings which are carried on the hooks, but in such a manner as to have a little free-play. By this arrangement the filaments are not held so rigidly, and the effect of vibration is not so forcibly conveyed thereto. It may be pointed out that a lamp which suddenly gives out can often be given a little longer life by turning on the switch and giving the bulb a few taps to cause the broken ends to come together or fall across another strand, when, immediately lighting up and becoming incandescent, they fuse together.

The Churches

ANGLICAN

St. Michael and All Angels' Church.
Holy communion, first and third Sundays in the month at 8 a.m.; second and fourth Sundays, after Morning Prayer.

Royal Naval College of Canada,
Halifax, N. S.

The next examination for the entry of
Naval Cadets will be held at the examina-
tion centres of the Civil Service Commis-
sion in November 1912; parents or guard-
ians of intending Candidates should apply
to the Secretary, Civil Service Commis-
sion, for entry papers before 1st of Octob-
er next.
Candidate must be between the ages of
14 and 16 on 1st of JANUARY, 1913.
Cadets are trained for appointment as
Officers in the Naval Service, the course
at the college being three years, followed
by one year in a Training Cruiser, after
which cadets are rated as Midshipmen.
Further details can be obtained on ap-
plication to undersigned.
G. J. DESBARATS,
Deputy Minister of the Naval Service,
Department of the Naval Service,
Ottawa, May 6th, 1912. 31-3

Okanagan Centre

(From our own correspondent)

Tennis is now being played on
the new court near the wharf.

A meeting of the directors of
the O. K. Canning Co. took place
on Saturday, last.

Mr. Curry, fruit tree agent for
the Coldstream Estates Limited,
motored through the district last
week taking orders for trees.

Mr. W. A. Butchard, manager of
the Royal Bank at Vernon, was
down for two days this week look-
ing up some matters in connection
with the Renier Estate.

The sale of the Bolton lot near
the reservoir took place recently,
Mr. S. O. McGwynne, being the
present owner. Mr. McGwynne
resided all winter in the residence
on the Lee lot.

A large consignment of concrete
pipes arrived by the s.s. Aberdeen
on Friday for use on the new gov-
ernment road. These pipes re-
place the old wooden culverts for-
merly in use.

The small bills are out in con-
nection with the Dominion Day
celebration, and announce a very
good programme of land and
water sports. With favorable
weather conditions a most enjoy-
able day is in store for all those
who will come.

The auction sale of Mr. P. V.
Fosbery's property on Okanagan
Lake, 3 miles south of Okanagan
Centre, takes place in Kelowna on
July 9th. Mr. Fosbery purposes
making a short trip to the Old
Country after the sale, and to re-
turn again accompanied by his
wife and daughter.

Mr. and Mrs. W. Swallow left
last week for Vancouver, Victoria,
and other coast points. It is their
intention to stay at the Coast all
summer. Mr. Swallow has rented
his farm to E. J. McCarty for the
balance of the season.

A son and daughter of Mr. J.
Owen are recent arrivals from the
Old Country, and are staying with
their father who is caretaker of the
Boyd orchard at the head of Duck
Lake.

Mr. J. McClure has sold eight
acres of his Woods Lake property
to the C. N. R. Co. This eight
acre tract includes the house and
other buildings. We understand
the price to be in the neighbor-
hood of \$4,000. Mr. McClure still
retains the remaining twenty acres.
He is at present contemplating the
purchase of a property on Okana-
gan Lake opposite Peachland.

Mr. and Mrs. A. G. Austin left on
the s.s. Okanagan on Tuesday for
Calgary, after spending some two
weeks with Mr. Fowler, manager
of the Duck Lake Fruitlands Co.'s
extensive orchard. Mr. and Mrs.
Austin were on their wedding tour.
Mr. Austin is a shareholder in the
company, and partner of Mr.
Humphries in Calgary.

Mr. J. N. Eakins has bought the
ten acre lot formerly owned by
Mr. W. Goodwin. This lot is sit-
uated on the slope from Okanagan
Lake and just above the new road.
Mr. Eakins intends planting this
lot out to fruit trees next spring.
Mr. Goodwin was manager of the
first general store opened up at
Okanagan Centre by Lawson &
Ball nearly six years ago.

An unusually high wind on the
night of the 20th inst. played havoc
with a number of wharves along
Okanagan Lake, Messrs. Ward,
Gibson and Caesar being the heav-
iest losers. Some of the smaller
ones were washed completely
away. A number of large trees
throughout the district were blown
down. A quantity of brushwood
was also hurled up on the Woods
Lake beach road.

Wilson Landing and West Side Notes

(From our own correspondent.)

Mr. G. A. Batchelor is returning
from a European trip.

Miss Orton left on Saturday last
for a visit to Vernon and later to
Okanagan Centre.

Mr. and Miss Reid and Mr. and
Mrs. J. Porter were visitors at En-
terprise ranch on Sunday last com-
paring notes on the prospects for
the fruit crop. A generally good
one is the unanimous opinion.

Mr. and Mrs. R. A. Ramsay were
here for a short visit. They leave
on Wednesday for Osprey lake
where they expect to spend the
summer. They have made a num-
ber of friends during their stay in
this district and will be much
missed.

An advt. in the "Record"
really costs you nothing—it
pays for itself.

Black Leaf 40

A Concentrated
Solution of Nicotine Sulphate

This preparation has
been used with great suc-
cess for the destruction of
Green and Black Aphis,
Pear Thrips and Cherry
Slug.

It can be used in com-
bination with Arsenate of
Lead for any leaf-eating
insects. The addition of
Whale Oil Soap gives the
spray better penetration,
causes it to cover surfaces
more in the form of a film
and lessens the formation
of drops.

1 lb. tin makes 47 gals. spray
2 1/2 lb. " " 240 " "
10 1/2 lb. " " 1000 " "

Town and Country

Mrs. S. V. Bray will not receive again until the first Friday in October.

Mrs. J. W. Jones will receive on Friday, June 28th, and not again until September.

The wedding is announced for Wednesday next of Miss Ada Lock to W. F. Bouvette, Jr.

Dr. Matheson left on Friday morning for Belleville, Ont., to be present at the celebration of his parents' golden wedding. He expects to be back about the middle of August.

The leaders of the Methodist church Sunday-school wish to call attention to the fact that the school (including the Adult Bible Class) will no longer meet in the afternoon but at 10 o'clock in the morning, beginning next Sunday. Members of the school are requested to make special note of the change and to make every effort to be present.

Messrs. Harvey & Duggan are acting for the C.N.R. in getting options on all property needed along the right-of-way. Practically all land necessary has now been secured and it seems certain that operations will be commenced at no distant date.

Mr. R. Duncan, the proprietor of Dreamland, has purchased the building he occupies and is about to make several important improvements, including a sloping floor and the installation of electric fans. All this will add to the comfort of his patrons. He is also doubling his service of films giving a change every day.

Dr. Stuart W. Thayer, who is to take up practice as a veterinary surgeon arrived Monday With his family and has rented a house in Glen Avenue.

The death took place Monday morning of Mrs. Patterson, wife of Mr. Andrew Patterson of Benvoulin. The deceased lady's death was not unexpected, she having suffered for some years from an incurable tumor. The family are well known and highly respected in the district and great sympathy will be extended to them in their bereavement. The funeral took place at the Kelowna Cemetery, Tuesday, many driving out from town to attend.

Mr. and Mrs. A. T. Johnson, were amongst the visitors last weekend. Mr. Johnson is an Old Country agriculturist and journalist, and is travelling the west in search of material for a new book.

Mr. C. E. Lawrence, field commissioner, under the Dominion Commission of Conservation, was in town the early part of the week, gathering data for use in the valuable reports issued from time to time by the Commission. Mr. Lawrence, whose work carries him into all parts of interior British Columbia is an enthusiast on the Okanagan and its possibilities. Its greatest need, he thinks, is publicity. Its wealth of agricultural resources are not known as they should be, and new comers are apt to think that B. C. means Vancouver and Victoria. Mr. Lawrence is greatly taken with the magnificent crop prospects this year, foreseeing, however, the difficulty of labor and transportation.

The new sawmill boat "Orchard City," made her maiden trip Tuesday, going up the lake to bring in a boom of logs. Although in a very unfinished state she was needed too badly by the company to wait any longer.

Mr. C. C. Josselyn and Mr. F. R. E. DeHart have purchased automobiles during the week. The total number owned in the Kelowna district must be about seventy.

MARRIED—On June 15th at the English Church, John Alexander Watt to Alice Mary Notley.

For all the best lines of Old Country bon-bons, pastilles, French nougat, ju jubes, milk chocolate, &c., go to Alsgard's. They have nothing but the best of everything.

Moving Pictures for Public Schools

Mr. Thos. A. Edison has on hand one of the most interesting enterprises he has ever undertaken. He is organising a scheme to introduce moving pictures into the elementary schools of the United States and if they succeed there, they are pretty certain to be provided elsewhere. His idea is to teach science and many other subjects by means of pictures which shall "show things being done." He has already had a number of films made, among them one which shows, magnified millions of times, the process of chemical crystallization of certain substances. To watch the process as shown by that film is to be deeply impressed with the fact that there is something controlling even the action of inorganic matter. Edison expects to send into all corners of the earth gathering materials for his films. When this task is finished the pupils of the future will have opportunities of becoming acquainted with activities of the world and of nature that adults of today have not even dreamed of.

Grand Forks to be a Divisional Point

To make Grand Forks a divisional point, to construct immediately a roundhouse of at least ten stalls, machine shops, union station buildings and to establish joint terminals with the Kettle Valley railway, was agreed to by the C.P.R. at a special meeting of the Grand Forks city council last Friday. In return the city gives exemption of taxation for ten years and free right of way for additional trackage that will be required by transcontinental traffic that will pass through the boundary and Kootenay on completion of the Kettle Valley line.

Plans for the round house and machine shops are ready and the initial appropriation of \$200,000 has been made by the company to commence work. The intention is to rush the work through by winter.

New Brunswick Provincial Elections

The New Brunswick provincial elections resulted in practically a clean sweep for the government, only two opposition men, Messrs. Dugal and Pelletier in Madawaska being elected. In Northumberland where three Independent Conservatives ran against the government ticket, two of them, Stuart and Doyle, were elected. In St. John city, York and Sunbury counties, the opposition candidates lost their deposits. Mr. A. B. Copp the opposition leader, was badly beaten in Westmoreland. Premier Fleming headed the poll in Carleton. The results of the voting gives the government thirty-eight seats, Independents two and Opposition two.

The Bishop of London has met his five brothers together for the first time in forty years at Fulham Palace. The eldest member of the family is Archdeacon of Hereford. The second is H. F. W. Ingram, a farmer of Gravesend, Ont. The third is an admiral, the fourth Bishop of London, and the youngest an Indian administrator.

An increase of more than eighty million dollars in imports from the United States, and more than eight millions in those from Great Britain is shown from the figures of Canadian trade for twelve months ended April 30th last.

Contracts for the double-tracking of 550 miles of the C. P. R. from Sudbury to Port Arthur have been awarded. The work will be done this year and will cost \$10,000,000.

Canadian Railways say that the reason for the congestion of traffic is the inability of the car shops to turn out the rolling stock ordered.

The dock strike in Southampton has collapsed and the men resumed work unconditionally.

The railway board refuses to allow the Grand Trunk Pacific railway to change the location of the station at Hazelton.

The mountain towns of Laggan was almost wiped out of existence by fire on Thursday night and Friday morning.

The Saskatchewan elections are fixed for July 11th.

There is no real need of anyone being troubled with constipation. Chamberlain's Tablets will cause an agreeable movement of the bowels without any unpleasant effect. Give them a trial. For sale by all dealers.

ROYAL NAVAL COLLEGE OF CANADA, HALIFAX, N.S.

The next examination for the entry of Naval Cadets will be held at the examination centre of the Civil Service Commission in November, 1912; parents or guardians of intending candidates should apply to the Secretary, Civil Service Commission, Ottawa, for entry papers before 1st October next.

Candidates must be between the ages of 14 and 16 on 1st October, 1913.

Cadets are trained for appointment as Officers in the Naval Service, the course at the College being two years, followed by one year in a Training Cruiser, after which Cadets are rated Midshipmen.

Further details can be obtained on application to undersigned.

G. J. DESBARATS,
Deputy Minister, Department of the Naval Service,
Ottawa, May 6th, 1912.

SYNOPSIS OF COAL MINING REGULATIONS

Coal mining rights of the Dominion in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories, and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for the lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10 an acre.

For full information application should be made to the secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

KELOWNA FURNITURE CO.

"We Make Homes Happy."

THE INDIAN
By Alec Jones

Within twelve miles of Calgary, a city of 50,000 people, and with telephone communication with that city, the Sarcee Indians pursue their lives and observe exactly as their forefathers the ancient habits and customs of their tribe.

Two years ago there was a great festival at which seven of the oldest chiefs related the stories of their exploits, which the painter of the tribe preserved at the office of the agent of the Sarcee reserve.

While the history of the palefaces has been in the daily newspaper, the magazine and the Government archives, the Indians have no such means of collecting, preserving and disseminating information of their great men. The Indian lad, writes Ethel Heydon, in a magazine relies on campfire stories and a well tanned steer hide covered with queer characters painted crudely with a sort of ink made of the juices of plants.

These records are not haphazard, but they are not altogether regular. When several chiefs and medicine men of the tribe are growing old an assembly is arranged where a famous Indian interpreter and painter meets the aged men. One by one the old men stand forth before the people and recount the stories of their lives.

They tell thrilling tales of the battles in which they have fought, of the scalps they have taken and the horses they have stolen. These three achievements are regarded as the three most honorable and various exploits of the great men. Compared with these the white man's election to Parliament, his appointment to high office and his great commercial achievements are as nothing.

Sometimes their meetings last several days. The old men are enthusiastic in their descriptions of bygone days; they recite rapidly and gesticulate much. The members of the tribe, sitting about them, listen eagerly, storing the details to be told over and over again to their sons and their sons' sons, until they are tribal traditions of the long past. As they talk the painter sits upon the ground with his steer hide spread before him and paints with his dyes rude pictures to illustrate the incidents.

A circle represents a barricade or encampment; awkwardly drawn pictures of animals stand for the horses he has stolen; a galloping horse with a man on its back suggests the story of wild flight across the prairie before pursuing enemies; a flag may mean a bloody battle won a tadpole mark a scalped Indian. The figures are very crude, the drawings no better than those a four-year-old child makes on its slate. But some ingenuity is exercised in the grouping and each sketch is, in a way, a key to the thrilling tales which in time become history.

Bull Head, the last great chief of the Sarcees, died on the reserve last spring. He was acknowledged to be the most cautious and farseeing of the tribe, and always represent them in any dealings with the whites. The Indians are still in fear of him, and think that his spirit haunts the reserve. His record is pictured on the skins. The interpretation is necessarily brief.

Circle and figures in the upper part of the column tell the story of one of the bloodiest and most disastrous battles in Sarcee history, when the Sarcees were ambushed by the Crees and lost over fifty warriors. Looking closely one may discern a Cree who has been shot by Bull Head; Bull Head's squaw crawled out and carried him in and the chief scalped him. This battle occurred at the Vermilion Creek, near Battle River, in 1866.

Another group illustrates a subsequent battle with the Crees, when Bull Head pulled a Cree warrior off his horse and scalped him. Two horizontal figures near the solitary horse in the second group depict this thrilling deed. The speech of tents below stands for the scene of another battle with the Crees. Bull Head and his followers are in desperate retreat — Bull Head's squaw falls from her horse; the chief stops and helps her onto his own horse.

To the left and a little below the circle which represents a barricade, Bull Head is seen shaking hands with a Cree whose life he saved; Cree and Sarcee were friends in peace but foes in war. Immediately after this demonstration the Cree returned to his barricade and the Sarcee chief to his tribe to resume the fight. Bull Head's record, which follows, shows four men killed and scalped, five tomahawks, two spears, five bows and two war clubs captured.

All the thrilling elaborations of these details are told to the children of the subdued redskins even now as they assemble around their campfires within sight of automobiles passing from Calgary along the new government road through the reserve.

FARMER NALLEY HAS CURE FOR TONSORIALITIS.

Nalley came to town for the livestock show and dropped in on Charles Berryman, a barber, for a shave, a shave is 5 cents in Clarence, Iowa, but Nalley was in a spending mood, so he placed a dime on the counter and climbed into the chair. When he came out from under Berryman's spell, he was handed the following bill:

Head massage... \$.25
Hair cut... \$.15
Shave... \$.15
Shampoo... \$.75
Hair singe... \$.25
Head massage... \$.35
Face massage... \$.35
Shoes shined... \$.10
Hair tonic... \$ 1.00

Nalley paid the \$3.20, went out and got a policeman and Berryman was fined \$10 in the Municipal court.

Woman's views on woman's worth take on varied and far-reaching turns. Most men have a sense of satisfaction in being able to attract the notice of big persons.

Women generally regard their women associates with a feeling akin to suspicion.

SINGULAR COINCIDENCES

The "Delhi" Is Wrecked Just When Delhi Is Being Made the Capital and Other Amazing Combinations.

Another of the remarkable coincidences of history has taken place in the concurrence of the holding of the Durbar in India at Delhi simultaneously with the wreck of the P. and O. liner Delhi near Tangier, on the coast of Morocco, at which the Princess Royal and her husband, the Duke of Fife, had such a narrow escape from drowning. At the moment the Delhi became a wreck the other Delhi was being created the capital of India.

"What's in a Name?"

Shakespeare has reminded us that there are more things in heaven and earth than are dreamt of in our philosophy, and it may be that the name given a man, city, or ship at birth may have some occult influence upon their future careers. On the day Lord Salisbury died a vessel called the Lord Salisbury was posted as missing at Lloyd's. The Czar's son, the Czarevitch, was born within forty-eight hours of the time when the Russian battleship the Czarevitch had her disastrous battle with Admiral Togo's fleet off Japan, and she was the only battleship heavily engaged. On the very day that the present Queen of Spain was married — King Edward's niece — a filly belonging to King Edward, bearing the same name, Victoria, won him his first race of the year.

The death of the King's aunt, the Princess Alice, happened within a few weeks of the dreadful accident to the vessel Princess Alice in the Thames.

It may be argued that multitude of well-known people have died or been brought into prominence by some great occurrence without anything happening to their namesakes, but, on the other hand, the same coincidences may have happened without their being publicly known. And it may be said that pure chance explains the most extraordinary similarities — the police-courts give us numerous instances. But what of the cases where the similarity is twofold or threefold?

Fact Beats Fiction.

Most people remember the Hickman poisoning case. A lady doctor called Sophia Hickman disappeared eight years ago from a hospital, and was found poisoned in a wood some days later. The "Law Journal" found that thirty-seven years before a lady had vanished in a very similar way and was never seen again. This lady's name was also Sophia Hickman!

No wonder the superstitious gambler rushes to back the number or name which is in some way forced on his notice. The racecourse has supplied us with various curious coincidences. A horse called Togo beat Pig Gun almost at the hour that outside Port Arthur, and another called Stolen Jewel won a race at Hurst Park within twenty-four hours of one of the most sensational jewel robberies of recent years. When Mr. Chaplin, the British ex-Minister, lost his seat in the House, the same day a horse named Chaplin lost a race.

Staging It.

A leading theatrical manager told a dramatic critic stories as he strolled in the bright, cold weather down the Strand.

"There was one chap," said he, "I couldn't get rid of. Dear me, he was persistent. I refused his farce seven times and he still kept turning up with it, re-written here and there."

"The eighth time he came I told him firmly it was no use."

"But, sir," he said, "is there no possible way you could put my farce on the stage?"

"Well," said I, "there's one way, but I don't know if you'd submit."

"Oh, I'd submit!" he cried. "I'd submit to anything!"

"Then," said I, "we'll grind it up and use it as a snow-storm."

Amazing Combinations.

Take the Humbert case. The Paris "Figaro," during the Humbert trial, discovered a play in which the principal character was a Therese Humbert (the same Christian name and surname as the distinguished embezzler); the plot revealed the palace of the ruined proprietress, which was sold up; there were shown piles of "dossiers," and a wealthy nobleman is introduced into the house very much like Mme Humbert's "Mr. Crawford." Yet this play was produced in public thirty years before the Humbert fraud was perpetrated!

Quite as remarkable was a play submitted to a well-known London theatrical manager eight months before the Goudle bank fraud. It forestalled the actual events of that celebrated case in no fewer than four particulars: (1) the robbing of a bank for the sake of gambling debts, (2) a pugilist named Burge, (3) a character named Marks, and (4) a jockey named Kely. How many millions or trillions of odds against such a combination?

SPEAK UP AND SHUT UP

Grenville Kleiser says to public speakers: "stand up, so that you will be seen; speak up, so that you will be heard; shut up, so that you will be liked." For this last injunction Mr. Kleiser shall be numbered among the gods.

"If non-Christian races do not respond to the official efforts of missionary organizations the cause is to be sought, not in the superiority of other religions to Christianity, but in the inferiority of the adventurers, the colonists and the officials of Christian European powers, who have, for generations, exploited the weaker races of mankind."

Yeast: "He's great a fortune, you know, on irrigation."

Etiowiller: "Is that so? Let's or throat?"

IN THE SCIENTIFIC WORLD

MORE THAN FRUIT AND WINE

Contrary to Popular Belief, Portugal Is one of the World's Highly Mineralised Countries.

In the popular mind Portugal is generally associated with wine and fruit as its only industries and products, yet there are several important mining concerns which add materially to the wealth of the country. For its size it is one of the most highly mineralised countries in the world; but while in the time of the Romans it was the scene of much mining and metallurgical activity, in these days its resources are not developed to the extent that they should be.

The great belt of copper-bearing iron pyrites which springs from the Sierra Morena in Spain passes through Algarve and Estremadura in Portugal, and is lost in the sea near Lisbon. All through its course it is associated with manganese. These are the only minerals south of the Tagus. The Spanish end of the belt is much wider than the part which passes into Portugal, and is worked by many large companies, the most important being the Rio Tinto and the Tharsis mines. The former is the largest mine of any kind in the world. On the Portuguese side the largest mine is the San Domingos, in the extreme south; farther north the Aljustrel mines, and nearer Lisbon the Mina da Covelra. Besides these there are several others of less importance. This is the copper district of the country.

In one of the Portuguese mines where the gossan attains a thickness of one hundred and thirty feet it is treated with marked success for the small quantity of gold and silver which it contains.

It is a noteworthy fact that no mine of any importance in either Spain or Portugal has been discovered that has not been worked by the Romans during their occupation of these countries. Wherever mineral outcrops appear the Roman workings are to be found, and in many cases heaps of slag amounting to many thousands of tons.

The Cry of the "Devil-Bird."

Of all the awe-inspiring sounds emitted by wild creatures none is to be compared to that of the "devil-bird" of Ceylon, whose cry has been likened to the scream of a human being undergoing the most frightful torture. Naturalists have identified this bird with the brown wood-owl found in Hindustan. The "devil-bird," or ulama, as the Cingalese call it, is an elusive creature. The natives of Ceylon regard the cry of this bird with superstitious horror, for, it is claimed, its scream heard at night presages the most dire misfortunes. An official of the Ceylon civil service has given some study to this curious bird. Its ordinary note, he states, is a magnificent clear shout like that of a human being, heard at a great distance, and producing a fine effect in the silence of the night. But the sounds that have earned for the bird its bad name, and which this officer reports he heard to perfection but once, are said to be well-nigh indescribable, the most appalling that can be imagined, and scarcely to be heard without a shudder. It has been compared to the cries of a boy in torture, whose screams are being stopped by strangulation.

Stronger than Dynamite

The recent death of the inventor of the Japanese explosive, shimoso powder, which played such an important part in the Russian war, adds interest to the announcement made by B. F. B. Wright, a former professor of chemistry at Harvard, that he has discovered a new explosive that is almost safe to handle and three times as powerful as dynamite. Of course the ingredients are being kept a secret. It is said that the new explosive will not damage anything unless fired in an airtight chamber. A bag of it has been dropped from a six-story window of the sidewalk, grains of it have been pounded on an anvil, and a rapid-fire gun has been shot into a mass of it, all with no explosion following. Mr. Wright claims that it will stand 275 degrees of heat without igniting and so the danger of spontaneous combustion is obviated. It will not freeze, and it can be used 15 minutes after being compounded. Dynamite must be stored 90 days before it can be used.

Why Your Fingers Crack.

Dr. Howard Marsh tells in a recent paper that the "snap," which is often both felt and heard when a joint that has long been stiff or at rest is suddenly moved, is a phenomenon to which bonesetters point as a plain demonstration that a bone was out and has been put in. These snaps, however, are not produced by the concussion of two joint surfaces as they come suddenly into contact but, on the contrary, are due to the sudden separation of two surfaces which have been stuck together by a too viscid and tenacious synovial fluid (the synovial fluid is of the consistency of white of egg, and is Nature's lubricator of our joints, in the cavities of which it is present). Many persons can make all their fingers crack by steadily pulling at them till the joint surfaces suddenly separate.

The Ivory Supply.

In view of the rapid disappearance of the herds of elephants which formerly roamed in Africa, and the limited number of those animals remaining in Asia, attention has been called to the enormous supply of ivory which exists in the frozen tundras of Siberia, and which, it is thought, will probably suffice for the world's consumption for many years to come. This ivory consists of the tusks of the extinct species of elephant called mammoths. The tusks of these animals were of great size, and are wonderfully abundant at some places in Siberia.

Renting for \$16.50 per month. Price \$2,800, good terms.145ft. by 207ft. on Bernard Avenue
Price \$1,850. One-third cash, 1 and 2 years on balance.80 Acres, about 4½ miles from town,
with Buildings. Best of water records "free at that."

The Price is \$250 per acre.

Here is an opportunity for the buyer to double his money within two years.
Good terms.

For further particulars apply to above

Will you be one of the 108 farmers who will receive our Prize Contest checks?

THERE will be twelve cash prizes in each of the nine provinces (108 in all) in the 1912 Prize Contest for Canadian Farmers. The 1911 Contest was so successful in awakening interest in the use of Concrete on the farm, that a second contest, in which three times as many prizes are offered, was decided upon for this year.

The Contest this year is divided into three classes, "A," "B" and "C," and there will be four prizes in each class. (First prize, \$50; Second prize, \$25; Third prize, \$15; Fourth prize, \$10.)

Thus there are three \$50 Prizes, three \$25 Prizes, three \$15 prizes, and three \$10 Prizes, for each province.

DESCRIPTION OF CLASSES

In Each Class there will be First, Second, Third and Fourth Prizes (\$50, \$25, \$15, and \$10) for Each Province.

CLASS "A"—Prizes to be awarded to the four farmers in each province who use most "Canada" Cement on their farms in the year 1912.

CLASS "B"—Prizes to be awarded to the four farmers in each province who send photographs of the best concrete work done with "Canada" Cement on their farms in 1912.

CLASS "C"—Prizes to be awarded to the four farmers in each province who send in the best description, telling how any piece of concrete work was done with "Canada" Cement. (Entries for this prize must be accompanied by photographs of the work.)

Don't think that you must use a large quantity of cement in order to win a prize. The quantity of cement used does not count in Classes "B" and "C." Many of last year's prize winners used very little cement.

When you enter the Contest, you have a chance to win a cash prize of \$50 as well as the certainty that you will add a permanent improvement to your farm. If you haven't a copy, be sure and ask for our book, "What the Farmer Can Do With Concrete." It will not only suggest many improvements that you can use in entering the Contest, but will tell you all about the use of concrete on the farm.

Just write your name and address on the attached coupon, or use a postal card, and we will send full particulars of the Prize Contest and a copy of "What the Farmer Can Do With Concrete" to you absolutely free.

Money - Making Opportunities

WILL YOU READ THIS?

Money-making opportunities have come and gone and you have failed to take advantage of them. Opportunity is again knocking at your door and will show you how you can make money in one of the fastest-growing cities in Canada if you will read every line of this advt. and act accordingly.

You can work until the other place freezes over and you will never have anything to show for it but a bent back and a broken spirit unless you invest your savings now. Real Estate in a growing city is the best investment on earth.

Look about you and see who owns the large buildings, the fine houses, and enjoy the luxuries of life. It is the men who invested their savings in good property when it was cheap and resold at good profits. Money will not grow in your pocket. Most of the men who are rich today were not born rich, and most of the world's wealth has been made in the increase in value of real estate, for real estate is the basis of all wealth.

You can do the same to-day, and you are offered lots in Marri-day Park, Moose Jaw, less than two miles from the post office and close to street cars for \$150 on terms as low as \$15 cash and \$10 per month. You can pay that and you will undoubtedly make from 100 to 200 per cent. on your money in a year. Don't delay. Get busy while you can get the lots at this price.

Cut this out and mail

JAY W. NELSON,
Lakeview Hotel,
Kelowna, B.C.

Kindly send me information regard-
ing Marri-day Park, Moose Jaw.

NAME.....
ADDRESS.....

DO YOU KNOW?

1. That Moose Jaw is the distributing point of Saskatchewan, the grain-growing Province of Canada and enjoys facilities which are unexcelled?

2. That Moose Jaw is the Grand Divisional Point of the Canadian Pacific Railway between Winnipeg and Calgary?

3. That Moosejaw is the railroad centre of the Province?

4. That Moose Jaw is the largest industrial and manufacturing centre of Saskatchewan and is the site of the largest wholesalers?

5. That Moose Jaw real estate values are not inflated?

6. That Moose Jaw will be one of the largest cities in western Canada?

7. That Moose Jaw owns its street-car system, electric light and water plants?

8. That Moose Jaw has the lowest tax rate of any city in Canada—12½ mills?

9. That Moose Jaw brick yards turn out 250,000 bricks per day?

10. That Moose Jaw has the largest flour mills in Canada?

11. That Moose Jaw building permits show an increase of 131 per cent., which is largest in Canada for 1911, and that

12. Moose Jaw has been chosen as the location for some of the largest industries and distributing houses in western Canada, and will within six months have a payroll of \$1,000,000 per month?

Think what that means and then act.

Trade, R. G. Dun & Co., or any
bank in Calgary.

Athletics

The Kelowna corner of the world of sport has showed some undulation lately. Truly the road to victory never was greased, and the color of victories gained by Kelowna's three league teams has lately been thrown into a deep shadow by defeats or battles hardly won.

The lacrosse boys left home last week in a very hilarious spirit, but returned from Vernon defeated by 8 goals to 6, which team they had beaten but a fortnight previous by 10 goals to 3; whilst the baseball team took a longer trip the same day and met with a reverse at Armstrong, whom they beat at home in the first game of the season by 9-3.

This, of course, has considerably handicapped Kelowna on the league tables, but there is yet plenty of room for an optimistic turn of mind. It is a recognized fact that the chances of a win are doubled if a team is playing at home, and we note with satisfaction that recent defeats have been by very narrow margins and met with in away games.

To-day's lacrosse match against Armstrong will considerably aid and strengthen Kelowna if they capture the two points, besides placing them in the envied position. But they will have to go all out to do it. Following is the present position of the teams in the league:

	Played	Won	Lost	For	Ag't	Points
Armstrong	1	1	0	7	6	1
Kelowna	2	1	1	16	11	1
Vernon	2	1	1	3	13	1

The expected has happened and after putting up a good away game yesterday Enderby (the cracks) beat Kelowna 7-6. The gaining of that much-desired one run would have meant everything to the local boys. As it is the Kelowna team will have a long up-hill pull before they are in a strong enough position to jeopardize Enderby. Below can be seen at a glance how they now stand:

	Played	Won	Lost	For	Ag't	Points
Enderby	6	6	0	69	28	6
Kelowna	5	2	3	42	32	2
Vernon	4	1	3	32	40	1
Armstrong	5	1	4	20	64	1

Next fixtures July 1st:

Kelowna v. Vernon, at Kelowna
Enderby v. Armstrong, at Armst'g

The postponed football match between Kelowna and Vernon will probably be placed Saturday. When the teams met before Vernon gained the points easily with a score of 4-0 and are now at the top of the league, but a win for the Kelowna boys will entirely reverse the positions.

	Pl'ed	Won	dr'n	Lost	For	Ag't	Pt's
Vernon	3	2	0	1	9	4	4
Sum'erland	4	2	0	2	8	6	4
Kelowna	4	2	0	2	11	12	4
Penticton	3	1	0	2	5	11	2

After a good deal of controversy a match has been arranged between the old local opponents, the Upper and Lower Town Juniors, who meet this afternoon on Dr. Boyce's field in full battle array. As has always been the case on these occasions both teams are more than confident of success and we shall look with deep interest for the result of the game which without doubt will be a fast one. May the best team win.

A sprained ankle may as a rule be cured in from three to four days by applying Chamberlain's Liniment and observing the directions with each bottle. For sale by all dealers.

Items from Ellison

(From our own correspondent)

Don't forget our picnic to Woods Lake on the 12th July, particulars later.

We learn that Charlie Hereron is to join the staff of the Royal Bank in Kelowna. Success, Charlie.

We are sorry to hear that Miss Lizzie Carney injured her leg by falling off the bridge near her home, we trust she will soon recover from her injuries.

We hear that Mr. T. Orchard has two fine colts he is going to enter in the stud owners competition for the best colt of this year's foaling. Will there be any of Donald's on view? Perhaps Bob will have a sample on exhibition.

Have you seen the new potatoe digger? It was to be seen Sunday morning last in one of our well known rancher's potatoe fields, digging up murphies and converting them into poik, a case of record time pork packing. No doubt John will be open for orders.

"Empress of China" Sold as Junk

The s.s. Empress of China, which until July 26 last, when she went ashore on Shirahama reef when nearing Yokohama, ran across the Pacific from Vancouver and Victoria for the Canadian Pacific Railroad Company from 1891 without missing a trip, is to be scrapped for the metal and other material, having been bought from the underwriters by Sassao Shojiro, a copper and iron dealer of Yokomama, for \$65,500.

Each age of our lives has its joys. Old people should be happy, and they will be if Chamberlain's Tablets are taken to strengthen the digestion and keep the bowels regular. These tablets are mild and gentle in their action, and especially suitable for people of middle age and older. For sale by all dealers.

QUEER BAITS

Red Flannel for Pike and Tinned Salmon for Bass Are the Baits of the Up-to-date Fisherman.

The old description of fishing as "a worm at one end and a fool at the other" is no longer applicable. Man-kind has found out that there are many other delicacies besides the worm which will attract fish, and every year the list of baits grows.

Go up any river on an August day, and watch the bank angler in pursuit of the way crab. He has a regular ladder ready to tempt the fish. Beef-fat, black slugs, crayfish-tails, gentles, small frogs — all these are taken by this sporting, coarse fish. A little earlier in the year the chub will not disdain a ripe cherry, even when the barb of a fine hook is skillfully hidden in its juicy flesh.

Green Peas and Potatoes One of the best baits for the shy and sluggish carp is a par-boiled potato, placed on a small triangle by means of a baiting-hook. Green peas are also appreciated by this fish, and a paste of flour, mixed with honey, will sometimes tempt a lusty ten-pounder.

Boiled wheat, wasp grubs, and cheese all make good carp bait. Wasp grubs are liked by most fish. They are too fragile to place on a hook while fresh. They should be steamed in the comb, and then slightly hardened in a warm oven before use.

Tench have a curious preference for congealed blood. The tench is almost as shy as the carp, and the hook must be so baited that none of it shows.

The roach is the pet quarry of most of the Saturday afternoon fishermen in and around the cities. Roach will take almost any kind of paste, also grubs in endless variety, as well as gentles. One of the oddest baits used for roach is "silk weed," a sort of water plant found growing in many rivers.

"Greaves" is the technical name for the refuse of the fatty materials from which tallow is made. It is a good bait for barbel, bream, and chub.

Pitch is the spinal marrow of the bullock or cow, and must be boiled for about three minutes to prepare it for use. It is cut into pieces about the size of a hazel-nut.

The Sporting Sea Fish The greediest of all our fresh-water fish is the pike, and there is hardly any bait which a pike will not strike at, when hungry. A pike has before now been caught on a piece of red flannel trailed upon a triangle. He will go savagely for any small fish, and one of the very best things for live baiting is a small goldfish, a creature which the pike, of course, has never seen before.

Sea fish have tastes almost as varied as their fresh-water cousins. The favourite sport of the Australian sea angler is fishing for the black bream — a very sporting customer. It is found in almost all inlets on the east and south coasts, and is taken with a small shrimp. But before beginning operations, the fisherman always ground baits the spot with a mixture of cheese and tinned salmon known as "berley."

The most sporting of British sea fish is the bass, a fine, silvery fellow of the perch tribe, which is found all round our coasts, both on rocky and sandy ground.

STORY OF A CLOCK

By H. Thomas

It often falls to the lot of those "who go down to the sea in ships" to pick up some curiosity with an interesting, and sometimes tragic history surrounding it. To Captain James Norris (now deceased) there befell an adventure in which he became the possessor of a very quaint rosewood case clock, and the incidents attaching to its seizure, and its ultimate possession by Captain Norris, form an interesting retrospect of the Indian Mutiny. In the year 1857 Capt. Norris was in command of the China trading ship Waterville, which time our Indian Empire was in the throes of mutiny. The British Government, anxious to render assistance to all possible haste, hurriedly commissioned Capt. Norris and others to convey British troops who were stationed at China to the seat of war, Delhi. Great excitement prevailed amongst the troops, and the British population in China, when the mutiny became known. Capt. Norris had sole control and power given to him by the owner of the Waterville, and the very words, as expressed to him in his introductions, were, "Go where you like and do what you like, so long as you make the job pay." Success attended his commission, as a result of which the clock mentioned came into his possession.

His account of the looting of the Palace of Nana Sahib at Delhi is a vivid impression of the state of affairs existing at that time. The flight of Nana Sahib was signalized by an exciting raid on his palace, which was known to contain rare and priceless treasures. One can conceive of the looters and the avidity and determination displayed to seize anything of value. They set to work in a wild fury, trampling over one another in their efforts to seize the many treasures which met the eyes at every point. Gold and silver ornaments were heaped together in a promiscuous mass; gems of all kinds and sizes were littered about; chests containing treasures representative of the lavish wealth of the East were recklessly smashed.

A Decided Novelty

The problem of pass-out checks was successfully solved, at practically no expense to themselves, by some ingenious entertainers when they decided to mark with a rubber stamp the hands of those of their patrons who wished to leave the show during the intervals. The idea possesses many advantages, including the impossibility of transference.

IN THE WORLD OF SCIENCE

COMICAL WAYS OF CRABS

Peculiarities of the Crab Before Reaching the Tinned Stage Awaken Curiosity of the Naturalists.

The peculiar fascination of crustacea consists largely in the extraordinary variety of bizarre forms which they have assumed under the pressure (so to speak) of their environment — infinite variations on much the same theme of joints and legs. Furnished by nature with a beautifully articulated suit of armour (which they are compelled to discard and reproduce from time to time to allow for growth), evolution has had to play some queer pranks with them to equip them for the very varied situations in life in which we find them — exaggerating or diminishing out of all sense of proportion (according to our ideas of congruity) a limb here, a joint or series of joints there; tucking one part of the body under another; flattening into a plate in one case, drawing out into a mere thread in another; and thus and in other ways giving rise to the quaintest series of forms to be met with in the animal kingdom. Then their curiously intelligent habits are no less fascinating to watch — their habit, for instance, of carefully testing their environment with their feelers; their alternately retiring and pugnacious disposition; their immitable gait and comical ways of walking off sideways and of "backing." All these features combine to awaken our curiosity and strike our sense of humour. Added to this lack of dull monotony in the group is the additional advantage to the student that crustacea, where they occur (and they occur practically everywhere), are comparatively easy to capture and to keep in activity. They do not require shooting or a laborious hauling of nets, or even digging up to any extent. A dipping or a towing net or a simple trap is generally all that is necessary to ensnare them. No wonder, therefore, that the crustacea are a favourite group with naturalists, both professional and amateur.

A LIGHTNING PHENOMENON

Reports of the occurrence of globular or ball lightning during recent severe thunderstorms in Europe have again drawn attention to this rare and singular electrical manifestation. Half a century ago the reality of this phenomenon was much doubted, but the gradual accumulation of trustworthy evidence has now thoroughly demonstrated its actual existence. The records agree in describing the appearance as that of a luminous ball, generally of a bluish colour, and varying in diameter from a few inches to as much as three feet. The sphere has a sluggish motion, either falling slowly from the clouds or drifting over the surface of the ground, the movement always being such as to give the impression that the thunderbolt is of material heavier than air. It remains visible for several seconds or even minutes, and as a rule finally explodes with great violence. The disappearance is generally followed by a strong smell of ozone in the locality. During the period of visibility the ball often behaves in an extremely peculiar manner. Sometimes it seems propelled along horizontally by a feeble air current or by electric forces. Frequently it has been seen to follow the course of a conductor, such as a water main, and it almost always explodes on coming into contact with a sheet of water such as a pond or stream. The immense store of energy which the ball undoubtedly contains is evidently not held in the shape of a surface electric charge, as it is not destroyed by contact with ordinary conductors. Thus the ball may touch earth, pass down a chimney, traverse a room, and so on, without being dissipated, although it has thus had abundant opportunity of giving up its surface charge of electricity. It is indeed this very tenacity of existence which has in the past caused certain physicists to be rather sceptical of the phenomenon, while so far at least all attempts to produce analogous appearances experimentally have been entirely unsuccessful.

Stinging Trees

In the southern part of Formosa grows a tree, about 10ft. in height, having long leaves which possess the property of the nettle, and produce a maddening irritation of the skin when incautiously touched. The natives call it chiao-len-kou, meaning "man-biting-dog." Mr. Tokutaro Ito, of Tokio, who has recently made a botanical exploration in Formosa, suggests the name "viper tree" as a more distinctly warning title. There is another species of "stinging tree" in Australia, which attains a height of 15 feet, and the effect of whose touch appears to be even more maddening to men and animals. Horses stung by it have to be shot, and dogs, when affected by the poison of the leaves, run about whining and biting themselves.

Spiders' Threads in Astronomy.

The cultivation for scientific uses of certain species of spiders, solely for the fine threads they weave, has an important bearing upon astronomy. No substitute for the spider's thread has yet been found for bisecting the screw of the micrometer used for determining the remarkable fineness of the threads are they valuable but because of their durable qualities. The threads of certain spiders raised for astronomical purposes withstand changes in temperature, so that often in measuring sun spots they are uninjured when the heat is so great that the lenses of the micrometer eyepieces are cracked. These spider lines are only one fifth to one-seventh of a thousandth of an inch in diameter, compared with which the threads of the silkworm are large and clumsy.
