Paragraphs of Local Interest

One of the nicest courtesies you can show your friends is to let them learn through this column of your visit whenever you go away. Let us know when you have visitors at your homes. The Ledge will consider it a courtesy whenever you give us an item of this kind. Write or phone 29L.

Elmer Hiskey left on Tuesday morning for Spokane.

Considerable land is being cleared by farmers up Boundary creek.

James Hallett left on Tuesday on a few days trip to Spokane.

Place your order for Fall Rye now. Brown's, Midway.

Mr. and Mrs. D. Oxley, of Eholt, were visitors in town on Monday.

Miss I. Galt, of Vancouver, is the guest of Mr. and Mrs. J. McD. Reid.

J. B. Delong, High School Inspector, paid an official visit to the school on Wednesday.

Fred Warlock, of the Victoria Phoenix Brewing Co., was in town on Saturday.

A. N. Docksteader has moved into W. H. Docksteader's house on Long Lake St.

Juan Puddy left on Tuesday morning for Spokane where he will spend the next two months.

BORN—To Mr. and Mrs. J. C. Casselman, of Boundary Fall, on Sept. 28th a son, Russell Edward.

Mrs. Royce returned to Calgary on Saturday after a few days visit with her sister, Mrs. A. R. Royce.

Miss Clara Emery arrived from Nelson on Tuesday morning to reside with her parents at Boundary Falls.

Mr. and Mrs. Roy Harris and Bill Spooner motored over from Trail and spent the week-end in town with friends.

Dr. H. E. Griffin will open for the practice of dentistry on Saturday in the dental parlors above Chas. King's office.

Mrs. A. Wakelin returned to her home in Trail on Wednesday after a very pleasant visit with Mr. and Mrs. J. Keady.

Mrs. Lyons who has been in Post Office for upwards of two years has resigned and Miss G. Lee is filling the vacancy.

Mrs. J. C. Cruse left last week on a visit to friends in Vancouver prior to going to Lardo where she will visit her husband.

A. C. Mesker was in town on Monday. Since retiring from railroad life Mr. Mesker has been working on his ranch on the Main Kettle river.

The Misses Cassie and Louise McDonald left on Tuesday morning for Spokane. Louise expects to remain in Spokane while Cassie will return in ten days.

Gordon W. Smith, who was relieving in the Customs office for three weeks returned to Vancouver on Friday last, accompanied by his wife and little boy.

The Banff Dance Orchestra will play at Rock Creek for a big Dance on Tuesday, Oct. 23rd, in Riverside Hall. A large crowd is expected. Come and enjoy the music.

A little excitement was stirred up on Monday when a fire starting in the grass near Ola Lofstad's house and travelling with such speed that the fire hose had to be brought into action.

Miss Victoria Shillcock returned to her home in Kettle Valley on Monday evening after a delightful motor tour through Washington, Oregon and Idaho. Miss Shillcock attended the Round Up while in Pendelton, Oregon.

A regular meeting of the City Council was held on Monday night Mayor Gulley and all available aldermen being present. Considerable routine business was transacted and all committees reported progress. A feeling of optimism prevailed.

Miss Ruth Swanson, who has been the guest of Mrs. P. E. Crane at the Bell mine, Beaverdell, for over three weeks, arrived in town on Saturday to be the guest of Mrs. A. J. Morrison for a few days before returning to her home in Spokane.

The Masonic Ball to be held in Masonic Hall on Friday, Oct. 12th promises to be a grand affair. Everybody who can dance will be there, besides there are at least four cars coming from Grand Forks and many from the surrounding district.

As will be seen by the advertisement in another column the G. W. V. A. will hold the sixth annual Masquerade Ball in the Masonic Hall on Friday, Nov. 9th. This dance has always drawn big crowds and it is time to start getting a costume ready.

At the conclusion of the hearing at the Court House on Sept. 28th, P. H. McCurrach, S. M., and James Kerr, J. P., found Ola Lotstad guilty of selling liquor and adjudged a punishment of six months. Notice of appeal was given and bail was furnished.

The Princeton Star Says: "At present several colds appear to be epidemic around town, and among other patients at the hospital this week undergoing treatment from this cause are two oldtimers. Mose Burns, "the hard rock miner" and Jas. Birnie, and old resident of the Boundary country, now engaged with the Allenby Copper Company."

Midway School Report For September

Miss Isabel Keir, Teacher

No. attending during month	28
Perfect attendance	22

Standing in Classes

Entrance: Nellie Brown.

Grade VII: Alice McMynn, Ruth Carr, Leslie Salmon, Madeline Hastings, Joy Sharp.

Grade V: Roy Sharp, Kathleen Salmon, Rosalie Brown.

Grade IV: May Sharp, Johnny McMynn, Kenneth Stewart, Mayneen Bush, Verna Evans.

Grade III: Gladwin Sharp, Olwen Mair, Jimmy Brown.

Grade II: Bernadine Brown, Gladys Mitchell, Alice Mair.

Grade I: Gordon Roberts, Luceal Evans.

Receivers: Marion Mair, Edythe Griffin, Jackie Brown, Mae Mitchell, Phyllis Rock.

Mining Notes

Ed. Mellrud is doing some development work on the Defiance for R. Lee.

Ola Lofstad is doing some development work on the Helen. This property is near the Argo on the south limits of the city.

Work commenced on the Spotted Horse Mineral Claim of the Jubilee Mining Co., on Monday morning. A. J. Morrison is in charge and a has a crew erecting a blacksmith shop and making prepartions to drive a tunnel on the lead near the old railway grade.

Chaplin Makes Six Reeler

Window smashing as a pursuit in order to provide a friendly glazier with more work is an exhilirating vocation. It is also highly humorous especially when Jackie Coogan is the breaker of glass and Charlie Chaplin the repairer. This is one of the spots in the comedian's latest picture, "The Kid" which will be the attraction at the Greenwood Theatre, on Saturday, October 6th, that has gained for it the title of First National's six reels of joy.

Proficiency List in order of merit:

Grade III b. John Morrison, Beatrice McLaren, Viola Benson, Alice Ritchie, Ruth Cox, Donald Garris.

Grade II b. June Toney, Hugh McCurrach, Lawrence Gulley.

Grade I a. David Nichols, James Forshaw, Mark Madden, Leonard Sortome, Victor Ritchie.

Grade I b. Dorothy Garris, Celia Klinosky, Melvin Fenner, Ernest Johnson, Ernest Cox.

REGULARITY AND PUNCTUALITY:

John Morrison, Viola Benson, Ruth Cox, Donald Garris, June Toney, Ernest Cox, Celia Klinosky.

Report of Anaconda School September, 1923

Teacher, Helen E. Hopps.

No. on roll	9
Average daily attendance	8.23
Percentage of attendance	91.

Proficiency List.

Sixth Grade: John Campolieto, Rosie Bombini.

Third Grade: Cynthia Docksteader, Arnold Bombini.

First Grade: George Hingley, Dorothy Boag, Elbert Granberg, Elmer Granberg, Peter Maletta.

Note: No perfect attendance—School closed one day.

Rock Creek Fall Fair

The great Rock Creek Fall Fair will be held in Riverside Hall on Friday, Oct. 5th. This Fair has the reputation of year by year in every way getting better and better; and this year will be no exception to the rule. There will be good exhibits, good crowds and the Dance in the evening will be par excellence.

Midway News

C. J. Lundy was home from Beaverdell for the week-end.

Mrs. T. Clark is confined to her bed through illness. Her many friends wish her a speedy recovery.

Joe Richter was over to Grand Forks and had an X-Ray taken of his leg. The bones are perfectly set and he is getting around again.

The Ladies Aid will hold a Sale of Work some time in November, date of which will be made known later. Afternoon tea for the grown-ups and Fish pond for the kiddies.

A picture of Howard H. Pannell's moving outfit was printed in the London (Eng.) Times, of Sept. 12th. It shows the Anglican Church on its final move to Kettle Valley. Mr. Pannell, the horse and tackle are shown also.

Don't forget the day and the date Saturday, Oct. 6th, at the Old School House. It is desired that every patriotic person in the Greenwoed riding be present to discuss the erection of a suitable memorial to our fallen heroes.

Rally Day at Midway

On Sunday, Sept. 30th, the Sunday School scholars did justice to the fine programme arranged for them. It was appropriate for the season and was as follows:

Recitation Leslie Salmon
"How the Corn Grows"
Song "Hymn of Growth" Choir
Recitation Ursula Warmoth
"Garden Grace"
Rerding Roy Sharp
"The Parable of the Sower
Recitation Alice McMynn
"Build the More Stately Mansions"
Reading Nellie Brown
"Growing up into Christ"

The training was undertaken by Mrs. Romstead who is a very capable lady for that work.

Mrs. R. D. Kerr, Mrs. Romstead and Miss A. Thomet are in charge of the Sunday School. The junior assistant teachers are the Misses Nellie Brown and Joy Sharp.

Midway has quite a number of promising fine children, who put their whole heart and soul in church work; but how very discouraging it is for them and the teachers, that the parents do not take sufficient interest in them to come and hear what is being done.

There is nothing so beautiful as prayers and songs from a childs lips and the parents would give up everything for the faith the little ones possess.

Sunday School meets every Sabbath day and parents are invited to come and encourage the good work.

Boy Scouts

Troop meets on Friday at 7:30 p.m. in the Fire Hall.

Stops Coughs, Colds Sore Throat in a Night

Think of a medicine so healing, so balsamic and antiseptic that every trace of cold and soreness goes before it.

"CATARRHOZONE" is so certain in catarrh, bronchitis, that every case is relieved promptly.

Experiment no longer—success is guaranteed if you use CATARRHOZONE—a veritable death to catarrhal diseases, because it destroys their cause and remedies their effects.

Delightful and simple to use, quick to act, sure in results. Better get CATARRHOZONE today. Large size, sufficient for two months' treatment, price $1.00; small size 50c. At all druggists. Refuse a substitute for CATARRHOZONE. By mail from The Catarrhozone Co., Montreal.

Nelson's Flagship

A Visit to the Flagship Victory is Described in a Letter

A young lady writes the following account of a visit to Admiral Nelson's old flagship, the Victory:

"On Monday it was arranged for me to go on the Victory at 2 p.m., as it was my only chance. A color-sergeant met me at the dockyard gate to take me on board. That's an honor, for it's usually the ordinary seamen who take people around; the N.C.O.'s only do it by special request. I've got some souvenirs of the Victory, a serviette ring with the coat of arms on it, bought on board, and a bit of the original wood, and I've got a certificate saying so. I saw where Nelson died, and the boat his body was taken up the Thames to St. Paul's in, the old guns, the countless other wonderful relics. I was just lucky, as on Thursday all the relics in the museum are being taken to the big museum in the dockyard, and the Victory is going to be changed. I was right down in the dry dock at the keel. They are making a concrete wall before the mouth of the dock and the poor old vessel is going to remain where she now is forever." That is the end of the letter, and it will probably be interesting to a number of people who have no opportunity to go to Portsmouth, or who, having gone in the days that are past, may like to take a vicarious glimpse of the great naval centre once more. The Victory will remain, although ignominiously grounded and deprived of her native element, a symbol of the great days of old, when it was rather by might of muscle and a brave wisdom that battles were won, than by cold mathematical calculation and craft of cunning brains keen matched against each other. The iron heart may be as brave and as wise as the heart of oak, but we can hardly love it as well.

People do not read J. Fenimore Cooper nowadays, says a writer in the Hamilton Spectator, and they miss a good deal by not doing so. He wrote sea stories as well as tales of the red man, and some think his sea tales are the better narratives. But that is just the difference between a seaman and a landman. The man who can appreciate both has a fine advantage. In his preface to "Two Admirals," Cooper pays a compliment to Nelson and his fleet, which is all the more welcome from such a source. Incidentally, he stress a point which was forgotten by Admiral Craddock at Coronel. "The efficiency of the fleet is necessarily confined to the rate of sailing of the dullest of its ships." This was perhaps even truer of sailing vessels than of steamers. Napoleon, he says, never grasped this fact. One brigade can march as fast as another, but it is not so with vessels. Then he goes on to discuss Nelson. "Perhaps the best fleet that ever sailed under the English flag was that with which Nelson fought the battle of the Nile. It consisted of twelve or thirteen small seventy-fours, each of approved qualities, and commanded by an officer of known merit. In all respects it was efficient and reliable. With such men as Hallowell, Hood, Trowbridge, Foley, Ball and others, and with such ships, the great spirit of Nelson was satisfied. He knew that whatever seaman could do, his comparatively little force could achieve. When his enemy was discovered at anchor, though night was approaching and his vessels were a good deal scattered, he at once determined to put the qualities we have mentioned to the highest proof, and to attack."

Nelson at the Nile had no "other order of battle than that which directed each commander to get as close alongside of an enemy as possible—the best proof of the high confidence he had in his ships and in their commanders." Cooper says that it is now known that all the early accounts of the battle and Southey's narrative are pure fiction. This fact, he states, came to him through Commodore Charles Ballantine Morris, from Sir Alexander Ball. The truth, as related to both the Nile and Trafalgar, he says, was just as little like the first accounts as well could be. "Nelson knew the great superiority of the English seamen; their facility in repairing damages . . . His great merit at the Nile was in the just appreciation of these advantages, and in the extraordinary decision which led him to go into action just at nightfall, rather than give his enemy time to prepare to meet the shock . . . The French were taken by surprise . . . A large portion of their crews were on shore, and did not get off to their ships at all, and there was scarcely a vessel that did not clear the decks by tumbling the mess chests, bags, etc., into the inside batteries, rendering them, in a measure, useless, when the English doubled on their line, by anchoring inside, and putting two ships upon one, that gave Nelson so high a reputation as a tactician."—Montreal Gazette.

Cripples At School

Need Care Which Only a Specialized School or Class Can Give

One of the phenomena in the education development of recent years is the provision of special classes and special schools for little people of special needs. We have been witnessing the setting up of auxiliary classes for mentally retarded children, outdoor classes for the tuberculous sight-saving classes for those whose eyes are weakened, and we have for many years had schools for the blind, and schools for the deaf and dumb. Is anything being done for the crippled child? Or do crippled children fit satisfactorily into the life and work of the ordinary school?

Those who have had long and intimate experience with crippled children are of the opinion that a crippled child who is able to do so profits by attending an ordinary school. But it is also acknowledged by these experts that a large proportion of crippled children are not really able to attend an ordinary school. They need the special care which only a specialized school or class can give them. The advantages of the special school or class are obvious. In the first place transportation to and from school is provided for the pupils. In the second place they are given remedial exercises at stated intervals during class hours as prescribed by the doctor. Then, too, they are under the supervision of a teacher who is specially trained to conduct the studies of physically handicapped children. Hours are set aside for rest. Hot lunches are prepared for the children under the direction of a dietitian who knows the needs of the pupils. Classroom equipment is specially suited to the requirements of the cripple—seats and desk tops are adjustable, aisles are made wide enough so as to permit a comfortable disposal of little braced limbs without interfering with the progress of anyone who wishes to walk up or down the aisle. A school built expressly for the use of crippled children may have not only classrooms, a dining-room and a kitchen, but a surgical dressing room as well, so that children may report for dressings without unnecessary loss of time. The close co-ordination of school work and remedial activities which of itself is enough to justify the establishing of special classes for cripples. Intellectual growth in such a school is not attained at the expense of physical growth. Both are achieved together.

There is another advantage, however, which ought not to be overlooked or minimized. The school for cripples may give to those children who need it a chance to fit themselves for the task of earning a livelihood. An experiment of this sort has been tried in Montreal and has been very satisfactory in its results. Boys and girls who attend the Montreal School for Crippled Children may elect to take a commercial course, with shorthand, typewriting and bookkeeping. The hours of classwork are short enough to prevent undue fatigue, but pupils receive a greater amount of individual instruction than is possible in the ordinary business school, therefore it is not surprising that graduates of this school have been able to take down-town positions and compete successfully with graduates of other schools. This phase of the special school is of course a great boon to those crippled who come from homes of the poor and lower middle classes.

Unfortunately, the special educational opportunities now offered in Canada to the crippled child are almost negligible. For the most part we let the cripple either drag himself to and from the public school or get along at home as best he can, with results that are frequently deplorable. This lack of policy is to be regretted. The remedy lies probably within the reach of the ordinary citizen. Groups of men and women in other countries have been able by concerted effort to make adequate provision for the education of cripples in their own community, and governments have been persuaded subsequently to take over the responsibility for carrying on the activities thus inaugurated. There is every probability that Canadian citizens will devote themselves to meeting this need and that ultimately the provision of special classes for cripples by our boards of education will become a matter of course.

There is nothing to be gained by being a knocker.

MRS. MISENER'S ACHES AND PAINS

Vanished After Using Lydia E. Pinkham's Vegetable Compound

"Branchton, Ont.—"When I wrote to you for help my action was mostly prompted by curiosity. I wondered if I, too, would benefit by your medicine. It was the most profitable action I have ever taken, I heartily assure you, for through its results I am relieved of most of my sufferings. I have takensix boxes of Lydia E. Pinkham's Vegetable Compound Tablets and a bottle of Lydia E. Pinkham's Blood Medicine, and I can honestly say I have never been so well before. I had suffered from pains and other troubles since I was fifteen years old, and during the 'Great War' period I worked on munitions for two years, and, in the heavy-lifting which my work called for, I strained myself, causing pelvic inflammation from which I have suffered untold agony, and I often had to give up and go to bed. I had doctored for several years without getting permanent relief, when I started to take your medicines."—Mrs. GOLDWIN MISENER, Branchton, Ont.

Write to the Lydia E. Pinkham Medicine Co., Cobourg, Ontario, for a free copy of Lydia E. Pinkham's Private Text-Book upon "Ailments of Women."

Detrimental to Wheat Industry

Practice of Mixing Wheat Should be Forbidden

The practice of mixing higher grades of Canadian wheat is detrimental to the wheat raising industry in Canada, the Royal Inquiry Commission was informed by C. C. Castle, former Winnipeg grain man, at a sitting at Victoria, B.C. He appeared before the commission to urge that mixing of the first three grades of wheat should be forbidden. Where grain was treated and raised in quality, such raised grades should be labelled, he thought.

The practice of mixing low grades with high grades to improve its quality was depriving Canadian farmers of the benefit which they ought to receive from the fact that the wheat they raise is their best wheat, the grain most desirable for milling purposes. The purchaser should never be permitted to confuse tested grain with first grades, Mr. Castle argued.

Takes Revenge On Car

Horse Struck by Auto Wrecks Radiator and Lamps

In a contest between a horse and a motor car at Niagara Falls the horse came off best. Charles Cummings and George Stewart were motoring along when the horse, which had broken out of a field, was hit. The car was stalled and the horse, in its excitement, kicked the radiator to pieces, smashed the lamps, went to the side and kicked the mud guard into scrap iron and then paid a visit to the back of the car and smashed the rear light. No one was injured.

A Striking Coincidence

The most striking coincidence in connection with the presidents of the United States is shown by the chief executives furnished by the State of Tennessee—Andrew Jackson, Andrew Johnson and James Knox Polk; all three were born in North Carolina, all were Democrats and each had thirteen letters in his full name. Four other presidents had thirteen letters in their names—Zachary Taylor, James Buchanan, Ulysses S. Grant and Woodrow Wilson.

Canadians in House of Commons

Canadians in England can always get into the gallery of the House of Commons by applying to the Canadian High Commissioner who gets tickets from the Speaker. This is only a courtesy and it is now proposed to set apart a special portion of the gallery for colonial visitors. Except in suffragette days or when there is a very important debate, any respectable-looking person can get into the galleries of the Imperial House of Commons by waiting his turn.

Parks Return Revenue

Canada's national parks will return a revenue to the Dominion in excess of $30,000,000 in 1923, according to estimates compiled by the Dominion Parks Commissioner.

The volume of tourist traffic to the parks has been unusually heavy this year. The number of visitors is expected to total nearly 200,000 before the end of the season.

Suspect Newfoundland

It is understood here the United States revenue authorities are turning their attention to Newfoundland to seek explanation of the source of big liquor shipments that are finding their way into America. An agent of the United States Government is expected to conduct an investigation.

Keeping Type Set By Harding

The last type set by Warren G. Harding has been plated in gold and sent to Washington to be kept with other relics of the late President. He set the type in the composing room of the Fairbanks News-Miner. At that time he was presented with a gold make-up rule by printers of interior Alaska.

American doctor says that soap is a deadly foe to leprosy. Strange that more small boys aren't affected with leprosy.

Speed of Daily Life

The Pace of All Human Performance Growing Faster

It needs no portentous memory to hark back to the days when at least the more important dispatches of an administrator or a diplomat were literally written by himself, and when the duplication of even lengthy documents was done by hand. In the spacious days of the quill, letter writing was in very deed the writing of letters—no tapping of the keys of a machine, no barking of short lengths of jargon into the ear of a shorthand writer or the mouthpiece of a dictaphone. The rapidly-quickening whirl of the daily round has, with centrifugal violence, shot off the laborious quill-driven into the outer darkness. In his stead reigns the Robot who can boast a hundred words to the minute on the typewriter and a hundred and eighty to the minute in the shorthand notebook. The change is not all clear gain. With the quill goes much of grace in performance and delight in craftsmanship. The fashioning and refashioning of one's own implement was inevitably accompanied by care, pride and pleasure in its use. The loss of such accomplishments is one small portion of the price exacted by the increasing speed of daily life. Inexplicably, but irresistibly, the pace of all human performance grows ever faster and more furious. More and more crowded are the hours, but it is not yet clear that life is any the more glorious for it all. The praiser of past times has no difficulty in supporting the thesis that the pace of the process is anything but a guarantee of perfection in accomplishment. And the hustled toiler, weary of so much doing and of so little done, may be forgiven if at times he would gladly scrap all his modern ingenuities for old-fashioned quills and quiet.—London Times.

Peasant Becomes Indian Ruler

Present Gaekwar of Baroda Adopted When Lad of Twelve

News that it was not the Gaekwar of Baroda but his sick son, Prince Jaisingsoa, who died in a Dutch sleeping car, calls to mind that that picturesque potenate the Gaekwar has travelled through Canada. He ranks second among the 73 Indian rajahs and is entitled with three other native rulers to a salute of 21 guns. Absolute ruler of a principality 8,182 square miles in area, and overlord of 2,125,000 people, his annual income is more than $5,000,000. He maintains his own private army of horse, foot, artillery and engineers. Baroda's lord loves oriental splendor and likes to sit on his golden throne surrounded by his officers of state, or to make gorgeous progress through his dominion on elephants which are painted in the colors of the rainbow and hung with rich trappings. The Gaekwar of Baroda, though a descendant of the ancient Manhratta princes who founded that line, is strangely enough, not a patrician born but of the lowly cow herd class. In 1875, when the British Government had to depose the then Gaekwar of Baroda for misgovernment, they allowed his brother's widow to adopt as heir the present Gaekwar, then a lady of 12 living in a Deccan peasant hut. Educated by a British tutor, the boy turned into a fine man. He was knighted by Queen Victoria in 1887, and high order was also conferred on his wife. The Gaekwar has done great things to help the spread of education among all classes in his principality. The Gaekwar's contributions in money to the war ran into millions of rupees. He made an offer of everything he possessed, including himself.

Pulpwood Exports

The Americans are still importing pulpwood from Canada at a much heavier rate than they did last year, and shipments across the line during July amounted to 151,794 cords. Total exports of woodpulp for the four months ending July were 537,305 cords, as compared with 294,640 for the same period last year.

A Diminutive Piano

The English seem to like inventing or designing tiny things, and the latest of this nature is a miniature grand piano that has been the attraction in London amusement halls. Dimensions are not given, but it is so small that an ordinary finger covers several keys. It is perfect in every detail and correctly tuned.

Vancouver Harbor Elevators

Official confirmation has been given to a dispatch stating that the Dominion Government has agreed to advance approximately $200,000 to the Vancouver Harbor to be used for completion of the Woodward elevator. The elevator will be operated as a private undertaking.

The most valuable collection of postage stamps belongs to a Frenchman, and is said to be worth nearly a million dollars.

Wealth of the Pharaohs

Many Thrills Await World When King Tut's Tomb is Fully Explored

Less than one-fourth the wondrous antiques in Tut-ankh-amen's tomb have been removed, said Howard Carter, one of the discoverers of the tomb, in a lecture in London before a large gathering of relatives and friends of the late Earl of Carnarvon. The archaeologist, who co-operated with Lord Carnarvon in his work, said many thrills awaited the world before all the chambers of the tomb had been fully explored.

This work would occupy two years, he continued. He was confident that when the Pharoah's sarcophagus was opened this fall it would reveal the king in all the magnificent panoply of death, wearing a jewelled crown and dressed in sumptuous robes with precious embellishments. After the body had been examined and "the claims of science satisfied," he said, the king would be allowed to continue his eternal sleep in his original shrine.

Mr. Carter described Tut-ankh-amen as a "shadowy king," not of royal blood. His origin and life achievements were extremely obscure, and his claim to the throne rested solely upon his marriage to the third daughter of King Akhenaton.

Mr. Carter said he believed the tomb was that of a potential heir to the throne, rather than that of a ruling king. Tut-ankh-amen was probably buried by his successor, King Ay, who was depicted on the walls of the burial chamber as venerating Tut-ankh-amen.

Sugar Is Obtained From Dahlia Tubers

Flowers to be Grown Extensively in Southern California

Experts in California have discovered that the tubers of dahlias contain sugar, and thousands of acres are to be used in cultivating them for this purpose.

Tests have shown that dahlia sugar is one and a half times as sweet as cane or beet sugar. The flower-tuber is more easily grown than the sugar-beet, and, by a new formula that has just been completed by the University of Southern California, the cost of production is much about the same.

The discovery of the new sugar puts an end to a problem which has been troubling the medical world for some time—the problem of finding a sugar that can be taken by people suffering from diabetes, for dahlia sugar is quite harmless in such cases.

What a Trillion Is

Since several countries in Europe quote their paper-money circulation in trillions it may be interesting to try to grasp what a trillion is. Some experts in the treasury at Washington can count four thousand silver dollars an hour. Such experts working eight hours a day would need a hundred years to count a billion dollars. A thousand experts would need one hundred years to count a trillion.

A mother is someone who looks into the upper right-hand drawer of a dresser and finds something the rest of the family has spent hours hunting for.—Detroit News.

Probably the top round of the ladder exists only in the imagination, as nobody has succeeded in reaching it.

Destruction of Game

Wanton Slaughter of Game is Not the Sport of a Gentleman

Promiscuous shooting will have to be stopped or another generation will find nothing left but rats, mice and sparrows. Some hunters argue that certain kinds of game are inexhaustible, but the buffalo, the passenger pigeon and the heath hen have disappeared and they once covered the country to the extent of countless millions. Let those who must have game for the table go to it as within the law, but let those who seek the sport of a gentleman behave like one. That spirit will show a consideration of life and the rights and wishes of others.—The Los Angeles Times.

Unnecessary and Foolish

There is no more reason for modernizing the language of the Bible than for modernizing the pictorial representation of biblical characters. If the Scriptures should be rephrased in the lingo of the day, by the same token biblical characters should be portrayed in modern hats and skirts. If Moses must appear in a nifty morning suit, with bread removed, and Deborah in a golfing rig, with a cigarette, then their language should be brought up-to-date, of course.—Washington Post.

Fur Royalties

Nearly $10,000 in fur royalties was collected in The Pas by the chief game guardian last winter. This does not include the royalties collected from the Hudson's Bay Company and Revillon Freres, which will more than double this amount, nor does it include moneys secured through taxes, licenses and other sources of revenue.

A thick head incubates many thin ideas.

Auctioning Wealth Of Russian Royalty

Jewels and Art Treasures Sold in London and Paris

The vast collections of jewels and art treasures of the Romanoff family gradually are finding their way to the main auction rooms of London and Paris. They have come in such abundance during the last two years that they cease to incite curiosity or to bring more than the normal price for such articles.

Recently the most remarkable collection of 12 old French snuff boxes in existence, once the property of the Romanoff family, was sold in London for about $50,000, considered a low price.

One of the specimens, a gold oval Louis XV. box, beautifully chased, with a miniature of Frederick II. in the lid, and a small watch in the bottom said to have been presented to Voltaire by Frederick II., brought $5,000.

Strawberries and Honey

Crops this year are good around here as usual, says a report from Prince Albert, Sask. One man of Tisdale shipped 4,500 quarts of everbearing strawberries off half an acre and some settlers who recently came from the United States out here are going in extensively for honey. One man has 90 hives which keep him busy to keep them clear.

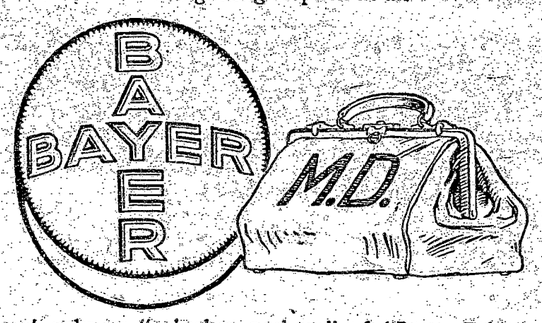
The Good Old Days

Another nice thing about the old days when we jogged along with a horse and buggy was that we didn't have to commit a couple of thousand traffic rules to memory.—Cincinnati Enquirer.

Lots of men pray for things they wouldn't be willing to work for.

ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all



Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds	Headache	Rheumatism
Toothache	Neuralgia	Neuritis
Earache	Lumbago	Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Should Take Measures At Once To Avert A Grain Blockade

Regina.—Suggestions that the Federal Government charter ocean vessels for grain transportation on the Great Lakes, in addition to making the fullest possible use of the Canadian Merchant Marine, as measures to avert the impending crop blockade and deadlock at the head of the lakes, have been forwarded to Ottawa by the Saskatchewan Government.

A reply to these proposals has been received from Hon. W. R. Motherwell, to whom, together with Hon. A. A. Low, the telegraphed communication was addressed, in which Mr. Motherwell expresses his opinion that the suggested remedy is the best available, "and is, I understand, being carried out by Low."

The foregoing announcement was made by Premier Chas. A. Dunning when interviewed with respect to the proposed conference suggested by the Manitoba Government on the crop blockade and the impending deadlock at Fort William.

"There has been enough conferring already. What is needed now is action," said Premier Dunning. "The Saskatchewan Government is quite willing to confer with other interested parties, but the situation is so acute that the inevitable delay which would result from such a proposed conference might only make matters worse.

"During the past ten days the Saskatchewan Government has been trying to get a grasp of the whole situation and to co-operate with those in authority in meeting a situation which threatens the welfare of the entire population of our western provinces.

"The problem is a difficult one, because of its international character, but surely the people of Canada and the United States will not allow an international combination of vessel owners to monopolize the Great Lakes and set at defiance the governments of both countries. We are told that Canada can do nothing, because the ships would then stay on the United States side of the lakes and the Interstate Commerce Commission of the United States is told that nothing can be done there because the vessels would then go to the Canadian side.

"It is clearly a case for international agreement. The Saskatchewan Royal Commission on Grain Marketing in 1913 recommended the control of the Great Lakes traffic by international commission, and apparently this is our only hope as a permanent solution.

"In the present emergency we are confident that the suggestions we have made to Ottawa for quick and drastic action is the best that this government can offer and no province has more at stake in the issue than Saskatchewan."

Cornish Miners For Dominion

Liverpool.—Thirty Cornish miners have sailed on the Montclair, this being the third party of Cornish miners to sail for Canada since the end of July and making a total of 80 in two months.

More than 1,000 Cornishmen, many of them tin miners, have settled in the Dominion within the past three years. Of these 300 are working in gold mines in Ontario.

Turkey Again In Charge

Constantinople.—The British post office, the last of such establishments maintained by the allies, closed last night and the Turks took all mails.

Preparations for the formal evacuation by the allies have been completed and the famous Turkish Iron division is soon to enter the city.

The exodus of Greeks, Armenians and Russians continues.

Prince Loses Valuable Horse

London.—One of the favorite hunting mounts of the Prince of Wales which cost £1,000, had to be destroyed yesterday owing to injuries it received while being exercised at Melton Mowbray, Leicestershire.

From Queen's to Glasgow

London.—Professor John Ronald Currie, of Queen's University, Kingston, Ont., has been appointed to the chair of public health in Glasgow University.

Picnic At the E. P. Ranch

Democratic Greeting of Lord Renfrew To Fellow Albertans

E. P. Ranch, Pekisko, Alta.—"Fellow Albertans, you are welcome, and I hope you will enjoy the outing. My ranch is open to you today, go as far as you like."

This democratic greeting, uttered by Lord Renfrew (Edward, Prince of Wales), served to put the 300 persons who attended the annual picnic of the Alberta Shorthorn Breeders' Association at the E. P. Ranch solely at their ease, and incidentally they took the royal rancher at his word. They inspected the buildings, the cattle and horses, talked livestock with Lord Renfrew and then concluded the picnic by asking him to pose for snapshots, which he did with unfailing good nature. Those in charge of the picnic crowded enough events into the afternoon performance to satisfy even the most exacting person, and no one enjoyed the afternoon better than Lord Renfrew himself.

Sporting a brand new stetson cowboy hat, and attired in a pair of khaki riding breeches, old grey tweed coat and a pair of army boots, he strolled around the ranch grounds much the same as an ordinary farmer. He displayed his prize-winning livestock with pardonable pride, and flushed with pleasure when Pat Burns, Western Canada cattle king, remarked that the Prince's yearling shorthorn bulls were some of the finest he had ever seen.

Australia Votes On Organic Church Union

Largest Presbyterian Assemblies Give Crushing Defeat to Plan

Toronto.—According to information received here the plan for organic church union has received "a crushing defeat" at the recent meetings of the state assembly of the Presbyterian Church in Australia, South Australia, West Australia and Victoria, which are the largest of the assemblies in Australia, rejected the amended basis of union and the union proposal, while New South Wales and Queensland voted in favor of the proposal, says the dispatch.

The Tax On Grain

Saskatchewan Protest May Go Before the Courts

Winnipeg.—In reply to Saskatchewan's complaint to the Federal Government against the imposition of a tax on grain future trading on the local grain exchange, Hon. R. W. Craig, Attorney-General, will urge the Dominion authorities to submit the matter to the courts for a ruling on the validity of the legislation. The Government of Saskatchewan claims the Manitoba Government has not the power to collect taxes on the produce of Saskatchewan.

Bulgaria Will Increase Army

Sofia.—The allied governments, through the commission of military control created by the Neuille treaty, have authorized the Bulgarian Government to increase the military forces of the country to such strength as is deemed necessary to cope with the situation in the interior.

Campaign of "Dry" Candidates

New York.—A campaign for candidates who are for prohibition enforcement regardless of their party affiliations will be made next spring by the Women's National Committee for Law Enforcement, it is announced.

Charter Space for Grain

Fort William.—Space for 36,000,000 bushels of grain in Canadian and United States tonnage has already been chartered from these ports, according to postings with the board of grain commissioners.

Do Not Want Titles

Sydney, N.S.W.—The legislative assembly has adopted, by a vote of 39 to 24, a resolution declaring the granting of titles to be contrary to the sentiments of the citizens of New South Wales.

Canada's Bright Future

Lord Birkenhead Thinks Population Will Increase by Five Million in Next Ten Years

Winnipeg.—"I cannot discover any well-informed student of sociology in the Dominion of Canada who does not believe that the next ten years will see an increase in your population of five millions," said Lord Birkenhead, former Lord Chancellor of Great Britain, in the course of an address before the Canadian Club here.

Lord Birkenhead stated that after a careful study of Canada's progress and resources and intensely interesting observations during his present trip, and another trip made a decade ago, he felt that one must be blind and unimaginative who would remain unaffected at the conclusions thus forced upon him of Canada's potentialities.

After giving a concise summary of Great Britain's present causes for anxiety, the speaker pointed out that in spite of free predictions that the world's financial centre had passed from London to New York, it still remained, and bid fair to continue indefinitely to remain, in London. He recommended free reciprocal trade within the British Empire.

Bienfait Plant Will Continue Operations

Next Three Months' Development May Justify Expenditure Made

Ottawa.—The briquetting plant at Bienfait, Sask., is to be continued in operation for the next three months, it was stated by Hon. J. G. Gardiner, Minister of Highway of the province of Saskatchewan, who has been in consultation here with the Federal Department of the Interior with regard to the matter.

As the result of investigations carried on by engineers representing the two governments, said Mr. Gardiner, it was hoped to be able to develop during the three months' period a process of briquetting which would justify the comparatively large expenditure already made.

Injured In Airplane Crash

Windthorst Farmer Has Accident With Curtis Machine at Regina Aerodrome

Regina.—Harry Doucette, 35-year-old Windthorst farmer, sustained serious injuries at Lakeview aerodrome, when he was attempting to fly a Curtis machine which cost him $200.

Doucette, who was taking off on his first "solo" flight, had reached an altitude of about 150 feet when he stalled the machine in an effort to turn down wind. His nose tilted groundward, and still swinging to the left, and with a steep bank of the left plane, the machine plunged into the earth with a crunch of smashing wood and ripping fabric. The machine is a total loss.

Must Stamp Goods in English

Dublin.—In consequence of representations by the United States customs authorities, who point out the United States' Tariff Act requires imports to be marked in English, the Free State Government has notified Irish exporters to cease stamping goods, "Deanta in Erin," and substitute the English equivalent, "Made in Ireland."

Racing Plane Sank During Test

Cowes, Isle of Wight.—One of the two British seaplanes entered for the international races for the Schnieder sea trophy, capsized and sank in deep water during the seaworthiness test for entrants. H. A. Kenworthy, pilot, narrowly escaped death, being carried under by the machine, but rose to the surface and was rescued.

WESTERN EDITORS

Geo. E. Jenkins, Editor and Proprietor of The Clarion, Cabri, Sask.

Many British Harvesters Will Remain

Statement Made that Ninety Per Cent. Will Stay in Canada

Montreal. — That 90 per cent. of the British harvesters who went to the western grain fields this year are well satisfied with Canada and that they will stay in this country, is the opinion of one of the young Britishers, Michael Lampard, a Cambridge student, who sailed by the liner Minnedosa to complete his studies in England.

The Minnedosa carried 60 returning harvesters and they were all delighted with their "holiday" in Canada. On board were about 15 harvesters who have been deported from the country. Questioned with regard to them, Mr. Lampard said that they were just shirkers, who thought that the world owed them a living.

Three Quebec Aviators Killed

Hydro-Airplane Crashes From Height Of 2,500 Feet

Quebec.—A triple tragedy occurred about two miles from Robervale when a hydro-airplane loaned by he Dominion Air Board to the Provincial Government for surveying and forest protection, crashed from a height of 2,500 feet into Lake St. John, killing the three occupants.

The dead are: Bernard De Salaberry, aged 29, pilot, Ottawa; Alphonse Landry, 29, observer, Kamouraska; Emile De Guise, surveyor, Chiquotim.

The tragedy was witnessed by a number of people. Just how it happened has not yet been established, but the spectators were horrified to see the plane nose dive.

When rescuers arrived on the scene they found the plane fifteen feet under the water.

To Compile Liquor Figures

Victoria, B.C.—Figures showing the turnover of the Government's liquor business during the last six months will be compiled for the opening of the Legislature, it was stated.

Early estimates by liquor board officials place the total business of liquor stores throughout the province at $1,000,000 a month or more.

Guard Against Bandits

Mennon, Sask.—To protect themselves against bandits, stores and elevators are emptying their safes of cash.

Work of Bad Boys

Sault Ste. Marie, Ont.—It cost the city $3,600 last year to replace street lamps destroyed by mischievous boys.

Abundant Harvest Brings Trade Revival

Reports from Principal Cities Indicate Business Is Improving

Toronto.—Without inducing too much optimism, reports from most of the principal cities in the Dominion which have reached the office of the Canadian Manufacturers' Association recently, indicate that on the whole, trade situation during the next six months will be better than it was last year. Lumbering, it is anticipated, will be particularly active while a large number of factories report that orders have been received such as to ensure steady work for several months ahead. A brighter outlook for the fall and Christmas trade faces the wholesale and retail trades in most cities. Reports from western centres show that the abundant harvest has had a marked effect already in stimulating activity in many directions other than agriculture.

Banks Must Honor Accepted Checks

Ruling of Justice Middleton Upheld By Appellate Division

Toronto.—A judgment given by the appellate division at Osgoode Hall, sustained the ruling previously given by Mr. Justice Middleton that, after a check has been accepted by one branch, it cannot be rejected by another branch of the same bank. Mrs. Bertha M. White had deposited a check for $1,070.70 with a local branch of the Royal Bank, which check E. H. Clark and Company, brokers, had drawn on another branch of the same bank. It was learned later that the brokerage company had gone into the hands of a receiver and although there were ample funds on deposit to meet the check, it was charged back to Mrs. White's account. The bank's appeal against Justice Middleton's judgment was dismissed with costs.

Earl Carnarvon's Brother Dead

Thought Disturbance of Pharoah's Tomb Would Bring Bad Luck

London.—The superstition that Pharoah Tutenkhamen still exerts a malign influence upon the disturbers of his tomb has been revived by the death in London of the Hon. Audrey Herbert, half brother of the late Earl of Carnarvon.

His friends recall that he strongly objected to the Earl's activities at Luxor, believing it unlucky to interfere with the tombs of the dead. When the burial chambers of the Pharoah were laid bare, Mr. Herbert remarked: "Something dreadful will surely happen in our family."

Ellis Island Complaint

Hamilton, Ont.—Charges of inhuman treatment by United States immigration officers at Ellis Island, were made here by Mrs. H. M. Hendry, who has returned with her three-year-old daughter from Christiannia, Sweden. She complained of having to strip to the waist in a room with about a dozen other women, of the loss of her suitcase, and of having to stand in line for three hours on a ferry boat as well as being treated roughly and inhumanly.

Lloyd George Takes Exercise

London.—Lloyd George's visit to Canada is featured in newspaper articles describing the ex-premier "in training." They declare he walked five miles Sunday in an hour towards Hindhead and back to his bungalow at Churt. He has been doing this for weeks, and is said to be in wonderful physical form.

British Harvesters Will Be Provided With Work For The Winter Months

Government Loan Assured

A New Record Is Made In Canadian Finances

Toronto.—The hundred million dollar mark has been definitely passed in subscriptions to the new Dominion of Canada refunding loan, which creates a new record in Canadian finances, as the initial announcement was only made by the minister of finance on Sept. 20, and public offering did not begin until Sept. 24.

Over-subscription of the $172,000,000 objective is now assured, and cash subscriptions to date have been so heavy that the selling syndicate states that there are not enough of the new bonds left to permit complete conversion of the maturing 1923 Victories. It is stated that the books for the new offering will undoubtedly close materially sooner than had been expected in even the most optimistic financial circles.

In addition to an increasing flow of smaller orders, six more heavy subscriptions were announced, headed by one for $1,750,000 from the Dominion Bank. Others were: La Banque Provinciale, $1,500,000; Bank of Toronto, $1,000,000; London Life Insurance Company, $1,000,000; Royal Trust Company, $1,000,000; and Canadian Cottons, Limited, $1,000,000.

Suggestions Sent to Economic Conference

Empire Producers Want Arrangements Made for Continuing Work

London.—The British Empire Producers' Association, to which a number of leading dominion and colonial associations are affiliated, has prepared a long memorandum for submission to the economic conference. It contains recommendations on Empire trade preference, development of Empire resources and on the question of arrangement to insure continuity of the work initiated at the conference.

The memorandum also asks the conference to cast its influence in the direction of giving all contracts to Empire firms and also urges the conference to co-ordinate the food supplies upon a whole Empire basis, recommends that the Imperial and overseas governments establish a fund to advertise the use of Empire products within the Empire and suggests the creation of a committee composed of home and overseas government representatives to carry on the work of the economic conference.

Home Bank Patrons to Meet

Toronto. — Delegates representing the depositors of the Home Bank at the 60-odd branches of the suspended institution in various parts of Canada are expected to be present at a meeting here on October 5.

The suspension of the bank and position to be taken in that regard by the depositors, will be under review. The curator is expected to have his report ready by that date.

German Subs in Bay of Fundy

St. John, N.B.—That German submarines used to make the Bay of Fundy a refuge, where, unmolested by allied sub-chasers, they could clean and scrape their hulls and carry out minor repairs during the war, was the information given the Engineering Institute of Canada by E. G. Cameron, Chief Engineer of the St. John dry dock, in the course of a paper delivered at the session of the organization.

Good Yields of Wheat

Regina, Sask.—Some good yields of wheat are indicated in the latest reports received by the Saskatchewan Co-operative Elevator Company from crop correspondents in various parts of the province. In the majority of cases the bulk of the wheat is grading either No. 1 or No. 2 Northern.

Winnipeg.—"Those who attended the conference called by the Canadian Colonization Association at Saskatoon or who are quite properly interested in retaining in Canada the British harvesters who want to stay, may be assured that everything possible is being done," said Capt. G. M. Dix, Superintendent of Agriculture of the Association, here.

The co-ordinating committee appointed at the conference at Saskatoon held a meeting at which a representative of the Soldier Settlement Board was present. After hearing the steps taken by that organization, under instructions of the minister of immigration, the committee decided that with certain co-operation the situation as it affected those harvesters who were willing to remain on farms this winter, and eventually if suitable, become part of the agricultural community of the west, was in a fair way of success.

The feature of the situation which appealed to the committee, said Capt. Dix, was that it would not be necessary for the men to come into the cities after their work was finished with harvest crews. Plans were now in motion to place them in the districts in which they are working. So far as the other men who for various reasons could not stay on the farms in the winter are concerned, plans were being laid to take care of them at the end of the harvest. In the meantime it was pointed out that there is still a shortage of help in certain localities in Saskatchewan and Alberta, and that, given a spell of fine weather, it would be fully a month before threshing was finished, especially in Alberta.

It is expected that definite information as to how many of the British harvesters have been placed on farms for winter work will be available by October 15. Final details will be decided upon arrival of W. M. Jones, Director of Administration of the Soldier Settlement Board, who is co-ordinating various efforts for the Department of Immigration.

Education By Mail

Alberta Children Far From Schools Will Profit By Plan

Edmonton.—People who live in remote parts of Alberta out of reach of public schools, are to have educational facilities put at their disposal by the use of His Majesty's mails, and a new correspondence course that is to be inaugurated at once by the provincial department of education.

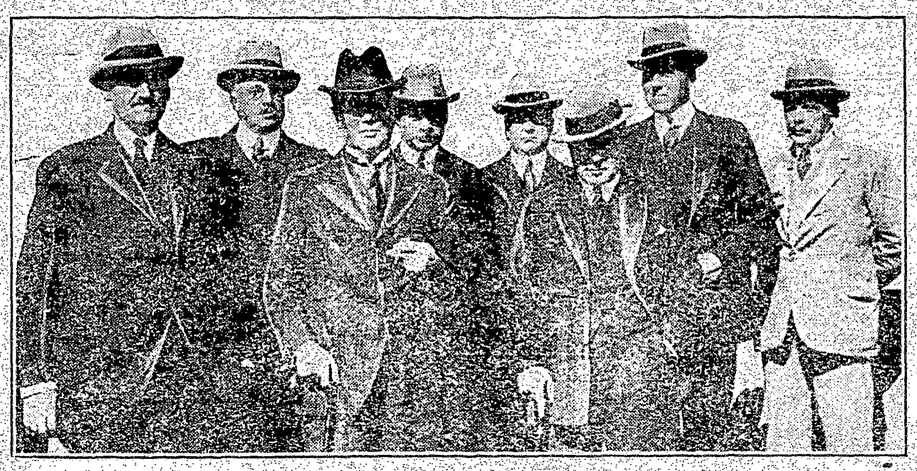
The working plan for mail course of schooling has already been drawn up and the intention is to put it into effect at the beginning of October, to run through the winter to the end of the school year. It is expected that from twenty to forty lessons will be given in the case of each applicant for the service, and the work will be carried on under the direction and supervision of the department. The idea of the entire scheme is to put the school, or its equivalent, within reach of the people at the far edges of settlement.

To Rebuild Hungary

Geneva.—A political agreement reached here between Czecho-Slovakia, Jugo-Slavia and Hungary has enabled the League of Nations to take preliminary steps to map out a financial programme for the reconstruction of Hungary on a basis similar to that of Austria. The plan, when completed, will be transmitted to the Reparations Commission.

Lloyd George In Winnipeg, Oct. 13

Winnipeg, Man.—Right Hon. David Lloyd George will address the Winnipeg Canadian Club, Saturday, October 13. C. C. Ferguson, President, stated that notice to that effect had been received by Sir James Aikens, Lieutenant-Governor.



For the first time in history of Canadian Pacific Railway, a meeting of the Board of Directors was held in the West recently. They were photographed in Winnipeg after the meeting and are, left to right, Grant Hall, Vice-President; F. W. Molson; Sir Herbert Holt; Ernest Alexander, Secretary; N. W. Tilley, K.C.; E. W. Beatty, President; J. K. L. Ross; and Sir Augustus Nanton.

The Revolution In Bulgaria Considered To Be Nearing End

Sofia.—A semi-official statement says the revolutionary movement in Bulgaria can be considered as approaching its end. The insurgents are deserting their leaders and surrendering in parties, saying they were inveigled into the movement against their wills, the statement adds.

The decisive battle in the Communist uprising is being fought in the city of Ferdinand and the village of Berkowitza, which are four miles apart, and half-way from Sofia to the Danube, according to a statement issued by the war office.

Five thousand Communist and agrarian allies are besieged there, after having proclaimed a soviet republic and established complete control over the area. Four thousand soldiers, aided by civilian volunteers, have been carrying out an enveloping operation during the past five days and have now drawn their lines completely around Ferdinand and Kerkowitza.

W. N. U. 1492

Foretells Vancouver's Future

May Be Biggest Port in Canada Says President Beatty

Vancouver.—Two large steamships will be added immediately to the coast fleet of the Canadian Pacific Railway, at a cost of several million dollars, the company will complete Pier B.C. on Burrard Inlet, E. W. Beatty, K.C., President of the Canadian Pacific Railway addressing 500 business men, members of the Vancouver Board of Trade, here, announced the decision to extend the company's services in this port. "I feel that Vancouver is destined to be the largest port on the Pacific coast, if not the largest Canadian port on any coast," he declared.

Another Earthquake In Japan

Violent Earth Tremors Around the City of Kure

Tokio.—Another severe earthquake has occurred in Japan in the Hiroshima district. The earthquake was especially violent around the city of Kure. The extent of the damage has not been determined, as communications have been disrupted.

Kure is in the extreme southwestern end of the Island of Hondu, and approximately 450 miles southwest of Tokio.

Floods have followed a typhoon in Fukagawa and Honjo, wards of Tokio. Many have suffered as a result, as thousands of refugees were encamped in rude shacks in these wards.

Ireland May Abolish Present Legal System

New Bill Makes Provision for One Criminal Court

Dublin.—The Dail Eireann unanimously passed the second reading of the Judiciary Bill which would abolish the existing legal system, which would be replaced by new district courts modelled along the lines of the courts set up by the first and second Dails. The high court judges would be reduced to nine and the district judges would number about one-half of those now acting as county court judges. Under the bill there will be a criminal court in Dublin.

Military Dictator In Bavaria Is Ready For Any Emergency

Munich, Bavaria.—Although quiet is reported to prevail throughout Bavaria, Dr. Von Kahr, the military dictator, has brought additional troops into Munich so as to be in readiness for any emergency.

The dictator has absolutely prohibited all assemblages of adherents of Adolph Hitler, the National Socialist leader, and has declared that he and General Von Lossow, appointed by the Berlin Government as military commander in Bavaria, purpose to execute the orders of the Bavarian Government without question in the maintenance of order throughout Bavaria.

The leaders of the Nationalist Associations have also promised to obey the government's orders, with the exception of Adolph Hitler, who has reserved the right to act as he sees fit.

It is well-known, however, that General Ludendorff, formerly Von Hindenburg's chief of staff, is behind the Hitler movement, and this fact is commented on by the organ of the Bavarian People's party which says: "If Ludendorff provokes a revolution in Bavaria, he will be fulfilling French hopes, because such a revolution means separation and the entry of the enemy into our country."

Replying to this attack in another paper, Gen. Ludendorff declares he has not the slightest intention of provoking a revolution.

Berlin.—Chancellor Stresemann has notified the entente ambassadors of the German Government's decision to cease passive resistance in the Ruhr and the Rhineland.

The Chancellor received the representatives of the entente and discussed the political situation with them. He informed them of the German Government's intention to cancel the ordinances relating to passive resistance.

THE LEDGE

Is $2.00 a year strictly in advance, or $2.50 when not paid for three months or more have passed. To Great Britain and the United States $2.50, always in advance.

LOVE keeps the family jars empty.

IT'S a case of genuine love if he feels that her gown is too daring.

THROW on the emergency brake when you find your self talking too much.

A penny saved by a miser, means a dollar burned by his heirs later on.

IF a man is the real thing he doesn't have to proclaim it from the housetops.

DON'T be afraid of criticism. We all need calling down as well as boosting up.

WE don't object to people living boyond their means if they don't live beyond our means.

WE have heard from some men who went to the prairies for the harvesting. They are employed at $4 to $6 a day and their board. Some of them have got nice places some not so nice. Some work for ten hours a day, some longer. Some begin at seven and work till twelve, and from two till seven in the evening. This gives them a two hour rest in the middle of the day. Some of the older type of farmers want to work all the time when they are not eating or sleeping. Those who are working in Alberta have the pleasure of working in splendid wheat, tall and well headed, which will yield from 25 to 40 bushels an acre. Men working in Saskatchewan don't find the crop so good, and those in Manitoba are only moderately good. Some of the men are threshing. They get $5 to $6 a day at this job. It will be a great effort to get through threshing before winter comes. Two months is a very short season in which to thresh 450,000,000 bushels grain.

News From the Capital

Victoria, Oct. 3.—When laying the corner stone of the new science building of the British Columbia University group on Friday, Hon. J. D. MacLean, minister of education, gave out some interesting information regarding this provincial institution. Some criticism had been directed against the government for proceeding with the construction of the new university, chiefly from centres far removed from Vancouver. But even this criticism has been turned into praise when it was considered that the university offered the same advantage to the student from outside points as it did to those from Vancouver.

There are now 1200 matriculated students in attendance, as well as several hundred taking short courses. These come from ninety-nine points outside of Vancouver, as well as from that city. The occupations of parents or guardians sending students to the university are:

Professional men, 246; merchants 178; manual laborers, 155; farmers, 102; bookkeepers and clerks, 101; retired, 101; brokers, 54; miscellaneous, 189.

The University of British Columbia is only eight years old, but in that time the enrollment has increased from 369 students in 1915 to 1200 in 1923. At present thirty-eight graduates of the university are taking post-graduate courses in British, Canadian and American universities.

The erection of the new building was made possible by the policy laid down by Hon. Dr. MacLean in 1920, a policy which received the unanimous support of the Legislature.

Through Hon. William Sloan, minister of mines, negotiations have been re-opened with the Canadian Pacific Railway company for a settlement of the long-standing settlers' rights problem on Vancouver Island. Dual control of minerals in the 2,000,000 acre E. & N. belt have made it difficult for mining to develop and recently President E. W. Beatty went into the matter fully, with a result that a solution is in sight.

War Memorial Meeting

A public meeting to discuss the erection of a War Memorial will be held in the old school house, Midway at 3 o'clock on Saturday Oct. 6th. It is expected that everybody will be there.

Farmers are requested to meet on the same date at 1.30 so as to be through their business meeting in time to attend the Memorial meeting.

THE FLAG, RED, WHITE AND BLUE

Song

The grass is green upon his grave
Where nightly falls the dew;
My soldier love, whose life he gave
To save the flag of blue.
The old flag, the loved flag, the flag red,
white and blue.

The flag that waves above his head
On battle fields once flew;
It keeps a bivouac of the dead
Whose life blood stains its blue.
The old flag, the loved flag, the flag red,
white and blue.

With flag in hand he stood at bay
While bayonets pierced him through,
And then his brave soul passed away
As round its folds he drew.
The old flag, the loved flag, the flag red,
white and blue.

They sent my soldier home again,
They sent the colors too,
And I knelt to kiss the crimson stain
That blurred its azure hue.
The old flag, the loved flag the flag red,
white and blue.

If owner does not claim animal it will be put up for auction sale at Wm. Riley's ranch, on Saturday, Oct. 27th at 10 a. m.
GEORGE WATSON,
10-4 WILLIAM RILEY.

Here and There

Russia has more illiterates, and at the same time, more bookshops than any other country in Europe.

The largest consignment of silk from the Orient for many months, consisting of 5,500 bales, valued at $9,000,000, formed part of the cargo of the "Empress of Russia" recently.

A shipment of silk from China, consisting of ten carloads, valued at two million dollars, went forward from Vancouver to New York under special guard over the Canadian Pacific lines recently.

The first of a series of six new seaplanes being constructed for the Canadian Government has just been delivered. The new planes are to be used in forest patrol for the prevention of destruction by fire.

Following the disastrous earthquakes and fires which devastated large areas in Japan, the Canadian Pacific liners "Empress of Canada" and "Empress of Australia" were thrown open to the accommodation of thousands of refugees, while the officers and men of the vessels did splendid work in organizing and assisting rescue parties.

The rapid increase in the export butter trade of Saskatchewan during the past year or two, has been the outstanding feature of the Provincial dairy industry. Recently the Saskatchewan Co-operative Creameries made a shipment of 25,000 lbs. of butter to China.

For almost two decades the major portion of the world's supply of cobalt has been derived from the silver-cobalt-nickel arsenides of the Cobalt district, according to figures compiled by the Dominion Bureau of Statistics. The cobalt production of Canada in 1922 was 569,960 pounds, which at $3.25 a pound, would be worth $1,852,370.

Canada's trade within the Empire is increasing. For the twelve months ended July, Canada exported to other parts of the Empire goods amounting to $453,437,899. This is in comparison with $354,992,074, the figure for the corresponding twelve months previous. Imports from British Empire countries during the two twelve months' periods were: Ended July, 1923, $195,811,190; ended July, 1922, $153,185,581.

A wheat crop of 382,514,000 bushels is forecasted in a report issued by the Dominion Bureau of Statistics. The report is based upon the condition of crops at the end of July, and indicates that the Prairie Provinces will produce 357,295,000 bushels of wheat if weather conditions continue favorable. Manitoba, it is expected, will have a total wheat yield of 44,468,000 bushels; Saskatchewan 211,051,000; and Alberta 101,776,000 bushels. Alberta is the only province to show an increased yield as compared with 1922.

A party of five journalists, representing the leading newspapers of Switzerland, who recently arrived at Quebec, are the guests in Canada of E. W. Beatty, President of the Canadian Pacific Railway. They will tour the Dominion in the interests of Swiss colonization. Stops will be made at different points where Swiss people are farming, and opportunity will be given to members of the party to converse with them and get first hand knowledge as to the desirability of Canada as a place for Swiss colonists.

In a letter on "Canada and Land Settlement," published by the Morning Post, Sir Geo. McLaren Brown, European manager of the Canadian Pacific Railway, says that the agricultural salvation of Western Canada lies in mixed farming, which calls for smaller and more numerous agricultural holdings than wheat growing does, and results in closer settlement and better communication. The bigger and more densely settled the rural population, the more social amenities there are and greater advantages generally, he says.

Among the large number of unaccompanied women on the last westward voyages of the Canadian Pacific liners "Montclare" and "Melita" were twenty-three who were coming to Canada to be married in various parts of the Dominion.

An official in charge of the cattle shipments from the Port of Montreal recently stated that nearly 40,000 head of store cattle would be shipped from the port this year. He declared the rush seasons would be the months of August, September and October.

On her last eastward voyage the Canadian Pacific liner "Empress of Canada" established a new trans-Pacific record of 8 days, 10 hours and 55 minutes from Yokohama to Vancouver. The previous record, 8 days, 18 hours and 31 minutes, had been held since 1914 by the "Empress of Russia" of the same line.

If public deposits in banks and loan companies can be taken as a fair indication, the Canadian is the world's richest man, according to a statement made by F. A. Hatch, retiring president of the Ontario division of the Canadian Manufacturers' Association. These deposits amount to more than two billion dollars, or $250 per capita.

According to a report of the Dominion Bureau of Statistics, 62,273,169 tons of railway freight originated in Canada in 1922, and 26,581,631 was received from foreign connections, making a total of 88,854,800 outgoing. Also 62,548,578 tons terminated in Canada and 25,438,906 were delivered to foreign connections, making a total of 87,987,484 tons.

A distinct type of sheep, adapted to prairie range conditions and said to possess superior wool and sheep qualities, has been developed by R. C. Harvey, an Alberta sheep raiser. It will be known as the "Romnellet," and has been evolved after eight years' experimenting with crosses of the Romney-Marsh with the Rambouillet. As evidence of the wool production from this species, Mr. Harvey's annual clip is 120,000 pounds.

Phone 5L when you see stray cattle on the street.

Canadian Pacific Directors on Annual Tour

E. W. Beatty, president of the Canadian Pacific Railway, is now on his annual tour of inspection over the Company's lines. He is accompanied by a number of Canadian Pacific Directors, and the trip will probably prove of more than usual importance in view of the many questions connected with transportation that are under discussion in the West.

The party of directors consists of Sir Herbert Holt, Montreal; Sir Augustus Nanton, Winnipeg; J. K. L. Ross, Montreal; F. W. Molson, Montreal; and W. N. Tilley, K.C., of Toronto. Vice-President A.D. Mac Tier accompanied the President as far as Port Arthur. The party left Montreal on September 6 and made the first stop at Toronto, leaving next day for Port Arthur and Fort William. Short stops were made at Winnipeg, Brandon, Moose Jaw, Medicine Hat, Calgary and Revelstoke. At Winnipeg a meeting of the board of directors was held, this being the first time in the history of the Canadian Pacific Railway that such a meeting has been held in Western Canada. Vancouver was reached on September 15th, and the party then proceeded to Skagway by the Canadian Pacific Coast Steamship Service. They will return to Vancouver on September 24th. The return journey will be made via Nelson, Lethbridge, Calgary and Edmonton. A short stop will be made at Nelson on September 30th, at Lethbridge, on October 1st, Calgary, October 2nd, Edmonton, October 3rd, Saskatoon, October 4th and at Winnipeg the following day.

E. W. Beatty and party passed through Greenwood on Saturday evening.

'Yes We' Have No Land For Sale

Rock Creek, B.C.,
Sept. 29th, 1923.

EDITOR THE LEDGE,
Sir:

In the early spring of 1922 I applied to the B. C. Provincial Government to purchase a portion of land known in the Greenwood district as The Colley Ranch abandoned many years ago and which reverted to the C. P. R. and was eventually purchased by the government of B. C. from Heinze and thrown open for purchase or premption. I was, however, informed by the land department this land could not be purchased but that it would have to be pre-empted, and would have to be re-surveyed. At considerable expense to the government this was done and the place staked, and application forwarded in the usual manner, my application was again returned with the explanation that the land was not suitable for farming. It was also useless for timber limits, by the report of the District Forester. The government may be able to offer some explanation of the manner they are conducting their business in the interior of B.C., but I might add this is not an isolated case so far as others and myself are concerned, and one can hardly wonder that there is a feeling of mistrust, when the government resort to unusual methods of conducting the business of the province to suit individuals.

Hoping you will be able to spare a little space.

Yours truly,
H. WHITING.

Notice

Dr. O. M. Graves, Dentist, will be in Ferry, Wash., the first 8 days of every month.

DEAFNESS CAN BE CURED

DEAFNESS, NOISES IN THE HEAD, AND NASAL CATARRH.

The new Continental remedy called "LARMALENE" (Regd.) is a simple harmless home-treatment which absolutely cures deafness, noises in the head, etc. NO EXPENSIVE APPLIANCES NEEDED for this new Ointment. Instantly operates upon the affected parts with complete and permanent success. SCORES OF WONDERFUL CURES REPORTED.

RELIABLE TESTIMONY

Mrs. R. Wilkinson, of Siad Road, Stroud, writes:—"Please could I trouble you to send me another box of the Ointment. It is not for myself, but for a friend of mine who is as bad as I was, and cannot get any rest for the noises in the head. I feel a new woman, and can go to bed now and get a good night's rest, which I have not been able to do for many months. It is a wonderful remedy and am most delighted to recommend it."

Mrs. E. Crowe, of Whitehorse Road, Croydon writes:—"I am pleased to tell you that the small tin of ointment you sent to me at Ventnor, has proved a complete success, my hearing is now quite normal, and the horrible head noises have ceased. The action of this new remedy must be very remarkable, for I have been troubled with these complaints for nearly ten years, and have had some of the very best medical advice together with other expensive ear instruments all to no purpose. I need hardly say how very grateful I am, for my life has undergone an entire change.

Try one box today, which can be forwarded to any address on receipt of money order for $1.00. THERE IS NOTHING BETTER AT ANY PRICE.

Address orders to:—
THE "LARMALENE" CO.,
10, South View, Watling St., Dartford, Kent, England.

Synopsis of Land Act Amendments

Minimum price of first-class land reduced to $5 an acre; second-class to $2.50 an acre.

Pre-emption now confined to surveyed lands only.

Records will be granted covering only land suitable for agricultural purposes and which is non-timber land.

Partnership pre-emptions abolished but parties of not more than four may arrange for adjacent pre-emptions with joint residences, but each making necessary improvements on respective claims.

Pre-emptors must occupy claims for five years and must make improvements to value of $10 per acre, including clearing and cultivation of at least 5 acres, before receiving Crown Grant.

Where pre-emptor in occupation not less than 3 years, and has made proportionate improvements, he may because of ill-health, or other cause, be granted intermediate certificate of improvement and transfer his claim.

Records without permanent residence may be issued, provided applicant makes improvement to extent of $300 per annum and records same each year. Failure to make improvements or record same will operate as forfeiture. Title cannot be obtained in less than 5 years, and improvements of $10.00 per acre, including 5 acres cleared and cultivated, and residence of at least 2 years are required.

Pre-emptors holding Crown Grant may record another pre-emption, if he requires land in conjunction with his farm, without actual occupation, provided statutory improvements made and residence maintained on Crown granted land.

Unsurveyed areas not exceeding 20 acres, may be leased as homesites; title to be obtained after fulfilling residential and improvement conditions.

For grazing and industrial purposes areas exceeding 640 acres may be leased by one person or company.

Mill, factory or industrial sites on timber land not exceeding 40 acres may be purchased; conditions include payment of stumpage.

Natural hay meadows inaccessible by existing roads may be purchased conditional upon construction of a road to them. Rebate of one-half of cost of road, not exceeding half of purchas price, is made.

PRE-EMPTORS' FREE GRANTS ACT

The scope of this Act is enlarged to include all persons joining and serving with His Majesty's Forces. The time in which the heirs or devisees of a deceased pre-emptor may apply for title under this act is extended from one year from the death of such person, as formerly, until one year after the conclusion of the present war. This privilege is made retroactive.

No fees relating to pre-emptions are due or payable by soldiers on pre-emptions recorded after June 26, 1918. Taxes are remitted for five years.

Provisions for return of moneys accrued, due and been paid since August 4, 1914, on account of payments, fees or taxes on soldiers' pre-emptions.

Interest on agreements to purchase town or city lots held by members of Allied Forces, or dependents, acquired direct or indirect, remitted from enlistment to March 31st, 1920.

SUB-PURCHASERS OF CROWN LAND

Provision made for insurance of Crown Grants to sub-purchasers of Crown Lands, acquiring rights from purchasers who failed to complete purchase, involving forfeiture, on fulfillment of conditions of purchase, interest and taxes. Where sub-purchasers do not claim whole of original parcel, purchase price due and taxes may be distributed proportionately over whole area. Applications must be made by May 1, 1920.

GRAZING

Grazing Act, 1919, for systematic development of livestock industry provides for grazing districts and range administration under Commissioner. Annual grazing permits issued based on numbers ranged; priority for established owners. Stock owners may form Associations for range management. Free, or partially free, permits for settlers, campers or travellers up to ten head.
