65 CENTS.

C. B. Hume & Co.

LIMITED.

THE WAR.

Another Battle—The Russians Again Defeated.

Shanghai, June 23.—Probably the greatest battle yet fought on Liao Tung peninsula has just taken place, the main armies of General Kuropatkin and General Kuroki having been engaged.

The principal fighting was in the vicinity of Haj Cheng and there are reports of severe reverses and heavy losses to Russians.

Kuropatkin is commanding personally, but is being compelled to retreat rapidly.

St. Petersburg, June 23.—An immense battle at Liao Tung is admitted at the war office. General Kuropatkin will endeavor to prevent a juncture of the Japanese armies.

Berlin, June 24.—On June 22nd the Japanese occupied Kai Chou. A decisive battle of the united armies of Generals Oku and Kuroki with the Russian main army is expected shortly.

Tokio, June 24.—General Kuroki reports that one regiment of infantry, two regiments of cavalry, and one battalion of artillery from Samachi attacked the Japanese detachment garrisoning Ai Yang on Wednesday. The Russians were repulsed and Major Kabotao killed on the Russian side.

Montreal, June 24.—St. Petersburg says today's news from the theatre of war indicates General Kuropatkin will not give battle to the combined armies of Generals Oku and Kuroki. Doubt is now cast upon the impression prevailing for several days that the bulk of the Liao Yang army has been advanced southward. General Kuropatkin is concentrating his forces New Hai Cheng. They know at the war office General Kuropatkin has no intention of seriously contesting the Japanese advance on Kai Chou, which would seem to carry with it the decision practically to abandon the peninsula to the enemy and as a necessary consequence the withdrawal of the Russian troops from Niu Chwang.

A despatch from General Kuroki's headquarters says the Japanese right flank is opposed by Russian cavalry whose operations are made almost impossible by the mountainous country.

DOMESTIC TRAGEDY.

Man Shot by His Own Son.

Saskatoon.—A man named Stewart, has been shot by his young son. The father started beating his wife, and the boy, maddened by his mother's screams, got a shotgun and put the whole charge into him. Stewart died at once.

NEW COMPANY.

W. M. Lawrence Hardware Company Organised—Handsome Brick Building to be Erected.

W. M. Lawrence has incorporated his hardware business as a joint stock company with a strong directorate. Mr. Lawrence, who is one of the best and most popular business men of the city, will still continue to manage the business. The company will take over the hardware stock of C. B. Hume & Co., Ltd., who are retiring from this branch of the business.

The company have purchased from W. M. Newman his lot on the west side of McKenzie Ave., and will erect thereon a substantial two-storey building of stone and brick. The building will have a frontage to McKenzie Ave. of 50 ft. W. T. Dalton, architect, of Vancouver, arrived today to arrange for preparing plans for the block.

SPORTS.

Lacrosse.

Revelstoke defeated Vernon on Wednesday by 8 goals to 2. The News says the Revelstoke boys played an admirable combination. E. S. Jackson captained Vernon, D. G. McKenzie Revelstoke.

The Races.

The Revelstoke Turf Club's program for July 1st and 2nd consists of a two days meeting, of four events each day, and $800 in prizes.

In all races, except No. 3, entrance is 5 per cent. of purse. In heat races any horse distancing the field is entitled to 1st money. Entries close at 6 p.m. on evening preceding the race. The races will start at 1.30 p.m. sharp each day.

The first day's races will be held on Second street from Revelstoke Brewery to Hume's warehouse.

The second day's meet will be held in the lower town on same course as used on May 24th. It has been arranged for the Revelstoke Band to be in attendance.

On the first night of the races an entertainment and dance will be held in the Opera House, under the auspices of the band assisted by the Dramatic Society in a comedy drama, "Strife."

The committee which has undertaken the organization of a two days race meeting has met with wonderful success in the support obtained from the citizens. The subscriptions will enable the committee to offer the handsome prize list of $800, which, for the first races meeting in the city, is exceedingly good. Several residents have obtained good horses which they are training, and from advices received a number of horses will be brought in from outside points. Large numbers of people who love a good horse race are coming from outside points, and the committee expect to give Revelstoke the liveliest Dominion Day celebration the city has seen for some time.

The fact that W. Cowan is secretary treasurer of the racing committee is a guarantee that the programme will be conducted in first-class shape.

Mack's Headache Wafers Make Friends

Who is more grateful than a person quickly relieved of a nerve racking, torturing, work-preventing headache? The trial of Mack's Headache Wafers is enough to make you their staunch friend.

Getting rid of a headache is an easy matter when you have them to depend on.

You not only use them yourself but tell your friends about them—an endless chain that has created for these Headache Powders a large sale. Enough for nine headaches, 25c.

FIRST STREET.

THE WAR.

Japanese Transport Sunk—The Vafangow Fight—Russians Lost 6,500 Men—Naval Engagement Reported—Japs Capture Port Arthur Fort.—Compliment To Japs—Russians Entrapped In Ravine, And Lose 1100 Men.

Tokio, June 19.—1 p. m.—The Japanese transport Izumi, which was reported missing a few days ago, was sunk by the Vladivostock fleet off Oshima island.

Liao, June 18.—The Japanese continued to press the Russian forces returning from the battle of Vafangow on the night of June 16th. They had remained at Vafangow all day, and at night persistently pushed forward and tried to get around the Russian right wing, which had borne the brunt of the fighting the previous night. A terrific thunderstorm burst at night rendering the roads almost impassable and the movement was not accomplished. The Russians, therefore, were enabled to retire gradually to the north.

Further details of the fighting on June 15th show that the Russians advanced on the Japanese position, when it was hoped that Gen. Baron Stakelberg would drive back Gen. Nobzu's army, was

A MOST BRILLIANT AFFAIR.

Soon after dawn, the Japanese were discovered in strong force on a hill north of Dyai Wo. The infantry was well entrenched and supported by the artillery. The Russian left was thrown forward with reserves to clear the hill. They had a little over a mile of open country to cross, their only covering being two small hills and two shallow valleys. The Japanese concentrated a deadly fire as soon as the Russians reached the open. The Russians formed in open order and rushed from point to point, taking advantage of every depression in the ground, dropping and firing, then advancing again until they gained a hill, where they halted for a breathing space.

The Japanese threw shrapnel over the hill, which

BURST WITH DEADLY EFFECT.

Some squadrons had every officer killed and half of the men wounded. In spite of the terrible punishment inflicted, the regiment gained the hill.

The sixth company of the third regiment got to within twenty paces of the Japanese entrenchments, and lost all their officers and half their men. The men lay panting under the Japanese trenches and out of range of their regular fire. They stretched themselves over the trenches and fired. The Russians greeted the hail of shots with chaff and the Japanese, angered at their inability to dislodge their attackers threw stones at them.

The battle at this point became a hand-to-hand fight with stones and gun butts, and the remainder of the Russians, taking advantage of this diversion, gained the shelter of a neighboring ravine, but were unable to hold the position in face of the hail of shells and shrapnel concentrated there by the Japanese batteries. The Japanese heavy guns silenced the artillery supporting the Russian attack. Thirteen Russian guns were

SMASHED TO ATOMS

and their horses killed. A majority of their gunners were killed or wounded. The remainder of the artillery retired to Vafangow.

The Japanese at this moment delivered their main attack. A whole division was thrown against the Russian centre, and two divisions around the right flank. The hard pressed right held out until 11 o'clock in the morning, when two regiments rushed to its assistance. The whole force then advanced, cheering, and actually rolled back the Japanese advance, but Gen. Nodzu poured in fresh troops, regiment after regiment. The Russian commander saw that he was being enveloped, and retired in order.

The Russian losses at the battle Vafangow are turning out to be heavier as the reports of various regiments come in. They are now placed by a conservative officer at four thousand, but an authority expects the total to see no less than 6500.

Tokio, June 20.—It is reported that Vice-Admiral Kamimura is engaging the Russian Vladivostock squadron off Osima. The navy department has no confirmation of the report but hopes that it may be true.

Chefoo, June 20.—There is current here a Chinese rumor that the Japanese have captured one of the inner forts of Port Arthur, losing 1000 men in the engagement. It cannot, however, be confirmed.

Simuchen, June 21.—In the battle of Vafangow the Japanese used lyddite with deadly effect, sweeping the whole battle field.

In turning the Russian right, the Japanese suffered tremendous losses, one battalion being annihilated.

New Chwang, June 20.—A Russian officer who was wounded in the battle of Vafangow, told a press correspondent that the losses on both sides were heavy. He placed the Russian casualities at at least 7,000. He says no soldiers in the world could withstand the Japanese as they had been fighting lately. Their artillery, he claims, is marvellously effective.

THE VAFANGOW FIGHT

Tokio, June 20.—Further reports received here show that the blow inflicted by Gen. Oku on the Russians in the fighting at Vafangow on June 15, was more severe than at first believed. The number of Russians killed in this battle will probably exceed 2,000, and their loss including prisoners is estimated at fully 10,000. The Japanese losses are less than 1,000. Up to June 17, Gen. Oku had buried 1,516 Russian dead, and reports that many more dead have been found. Chinese who watched the fighting from the Russian side report that the Russians removed many dead to trains with their wounded, and that they buried or cremated many corpses in the village of Hua Sung Kou before they retreated. The number of prisoners and trophies taken by the Japanese is increasing.

London, June 22.—A despatch to the Daily Mail says while a Russian force of 8,000 under Gen. Kondradovitch was traversing Wafangko ravine, nine miles southeast of Kai Chou on June 19, it was surprised by concealed artillery. The Russians lost heavily, their casualities being 1,100 in number.

MINER KILLED.

Fell 200 ft. to Death.

Rossland, B. C., June 20.—Straight on his head, Alexander Pinkerton fell 200 feet in the Centre Star mine and was instantly killed. The fatal plunge was from the 500 to the 700-foot level.

GREAT NORTHERN MINES.

W. B. Pool's Statement.

"At Poplar creek," says Mr. Pool, "we are thinking of calling off all of our men at work there. This is because we seemingly cannot get the adverses against the Lucky Jack before the court. Two weeks ago we brought down from the Lardeau, at considerable expense, a number of witnesses, and the cases were postponed. Now we cannot even get a definite time for the trial of the case.

"Things are looking exceedingly well at Poplar, too. On the Swede group we have struck a new showing of quartz and arsenical iron that shows up wonderfully well, and if it goes down as arsenical iron usually does, it will make a mine in itself. The new find is located on the Gold Hill, and the best part of it is that there is considerable free gold in it."

DROWNING IS QUICK.

Man Cannot Live Under Water More Than Two Minutes.

"The story frequently repeated about professional divers who have been able to remain under water for over two minutes is silly," said a doctor. "No one can remain under water that long without drowning, whether he is a trained diver or not. At Navarino, where the sponge divers are reported to be able to remain under water three and four minutes, tests were made recently and resulted in conclusively proving that none of them remained down as long as a minute and a half. Ninety seconds seems a very long time to the watcher on shore, and it is about the limit of a diver's endurance under water. At Ceylon, where time tests were also made among the famous pearl divers, it was ascertained that few of them remained below the surface as long as a minute, and other tests made on the Red sea among the Arabs proved that a minute and a quarter was the longest they could endure without a fresh breath.

"On the coast of England several years ago a diver, a trained diver, one of the best on the coast, renowned for his endurance, went down and was pulled up so slowly when he gave the signal that he was under water about two minutes and five seconds. He was drawn out of the water insensible, with blood flowing from his nose and ears, and it was only after long and arduous work that his recovery from the effects of that two minute stay under water was assured. Drowning is a quick death. Even though the water is kept out of the lungs, insensibility will ensue in one minute and complete unconsciousness in two. The stories of people who have been in the water five minutes being resuscitated are generally mistakes or untrue. A man could not be in the water five minutes without coming to the surface several times and be restored to life."

HE MISSED THE BEARS.

A Question That Rid President McKinley of a Beggar.

No one asking assistance was ever turned away empty handed from the McKinley door, and many were those who applied. One day a rather old man, with every appearance of belonging to the species hobo, called and asked for aid. He was given a small sum of money and, evidently thinking he had struck a soft spot, returned the following day and from then on went back every few days until finally, on what proved to be his last visit, the president came out while he was talking to a member of the household and, learning the man's errand, entered into conversation with him.

The man stated, in reply to the president's question, that he was a naturalized American citizen, but was born in Switzerland. The president asked if he had ever been in Berne, and he said he had lived there. The president then asked if he had ever seen the bears. This question rather stumped the old man, and he stammered that he could not understand. The president merely smiled and passed on.

Now, as every one who has any knowledge of Switzerland knows, the coat of arms of the city and state of Berne is a bear, and in a pit in the center of the city a number of live bears have been kept for years out of memory and are likely to be so kept for years to come, frequent bequests having been made for their comfort and many thousand francs being deposited in the banks of Berne for their maintenance. The old man, not knowing these facts, certainly could not have been from Berne and was a self convicted disciple of Ananias, and as he disappeared from the neighborhood it is to be supposed that some one must have shown him the joke.

Willing to Overlook It.

"Dear sir," the general manager of the fire insurance company wrote to the local agent, "a few weeks ago your negligence in failing to notify the owners of a large office building that their insurance was about to expire, and to solicit them to reinsure, lost us a customer, and we gave you a month's notice to find another situation. Inasmuch, however, as that building was burned day before yesterday, we have decided to recall the notice. We will overlook the offense this time, but don't let it happen again."

Laborers of the Andes.

The majority of the laborers in the mountains of Peru are Cholos, or Indians born in the Sierra. They are found incapable of doing efficient work on the coasts or in the warmer altitudes without a long course of acclimatization. If gangs of these Cholos have for special purposes been taken down suddenly from the sierra to work at altitudes of from 2,000 to 4,000 feet sickness and fever have resulted from the change.

Repetition.

"There was a time when animal worship prevailed in civilization."

"Well," answered the man who reads everything that is published, "barring from the dog and elephant stories turned out by popular writers I should say we are getting round to it again."—Exchange.

Very Touching.

"Don't you think, after all, that woman's femininity touches and appeals to man?"

"Gracious, yes! My wife is always asking me for something."

NEW THOUGHTS.
Are you growing more attractive as you advance in life?
"Given a healthy body," says Dr. R. V. Pierce, the specialist in woman's diseases, of Buffalo, N. Y., "and a healthy mind, and everyone can cultivate and enjoy happiness."

We must eat properly and digest well to be beautiful. It is a fact that any form of dyspepsia may in a few days change a clear, white skin into a mass of pimples and black spots. A beautiful woman has the beauty of her stomach.
Dr. Pierce's Golden Medical Discovery maintains a person's nutrition by enabling one to eat, retain, digest and assimilate the proper nutritious food. It overcomes the gastric irritability and symptoms of indigestion and thus the person is saved from those symptoms of fever, night-sweats, headache, etc., which are so common. A tonic made up largely of alcohol will shrink the corpuscles of the blood and make them weaker for resistance.
"This is to certify that I have used Doctor Pierce's Golden Medical Discovery, think it's the grandest medicine in the world," writes Mrs. V. M. Young, of Weir, W. Va. "I had dyspepsia in its worst form. I decided to try your medicine. I used five bottles, and now I am doing my own housework. A number of my friends also are using Dr. Pierce's medicine and they recommend it highly. May God bless you in your grand work."
Dr. Pierce believes that a tonic made with alcohol will shrink the red blood corpuscles and make the system weak for resistance that is why he avoided the use of any alcohol or narcotics in his "Medical Discovery," which contains the pure extract from roots and herbs without a particle of alcohol.
Accept no substitute for "Golden Medical Discovery." There is nothing "just as good" for dyspepsia or debility.
Biliousness is cured by the use of Dr. Pierce's Pleasant Pellets.

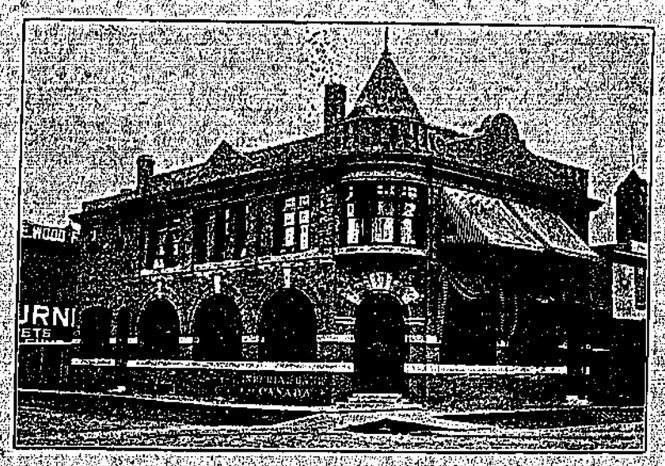
IMPERIAL BANK OF CANADA.

A Prosperous Institution.

We are in receipt of the 20th annual statement of the Imperial Bank of Canada, issued for the year ending May 31st 1904. Under the management of D. R. Wilkie the Imperial Bank has risen to the position of one of the most successful banking institutions of the Dominion. The bank regularly pays a dividend of ten per cent, distributed half-yearly, and made profits for the past year of $612,882, or over twenty per cent on its capital of $3,000,000. Of these profits $213,688 have been transferred to reserve, bringing the reserve account up to $2,850,000, or as much as the paid up capital of the bank, thus giving customers a security equivalent to double that of the paid up capital. During the last eighteen months the bank's deposits have increased by about $5,000,000, and in the same period the bank's assets over all liabilities have increased by about $3,000,000, the total assets standing at date $30,760,017 and the liabilities to the public amounting to $24,557,149.

THE BANK IN THE PROVINCE.

Prior to 1897 the Imperial bank had only one branch in the province, that at Vancouver. The next branch established was at Revelstoke under romantic circumstances. The Board of Trade had been for some time en-



IMPERIAL BANK OF CANADA, REVELSTOKE.

deavoring to get a banking institution here and set their minds on the Imperial. Several business men were also urging another bank to open. A manager of the other bank, was despatched to spy out the land, and bought lots with a view to opening. Mr. Dukes, manager of the Imperial at Vancouver, meantime arrived with a bundle of bills, borrowed an old safe and opened

A TEMPORARY OFFICE

in Sibbald and Tease's old store, now the Climax hotel, pending the erection of a building for bank purposes by O. D. Hoar. The Imperial did a flourishing business right from the start.

A. R. B. Hearn, formerly of Prince Albert branch, was appointed first manager of the bank, and A. E. Phipps, the present manager was accountant. That was in 1897. Now the bank has seven branches in the province—at Victoria, Vancouver, Revelstoke, Nelson, Cranbrook, Trout Lake, Golden.

The bank's business at Revelstoke steadily developed with the growth of the city and district, and last year the management determined the time had come to build up-to-date bank offices, with the result of the present building at the corner of McKenzie Avenue and First Street. The site is one of the most valuable for business purposes in the city.

THE NEW BUILDING

is of brick on stone foundation, and consists of basement and two floors. It has a frontage to McKenzie Avenue of 40 feet, and to First Street of 65 feet.

THE BASEMENT

is the full size of the building and contains a book vault, furnace room and storage for fuel &c. The furnace heats the building by means of hot water, asbestos jacketed pipes distributing the water to the radiators. The walls of the vault are two feet thick and the space inside is ten feet by eight-and-a-half feet in the clear. The cellar also contains iron ashboxes with flues from the fire-places on the upper floors.

On the ground floor is the

BANKING CHAMBER

this is 44 feet by 36 feet. The front portion of the banking chamber is 31 ft. square and is beautifully fitted up for the accommodation of the staff and the public. The ceilings are tastefully picked out in native woods. The manager's office is 11 ft. by 13 ft. handsomely furnished, with doors opening into it from the public entrance and that for the staff. The manager's office is also connected with the city telephone system. At the back wall of the banking chamber is the cash vault, steel lined fire and burglar proof, fitted with time lock safe. Between the safe and the south wall is the lavatory and telephone room for the staff. The furniture and fittings were supplied by the Canadian Office and School Furniture Co., of Preston.

Behind the banking chamber is a suite of

LAW OFFICES

opening on to First Street, and which are occupied by Messrs Harvey, McCarter and Pinkham. These offices have a frontage of 16 ft. by a depth of 36 ft. and are sub-divided into Mr. McCarter's private office 10½ ft. by 12 ft., general office 18 ft. by 17 ft., occupied by Mr. Pinkham, with typewriter's room taken off this space. At the rear portion of the general office is a well-equipped lavatory. This suite of offices is handsomely fitted up in harmony with the rest of the building. A fire-proof vault is also attached to the suite of offices.

On the upper floor are the

MANAGER'S PRIVATE APARTMENTS

These are splendidly lighted and beautifully furnished, the open fireplaces, the mantles and hearths, register grates and general appointments being of a handsome and substantial character.

Fronting McKenzie Ave. are the drawing room 20 ft. by 12½ ft., bedroom 17 ft. by 12½ ft. and these rooms are separated by folding doors so they could be converted into a magnificently large reception room. The hall is 20 ft. by 12 ft., lighted from the ceiling by a handsome dome light. On the First St. side are two bedrooms each 12 ft. by 17 ft. On the south side is smoking room 10 ft. by 9 ft., and on the east side the dining room 13 ft. by 18 ft. The dining room is fitted up with a handsome sideboard fitted into the wall. Off the dining room is the kitchen 17 ft. by 13 ft. and provided with pantry and scullery. A servants bedroom 12 ft. by 10 ft. leads off the kitchen. Bath-room, lavatories and linen closets are provided, lift from cellar, self dumping ashpits connecting grates with cellar. Hot and cold water are laid on throughout the building. Entrances to the residental portion are provided both from McKenzie Ave. and First St. The private apartments are fitted with electric bells. The smaller windows are of pretty chipped glass and the main windows of plateglass set in handsome frames of arched design. The woodwork is tastefully finished throughout, and the building for neatness of design, excellence of workmanship and general finish, is a credit to the Imperial Bank as owners, to the architects Messrs Dalton and Eveleigh, to the contractor J. A. Kernahan, to the subcontractors who did the stone and masonry, Messrs Fromey and Wilson, and to Moscrop Bros. who put in the hot water heating, the bath and lavatory arrangements. A nice lawn has been laid out at the back.

THE BANK STAFF.

Mr. Phipps, the manager of the Bank, is one of the most popular bank managers in the west. He joined the Bank at its Brandon, branch in 1891, and steadily worked his way up to his present position. Mr. Phipps was first accountant of the Bank at Revelstoke, and was accountant at the head office for British Columbia at Vancouver for two or three years. Having now been associated with banking in Revelstoke for the past eight years he is thoroughly acquainted with the district and its requirements. In addition to his onerous duties as manager of the Bank Mr. Phipps finds time for to give some attention to matters of public interest. He is treasurer of the diocese of Kootenay, has made a most efficient secretary-treasurer of the Revelstoke Hospital Society, is treasurer of the Athletic Association, and director of the New Imperial Mines Company.

The other members of the staff are: Messrs Wetmore, accountant, relieving T. B. Baker, now on a visit to England; H. T. Watt, teller; W. R. Grub, ledger keeper; W. H. Swan, bill clerk; J. L. Whiteford, collection clerk.

GRIP AND PASSWORD.

I. O. O. F.

There will be a joint installation of Revelstoke and Selkirk Oddfellows lodges on July 5th and it will be open to the public. Bro. J. McLeod, district deputy, will act as installing officer.

MASONIC.

We had a pleasant call on Wednesday from Mr. Highman, of Vernon, who was on his way to attend the Masonic Grand Lodge which met at Rossland on Thursday. One feature of special interest at this meeting was the fact of degrees being conferred 1500 feet under ground. The session is expected to last for three days.

Chief of Police Bain, S. McDonald and H. N. Coursier are attending the Grand Lodge of A. F. and A. M. at Rossland this week.

RAIL AND STEAMER.

J. McCrum has been appointed passenger conductor. Joe looks more dignified than ever.

T. W. Bradshaw, C. P. R. agent at Revelstoke, has been granted two weeks leave of absence and has gone on a trip to the coast. G. Sutherland, relieving despatcher, is acting C. P. R. agent in Mr. Bradshaw's absence.

J. S. Dennis, superintendent of C. P. R. irrigation works, has been appointed assistant to William White, second vice-president.

The Nelson Tribune remarks: "W. J. Macnab, the well known locomotive engineer who has run out of Nelson on the C. P. R. train since February, 1899, leaves for Revelstoke on Tuesday, from which town he will run for a time. Mr. Macnab goes to his new field of work with the good wishes of his fellow-workers and the good will of our people generally. "Billy" is a Liberal-Conservative stalwart, being a member of the executive of the Liberal-Conservative association of Nelson, an organization which is untainted with either semibreadism, skunkism, or mugwumpism."

INSURANCE.

F. Burnett, senr., F. Burnett, jr., W. S. Holland and G. V. Fraser, of Vancouver, have incorporated the Dominion insurance company.

Sibbald and Field have been appointed agents for the Hartford Insurance Company which is a strong concern having a capital of five million over all insurance.

The Kootenay Mail

UNION LABEL

SATURDAY, JUNE 25, 1904.

The report of the Provincial Mineralogist on the Fish creek camp and which appeared in last two issues of the MAIL ought to inspire with confidence those who have invested there. Mr. Robertson is notably a conservative mining expert, who has been condemned for the discouraging report he has given on some sections. His report on Fish creek was eminently favorable as well as interesting, and should have a good effect in drawing the attention of mining investors to that country.

AN UNNEIGHBORLY ACT.

We regret to notice in the Nelson News surprise expressed by churchmen of Nelson that the diocesan synod was able to muster a quorum of the laiety to enable it to hold a business session at Revelstoke. This confirms the report that Nelson churchmen had been guilty of such selfish narrow-mindedness that they were going to try to kill the Revelstoke meeting by absenting themselves and so preventing a quorum of the laiety. It is said they went even so far as to get Nelson men appointed proxies and then had these proxies stay away to achieve their object. Apart from such unseemly conduct and the insult to the Bishop who had fixed the place of meeting, the conduct of these gentlemen is not such as to elevate Nelson in the minds of the people of Kootenay. Clergy attended the Revelstoke meeting who said they had been unable to attend synod for two years owing to its being held at Nelson, a point which they found to be too far distant and inconvenient to allow for their leaving their work.

ROADS AND TRAILS

There is intense dissatisfaction throughout the district with the manner in which the government are handling the roads and trails this season. It is understood Mr. Taylor, M. P. P. has arrogated to himself the handling of this work and it is safe to say it was never worse done. The public interest is entirely neglected and public moneys are spent mainly for the benefit of personal friends or supporters of the member for the district. Old prospectors, who have regularly done their work and stayed by the country complain they cannot get access to their property this season over the public trails as they are informed they must clean them out, keep them open, and effect the necessary repairs to bridges &c. at their own expense. Things are reaching a pretty pass when an unfortunate prospector has to swear "there is no god but McBride, and Taylor his prophet" before the road or trail leading to a property can get that attention which it is the duty of governments to give. Fortunately the eyes of the people are being opened and the day of reckoning is at hand.

THE COAL AND OIL LANDS.

This province has unfortunately had rotten government. When Col. Baker, for some years minister of mines, was in the legislature, he had the Crows Nest coal lands given to himself and his friends, with the result that when he was rejected by the people because of his failure to place the public interest before personal considerations he was able to retire to England on the wealth he had filched from the province. The C. P. R. tried to repeat the trick in the transfer they sought to obtain of the coal and oil lands through the assistance of Premier McBride, then minister of mines, who supported the scheme. Thanks to Hon. W. C. Wells, the commissioner for lands and works, the deal was blocked—at least Sir Thos. Shaughnessy, who ought to know, says had it not been for Mr. Wells the company would have had these lands. Bona fide prospectors and residents of the province located them.

Then came a gang of Spokane grafters who plastered the country with locations, reckoning that, if it came to a game of freeze-out, they could purchase justice with foreign gold. They have succeeded. The McBride government has issued an order-in-council accepting all these applications whether of the bona fide prospector or the foreign claim-jumper, and declares it will stick to the fees but will not guarantee any title, and they can fight it out at their own sweet will—the monopolists who can best stand litigation to have the advantage. The McBride government is a government of lawyers, and these lawyers have disgraced their profession by turning the province into a huge court of litigation in which the legal profession will scoop the pool, the best assets of the province will go to the foreign claimjumpers who can put up the most money to stand the longest legal fight, and the deserving pioneers who complied with the principle of the law will have to lose their rights because they are not sufficiently wealthy to employ highly paid lawyers for indefinite periods to steer them through the mazes of law rather than justice. No fouler crime was ever perpetrated by a government against the best interests of the people they represent, and the whole affair is a disgrace to the men who hold the reigns of power at Victoria. Premier McBride has repeated in 1904 the same sacrifice of the public estate, by giving to foreign speculators what he sought to give to the C. P. R. in 1901.

SHOCKING AFFAIR.

Family Killed by Lightning.

Edmonton, June 20.—Lightning killed a Galician family named Kachuk, at Beaver Hills, 12 miles from here, last Friday. The father was away working on the railroad. Mrs. Kachuk and three children were burned in their beds, and nothing was known of the holocaust until the remains were found in the ruins.

Developments of Modern Science.

Modern science shows no higher development than the New Scale Williams Piano. Perfect in every detail, of the highest artistic musical excellence and finished in the most beautiful manner in costly polished woods. Few people are aware that the varnishing and polishing of a single piano case involves almost constant labor for a period covering nearly two months.

—Pianos kept in stock by Revelstoke Insurance Agency, Limited.

LUMBERING.

D. M. McFarlane, who purchased some timber lands here last season, is again on a visit to the district in connection with his lumbering interests. Coast loggers don't believe in protection for the lumber industry as they are agitating to have the special stumpage tax on logs for export removed so they can supply the Sound mills, failing which they declare their industry will be ruined.

The Kamloops Lumber Co. Ltd. purchased the mill, logs, and timber limits of the Okanagan Lumber Co. Ltd. It is the intention of the Kamloops company to make Enderby its headquarters, and it is understood the mill will be still further increased in capacity. This company is composed of G. McCormick, M. P., of Orillia, Wm. Irwin, of Peterborough, Geo. W. Fowler, M. P., of Sussex, Hon. Geo. E. Foster, Lieut.-Col. M. Davidson, and Lieut.-Col. Jno. McGillivray, all of Toronto.—Edenograph.

The Mountain Lumbermen's Association met at Nelson chiefly to consider the tariff question. Among those present were J. P. Henderson, Trout Lake, H. C. Shaw, Greenwood, F. W. Jones, Golden, H. S. Cameron, Moyie, George Wells, Palliser, H. Colpman, W. F. Gurd, A. Leitch and F. B. Stark, Cranbrook, A. F. Dudgeon, Revelstoke, P. D. Roe, Vancouver, T. Ludgate, Arrowhead. The primary object of the meeting was to adjust production to demand. General suspension by the lumbering plants of Kootenay is threatened by the industry if the Federal government fails to grant some relief from existing conditions in respect to the importation of American rough lumber.

LABORS' CALL.

Ralph Smith, M. P., has introduced in the Commons a bill to regulate the use of the union label.

Revelstoke School Board Election of Trustees.

Public notice is hereby given to the electors of the municipality of Revelstoke that I require the presence of the said electors at the City Clerk's office, City hall, Revelstoke, B. C., on the 2nd day of July, 1904, at 12 o'clock noon, for the purpose of electing a school trustee to serve in the place of Mr. J. W. Bennett, resigned.

The mode of nomination of candidates shall be as follows:—The candidates shall be nominated in writing, the writing shall be subscribed by two voters of the municipality as proposer and seconder, and shall be delivered to the returning officer at any time between the date of this notice and 2 p. m. of the day of nomination; and in the event of a poll being necessary such poll will be opened on Wednesday the 6th day of July 1904, in the City Clerk's office in the city of Revelstoke, and kept open between the hours of nine in the forenoon and half past seven in the afternoon, for voting and recording the votes of the electors of the said city, of which every person is hereby required to take notice and govern himself accordingly. The persons qualified to be nominated for and elected as school trustees shall be such persons as are householders and being British subjects of the full age of twenty-one years, and otherwise qualified to vote at the election of mayor.

Every candidate nominated shall signify by a writing accompanying the nomination paper his consent to such nomination, except in case such person shall be absent from the municipality when such absence shall be stated in the nomination paper.

The term of office of the person elected, expires December 31, 1905.

Given under my hand at Revelstoke this 25th day of June, 1904.

Chas. J. Annis,
Returning officer.

NOTICE.

NOTICE is hereby given that 30 days after date I intend to apply to the Honorable the Chief Commissioner of Lands and Works for a special license to cut and carry away timber from the following described lands, situated in West Kootenay District, viz.:

Commencing at a post marked Clarence Piper's south east corner post planted on the north boundary of F. Robinson's purchase land on the north side of the north east arm of Arrow Lake, thence west eighty chains, thence north eighty chains, thence east eighty chains, thence south eighty chains to point of commencement.

Dated this 21st day of May, 1901.

CLARENCE PIPER.

NOTICE.

NOTICE is hereby given that, 30 days after date, I intend to apply to the Chief Commissioner of Lands and Works for a special license to cut and carry away timber from the following described lands in the West Kootenay district:—

No. 1.

Commencing at a post marked "T. Skinner N. E. Corner post" and planted on west bank of Columbia River, about two and a half miles below mouth of Nagel Creek, thence south 160 chains, thence west 40 chains, thence north 160 chains, thence east 40 chains to place of commencement.

Dated the 22nd day of March 1901.

T. SKINNER.

No. 2.

Commencing at a post marked "T. Skinner's S. E. Corner post" planted on the west bank of Columbia River about three miles above mouth of Maloney Creek, thence west 80 chains, thence north 80 chains, thence east 80 chains, thence south 80 chains to place of commencement.

Dated the 22nd day of March 1901.

T. SKINNER.

THE LEAD BOUNTY.

Discussion in the Senate.

In the Senate, on the lead Bounty Bill, Senator Templeman, answering Senator Macdonald, said no action had been taken on the proposal to extend the bounty to ore exported. Sir Mackenzie Bowell hoped it would not be granted. Senator Templeman stated one result of the bounty was that all lead pipe used in Canada would in a few years be manufactured in British Columbia.

Senator Lougheed—Why not convert the bounty into a duty?

Senator Templeman—It would not have the same effect. The mines in British Columbia can produce more lead than can be used in Canada.

The Bill passed.

POLITICAL.

It is rumored in the east that Lord Dundonald is going to run as conservative candidate at the coming election.

The Tribune says the McBride government wont spend public money in a district not represented by a "chum of Dick McBride or a lickspittle of Bob Green."

The Tribune thinks Hon. C. Wilson will retire from the cabinet and that Ta Taylor will be appointed minister of mines. Poor Price Ellison is out in the cold completely.

The Miner says: "The only competition that the C. P. R. fears in the West is that of the Grand Trunk. This is the competition it is going to get if the Liberals remain in power for another term."

The Rossland Miner says by their manner of dealing with the East Kootenay coal and oil lands the McBride government has struck the foulest blow ever dealt at the mining industry of the province.

W. D. Stoddart is liberal candidate in Lillooet. In days when there was an east and west riding of Lillooet, Mr. Stoddart represented the east riding in the local house from 1882 to 1900, with the exception of one year—the session of 1895.

The McBride government had no use for Hon. F. J. Fulton after they took him in, so sent him on a holiday trip to Ottawa under the plea of asking the Dominion government to hand over the fisheries to him to give him something to do. Of course he was sent about his business.

Of the conservative leader the Montreal Star says: "The coming of Mr. Borden, however, has been a miracle of swift achievement. He emerged from the twilight fame of a successful local law practice in 1896 by modestly taking his seat as member for Halifax in the House of Commons. Very soon it was felt that the new opposition had in its legal recruit a powerful critic, an incisive student of political matters, and an effective debater."

The Times says of the Phoenix Licensing Board and its relation to the McBride government: "The board today is a mere machine used by Geo. Fraser, the conservative member for Grand Forks, who openly boasts that he is in politics "for what's in it." Fraser dictates the policy of the board with the result that special privileges are granted for a consideration. In some instances men who pay handsomely are given preference over men who have vested interests while in others men who have complied with the law in every respect are denied licenses because they are not on the right side of politics."

ATHLETIC CLUB.

Proposal to Erect Grand Stand and Provide Race Track.

An extraordinary meeting of the Athletic Association was held Monday when the following officers were elected. M. J. O'Brien, president; A. McRae, vice president; A. E. Phipps, treasurer; G. S. Flindt, secretary. Directors, B. A. Lawson, G. S. McCarter, A. E. Kincaid, Dr. Sutherland, J. H. Robinson and T. Kilpatrick.

Committees were appointed to ascertain cost of erecting grandstand and putting in a three-eighths mile track for horse races and to report to a general meeting.

REVELSTOKE CITY SCHOOL.

THE CITY SCHOOLS.

Commencement Of Holidays.

Holidays are generally looked forward to with pleasant anticipations, and with none more than with the pupils of our public schools.

Yesterday the term came to a close with a public examination of the different rooms, in which were displayed some fine specimens of wild tiger lilies and wine maple leaves. The pupils acquitted themselves in a very satisfactory manner and reflect much credit on principal Miller and his efficient staff of teachers. Around the walls were hung specimens of drawing writing and composition, which showed the thorough manner in which these subjects are taught. We noticed that the vertical system of writing is still in use, although it is being discontinued in some schools, the main objection to it being lack of individuality. A pleasing feature was that all the teachers received presents from the pupils in their several rooms, thus showing the harmony and good-will existing between teacher and taught.

We were pleased to see such a large number of parents and friends present which must have been gratifying to the teachers in showing the bond of sympathy between them and the parents of those whose useful minds they are storing with useful knowledge.

DR PRICE'S cream BAKING POWDER

Good health depends mostly upon the food we eat.

We can't be healthy if we take alum or other poison daily in our food.

When outfitting for camp always take Dr. Price's Cream Baking Powder for good health and good food. It makes the finest flapjacks, biscuits and bread.

PRICE BAKING POWDER CO. CHICAGO

Never go into the woods away from a doctor with a cheap alum baking powder in the outfit. You want the best baking powder in the world—and it is most economical in the end.

TROUT LAKE.

Ald. Abrahamson and F. B. Wells, who recently visited Trout Lake, reports matters very active there. W. Abrahamson is busy building houses, having three in hand. He has arranged to build one for an official of the Silver Cup mine, and has erected a handsomer residence for the manager of the Imperial Bank. There is a great and increasing demand for house accommodation there.

The new mill built by the Canadian Sawmills Company is ready to start up.

E. L. Kinman is making a success of his logging contract. He has two donkey engines at work logging, and the efficient manner in which the work is being done has been an eye-opener to some people. Mr. Kinman has already delivered in the lake a million and a quarter feet of logs. As showing the inrush of people into that section the boat brought in 56 passengers one day from Gerard.

THE CITY EXPRESS

LEQUIME ESTATE.

Sunny Spots for Home-seekers In British Columbia.

A VALUABLE OPPORTUNITY to secure small lots of First Class Land, suitable for Fruit Growing, Tobacco Raising, Ranching and Farming of all sorts is at last presented to the General Public by the sub-division of the Large Lequime Estate near Kelowna in the Okanagan Mission Valley of British Columbia. This valuable estate has hitherto been held as a whole.

The Valley is famous alike for its genial climate and the marvellous fruitfulness of its soil. It can safely be said that no-where in Canada can the delightful combination of good land, abundant water supply, equable climate and congenial surroundings be found as in this charming Valley.

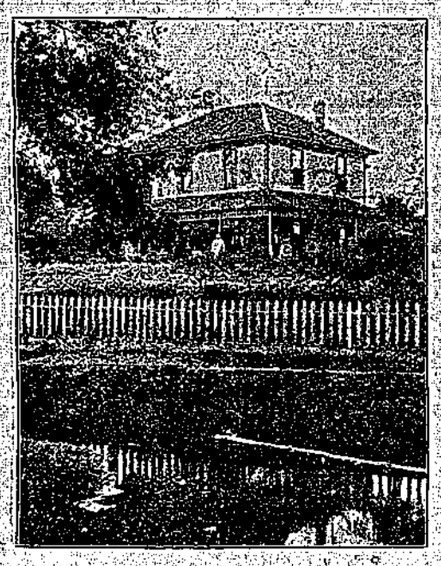
The Situation.

Situated as it is in the shelter of the surrounding mountains, and along the east shore of the Okanagan Lake, it is exempt from the extremes of cold and heat so common to this Continent. Here is a land untroubled by tempestuous winds and cold blizzards in Winter and from parching drought in Summer. The highest recorded Maximum Temperature does not exceed 90.6 degrees. It lies like some fabled haven of rest, which many seek but few have strength to find.

An Authoritative Report.

Professor W. T. Osborne, M.A., of Victoria University, Toronto, who spent the summer of 1903 in the Okanagan Valley thus sums up the advantages of the climate, scenery, soil and fruit-growing capabilities:—

"Canada, in the main, has a rigorous climate. It is generally said that the climate of New England induces catarrh and lung trouble and I suppose that in this regard conditions are not very different in our own maritime provinces. A winter-picture, for example, such as Whittier gives in his "Snowbound," is as true to life for Nova Scotia as it is for Massachussetts. In Quebec and Eastern Ontario, again, the winter is undeniably severe. The



A RANCH HOUSE, LEQUIME ESTATE.

snowfall is heavy, the humidity is great, and the temperature goes low.

"Of Manitoba's winters nothing need be said; they are a standing joke; though we on the ground think them no menace or obstacle to people of ordinary health. And Manitoba conditions, however you regard them, prevail until one reaches western Assiniboia. People have been heard to hint heretically that even at Calgary things get pretty bad sometimes. This survey is enough to show that we have vast areas where tolerably harsh winters are the rule.

"The country to the south of us, which has drawn our best blood in so many respects, has unquestionable attractions to offer even in this. Florida, Colorado and California have long been, in this matter of climate, Meccas for Canadians. In the first place, those whose health is actually undermined look to these states for relief; California and Colorado swarm with invalid Canadians.

"But there is an even more important, because from this time swiftly growing, class to consider—those Canadians, that is to say, who, having acquired a competence, cast about for

A PLEASANTER CLIMATE.

"We are just reaching a time when there will be a surprisingly large demand for easier climatic conditions. Large numbers of Canadians are now making money fast. They are American enough to want to enjoy it, and that without much delay. One of the first things they are going to ask is: "Where can we get an agreeable climate for the whole, or at least a good part, of the year?" Under these circumstances it seems no less than fortunate that we can call the attention of Canadians to something of the sort they want within our own borders. The district that I have particularly in mind is

THE OKANAGAN VALLEY,

in British Columbia. To this may be added the smaller, but in every other respect similar, Valley of the Similkameen. The climate of British Columbia as a whole is balmy, but it is also moist. The advantage of the two valleys named is that they are at once

WARM AND DRY.

In my opinion this dry belt of the Coast province, from the standpoint both of climate and of products, is a distinct national asset."

Large Estates and Small Fruit Farms.

Professor Osborne continues:—

"The settlement of the valleys of the Okanagan and the Similkameen has hitherto been

A LAKESIDE VIEW.

kept back by the concentration of extremely large blocks of land in the hands of single owners. One man in the former valley is said to own land running in generous width for sixty miles. Cattle-raising is the main business of these proprietors. They need large territory, and are not anxious to promote settlement. Undoubtedly these large estates have been in a sense the curse of that country. The proper business of those two valleys is

FRUIT-RAISING.

"They should be the home of a large population of small fruit-growers, who, with intensive culture and advanced methods, would make the country blossom like the rose, and produce for every ounce that is in it.

THE CLIMATE OF THE OKANAGAN,

so far, at any rate, as the summer is concerned, is superb. I limit my comment to the summer, not because I know anything bad about the winter, but because the summer is all that I know at first hand. It is within the mark to say that one could count on the fingers of both hands all the days of my three months' stay in the valley that were anything less than ideal. * * * We never thought of including bad weather among the possibilities, and the event proved that we did not reckon without our host. Nor was the heat excessive. * * * And the nights are invariably cool. The snowfall must be extremely light."

"Kelowna."

says the Professor, "is an old settlement, with fruit as its main resource; though the bottom land there does not seem to suit peaches. The other fruits thrive famously.

"But, more important than this, practically all the old ranchers have orchards—orchards to which they give next to no care, but which produce a prolific quantity though not exactly a select quality of fruit."

An Immense Market.

"The quantities of fruit required in the prairie country are destined to be immense. It is in the interests both of British Columbia and of the country east of the mountains that the fruit industry, especially of the Okanagan, should develop. I say, especially of the Okanagan, merely because the shipping quality of the fruit grown in that valley is likely to prove much superior to that of fruit grown anywhere else in British Columbia."

Health and Holiday Resort of Canada.

Professor Osborne concludes his able article on the Okanagan with the following pithy summary of the situation:—

"It seems to me a matter of importance to Canada as a whole that we should have under our own flag a section of territory where the climate is as nearly perfect, and the landscape as picturesque as can be met with; where instead of spending money in the various states of the Republic to the south of us, the sick man may go for health and the well man for recreation; in particular a section that, rightly handled and justly treated, should prove competent to supply with fruit those vast areas of the Canadian west where relatively no fruit can be grown."

Short History of Lequime Estate.

MANY YEARS AGO, 1865 in fact, a toil worn band of Pioneers were making their weary way North from California at the time of the Cariboo Rush, when the wayfarers, weary with toil, were met by a kindly Priest, ministering to the Siwash Indians, near the very place where the Mission Church now stands. Seeing the parlous condition it was not difficult to persuade them to stop where they were, in this benificent valley where Nature provides so bounteously for her children.

Here then they stayed, and staked off as much land as they could handle, adding every now and again more and more of the best and richest land in the Valley, fighting the Indians and wild beasts as occasion arose, clearing away the primeval forest to allow of men's husbandry and effort. In time other old-time settlers dropped in, and each man in turn staked off what he wanted of the balance of the land, till, the land being limited, all that was available was located.

Then the

VALUE OF THE LAND

began to rise. It was good land, none better, but it could no longer be got for next to nothing. Those who staked out first then realized that if any land was of value theirs must be. They were first there—to them the first choice, to them the best land, so they decided to hold their land until they could sell every particle of it at a good round figure, and meanwhile grow rich on the produce of the land. These two results are now accomplished.

A great barrier to the proper development of the Valley has now been removed. Big estates near Towns are not good. Only one family lives where there is ample accommodation for a hundred. Land is used for meadow and pasturing cattle where splendid crops can be grown, but these require more individual attention. This is what is happening now all over—the old time changes and a more prosperous and settled time takes its place.

A RARE OPPORTUNITY.

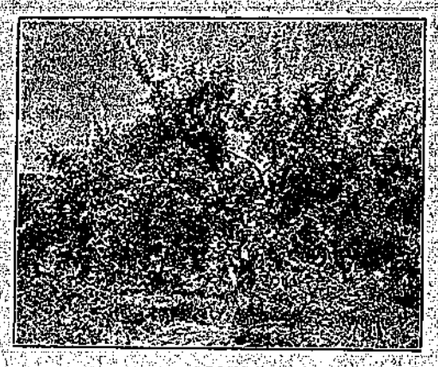
Portions of this magnificent property can now be bought of sizes to suit all purchasers and at prices varying as to the condition of the land, whether virgin or cultivated. This land is within easy distance from the shipping point of Kelowna and the terms are within the reach of all.

It must not be supposed that in all these acres, 8000 in all, there is no bad land. This has, however, been reserved from sale. There is too much A 1 Land on the Property to make it worth the owners' while to sell the bad at all. Under certain conditions and with certain treatment the bad land can be rendered good, but it will take both time and money. Time enough when the still increasing value of land will render it feasible to attend to the reserved portions.

To particularize the portions of this estate we may divide it into three parts.

1. THE BOTTOM LAND, consisting of about 1000 acres of the finest sandy loam soil, well supplied with irrigation water by means of ditches led through every lot on the property, and traversed by a splendid graded road which forms the main highway into Kelowna from the south and southwest.

The land is now mainly used for clover and timothy meadows and pasture for stock. The



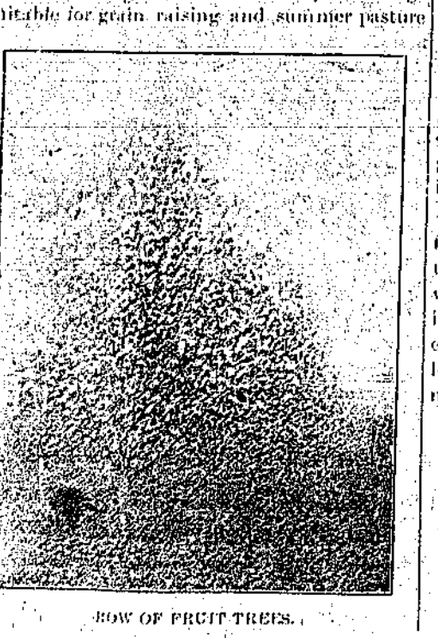
APPLES.

whole of this has been cut up into lots, many of them with clear Lake shore frontage, with magnificent sandy beach. These lots vary in size from 9 to 20 acres. All are suitable for cultivation and in many parts consist of fine fruit land, where Apples, Pears, Plums &c., in fact all fruits, will thrive.

2. THE BENCH LAND.—On crossing Mission Creek and rising the bank on the other side a marvellous contrast meets the eye, accustomed to the rolling hills and brush clad creek fringe. Here is a vast plateau of close on 900 acres, flat as the proverbial billiard table and almost as green, not a tree save around the edge to break the perfect level of the ground, the soil a rich alluvial deposit, mainly a light loam admirably suited for Orchards, well watered by ditches running from a never failing source—Canyon Creek, a Tributary of Mission Creek.

Beyond this great expanse is another bench, rather smaller in extent. Here may be seen several thriving young orchards, which speak for themselves as to the suitability of the soil and surroundings for fruit culture.

3. THE BALANCE consists of upland range suitable for grain raising and summer pasture for stock. On this upland portion of the valley is raised first-class grain, which, in quality and quantity will compete with Manitoba and the North West. Hay also, both Timothy and Clover, is raised at its best here by means of irrigation. There is a great demand for this hay for shipping as it can always be relied upon as A1.

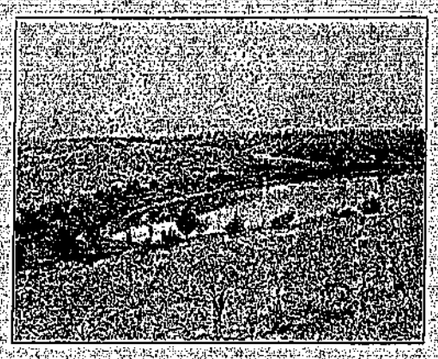


ROW OF FRUIT TREES.

Advantages We Offer.

To people accustomed to the great extent of the ranches in the East the idea of living and making a livelihood off 10, 20 or even 40 acres of land may seem at first glance absurd on the face of it, and to be asked to pay $50, $60, $100, and $200 an acre for land may appear exorbitant, but the true value of land is what it will raise, what can be made off it! When a man can, off a small piece of land in a pleasant climate, make as much as, if not more than, he can off a piece of land perhaps twenty times the size where the cold in winter and heat in summer are so intense as to double the hardship and considerably diminish the pleasure of the strenuous out-door life of the farmer; it becomes a question—Is life worth living under such conditions of climate when he can find in the Lequime fruit lands a genial climate with equally good, if not better opportunities for success?

It becomes more evident that land, of which there is not such a great amount, is considerably more valuable, and worth paying for and treating as such. It is valuable even to buy a small—say 10 acre—block to build on, plant a few trees and a garden for a summer resort for the family with all the benefits of the lake for

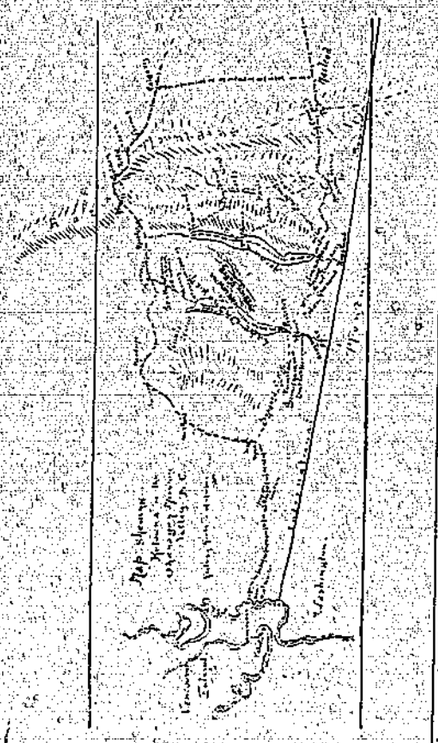


A TYPICAL ORCHARD.

boating, bathing and fishing—a never-failing source of pleasure—or as a temperate retreat in winter to escape the "forty below" and the wind and blizzard so trying to the strongest frames let alone delicate women and children compelled to live through the rigors of such arctic winters.

The profitable grain or cattle ranch may be carried on as before if necessary, but that only takes six months of the year. Why not live the other six in comfort out of the cold.

Again, to those looking forward to retiring in years to come after their labors, and who want a pleasant, genial climate to live in. Now is the time to select the spot, taking advantage of the easy terms offered. Plant the Orchard now, so that it will be bearing fruit by the time you will wish to come to it—a pleasant and



LOCATION PLAN SHOWING SITUATION OF LEQUIME ESTATE.

profitable occupation, not calling for any great outlay or expense in itself, and providing a good income from the first crops. The longer it is put off the longer before the returns.

Why leave the country, and winter in California, when you can have your own California, under your own flag, in your own country, with congenial neighbours, pleasant surroundings, equable climate, low taxes, churches of every denomination, and schools, good roads, lots of sport, and a splendid return for your money invested?

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory.

Coal.—Coal lands may be purchased at $10 per acre for soft coal, and $20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of ten cents per ton of 2,000 pounds shall be collected on the gross output.

Quartz.—Persons of eighteen years and over and joint stock companies holding free miner's certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of $7.50 per annum for an individual, and from $50 to $100 per annum for a company, according to capital.

A free miner having discovered mineral in place, may locate a claim 1500x1500 feet by marking out the same with two legal posts, bearing location notices, one at each end on the line of the lode or vein. The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is $5.

At least $100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When $500 has been expended or paid, the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at $1.00 an acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres.

The patent for a mining location shall provide for the payment of a royalty of 2½ per cent of the sales of the products of the location.

Placer Mining, Manitoba and the N.W.T., excepting the Yukon Territory.—Placer mining claims generally are 100 feet square; entry fee, $5, renewable yearly. On the North Saskatchewan River claims for either bar or bench, the former being 100 feet long and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1,000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged beds or bars of the river below low water mark and subject to the rights of all persons who have, or who may receive entries for bar diggings or bench claims, except on the Saskatchewan River, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease one dredge for each fifteen miles or fraction is sufficient. Rental, $10 per annum for each mile of river leased. Royalty at the rate of two and a half per cent collected on the output after it exceeds $10,000.

Dredging in the Yukon Territory.—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged bed or bars in the river below low water mark, that boundary to be fixed by its position on the 1st day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental, $100 per mile for the first year, and $10 per mile for each subsequent year. Royalty, same as placer mining.

Placer Mining in the Yukon Territory.—Creek, river, gulch and hill claims shall not exceed 250 feet in length, measured on the base line or general direction of the creek or gulch, the width being from 1,000 to 2,000 feet. All other placer claims shall be 250 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days, if the claim is within ten miles of mining recorder's office. One extra day allowed for each additional ten miles or fraction. The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the party consists of two, 1,500 feet altogether, on the output of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee, $10. Royalty at the rate of two and one-half per cent on the value of the gold shipped from the Yukon Territory to be paid to the Comptroller.

No free miner shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of $2. A claim may be abandoned, and another obtained on the same creek, gulch or river, by giving notice and paying a fee.

Work must be done on a claim each year to the value of at least $200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed to be abandoned and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made and publishing notices in the Yukon Official Gazette.

Petroleum.—All unappropriated Dominion Lands in Manitoba, the North-west Territories and within the Yukon Territory are open to prospecting for petroleum, and the minister may reserve for an individual or company having machinery on the land to be prospected, an area of 640 acres. Should the prospector discover oil in paying quantities, and satisfactorily establish such discovery, an area not exceeding 640 acres, including the oil well and such other land as may be determined, will be sold to the discoverer at the rate of $1.00 an acre, subject to royalty at such rate as may be specified by order-in-council.

Department of the Interior, Ottawa, 9 February, 1901.

THE SICKROOM MIRROR.

You Must Be Discreet In Allowing the Patient to Use It.

The looking glass, whether a plus or minus quantity, plays a more important part in the sickroom than most nurses and physicians give it credit for. The patient who is allowed to look into one is likely to be frightened into a relapse at sight of his cadaverous appearance, while the one who is not allowed to look is similarly affected by the refusal, which he attributes to the fact that his face is too much for his nerves.

"All things considered, I think it a good plan to give a sick person a chance to look at himself occasionally," said a doctor. "Of course the indulgence must be granted with discretion. If a patient is really looking seedy a turn at the looking glass is equivalent to signing his death warrant, but if taken at a time when braced up by some stimulant or a natural ebullition of vital force a few minutes of communion with his own visage beats any tonic I can prescribe. It thrills the patient with new hope. It makes him feel that he isn't quite so far gone as he had thought and that possibly a fight for life is, after all, worth while.

"Being thus sensitive, a persistent withholding of a mirror convinces the patient that he must be too horrible for contemplation, and he promptly decides that the best thing for him to do is to give up the ghost and get out of the way. That is one mistake hospitals were apt to make up to a few years ago. When I was a young fellow, getting my first practice after graduation, I served on the staff of several hospitals, and in all, especially in the free wards, those aids to vanity were strictly forbidden. The deprivation went hard with many of the patients, particularly the women, and when I came to have a little authority among doctors and nurses I advised a judicious application of looking glass treatment. I still advise it both in hospital and private practice, for I find that a little reassurance as to the state of the complexion and the appearance in general goes a long way toward effecting a cure."

NUT VALUES.

Chestnuts are starchy and take the place of potatoes.

Brazil or cream nuts are very rich in fat and should be blended with pecans, English walnuts or hazelnuts.

Black and white walnuts as well as hickory nuts contain nitrogen and oil, but no starch. Blend with rice or potatoes.

Cocoanuts contain very little nitrogen, but are rich in oil. The fiber is difficult of digestion. The cream and milk are excellent for salads and sauces.

Peanuts are very rich in nitrogen and contain considerable starch and oil. When boiled and mashed they are much better than when roasted and ground.

Almonds are really digesters or appetizers. They are too expensive to be used alone in large quantities. Four or five thoroughly masticated at the end of a meal will frequently aid in the digestion of other foods.

The Man and the Match.

"Show me two men with unlighted cigarettes, and if I watched them for a minute I can tell you correctly whether the one who has the match is from Philadelphia, Boston or New York."

The speaker was a person of some observation, and his friend naturally asked:

"How can you tell?"

"In this way," said the observant man. "If the man is a Philadelphian he will strike the match, hold it for his friend, to get a light, then take a light himself and throw the match away. If he is a Bostonian he will light his own cigarette first, then hold the match for his friend and after that throw it away. If he is a New Yorker, however, he will strike the match, light his own cigarette and throw the match away."

Spencer and Music.

Mr. Herbert Spencer cultivated what he called the "receptive sense" in respect to music and was wont to speak with more than a little bitterness of the general desire to be a performer. One performer who had been chosen to play Beethoven for him was thunderstruck on arrival at Mr. Spencer's residence at being asked to render an extract from one of Sullivan's operas. Light music had a charm for the philosopher which light literature never had.

An Apt Pupil.

Teacher—James, you were late yesterday morning. Pupil—Yes; but, as you were saying to the class today, we should let bygones be bygones. Teacher—But have you no excuse to offer? Pupil—In that same talk you said that one who was good at excuses was usually good at nothing else. Under the circumstances I think it better for me not to do anything that will lower me in your estimation.

A Reminder.

Mother—Johnny, on your way home from school stop at the store and get me a stick of candy and a bar of soap. Father—What do you want of a stick of candy? Mother—That's so he'll remember the soap.

No Chance For Him.

"Come on; have a game of poker!"

"I don't believe in games of chance."

"That need make no difference. Come on and play."

LAND FOR SALE.

Columbia and Western Grants Offered Between Trail and Penticton.

The whole of the C. P. R's holdings in the Columbia and Western land grant are now on the market. The regulations for acquiring the land are after the government regulations. The price per acre is same as charged by government, $5.00 per acre for 1st class land, $2.50 per acre for 2nd class land, and $1.00 per acre for 3rd class land.

In purchasing the C. P. R. land the applicant must buy 160 acres, unless that amount is not available. Applications must be made on proper forms, after which the applicant must have the land surveyed, at his own cost, by a Provincial Land Surveyor, who will classify the land.

MALAKWA.

From our own correspondent.

Seeding is over once more and everything is doing well.

T. Woolsey shipped four cars of posts last week and is busy getting out logs for C. R. I. Co.

Messrs. Erickson have shipped in a thorough-bred short horn Durham bull.

Fall wheat is doing well in this district and this seems the best way of raising wheat.

F. Bossley is busy improving his ranch, having broken up quite a patch, and also fenced.

T. Woolsey and A. Chambers have captured two bears so far and in prime order. Messrs. Lidstone and McRae also captured two bears.

FARM AND ORCHARD.

Fruit and ornamental trees to number of 12,350 passed inspection at Vancouver last week and Inspector Cunningham stated he never saw more beautiful stock. The fruit trees are varieties that have been thoroughly tested at Kelowna by the Kelowna Nursery Co., the importer and have been found to be suitable to the climate of the Okanagan, and to grow the finest kind of fruit. The shipment consisted of cherry seedlings, English walnuts, sugar maples, pine, oak, box elder, American elm, catalpa, pear seedings and ornamentals. These will form a base for the further propagation of stock to be sold all over the province.

THE MINES.

Jim Wardner has taken an option on some Poplar properties.

A company has been formed at Nelson to work placer on Hall Creek near Ymir.

The northwest farmers buy the sulphate of copper bye-product from Trail smelter.

J. Lauder, formerly of Revelstoke, has been appointed electrician at the Silver Cup mine.

W. B. Pool says he intends forming a joint company to work the Horse-Shoe at Trout Lake.

The Prospector says the Gold River Company propose to flume Bull river to prospect its channel for gold.

The Cliff mine, at Nelson, has been bonded to Messrs. Moorehead, and Marks of Portland, and Dr. Morrison, of Nelson, for $20,000.

Steele and Patterson have found gold on Toad Mountain. They traced the lead 900 ft. It is 18 inches to 4 ft. wide. A sample ran $572.80 per ton.

Mining in the province is looking up. American capitalists have made an important deal in the boundary and Mr. Stratton, M. E. of San Francisco, has purchased the Pingree group at Nelson for his principals.

The C. P. R. is spending half a million in development of anthracite coal fields at Banff. When the preparing plant is fully installed the West will have a hard coal that will be quite as excellent as the famous Pennsyevania anthracite.

J. A. Darragh, manager for the Elwood Tinworkers Mining Company, has struck the ledge with the crosscut tunnel he has been driving on the Silver Dollar on Mohawk Creek. As the crosscut has not yet been extended through the ore-body its width and character are not known, but the indications on the wall are good, showing gold and galena.

A scheme is out for the re-organization of the Eva with a capital of $500,000 in $1.00 shares, of which the Eva shareholders propose to take 220,000 fully paid up and issue to the Calumet and B. C. 190,000 shares, half assessible to 50 cents and half to 25 cents, the balance being treasury stock.

We are informed the clean-up reported in last week's MAIL as having been made on the Revelstoke and McCulloch Creek Hydraulic Company's property was only a partial one made to give Mr. Morrow, one of the stock holders, some gold to take east with him, and was by no means a systematic clean-up of the sluices and riffles. The President, W. M. Brown, informs us the amount of gold taken out was 30 ozs.

CORRESPONDENCE.

The Water Supply.

Editor Kootenay Mail:

Sir—While citizens will be glad to see an improved water supply it is necessary that the interest of the city should be conserved in the process. A deal is on between the city and the C. P. R., the terms of which have not yet been made public, but street rumor says the proposition is to give the C. P. R. free water in consideration of the C. P. R. turning over to the city their rights to the stream which now supplies their reservoir, and that the company should put in a 75,000 gallon tank available for city purposes in case of fire. Now, sir, I know the present system controlled by the company is not sufficient to supply the company's requirements, as, in a spell of dry weather the shops have had to be shut down to enable sufficient water to accumulate to supply the boilers. How much value is such a system going to be to the city? If such a deal goes through the city will lose a valuable source of revenue, for the company must eventually come to the city for its water supply and should pay its share for that service the same as any other user.

I am &c.,
Civis.

STRANGE AFFAIR

Engineer Goes Crazy on His Engine.

G. A. Hall, engineer of the Slocan City freight train, began whistling for brakes as he approached Slocan Junction. The air was applied and the train stopped. The conductor asked Hall why he stopped and, replied by saying that he would get the train through faster than ever a train went before.

The fireman jumped from the cab and said Hall was a raving maniac, and he had been shovelling coal into the furnace like fury. The engineer was overpowered and kept in the caboose until Nelson was reached. It took four men to take him to the police station as he struggled so desperately.

POPLAR.

An Expert's Opinion.

A. Sharp M. E., mining expert for P. Burns & Co., says: "No free gold camp of such magnitude as Poplar Creek has as yet, in my opinion, been discovered in British Columbia.

For a camp in its initial stages the showing to date is really excellent. The formation is schist intersected with quartz veins. Some of the veins are very large, several that I saw being as wide as fifty feet. Free gold can be panned on the surface showing of all of the claims.

"The question is, will the values continue at depth, and this query can only be answered by development work. At the present time the indications are all favorable toward a continuance of values at depth.

"About 600 prospectors are at work in the district, and in the aggregate a large amount of work will be performed this summer. The unfortunate litigation over the Lucky Jack property is a drawback to the prosperity of Poplar city just at this time, because the number of men employed close to the town is thereby reduced."

J. Anderson has been appointed road-master on the section of the Mountain and Shuswap division west of Revelstoke, in place of R. Watmore, who is leaving owing to ill health.

One of the most useful Institutions of today promises to be The Diabetic Institute of London, established for scientific research into the origin, cause and treatment of Diabetes and the secondary symptoms: gout, rheumatism, carbuncles, etc. Hardly any disease is so little understood, and at the same time so insidious and dangerous as Diabetes, which, according to the highest modern authorities, is curable after all, when treated in time. If interested write to the Diabetic Institute, St. Dunstan's Hill, London, E.C., for free information.

Social & Personal.

Mrs. J. Lyons is paying an extended visit to Winnipeg.

Mrs. G. Sutherland has gone to the coast for two months.

Mr. and Mrs. Baldry have moved from Revelstoke to Kamloops.

Mrs. E. Edwards has gone on a lengthened visit to Tacoma.

Mrs. J. Palmer has one of the best window gardening effects in the city.

A. E. Hagger, of the engineering department, is acting in Mr. Foster's place during that gentleman's absence on his honeymoon trip.

Miss Ruth Valentine, of the Canada Drug and Book Co. is visiting at Trout Lake.

Mrs. Frank K. Shipley left this morning to spend a few weeks holiday in Eholt.

Mrs. E. H. Lewis and children left this morning on a months visit to her mother in Trail.

The annual garden party in connection with the Presbyterian church will be held on August 18th.

Miss Lillie Valentine, of Trout Lake, has returned home after an enjoyable visit with friends here.

John Joseph Hogan, of Charlottetown, P. E. I., is visiting Revelstoke and is the guest of R. McKinnon.

Mr. Hornell, of C. B. Hume & Co. leaves next week for a month's vacation among friends in Ontario.

Mr. Blythe has returned to Revelstoke, having spent some months at the coast, where he reports business dull.

T. More, of the C. P. R. despatcher's office, has been promoted to Vancouver, for which point he leaves shortly.

Mrs. Barker, wife of Mr. Barker, chief train despatcher at Revelstoke, has gone on a visit to her mother Mrs. Browster, Fairview.

Miss Smith intends taking a two months course at the Normal school, and Miss M. Adair will fill the vacancy in the teaching staff during her absence.

Dr. Procter of Kamloops has gone on an extended holiday which he will spend in England. It is his intention to take special courses in hospital work in some of the large European institutions.

J. E. Lovering, formerly of Revelstoke, who has been principal of the Sandon school for the past three years, has resigned to go into the Methodist ministry and will be stationed at Ymir.

The marriage was celebrated this morning by Rev. W. C. Calder of Glenzer, mining recorder at Ymir, and editor of the Ymir Herald, with Miss Sarah McDonald, who arrived from Vancouver on this morning's train.

On Sunday last W. H. Humphries was presented by St. Peters Sunday school with a prayer-book on the occasion of his leaving for Okanagan. During his residence in Revelstoke Mr Humphries has given valuable assistance at all entertainments, and has been one of the most popular young men of the city.

J. W. Bennett has been offered and accepted a responsible position in connection with the Silver Cup Mines, and has left for Ferguson to enter on his new duties. Mr. Bennett has resigned his position on the board of school trustees, a position in which he has rendered excellent service to the city. Mrs. Bennett and family will remain in Revelstoke.

One of the most fashionable weddings held in the city of Winnipeg took place Wednesday, when the marriage of J. R. Benson, accountant of the Trout Lake branch of the Imperial Bank, with Miss Ida Vasser, niece of Wm McKenzie, of Toronto, took place at St. Mary's church. The happy couple left in the afternoon for British Columbia.

The marriage of W. W. Foster, assistant to Supt. Kilpatrick, with Miss Stewart, was fixed for today at the residence of Mr. Forbes, of Salmon Arm, brother-in-law of the bride. The happy couple have been the recipients of handsome presents. Both have many warm friends in Revelstoke who will join us in extending best wishes to Mr. and Mrs. Foster for a long and happy wedded life.

On Tuesday morning at Vancouver Miss Ethel Ladner, daughter of Rev. C. Ladner, formerly of this city, was united in marriage to M. F. Crawford, C. P. R. engineer of Revelstoke. The ceremony was performed at the residence of the bride's sister, Mrs. J. A. McKay. Miss May Ryder, of Chilliwack, attended the bride, while W. H. Ladner was best man. The happy couple left for Victoria on their wedding tour.

CITY COUNCIL.

Fresh Tenders to be Called for Water Works.

A special meeting was held last night at which tenders for water works extension were opened. As will be seen by the following resolutions, none of them were considered satisfactory, being much higher than the appropriation for that purpose would warrant.

After considerable discussion it was moved by Ald. McCarter, seconded by Ald. Foote: That none of the tenders for ditching be accepted, and that all checks be returned to the tenderers.—Carried.

Moved by Ald. McCarter, seconded by Alderman Field: That the specifications for water pipe line, clearing, ditching, etc., be referred to the Fire, Water and Light Committee for revision, that fresh tenders be called for on the revised specifications, and that a copy thereof be forwarded to Mr. Orchard, of the Canadian Pipe Co., with a request for a tender.—Carried.

Council adjourned till Thursday evening.

CHURCHES.

METHODIST.

Subjects for tomorrow: a. m., "A Joy Worth Having." p. m., "The mat that the World Needs."

Rev. C. H. M. Sutherland, the new pastor of the Methodist church here, is drawing large congregations. The musical service on Sunday evening was particularly good. A duet was sung by Mesdames Creelman and Dent and an anthem in which Mrs. Bews sang the solo part.

ST. PETERS.

Fourth Sunday after Trinity celebration of Holy Communion at 8 a. m. Matins and Litany at 11, evensong at 7:30 p. m. Sermon by the rector.

Sunday School at 2:30 p. m.
