Mrs. Shafer has returned from a visit to Grand Forks.

LOST—A pair of spectacles. Finder kindly leave at The Ledge office.

Tony Smith is lying in the Princeton Hospital with his back broken and the lower portion of his body completely paralyzed as the result of his car going over the bank near Coalmont on the 2nd of August. Little hope is held for his recovery.

AROUND HOME

Harry Royce, of Hedley, is visiting his mother, Mrs. M. Royce.

Miss Christina MacLean, of Nelson, is the guest of Mrs. C. T. Fenner.

Mrs. M. W. Smith, of Westbridge, is visiting Mrs. Geo. S. Walters.

A Ford car from England en-route to Vancouver was in town last week.

Miss Irene Inglis motored to Beaverdell on Friday morning to visit friends.

Thos. Rowe left for Beaverdell on Tuesday morning after a few days visit in town.

Herbert Hartley left on Wednesday morning on a business trip to Vancouver.

Miss Gladys McCreath, of Vancouver, is visiting her sister, Mrs. Helen Thomas.

John Mowat, of Victoria, is spending a few days with his brother, A. N. Mowat.

Mrs. Frank Buckless and daughter, Maria, returned on Saturday from Spokane.

Mr. and Mrs. K. M. Spence and family are on a week's holiday in Trail and Nelson.

The Miss Carol and Ella Wright, of Nelson, are the guests of Mrs. Lester MacKenzie.

Miss Nellie Hamarstadt motored in from Beaverdell on Monday and will remain in town for a few days.

Mr. and Mrs. Thos. Alty and three children, of Trail, are the guests of Mr. and Mrs. Wm. Walmsley.

L. Portmann returned on Thursday last from Nicholson creek where he had been helping with haying.

Mr. and Mrs. Geo. Harris and son, of Vancouver, are the guests of Mr. Harris' sister, Mrs. E. Moore at Eholt.

Mrs. Geo. Inglis left on Sunday morning for Naramatta where she will be the guest of Mrs. Harry Hook.

P. H. McCurrach, local government agent, is in Grand Forks relieving Charles Mudge, government agent in that city, who is on his vacation.

Fred and Henry Madge, who have been spending a few days at the home of Mr. and Mrs. Frank Maletta, returned to Beaverdell on Tuesday morning.

Mrs. J. H. Goodeve and four grandchildren, Ruby, Cleo, June and Glenn, returned on Wednesday from a several weeks visit to relatives in Seattle, Wash.

J. H. Gregory of Grand Forks, has been appointed General Road Foreman succeeding Jas. Kerr. Mr. Gregory arrived in town last week and has taken over his new duties.

Mrs. J. H. Dorman, who has been visiting her son and daughter-in-law, Dr. and Mrs. A. J. Dorman, for several weeks, left for her home in Victoria on Sunday morning, going as far as Penticton by motor.

H. E. Andreas is spending his vacation at the coast, leaving by motor on Saturday morning. During the absence of Mr. Andreas his position in the Bank of Commerce is being held by J. H. W. Jones, of Trail.

Mr. and Mrs. Dick Roylance and son arrived from Vancouver on Friday, to attend the funeral of Mrs. Roylance's brother, the late Henry Tanner. Dick has returned to the coast, but Mrs. Roylance will visit with relatives for a few weeks.

Grote Stirling, of Kelowna, member for this riding (Yale) in the Federal House, was a caller at The Ledge office on Monday morning, being on a tour of the east end of the constituency, and incidentally gaining first hand information of the wants of this section. Our member is of the opinion that there will be a Dominion election this fall.

War Veteran Drowns In the Kettle River

A sad drowning fatality occurred at Christian Valley when Henry William Grant Tanner, a returned soldier, was found drowned in the Kettle River on Thursday, Aug. 6th, of which brief mention was made last week. He had gone out to fish and it is thought he must have fainted with the heat, his fishing rod having been found on the river bank, a short distance from where his body was found in the water.

The deceased was 28 years old and was born on the old Tanner Homstead. He went overseas during the war, serving four years, and a braver soldier than he was would be impossible to find. He did his duty loyally to his King and Country. He was badly gassed and wounded, loosing the sight of his right eye. Returning from overseas he took up farming. The whole valley is in mourning over his sad death.

The funeral was held on Sunday, Aug. 9th, Service being conducted by Rev. E. A. St. G. Smyth in the Anglican Church, Kettle Valley. It was the largest that ever passed through Rock Creek, the people of the Valley turning out en masse. The beautiful casket was covered with exquisite flowers. The pall-bearers were: Major R. Gray, Major Davies, Ed. Stiles, G. B. M. Gane, J. Warburton and W. Jones.

Henry leaves to mourn his loss, a father and mother, two sisters, Mrs. F. Maletta, of Greenwood, and Mrs. R. Roylance, Vancouver, two brothers, Francis and Edward.

Floral tributes were received from: A pillow from the family, Mr. and Mrs. E. Madge, Mr. and Mrs. J. Madge, Mr. and Mrs. W. O'Donnell, Fred Madge, Henry Madge, Mr. and Mrs. Pasco, Rock Creek Women's Institute, Major and Mrs. Glossop, Mrs. Shillcock, Major and Mrs. Davies, Major and Mrs. Gray, Rupert and Bruce Gray, Mr. and Mrs. Lindsay, Mr. Martin, F. Richter, Mr. and Mrs. Roy Worthington, Mr. and Mrs. Beaven Gane, Mr. and Mrs. Geo. Lord, Mrs. Ellen Trounson, Mr. and Mrs. W. Clark, Mr. and Mrs. Boag, Mr. and Mrs. Abel, Mr. and Mrs. Carey, Mr. and Mrs. Lloyd Davies, Miss E. Carey, Joe Carey, W. Johnson, Mrs. M. Kayes, Mrs. M. Louie, Mrs. L. McKay, Pythian Sisters.

W. J. Cook, Donald McCallum, W. H. Kirkpatrick, Geo. B. Garrett, Wm. Smith, E. Vant, F. R. Scott and C. D. Pearson, of Grand Forks, were in town on Thursday last and paid a fraternal visit to King Edward Lodge, A. F. & A. M.

About 20 men are fighting a big fire north of Eholt. It was reported last night that it was practically under control. The smoke from this fire could be seen from town this afternoon as also smoke from a big fire in the direction of Boundary creek.

Mr. and Mrs. Jack Keady and grandson returned on Saturday from an enjoyable motor tour to Calgary and other Alberta cities. Mr. Keady drove 1100 miles and only had to change one tire. On the return trip they were accompanied by Mrs. W. J. Hibbert, of Coleman, niece of Mrs. Keady's, who will visit here for a few weeks.

Jas. Kerr left on Tuesday for Penticton where he has taken over his new duties as deputy assessor for the Vernon, Princeton and Kettle River Assessment Districts. Greenwood citizens are sorry to see him leave town but wish him success in his new line of endeavor. Jim has always taken an active interest in the affairs of the town and his presence will be greatly missed. Mrs. Kerr and family will remain in town for the present.

Howard P. Young and Wm. Johnson, of St. Paul, Minn., were the guests of Mr. and Mrs. Lew Bryant during the first of the week. They were on their way home from attending the Knights Templar gathering in Seattle at which 40,000 knights were present. During the convention there was one parade that took more than three hours to pass a given point. They left on Monday going by way of Lake Louise, Banff and Winnipeg. Mr. Young is a second cousin of Mrs. Bryant's.

Kettle Valley Notes

Mrs. W. Berg left last week on a visit to Greenwood.

The next service in the Anglican Church will be held on Sunday, Aug. 23rd at 11 a.m.

A meeting of the Farmers Institute will be held on Aug. 22nd in Riverside Hall, to discuss the Fall Fair.

Dick Roylance and family arrived from the coast on the 7th to attend the funeral of the late Henry Tanner.

A meeting will be held at Major Gray's on Wednesday, August 19, at 8 o'clock, to formalize the Kettle Valley Golf Club. It is hoped that any who are interested within a five mile radius of Kettle Valley will try and be present.

Grote Stirling, Federal member for Yale, spent Monday night with Major F. E. Glossop, and took the opportunity to look up a number of his supporters. Owing to urgent business at Kelowna he was unable to stay, but hopes to be back in the district shortly.

Rock Creek W. A.

The Rock Creek Women's Auxiliary will hold a Bargain Sale of Work (the majority of the articles for sale having been made by members of the W.A.) at the home of Mrs. F. E. Glossop on Wednesday 26th August, 1925, the sale to commence at 2:30 p.m. sharp. It is hoped that all members of the W. A. will try to be present and bring a cake, also to tell their friends of the Sale. Tea will be provided at a small charge, also ice cream, and there will be a candy stall for children.

The objective is assistance to the Anglican Church Guarantee Fund, which has for the last two years fallen considerably below the amount necessary to ensure continuation of the Church services and ministrations—more than one half of the expenses of which are already born by the Diocese of Kootenay. The smallest assistance from all in sympathy will be gratefully appreciated by the Committee in charge of the Church Fund.

Mining Notes

Two Spokane stockholders of the Eholt Mining Company inspected the Combination mine today.

Henry Martin, Fred Davis and Wm. Grant came over from Oroville, Wash., this week to examine some property for Ola Lofstad.

The "Sally" mine at Beaverdell operated by the Wallace Mountain Mines, Ltd., a Penticton syndicate, is a real bonanza. Recently this mine shipped a 52-ton car of ore to the smelter at Tadanac with a gross value of approximately $22,000. The assay returns were 570 oz. silver and 20 per cent. lead.

A coast report says that establishment of small concentrators of from five to one hundred tons capacity at several points in British Columbia, is the objective of the Mace company of Denver. Col. J. M. Meeker, representative of the company was conferring with Hon. William Sloan in Victoria last week.

"The Thundering Herd"

The Zane Grey-Paramount production, "The Thundering Herd," featuring Jack Holt, Lois Wilson, Noah Berry and Raymond Hatton, will be screened at the Greenwood Theatre on Friday and Saturday, August 14th and 15th.

The story of "The Thundering Herd" tells of the journey of a group of hardy men and women from their farms in the east to the vast uncivilized territory of the far west—of the hardships they suffered, of the dangers they encountered, the obstacles they overcame and of their ultimate success when they arrived at their destination.

The picture is packed from start to finish with thrilling incidents and dynamic action. Two of the mighty scenes in the production show a terrific battle between five hundred Indians and a handful of white men and a mad stampede of two thousand fear-crazed buffalo.

Governing Canada

Canada's first Premier was wont to say that the Dominion was a difficult country to govern. If he found this to be true in the years immediately following confederation, when Canada consisted chiefly of Ontario, Quebec and the Maritime Provinces, and the West was an unknown factor of small population and undeveloped territory, how much more difficult must the problem be today when the opinions and needs of nearly three millions of people west of the Great Lakes require to be harmonized with those of the six millions east of that geographical barrier.

Forty years ago the problem was to effect a compromise between the conflicting views of the farming population of Ontario and Quebec on the one hand and the industrial interests of these Provinces on the other hand, and also to reconcile the then acute differences existing between French-speaking Roman Catholic Quebec and English-speaking Protestant Ontario. Coupled with these major difficulties was the task of uniting by a bond of common interest these two Provinces of upper Canada with the Maritime Provinces.

With the passage of time the old racial and religious animosities between Ontario and Quebec have largely disappeared, while the development of manufacturing in both Provinces, and the shifting of the main agricultural activity and production to the newer Western Provinces has served to create a greater unity of sentiment in regard to tariffs and national policies in the East, although marked differences still exist between the central Provinces and the Maritimes.

But the old conflict of interest between agricultural producer and manufacturer which raged in the East in years gone by still prevails between East and West but intensified by reason of sectional considerations, a more or less solid East against a solid West, whereas formerly it was merely a difference of viewpoints within a compact community.

Some good people despair of any solution of this national problem being found, but there is no reason for such gloomy forebodings. The Anglo-Saxon race the world over has always demonstrated its ability to solve such problems, and what it has repeatedly accomplished in the past, it can succeed in doing in the future. It only requires patience, patriotism and statesmanship, and that these will not be found lacking in Canada is indicated by the growing realization, both East and West, that an understanding, based on mutual compromises, must be worked out.

In the government of Canada some earnest people also find cause for disquiet in the changes which, in the onward march of the world, are taking place in the relationships existing between Great Britain and the overseas Dominions of the Empire. In the development of a national consciousness in the several Dominions, and their growing autonomy in regard to matters of domestic concern, danger to the Empire is seen by these rather timid souls. Some years ago they were frightened by the bogey of annexation to the United States because of a proposal of mutual trade concessions between thh Dominion and the Republic and adopted as their rallying cry "No truck nor trade with the Yankees." It is now universally recognized that the defeat of Reciprocity was a great national blunder, but, despite its defeat, trade goes on increasing year after year and Canada's independence and British connection is in no wise impaired.

The preset Premier of Canada well stated the position the other day when he said that as Canada is true to herself and Canadians are true to Canada's highest interests, so will Canadian citizenship mean most for Empire citizenship; that the Empire is just what His Majesty the King has so often described it to be: "A community of free nations." The Premier added: "We have all that any nation could desire in the way of self-government, and more than most nations have by way of a much-to-be-envied political association with other nations of like ideals and aims." That is to say, Canada enjoys all the rights of self-government—if there is anything lacking it can be had for the asking—and, in addition, enjoys all the advantages and strength accruing from its Empire connection. Most countries would sacrifice a great deal to obtain the same position.

Triumph For Surgery

Man In England Successfully Treated For Broken Neck

John Harrington, a florist's assistant of Eastney, England, has been successfully treated at Portsmouth Hospital for a broken neck, and hopes shortly to return to his work.

Last October a large piece of masonry fell on his head. His head, neck and shoulders were placed in plaster of paris, and this has now been replaced by a celluloid jacket, which encases the upper part of the man's body and fastens round the side of his head.

At a distance the appliance is hardly observable, and Harrington is free from pain except when there is a change in the weather. His "cure" is regarded as a triumph for surgery.

A Natural Lighthouse

Nature has provided a lighthouse for the island of San Salvador.

It is a volcano which for years has been of inestimable value in guiding mariners by day and night. The water in the vicinity is shallow and treacherous, and the smoke all day and the great glare by night are more effective as a guide to mariners than any lighthouse ever built by man.

Witty Boarder: "Your steak is like the weather this evening, madam, rather raw."

Witty Landlady: "Indeed? By the way, your account is like the weather, too—rather unsettled."

FOR DIARRHOEA DYSENTERY AND ALL SUMMER COMPLAINTS

Dominions Should Aid Navy

Readjustment of Cost to Britain is Long Overdue

The Dominion joins other New Zealand newspapers in discussing the naval policy of the dominions and states that the time is at hand when the British dominions must either accept their full responsibilities in the matter of naval defence of the empire or dispense with the measure of protection on which they have hitherto relied.

The Wellington Post says that some day, thankfulness with which the dominions see the Mother Country facing her imperial obligations may inspire some of them to do likewise.

The Herald, Auckland, says a readjustment of the cost of the navy is long overdue.

"Britain has been very patient," the Herald adds, "and the dominions have taken full advantage of her greatness of heart. The cruiser dispute (in the British House of Commons) must be interpreted as a critical point in the wider question of empire naval defence.

Britain Is Advertising

"British Goods Are Best" Inscribed On Postmarking Machines

An illustration of the way that Britain is awakening to the value of advertising is contained in the announcement that the general post office has ordered plates inscribed "British Goods Are Best," for all postmarking machines. The commissioner of public works is considering lending space on public buildings for displaying of posters, electrical and other signs, appealing to the public to buy British goods.

Recover Rich Cargo Of Copper

Divers have recovered a $600,000 cargo of copper lost in 1869, when the British frigate Cape Horn was wrecked and sunk off the coast of Chili. The divers worked in high-pressure suits of new invention which were equipped with special pressure-resisting deep-sea lamps, which enabled them to see more than two hundred feet below the surface.

Radio Sets For Police Stations

The Canadian Government plans to have radio sets in every police station from Edmonton, capital of Alberta, to the Arctic Ocean, a distance of more than two thousand miles, mostly wild country, inhabited by Indians, Eskimos, traders, trappers and prospectors.

Minard's Liniment for Dandruff

Higher Education In Canada

Registration 39,372 At Canadian Universities

The assets of Canadian universities in 1924 amounted to $80,864,627, the income to $10,541,874, and the expenditure to $11,716,921. These figures are given in a preliminary report on higher education in Canada issued by the Dominion bureau of statistics.

The registration at the 23 universities in Canada for the academic year ending June 30, 1924, was 39,372, about the same as in 1923. Of this number, about one-third were females.

For Aches, Pains, The Safe Home Remedy

NERVILINE

When sudden sickness comes, when the kiddies come in with colds, their little chests and throats sore from coughing, quick results always follow a vigorous rubbing with good old Nerviline. If it's Cramps, Colic, Diarrhoea, Nerviline is a wonderful friend; it brings ease and comfort so quickly. For young and old, to overcome the minor ills that constantly arise in the home, nothing compares with "Nerviline."—35 cents at all dealers.

Unveils Memorial To Women War Workers

Five Sisters Window Is Treasure House of Stained Glass

What is declared to be the most charming of all war memorials was unveiled a short time ago in the famous York Minster, in England, by the Duchess of York, who again revealed to the world the matchless beauty of the Five Sisters windows.

Hereafter the streams of light that pour their way through will have a new significance, for they will remind all men of the 1,400 women of the empire who gave their lives in the Great War.

The Five Sisters window is the finest window in York Minster, which is England's treasure house of stained glass. Within the walls are over 100 windows containing stained glass of the 13th and 15th centuries.

This unmatched wealth was estimated by the Dean of York two years ago to be worth in modern values $365,000,000.

During the war a bomb fell near the Minster, and most of the priceless glass was removed and stored. For ten years the five tall slender lights of the Five Sisters have been boarded up.

In 1922 a York lady, the wife of Colonel Blakeway Little, had the inspiration of restoring the window as a memorial to the women who died in the war, and with the moneys collected the priceless glass was cleaned and restored piece by piece.

Spoiling Impressive Music

Suggestion of Orchestra Leader Would Not Be Improvement

Ernie Golden, leader of the Hotel McAlpin orchestra, addressed the West Side Religious Forum on "Better Music in Religion" and advocated the use of jazz in churches on the ground that it would "put more pep into the hymns." No doubt it would. And jazzing up Handel's "Largo" would put more pep into that, and jazzing up Bach's "B Minor Mass" would put more pep into that. But would it add to religious exaltation? Hardly. As an example of what it would do, take the "Hallelujah Chorus" from "The Messiah." This is a most impressive piece as written and conducive to religious worship. But as rewritten, under the attractive title, "Yes, We Have No Bananas," it was not so impressive, although much more peppy.—New York World.

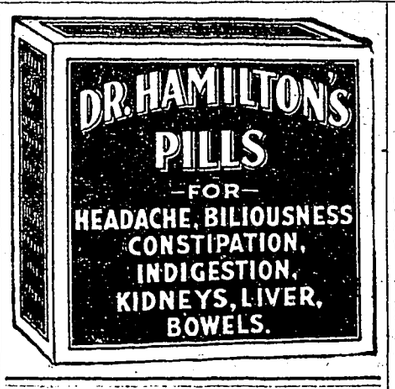
Cost Less Than Battleship

World Power Conference Considering Use of Natural Steam

Sir Charles Parsons' idea of boring a hole ten or twelve miles deep and so securing an inexhaustible source of power from the internal heat of the earth was recently considered at the world power conference in London. The expense of such an undertaking would be less than that of building a single battleship. Natural steam which is converted into mechanical power is being used in the volcanic regions of Italy from such borings.

Rich and Poor Nations

Cases of nations in which the rich became richer and the poor poorer are not unknown to history. Economists used to hold that a similar anomaly as among nations could be only temporary, since by the agency of foreign trade wealth tended to distribute itself over the whole civilized world. The process, we are finding, is remarkably slow. Since the war American wealth would seem to have been increasing in the same ratio as European poverty.—Glasgow Herald.



To Curb Lawlessness

See Motor Car and Pistol as Greatest Crime Adjuncts

"The greatest adjuncts to crime are the automobile and the pistol, and at the next session of the New York state legislature I will recommend that the penalties for all major crimes committed with the aid of either of these be doubled wherever possible," said Commissioner Enright, head of the New York police department, in the course of a discussion on the prevalence of crime, the means of preventing it, and of curbing the activities of the habitual criminal.

The commissioner did not know if his suggestion would be received favorably by the New York state legislature, but he felt sure it would provide a partial remedy for the problem of preventing crime.

BEST MEDICINE SHE EVER USED

Dr. Williams' Pink Pills Highly Praised By a Nova Scotia Lady

Among the well known and esteemed residents of Hemford, N.S., is Mrs. Amanda Woodworth. Some four years ago Mrs. Woodworth had the misfortune to lose her husband, and as a result of caring for him during his illness, and attending to farm duties, she became terribly run-down. Mrs. Woodworth says she felt as though her blood had turned to water. The least exertion would leave her tired and breathless. She was often attacked by spells of weakness that left her almost speechless, and frequently suffered from severe headaches. The medicines she took did not help her, and she almost despaired of gaining her health. In this condition she one day read in a newspaper of a case very similar to her own, in which health was restored through the use of Dr. Williams' Pink Pills. This made her decide to give these pills a trial. After using a few boxes she found the pills were helping her, and she continued their use until her old-time health and vitality were restored. Now Mrs. Woodworth looks after a small farm of fifteen acres, besides doing all her housework, and says she never felt better or more energetic in her life. She gives credit for her present splendid health to Dr. Williams' Pink Pills, which she says are the best medicine she ever used, and strongly recommends the pills to all run-down people.

You can get these Pills from any medicine dealer, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Railways In Early Years

Railways were in use long before the steam locomotive was invented. As early as 1602 short railways in and about Newcastle, England, were laid down by Mr. Beaumont. The rails were timbers laid exactly straight and parallel, and bulky carts on four rollers fitted these rails. Each cart was drawn by a horse, and in this way coal was hauled from the colliery to the river front, "to the immense benefit of the coal merchants."

Pluck Versus Luck

I soon learned that the hardest kind of work was back of every success; that nothing in the world of business just happened, but that everything was brought about, and only in one way—by a willingness of spirit and a determination to carry through.—Edward Bok.

Success comes in "cans"—failure comes in "can'ts."

Cuticura Clears The Scalp Of Dandruff

Regular shampoos with Cuticura Soap, preceded by light applications of Cuticura Ointment, do much to cleanse the scalp of dandruff and promote a healthy condition necessary to producing thick hair. Cuticura Soap and Ointment are ideal for every-day toilet uses meeting every want of the skin and scalp.

Sample Each Free by Mail. Address Canadian Depot: "Benicura, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c.

Cuticura Shaving Stick 25c.

SUNDAY SCHOOL LESSON

AUGUST 16

TEMPERANCE LESSON

Golden Text: Be not deceived; God is not mocked; for whatsoever a man soweth, that shall he also reap. Galatians 6.7.

Lesson: Galatians 5.13-24.

Devotional Reading: Proverbs 23.29-35.

The Text Explained and Illumined—The Flesh Against the Spirit

The power of love, verses 13-15.—Brothers, wrote Paul, you are free from the law, but Christian liberty does not mean that you can do as you please; do not use your freedom as a license for indulging your lower impulses, but live in accordance with the law of love. Flesh is used here for "that element of man's nature which is opposed to goodness, and makes for evil. It signifies the entire potency of sin." Through loving service for others you fulfil the whole divine law, which is, Thou shalt love thy neighbor as thyself. Paul here quotes Lev. 19.18. Then, remembering that the Galatians were prone to quarrel, he adds, But if ye bite and devour one another—act toward one another like dogs or wild beasts—beware lest you destroy one another.

"No man resolved to make the most of himself can spare the time for personal contention. Still less can he afford to take all the consequences, including the vitiating of his temper and the loss of self-control" (Abraham Lincoln).

London Speculates On Programme Of Prince

Wonder What Plans Are After South America Trip

What the future travel programmes of the Prince of Wales will be after his visit to South America is a popular topic for speculation. When he bids farewell to the American continent south of the equator he will have completed his rounds of all the continents of the earth, his trips having taken him to all the great dominions and larger colonies of the British empire as well as to several countries outside the kingdom which he will eventually rule.

Carrying out the extensive programme of trips that was planned for him after the world war, the Prince has spent part of each year since that time away from London. With no more worlds to conquer he will, in the opinion of those who interest themselves in speculating on his future, settle down to seriously prepare himself for the business of being King.

The Prince of Wales has been characterized as the greatest salesman that ever presented the British empire and his wares, international relations. As such he has been a success in all that the term applies.

The homecoming of the Prince will excite Britishers to a greater extent than his return from any previous trip. After his return he will have more time to spend among his own people and consequently there are likely to be more rumors and speculation concerning him than during his former stays in the British capital between trips. These will not influence him, however, as he has shown a strong will and independence of action regarding himself since childhood.

For Scalds or Burns.—Dr. Thomas' Eclectric Oil is a standard remedy for the prompt treatment of scalds and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinary's fee.

Wireless Waves Travel Fast

Reach Point 8,000 Miles Distant In 23rd of Second

The editor of the Children's Newspaper, lying in bed the other day, heard Big Ben, the bell in the Parliament Buildings, London, England, strike midnight.

But the twelve strokes of the big bell were heard in California before the editor heard them, for they were broadcast by 2 L O and picked up by thousands of people in the States.

This is the explanation. From the editor's home to Big Ben is 4,620 feet, and as sound travels in the air about 1,120 feet a second, the chimes of Big Ben took 4⅛ seconds to reach the editor's room. But, as wireless waves travel 186,000 miles a second, the chimes took only a 23rd of a second to reach California, 8,000 miles away. The American therefore heard the bells more than four seconds before the editor heard them through his window, almost within sight of Big Ben's tower.

Never knock at the door of your sweetheart's home—she would prefer your entering with a ring.

The United States produces half of the world's copper and uses 44 per cent. of the production.

Minard's Liniment for Burns

Prison Populations

Little Variation Shown In Number Of Penitentiary Inmates During Past Four Years

The penitentiary population of Canada has varied only a few hundred during the past four years, and the 1925 figure is lower than the two preceding years. In the penitentiaries controlled by the department of justice, there were, in 1921, 2,150 prisoners; in 1922 there were 2,640; in 1923, there were 2,480, and last year there was a drop to 2,225.

Of the total penitentiary population of Canada last year, 692 were in Kingston; 551 were at St. Vincent de Paul; 266 at Dorchester; 199 in Manitoba; 224 in British Columbia; and 293 in Saskatchewan.

The Terror of Asthma comes like a thief in the night with its dreadful throttling, robbing its victim of breath. It seems beyond the power of human aid to relieve until one trial is made of that remarkable preparation, Dr. J. D. Kellogg's Asthma Remedy. Then relief comes with a rush. Life becomes worth living, and, if the remedy be used persistently, the disease is put permanently to rout. Take no substitute.

An Ocean Sulphur Spring

Surveyed By Experts Off Coast Of Florida

Bubbling out of the ocean from a depth of 125 feet, a big spring of fresh sulphur water, two miles off the coast of Florida, near St. Augustine, recently was surveyed by experts of the United States Coast and Geodetic Survey.

The government scientists anchored directly over the troubled waters of the sea spring. The water sampled was about the same temperature as the surrounding Atlantic, but the tremendous size and force of its geyser-like upwelling was plainly apparent at the surface.

Miller's Worm Powders are a prompt relief from the attacks of worms in children. They are powerful in their action and, while leaving nothing to be desired as a worm expellant, have an invigorating effect upon the youthful system, remedying fever, biliousness, loss of appetite, sleeplessness and other ailments that follow disorders caused by worms in the stomach and bowels.

Would Segregate Prisoners

Suggests Segregating Prisoners According to Their Temperament

Creation of a number of small prisons to replace the existing comparatively few jails and penitentiaries, where criminals could be segregated according to temperament, is a proposal which Judge Marcus A. Kavanaugh, of Cook county, Ills., will offer to the international prison conference, to be held this month in London, England.

Steel Used Centuries Ago

Steel, a compound of iron and carbon, has been made from the earliest time. It was certainly used by the Egyptians, Assyrians and Greeks. A manufactory for cast steel is said to have been established by Benjamin Huntsman at Handsworth, England, in 1722. The manufacture of sheet steel began at Sheffield, England, about the year 1800.

Only the uninformed endure the agony of corns. The knowing ones apply Holloway's Corn Remover and get relief.

Yes, Dobbin's Passing

In Chicago during the last five months 16,993 horse-drawn vehicles were given licenses. During the same period more than 250,000 auto licenses were issued.

Something About The Riffians

People Are Refined and Simple Living An Attractive Life

Less is said by the London correspondent of the Manchester Guardian, to be known of the Riffian nation than of any other nation that has ever held a great power at bay. The Riffs are an athletic, highland race, and in many ways remind one of what one reads of ancient life in the Scottish highlands. Horses cannot be used much among the loose rocks on the hills, and those to be seen are unimpressive.

But the Riffs' mules are particularly good. "The country seems in its valleys to have a big stock of cattle, sheep and goats. Food is very plentiful, and there is no scarcity of milk. The common drink is tea, not coffee, and the tea is brewed very thick, with sugar and herbs, making a sort of syrup. Milk is also served with herbs. The houses are scrupulously clean, and the meals well cooked. The guests sit around a large bowl and help themselves with their hands, and between each course bowls of scented warm water are brought round for washing the hands. There is English soap there and Price's candles. These were almost the only "foreign imports" seen by the correspondent's informant, who knows the country well and has talked with Abd-el-Krim.

The people struck him as refined and simple, living a free and attractive life. The old men spoke of traditions of the Moors in Spain, and how their ancestors were driven out. They said that the Riffs were the last of the Moors to be driven out of Spain.

As to the famous leader of the Riffians, Abd-el-Krim himself is a bearded man of medium height, of very light brown color, like most of the Riffs. He is in his forties, speaks a little French, and a good deal of Spanish. He spent some years in Spain, and was in the employment of the Spanish Government at Mahila, on the Morocco coast, teaching native languages to Spanish officers. He is, and looks, a man of high rank, with an impressive refinement of manner.

Hindu Turban Is Useful

Natives Make It Take Place Of Suit Case

A southern Pacific train, between Sacramento and Davis, Calif., stopped on a siding one evening just as some men who had been cutting brush on the right of way finished their day's work. One, a Hindoo, brought water and sticks and then, oblivious of the watching travellers, got ready to make his toilet. Right then and there I discovered one reason for the turban.

As he unrolled the turban one observer remarked: "Why, it is his suit case." And so it was.

He took out a towel, a purse, a cake of soap, comb, scissors and razor. These he arranged on the grass; but by that time the train moved on. We had learned something about a turban, however, that was new to most of us. The careful toilet before eating must be a part of the Hindoo religion, for the same season I had the opportunity of watching some Hindoo workers in an almond orchard.

Happening along about noon, I noticed them gathered about the water tank. They washed, they gargled and cleared out their throats, they blew their noses lustily, they even cleaned out their ears with some small instrument; then, evidently satisfied that they had done their duty as to cleanliness, they sat down to eat.—Etta Kent in Our Young People.

The Newest Antonym

A teacher was instruction her class in the use of antonyms. "Now, children," she said, "what is the opposite of sorrow?"

"Joy," shrieked the class in unison.

"What is the opposite to pleasure?"

"Pain."

"And what is the opposite to woe?"

"Giddap."—The Outlook.

Decrease Expenses In Summer

Alaskan railroads save a great deal of money during the summer months because of the continuous sunshine. Switch lights are turned off early in June and not relighted until fall. This is the only railroad in America that is able to decrease expenses in this way.

Asked who were the four horsemen a Wisconsin boy said, "Paul Revere, Theodore Roosevelt, Jesse James and Barney Google."

Demonstrated Her Strength

Female Chimpanzee At London Zoo Has Astonished Experts

The Zoological Gardens in London is continually meeting with fresh shocks and surprises. The animals always seem to have something fresh with which to astonish the experts.

This time it is "Daisy the Demon," a magnificent female chimpanzee, who has amazed her curators and keepers with feats of strength. "How strong is an ape?" is a riddle which has never been answered, but Daisy has just given the following demonstration as data.

A great section of a tree trunk, two feet in diameter, was placed in her cage as a rough and ready chair. It needed a couple of keepers to lift it into place. For a time Daisy used it properly, and then she turned it over with one hand and rolled it about.

This was rather a dangerous plaything. She might have hurt herself with it, and, also, she might have used it as a kind of battering ram against the wire meshes of her cage.

When a really big elm was felled in the Zoo, a fine section was sawed off for Daisy's benefit. This measured a full yard across and was nearly a yard high. It was not weighed, but it needed four keepers and a helping hand from Dr. G. M. Vevers, the superintendent of the gardens, to get it into the ape's cage.

Daisy regarded the new furniture with interest. She remembered the game she played with the old log and tried her strength on the new one. A heave and over it went.

Her ill-temper has doomed her to spinster-hood. The Zoo officials do not see why they should give her an expensive husband. It would be so wasteful.

Queen Birds In London Zoo

If Exposed to Rain Crimson Coloring Washes Out

The latest addition to the small birds' house in the Zoological Gardens in London, are a pair of birds from Abyssinia, known as Donaldson's Touracous—related to, though quite unlike, the cuckoo.

They are the first of their kind to reach Europe alive—or dead—for there is not even a skin of the species in the British Museum. Instead of the pointed crest of typical Touracous, the newcomers have a rounded one which they erect when excited.

Living among the tree-tops in the depth of the African forests, Touracous manage to keep well out of the rain, for it has been found that their crimson coloring is washed away upon exposure to a downpour.

This peculiarity led to the discovery of a new animal pigment containing copper, which has been called "Turacin."

An African visitor to the Zoo told the keeper that his wife dyed a blouse with color obtained by steeping the quill feathers of Touracous in boiling water.

Fortunately for Touracous, they are not permanently disfigured by a shower of rain, for color washed out is quickly renewed.

Eastern Countries Still Use Palanquin

Modern Vehicles Used Only Where Roads Are Good

In China and India the palanquin, a sort of sedan-chair, still maintains its popularity as a safe, easy and convenient means of travel; indeed, in practically all eastern countries where the science of road-building has made but little progress save in the vicinity of larger cities, the use of wheeled vehicles is out of the question, and the palanquin, the howdah, and the saddle furnish the only means of journeying from place to place. Many years, perhaps generations, must elapse before these modes are superseded by modern contrivances, save along the great highways of travel and traffic where enterprise and capital have forced the construction of railroads.

Would Change Railway Taxes

Suggestions to the effect that the government might tax railways on a mileage basis instead of on gross earnings was made by Sir Henry Thornton, president of the Canadian National Railways, who conferred with Premier Bracken of Manitoba. He was supported by Major C. R. Bell, deputy minister of railways; W. J. Watson commissioner of taxation and M. Gardiner, member of the Canadian National Railways board. The railway officials plan to submit their plan through the different provinces.

Steel Will Soon Be Curiosity

Corrosion and increasing costs of construction will eventually cause the great steel viaducts, iron ships and railroads to be a curiosity, according to Gustav Lindenthal, a well-known engineer. Within a hundred years the cost of coal and iron will be so great that steel constructions will be impractic'

Made Unfortunate Start

After Two Mistakes Journalist Decided To Leave Town

One of the difficulties that beset even the best-intentioned journalists is told by one of that profession who decided to establish a newspaper in a "one horse" town, and was informed that a certain gallant colonel must at all costs be propitiated. His first number, therefore, contained a long article full of praise of the colonel's achievements, but unfortunately the headline, which should have read "Our Battle Scarred Hero," appeared as, "Our Bottle Scarred Hero," and an hour later the colonel, who liked his glass, was round looking for the editor with a shotgun. An explanation was with difficulty effected, and an apology and correction promised. Unfortunately the compositors again slipped, and the apology explained that "Bottle Scarred Hero" should have read "Battle Scared Hero." When the enterprising journalist saw his paper he wisely sought the railroad depot and moved on.

Discovery Of Sheffield Plate

Fusing Of Silver and Copper Was Done Accidently

It is said that Sheffield plate was accidentally discovered by Thomas Bolsover, when he was repairing the handle of a pocket-knife composed partly of silver and partly of copper, and in making his repairs accidentally fused the two metals. He at once conceived the idea of uniting these two metals and using this as a substitute for making articles which hitherto had been made of sterling silver only. He seems to have specialized in making small articles such as buckles, buttons, snuff-boxes and patch-boxes, some of which were only half an inch in diameter. He did not appreciate how important his discovery was, and consequently did not reap the full results from his remarkable invention.

New Sea Discovery

Scientists Find Spot Where Two Great Currents Meet

In a recent scientific expedition on the sea there was discovered a gigantic tide-race where two great currents meet. The mass of foam caused by their violent collision extended for miles, and in this foam great numbers of whales and porpoises wallowed, attracted by the immense supply of food. There were also great quantities of wreckage, covered with organisms, and fish of all kinds feeding on them. For the first time the scientists found the eggs of halobates, the only marine insect in the world. The eggs are being hatched in tanks. Vast numbers of jelly fish colored the water purple for many square miles. The expedition caught more than 150 species of fish.

Caution Was Required

Judge Needed Gilt-edged Proof When Giving Up Cash

A former judge, who had become a cashier in a western bank, once declined to honor a check that a stranger had presented. "The check is all right," he said, "but the evidence you offer in identifying yourself as the person to whose order it is drawn is scarcely sufficient."

"I have known you to hang a man on less evidence, judge," was the stranger's response.

"Quite likely," replied the ex-judge; "but when we're giving up cold cash we have to be careful."

Most Valuable Stamp

A British Guinea postage stamp which was sold for a cent in 1856 is now valued at $32,500. It is the only one of its denomination of that issue and is said to be the most valuable stamp in existence. The most valuable ever printed in the United States is one of a five cent issue from the town of Boscawen, New Hampshire, in 1846, and its value is $12,000.

At the conclusion of the primary-language class the teacher announced that the subject of the next lesson would be poetry, and then asked:

"Can anyone tell me what poetry is?"

Little Chester immediately raised his hand, and upon being recognized, said: "Poetry is chickens."

Southern Alberta Wool Crop

With an estimate based on a price of 35 cents a pound, $350,000 will be received by the southern Alberta wool growers for this season's wool of approximately a million pounds.

Mist: "How do you like your new laundry?" Hytte: "Very well indeed. I sent a dozen collars last week, and everyone of the buttonholes came back."

Mother: "Your face is very clean, but where did you get such dirty hands?"

Little Boy: "Washing my face."

Mystery Man Of Arabia

Colonel Lawrence Was Great Figure In World War

The mystery man of Arabia, archaeologist, turned soldier and maker of kings, Colonel T. E. Lawrence, remained practically unknown until the end of the great war. Yet he was one of the greatest figures in the world struggle.

"Members of the army medical board looked at the frail, five-foot-three, tow-headed youth, winked at one another, and told him to run home to his mother and wait for the next war.

"Just four years after he had been turned down as physically unfit for the ranks, this young Oxford graduate, small of stature, shy and scholarly as ever, entered Damascus at the head of his victorious army."

"In 1917 Lawrence and his associates, in co-operation with Feisal, Ali, Abdullah and Zeid, blew up 24 Turkish trains, tore up 15,000 rails and destroyed 57 bridges and culverts. During the 18 months that he led the Arabs they dynamited 79 trains and bridges."

With his Arab army ever increasing and becoming more efficient, Lawrence, aged 29, at the head of the Bedouin irregulars, eventually rode through the streets of Damascus.

In such small compass it is impossible to do justice to the exploits of Lawrence—of the times he went disguised into the Turkish lines, of his meeting with the Bedouin Robin Hood (an ancient gentleman who had slain 75 men, excluding Turks, in hand-to-hand combat in 17 years), of the wonderful battle he directed in the derelict streets of the lost city of Petra, where the palaces, tombs, and amphitheatre have for hundreds of years been occupied only by the lizards and the jackals.

Good News For Italian Prisoners

An amnesty, a decree of far-reaching proportions, freeing all political offenders, except murderers, and releasing from the jails prisoners of all kinds, has been granted as an act of royal clemency, and as a contribution to national pacification, on the occasion of the completion of the quarter century reign of King Victor Emmanuel. It is estimated that between ten and 12,000 persons will be affected.

Snapping Him Up

Sam (viewing monkey in cage): "It's apparent to me—"

Wilma: "Oh, really. I didn't know that the relationship was so close."

ONTARIO WOMAN REGAINS HEALTH
Wants Other Women to Know About Lydia E. Pinkham's Vegetable Compound
Mount Forest, Ont.—"Before I took Lydia E. Pinkham's Vegetable Compound I felt weak and miserable, and had pains all through me. I was living in Ailsa Craig at the time, and one day a friend came in and told me her experience of using the Vegetable Compound and advised me to take a bottle, which I finally did. I began to get stronger and those pains left me. I am glad I found out about this medicine as I think there is none equal to it for women who have troubles of this kind. I cannot praise the Vegetable Compound too highly for the good it has done me. Whenever I know of a woman suffering I am glad to tell her of it."—Mrs. Wm. Ridsdale, R.R. No. 1, Mount Forest, Ontario.

Women throughout the Dominion are finding health in Lydia E. Pinkham's Vegetable Compound.
No harmful drugs are used in its preparation—just roots and herbs—and it can be taken in safety even by a nursing mother. For sale by all druggists.

Could Not Be Mistaken

Explorer Tells How Lizard Rejected Its Admirer

In "Adventures in Exploration at the World's End," William Beebe, the explorer, says:

No sooner had I passed beyond the open sandy beach of Galapagos Island, than little lizards began to dart along my path.

I crept up to the first one I saw, anxious to get a photograph, and while looking into my camera almost trod upon it, so tame was it. While waiting for it to turn sideways, a big male crawled between my feet and nodded frantically to a scarlet-throated female sunning herself on a bit of lava. He crept a little nearer, nodded again, whereupon the lady lizard rose as high as possible upon all four legs, making them look like straight little sticks, arched her body, blew herself up with air until she lost all semblance to a lizard, and, turning her head slowly, spat upon her admirer. He turned, nonchalantly caught a fly, and sadly made his way elsewhere. Never have I seen such a sudden transformation or a more unmistakable indication of disposition.

Last But Twelve Hours

Flowers of Night-Blooming Cereus Withers At Dawn

Of the many beautiful flowers of the Hawaiian Islands, the night-blooming cereus stands out by itself. It comes of the cactus family and is without competition, as it is the owl of the flower kingdom. The life of the flower is about twelve hours. The buds begin to open as the shades of night gather, and by the time darkness settles the flower is fully open. But with the coming of the morning it begins to close and wither, never to open again.

These flowers come in countless numbers and are nine inches in length and from six to eight inches across. The petals are snow-white, while the deep calyx is a rich yellow.

June, July and August is the blooming season, but there is only one night when the buds come forth in all their glory. On that night the people of Honolulu turn out to pay homage to this queen of flowers.

It Bids Pain Begone.—When neuralgia racks the nerves or lumbago cripples the back is the time to test the virtues of Dr. Thomas' Eclectric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

A Triumph

"There!" said the seaside girl, as she laid down her pen. "I think that's a record! Twenty-four postcards and only nine beginning. 'Just a line to let you know!'"

Recognized as a leading specific for the destruction of worms, Mother Graves' Worm Exterminator has proved a boon to suffering children everywhere. It seldom fails.

A Homely Illustration

Toasting Bread Shows Main Principle Accounting For Heat at Equator

Every time we toast a piece of bread we are illustrating the main principle which chiefly accounts for the earth being hotter at the equator than at the poles. If we hold the bread parallel with the fire, it gets the full heat, but if we tilt it slantwise, it takes longer to toast. The equator is the part of the earth's globe that gets the most direct rays from the sun, the poles the parts that get the most slanting rays. In the one case, we get a sun directly overhead at some part of the day; in the other, the sun at its very best only "rises" to a point low down on the horizon, and so gives off rays extremely on the slant. These slantwise rays, too, have to pass through much more atmospheres than the straight rays, and as our atmospheres acts as a sort of blanket, with its mists and fogs, it follows that the heat of the slanting rays is still further reduced in power. Other considerations also have their bearing upon the question, but the straight versus slantwise rays are the main factor in the comparative heat of the equator over the poles.

Work Worth While

The thing which you most dislike to do may be worth more to you than a baker's dozen of pleasant tasks. Say, "What should I do?" instead of pampering your dislikes. Many dislikes are changed to likes, when the task is honestly faced and attempted.

Which Did She Want

She: I noticed you hesitated when I asked you if I was the only girl you had ever loved.

He: Yes; I couldn't tell from your expression whether you wanted me to say "No" or "Yes."

Pigs raised on the high lands of Tibet are covered with thick, rusty colored hair.

Minard's Liniment for Corns and Warts

After eating or smoking Wrigley's freshens the mouth and sweetens the breath. Nerves are soothed, throat is refreshed and digestion aided. So easy to carry the little packet!

Good Salesmanship

Jew Decided Arguing With Customer Was Bad Business

A story is told of a Jew who was selling a suit of clothes to a customer.

"It looks pretty well, but I doubt if it's all wool," said the customer.

"But do you like it?" replied the shopkeeper.

"Yes, I like it, but I don't think it is wool."

"Then, shall I wrap it up for you?"

"Sure," replied the customer, "I'll take it. But why didn't you argue with me?"

"Because," replied the merchant, holding out his hand for his money, "if I win the argument, I lose the sale; so what's the use?"

SUMMER COMPLAINTS KILL LITTLE ONES

At the first sign of illness during the hot weather give the little ones Baby's Own Tablets or in a few hours he may be beyond aid. These Tablets will prevent summer complaints if given occasionally to the well child, and will promptly relieve these troubles if they come on suddenly. Baby's Own Tablets should always be kept in every home where there are young children. There is no other medicine as good and the mother has the guarantee of a government analyst that they are absolutely safe. The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Sees Orient Great Wheat Importer

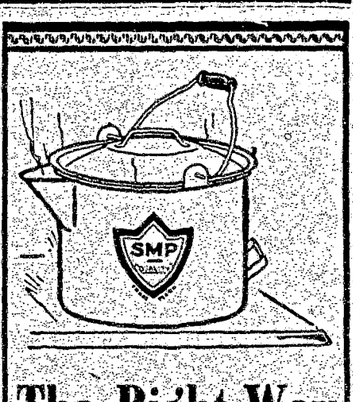
A prophecy that the Orient would become, in the near future, a really large importer of Canadian wheat, was made by Hon. Dr. J. H. King, Ottawa, minister of public works.

In predicting increased Orient trade in grain, Dr. King pointed out that imports of wheat from Canada for 1923-24 increased 400 per cent.

Minard's Liniment for Aches and Pains

A German inventor has perfected a machine for measuring the height of aeroplanes. The apparatus times the echo from the craft to the ground within one ten-thousandth of a second.

The brain is the most variable in size and quality of all the parts of the human body.



The Right Way to Boil Potatoes
Put the potatoes in an SMP Enameled Potato Pot. Cover with water. Add salt to taste. Boil until soft. When finished, drain off *all* the boiling water through the strainer spout. No danger of steam scalding the hands because the handle securely locks the cover on. If your family uses potatoes, you require one of these.

THE Opposition, led by Hon. J. M. Baxter, won a sweeping victory in the provincial elections held throughout New Brunswick on Monday, the government headed by Hon. P. J. Veniot, securing but 11 of the 48 seats constituting the house. With a following of 37, Dr. Baxter will have a majority of 25 in the next legislature. The Farmers party, with but three candidates in the field, did not prove a factor in the struggle, and the two Independents who ran lost their deposits.

Low railway fares for harvesters will be in force in British Columbia to the prairies from August 8th to 31st, the arrangements to this effect having been made by the Superintendent of government employment bureaus. The harvest will call for the service of about 60,000 men and it is estimated that this Province can supply about 6,000. The rates are the same as last year, that is $10.00 from Vancouver and $11.00 from Victoria to Calgary or Edmonton and half a cent a mile from either of these points to the destination. The rates are effective from interior points. Similar low rates will be available for the return trip on the production of a certificate that the holder has worked in the grain fields.

ARE 1926 and the two or three years immediately following it going to have very severe Winters, with little or no Summer? This is the question scientists are trying to answer. They state that the likelihood is that next Summer and the two or three summers immediately following it will be periods of many storms, much rainfall and a minimum of sunshine. Dr. R. E. Delury, assistant director of the Dominion Observatory, Ottawa, says that the reason is that during the next two or three years sun spots will reach a maximum number and the sunlight coming through to the earth will be reduced to a minimum not achieved since about 262 years ago, when the last sunspot maximum was reached. The 262 year cycle, in the past, concides with pestilence, poor crops, little or no Summer, and other disasters.

Terrance Crowley, of the staff of the Greenwood Superior School who is holidaying at the coast, met with a painful accident in Vancouver last week, when in starting his car in high gear, the car lurched forward carrying Mr. Crowley with it and in coming in contact with the curb broke his leg. He was taken to the Vancouver General Hospital. His many friends in Greenwood wish him a speedy recovery.

Rock Creek Items

Bob Johnson is home again for a time.

Miss Caldwell has been visiting Mrs. E. Richter for a few weeks.

Mr. Reynolds, the new fire warden, was in the district on Friday.

W. Abel, of Christian Valley, motored to Rock Creek on Saturday.

W. Hatton was in town on Sunday and reported a good crop of grain on his farm.

W. Clark has had a slight accident to his leg, which compelled him to rest for a few days.

Charles Wilson and W. Smith of Kamloops, motored to Rock Creek on Tuesday, August 4th.

The Misses Alice and Reta Weed accompanied by their brother Charlie, motored to Seattle last week.

Provincial Constable Stewart, of Midway, and Dr. Traux, of Grand Forks, passed through town on Friday.

Miss Lena Weed, who has been visiting her parents for three weeks, returned to Portland, Ore., last Monday.

Rock Creek is sorry to loose her popular Road Superintendent, Jas. Kerr, but we wish him the best of good luck in his new position.

The forest fires are very bad and hard to get under control. Large gangs of men from different parts of the Province, have been sent in to fight the fires.

Among the visitors to Rock Creek on Sunday were: Mr. and Mrs. James Kerr, of Greenwood; Mr. and Mrs. Andy Johnson, Bridesville road; Jack Rusk, Main River; L. E. Salter, Midway; and C. T. Fenner the Greenwood tonsorial artist.

On Wednesday, August 5th four carloads of cattle were shipped from Rock Creek and three cars of cattle from Midway, to P. Burns & Co. at Vancouver. Commenting on the prices one rancher said: "The prices of cattle is simply deplorable. Real starvation is in sight for the cattle raisers if these prices continne. How can a rancher exist on such small prices? which are offered to him for his prime steers and cows, is a question quite a lot of people are asking. Who gets the tha rake off? Certainly not the poor farmer. It is the middle men, who live in luxury, who collects the money in their pockets, which the hard working farmer ought to have. Why, put up with such a condition."

Christian Valley Notes

(Too late for last issue)

Mrs. A. Lindgren is recovering from her recent illness.

M. D. Schenck is said to be the best strawberry short cake maker in the Valley.

Mr. and Mrs. W. K. Gwyer and family are camping on Christian's ranch again this year.

Miss Evelyn Christian, R. N. of Bellingham, and Miss Mable Enger, also of Bellingham, are visiting Miss Christian's parents.

Chas. Noren is expected home on the 11th. He has been working on a mining contract for nearly a year at Kimberley with F. O. Peterson.

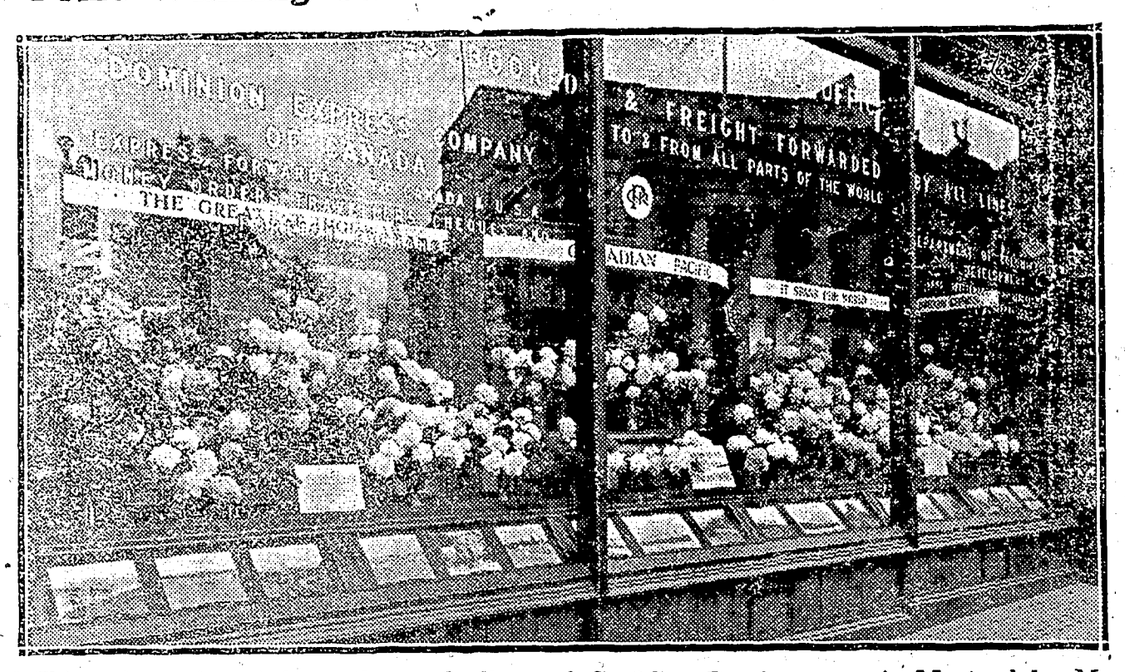
The School Board at Christian Valley are erecting a 50-foot flag pole. This is welcome news as now our country's flag will be able to be flown at the school.

Mr. and Mrs. A. Legault with Mrs. Hingley and two children motored up from Greenwood on Sunday to the Christian ranch, returning the same day. Miss Hingley remained and will visit with Miss Nora Christian for a couple of weeks.

Card of Thanks

The Tanner family wish to thank their many friends for kindness and sympathy shown during their recent sad bereavement, and also for the many beautiful tributes sent.

Prize Winning Canadian Peonies Exhibited In London



This unique picture shows the much discussed Canadian Peonies grown in Montreal by Mr. Ormiston Roy and shipped to England in cold storage in a Canadian Pacific vessel, on exhibition in the window of the Canadian Pacific offices in London, England. The Royal Horticultural Society has presented the Banksia Silver Medal to Mr. Roy and several London papers have remarked editorially upon the extraordinarily perfect condition of the blooms after their long sea voyage. An interesting feature of the picture is that in the window may be seen the reflection of the new Canadian Building which stands almost directly opposite the Canadian Pacific Offices and was recently opened by the King and Queen.

The Mineral Province of Western Canada

TO END OF DECEMBER, 1924

Has produced Minerals as follows: Placer Gold, $77,382,953; Lode Gold, $118,473,190; Silver, $68,824,579; Lead, $70,548,578; Copper, $187,489,378; Zinc, $32,171,497; Miscellaneous Minerals, $1,431,349; Coal and Coke, $260,880,048; Building Stone, Brick, Cement, etc., $42,225,814; making its Mineral Production to the end of 1924, show an

Aggregate Value of $859,427,386

Production for the Year Ending December, 1924, $48,704,604

The Mining Laws of this Province are more liberal, and the fees lower, than those of any other Province in the Dominion, or any colony in the British Empire.

Mineral locations are granted to discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, the security of which is guaranteed by Crown Grants.

Full information together with Mining Reports and Maps, may be obtained gratis by addressing—

THE HON. THE MINISTER OF MINES
VICTORIA, British Columbia.

N.B. Practically all British Columbia Mineral Properties upon which development work has been done are described in some one of the Annual Reports of the Minister of Mines. Those considering mining investments should refer to such reports. They are available without charge on application to the Department of Mines, Victoria, B.C. Reports of the Geological Survey of Canada, Pacific Building, Vancouver, are recommended as valuable sources of information.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 8,000 board feet per acre west of the Coast Range and 5,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price for first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partly free, permits are available for settlers, campers and travellers, up to ten head.
