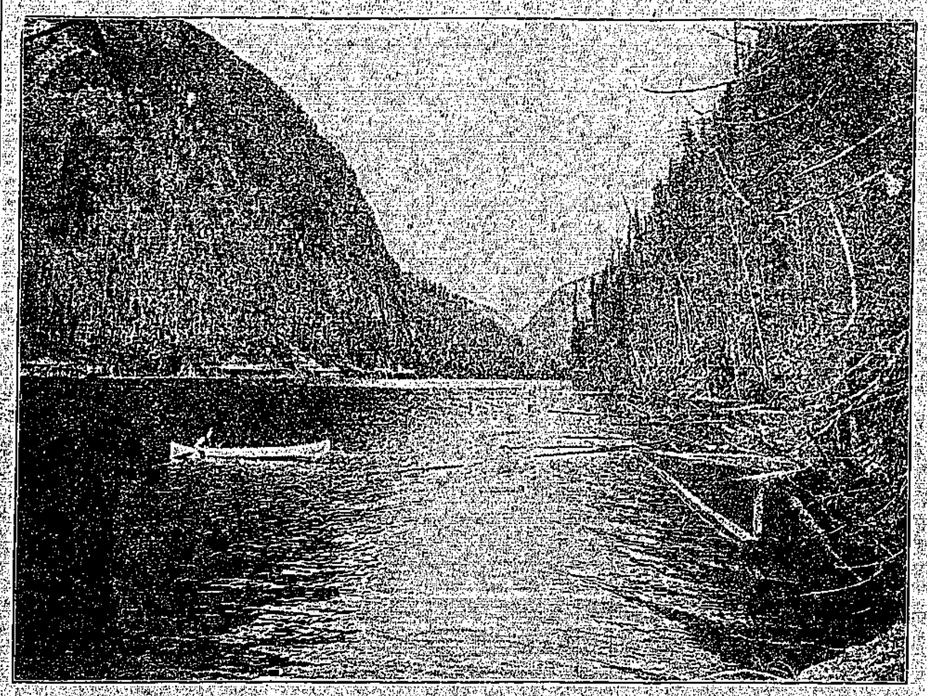
MUNDY LUMBER COMPANY.

A GREAT LUMBERING ENTERPRISE AT THREE VALLEY, BRITISH COLUMBIA.



THREE VALLEY LAKE, EAGLE PASS, B.C.

Two years ago nobody dreamed that picturesque Three Valley Lake, slumbering amid its mountain fastnesses, in the Eagle River Pass in British Columbia, sixteen miles west of Revelstoke, was destined to become the scene of one of the most important lumbering enterprises in the Interior. Nobody expected that the expert eye of the practical lumberman was here to find a mill site designed by Nature better than could be fashioned by the hands of man, and no expense for utilization beyond its equipment. Yet here was such a site, the like of which is rarely found located almost against the road-bed of the great transcontinental railway, the Canadian Pacific.

The unexpected has happened, and the past few months have seen a wondrous change at Three Valley. Two years ago the neighbourhood at the lake was known only to the trapper, and of the scores of thousands who yearly passed it in the railway trains and admired the beauty of the scenery, none dreamed that on the further shores of the lake existed one of the finest lumbering forests in British Columbia. It remained for A. McRae, of Revelstoke, to grasp the opportunity that so many now learn to their regret they missed, though lying at their very doors. McRae heard of the magnificent resources of Three Valley, and determined to investigate for himself. Although an old hand in the mountains he was amazed at the wealth of timber that he saw. It was on Dominion lands, and he arranged to take it up with a view of interesting capital in its development. As a result the capitalists now comprising the Eagle River Lumber Company and the Mundy Lumber Company investigated the proposition. They were expert lumbermen with many years of successful

W. W. BELL,
Treasurer Eagle River and Mundy Lumber Companies.

F. W. DAVIS,
President Eagle River Lumber Co., and Director Mundy Lumber Co.

experience in the Eastern States. They were delighted with the result of their investigation and took up the timber berths they now hold, aggregating 160 miles. They then proceeded to organise the

EAGLE RIVER LUMBER CO.

which owns the limits, and the Mundy Lumber Company, which has erected the mill and will run the manufacturing end of the business.

The Eagle River Lumber Company is capitalised at $1,000,000, and the investors consider the value of the timber in these limits worth all of 100 cents on the dollar on that capitalisation.

The Mundy Lumber Company is organised with a capital of $50,000, which will be increased from time to time as required to conduct the manufacture of lumber in all its branches, it being the intention of this company to add the necessary machinery

F. P. SCHOONMAKER,
Secretary Eagle River and Mundy Lumber Companies.

to their plant as the business demands it.

The following gentlemen constitute the officers and proprietory of

THE EAGLE RIVER LUMBER CO.

F. W. Davis, president; S. A. Mundy, vice-president and manager; F. P. Schoonmaker, secretary; W. W. Bell, treasurer; C. P. Collins, John McCrum, E. R. Schoonmaker, G. H. Mills, W. W. Bell, F. W. Davis, S. A. Mundy, H. Y. Telfer, D. G. Cooper, directors. All are of Bradford, Pa., except Messrs. Telfer and Cooper, who are from Collingwood, Ont.

THE MUNDY LUMBER CO.

is composed as follows:

S. A. Mundy, president; E. R. Schoonmaker, vice-president; F. P. Schoonmaker, secretary; W. W. Bell, treasurer. All the officers are directors, with the addition of Messrs. C. P. Collins, John McCrum and Geo Mills. These gentlemen are all from Bradford, Pa.

THE TIMBER

on the company's limits is mostly cedar, but there is a considerable proportion of white pine, fir and spruce. The growth of timber is wonderful, and where logging operations are now going on it will cut 150,000 feet to the acre, while the Eagle River Co.'s holdings will probably average 50,000 feet to the acre all round. Much of the timber is large, trees being as much as 12-ft. in diameter. These trees will give a magnificent cut of clear lumber. As showing the size of the timber growing on these limits we publish herewith an engraving showing five persons with their arms outstretched, covering only half the girth of the tree.

LOGGING OPERATIONS

Last fall, under the management of Mr. E. R. Schoonmaker, the vice-president of the Mundy Lumber Co.'s

E. L. KINMAN,
Logging Contractor Eagle River Lumber Co.

logging camp was put in on Three Valley Creek, and steps taken to improve the creek for logging purposes. Later a contract was let to Mr. E. L. Kinman to supply 50,000,000 feet of logs to the mill. He brought over his logging plant from Trout Lake, effected further improvements to the creek for floating logs, and built two substantial splashing dams. He also turned in part of Frog Creek to Three Valley Creek to increase the volume of water for splashing purposes. The first dam is a mile up the creek, and the second is about a quarter-of-a-mile further on. The creek has been cleared out and straightened, and a flume built at each dam with a water-tight water gate fitted to the head of each flume. The series of illustrations which we publish gives an excellent idea of the way these dams and flumes are operated. The upper dam is 335

UNION LABEL

SATURDAY, SEPTEMBER 30, 1905

Continued from Page 1.

feet across, and affords a storage space of three-quarters of a mile up the creek.

The steam logging plant consists of two engines with their equipment. One of these engines has two 10x12 cylinders at 160 lb. pressure, running 360 revolutions per minute. It is fitted with a double haulings drum. This engine can handle logs for a radius of a mile around. These engines were built by the Washington Iron Works of Seattle, and the facility with which they handle the heaviest logs over the roughest ground is amazing, the logs being delivered right into the splashing booms with no manual labor other than fixing haulage cables and clearing away obstructions in front of the logs.

So heavy is the timber in which these logging engines are now operating that, to allow room for the logging plant to work only half the timber can be felled and taken out at a time, and the fellers and the logging plant will have to be taken over the ground a second time in order to complete the logging of it. Clarence Brownlee is foreman of the logging operations.

THE TOWNSITE.

The inauguration of the Mundy Lumber Company's enterprises has established a growing townsite at Three Valley. In addition to the company's offices and store, dwellings for the employees have been erected. The townsite occupies a beautiful situation at the west end of Three Valley Lake, where the Eagle River leaves the lake, and it will ere long grow into a point of considerable population and importance. The railway station is a third of a mile distant, and the railway authorities are being urged to move to the new townsite, where practically all the traffic now is. This will probably be done. Opposite the townsite is a pretty little island called Pleasance Island in honor of Mrs. Mundy. A convenient dock for the accommodation of the company's steam tug has been built on the lake shore alongside the company's offices. A water supply has been put in. There is a daily mail service east and west, and a telephone has been installed which gives connection with Griffin lake, from which the company has the advantage of telegraphic communication with the outside world. A complete electric lighting system is being put in from the mill to light the townsite and docks, so that in a short time Three Valley has secured all the advantages of civilization.

THE MILL.

The "Go" that has been put into the construction of the mill is evident from the fact that on May 1st there was no machinery on the ground, while by August 1st the mill was ready for operation. The site chosen for the mill is on the south side of the lake at the west end, and no better site could be found for the economical operation of the lumber industry. A railway spur runs right into the mill from the Canadian Pacific Railway Co.'s main line, and the mill is thus within three days' freight haul from Vancouver on the west, and Calgary on the east. The Mundy Lumber Company have here magnificent booming facilities, their main boom in the lake being a mile long, while the mill has been built on a cove of the lake which affords a natural sheltered boom for holding the log supply for the mill available right at the foot of the log ladder. There is ample yard and dock accommodation. Docks will be built along the lake shore and lighted at night by electricity; while the yard will be in a safe position in case of fire, being cut off from the mill by a hill, which affords a natural buffer between the mill and the yard. A mountain stream comes down to the mill, from which is derived the water supply for the boilers, and by erecting a tank or dam on the mountain side a first-class high pressure water service can be made available in case of fire.

The mill has been erected with two main features in view—economy of production and safety from fire. The boiler house is 28x60 feet, built of solid brick and iron, making this one of the safest mill buildings in the province so far as precautions against fire are concerned. The burner has been located over a lofty ridge situated on the east side of the mill, and this ridge forms a perfect cut-off between the mill and the burner, the refuse lumber being carried to the burner by means of a conveyor. The yard, loading and sorting platforms are located on the west side of the mill. The mill building proper is 152 in length by 44 feet in width.

The motive power of the mill is supplied by three horizontal return tubular boilers, 72-in. diameter, 18-ft. long, with 4-in. tubes. The smokestack is 60 ins. in diameter, 90-ft. in height, and is fitted with ladder and spark arrester. The main engine is a beautiful piece of machinery, 250 horse power, and took first prize at the World's Fair. The fly-wheel is 12-ft. in diameter. This engine was built by the Buckeye Engine Co., of Salem, Ohio. This engine has a novel feature, in that the governor is on the fly-wheel and gives superior regulation of the speed of the engine. The engine is installed on a massive concrete foundation. There is also a condenser, and a duplex steam force pump for feeding the boilers in case of necessity, or for fire purposes.

The electric plant consists of a 150 light machine, supplied by the Milwaukee Electric Co. This dynamo is driven by a separate engine of 100 h. p. capacity.

Consistent with the company's policy of providing every possible precaution against fire a brick oil house has been built for the storage of all inflammable oils.

THE MILL PLANT

is up-to-date in every particular. The logs are raised from the boom by the travelling log elevator from which they are kicked on to the log deck by a steam kicker operated by the scaler with his foot. A steam loader places the logs on to the carriage, and a steam nigger turns the log when necessary. The carriage is steel, with three log seats and knees opening 72-ins. from the saw line. The carriage is fitted with patent hammer dogs, and there are pneumatic cushions for bumpers at each end of the carriage run. The set for the logs is worked with steam, and the feed is a gunshot 42 ft. long.

The saw itself is what is known as a left-handed 14 Allis double cutting band, with extended bed, and the saws travel at the rate of 8500 ft. a minute. From the saw the lumber is carried by live rolls, the larger timbers going right through the mill, while the smaller sizes are switched off to the edger. This is one of the best machines made, with latest labor-saving devices. The saws are fitted with Hoe chisel teeth. Live rolls again carry the lumber from the edger, the off-cuts going to the slasher—a five-saw machine which cuts all the waste into 4-ft. lengths—and the better grades passing on to the trimmer, from where it is carried over a 60-ft. sorting table. It then passes to the planing mill and is worked into the various kinds and descriptions of the finished products of the forest. The trimmer is fitted with patent saws, which leave the edges perfectly smooth. The planing mill is 60x40 ft., and the power is furnished by an independent engine of 100 h. p. The shavings and dust are drawn off by a cyclone fan and go to feed the furnaces. The auxiliary plant of the planing mill consists of a steam saw setter, re-saw and rip-saw for mouldings, and automatic knife grinder. The band saws are filed in a separate room, where special machines for the different operations are fitted up. This machinery, too, is furnished with a separate engine. The capacity of the mill is 100,000 ft. per day, running double shift. The plant was supplied by the Waterous Engine Works Co., Ltd., through their Vancouver agent, Mr. Hugh Gilmour. This firm has the reputation of turning out the best sawmill machinery in Canada.

A shingle mill, 40x16 ft., is built on the lake side of the mill, and it is expected that the output will be in the neighbourhood of 150,000 per day.

Ogilvies' Reputation goes into every barrel of Royal Household Flour

If Royal Household Flour were not as good as Ogilvies say it is, who would be the greatest loser?

You would try it once—if it were not good you would be a small loser, perhaps.

But Ogilvies would probably lose your custom.

They would also lose the custom of every other woman who tried it and of thousands who had never tried it but had been told that it was not as represented.

Therefore Ogilvies *must* make Royal Household Flour the *best* flour because they stake their reputation upon it, and if you and thousands of others found it was not the best, Ogilvies would ruin their business.

So Ogilvies make Royal Household Flour the best flour, in their *own* protection. Incidentally that is *your* strongest protection—it guarantees you the best flour because the brand carries with it Ogilvie's Reputation.

Ogilvies simply ask a trial—knowing that it will make a permanent friend for Royal Household Flour.

Lockport and Perkin's machines are being used, and the company hope to demonstrate that shingles of the very highest grade can be turned out on this class of machine. This addition to the sawmill will utilize a lot of timber that cannot be used in the sawmill, but in which there is a great deal of clear lumber suitable for making first-class shingles.

Mouldings of all kinds will be turned out by the planing mill. The shingles and lumber will all be air dried, but a small steam kiln will be put in for handling mouldings. There is a well equipped blacksmith shop in the mill. Altogether the Mundy Lumber Company bids fair to fulfil what it has started out to do, namely to supply the trade with rough and dressed white pine and red cedar for every purpose.

GENERAL.

The Mundy Lumber Company is already, directly and indirectly, one of the largest employers of labor in the district. At the mill there are over 75 men on the payroll, and an equal force is at work in the logging camps.

The company's store and office building is 100x20 ft. The store is subdivided into grocery, dry-goods and meat departments, in all of which large stocks are carried. The store is in charge of Mr. James Lane, who is also the postmaster at Three Valley. On the upper floor of the building are the company's offices and the living rooms of the manager and his staff. The offices are well furnished and equipped for work. A large boarding house has been built, covering a ground space of 70x40 ft. It is prettily situated on the lake shore, and is quite pretty architecturally. Stores are delivered right at the door by the company's tug. The main dining room is 16x38 ft., while a smaller one two-feet narrower allows of the largest crew finding accommodation. There is a verandah all round the building. A laundry has been built on a small island in the lake, so that the best sanitary conditions can be obtained.

The company own a tug which is kept hard at work. It has been named "Commodore McRae," after the popular postmaster of Revelstoke, and is in charge of Captain Patch.

The company's operations are under the active management of Mr. Mundy, president of the company, who is one of the most up-to-date lumbermen in this country.

The Mundy Lumber Company has a big field of operation before it, with first-class reserves of timber of an extent which will supply the raw material for many years to come. It has all the advantages of natural conditions and transportation that a mill could desire, and, with its up-to-date plant and practical management, the company is destined to take a prominent place in the great industrial enterprises of the West. We wish the company all success in its operations

The Food That Builds

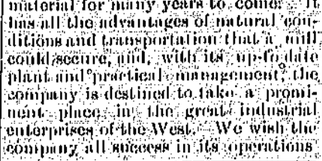
Maybe you think of Mooney's Sodas only as a toothsome tidbit. Don't overlook their food value.

Mooney's Perfection Cream Sodas

are made of finest Canadian wheat flour, pure butter and rich cream. There's nothing else of equal size and cost that contains so much wholesome nourishment.

An ideal food.

All grocers have them—fresh and crisp in air-tight packages.



A Judicious Inquiry.

A well known traveling man who visits the drug trade says he has often heard druggists inquire of customers who asked for a cough medicine, whether it was wanted for a child or for an adult, and if for a child they almost invariably recommended Chamberlain's Cough Remedy. The reason for this is that they know there is no danger from it and that it always cures. There is not the least danger in giving it, and for coughs, colds and croup it is unsurpassed. For sale by all druggists.

APPLICATIONS FOR TIMBER LICENSES, SEPTEMBER 7th, 1905.

TAKE NOTICE that thirty days after date we intend to apply to the Hon. Chief Commissioner of Lands and Works, for a special license to cut and carry away timber on the following described lands on Arrow Lakes:—

Number One.

Commencing at a post marked "Y. C. L. Co. north-west corner post," on the north side of Fosthall Creek, below the forks, and just east of special license 5327, running thence east 160 chains, thence south 40 chains, thence west 160 chains, thence north 40 chains to point of commencement.

Dated September 7th, 1905.

YALE-COLUMBIA LUMBER CO., Ltd.

Number Two.

Commencing at a post marked "Y. C. L. Co. south-east corner post," about eight miles up Fosthall Creek, on Arrow Lakes, and running north-west of license 5279, running thence west 80 chains, thence north 80 chains, thence east 80 chains, thence south 80 chains to point of commencement.

Dated August 28th, 1905.

YALE-COLUMBIA LUMBER CO., Ltd.

Number Three.

Adjoining application No. 2 on the east, on the north fork of Fosthall Creek just north of small branch coming in from west side of creek. Commencing at a post marked "Y. C. L. Co. south-west corner post," running thence north 80 chains, thence east 80 chains, thence south 80 chains, thence west 80 chains to point of commencement.

Dated August 27th, 1905.

YALE-COLUMBIA LUMBER CO., Ltd.

Number Four.

Commencing at a post marked "Y. C. L. Co. south-east corner post," on the south branch of Fosthall Creek, about seven miles from Arrow Lake, running thence west 80 chains, thence north 80 chains, thence east 80 chains, thence south 80 chains to point of commencement.

Dated August 28th, 1905.

YALE-COLUMBIA LUMBER CO., Ltd.

Number Five.

Commencing at a post marked "Y. C. L. Co. north east corner post," about six miles from Arrow Lake, on south branch of Fosthall Creek, about one-half mile above the forks running thence south 80 chains, thence west chains, thence north 80 chains, thence east chains to point of commencement.

Dated August 28th, 1905.

YALE COLUMBIA LUMBER CO., Ltd.

Number Six.

Commencing at a post marked "Y. C. L. Co. south-west corner post," lying north-east of application No. 5, and south-east of special timber license 5279, running thence north 80 chains, thence east 80 chains, thence south 80 chains, thence west 80 chains to point of commencement. This land lies just north of special license 5327.

Dated August 28th, 1905.

YALE-COLUMBIA LUMBER CO., Ltd

Number Seven.

Commencing at a post marked "Y. C. L. Co. south west corner post," on the north branch of Fosthall Creek about nine miles from Arrow Lake, running thence north 80 chains, thence east 80 chains, thence south 80 chains, thence west 80 chains to point of commencement.

Dated August 28th, 1905.

YALE-COLUMBIA LUMBER CO., Ltd

Number Eight.

Commencing at a post marked "Y. C. L. Co. south-west corner post, on north branch of Fosthall Creek, about 8½ miles from Arrow Lake, on the west side of the stream, running north 80 chains, thence east chains, thence south 80 chains, thence west 80 chains to point of commencement.

Dated September 5th, 1905.

YALE-COLUMBIA LUMBER CO., Ltd.

WAH CHUNG'S

RESTAURANT, FRONT STREET

Crockery of all Kinds.
Plain and Fancy.

Best makes of Japanese and China Ware.

Splendid supply of Fresh Vegetables from S. D. Crowle's ranch.

Colds

It should be borne in mind that every cold weakens the lungs, lowers the vitality and prepares the system for the more serious diseases, among which are the two greatest destroyers of human life, pneumonia and consumption.

Chamberlain's Cough Remedy

has won its great popularity by its prompt cures of this most common ailment. It aids expectoration, relieves the lungs and opens the secretions, affecting a speedy and permanent cure. It counteracts any tendency toward pneumonia.

Price 25c, Large Size 50c.

BABY'S OWN SOAP

prevents roughness of the skin and chapping.

Best for toilet and nursery use. 033

MARRIED.

LESLIE-MUNN—At Enderby, in the Presbyterian Church, on Sept. 26th, by Rev. John Fernie, William Thomas Leslie, chief waiter on s.s. Aberdeen on Okanagan Lake, to Mary Harriet Ethelinda, third daughter of Roderic Munn, Marshfield, Prince Edward Island.

Local and General.

J. M. Scott had in his office this week a magnificent block of ore shipped from the Standard mine.

At a meeting last night the Y. M. C. A. was formally organised but we have to hold over report.

There is much excitement in the country between Montana and British Columbia over strikes of oil.

H. N. Coursier has kindly presented the school with a block of fossils taken from the coal mine he is representing.

D. McLennan, of the Windsor Hotel, Trout Lake, got badly shaken up by falling off the roof of the hotel.

D. McCarthy has taken a contract for building a four-roomed cottage for Joe Bullosh on Fourth Street, and for adding four rooms to Mrs. J. Lyttle's residence.

There is likely to be a lot of building in Revelstoke at an early date, many people talking of building either for themselves or to let, as there is such a large demand for tenant houses.

E. C. Fromey was the lowest tenderer for the concrete retaining wall to be built by the C. P. R. behind the new station, but the company have decided to do it by day work instead of letting a contract.

When at the coast H. N. Coursier had the opportunity of hearing the Irish Guards Band, who appear at Revelstoke on Monday. He writes saying the audience were spell bound during the performance and every item was encored.

Next week the Methodist church will be moved to the new site at corner of Second Street and Campbell Avenue. The church has also purchased from C. B. Hume for $1,500 the site on Third Street, opposite F. McCarty's. The cost of these matters are estimated at $2,650 of which $2,070 was subscribed at the meeting at which they were decided on.

What was supposed to be a case of attempted suicide occurred last evening when a man named Clark, who is stated to be a C. P. R. watchman at Field, got into the river off Front St. and was washed down to the bar where the dredge is working when he was rescued. His statement is he was standing on the bank when it gave way and he fell in.

G. A. Scott has moved his tailoring business from the shop on McKenzie Avenue to more extensive premises on First Street, which have been recently fitted up for that purpose. The firm name will now be Scott and Fox.

MURDER CASE

Man Shot on Robson Avenue and Arrest Made.

Last night a shocking shooting affray happened in the city when a man named John Sjoberg was shot in a house occupied by Charles Johnson on Robson Avenue. It is stated a quarrel arose between Sjoberg and Johnson when the latter fired a shotgun at him, the charge entering his right lung. Sjoberg died shortly afterwards. Johnson was arrested. The two men have been in town some weeks, having come from Alberta. Johnson had been employed by Ald. Foote. An inquest is being held as we go to press. Johnson had been drinking and it is stated he threatened the whole household.

The crime was the result of jealousy of Johnson of the relations between his wife and deceased. When he got the gun to do the shooting he told his wife to get out of her bed and go in the middle of the floor when he would shoot her. She begged him not to shoot here, and when her son came out of his room Johnson told him to stand aside or he would be shot. She begged Johnson to bring a revolver he had and as soon as he appeared in the doorway Johnson fired the fatal shot. The wife then rushed from the house to escape her husband's fury, as he had loaded the gun with two cartridges, one of which he probably intended for her and the other for Sjoberg.

LADIES HOSPITAL GUILD.

Election of Officers.

At a meeting of the Ladies Hospital Guild on Tuesday the following were elected officers for the ensuing year:

Hon. President, Mrs. Phipps; President, (re-elected) Mrs. B. A. Lawson; 1st Vice-president, Mrs. H. A. Brown; 2nd Vice-president, Mrs. G. M. Clark; Treasurer, Mrs. W. Elson; Secretary, Mrs. J. M. Scott; Treasurer in charge of collection boxes for Convalescent Fund, Mrs. T. H. Dunne.

The treasurer's report showed receipts $570.10, expenditure $201.47, and balance in hand $377.63.

The secretary's report showed it was proposed to devote the funds in hand towards building a verandah round the hospital. From the band concerts and teas $151.65 had been realised for this purpose. The annual ball realised $310. An offer of the MAIL for a special hospital edition had not been acted on.

Votes of thanks had been accorded to Mr. and Mrs. Tupping for their many kindnesses during the year and to those who had otherwise assisted the work of the Guild.

ADAIR MANUFACTURING CO.

Get Ready to Start Business.

The Adair Manufacturing Company are negotiating with S. McMahon for the purchase of his blacksmith business with a view to making it the nucleus of their stump burner and airtight heater manufacturing business, machine shops and foundry. They are in negotiation with first-class machinists for the operation of the industry which, if carried out on the plans contemplated, will be an important addition to the industrial features of the city.

MOUNTAIN LUMBERMEN

Hold Important Meeting.

A meeting of the Mountain Lumber Manufacturer's Association was held at the Revelstoke Club yesterday and today. There was a large representation from all districts, about 25 of the leading manufacturers being present, and including the following:—A. F. Dudgeon and F. E. Sise of Bowman Lumber Company, Revelstoke; T. Lindgate, of Big Bend Lumber Co., Arrowhead; M. Avery, of Arrowhead Lumber Co., Arrowhead; H. H. Ross, of Ross Bros & Co., Elkmouth; A. E. Watts, of Elko; Jas Genelle and J. G. Billings, of Yale Columbia Lumber Co., Nakusp; J. S. Wood, of Mundy Lumber Co., Three Valley; Otis Staples and F. D. Becker, of Otis Staples Lumber Co., Bayard; M. Carlin and F. W. Jones, of Columbia River Lumber Co., Golden; P. Lund, of Crows Nest Pass Lumber Co., Wardner; John Hanbury, of North Star Lumber Co. Elkmouth; J. A. Dewar, of Porto Rico Lumber Co., Ymir; Jas. Ryan, of Standard Lumber Co., Baker; E. H. Heaps, Vancouver; Robinson and McKenzie, Cranbrook; G. P. Wells, of W. C. Wells Co., Palliser.

Considerable discussion took place about general conditions which have been unsatisfactory for some time past on account of high price of supplies, high wages, short supply of labor and low price of lumber.

It was decided to appoint a secretary of the association, who will devote his whole time to the affairs of the association, and particularly to supervising the grading of lumber and process of manufacture.

J. G. Billings, of the Yale-Columbia Lumber Co., was appointed secretary pro-tem to look after the affairs of the association until a permanent appointment is made.

Geo. P. Wells, of Palliser, is the man slated for this position as soon as the transfer of his business to an American Company is completed.

While there is no increase in prices it is understood the present prices will be strictly maintained, and as a shortage of about fifty million feet in the 1905 production in the mountains has developed it is expected prices will materially advance in the next 60 days.

IRISH GUARDS BAND.

All those attending the concert Monday evening are earnestly requested to come early, as concert will commence at 8.15 sharp, so as to be on time and not interfere with audience seated. Mr. Hassell has kindly offered to play any popular piece for which there is the most popular demand.

The dance at the Drill Hall will commence immediately at the close of the concert, Coy. 5 R. M. Rangers being the hosts of the evening.

FATAL ACCIDENT

Railway Section Foreman Killed.

A fatal accident occurred at Bowie yesterday when section foreman Magh Oga was run over by an extra east engine in charge of Engineer McKinnon. The foreman was going along the line on his speeder when he met the engine and jumped off but failed to get clear and was crushed to death by the engine.

HIGH SCHOOL.

At the invitation of C. B. Sissons of the high school there was a large attendance Monday to witness the presentation of prizes. Our space forbids a full report. The prizes awarded were: C. F. Lindmark's prize to Geoffrey Haggen for highest marks in last examinations, and Dr. Cross's prize to Miss Jean Hyatt for highest average at entrance examinations.

How to Cure Corns and Bunions

First, soak the corn or bunion in warm water to soften it; then pare it down as closely as possible without drawing blood and apply Chamberlain's Pain Balm twice daily, rubbing vigorously for five minutes at each application. A corn plaster should be worn a few days to protect it from the shoe. As a general liniment for sprains bruises, lameness and rheumatism Pain Balm is unequaled. For sale by all druggists.

A House Cleaning Luncheon

Clark's sliced smoked Beef—a delicious and substantial dish for any meal—ready to serve. Ask your dealer.

CORRESPONDENCE.

THE LORD'S DAY.

Editor KOOTENAY MAIL.

SIR—Will you allow me space in your valuable paper for these few questions for the Lord's Day Alliance advocates, as some of these supporters are raising considerable annoyance to me and my friends at my boarding house? I feel it is my duty to put these questions to their leaders before the public.

1—Is Sunday the first day of the week or is it not?

2—Is Saturday the seventh day of the week or is it not?

3—Which one of the days above mentioned is in the Commandments, either?

4—Where were the Ten Commandments written and who wrote them? What did he write them with, and who did he hand them to?

5—Are the preachers of today teaching the law of God as our Saviour taught it?

6—Was our Savious born of the Jewish race or not? If not, what race?

7—Can a man add to or take from the Ten Commandments one word and teach the same without committing sin according to the Scripture?

8—Did our Saviour in his teachings make any change in the Ten Commandments of God or not? If so, what Commandments did he change?

9—Who wrote the Book of Revelations, and how did he receive the words that are written in the Book?

10—Can a man keep a day holy that never was created holy?

11—What day of the week was created holy?

12—Is there any verse or chapter in the Book of Revelations that says "keep the Commandments," and what verse and chapter?

13—Is there any other divine volume on earth except the Bible? If so what is the title of it?

14—Did our Saviour, when on earth, keep the Ten Commandments to the letter, or did he not?

15—How did we receive Sunday as the Sabbath, and is it in the Ten Commandments?

16—What time does a day begin, and when does it end according to the Scripture? As all men know there is an end to a day and therefore there must be a beginning.

17—Was there a Prophet wrote in the Bible that they would think to change the law of God and they would do it, and it would be given into their hands, and what is to become of the people that changed the law?

18—How did man know sin?

19—Which day does the Lord's Day Alliance leaflet refer to as it speaks of two days?

Yours &c.,

R. NICHOL.

Cook's Cotton Root Compound.

The only safe effectual monthly medicine on which women can depend. Sold in two degrees of strength—No. 1, for ordinary cases, $1 per box; No. 2, 10 degrees stronger for Special Cases, $3 per box. *Sold by all druggists.* Ask for Cook's Cotton Root Compound; take no substitute.

The Cook Medicine Co., Windsor, Ontario.

Some Seasonable Advice.

It may be a piece of superfluous advice to urge people at this season of the year to lay in a supply of Chamberlain's Cough Remedy. It is almost sure to be needed before winter is over and much more prompt and satisfactory results are obtained when taken as soon as a cold is contracted and before it has become settled in the system, which can only be done by keeping the remedy at hand. This remedy is so widely known and so altogether good that no one should hesitate about buying it in preference to any other. It is for sale by all druggists.

WANTED

A man to open and manage an agency for us at or near Revelstoke. Experience in this line is not necessary, preference being given to one who is willing to work and earn for himself a good income.

We would like to hear from some who have done agency work.
