Meeting of City Council

Grant of \$100 Made to Fire Brigade in Recognition of Services
- Power House Repairs Up Again - Speed of
Automobiles

A meeting of the City council was held last Saturday evening. Mayor Sutherland was in the chair. Ald. Leckie, Harvey, Jones and Cox being present. The minutes of last meeting were first read and confirmed.

The following accounts were referred to the finance committee, to be paid if found correct:

Mr. W., work on public park and streets.....	9 00
C. E. Stiff, work in park.....	20 00
Collett Bros., filling slough Water street.....	170 00
J. Axon, 14 day's firing.....	35 00
Can. Fairbanks Co., supplies for power house.....	17 19
Vin. Eng. Works, cast T.....	23 75
Crane Co., 24 copper gaskets.....	5 55
McLennan, McFeely & Co., total for resealing valve.....	24 00
C. P. R., express on supplies.....	1 40
do. " T.....	2 94
do. " pipe bend.....	1 57
B. A. Moorehouse, plan of water works extension.....	20 00

A deputation, consisting of Mr. Buckland and Mr. Weddell waited on the council on behalf of the Hospital committee with reference to expenses incurred in respect to Mrs. McGee.

Mr. Buckland said the last council promised to pay half the cost, and he would like to know what the present council were going to do in the matter.

Ald. Leckie said he believed the case had already been brought up before the council. He understood that Ald. Stirling had promised to pay half himself privately, and that the grant made to the Hospital should cover the other half.

Mr. Dunn looked up the minutes of a previous meeting and found that a resolution had been passed to that effect.

Ald. Cox said the council had since been at some expense for wood and other supplies.

Mr. Weddell detailed the history of Mrs. McGee's case, and said that if the Hospital committee had not taken the matter up, the council would have had to take the burden upon themselves.

The mayor said that in the absence of Ald. Stirling it was impossible to say anything then, and the matter was eventually referred back to the finance committee for their re-consideration.

Mr. Middleton attended with a petition signed by a number of residents and owners of lots on Ellis street and St. Paul st., asking the council to have St. Paul st. extended to Bernard avenue. He said that he and others owned land in that neighborhood for which they were paying taxes, but could make no use of it as there was at present no way of getting to it.

Mayor Sutherland asked if the petitioners wished the City to bear the whole cost of constructing the road.

Yes, at present, said Mr. Middleton, but the taxes would eventually pay for it. Many of them, he said, had bought lots out there, expecting to build and use them, and they were very much disappointed that no street had been made.

Mayor Sutherland pointed out that the cost would be very great. It would take something like \$1,500 to buy the necessary land, which would probably be nearly half the total amount proposed to be spent on the roads this year. It would mean putting through a special by-law in order to raise money for the purpose.

Mr. Middleton admitted that it would cost money, though he did not think it would take so much as \$1,500 to buy the land for the street. He was of the opinion that the owners of the lots would be willing to sell sufficient at a reasonable figure in order to increase the value of the rest. They were, he said, paying taxes year after year for their holdings, and naturally wanted something in return. The council would receive a good deal more in taxes than they were doing at present, owing to the increased

assessment, and the owners would be quite willing to pay it. The street, too, would be a considerable improvement to the town.

The mayor promised that the matter should receive consideration and a note was accordingly laid on the table to be discussed in committee.

Mayor Sutherland then brought up the question of the Aquatic Association. He said that last year the City had made an agreement with the association, that, when they should have been properly incorporated, and on the understanding that certain conditions should be complied with, a lease should be granted to them of a portion of the foreshore in the city park for the purposes of a pavilion, etc. He now thought it was in order to have the lease prepared.

The mayor also asked what the council proposed to do in reference to the balance of \$2,500 due to the Canadian Fairbanks Co. for the re-installation of the power house plant after the fire.

A little discussion here arose, Ald. Leckie stating that the account was in payment for the contract which he considered had only just been completed. Some of the apparatus had, in fact, only recently arrived. Moreover, since the plant had been re-installed a break had occurred which had cost the City about \$1000. The report of the government inspector went to show that the cause of the break was a defect in the plant itself, and for this reason, he thought, it was up to the Canadian Fairbanks Co. to bear the cost of the repairs necessitated by the breakage, especially considering the long price they got for the reinstallation.

Does the inspector say, asked Ald. Harvey, that we could prove their liability in a court of law?

He did not, of course, express any legal opinion, said Ald. Leckie. He had simply tried to find out the cause of the accident.

Ald. Cox asked if Mr. Peck, (the government inspector), had explained why he did not send in his report.

Ald. Leckie said that the inspector had been unable to get certain necessary information from the Fairbanks Co. He (the inspector) was not really concerned with who was responsible for the break-down, but what. He had practically admitted that it was the plant which was at fault.

Ald. Cox declared that in his hearing the inspector had exonerated the man in charge from all blame, and if it was not the man, then it must have been the plant. He had further stated that if certain changes in the plant were not made the accident would occur again.

Ald. Harvey was of opinion that the council would be on the right side in refusing to pay for the repairs.

Ald. Leckie thought they had better write the Fairbanks Co. that some liability attached to them on account of the accident, and that the council could not see their way to settle until the matter was cleared up.

Ald. Cox remarked that the engineers differed very much in their opinions, one recommending one thing, while another held quite a different view.

Mayor Sutherland thought that before going into further details it would perhaps pay to get legal advice. He pointed out that the new engineer had found the plant in bad shape when he took it over. The piston rod was banging against the end of the cylinder at each stroke, and there were several other details of faulty adjustment.

Ald. Jones said that the matter had been in discussion for a considerable time and he thought they ought to get legal advice and have the thing settled.

Ald. Leckie said that provision

Continued on page 2.

Development in Kelowna District

In the windows of the different land and development companies, the signs of "Men Wanted" mean much to Kelowna and its district, for they mean the commencement of a new era in the development of the large and fertile country surrounding our City.

Among the different companies which are operating extensively is that formerly known as the Central Okanagan Land & Orchard Co., Ltd. It is noticeable that this company has recently re-organized, two separate companies being formed, a land company, known as the Central Okanagan Lands, Limited, with \$1,000,000 capital, and a water company, known as the Kelowna Irrigation Company, Limited, with a capital of \$500,000.

The newly formed companies have already got under way, and an extensive work outlined for the year. The Lands Company has purchased about 3000 additional acreage, which brings the total unsold holdings to about 7,500 acres. This includes the noted "Dry Valley" district, which extends from about a half mile of the city limits north east a distance of about eight miles. These lands, considering their close proximity to the City, the fertility of their soil, which is ideal for the culture of fruit, and the beautiful surroundings and views in and from their neighborhood, are considered some of the choicest lands in the Okanagan Valley.

We understand it is the policy of the company to improve and plant in orchard quite a large portion of its holdings, and to sub-divide and sell the balance in small blocks.

The Irrigation Company has commenced operations, and under the supervision of a competent engineering staff, it is pushing the work of extending the water all over the Land Company's holdings. A steel pipe syphon line 30" and 32" in diameter, will be laid across Mill Valley in order to transmit the water into Dry Valley and on the other adjoining lands. The main irrigation canal and distributing system will be constructed of concrete, so as to insure against seepage or damage to land by water. Between forty and fifty cars of cement have been ordered, and rock crusher and concrete mixer have already been shipped for use in the construction of the ditch and laterals. The whole system will be substantial and durable in every detail. Though this class of work is quite common on the American side, as far as is known, the Kelowna Irrigation Company is the first company in British Columbia which has adopted such a permanent class of work.

It is expected that the Land and Irrigation companies combined will expend in cash during the present year, between \$300,000 and \$400,000, and during the year following an equal amount. A gang of about forty men are now busy on the works, and we understand the company will have work for as many more.

Now that the company is extending its water system on to the Dry Valley lands, we understand it is their intention to change the name of the Valley to one more appropriate. "A cash prize of \$100 is to be offered to the person who hands in the most appropriate name on or before May 12th. Competitors must visit the valley personally. The decision and change of the name will be made by the management of the Land Company."

All this expenditure surely must mean a great faith in the future of Kelowna's district. The growth and development of the City and country has been rapid during the past few years, but we feel safe in saying that with all the new development work going on, and with the increased acreage being brought under water and put on the market, the growth of our city and district has but commenced, and during the next few years greater strides will be made than that at any time in the past.

Rutland News.

(From our own correspondent.)

Mr. and Mrs. Lee arrived from the Old Country Thursday last, and are busy furnishing their fine new home.

Good time was made on the final work of the Rutland ditch last week, the water being turned on Saturday. A number of men were drafted from the government road and from Munson's mill to help push the work through. Men are very hard to get this spring, owing to the large amount of work going on in the district, and the Rutland people will appreciate the timely assistance tendered by Mr. M. Hereron and Mr. Munson. Quite a chapter of small accidents occurred during the week; Lorne Sproul fell off the tressle into the creek, but was no worse than getting a very cold bath. Mr. Woolsey got a nasty crushed foot, and Mr. Gurney also took a header from the tressle across the creek on Sunday, falling on the stones, however, and getting a bad shaking up.

Another runaway occurred last Friday, when Xavier Baker lost control of his team on the 2nd road of the Central Okanagan Lands Co. On approaching the lake he jumped out of the wagon, not being prepared for any impromptu bath. Fortunately, however, no damage was done, the team being stopped at the store.

Mr. Morrison, the foreman of the Central Okanagan Lands Co.'s flume builders, suffered a loss by the burning up of a brooder containing 100 good strong chicks. The fire was caused by a defective lamp.

New maps and a globe have arrived for the school, and have been placed in position, adding greatly to the appearance of the school, as well as greatly assisting Miss Fullerton in her work. The next thing in order would be a few suitable pictures and a few flower vases. Nothing helps a child more to develop than beautiful pleasant surroundings.

The birds and the blossoms this week are filling the air with song and pleasant perfume.

Westbank Notes

(From our own correspondent.)

It has been so warm of late, that the roads are getting very dusty, so the general wish is for rain or a road sprinkler.

One of the first automobiles to visit this district came last Thursday, and as usual, the poor horses were subject to many a scare.

It is understood that Mr. J. Strang has disposed of his twenty-acre lot at the townsite, for the handsome sum of \$9000.

Mr. E. Dickerson, of Rutland, who is teaming on the Bear Creek road, had a "spill" one day last week, but luckily nothing was hurt, although both team and wagon turned "topsy turvy."

Mr. James Vale of G. McCurdy's road camp, was taken seriously ill last Saturday morning, and had to take the evening ferry for Kelowna to secure medical aid.

Work on the new mill is progressing favorably, and we hope it will not be long before we will hear once more the old time whistle, as something seems a miss since we hear it no more.

Something must have been doing down on the reserve at the beginning of the week, as the police were over and made a general round-up.

The quarterly Sacramental services will be held in the Methodist Church next Sunday evening. All the members are expected to be present.

Site for B.C. University Offered Adjoining Kelowna

Mr. Rembler Paul Offers Government 125 Acre Location on Lake Front North of Kelowna.

The determination of the government to establish a University for British Columbia has caused considerable interest in all parts of the province. Into the great advantages to this extreme western part of the Dominion of a university it is not necessary to enter. That matter is settled. We are to have the University—but where? In what particular part of this favored province shall the government erect their supreme educational institution? That is the question which is exercising the minds of a great many people at the present time.

As to what constitutes an ideal location is a matter of great diversity of opinion and the commissioners have no easy task before them of making the selection.

It is not necessary, indeed scarcely advisable, that the university should be near any great manufacturing centre. What is of more consequence is that it should be placed where the climate is healthy and bracing, so that study may be pursued under the most favorable conditions; where the weather is fine the greater part of the year, so that out-door sports so dear and beneficial to every student may be pursued the year round with as little interference as possible; beautiful and inspiring scenery; and reasonable accessibility from all parts of the province.

One of our Kelowna citizens, Mr. Rembler Paul, has generously offered to give to the government a site which he believes to combine all the foregoing advantages, and many more besides.

The site which Mr. Paul offers is directly adjoining the city of Kelowna on the north, and consists of 125 acres of valuable land on the shore of the Okanagan lake. Its situation is undoubtedly a magnificent one for the purpose, overlooking the city and commanding a fine view up and down the lake. It has half a mile of lake frontage, where, wharves, boathouses, etc. could be constructed with the greatest ease. It has right on the spot all the marble and building stone necessary for the edifice, besides coal, iron, copper and other minerals. It has the aspect of a natural park, consisting of hill and valley, with fine timber and over 60 acres of open country suitable for any agricultural purpose.

Two roads already connect the property with the city, and the government have a third marked out for construction in the near future. Kelowna, itself, which is undoubtedly destined to become the central city of the Okanagan, besides having an excellent boat service, will shortly be connected by an electric road with the main line of the C. P. R.

No need to speak of the climate of Kelowna to anyone who has stayed here the year round. Ask the oldest inhabitant how many days he remembers of real bad weather. The chances are he could count them on his hands and without using the same figures twice, too.

Mr. Rembler Paul is a man who has seen much of the world we live in, and has searched from north to south for a pleasant place in which to spend his declining years. Last year he visited California, which is generally referred to as a heaven blessed land, but he came back more than ever convinced that Los Angeles was not in it with Kelowna. They have not the bracing atmosphere which keeps a man in health and blood coursing bright in his veins. Two Regina gentlemen, who recently stayed here on their way from California emphatically voice the same opinion.

This land Mr. Paul offers to the government free from all encumbrance and without any restrictions whatever.

It is expected that the commission which is to select the location

(not the actual site) for the new university, will reach the province to enter upon their important duties some time in early June. On their arrival in British Columbia the commissioners will organize and prepare a working plan, select their secretary, and proceed to business. It is probable that sittings will be held in Victoria, Vancouver, Nanaimo, New Westminster, Nelson, Kamloops, Vernon, and certain other centres. The decision of the commissioners will in all probability be handed to the government in ample time for it to be presented to parliament at next assembly. The following are the commissioners appointed: Dr. Weldon, Dalhousie University, Nova Scotia; Canon Duthie, Laval University, Quebec; Dr. O.E. Skelton, professor of political science at Queen's University, Kingston; Principal Murray, University of Saskatchewan; Dr. Pritchett, New York, president of the Carnegie Endowment establishment. As defined by the act under which the commission is created, the duties of the commissioners will be "after having visited and made a careful examination of the several cities and rural districts in the province suggested as suitable university sites, to select as a location for the university that city or rural district best suited in the opinion of the majority of them, for university purposes, which selection when made, will be final."

Victoria Day Sports

The meeting held last Friday, to arrange for the sports on Victoria Day, May 24th, was a little better attended than the abortive attempt of the day before, and a working committee was formed with P. DuMoulin as president, L. C. Avis, vice-president, F. Wilgress, treasurer, Frank Fraser, secretary. Mr. Frank Fraser, however, declined to act, and Mr. Avis is therefore fulfilling the duty of secretary. The sports are to be held on the exhibition grounds, and it is the hope of the committee that the gate money will pay all expenses, but a guarantee fund has been raised in case of deficiency.

The programme is not yet completed, but it is probable that the morning will be occupied with war canoe races, (on the lake of course) and foot races on the track, with horse racing and lacrosse in the afternoon. The city band will be in attendance.

A meeting of Farmers' Institute was held in the Opera House Wednesday evening, when Mr. Jull, the provincial poultry expert, lectured on "Poultry Keeping in B. C." There was not so large an attendance as the subject and the speaker warranted.

Mr. Jull, in his preliminary remarks, said that he was mostly concerned with the commercial side of the industry, and urged the necessity of co-operating for the securing of better marketing facilities. He urged as many as possible to be present to-day (Thursday) at Summerland, when the Southern Okanagan Poultry Association was to be organized. An interesting talk on incubating, brooding and housing of poultry followed illustrated with lantern slides.

A pleasant and interesting event took place on April 27th, at the home of Mrs. D. M. Erskine, Park avenue, when Miss Ellen Victoria Eady, of Vancouver, was married to John R. Campbell, eldest son of Mr. J. T. Campbell, Summerside ranche, Kelowna, and grandson of the late Jno. DeVille of Newcastle-under-Lynne, Staffordshire. Vancouver and English papers please copy.

The action of the city council in granting \$100 to the Volunteer Fire Brigade will no doubt be heartily endorsed by everyone in the city. The brigade boys as Ald. Jones remarked at the council meeting are now an efficient body, and capable of splendid work in protecting the citizens from loss by fire. Their services are purely voluntary aid without remuneration from any quarter. Nothing but the most genuine enthusiasm could induce a young man to turn out from his bed in the middle of the night or leave his work during the daytime to undertake the strenuous and often dangerous duty of fire fighting. And those who have comfortably stood by watching the spectacle of a fire and carefully dodging the least drop of water which might stray in their direction, will appreciate the fact that the boys often suffer loss from spoiled clothing, not to mention blistered faces and hands. After their smart work on one or two recent occasions their claims to support and encouragement need scarcely be pressed.

CITY COUNCIL MEETING

Continued from page 1

had been made for payment, and the money had been raised, but the matter hung fire because no satisfactory report could be got from the boiler inspector.

Ald. Jones thought that if they were to enter into litigation over the matter the late engineer would swear that the plant was properly installed, and would probably put down the accident to some other cause.

Ald. Leckie said the boiler inspector had distinctly stated that the cause of the smash was water in the cylinder, and that the water got in there because the plant was wrong.

Mayor Sutherland was of the opinion that the council would have to pay. He did not think they would be able to make out any case of negligence. It was simply a difference of opinion with regard to the plan of the installation. The Canadian Fairbanks Co. were installing plants all over the country under the supervision of an experienced man, who thoroughly understood the business.

Ald. Leckie said that when the price paid was so high, they need have no scruples about making them come up to the scratch.

The question was then dropped with the intention of referring it to the city solicitor.

Ald. Jones recalled the fact that a suggestion had been made at a previous meeting that a grant should be made to the fire brigade in recognition of their services. He had not been able to refer it to the finance committee, but as it was a matter which should not be left over, he would like to have it dealt with at the present meeting. He spoke in high praise of the fire brigade. We had a body of eighteen young men, he said, to aid in protecting the city from fire, and the way in which they worked was worthy of some recognition. They were without any remuneration from the citizens, and in case of fire had to leave their business,

and frequently suffered loss from spoiled clothing, etc. He thought if the council were to give something it would be a stimulus to them in their work.

The other members of the council were unanimous in their agreement with this proposal, and accordingly, on the motion of Ald. Jones, seconded by Ald. Leckie, the following motion was passed: "That the city council in appreciation of the excellent services rendered by the fire brigade at the recent fires, authorize the city clerk to forward their secretary a cheque for one hundred dollars.

Ald. Jones then introduced the question of the city park. He said that considerable money had been spent last year in flower beds and other improvements, and he thought the council ought to see that a competent man was appointed to look after the park and keep it in proper shape. Trees had been planted which would have to be attended to, and the flower beds would have to be watered and new flowers planted in their proper seasons. There was quite a lot of rubbish, too, which needed clearing away. A man would be necessary for about four months, say from May to August, and the cost would be about \$250 to \$300. They ought to consider whether it was worth while to go to this expense or not. Quite a number of tourists were coming in from Vancouver and other places, and the city park was one of the things they took pleasure in. If we wished to have these tourists coming in, the city must see to it that the park and the streets were kept in good order and made more attractive.

Ald. Cox said he fully agreed with Ald. Jones. They must have a man to look after the park, or the improvements which had been made would be spoiled.

It was also suggested that the same man could look after the grass and weeds on the streets, the care of the trees, etc. The proposal seemed to meet with general approval, and the matter was eventually referred to the park committee for consideration.

Ald. Harvey mentioned that the flume on Glenn avenue was being repaired ready for the water to be turned on. Mr. Raymer had objected to the water being sent down in that way again, as the leakage would undermine the foundations of the new school building.

Mayor Sutherland pointed out that the city had nothing to do with the irrigation water. They had removed the flume and must, of course, have it replaced, but so far as the water was concerned, the city had nothing to do with either turning it on or off.

Ald. Leckie thought that as the school was city property, the city should see to it that no damage was done to it from that cause.

In such a case, said the mayor, the city would have to take action.

A motion was then put through that By-law No. 73 be read a first time. The by-law imposes a special rate 3 cents per foot frontage for watering portions of Bernard avenue, Water street, Pendozi st. and Abbott street, constituting the business part of the city. The rate to be paid by the occupiers of the premises.

Ald. Leckie asked if there was any regulation governing the speed of automobiles within the city limits. A man had told him that he had seen automobiles going through the city at 60 miles an hour. His informant was very emphatic about the speed, and had said that there was great danger of children being run over and killed.

Ald. Cox said that the last council had asked Hixson to speak to all the owners of cars, and the result had been a great improvement for a time.

Mr. G. C. Rose, who was present, said that he had a request to make of the council. The city, he said, last year went to considerable expense in purchasing and fixing up a ground for the use of the various athletic associations in town. There was one body, which was not in a position to ask for the use of the grounds, and therefore does not derive any benefit from them. He referred to the Rifle Association, which had lost their range, owing to the owner refusing to give them permission to shoot on it. Owing to the kindness of Ald. Harvey and Jones, they had a new range in sight, but they had all their work to do over, and would have to go to all the expense of fixing it up for shooting again. He would like to ask the council for a grant of say, \$25 towards these expenses. The Rifle Association was a deserving institution, and in the time of need would have to shoulder arms and fight for their country. They were now faced with considerable expense, and asked the council to help.

The meeting then adjourned until Saturday next, April 30th.

CLOTHES AND THE MAN.

Good Appearance Waits Upon the Way
Garments Are Worn.

"You can talk all you please about clothes making a man," said a Walnut street tailor, "but I want to say right now that the smartest clothes in the world can't make a man 'natty' if he is not naturally so. There is an old, stoop shouldered doctor uptown that I have been tailoring for seven years. He buys four and sometimes five suits a year, and yet, except for a few days after he has broken in each new suit, he never looks pice. The trousers bag at the knees, the coat falls away in front, and the shoulders begin to look sloppy. The man's drooping figure and the poor care he takes of his clothes furnish, of course, the explanation.

"Did you ever notice the average college man's clothes? Almost invariably he looks neat and correct despite the easy swing with which he walks. But you'll notice that he carries his head high, his shoulders fairly erect, and his trousers never 'break' at the shoes, so that the crease is always preserved. All classes of men go to college—rich and poor. Few college men take more than fair care of their clothes. It's all the way they wear their clothes, I think. Notice the young lawyers and doctors around town too. Few of them can afford the very best in tailor made clothes. That they usually look nice is due to the fact that they have picked up the distinguished way to wear clothes, I might call it. Clothes make the man, but only when the man is willing to help."—Philadelphia Record.

A TRUE STORY.

It Was Vouched For by the Gentleman
Who Related It.

Some years ago in a certain town in the north a gentleman possessed of more money than education was asked to address the scholars attending one of the local schools some Sunday afternoon.

"Well, children," said he, "I'm not used to public speaking, but I remember when I was a lad I was very fond of hearing a story. Shall I tell ye a story?"

"Once upon a time many years ago there was a lad, a very good lad, who went regularly to Sunday school and never missed. But one Sunday afternoon as he was going to school two bad boys met him and persuaded him to go bird nesting with 'em. So they went along by the riverside, and by and by they came to a tree, and in the tree on a branch which overhung the water was a nest. The two bad lads sent the good lad to climb the tree and fetch the eggs. Up he went and got on the branch, farther and farther, and just as he was reaching out his hand to take the nest, the branch broke, and he fell into the river and was drowned."

After waiting a few moments to allow his hearers to thoroughly grasp the full extent of the catastrophe he resumed with:

"Children, the story is true, for the lad that was drowned was me."—London Tit-Bits.

The Act of Dying.

The common phrase "death agony" is not warranted by what occurs in natural death, which is a complete relief from all pain. When death is owing to heart failure or syncope it is sudden and painless, perhaps pleasant. Death by hanging, there is reason to believe, is attended by a voluptuous spasm. Death by decapitation or electricity is only a momentary shock, hardly felt. Death by poisoning varies in painfulness according to the poison employed. Opium, and other narcotics probably give a painless, perhaps a pleasant, dreamful death. Hemlock, as we know from the account of the death of Socrates, causes gradual insensibility from below upward. On the other hand, arsenic, strychnine, carbolic and mineral acids, corrosive sublimate, tartar emetic and other metallic poisons inflict slow and torturing death. Prussic acid and cyanide of potassium cause quick death.—Exchange.

Glasses to Fit Four Eyes.

For several months a man had been going to various oculists, getting a pair of glasses, trying them for a few days and then taking them back. Two weeks ago one of his friends suggested an optician that he thought could do the trick and persuaded the troubled man to give him a trial. The result was the same as before, however, and the glasses were returned. Curious about the nature of the difficulty, the friend went to the optician and asked him what was the matter. "Why," replied the latter, "that fellow wants a pair of glasses that will suit both himself and his wife."—Philadelphia Times.

Knew Them.

"I am looking for a quiet place to rest," said the tired looking man. "I think we can safely promise you all the comforts of home," assured the hotel clerk.

"Not on your life!" exclaimed the tired looking man. "I've been married nine years and have seven children."—Philadelphia Record.

Prejudiced Opinion.

"What did the poet mean when he called his country 'the land of the free and the home of the brave'?"

"He was probably referring to bachelors and married men," said old Mr. Smithers sadly.—Stray Stories.

Logic and Sophistry.

Little Willie—What is logic, pa? Pa—Logic, my son, is your line of argument in a controversy. Little Willie—And what is sophistry? Pa—The other fellow's.—Exchange.

HAWKSDALE DAIRY,

S. M. GORE, Manager.

News of the Valley.

NARAMATA.

A little girl, named Margaret Saulting, had a narrow escape from drowning at Naramata last week, falling off the wharf into the lake. She was rescued in time, however, by her father and others, who were near at the time. The Saulting family are recent arrivals from Battle Creek, Michigan.

PENTICTON.

The rate of taxation at Penticton for the year been fixed at 11½ mills for general purposes, and 3½ mills school tax.

H. V. Agnew, acting constable for Penticton, has resigned, and the council are inviting applications for the position. He is to act as constable, sanitary inspector and lamplighter.

VERNON.

The assessors, who have lately been busy in Vernon, have run against a difficulty. They are unable to locate the eastern boundary of the city. The survey posts have either rotted or been removed, and several holders of land within the doubtful area are objecting to be taxed, as they claim to be outside the city limits.

The Vernon board of works, in presenting their report and estimates for 1910, are very urgent in their request for a steam roller. "The present method employed in road-making," they say, "is grading and gravelling, which latter, owing to its being loosely spread about, becomes pushed away from where it is wanted by every wheel that passes along and and therefore is a source of continual expense each year to be replaced. On the other hand, were it rolled in by a heavy roller in the first instance, although not what we would call a permanent and properly made road, it certainly would be of a more permanent nature and would not require any more attention to speak of for at least two or three years and the money, which would otherwise be eaten up in maintenance, could be used elsewhere for good permanent work which would last for years.

ENDERBY.

The contract has been let for the fine block which the Bank of Montreal are about to build at Enderby.

Enderby city hall is approaching completion. Only the finishing touches remain to be done, and Enderby will have "as fine a municipal building as there is in the interior."

SALMON ARM.

A civilian Rifle Association has been organized in Salmon Arm. W. L. Gibbard is the captain, with Geo. W. Armstrong as secretary-treasurer.

SUMMERLAND.

A poultry association has been organized in Summerland. Mr. C. Parker was appointed president, and Mr. W. M. Wright, secretary. They are starting out with the idea of making the principal object of the association the attending to the commercial side of poultry keeping. The claims of fanciers are to be only a secondary consideration. In order to see if there are enough eggs marketed so that it would pay the Association to appoint an agent to locate and ship the eggs in Summerland, it was decided that the secretary should try to get a sort of census of the poultry in the Municipality. For this purpose poultry keepers are being asked to furnish answers to the following questions: How many eggs would you have to sell weekly if a good market was provided? How many chicks will you likely have for market this fall? What breeds have you? How many of each breed? How many laying hens do you intend to keep this winter? When will your earliest chicks be ready to market?

A cold storage plant, including packing house, also a wharf and slips will be under construction in Summerland in the course of a couple of weeks, according to Mr. T. Kilpatrick, Superintendent of this division of the C. P. R., calling for an expenditure of \$38,000. The contract for the cold storage plant has been let to a coast firm, and it will be built on the west side of the road, below the Anderson house. The wharves and slips will be located in the vicinity of the old hay wharf.

Every family and especially those who reside in the country should be provided at all times with a bottle of Chamberlain's Liniment. There is no telling when it may be wanted in case of an accident or emergency. It is most excellent in all cases of rheumatism, sprains and bruises. Sold by all druggists.

ABSOLUTE ZERO.

The Freezing Point of Helium Gas is Just Above It.

Although familiar to scientists, it is not generally known that the true zero of heat has been determined. By this absolute zero is meant a temperature which cannot get any colder, which means that no heat whatever exists or can exist at that point. This point is only about 450 degrees below the zero of our ordinary Fahrenheit thermometers or 273 degrees below the zero centigrade. To realize what it signifies a few words must be placed here defining heat itself.

Heat is caused simply by the thousands of little molecules in any body or thing vibrating very fast and thus sending out waves into the ether. When these waves strike any matter they cause that matter to become hot, as we say. Now, the faster these molecules vibrate the more heat is given out and the hotter is the body itself. The slower the molecules the colder the body. So, if a condition could be reached where the molecules did not vibrate at all, why, there could be no heat, and therefore the body would be absolutely cold. This condition of affairs is reached at the above mentioned number of degrees below our ordinary scales. It is needless to say, however, that this absolute zero of heat has never been attained on this earth, the closest ever reached by man being one degree above it. This is 272 below zero centigrade and is the freezing point of helium gas, which a German professor claims to have frozen at that temperature.

From this theory of heat a peculiar view is obtained of our bodies and articles of matter. We would find, if we had a microscope to see small enough, that every bit of matter at any temperature that we can now get is a seething mass of moving molecules and vibrating particles. One proof of this is when a metal expands on becoming warmer. If we weigh it we find that a hot body weighs no more than the same body cold, yet it gets larger, both longer and broader. To do this it must be composed of moving particles that on becoming excited get farther apart. Another proof is that liquids and gases have been forced through every solid that exists almost. Thus water has been forced through lead, sulphur dioxide through iron, etc. The computed size of these molecules is rather interesting. It is claimed that if a drop of water represented the earth the number of molecules in the drop would be about equal to the number of grains of sand in the earth.—Exchange.

Changing Her Mind.

By an unwritten law it is held to be the privilege of woman to change her mind, a license of which she rarely fails to avail herself. The German proverb has it that "women are variable as April weather." According to an old English adage, "A woman's mind the winter winds change oft." In Spain it is much the same: "Women, wind and fortune soon change, and she can laugh and cry both in a wind." The old Latin poet Catullus was of opinion that "what a woman says to her ardent lover ought to be written on the winds or on running water." Even the gallant Sir Philip Sidney wrote:

He water plows and soweth in the sand
And hopes the flickering wind with net to hold
Who hath his hopes laid on a woman's hand.

—Kansas City Star.

A High Day.

"Yassah, I suttlingly would do dat job for yo', colonel, and proud o' de chance to extingulsh nubsef. Would borrow right in on it dis minute, sah, if 'twuzn't for one thing," said a certain lopsided colored citizen who was so unafraid of manual labor that he would often fall asleep in its presence, "and dat is, sah, dat I never likes to stigmatize nubsef by working on a hollerday."

"Why, this is not a holiday," returned the would be employer.

"Yassah! 'Tis wid me, if you'll dars 'skuse me, sah. It's de university o' de day mub oldest boy was done sent to de penitency."—Freck.

Wild Animals in New York City.

It is a remarkable fact that there are always more wild animals about than any but the expert has an idea of. For example, there are within twenty miles of New York city fully fifty different kinds—not counting birds, reptiles or fishes—one-quarter of which at least are abundant, or more particularly within the limits of Greater New York there are at least a dozen species of wild beasts, half of which are quite common.—Country Life in America.

Getting Used to 'Em.

"I just have heard of the arrival of the third child in the Jones family," remarked the woman. "The announcement of the firstborn was made by beautifully engraved cards tied with tlay white ribbon, the second was by telegraph, and this third one, though a much wished for boy, was made merely by a postal card."—New York Press.

She Could Talk.

Cynicus—That girl never says much, does she? Sillicus—Why, she talks all the time. Cynicus—That doesn't alter my contention.—Philadelphia Record.

Doubted the Statistics.

"How did Harkins act when he heard he had triplets in his family?" "He could hardly believe his own census."—Boston Transcript.

Our wealth is often a snare to ourselves and always a temptation to others.—Cotton.

A Fine Home is for Sale at Rutland

Combining many of the comforts and conveniences of city life, with the pleasures and profit of an orchard home.

Eight acres first-grade soil, planted to the best standard apples, in their fifth year. School, store, post-office within half-mile, church one mile, good neighbors all around. Orchard perfectly clean, and ready for truck gardening if desired. Price, much lower than is usually asked for similar land. Terms very easy.

Also about 80 acres of bench land, unplanted. Best for early vegetables and fruit. Very cheap to quick buyer.

Apply in first instance, to

The Orchard City Record,
Kelowna, .C.

Electricity as an Aid to Plant Growth

In spite of the obstinate conservatism of the average farmer, science has done great things for agriculture, and it will do much in the time to come.

A year or two ago the London Press described what was being done under the direction of Sir Oliver Lodge to utilize electricity for reinforcing the fertility of plants.

Since that time valuable results have accrued from the further study of the problem. Weighed as a business proposition, Sir Oliver Lodge's system has justified itself, and what was tentative and experimental is now being taken up on commercial lines as a valuable auxiliary to husbandry.

Mr. Lionel Lodge, who has control of this department of Sir Oliver Lodge's work, has explained the developments of the past year or two, and the hope they afford of further progress.

"Have you ever noticed what a remarkable impulse is given to the growth of crops by a thunderstorm?" asked Mr. Lionel Lodge. "That is the effect of the strongly charged atmosphere, and our object is to supply a similar stimulus systematically. The artificial reinforcement of the electricity in the air is more necessary in the dull, cold weather than when the sky is clear and bright.

The electric current can be generated either by a small dynamo or from the nearest supply company mains, and by means of a transformer it is raised to the high pressure required (about 100,000 volts). The current from the transformer is more or less alternating; that is, it is not a steady current in one direction, but oscillating first in one direction and then in the opposite. For convenience we call the current in one direction positive and in the other negative. It is the positive current that we discharge through the network of wires above the plants.

"This field network consists of fine iron wire, the wires being spread about ten yards apart and eighteen feet or so above the ground. The wires are so fine that it is difficult to see them even when standing immediately below them.

"The action that the electrical discharge has on the plant, Sir Oliver suggests, may be considered as artificial sunshine and as in no way taking the place of manures. The richer the soil the larger the increase may be expected. With most plants on average soil, the electrified area may be expected to yield 30 per cent. more than the non-electrified. If a higher increase than this is obtained we consider the results

good and if lower poor. On rich soil much better percentages have been obtained. The power required is quite small, and many of the installations at present working are in unskilled hands."

Beverington Hall Farm, in the Eveham Valley, where Sir Oliver Lodge first entered into collaboration with Mr. J. E. Newman and Mr. R. P. B. about five ago, remains the principal experimental station. But several of Sir Oliver Lodge's plants have been laid down in some parts of the United Kingdom and in Germany with successful results.

Feeding the Lawn

Nine people out of ten who complain about patchy lawns are those who have never fed the grass. If you are to get the best out of any costly lawn, you must get ten pounds of nitrate of soda at a local seed store. Don't put the dry nitrate on the growing grass but use it on the bare spots. Then water the soil and in a week you will be astonished and delighted. Persevere and you will take pride in your lawn and a new interest in gardening.—*Garden Mag.*

How to Plant a Tree

Just a few simple directions for planting if carefully followed are sufficient:

(1) Dig a hole large enough and deep enough to accommodate the roots without cramping. Allow so that the tree will sit one inch lower than it did before.

(2) Place the top soil on one side of the hole; on the other the poorer subsoil. If the top soil is very poor, get some good, rich, black soil.

(3) Place good soil in the bottom of the hole.

(4) Put the tree on this layer spreading the roots out carefully.

(5) Shovel over the roots rich soil. See that it goes in between the roots. Don't be afraid to use your fingers for this work.

(6) The poorer soil goes on top.

(7) Tramp the soil down with your feet, making it firm about the trunk.

(8) If the planting comes late in the warm weather make the soil into a soft mud with plenty of water, in this form washing it in between and about the roots, so all roots and rootlets come in direct contact with the mud.

(9) Last of all cut the tree back, shortening the larger branches about one-quarter their length.

There are few good reasons why transplanted trees die. Bruised and cramped roots, soil loosely put in and not packed about the roots, insecure and careless planting, too little pruning, these are the usual causes of disaster.

Stumping Done with Acids

A discovery of great importance to owners of cut over lands has been made by one of the workers in a Rhineland paper mill, who noticed the destructive action of nitric acid and sulphuric acid on woody structures.

This man has recently removed the stumps from sixteen acres of new land at a cost of four cents each and five minutes labor for each stump. His method is as follows:

With a two inch auger he bores a hole down into the stump about two feet deep, and pours into this hole one pint of a mixture of equal parts of nitric acid and sulphuric acid. He plugs the hole tightly with a plug previously dipped in melted paraffine.

Thirty days later the stump, roots and all, will be a charred mass of rotten pulp, and may be spread over the soil with a shovel, as a fertilizer.

Do You Know THAT Westbank

real estate investments are the best in the Okanagan in quality of soil, location, prices, etc., and that they will triple in value in one year? Have you stopped to consider? If not, just remember that Westbank will be the largest, most industrious, and influential place in the valley. Now is your opportunity. Most excellent bargains. The lots are cleared, cultivated, fenced, and have young orchards on them; well irrigated, and have good domestic water. Prices, \$175 to \$200 per acre. Other most valuable land bargains \$25 per acre up.

Investigate Your Health!

There are so many things to occupy our attention that we frequently forget about our health. It would be a good plan if we would all go to our physician each spring and fall and find out whether repairs are needed.

We can all tell something about it if we would stop to think. Custom says that blood purifiers are needed in the spring. They can't harm. They will certainly do some good, and may do much good.

Our Spring Sarsaparilla

is a dandy. Every bottle is guaranteed.

- Provincial and General News -

Heavy Damage to Fruit Growers.

The cold snap in Iowa has already caused loss to fruit and vegetable growers, estimated at more than \$5,000,000. Cherries and plums have suffered severely. Garden truck can be re-planted, thereby minimizing this loss.

Died on Duty.

Provincial Constable A. W. Lane, one of oldest and most reliable members of the British Columbia force, dropped dead from heart failure on C. P. R. train No. 307 at Mission last week. Reliable and trustworthy to the last, Lane, even with the weakness of death creeping over him, held to a struggling, drink-maddened prisoner with whom he had been tussling for over ten minutes, relinquishing his hold only when life was practically extinct. George Kenty, the dead man's prisoner, who had been working in a B. C. Electric railway construction camp in Abbotsford, boarded the train in a drunken and disorderly condition and with another man, William Duffery, was responsible for considerable disturbance on the car. It was while attempting to reduce the two quarrelling men to order that Constable Lane overtaxed his weak heart and death resulted.

800 Sheep Burnt.

A. Green, a sheep rancher in the Chin Coulee district, lost 800 sheep in a recent prairie fire. The amount of his loss is \$10,000. Wm. Taylor, another rancher, also lost heavily.

To Prohibit Long Skirts.

An ordinance to prohibit the wearing of long dresses on the streets of Boulder, Col., was introduced in the city council last night. It provides that "it shall be unlawful for any person whose wearing apparel or skirt shall be of such length as to trail on the ground and become a dust-sweeper or otherwise obnoxious to the public health and refined taste to appear upon any sidewalk in this city." The document is entitled "An ordinance to promote public health and concerning displays upon the sidewalk," which was interpreted by one of the aldermen to mean that "if the council intend to define the length of skirts one way it must also define it the other way." The ordinance was urged by the Women's club.

C. P. R. Telegraph Office Seized for Debt.

The Commercial Telegraph office of the C. P. R. at Regina was seized last week by the sheriff for arrears of taxes, and a bailiff put in charge. This action is the result of the difficulty experienced by the city in enforcing payment by the company of the floor space and business tax, which according to legal advice tendered to the city, the company is liable to pay on its uptown commercial telegraph office. The total sum claimed by the city is \$433.30, being three years' arrears of taxes. The company claim exemption under its general exemption clause, and the case will, in all probability be finally fought out in the courts. Similar proceedings will also be taken against the Dominion Express Co., which like the C. P. R. has refused to contribute to the city's exchequer.

Chamberlain's Stomach and Liver Tablets assist nature in driving all impurities out of the system, insuring a free and regular condition and restoring the organs of the body to health and strength. Sold by all druggists.

Automobile Bank.

The latest use to which the automobile has been put is that of a travelling bank. It is in use in England. The back of the machine is fitted up similar to a receiving teller's window, and the auto has regular stopping places, where people can deposit their money.

Sir Wilfrid Laurier to Make Tour of the West.

Sir Wilfrid Laurier promised a deputy of Liberal members from Western Canada that he would spend two months on a political tour of the west during the coming summer. Since 1896 the premier has not visited the western half of the Dominion owing to the exigencies of constant demands on his time at the capital, coupled with three imperial conferences and other public missions during parliamentary recesses. Sir Wilfrid will probably take with him during his tour two of his colleagues, the Hon. Messrs. Graham and Fielding, and public meetings will be held at all the principal points in the west. The date has not yet been definitely fixed, but the tour will probably take place during July and August.

Moosejaw to Have Street Cars.

By an overwhelming majority of 381 in a total vote of 429 the ratepayers of Moose Jaw authorized the city council to grant a street railway franchise to a syndicate of Ottawa capitalists. Although less than one-third of the property owners were represented at the polls, the vote is by far the largest ever recorded on any by-law and the result of the polling is regarded as highly satisfactory by the citizens generally.

Letter Telegrams.

For the convenience of business men and also no doubt for the purpose of making the telegraph lines pay better by using by night as well as by day, the new system of letter-telegrams has been begun and has immediately taken its place as a benefit. This new movement means that a telegram of 50 words may be sent at night for the same price as 10 words now go. The chief business of this kind has so far been between the large American cities of New York, Boston, Chicago, St. Louis and New Orleans. When the message arrives at night it is at once sent to the nearest post office and the receiver has his telegram on the opening of the post office in the morning.

Asaya-Neurall

THE NEW REMEDY FOR

Nervous Exhaustion

Whipping an exhausted nerve system with alcoholic stimulants only shortens the road to physical collapse. The only remedy is Food, Rest and nerve repair. "ASAYA-NEURALL" is and makes possible this cure. It feeds the nerves, induces sleep, improves the appetite and digestion; and soon full nerve vigor is regained. \$1.50 per bottle. Obtain from the local agent.

P. B. WILLITS.

A VINDICTIVE KNIFE.

The Weapon That Tried Several Times to Kill Kipling.

My mind has flown back down the years to London and into the large corner room on the second floor, Villiers street, Embankment Gardens. On the wall fronting the Thames hangs the most vicious looking knife I have ever seen. It is serpentine in shape, and its downward point is as sharp as a needle.

"What a villainous weapon!" I said. "Yes," replied Kipling, and I forgot the name he gave it or the section of India from which it came. "That knife has tried to kill me several times. It's always on the watch. When I got it there was affixed to it, like a button on a fob, one joint of a man's backbone. The knife had been run into the vertebrae, given a savage twist and brought away with it a piece of human framework."

As he spoke he approached the glittering, snake-like knife.

"Don't touch it!" I cried. "You ought to keep it in a locked box."

He didn't touch it, so far as I saw, but as he raised his hand the knife dropped like a plummet and stood quivering in the floor within an inch of his foot.

"Look at that!" he said and stood there without moving a muscle until I saw how nearly the sinister blade had come to impaling his foot. — Robert Barr in London World.

A CONVERT.

He is Now a Firm Believer in Psychic Phenomena.

"Do I believe in the occult? Sure, I do," said the suburbanite as he settled down into his seat in the smoking car and filled his pipe. "I was just as great a skeptic as you are until a week ago. I was firmly convinced that table manipulation was a fake, that mind reading was pure guess-work and that all alleged psychic phenomena could be attributed to natural causes. But now I'm willing to accept the entire propaganda. Nothing is too obscure for me to accept on blind faith. I've experienced a complete change of heart, as they used to say in the old camp meetings."

"You see, it was this way. My friend Buggins, who is really a bug on the occult, induced me to go to a seance with him the other afternoon and prevailed upon me to have a sitting. In spite of my nonbelief he said I was a good subject, and I guess I was. The lady who was delivering the soul fluid told me I should have trouble with a stout, dark woman. All the way out on the train that evening the idea haunted me. I couldn't get it out of my head."

"And, say, she was right. What happened? Why, when I got home I found myself up against the proposition of firing the colored cook. Sure, I believe in the occult. Got a light?"

W. C. T. U. Notes.

Conducted by the Ladies of the Kelowna branch
of the W. C. T. U.

The W. C. T. U. meet every second Tuesday of the month at the home of one or other of the members. Visitors are always welcome.

Thirteen Reasons for Total Abstinence.

1. Intoxicating beverages are unnecessary. Many persons live in health and labor in the hardest occupations without them.
2. These liquors are dear. They are in themselves, and in comparison with other articles of diet. Ardent spirits are destitute of nutritive qualities; while wine, beer, and cider contain an exceedingly small portion of nourishment. In a gallon of ale there there is about as much as a pennyworth of bread.
3. Intoxicating liquors weaken the mind. They are enemies put into the mouth that steal away the brains.
4. They always endanger the character and often ruin it. They inflame the imagination, appetites and passion. Through their influence multitudes have plunged into guilt and eternal destruction; and even some wise and good men have, for a season, been covered with shame and de-filement. Witness Noah and Lot.
5. It enlarges and multiplies our jails, poorhouses, hospitals and lunatic asylums. This is certified by our judges, magistrates, physicians, chaplains of prisons, and other competent and reliable authorities. It means a great extension of crime and misery, as well as a large augmentation of taxes.
6. The general practice of temperance would help to fill our schools and places of worship. Sobriety is likely to lead to thoughtfulness; and in that, in connection with better clothes and more comfortable homes, will result, by the Divine blessing, in the attendance at the house of God of many who were formerly absentees.
7. Personal abstinence gives us more influence over drunkards. They are far more likely to sign the pledge and keep it when advised by those who, distinguished by sobriety and religion, have also set example of nephalism, or avoidance strong of drink.
8. It tends to fill the treasury of the Christian Church and to raise its spiritual character. In nearly all sections of it, funds are constantly being wanted to carry on the moral machinery. Backslidings and expulsions, too, are continually occurring throughout Christendom, owing to strong drink.
9. As a pioneer, temperance hastens the conversion of the world. Means sufficient for universal evangelization would be provided, the minds and hearts of Christians improved, the number of earnest workers multiplied, and in other ways the grand consummation would be accelerated.
10. It would vastly aid in multiplying the inhabitants of heaven. In the case of many, it has been and will be a stepping stone to Christ and eternal life.
11. It increases the joy of angels. The repentance of a sinner always swells their gladness, and the abandonment of strong drink is often first stage of a prodigious reformation.
12. It undermines the throne of Satan. When delivered from the demon of intemperance, many escape altogether from the thralldom of the great slave-master.
13. It glorifies God. His honor is necessarily promoted by the diffusion of purity and happiness.

THE PUMA AND ITS PREY.

Base With Which a Patagonian Lion Killed a Colt.

The puma is so fond of horseflesh that in Patagonia it is difficult to breed horses, as the colts are killed by this American lion. A native told the author of "The Naturalist in La Plata" that on one occasion while driving his horses home through a thicket a puma sprang out of the bushes to the back of a colt following behind the troop.

The puma alighted directly on the colt's back, with one fore foot grasping its shoulder, while with the other it seized the head and, giving it a violent wrench, dislocated the neck. The colt fell to the earth as if shot.

Next to horseflesh, the puma prefers mutton. He does not like veal, although he will kill a calf upon occasion. A cunning puma which on cloudy nights raided a sheep ranch used as a place of concealment the pen where a dozen calves were kept while it was waiting to attack the sheep, but it did not injure a calf.

Pigs when in large herds defy the puma by massing themselves together and presenting a serried line of tusks. The ass also resists successfully the puma's attack. When assaulted it thrusts its head between its fore legs and kicks violently until the puma is driven or thrown off.

One day an Indian while riding saw a young cow watching his approach. Her manner showed that it was in a state of dangerous excitement, and the Indian conjectured that some beast of prey had killed its calf. He began searching for the calf's body. While thus engaged the cow repeatedly charged him. Presently he discovered the calf lying dead among the long grass and by its side a dead puma with a large wound just behind the shoulder.

The calf had been killed by the puma, for its throat showed the wounds of large teeth. The cow had driven one of its long, sharp horns into the puma's side while it was sucking the calf's blood.

SLOW NEW YORK.

It Actually Made the Hustling Western Barber Sleepy.

"Why, say," said a visiting barber from the wide untrammelled west, "you folks here in New York are narrow, limited, shackled, contracted, far behind the age. You think you are the human limit when really your gait is very slow."

"I went into one of your shops here yesterday. Nice shop, good equipment, everything fine and elegant, but when I saw how slow you were here on the work it made me nervous. A good plant, but not worked to capacity."

"They had a man in a chair with a barber cutting his hair and a manicure fixing his hands and a bootblack blacking his shoes all at the same time, and I suppose you think here that that's going some to have three people work on a customer all at once, but, goodness me, you ought to look into my shop and see how we do things in my part of the country!"

"I've got a shop that's every bit as modern and up to date to the last limit as anything you've got in New York, but out there we utilize our plant. What do you suppose we do when a man comes in that's in a hurry to catch a train? Think we all lie down and take a nap?"

"Why, we put one barber to cutting his hair and another to shaving him, and two manicurers tackle his hands, one on each side. We take off his shoes, and two boys work on them, each blacking a single shoe, while two chiropodists get at him, each taking a foot, and at the same time we have one boy brushing the customer's hat and another brushing his overcoat, while another dusts the clothes he's got on with a vacuum duster."

"You put three people on a man at once and think you're doing something. We put on eleven and think nothing about it at all, and our town ain't a quarter as big as New York—not a quarter."

"Why, honest, this New York atmosphere makes me sleepy!"—New York Sun.

An Old Machine.

The Tubingen Morgenblatt of Oct. 31, 1829, contains a description of such a machine as then in use in the London coffee house. It was in the shape of a tobacco jar, which stood on the table and had a slot into which a penny had to be inserted to obtain a pipeful of tobacco. The weight of the coin depressed a lever and released a lock. The writer adds that a halfpenny would not do the trick, and the would-be cheat could not recover his money. —London Notes and Queries.

The Judge Agreed.

It is recorded that Lord Mansfield, the famous English judge of the second half of the eighteenth century, listened impatiently to an argument of Sir Fletcher Norton upon a case involving certain manorial rights.

"My lord," said Norton, who was insufferably dictatorial, "I can instance the point in person. I have myself two little manors."

"We are well aware of that," responded Lord Mansfield, seizing his opportunity.

Caution Extraordinary.

"You have a night key?"
"Of course," answered Mr. Meekton, "only I'm so careless that Henrietta keeps it locked up in the safety deposit so that I won't lose it."—Washington Star.

After Their Quarrel.

Mabel—Of course you speak to Lena when you pass her? Helen—Indeed, I do not. Why, I don't even notice what she has on!—Pack.

Town and Country News.

The irrigation flume on Glenn avenue and in front of the new Presbyterian church has been repaired during the week in readiness for the turning on of the water as soon as it may be needed.

The current issue of the Gazette contains a notice of the appointment of "Benjamin de Furlong Boyce, of Kelowna, to be coroner within and for the province of British Columbia."

The same issue also announces the incorporation of the Oak Hall Clothing Co., Ltd., with the capital of \$20,000.

The communion will be dispensed in the Presbyterian church next Sunday morning. A preparatory service will be held on Friday evening at 8 o'clock. At the Ben-voulin church the communion will be dispensed in the afternoon, and the preparatory service will be held to-night (Thursday).

Mr. Geo. Fraser is back for a few days from Penticton.

Mr. and Mrs. J. Gibb returned Thursday from a visit to Armstrong.

Miss McNaughton has been elected vice-president of the Okanagan and North Kootenay Teachers' Institute, recently organized at a convention in Nelson.

Mr. Robert Duff has gone to Summerland to take a position with Taylor & Co.

Mr. and Mrs. Archibald arrived last week from Truro, Nova Scotia. Mr. Archibald has taken a position with Mr. I. Chamberlain, the blacksmith.

Mr. Kilpatrick, of the C. P. R., called here Saturday on his way north from Summerland, where he has been in connection with the big wharf and track undertakings which are to be carried out there.

Mr. Sweeney and family moved out from Glenn avenue Monday to South Okanagan, having rebuilt their house which was destroyed by fire during the winter.

Mr. H. Willits, brother to Mr. P. B. Willits, arrived Monday from Brandon. It is his intention to permanently locate here, having taken a position with the Oak Hall Clothing Co.

Mr. F. R. E. DeHart returned last Friday from Enderby.

Mr. A. R. Muirhead came in on Saturday morning's boat after his journeyings up and down the lake. He reports things getting busier each day. An enormous amount of improvement work is in progress all through the Okanagan, and labor is hard to get.

Mr. Chas. Hardie, of Armstrong, is amongst the visitors, to town this week.

Dr. Mathison will be in Summerland until May 15th.

Prompt relief in all cases of throat and lung trouble if you use Chamberlain's Cough Remedy. Pleasant to take, soothing and healing in effect. Sold by all druggists.

Frank Bawtinhimer, Manager.

The 91st Anniversary of the order of Oddfellows was celebrated in Kelowna by a special service at the Knox Presbyterian church. The members and visitors from other points, numbering in all about 70, assembled in the Lodge room in Raymers' hall at 10.30, and from there marched to the church in procession. The "Maud Moore" made a special trip in the early morning from Summerland, bringing members from that point. One side of the church was reserved for the party, and the congregation was a large one, extra chairs having to be placed in the aisles. A special service had been arranged, and the music included a finely rendered male quartette by Messrs. Davies, McKenzie, McFarlane and Hill, a solo by Mr. T. Hill, and also an anthem by the choir. The preacher was the Rev. Jas. Hood, of Summerland, he being assisted by the Rev. M. Pike, of Rutland. The church was very tastefully decorated with flowers and presented an attractive appearance. From the offertory the Hospital will benefit to the extent of about \$30. After the service the members returned to dine at the Lakeview Hotel, the visiting brethren making the return trip down the lake in the evening.

Rev. Jas. Hood, who preached at the Presbyterian church for the Oddfellows' anniversary service, returned to Summerland Monday afternoon.

Miss Gertie Sutherland, the daughter of our mayor, has been ill with tonsillitis, but is now happily improving.

Mr. Jack Sewell, who has spent the winter in Vernon, returned last week to his position at the Farmers' Exchange.

Messrs. D. Watson, Hogg, Logie, and Phinney were amongst the Summerland Oddfellows who were present at the Anniversary service last Sunday.

Mr. Archie Kay, of Nelson, is at present staying in town. He is a member of the Oddfellows' lodge at that point.

Mr. Jas. Bowes and H. C. S. Collett returned Monday from Vancouver, where they have been visiting the Horse Show.

Mrs. D. J. Welsh will give an address in the Baptist church on Tuesday evening, May 3rd, under the auspices of the Women's Mission Circle, on the subject "Pandita Ramaibai," or "the story of India's most wonderful woman." The public are cordially invited. An offering will be received in the interests of the women's work.

Mrs. Smith, of Hedley, who has been visiting at Hall's, returned Tuesday.

Mr. W. Haug paid a visit to Summerland Tuesday.

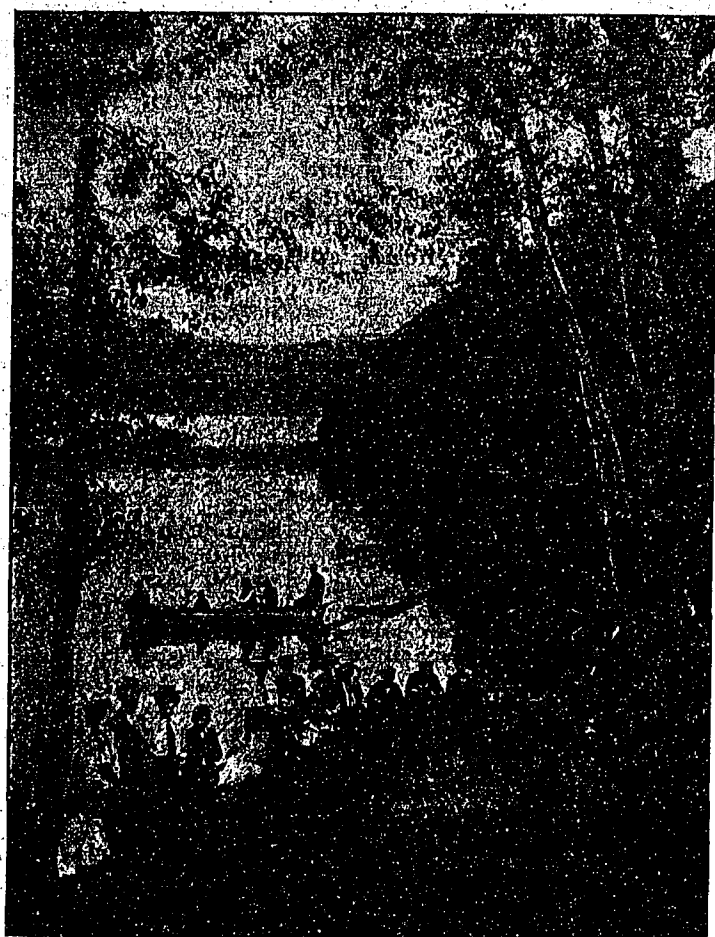

We hear that a good many people in town are setting their alarm clocks to rouse them from their slumbers at the unusual hour of half-past three in the morning. The object of this is to catch a glimpse of Halley's comet, which is said to be visible (personally we cannot say whether it is or not) just as the sun rises.

The Juvenile Bostonians are billed to appear at the Opera House on Tuesday, May 10th. They are coming to Kelowna under the auspices of the city band. These young musicians form a decidedly novel feature, and should prove a strong draw.

The past few days of exceptionally fine weather have given to certain orchards and gardens around town an almost fairy-like appearance. The rich profusion of blossoms of various shades call forth exclamations of admiration even from those who have been here for years, and are in a measure accustomed to the sight, though in the opinion of everyone, never was the blossom so plentiful nor the promise of abundant fruit so great.

Mr. Frank C. Knight returned home to Winnipeg last week. Archie Knight went with him to take up a position in that city. A number of friends of the family dropped in to say goodbye.

Diarrhoea should be cured without loss of time and by a medicine which like Chamberlain's Colic, Cholera and Diarrhoea Remedies not only cures promptly but produces no unpleasant after effects. It never fails and is pleasant and safe to take. Sold by all druggists.

Pic-nicing at one of the many beauty spots on the Okanagan Lake.

KELOWNA

The Orchard City
of British Columbia,

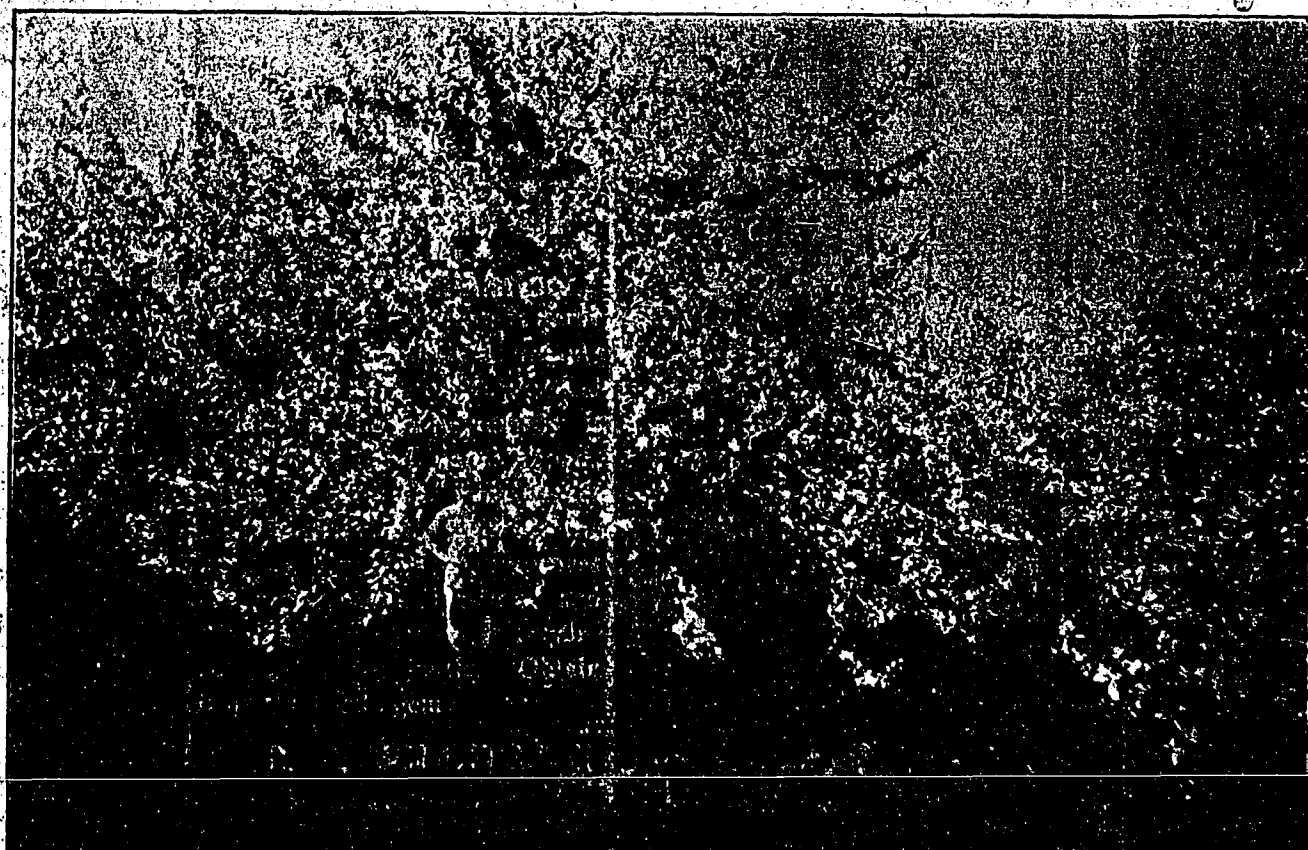

Is credited with more winnings in open competition with fruit from all parts of the American continent, than any other city in B.C.

There cannot be a more desirable spot than Kelowna and district for the man who wants to let up a little on the hard toil of the prairie, or to the family looking for a more congenial spot to settle in, where life's necessities, together with a few of its luxuries, will not take so much of the sweat of the brow in the winning.

Come in out of the cold and the wet. Enjoy the Sunny Okanagan's long beautiful summer whilst making your little pile, with the comfortable assurance that you will not have to suffer through a long, cold, tedious winter. There is no winter here as a prairie man understands it, the thermometer rarely going down to zero.

A few figures from the Kelowna Board of Trade Booklet:

4 acres of onions realized \$2550.00
1 acre of tomatoes sold for \$1000.00
½ acre of strawberries realized \$626
10 acres of potatoes yielded 200 tons and sold for \$2800.00
½ acre of crab apples realized \$500
1½ acres peas sold for \$1420
10 acres four-year-old peaches sold for \$300 an acre on the trees
1½ acres of prunes yielded 25 tons, and sold for \$1125.00
19 acres of mixed orchard produced fruit which sold for \$9000.00

DOLLARS IN SIGHT AT KELOWNA.

Tobacco Growing

Has, during the past few years, steadily forged to the front as one of the most profitable industries in and around Kelowna. Inexperienced growers can easily net \$100 to \$150 an acre. From \$35 to \$80 per acre is made by letting the ground on shares. All the leaf that can be raised here will be handled and cared for locally.

Many important projects are under way or materializing in and around Kelowna, and a very large amount of capital is being introduced into the Valley. Land is steadily increasing in value, and property which two years ago sold for \$50 an acre, to-day fetches \$100 to \$150 per acre. The same when planted out to orchard realizes not less than \$300 per acre, and in three years more all the way to \$1000 per acre.

For further particulars, and descriptive booklet, apply to

The Secretary, Kelowna Board of Trade,
KELOWNA, B.C.

KELOWNA OUTFITTING STORE,

W. B. M. CALDER, Prop.

The annual meeting of the Epworth League was held on Monday evening in the Methodist Church. The following were elected for the for the next term: pres. G. F. Clark; first vice-pres. L. Dilworth; second vice-pres. Miss Anderson; third vice-pres. Miss Martin; fourth vice-pres. Mrs. Dilworth; fifth vice-pres. Mrs. G. F. Clark; sec'y. J. H. Mohr; treas. Miss M. Thompson; organist, Miss B. Thompson.

The Epworth League donated \$20 to the Benevolences of the Church and \$25 to Missions. The League expressed their hearty appreciation of the services of the retiring officers.

The Jessie Mc Lachlan concert is coming off on May 16th and James Fax Co. on the 31st. Don't forget the dates.

Juvenile Bostonians

Calgary, Alberta, "Albertan" says of the Juvenile Bostonians who appear at the Opera House, May 10th.

The Juvenile Bostonians have always been great favorites with Calgary audiences, and their return engagement, which commenced recently at the Lyric theatre was no exception to the rule.

In presenting "Berta's Billion" music lovers of light opera who were fortunate enough to be present, enjoyed a treat.

The Bostonians are this season composed of twenty-two clever little girls between the ages of 12 and 18 years. She has a style of their own in rendering comic songs, which is both sweet and funny, and she gets the audience every time.

Edith McClure, taking the part of Heinrie, who plays the role of lover to Berta, is a charming little actress. She proved a success last evening in singing, especially her Swiss Yodel. Hattie Hellen also deserves mention for playing the gentleman role of Tom Horton.

A Timely Suggestion

This is the time of the year when the good housewife is busy house-cleaning. They say it is a necessity once a year anyway, and even then, with the best of care, things won't last for ever, and have to be replaced.

Now how about the time-pieces in the house? They require looking into and examining some time. As a rule they are the last things thought of. If your watch, clock, or jewelry needs repairing, bring it to me and I will put it in first-class order.

WALTER M. PARKER

WATCHMAKER & JEWELER
Bernard Avenue.

All work and goods absolutely guaranteed.

WOMEN'S BEAUTY

It Can Never Be Perfect Without Luxuriant Hair

A head of luxuriant hair is sure to be attractive. But nature has not crowned every woman with glorious hair. Some very lovable women she has treated rather scantily in this respect.

For instance, there are tens of thousands of women in Canada to-day, who have harsh, faded and lusterless hair, who are unattractive simply because they do not know that nowadays even the whims of nature can be overruled by the genius of science.

If you are a woman without beautiful hair, do not permit your attractions to be hidden because of this slight misfortune.

Go to-day to P. B. Willits & Co. and buy a large bottle of Parisian Sage for 50 cents, use it each night, and you will notice the harsh, repulsive hair disappear, and in its place will come soft, silky, bright, and luxuriant hair.

Parisian Sage is guaranteed by P. B. Willits & Co. to cure dandruff, itching of the scalp, and stop falling hair in two weeks, or money back.
