LIBRARY, LEGISLATIVE ... JUL 19 ... VICTORIA, B. C.

Meeting of City Council

Discuss Power House Plant and Friday's Holiday

The council met Monday morning, the Mayor and Ald. Blackwood Raymer, Sutherland and Copeland being present.

A letter was read from the Robb Engineering Co., asking for information respecting the new boiler which the council had proposed to install.

The subject thus introduced, Ald. Sutherland as chairman of the committee in charge stated that the latter had decided not to put in a new boiler this year. There were several reasons for this decision; in the first place, the power house was at the present time consuming all the sawdust turned out from the mill, and the committee had had to give an order for 2,000 cords of slabs. Fuel was getting scarce and expensive, and the next council would probably have to consider installing oil engines.

Mayor Jones said the engineer claimed that the new boiler was essential, that they could not get along without it.

Ald. Sutherland said the present boiler capacity was 200 h.p. This was ample for all needs, except once a month when the boilers had to be cleaned of scale, etc. This involved the shutting down of one leaving the other hardily sufficient for heavy loads. If they kept on adding to the steam plant, however, they would have to find means of procuring more fuel. A new boiler would cost about $3,000 and if Diessel engines were put in next year, it would be useless. If they could possibly run through the winter without it he thought it advisable to do so.

Mayor Jones agreed that if the plant was to be enlarged, it was necessary to get the latest and best machinery. In nearly every place where new plants were being installed, the Diessel engine was adopted.

Ald. Sutherland mentioned that Vernon was experiencing the same difficulty with regard to fuel. They had found it difficult to get wood even at high prices, and had tried coal but had found it too expensive. Their council had finally decided to convert the present boilers into oil-burners until such time as the Diessel engines could be installed.

A question was asked as to what advantage the Diessel engines had over other types.

Ald. Sutherland answered that it was an internal combustion engine and much more economical than steam, its working efficiency as compared with the latter being as 44 to 12.

A letter was read from the city assessor, asking the city to have assessment notices printed. The Mayor mentioned that in speaking with the assessor he had understood that the latter hoped to have the assessment completed and ready to submit at the next meeing. The assessment on land, he might say, was about $2,750,000, the assessment of improvements was not yet complete.

The following resolution was passed: "That the assessment roll be returned on July 22nd and that the Court of Revision be held on August 22nd.

A petition signed by most of the business men in town was address to the council, asking them to declare Friday afternoon a public holiday instead of Thursday afternoon.

The request did not meet with much favor with the council. Ald. Sutherland said he did not see the object in having the stores closed on Friday afternoon. Personally he would like to keep his own open, and he was surprised that the other merchants did not see it in the same light. Here in Kelowna we had some of the best stores in the valley, and there was a prospect of considerable business with so many visitors in town. In fact he believed that many people from the smaller places actually took in these excursions for the purpose of shopping at the larger stores.

Ald. Copeland said the request had arisen from the clerks, many of whom were members of the Orange Order and anxious to take part.

Mayor Jones said some of the business men had objected to changing the holiday but had been disposed to agree owing to the clerks.

Ald. Copeland said he did not think there were so many members amongst the retail clerks but what they could be allowed off without closing the stores. He thought if the merchants had decorated their stores, it might have looked better to keep them open. There was also the difficulty of providing meals for all the visitors. If the stores were open they would be sure of getting something.

Ald. Raymer said visitors would get a much better impression of the town if the stores were open.

Ald. Sutherland pointed out that the council could not give the holiday any legal standing. They could just say it was a holiday, but it would rest with the people themselves to observe it.

It was finally decided to leave the matter in the hands of the mayor who would confer with the executive of the Retail Merchants Association.

Ald. Copeland stated that the Orange Lodge also desired permission to erect arches on the streets. This permission was granted. Some mention was also made of applications for booth privileges.

A resolution was passed authorizing the Water & Light Committee to order another car of wood pipe for water extensions.

Mr. J. B. Whitehead, proprietor of the Pool Room, waited on the council respecting his trade license of $60 per year, at the rate of $6 per table. The license which was six times greater than any other store in town, he considered grossly unfair. He said there was a popular idea that he was making a mint of money from the billiard and pool tables, but this was quite erroneous. The return from billiards was only half the return from tobacco, soft drinks, etc., and when one considered the amount of floor space occupied by the tables and the fact that four fifths of the light was consumed in that branch of the business, there was nothing to justify such an extraordinary licence as $60 per year. He did not know why a billiard room should be singled out in such a way. Probably the idea arose when the west was more wild and wooly than now and when billiards and pool were only a side issue to poker and other such games. He was conducting his place in a manner which was above reproach, and he did not think the council could find any fault with it. He asked the council to give fair consideration to the matter, as his gross turnover was much smaller than many other stores who only paid $10 per year.

The mayor assured Mr. Whitehead that the matter would be taken up in committee.

Dr. Dickson, local secretary in charge of the coming Irrigation Convention attended to report progress of arrangements. He said he had been actively pursuing the policy of getting all the publicity for for Kelowna which could be got out of the Convention, and had been supplying news items and paragraphs to Mr. Rankine for publication in "Western Canada," and also to the principal journals which latter were making large use of them. "Western Canada" was also reproducing photographs of the district, the Board of Trade having offered to pay for the cuts.

He had also been in communication with Mr. Rankin on the matter of housing delegates, and had been urged to proceed with arrangements at once. So far he had arranged to billet in private houses some 30 or 35 of the delegates. The suggestion had been made to him that cots might be placed in the school house, and he would like the council's opinion on the idea. The hotels could promise nothing as they were already full up.

Mayor Jones said he had had some experience in billeting delegates and thought there could be no difficulty in arranging for the accomodation of 150 to 200 people.

Dr. Dickson reminded the council that they, along with the other bodies like the A. & T. Association, the Farmers' Institute etc., had power to appoint delegates, and advised that this be done early so as to avoid appointing the same delegate twice. He was also arranging for a meeting of all interested in order to get such matters settled and also to decide upon any resolutions to be submitted to the convention.

Mr. Geo. C. Rose addressed the council on behalf of the Aquatic Association. The council, he said had always been in the habit of giving a grant toward the annual regatta. This year he would like to ask the council to increase the grant if possible. Owing to the fact that the Kelowna band was dead, they were faced with the necessity of incurring heavy expense in hiring a special boat to fetch down the Vernon band for the two days. This would mean considerably more outlay for music than previous years. The committee would have been only too glad if there had been a local band but as there was not they had no other course.

A resolution was proposed that the grant this year be $100, an increase of $25 over last year.

Ald. Sutherland, however suggested that this increase might be too small to make much difference and the amount was further increased to $150. This was agreed to.

A plan of subdivision of Block 41, Map 462 was approved.

Mr. C. G. Clement, it was mentioned had requested the council to ascertain what amount of repairing was necessary to the cement sidewalks constructed last year as he was anxious to get the balance due him on that account. It was arranged that the council go over the sidewalks Wednesday.

Mayor Jones said that people had been asking what was going to be done about cement sidewalks this year. He had explained that the council were holding off issuing debentures for the purpose owing to the bad state of the money market. He was afraid, however that something would have to be done, as many of the old plank sidewalks were getting very bad.

Ald. Sutherland pointed out that Local Improvement debentures did not sell even so well as other issues and they would have to take a low price for them. If the people, however were willing to pay the extra the council did not object to going ahead.

Ald. Raymer asked if the council would have any objection to private individuals say like himself putting in concrete sidewalks in front of their own places.

Mayor Jones said he did not think there could be any objection providing the usual city regulations as street levels, etc., were complied with. It would be well he added for the council to go into the question of putting in cement sidewalks this year.

Ald. Copeland made mention of the hay in the park, which was sold last year for $20. He said there was a large amount of good hay and it might be as well to invite applications for it.

Mayor Jones said the city engineer, Mr. Mitchell, was returning the following day from the coast and would probably be able to submit plans of the sewage works at the next council meeting.

Ald. Raymer was appointed acting mayor in place of Mayor Jones who announced that he would be absent at the coast for the next week or so.

Mr. N. D. McTavish has his brother staying with him for a short time.

The Rev. C. B. and Mrs. Glass are staying in Kelowna on a visit to old friends.

Mr. A. W. K. Mitchell, the city engineer, returned Tuesday from the coast accompanied by his mother who will stay in Kelowna for a short time.

By an oversight Messrs. A. W. Barber & Co.'s ad. offering sugar at the special price of $1.50 per 20lb. bag until the end of June was continued one week in July. During the week purchasers of sugar were charged the regular price of $1.75, and Mr. Barber, fearing that people might accuse him with not living up to his advertisement, has offered to refund 25c. to all who paid $1.75 cash for a bag of sugar during last week.

Overseas Club Meeting

Mr. Evelyn Wrench, founder and organizer of the Overseas club, a rapidly-growing patriotic organization with branches in all parts of the world, paid Kelowna a visit last Thursday evening and addressed a meeting in Raymer's Hall. There was an attendance when the meeting commenced of about thirty but this was swelled later to some seventy people. Mr. Lionel Taylor was elected to preside and briefly introduced Mr. Wrench's sister as the first speaker. Miss Wrench is accompanying her brother on his tour of the different branches of the club, and gave an eloquent address on the part which women could and should play in the development of a loftier national spirit, and higher ideals of citizenship and imperial unity.

Mr. Wrench sketched the history of the club from its formation and in a series of incidents culled from his own experiences in the course of his organizing travels indicated the great progress which had been made. The club had its inception in a remark of the late Cecil Rhodes of South African fame, who foreshadowed an organization which would have for its object the promotion of a better understanding between the widely-placed units of the British Empire.

The objects of the club were briefly: to help one another to insist upon the vital necessity to the Empire of British supremacy on the sea; to urge on every able-bodied man the necessity of being able to bear arms; to draw together in the bond of comradeship the peoples now living under the folds of the British flag.

In the course of his remarks Mr. Wrench said he was not in Kelowna at present to organize a branch. He recognized that the time of the year was not favorable to such a plan, but he hoped in the near future to see a large and enthusiastic membership here. The work of the club, he said, need not be confined solely to the social side of life.

Mayor Jones and the Rev. Thos. Greene also spoke complimenting Miss Wrench and her brother for their eloquent addresses.

Second Wrestling Match Next Thursday

The second wrestling match between chief constable "Bob" Sutherland and Pat Connolly which is being organized by the Fire Brigade boys has been fixed for next Thursday, July 18th, and there is no doubt that local interest will be roused to a high pitch. Both men are training carefully for the event which is likely to prove a pretty close thing.

Some difficulty was experienced by Connolly at first in securing a place in which to train, and it seemed as though hard feeling would be aroused amongst his supporters owing to a rumor that he was being hindered in his training. The rumor appears to have arisen from the fact that the Aquatic Association had refused to allow him to use their pavilion for the purpose. Upon investigation it seems that some of the members of the Aquatic Association who use the pavilion during the day had raised an objection to the room being used for such a purpose. Sutherland having trained there for the last match. For this reason permission was refused either to Sutherland or Connolly after the first match was over..

The prices of admission to the second match have been lowered considerably and there will no doubt be a full house.

There is a well-defined rumor abroad this week that the C.N.R. station site has been fixed not where originally intended, on the corner opposite the exhibition ground, but on the Clement subdivision between St. Paul and Richter streets. The location of the track has also been moved further south about a block. It is expected that confirmation of this will be forthcoming in the next few days.

People were aroused from their beds Sunday night last by the screech of the fire whistle, and many hurried down town expecting a conflagration. They did not see it however. The alarm had been turned in by some person who had noticed volumes of smoke coming out of the motor garage on main street. The smoke, however was caused in the process of running coal-oil through a motor for the purpose of cleaning it.

Rutland News

From our own correspondent

The "spud" growers of the bench lands are busy digging their produce. The yield, size and price are all very moderate this year. Several carloads are being shipped this week.

The Methodist Sunday-school picnic was held at Scotty Creek on Thursday last. It was not very largely attended, especially by the children. These outings should be for the amusement and entertainment of the scholars, but few things of that nature were carried out. The school officials were also ill-advised as to the date; that fact alone debarred several from attending.

Indian Chief Deposed

An order-in-council has been passed deposing a monarch. It does not often happen that a government is called upon to unseat such a personage, but it has been done in this instance and one Baptist Logan becomes a common man.

The, owner of this appellation was the chief of the Okanagan Lake band of indians. Chief Logan became addicted to the intemperate use of the white man's fire water. Under the Indian Act an Indian chief can be deposed for intemperance, incompetence or immorality.

This power is rarely exercised, but Chief Logan imbibed so freely that it has been necessary to depose him for three years, during which interval he may perhaps mount the water wagon. The tribe will elect a temporary chief.

Orangemen Parade to Baptist Church

Acting on their usual custom, that of having a church parade the Sunday prior to the 12th July, the local Lodge of Orangemen paraded to the Baptist church Sunday evening last from the Lodge room in Raymer's Hall.

The procession numbered about forty, and together with the usual congregation completely filled the church. Suitable hymns were sung and after the choir had rendered "O, Worship the King," the Rev. D. J. Welsh, in an exhortive address said in brief: That the great Order there represented stood for good citizenship, which could only be attained through first, fear of God, and second, the honoring of the king, as stated in 1 Peter, ii. 17. Signs of love, instilled in human nature through fear of God, were displayed on every hand, and the community as a whole would prosper and the fallen be uplifted just so much as people were prepared to recognize God as head.

Honoring the king did not simply mean the acknowledging of a great and good personality, but the recognizing of all his position as ruler of civics and social power stood for. Good government and fair laws were determined by the people themselves, and the permeating of the province and empire with an uplifting influence could only be done when men were willing to drop class distinction and recognize one another as brothers.

A collection was taken up on behalf of the hospital.

Mr. H. J. S. Reynolds, of the Bank of Montreal, has been moved to Vancouver, leaving Sunday last for the coast. Mr. Reynolds will be much missed by many friends in the city, more especially by the Dramatic Society of which he was a most energetic secretary. He was secretary, too, of the Kelowna Football Club and a scout master for the local boy scouts.

A wedding which will be much interest in Kelowna took place in Glasgow, Scotland, on June 20th, when Mr. W. A. Shanks, formerly of Kelowna, was married to Miss Margaret MacDonald.

Birth

FOSTER.—On Monday, July 8th, to the wife of D. C. Foster, a son.

Stumpage Returns to Break Records

The activity in lumbering this season and the excellent returns entered for royalties to the crown has raised the hope of the timber office officials that the total revenue from stumpage this year will touch the $500,000 mark. This was the figure set in Hon. Price Ellison's budget speech in the last Legislature last March. At the time it looked much too sanguine an estimate to the officials, but the returns so far have raised hopes that the figure will be touched or exceeded.

The total returns in the Vancouver office for the month of June were $34,081, an increase of $1,450 over the corresponding month of last year. June is not regarded as a heavy month for logging returns, and the increase in the remaining months of the year, when the returns become much heavier, is expected to constitute a record in timber royalties for the province.

Report on British Columbia Mining

The annual report of the minister of mines for British Columbia for the year 1911 has been issued. It shows the mineral production for that year to have been of a total value of $23,499,072, as compared with $26,377,066 in 1610. The report intimates that the decrease in total value was due to the shutting down of coal mines of East Kootenay for eight months owing to labor dirputes, otherwise there would have be an increase to record.

A summary of the figures showing the number of men employed in several classes of mines follows:

There were eighty mines that shipped ore in 1911 (45 of them more than 100 tons each, but only 33 more than 1,000 tons each), and there were employed in these a total of 3,241 men—1,008 above and 2,233 below the ground. The non-shipping mines numbered 67, of which 46 were idle and 21 working; in the latter 353 men employed—151 above and 202 below. The total number employed at metalliferous mines was 3, 94 men.

The total quantity of ore mined in 1911 was 1,770,755 tons, which compares unfavorably with a total of 2,216,428 tons in 1910; the cause of the decrease being due to the Crows Nest coal miners' strike.

The gross output of coal mined ih 1911 (that is including coal made into coke), was 2,297,718 tons (of 2,240 pounds) as against 3,139,235 tons in 1911, and 2,800,046 tons in 1910.

Of the total of $426,000 of placer gold, $225,000 is from Atlin division and $170,000 from Cariboo and Quesnel divisions of Cariboo district.

Publications of Department of Agriculture

For a number of years there has been a constant flow of valuable information on agriculture in its several lines going out from the Department of Agriculture at Ottawa in the forms of annual reports. special reports, bulletins and circulars. Hundreds of publications have been issued, considerably exceeding a million copies a year, and the stream is constantly enlarging. Until recently each of the several main branches of the Department sent out their own publications. An advance step has lately been taken in the organization of the publications branch which is charged with the sending out from one office of all the publications as issued.

As a guide to the agricultural public as to what publications may be procured a full list indicating the subjects treated has been issued in pamphlet form to be sent out to those who apply for it.

The Canadian Northern construction department had no less than 5,400 men employed on the last day of June, and there are over 6,000 men on the work at this date, with the probability that this number will be largely increased by the end of the month.

Will Celebrate the "Glorious Twelfth" in Royal Style

Local Orangemen Plan Big Day for Tomorrow

Kelowna in general and the members of the Loyal Order of Orangemen in particular will spread themselves in great shape to-morrow—the "Glorious Twelfth" the celebration of which here is to be joined in by delegates from all the towns in the valley. Special excursions are being run both up and down the lake, the "Okanagan" taking the trip from the south in the morning at the usual time and the "Aberdeen" arriving with the Enderby, Armstrong and Vernon contingent about noon. It is expected that altogether there will be about 1000 visitors in Kelowna tomorrow—quite a large number to take care of and feed. Ample arrangements however are being made for the latter. The Baptist church people are erecting a booth on Josselyn's vacant lot, and the Orange lodge themselves will run a refreshment booth in the park.

Extensive preparations are being made to welcome the visitors in fitting style. Three triumphal arches, decorated with green foliage, flowers and flags are already erected, one near the Bank of Montreal, one at the wharf and the other on Abbott Street. The merchants are all decorating their store windows. The stores, however, will be closed, the half holiday being transferred to Friday for the occasion.

Music will be provided by the Vernon and Armstrong bands and a drum and fife band raised locallv.

On the arrival of the "Aberdeen" at noon a procession will be formed which will proceed along the main streets, returning afterwards to the park where the speechmaking will take place. The address of welcome on behalf of the city will be delivered by Ald. Sutherland.

At 3.30 there is to be a lacrosse match—Vernon versus Kelowna in Boyce's field—and at 5 o'clock a football match in the park. Given favorable weather the day should be a memorable one in the history of the local Orange Lodge.

Over two tons of cherries were shipped out by express Wednesday morning.

Dr. Samuel Fortier, chief of the Irrigation Investigators, Experimental station Branch, United States Department of Agriculture, who is to be one of the principal speakers at the coming irrigation convention, accompanied by H.W. Grunsky, were in town this week in connection with the adminstration of water matters in British Columbia, having been engaged by the provincial government to investigate this subject. They left Wednesday afternoon by auto for Vernon. Dr. Dickson, the local Irrigation Convention secretary accompanied them.

An almost miraculous escape from death occurred at the sports on Monday, says the "Penticton Herald." The horses had just started for the mile race when a man ran across the track right in front. He was struck on the chest by Don E, owned by G. Fuller, of Kelowna, and thrown under the fence. The horse also stumbled and threw the rider right under his feet. He escaped being stepped on by inches. The man, whose name was Arthur Dunthorne, was knocked unconscious by the shock but he came to again in a few minutes after being attended to by Dr. McGregor.

"Old Bill" Miner, the aged outlaw serving a term for train robbery in Georgia, escaped by filing his shackles last week and with a companion left the state convict farm. This is the second time Miner has escaped from the prison farm in the last few months. In his flight he was hampered by an ill comrade, and soon he was re-captured. Miner, whose real name is supposed to be Anderson, is wanted in British Columbia on the charge of train robbery, whence he also escaped from prison some time ago.

Important Work on British Columbia

Mr. G. A. Lewis, representing Messrs. Sells, Ltd., of Fleet St., London, Eng., who are engaged in the compilation of a history and standard work of reference on the province of B.C., has been spending a few days in the city this week in the interests of his firm.

Mr. Lewis informs us that a very large and complete staff of journalists and photographers are engaged in the work, the full title of which is, "B. C., its History, People, Commerce, Industries and Resources." All information is secured first hand by the staff engaged on the work and nothing will be published without careful verification.

The provincial government has supported this publication in a very liberal manner, and have placed in the hands of the compilers every facility for its successful issue. There has been a very large demand for the book in Europe and Canada; in fact, orders have came from all parts of the world.

The natural resources of the country will be fully dealt with, and special information will be supplied with regard to the many opportunities existing for the profitable employment of capital. The services of the best expert writers available in the country have been secured for all special articles of the program shown by the comprehensive syllabus is carried out, and judging from the standard shown in Messrs Sells works on other parts of the British Empire, and by their established reputation, there is no reason to doubt that this will be done. The publication will be of inestimable value to the province, which it is generally conceded has long been in need of an authentic work of this description.

*It is the intention of the publish*ers to devote considerable space in the book to fruit growing and kindred matters, and several illustrations of Kelowna and district will be included.

The B. C. officers of the publication are in Vancouver under the management of Mr. H. J. Boam.

It is the intention of the publishers to have the book ready for distribution early this fall. A special *de luxe* edition for circulation only to subscribers within the province, is being prepared.

During the summer months mothers of young children should watch for any unnatural looseness of the bowels. When given prompt attention at this time serious trouble may be avoided. Chamberlain's Colic, Cholera and Diarrhœa Remedy can always be depended upon. For sale by all dealers.

MANANA TOMORROW

Thats When Mexico Pays Her Debts to a Man Who Rished His All to Help in the Cause.

The heart of Mexico was torn with strife in 1865. Mountains and arid plains hid thousands of patriots, Maximilian and his ambitious consort, Empress Charlotte, ruled over an unwilling people, by the grace of Louis Napoleon's troops.

At the head of the patriots was Gen. Juarez, now the idolized hero of Mexico; as aids in his great struggle for Mexican liberty he had Diaz, Carjaval, and others. Their supplies ran low, supplies failed; death by starvation faced them.

Juarez dispatched Gen. Carvajal to Washington with a two-fold mission — to get the enforcement of the Monroe doctrine and cause the expulsion of French troops from North America and to get financial assistance to carry on the war of independence.

In Washington, Gen. Carvajal met Gen. Lew Wallace. "Who will help us" begged Carvajal. "I know the man you need, he lives in Indianapolis, Herman Sturm, a veteran and fighter of the first class," answered Wallace.

General Sturm was sent for and made the secret agent of the Mexican revolutionary party. He sent thousands of soldiers across the Rio Grande; $2,500,000 worth of ammunition, sorely needed by Juarez followed; a man-of-war steamed into the gulf flying the Mexican patriots' banner. All that Sturm did for Mexican independence.

The rout of French soldiers followed speedily enough. Juarez became president of the republic; other revolutionary leaders were honored, and enriched. Only Herman Sturm was forgotten. The soldier of fortune that he was, he ventured his last cent on the success of the patriots down there; at the close of the war, his books showed $3,463,000 expended in establishing liberty in Mexico.

Sturm waited a while for the newly established republic to settle its account with him. Then he sent in a bill, and waited. For nearly a half century he kept sending in bills — and waited. In 1889 President Diaz, himself wealthy beyond computation, admitted that the account had run about long enough and that it ought to be paid. A bill in congress to pay the amount with interest was passed, but still no money came.

Herman Sturm had moved to Denver, and had turned his attention to mining There was a better chance to collect in that business. Several years again passed by, Sturm died in 1906 a broken-hearted soldier of fortune, poor, aged, and unthanked for his Mexican venture. His 'estate' consisted of the claim against Mexico. The administrator valued that at $100.

But it seems that there is a national conscience in Mexico, although it be somewhat stagnant. The heirs, Henry H. Sturm, son; Mrs. Clara M. Heath, daughter; and two grandchildren, have been informed that Mexico is about to pay its debt of the sixties. With interest it amounts to about $7,000,000, but while the Madero government is willing to pay the principal it balks at the interest. Mexico thinks that $3,463,000 is quite a lot of money to pay when no one can force the payment, anyhow it's a long time since Sturm dug down in his jeans and bought guns and ammunition for the patriots.

"What, Doris! You are going to refuse young Mr. Muffington? Why, I am sure he's a model young man!"

"I don't think he'll ever prosper, auntie. He aims too low; he only kissed my hand when he proposed."

Haughty

"Yes, she has refused me."

The moody man shrugged his shoulders.

"She has spurned my suit. She is per-roud, per-roud. Also haughty. But I tell you I have seen that per-roud, haughty girl on her knees. Aye, grovelling. When? When somebody dropped a quarter on the floor of the tramcar. She was one of the fifteen women who sprang for it!"

His Order

An Irish tailor who went to Glasgow in search of work had not been long there when he attended a meeting where a good, but shabbily-dressed, speaker present himself. Now and again through the speech the tailor would cry "Order!" All around were puzzled to know the reason, and at last the speaker spoke out and said:

"What kind of order do you want?"

"An order for a decent suit of clothes," was the tailor's reply.

A theatre manager at Temesvar, Hungary, has inaugurated the curious plan of selling tickets according to the stature of the purchasers. By this plan short and medium-sized persons are all seated in front of the taller members of the audience.

A Novel Means of preventing drunkenness has been devised by the Copenhagen police, who convey any person found intoxicated in the street to his home in a cab, the fare being charged to the establishment where the liquor was served.

Mr. Charles W. Morse, of Boston, Massachusetts who is convinced that the earth is flat, offers a reward of $1500 — which he has deposited in a Boston bank — to the person who can prove to his satisfaction that the earth is round.

Moliere died while performing a part in one of his own plays. The Archbishop of Paris would not allow his body to be inhumed in consecrated ground. Therefore the king sent for the archbishop and expostulated with him, but he was obstinate and would not willingly comply with his majesty's request. The king desired to know how many feet deep the holy ground reached. The bishop replied, "About eight." "Well," replied the king, "I find there is no getting over your scruples; let his grave be dug twelve feet; that is four feet below your consecrated ground."

What the Hero Wished

The bugle sounded, into the barrack square marched the regiment; then formed a hollow square, and waited. For it was an important occasion. Patrick Dolan, a scarred and sunburnt warrior, was to receive some little token of his country's gratitude. A notable act of bravery had brought Patrick, into the limelight.

"Men," said the officer commanding, "I am proud to pin this medal on the breast of Patrick Dolan — a Briton and a hero! And, under a special order, I shall place five pounds to his credit in the bank, as some little reward for his gallant conduct."

Patrick stepped forward and, as heroes do, looked uncomfortable. Still, there was one request he wanted to make.

"If—if it's all the same to you, sorr," he blurted out, "I'd rather ye'd pin the five-pound note on me chist, and place the medal to me cridit at the bank, sorr!"

"What started the riot at the performance of 'Hamlet' last night?"

"Why, Hamlet held the skull and said: 'Alas! poor Yorick. You are not the only deadhead in the house.'"

SLIGHTLY MISTAKEN

Although an editor is expected to know everything, and although his store of miscellaneous information is usually large, yet there are some things of which he — if he is an average editor — has never heard. Such, evidently, was the case with James Payn, the well-known novelist, when he was editor of 'Cornhill.'

One day an unannounced caller who had managed to evade the porter downstairs opened Payn's door. His hair was long and his clothes were shabby and untidy. He had a roll of papers in his hand. Payn, surmising a poet and an epic several thousand lines long, looked up.

"Well, sir?"

"I've brought you something about sarcoma and carcinoma."

"We are overcrowded with poetry — couldn't accept another line, not if it were by Milton."

"Poetry!" the caller flashed. "Do you know anything about sarcoma and carcinoma?"

"Italian lovers, aren't they?" said Payn, imperturbably.

The caller retreated, with a withering glance at the editor. Under the same roof as the 'Cornhill' was the office of a medical and surgical journal, and it was there that the caller sought for the disposal of a treatise on those cancerous growths with the euphonious names which, with a layman's ignorance, Payn ascribed to poetry.

"That friend of yours never comes around unless he has an axe to grind," said one politician.

"Worse than that,' 'answered the other. "I not only have to turn the grindstone, but I have to lend him the axe."

"Whatever is the matter with Fido?"

"Oh, isn't it horrid? I gave him to the laundress to wash, and she starched him."

Encourage Courting

A novel plan is that of the pastor of a Methodist church in Illinois to induce young sweethearting couples to do their courting in the church pews, instead of repairing elsewhere. He will allow young people to stay late, with a big room and piano in part of the church, and a hundred pews in which they can sit at their ease.

HOW TO BE HAPPY

An old lady of sixty-four, who says that all her friends call her "the woman with the smiling face," would like us to print her simple recipe for happiness. "I have never known it fail," she writes. "I have induced hundreds of my friends — young and old — to try it, and it always has been a success. If even half your enormous number of readers would take it as their motto for 1912 and act up to it, they would do more good to our beloved Canada than all the politicians who ever sat and wasted time at Ottawa. Here is my little recipe: 'Happiness? It's the easiest thing in the world to find. Just try to make someone else happy.'"

HEROIC WOMANHOOD

Bravery in the face of the elements is not usually placed in the long lists of womanly virtues, yet some of the most famous heroes have been women. Ida Lewis, the only woman who has ever been an official lighthouse keeper on the American coasts, died recently at Newport, R. I. She had passed practically her whole life at her post of honor, and eighteen souls have been indebted to her for life. Many thrilling stories of hairbreadth escapes and daring rescues are told of this woman, and she received medals, plate, insignia of various societies and purses of money in recognition of her ability and courage. In 1907 she celebrated her golden anniversary as keeper of the lighthouse, and Andrew Carnegie gave her a pension of $30 a month. The name of Ida Lewis will be written beside that of Grace Darling in the annals of effective heroism.

---

at last, and by 10 o'clock the two truant Chinese returned. They had seen Atayals, but were terribly frightened when they learned what had happened.

"The superintendent returned the next day. He, too, was considerably alarmed, and sent the Chinese off to the village for a detachment of district guards. Had I been his own brother, this Japanese gentleman could not have taken better care of me, or expressed more sympathy for the loss of my eyebrow."

Would Find Them Useful

A farmer was the other day paid for the first time in his life by cheque.

"What's this?" he said.

"Why, brass for the beats," said the cattle-dealer.

IN THE WORLD OF SCIENCE

DISTANCE GAS-LIGHTING

A Useful Appliance by Which Gas Jets May be Lit Up All Over a Warehouse by Merely Moving a Switch.

Users of gas for lighting purposes will be interested in the very useful appliance for lighting gas at a distance by means of an electric spark. The whole apparatus is compact and inexpensive, and may be used with existing fittings and be applied to any number of lights, and when once installed costs practically nothing for upkeep, as there is no permanent bypass-jet used. The apparatus consists of a small dry battery which generates a current of four to six volts, and measurgs about twelve by six by three inches, and is capable of serving any number of lights up to five hundred. To each burner is affixed a patent valve-tap which can be opened or shut as desired by means of a switch, and this can be fixed at any convenient place in the room, its connection with the battery and the valve-tap being made with ordinary bell-wire. The switch has two buttons, the first of which, on being pressed, opens the gas-way, and at the same time makes a very hot spark at the point of the burner which sets it alight; the second button when pressed shuts off the gas. To obviate the trouble and expense of using insulated wire in the wiring, the current from the battery is altered by means of a trembler, and is transformed to high tension by passing it through a transformer which is fixed to each valve-tap. The transformer is made of a core of laminated soft iron surrounded by a short coil of thick wire and a long coil of thin wire; the spark-leads are of stout sparking wires with steatite insulators, and the spark emitted is of the same strength as is used for firing explosive mixtures for internal combustion, and cannot miss fire. The whole apparatus is neat and compact; the valve and transformer, being quite small, do not show any apparent indication of their presence on the fittings.

The Utilisation of 'Air-Gas.'

During the past few years the utilisation of air-gas for lighting, heating, and other domestic purposes has advanced considerably. Air-gas, it may be explained, is an inflammable mixture formed by the addition in very small proportions of the vapour of a highly volatile spirit such as petrol with the air. Several disadvantages of the system have developed in its use, the most noteworthy being the condensation of moisture in the pipes, which impedes the flow of the gas and produces a disconcerting flicker in the light. This drawback, however, has now been overcome by previously passing the air to be associated with the volatilised spirit over a moisture-absorbing medium such as calcium chloride. That the system in the main is reliable and efficient is proved by the increasing establishment of small installations for the lighting of the houses in small communities from a central point. Worked on such a principle, it enables the smallest and most remote village to secure the same illuminating and other conveniences as are possible to large towns with an elaborate coal-gas generating station, and at a much smaller proportionate expenditure.

Artificial Snails.

It is astonishing how often it is that one hears of strange and secret processes through what is virtually the vagaries of that blind goddess, Chance. An instance of this occurred in France a week or so ago, when a workman brought an action against his employer to recover damages for a finger that had been mutilated in one of the machines. Then in the examination that followed the fact came out that the factory in question was engaged in the manufacture of artificial snails. It appears that the shells are bought by the firm in question from the dustmen and rag-pickers, and, after being cleaned, are filled with "lights" or cats' meat, the soft flesh being cut into corkscrew form to fit the shell by a skilfully-designed machine. The top is then sealed with liquid fat, and the escargot is ready for the consumer. The artificial snails have a ready sale in Paris and other French towns, and are presumably sold as the genuine article. One wonders what the opinion of many epicures of this delicacy is now that they have discovered the method by which their favourite dish is sometimes manufactured.

Artificial Resuscitation

The resuscitation of a drowning person by means of artificial breathing is not only a laborious undertaking, but the motions must be correctly executed or the attempt will prove unsuccessful. A Swedish physician has constructed an exceptionally simple and effective apparatus, which lightens the task materially and adds immensely to the chances of success. It consists of a short board on which the patient is placed, two levers to which the arms are fastened, attached to the board, and a wide belt or girdle fastened to the levers and passing over the patient's breast. When the levers are pushed backward, the arms follow and the chest is inflated; and when the levers are pushed forward and down the girdle presses the air out of the lungs.

The Plumb-line in Porto Rico.

Among the various discoveries made by men of science in their innumerable efforts to measure and map the earth with the least possible error are places where the direction of a plumb line is not vertical. Irregularities of density in the crust of the globe may produce this phenomenon. A remarkable instance in point was found in the island of Porto Rico, where the deviation from the vertical is so great that, in mapping the island, the northern and southern coast lines, as shown in the older maps, had each to be moved inward half a mile.

Announcement

¶ This advertisement is addressed to the citizens of Kelowna which City you have built to her present status with less than 6 per cent. of her available acres in bearing orchard and without a railroad. You have seen tons of fruit and produce rot for lack of transportation—have paid exhorbitant freight rates---yet prospered.

¶ Kelowna has captured the cream of the prizes wherever exhibited, and drawn the attention of the world to the most productive fruit land in Canada and to an unexcelled climate.

¶ You have compelled two or three great railway systems to give you transportation, and have laid the foundation for one of the most important cities of British Columbia, and British Columbia is the great seaport Province of the West---twice the size of England and more than twice the area of Japan, which supports a population of forty-nine million. Millions must and will come, and Kelowna will keep on growing.

Because of these facts a conservative firm have undertaken the sale of

LAKEVIEW

on Bernard Avenue East, overlooking the Lake and City

and offers first choice to the citizens of Kelowna. The reasons for Lakeview are good and follow the natural laws of good drainage, dry basements, pure air, etc. Lakeview possesses all these and in addition a magnificent view. Choice residential districts seek HIGH GROUND

Less than 120 lots averaging about a-quarter of an acre and at an average price of **$350.00**

Easy Terms

Eventually you will live in Lakeview and the price is cheaper now. Buy a homesite in Lakeview at acreage prices and reap the benefit of steady growth and increasing values.

See Mr. White at the Office of Harvey & Duggan or evenings at Palace Hotel.

Town and Country

Mr. G. H. E. Hudson returned Thursday last from his visit to the Old Country.

Mr. Bernard Lequime was a visitor in town during the last few days.

Misses A. and M. Hunter returned home from Armstrong last week where they have been teaching school.

Mr. Thos. Hidson, formerly constable at Kelowna, has been spending a holiday visiting friends here.

Mr. E. England is arranging a dance to take place to-morrow evening in Rowcliffe's new packing house near the tracks.

Frank Burns, "one armed champion of the world," gave an exhibition at the pool room Saturday.

Mr. W. D. McDonald of the public school went down to Victoria Sunday. He is to take a course there in cadet training.

Miss Winifred Herdman, who has been attending the High School here, left this week for New Brunswick. She will be joined en route by her mother and brother.

The right hand of fellowship was extended to ten new members in the Baptist church last Sunday morning.

The Annual Kelowna Regatta organized by the Aquatic Association, has been fixed for Wednesday and Thnrsdav, August 7th and 8 h.

The Rev. D. J. Welsh who returned from the coast last week left for Penticton Monday, together with Mr. H. McEwen and Mr. Bird who will act as delegates there at at the induction of the Rev. C. Britten, the new Baptist pastor.

The annual picnic of the Methodist church Sunday school will take place next Wednesday afternoon when a trip will be taken down the lake to the beautiful residence of Mr. J. R. Campbell.

Mayor Jones and family went to the coast Tuesday morning for an extended visit.

Mr. A. W. Bowser motored to Wallachin Tuesday on a trip extending over three or four days.

Several local tennis players went up to Vernon Tuesday to take part in the tournament which is in progress there.

Messrs. Rowcliffe Bros. are having a new fruit packing house built by the car tracks opposite the new cannery. The building is to be about 30 feet by 60 feet which with platform will give a floor space of about 500 square feet. E. England is the contractor.

Mr. J. M. Robinson of Naramata has kindly placed his house boat at the disposal of the local committee who are looking after the accomodation of delegates to the Irrigation convention, August 13th to 16th.

At the request of the Orange Lodge the friends of the Baptist church will supply both dinners and suppers to-morrow on account of lack of accomodation at the hotels. The lodge estimates that the visitors to Kelowna will exceed 1,000. A booth being erected next to the furniture.

Miss Freda Watt is spending a few days visiting Mr. and Mrs. R. S. Hall, of Glenn Ave. and also her brother, Mr. G. M. Watt of Okanagan Centre. Miss Watt has been attending the Bishop Stracham School at Toronto for the past year, and is now on her way home, her parents residing in Victoria. At the close of the term Miss Watt was successful in passing with first class honors the Toronto University senior examination in music (pianoforte), and carried away the special prize given by her music teacher, Mr. Harrison.

Buy it now. Chamberlain's Colic, Cholera and Diarrhœa Remedy is almost certain to be needed before the summer is over. Buy it now and be prepared for such an emergency. For sale by all dealers.

Monument to "McIntosh Red."

A ceremony unique in the history of fruit growing took place at Dundela, near Morrisburg, Ontario, last Saturday. The farmers of Dundas county, by popular subscription, have placed a marble stone close to the spot where stands the original McIntosh Red apple tree, that succumbed only recently after braving the storms and other enemies for over one hundred years.

About one hundred and fifteen years ago, John McIntosh, who came to Canada with the United Empire Loyalists, and settled in Matilda township, found a number of apple trees while clearing a place for a home. One of them produced fruit of such superior color and quality that he named it the McIntosh Red. It soon attracted attention and his son Allan propagated from it and commenced to disseminate the variety. In recent years it has been widely circulated, and now is planted in all parts of the continent where apples flourish. In 1896 the old tree was partially injured by fire, but continued to bear on one side until 1908, when it failed for ever.

The Saskatchewan elections are being held to-day.

The Dominion Government's contribution to the Regina cyclone sufferers will be $30,000.

David Auvache, the son of the Rev. Auvache, of Penticton, has had his foot amputated as the result of a shooting accident some months ago.

The editor of the "Coalmont Courier" announces that in future he will not accept drinks in lieu of cash for subscriptions to his paper.

From all indications it is feared that the caterpillar plague will greatly injure the apple crop of the province of Quebec, not only of this year, but probably of next year also.

Penticton is to have a squadron of British Columbia Horse if enough recruits can be secured. Three troops will be formed in Penticton and one each at Okanagan Falls and Kaleden.

Mr. E. G. Warren, general manager of the British Columbia Copper Co., has died at Greenwood, Boundary district, from the effects of injuries received in an automobile accident there a few days ago.

At a special meeting of the directors of the Peachland Townsite Company it was decided to change the office of the company to Summerland. The Peachland Townsite Company still hold some 300 acres of land, and have yet a considerable sum due them in deferred payments. The company also owns the irrigation system of that district.

A bad automobile accident occurred last Sunday week to a party from Vernon who were on their way to Kamloops. The car skidded on the wet road and overturned into a slough, pinning one of the passengers, Geo. Wilson, of Vernon, against a tree, killing him instantly. R. Robinson and Max Klausman were badly burned and poisoned by the fumes from a can of carbide which fell into the water. They, however, are recovering. J. Simmons, Wm. Skinner, and Wm. Leakey, the other passengers, were unhurt.

The boat built for Mr. Mitchell, of Kelowna, last year by the Summerland Boat Works, received some damage in the high wind of Monday night. Mr. Mitchell has gone to Scotland for the summer and sent the boat down here to be beached until next spring. The men who brought her down moored her close to Dr. Smith's boat, and they became entangled on Monday Dr. Smith's boat doing considerable damage to the planking and stern of the Mitchell craft.
—"Summerland Review."

Dysentery is always serious and often a dangerous disease, but it can be cured. Chamberlain's Colic, Cholera and Diarrhoea Remedy has cured it even when malignant and epidemic. For sale by all dealers.

SYNOPSIS OF COAL MINING REGULTIONS

Coal mining rights of the Dominion in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the North-west Territories, and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for the lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10 an acre.

For full information application should be made to the secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

"My GURNEY OXFORD jumped right in and helped with my housekeeping"

Dear Edith,

In a general way I have wished you all the good things I know of, so now I am going to descend to the practical and give you some sound advice from the store I have accumulated since I started housekeeping.

Housekeeping naturally suggests the kitchen first—its equipment and management, or in other words, THE RANGE

My range, as you know, is a Gurney-Oxford. I never enjoyed much of a reputation as a cook in my younger days, so when I thought of being responsible for three meals a day my heart sank. I imagined myself battling all day with a sulky range, trying to coax it into a good humour, and covered with mortification because of late or spoiled meals. But my dear, my Gurney-Oxford seemed to sympathize with my inexperience. From the day it came it jumped right in and helped. It has become my good right hand, and I go my way confident that my Gurney-Oxford will not disappoint me.

It has the cleverest arrangement for regulating the drafts, well named the Gurney Economizer. One small lever put up or down does everything. The fire will stay in all day, hardly burning any coal at all—then, presto! It is burning brightly, ready to bake or roast. An arrangement of flues keeps the oven always properly heated, so that the biscuits or bread come out light and crisp and brown. Yes, Edith, as Bob says, I have developed into "some cook," and I often tell him he must give at least half the credit to our Gurney-Oxford.

You will understand my enthusiasm better after you have had *your* Gurney-Oxford a month or so.

Sincerely Yours,

MARY HOUSEWIFE.

D. LECKIE - Kelowna

You may be paid $50 in Cash for improving your walk like this

108 Canadian farmers will receive cash prizes (twelve in each Province) in our big

1912 FARMERS' PRIZE CONTEST

WE held a contest last year in which 36 prizes were offered. This year there will be three times as many prizes (108) and therefore three times as many chances for you to win one of them. You do not have to use a large quantity of cement to win a prize. Many of last year's prize-winners used comparatively little cement.

THE contest is divided into three classes and in only one of these (Class "A") does the amount of cement used count in deciding prize winners. Class "B" is for doing the *best* concrete work (the *size* makes no difference). Class "C" is for sending in the best and clearest *description* of how any piece of concrete work was done.

THERE will be four prizes (First, $50; Second, $25; Third, $15; Fourth, $10) in each class in each Province. Thus you have only to compete with other farmers in your own Province, and not with those in all parts of Canada. This gives you the best possible chance to win a $50 prize.

IT COSTS NOTHING TO ENTER—There are absolutely no "strings" to this offer. There is no entry fee or red tape to bother with. You cannot lose, because the improvements you make of concrete in competing for the prizes will be more than worth their cost. We have a book, *"What the Farmer Can Do With Concrete,"* that will give you all the information about the use of concrete you can need. It will be sent to you free when you ask us for complete particulars of the Prize Contest. Ask for particulars to-day. Just say "Send me, free, your book and full particulars of the 1912 Prize Contest," on a post card and mail it *to-day*. Address Publicity Manager,

Canada Cement Company Limited, 503 Herald Bldg., Montreal

Anything in the Printing Line

There are few jobs that can not be done, and done well, on the RECORD presses, which are especially adapted for the production of all classes of commercial printing and illustrated advertising matter.

If you have a job we can not do we will tell you so and perhaps be able to advise you to your advantage.

Call and see us.

RECORD JOB PRINTING DEPT.

IN THE SCIENTIFIC WORLD

TALKING BY SUN RAYS

Heliograph, It Is Claimed, Was Operated In a Rude Way by the Red Man Ages Ago.

A recent writer on the subject of talking by sun rays concludes that the civilised world is probably indebted to the North American Indian for the idea of making use of sun rays, reflected from a looking glass, as a means of transmitting messages or signals.

Science has taken the idea, modified and improved upon it, and the now almost perfect means used by all prominent nations to transmit messages by means of a mirror and sun rays are but the outgrowth of the idea of the "untutored savage," who many, many years ago conceived the idea of making the flashes of sun rays from a small piece of glass held in the hand the medium of conveying signals and messages from point to point. Some authorities maintain that the idea came from a period as far back as the time of Alexander, as some histories record the fact that he piloted his fleets by signals made by the rays of the sun reflected from some bright surface.

The Indian with his small piece of shining material could send signal flashes a distance of over twenty-five miles. Today the civilized world, with the idea improved upon, and with fine instruments made for the purpose, is able to transmit long messages over seven times as far. The

SENATOR CASGRAIN,
Surveyor and Engineer, Montreal

instrument used is called a heliograph or sun writer.

The heliograph may be described as an instrument by which rays of light are reflected from a highly polished mirror, mounted on a tripod so as to throw the resulting flash on any desired point within the field of vision. The signals are produced by causing the reflected rays to appear and disappear or be obscured, the intervals of appearance and obscuration being varied in length so as to produce the combinations of long and short flashes.

WIRELESS TELEPHONY ON TRAINS.

A phase of human activity which has occupied the attention of many inventors is the devising of a simple system for maintaining wireless telegraphic and telephonic communication with moving trains. Numerous experiments have been made in the United States, Belgium, and Germany, as well as in Britain; but the success hitherto achieved has not been sufficiently convincing to warrant commercial exploitation. An inventor in the Midlands, however, appears to have solved the difficulty, judging from the eminently satisfactory results of tests made. In this invention the method is adopted of encircling a railway carriage with two frames of wires for sending and receiving messages. Along the side of the track is carried a continuous wire, similar to that used for telegraphing purposes, which may be buried or carried on low posts, and which links up with stations and signal-boxes, as well as with the trunk telephone and telegraph systems of the country. In the carriage an ordinary telephonic instrument is installed, and the electric oscillations are transmitted or received by either of the above-mentioned wire frames carried beneath the coach. The system is described as wireless inductive, so that the pulsations produced in the sending wire frame are reproduced by induction in the wire running parallel with the track, and vice versa for inward messages.

Boat in a Suit-Case.

A Parisian inventor has devised a craft for getting over the water, which is still so light and compact that it can be folded up and packed into a box no bigger than an ordinary suit case. The case part unfolds and joins together to form the main framework or hull of the boat, which is of the catamaran order. The two cigar-shaped flots are made of waterproof canvas. When packed up they occupy little space, and when in use they are blown up with a bicycle pump. The framework is fastened between them by means of ribs and straps, and when you have fixed a three-jointed, double-bladed paddle together and put a folding seat in place you are all ready to set out on your marine travels.

Overcrowded Ant-Hills

A marvel of scientific research has been accomplished by Professor Yemg, who has been investigating the interior condition of anthills. By dint of patient observation, Professor Yemg discovered that an anthill two feet in height was inhabited by 93,780 ants. Other anthills of almost the same size were found to contain 67,500 53,000 and 48,000 ants respectively. These observations and the counting of the tiny insects occupied two years.

NOTICE TO CONTRACTORS

NORTH KELOWNA SCHOOL

SEALED TENDERS, superscribed "Tender for School-house, North Kelowna," will be received by the Hon. the Minister of Public Works up to 12 o'clock noon of Wednesday, the 24th day of July, 1912, for the erection and completion of a large one-room frame school-house at North Kelowna, in the Okanagan Electoral District, B.C.

Plans, specifications, contract, and forms of tender may be seen on and after the 3rd day of July, 1912, at the offices of J. S. McKenzie, Esq., Secretary of the School Board, Kelowna, B.C.; the Government Agent, Vernon, B.C., and the Department of Public Works, Parliament Buildings, Victoria.

Each proposal must be accompanied by an accepted bank cheque or certificate of deposit on a chartered bank of Canada, made payable to the Hon. the Minister of Public Works, for the sum of $225, which shall be forfeited if the party tendering decline to enter into contract when called upon to do so, or if he fail to complete the work contracted for. The cheques or certificates of deposit of unsuccessful tenderers will be returned to them upon the execution of the contract.

Tenders will not be considered unless made out on the forms supplied, and with the actual signature of the tenderer, and enclosed in the envelopes furnished.

The lowest or any tender not necessarily accepted.

J. E. GRIFFITH,
Public Works Engineer.
Department of Public Works,
Victoria, B.C., June 29th, 1912. 33-4

Royal Naval College of Canada, Halifax, N. S.

The next examination for the entry of Naval Cadets will be held at the examination centres of the Civil Service Commission in November 1912; parents or guardians of intending Candidates should apply to the Secretary, Civil Service Commission, for entry papers before 1st of October next.

Candidate must be between the ages of 14 and 16 on 1st of JANUARY, 1913.

Cadets are trained for appointment as Officers in the Naval Service, the course at the college being three years, followed by one year in a Training Cruiser, after which cadets are rated as Midshipmen.

Further details can be obtained on application to undersigned.

G. J. DESBARATS,
Deputy Minister of the Naval Service.

DRUGGISTS and STATIONERS

Kelowna, B.C.

PHONE 19

Okanagan Centre

(From our own correspondent)

Mr. J. Goldie, manager of the Rainbow Ranch, left on Monday's boat for Vernon and Revelstoke, and may possibly go as far as Calgary before returning.

We are sorry to learn that Mr. E. B. Gay has had to go to the hospital in Kelowna to undergo an operation. We trust that it will be successful, and that Mr. Gay will soon be back home again.

A number of fruitgrowers are busy picking their crops of berries which have turned out very well this year. They experience no little difficulty in securing help for this class of labor, and in several cases the fruit growers have had to requistion their neighbors to help them out.

The rains of the past two weeks have done a lot of good everywhere and while in some instances proving a hardship to haymakers it has held back the too rapid growth of the fruit on the trees, and also been a great benefit to crops of wheat and oats. The roads too are in splendid shape for travelling these days. Altogether, we have every reason to appreciate such delightful weather during the first half of July.

The annual school meeting for the district takes place at 10 a.m. Saturday 13th, inst., notices to this effect having been posted up in prominent places by Mr. N. H. Cæsar, secretary of the Board of School Trustees. Mr. N. V. Joslyn is the retiring trustee, and W. Grant the retiring auditor. A good attendance is requested of the ratepayers and their wives at this meeting.

If you are a housewife you cannot reasonably hope to be healthy or beautiful by washing dishes, sweeping and doing housework all day, and crawling inio bed tired at night. You must get out into the open air and sunlight. If you do this every day and keep your stomach and bowels in good order by taking Chamberlain's Tablets when needed, you should become both healthy and beautiful. For sale by all dealers.

Okanagan Mission

(From our own correspondent)

The half-yearly general meeting of the sports club was held at the Bellevue Hotel on the evening of July 3rd, over 20 members attending, Mr. W. Hobson acting as chairman. The treasurer's statement shows a balance in hand of about $320, and there were outstanding liabilities amounting to $30. Mr. Osborn having resigned his position as secretary, some difficulty was experienced in finding a new candidate for the position. Eventually Mr. J. H. Thompson agreed to be nominated, Mr. Mallam being elected to the committee. After some discussion over the committee's action with regard to temporary members, it was proposed that no one who had resided in the place for two years should be eligible as a temporary member. A motion that honory members should have no vote at general meetings was defeated. Mr. Fordham reported that a cricket tour was being arranged for August, with matches against Lavington (at Vernon), Armstrong, Salmon Arm, Revelstoke, and possibly Vernon. An endeavor was made to find out what support was likely to be forthcoming for the tour, and about 12 names were secured. It was resolved that the committee should be intrusted with the getting of the two new tennis courts ready for use this fall, and a suggestion was made that by diverting the present road to the right and across the lower court to join the new road, the present top court and the two new ones would be in one piece of ground. The committee were empowered to act upon this suggestion. Votes of thanks were passed to Mr. Osborne, the resigning secretary, and to Mr. Dodd, for the use of the room. The meeting then terminated.

Items from Ellison

(From our own correspondent)

The final arrangements for the Whelan Sunday school picnic have been completed, and if favorable weather conditions ensue, a most enjoyable day is anticipated. The party will leave the school house at 9 a.m. Friday morning, and drive to Oceola, where they will then go on board the s.s. "City of Vernon" and take the trip up Woods Lake to the "Railroad" where, through the kindness of Mr. Rayburn, the party will be able to have lunch on his grounds, which are ideal for picnicing. A trip around the south end of Long Lake will form part of the afternoon's entertaincent, and then the return journey will be made to Oceola.

Upon the kind invitation of Mrs. C. H. Geen, a number of youug people gathered at the home, Pleasant View Farm, on the evening of Monday last. Games of all kinds were indulged in, and all too soon the pleasurable hours sped away, until the time came for returning home again. Praise is indeed due to the hostess who spared no efforts to make the evening an enjoyable one for all, and the memory of so pleasant a time will long remain with those who are present.

IN THE SCIENTIFIC WORLD

LURE OF INVENTION

The Longing to Introduce Something New Affects all Classes and Conditions of Men.

The lure of invention is one that influences all people and spares no class or condition of men. From the clergyman in his study to the convict in his lonely cell, it exerts its attraction, and both are found enrolled among the list of patentees, although not so precisely identified. The stimulus is not always the hope of fee or reward, for we find the millionaire as strongly interested as the very poor. There is something in the attraction that cannot be resisted. Someone has said that writing is like flirting. If you cannot do it, no one can teach you to do it, and if you can do it, no one can keep you from doing it. So it is with invention; no one can teach you to do it, and if you have the divine afflatus, no one can prevent you from exercising it. This is fortunate; for the inventor is subjected many times to discouraging influences in the first instance. Have you ever noticed, however, the pride with which anyone will display an invention even of the simplest character? Surely this is commendable, for we all admire originality, and invention is originality, often of the highest order. While the lure may be regarded apart from the results, we cannot help realising what a poor world this would be except for the beneficent works of the inventors of all times.

WHAT THE ALCHEMISTS SOUGHT

A gramme of radium dispenses energy chiefly in the form of heat at a rate which is about one hundred and twenty gramme-calories per hour; or, to draw a comparison, a given weight of radium radiates the same amount of heat-energy in sixty-five hours as would be given off by the complete combustion of an equal weight of good coal; and, while the latter would be entirely consumed, the capacity of the radium for continued radiation would not be materially lessened, for its exhaustion would only be complete after a period of from seventeen hundred to two thousand years. Thus a minute quantity of radium distributed throughout the earth would cause a rise in temperature of the surrounding rock, and a scientist has expressed his surprise that, from an investigation of the outer layers of the earth's crust, the internal heat is not even greater than it is from this cause.

The experiments of Professor Soddy show that radium is not directly formed from uranium, but that there is probably an intermediate substance formed in the uranium-radium series, with a long period of life which may be ten thousand years. The radium is therefore only one stage of a series of transformations which we have been able to isolate, and it is hard to resist the conclusion that in this series we find to some extent what the alchemists of old were in search of, the transmutation of one element into another, though all of them bear a resemblance sufficiently close to justify their common relationship to a distinct group.

Pure Air and Horses.

The 'oldest inhabitant" never remembers a time when the street odour has been less unpleasant than was the case in towns during the recent heat. In the pre-motor days the smell of horse manure was at times quite unbearable, and we therefore have to thank the motor with all its faults, for this improvement. Without it the intense heat we have lately experienced would have been much more terrible. Possibly also there is more oxygen available for human use now that the equine ranks have been so greatly thinned. During the 24 hours a man will vitiate about 1750 cubic feet of air to the extent of 1 per cent. A horse (as, of course, a motor) will do much more than this, so perhaps it is just as well he is gone or going — so far as the streets are concerned.

First Railroad Signalling

It was not until the year 1846 that the present system of signalling was first thought of. Up to that date the pointsman used to have to sit in a hut near the switch for which he was responsible, and, at a given signal, get up and alter it by hand. It is to the laziness of one of these old-time pointsmen that we have to look for the present-day system of signalling. He had to attend to two sets of switches some distance from each other, and in order to save himself the trouble and exertion of walking to and fro between them he fastened the levers together by a long piece of wire. A broken iron chair served as a counter-weight. The wire ran on into his hut, and there he sat nightly and worked the two signals without setting a foot outside. This went on for several months, but one day the old signalman was discovered, severely reprimanded, and afterwards promoted.

Queen Ant and Queen Bee

It is claimed that the queen ant has not had justice done her by naturalists. As compared with the famous queen bee, she is regarded by Dr. W. M. Wheeler as a far more admirable creature. In fact, they are, in many important respects, diametrical opposites. The queen bee is, it is pointed out, a degenerate creature, unable to nourish either herself or her young, to visit flowers, to build combs or to store them with honey. With the queen ant quite the reverse is true. She is held to be a perfect examplar and embodiment of her species, and the worker ant suffers from incomplete and retarded development. The queen ant is a very industrious and intelligent worker, and, in the opinion of the authority mentioned, she forms an exceedingly interesting subject for study, and has not hitherto been well understood.
