Of Local Interest

Mrs. F. A. Johnson and son, Ernest, are visiting at Beaverdell.

A. R Royce, of Trail, is spending a two weeks holiday at his home here.

A shipment of 20,000 Kamloops trout fry were put in Long Lake a few days ago.

Mass will be celebrated in the Catholic Church on Sunday, August 28th.

Andrew Sater is spending a well-earned holiday in Molson, Wash., and vicinity.

A. F. Eddy, Custom Officer at Bridesville, was a visitor in town on Tuesday evening.

Dr. W. D. Smith, Dentist of Grand Forks, will be in Greenwood on Sunday, August 14th.

Mrs. K. Goulding, of Venice, Cal., is visiting her parents, Mr. and Mr. M. Saunier at Rhone.

Born—To Mr. and Mrs. F. Fant, of Beaverdell, a daughter, on July 31st, at the District Hospital.

Mrs. W. H. Bryan is spending a few days at James Lake the guest of Mr. and Mrs. Howard Smith.

Cynthia and Betty Docksteader, of Trail, are spending a holiday with Mr. and Mrs. R. Williamson.

Miss Frances Lucente, of Vancouver, is visiting at the home of her parents, Mr. and Mrs. A. Lucente.

Mrs. J. H. Robinson and Miss Flossie Blundell returned the first-of-the-week from a visit to Nicholson Creek.

J. C. Kennedy was in town on Thursday night en route to his home in Penticton from a business trip to Nelson.

Miss Ruth Axam returned on Tuesday afternoon from a pleasant holiday spent with friends in Victoria and Vancouver.

Mr. and Mrs. J. Culline and family and Mrs. McDonald, all of Rossland, were the guests of Mrs. Geo. Sutherland on Sunday.

Mr. and Mrs. Frank Fraser and family have vacated the Oppenheimer house and are now living in the Bank of Montreal dwelling.

Mrs. Hopper and Calvin Hopper, who have been running a business at South Slocan for the past six months, left last week for Vancouver.

A local fisherman was fined $10 and costs, on Saturday, for catching trout under 8 inches in length contrary to the B.C. Fisheries regulations.

G. A. Smith, of Grand Forks, was visiting at the home of his son and daughter-in-law, Mr. and Mrs. G. W. A. Smith, on Tuesday afternoon.

Charles Joseph Kingsley and Mrs. Ellen Martin, both of Bridesvile, were married at the brides home on Friday, July 29th, by Father A. L. McIntyre. The witnesses were Mrs. Verle Moore and W. L. McBride.

C. O'Sullivan, of Nelson, C.P.R. investigator, was in town on business on Wednesday and Thursday. He was a guest at the Pacific Hotel.

Murray Walters returned to his home in Vancouver on Saturday after a pleasant month's holiday in town the guest of his grandmother, Mrs. Wm. Walters.

Dr. A. Francis, Rev. A. Walker, Harry Hallstrom, John and Eugene McGilliray returned on Friday last from a fishing expeditiion to Fish Lake. They report good catches

Miss Emery, of the District Hospital staff, is on a month's, vacation, part of which she will spend at her home in Rhone. Miss E. McDonald, of No. 7 Road, is relieving Miss Emery.

Mrs. Downton, Miss D. Downton and Arthur Downton, of Willcox, Sask., who have been the guests of Rev. and Mrs. A. Walker for a couple of weeks left this morning for Summerland.

George Clark, of the Mark Hopkins Orchestra of San Francisco, left for the Californian metropolis on Monday. During his visit he made many friends who hope to see him return next year.

Mr. and Mrs. Wm. Walmsley and family motored over to Penticton, returning Sunday evening accompanied by Miss Vera Walmsley, who has been spending a holiday with Miss Helen Kerr.

Mr. and Mrs. J. Keady returned during the week-end from a motor holito the Kootenay. They left on Monday for Oliver where Mr. Keady is relieving in the South Kootenay Power station.

Republic and Curlew played the final schedule baseball game of the season at the latter place on the 31st inst. It resulted in a win for Republic by 7 to 5 and thereby tops the league. It was an excellent game.

Cecil McLennan, nephew of Mr. and Mrs. Angus McLennan, of Bridesville Road, Rock Creek, who is on the Vancouver office staff of D. D. Munro, the city trustee, paid a visit to the City office on Wednesday afternoon.

A fire started in the grass after a eastbound freight train passed the Kerr ranch, occupied by T. Krouten, on the Midway road, on Wednesday afternoon. A large force of men are fighting the blaze which spread very rapidly.

Old-timers will regret to learn of the death of Mrs. M. D. McIntosh, of Chewelah, Wash., recently. Mrs. Mc Intosh lived at Mother Lode a number of years ago, Mr. McIntosh at that time being superintendent for the B.C. Copper Co.

Mr. and Mrs. J. Drum, of Beaverdell, left Greenwood on Tuesday for a two months holiday, in which they will visit Mr. Drum's parents at New Kincardine, N. B., and on their return journey they will stop in Ontario and Saskatchewan.

Leonard and Norman Haynes appeared before S. B. Hamilton, S.M., at the Greenwood Court House on Aug. 30th, charged with being drunk on the public highway at Rock Creek on July 25th. They pleaded guilty and were fined $25.00 and costs each.

Flora Stewart, youngest daughter of Mr. and Mrs. W. B. Stewart, celebrated her third birthday by giving a party to her young friends on Monday afternoon. Games were played and dainty good things to eat were served. The children had a wonderful time.

Mr. and Mrs. A. D. McLennan, of Bridesville Road, were visitors to Greenwood on Tuesday afternoon. They were accompanied by J. R. Crawford, L. V. Cressman and C. G. Mc Lennan, all of Vancouver, who motored up from the Coast to visit with Mr. and Mrs. McLennan for a few days.

J. D. Smith, of Vancouver, is in town and will be in charge of the local branch of the Canadian Bank of Commerce during Manager, H. T Newmarch's vacation. Mr. Newmarch will leave in the morning for Vancouver, thence, accompanied by Mrs. Newmarch on a motor trip to California. Mr. Newmarch will be away three months.

F. H. Fox, of Vancouver, is residing in town for a time. He has purchased the rock crusher, sample mill and compressor at the Jewel mine. The dismantling and shipping of this machinery will entail considerable work and take some time. George White is in charge of the dismantling while R. Forshaw will do the hauling. The bed of the crusher alone weighs over five tons. Transporting such weights down the steep grades of a mountain road is a task which requires experience and good judgement. All the parties concerned have had years of experience along this line so a task of this kind is all in a days march to them.

City Council

The City Council held its regular session on Monday evening, Mayor Gulley occupying the chair and present Aldermen King, Taylor, Morrison and Forshaw.

A lengthy report from the Lighting committee was submitted and considered satisfactory.

The Water committee reported a good supply of water on hand but in view of the continued hot weather strongly advised that householders be warned against unnecessary waste.

Following advice from the Trustee the Council instructed the City Clerk regarding cutting the service of light and water in cases of non-payment of arrears.

A vote of thanks was passed to those who so promptly responded to the fire call last Friday morning when the speedy action in laying the fire hose and getting the water into play prevented what would have developed into a disastrous fire.

The rest of the business was of a routine nature.

The Spotted Horse Mine

Howard Dennis, a director of the Jubilee Mining Company owners of the Spotted Horse mine and Mr. Shields, a shareholder, visited the property on the 31st inst., and took samples from the new strike in the lower tunnel. They were well pleased with the showings and are anxious to get the compressor installed to push the tunnel at a faster rate. Mr. Dennis and Mr. Shields, who are residents of Spokane, were accompanied by their wives.

Fire Discovered in Time

A fire was noticed in the ceiling of the rear room of the Puddy Barber Shop at about 10 a.m. on Friday morning. The volunteer fire brigade answered the alarm and extinguished the blaze before it made much headway. The origin of the fire is unknown.

Midway News

R. A. Brown was at Christina Lake on Wednesday and Thursday.

Miss Marguerite Ritchie, of Greenwood, is the guest of Miss Mayneen Bush.

Thos. Rowe returned to Trail last week after a few weeks visit with Mr. and Mrs. W. E. McArthur.

Wm. Walmsley, Jr., of Greenwood, is relieving Joe Szczesnink, assistant agent at the C.P.R. depot.

Master Gordon and Pauline Roberts left last week for a month's visit with relatives in Spokane, Mrs. Roberts accompanied them as far as Marcus.

Mrs. T. A. Clark was able to leave the District Hospital at Greenwood last week and return here where she will stay with Mrs. E. Hawkes for a few weeks.

Dean Laird's Toronto and Montreal party stopped here in a special train of eleven cars on Tuesday morning en route westward. This was Dean Laird's fourth "across Canada" tour.

A Fire Hazard

Citizens are warned of the fire hazard caused by the dry grass around the town and care should be taken in disposing of lighted matches, cigarettes, etc.

Christian Valley Bubbles

J. Noren is helping J. Cochran with his hay crop.

The writer hears that Wm. Abel will seed ten acres to rolled oats this fall.

Mrs J. Cochran drove to Westbridge a few days ago, taking several cans of cream from the Valley with her.

The ranchers in the Valley are all in the midst of haying and all have a bumper crop of timothy and clover.

There has been several cars from across the Boundary line up here lately, the occupants being on a fishing trip.

F. O. Petterson has taken the contract of fencing the Christian Valley School lot and doing other repair work.

Ideal haying weather prevails in the Valley. It was 98 in the shade for a few days, followed by a shower of rain.

Frank Maleta and Henry Madge were up in the Valley and left with H. A. Tanner to attend the funeral of his brother-in-law, Fred Madge.

M. D. Schenck will finish his haying in a few days. His next big job will be to thrash his raspberry crop. He has an exceptionally fine crop of fall wheat this year.

"The yellow can with the black band"

Canada's Next Stage Of Development

There are many countries with larger populations, greater accumulations of wealth, and much more highly developed in an industrial sense than Canada, but already this Dominion has achieved fifth place among the commercial nations of the world. Since the war, and more especially during the past few years, the trade of Canada has enormously expanded,—the percentage of growth far surpassing that of any other country.

It is a pertinent question to ask: Can Canada retain for itself the proud position already attained, and is it possible for this Dominion to move steadily forward from fifth place to fourth, to third, and ultimately to the very front rank?

Judged from the standpoint of its geographical position on the world's highway between Europe and the Orient, or judged by the extent and variety of its natural resources, whether of the field, the forest, the mine, the fisheries, and water-powers, the answer can be given by an emphatic affirmative. In all these respects, Canada does not occupy a secondary position to any country on earth.

Canada practically controls the world's supply of such essential commodities as nickel and asbestos. It is now, in its infancy, the world's greatest manufacturer of newsprint and the world's greatest exporter of wheat. It has steadily increased its gold output until now it ranks as the world's third largest producer.

Notwithstanding all these advantages, can Canada ever hope to challenge the position of Great Britain and the United States as the world's greatest commercial nations, and, if so, what is essential to achieve that result?

Not only in order to attain a still higher and stronger position, but to retain what has already been won, it is necessary that Canada should take certain advance steps. Up to the present time this country has been chiefly concerned with those domestic problems and internal affairs involved in the early settlement and development of the country from a raw territory into an organized state. Attention has been devoted to matters of transportation, to the first stages in the development of natural resources, to laying the essential foundations of any country. This pioneer stage is passing. Canada has found itself, and its future now depends upon the place it can make for itself among the nations in finance, in trade and commerce.

The development of our wealth of natural resources must be the basic foundation upon which to erect our future national structure. These resources constitute the Dominion's greatest economic asset, and their development should proceed along the most approved scientific lines in order that there may be a minimum of waste. It is not sufficient that we cut down forests and sell lumber and pulpwood, or that we dig nickel, or asbestos, or gold out of the ground. We must utilize these resources to their fullest extent in the building up of Canadian industry, and, in so doing, also utilize every possible by-product that can be extracted from them.

In Great Britain, the United States, Germany, huge sums are expended annually in scientific research and elaborately equipped laboratories are provided for the prosecution of such work. Great Britain last year expended $25,000,000 and the United States $50,000,000 on research. If Canada is to hold its own, and is to go forward to greater triumphs, it must now become equipped in like manner. The expenditure of a few million dollars may easily result in discoveries and improved methods which will yield tens and even hundreds of millions to the Dominion.

Canada is an up-to-date country, but in order to retain that reputation it must follow the most up-to-date methods all along the line. It is not sufficient that goods "made in Canada" or articles "produced in Canada" be good; they must be the very best the world can offer.

Coupled with the maintenance of scientific research, the utilization to the utmost of our own natural resources, and the production of nothing but the best, the industrial and commercial interests of Canada must be alert and unite in the adoption of the most wide-awake and effective selling methods, and create the organization essential to command the confidence of the importing world that all contracts entered into can and will be filled to the letter and on the minute called for.

The proposals which the Minister of Trade and Commerce will, it is understood, submit to Parliament at its next session to provide for important expansions of the activities of the National Research Council, as well as the practical suggestions he has brought with him from England along the line of improved selling and marketing methods, should receive the most earnest consideration of the Canadian people and their whole-hearted support.

Remember Canadian Soldiers

Graves In Shorncliffe Cemetery Are Decorated Every Year

Annually for eleven years past the school children of Hythe, Folkestone and surrounding districts have made a pilgrimage to Shorncliffe cemetery nearby and have decorated the graves of the Canadian soldiers there.

An account of this year's ceremony, which took place on June 22, appears in a copy of the Hythe Reporter which a reader has been kind enought to send to the Star. A whole page in the newspaper is devoted to the report.

At the recent decoration ceremony, it appears from the Hythe Reporter, the mayors of both towns were present and delivered eulogies of the Canadian army, adjuring the children in their audience to be true to the best British traditions. They announced that they had arranged to have the decoration of the graves carried on to perpetuity.

After giving an account of their addresses, the report goes on: "Trumpeters sounded the 'Last Post' and 'Reveille.' To the solemn strains of a funeral march the children filed from their positions, and, in a seemingly endless procession, placed their floral tributes upon the graves as they filed reverently and slowly among them. The band continued playing. Appropriately enough, 'The Maple Leaf' and 'O Canada' were among the tunes rendered, and all the while the children were paying their humble homage. At the conclusion of the ceremony, when the national anthem was played, there was not a grave neglected. Each bore its wealth of flowers."—Saskatoon Star.

Sunburn.

Mix Minard's with sweet oil or cream, and apply. Quick and permanent relief.

MINARD'S "KING OF PAIN" LINIMENT

Supplying Milk For Chinese

Shanghai Company Purchases Cattle In British Columbia

Despite its political troubles and the menace of invading armies, the babies of Shanghai must have milk and British Columbia cows will supply it, as in the past.

For several years the Shanghai Dairy Company has been buying its stock in British Columbia and shipping it across the Pacific to join the big herds quartered in the pastures south of the foreign quarter. It is this company which supplies most of the dairy produce for the use of European families quartered in Shanghai.

G. T. Orchardson and Captain Grant, representatives of the Shanghai Dairy Company, are in British Columbia on another of their buying trips. They are at present in the Comox Valley purchasing dairy stock. They will buy several hundred head this year.

"Wars and revolutions are a nuisance, but there is nothing more insistent than a baby's demand for milk," said Orchardson. "We have got to meet the demand regardless of whatever else may happen."

A WEAK STOMACH

Can Be Strengthened Through the Use of Dr. Williams' Pink Pills

Wonderful is the process by which the chemistry of the body changes the food we eat into blood. And the whole of our well-being depends upon this being maintained day after day, year in and year out. Sometimes the process becomes faulty, and then food begins to poison the blood instead of feeding it. This is followed by all the pangs of indigestion, such as gas on the stomach, pains around the heart, often nausea after eating, and a dislike for all kinds of food.

The only way to overcome these troubles is to tone up the digestion so that you can assimilate all your food. To do this you have only to take Dr. Williams' Pink Pills. A short course of these pills will quickly tone up the stomach and banish indigestion. Here is a bit of convincing proof given by Mrs. Chas. Ladner, Ellerslie, P.E.I., who says: — "For some years I was a sufferer from stomach trouble. Everything I ate caused distress, sour stomach and belching. I could not eat meat or potatoes, and I grew weak and nervous. No medicine seemed to help me until I was persuaded to take Dr. Williams' Pink Pills, and these simply worked wonders. I took the pills faithfully for a couple of months by which time every symptom of the trouble disappeared, and there has not since been the slightest symptom of stomach trouble. No wonder I praise Dr. Williams' Pink Pills."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Western Canada Dairy Convention

The Western Canada Dairy Convention, which includes all dairying interests in the four Western Provinces, will be held in the Hotel Saskatchewan, Regina, from February 7th to 10th next year. This Association will be hosts to both the interprovincial gathering and the annual provincial dairy convention of Saskatchewan.

Miller's Worm Powders are a pleasant medicine for worm-infested children, and they will take it without objection. When directions are followed it will not injure the most delicate child, as there is nothing of an injurious nature in its composition. They will speedily rid a child of worms and restore the health of the little sufferers whose vitality has become impaired by the attacks of these internal pests.

Million Acres Irrigated

Irrigation is now being supplied to over a million acres of land in the west, according to the Department of the Interior, and surveys are being made of a number of additional projects whwich should bring the total up to 1¾ million acres.

Minard's Liniment for scaly scalp.

Most of us would like to get out of debt, but we really need a new car, and the radio is a bit squawky.

Babies Cry For "Castoria"

Prepared Especially for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years as a pleasant, harmless substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups. Contains no narcotics. Proven directions are on each package. Physicians everywhere recommend it.

The genuine bears signature of

Chas. H. Fletcher.

Bravery That Counts

Doctor Going To Africa To Hunt Cure For Sleeping Sickness

A really sporting expedition is that which Dr. Arthur Torrance will make next autumn to Central Africa. Most African hunters go after lions or elephants. There is much danger — to the lions and elephants. With the present type of expanding bullets which blow a hole the size of a man's head in the quarry's body, there is very little danger to the hunter.

Doctor Torrance's hunt will be for something really dangerous. He is going to study the tsetse fly, hoping to find a cure for the sleeping sickness its bite causes.

Many doctors have sacrificed their lives in the study of this plague. May the brave Doctor Torrance not be added to the roll.

Radio Entertainers Well Paid

Some Get Hundred Dollars a Minute For Good Music

Does it pay to entertain radio fans? Here are a few figures dug up by the New York dramatic weekly, "Variety":

Toscanini, the Italian composer, who will direct the New York Philharmonic Orchestra on the air, will get $1,500 for each concert.

Some hours, like the Maxwell, Eveready and Atwater Kent, are said to pay as high as $100 a minute for a quarter hour of good music. The Ipana Troubadours and Isliman Jones Orchestra will play together at Atlantic City, for half a month, for $12,000.

Each member of the Eveready Revelers gets $200 for each hour he's on the air.

Mothers Value this Oil. — Mothers who know how suddenly croup may seize their children and how necessary prompt action is in applying relief, always keep at hand a supply of Dr. Thomas' Eclectric Oil, because experience has taught them that this is an excellent preparation for the treatment of this ailment. And they are wise, for its various uses render it a valuable medicine.

Cairn Unveiled

Where First Party Of Mounted Police Entered Edmonton Over Fifty Years Ago

Unveiling of the cairn in the grounds of Fort Saskatchewan Jail, which marks the site of the original buildings erected in October, 1874, by Col. W. D. Jarvis and 20 non-commissioned officers and men of the first party of Royal North West Mounted Police to enter the Edmonton district, was made recently by Major - General Greisbach, C.B., C.M.G., D.S.O., in the presence of a large gathering of old-time members of the famous force and citizens of the town.

Nature's Gentleman

"Thank you very much indeed!" beamed the well-dressed flapper in the bus as a workingman offered her his seat. "That was very kind of you."

The other blushed happily and gave a number of other males a hardy glare as he answered:

"Not at all, miss not at all. I know some men don't give up their seats unless it happens to be a pretty girl, but looks make no odds to me."

And everybody except the young girl smiled.

Decrease In Butter Output

Saskatchewan creameries manufactured 1,661,687 pounds of butter in May. This is a considerable decrease compared with the output for the same month a year ago. The falling off is attributed to the cool weather which prevailed during the period.

Wood yields one-fourth of the heat of coal; charcoal about the same heat as coal.

For corns and bunions use Minard's Liniment.

Fraud Oil Experts

Self-Styled Oil Engineers Making Easy Money In U.S.

The United States Department of the Interior has recently issued a warning against self-styled oil engineers who have been offering their services to farmers and landowners to test the soil by a chemical or photographic process for determining whether or not oil underlies the property. The operators, who charge a fee of $25 for an "examination" are stated to be claiming that they are experts working under the supervision of the government.

Inquiry in the Department at Washington has of course brought out the fact that no such specialist has ever been connected with its staff as a geologist, nor does the Geological Survey know of any method by which the presence or absence of oil a few hundred or a few thousand feet beneath the surface can be determined by a test of the soil, chemically, photographically, or otherwise.

It may easily happen, says the Natural Resources Intelligence Service of the Department of the Interior at Ottawa, by way of warning, that these operators when they find that the game is up where they are operating, will make their way across the border into Canada and endeavor to interest farmers and others in territories adjacent to the proven oil fields of Ontario, New Brunswick, and Alberta. They are known to have been working as close to the international border as Michigan. Instances of their operations should be immediately reported, as apart from the loss of fee charged, much harm in the way of false hopes aroused and consequent speculation might easily result from taking the advice of these self-styled experts too seriously.

Paring a corn is both risky and ineffective. It is much better to use Holloway's Corn Remover and eradicate them entirely.

Italy Has World's Largest Grape Vine

Some Branches Reach Almost Seventy Feet From Trunk

What is believed to be the world's most remarkable vine grows in the province of Reggo Emilia, Italy. It has a trunk measurement of more than four feet in circumference, and its branches are supported by 20 elm trees growing near it. Some of its branches reach almost 70 feet from the trunk. This monster vine has been known to produce in a year a quantity of grapes equal to the average production of a small vineyard. It is known to be at least 100 years old, and some believe it to be much older than that.

Our deepest sympathy is with the man of few words who is married to a woman who does a continuous monologue stunt.

Clean to handle. Sold by all Druggists, Grocers and General Stores

Grain Exchange Radio Station

Built At Yorkton For Distribution Of Market Prices

Radio Station "C.J.G.X." which is being built at Yorkton, Sask., by the Winnipeg Grain Exchange, for distribution of market prices and reports, is now nearing completion. The station building and steel towers have been finished and a studio furnished in the Collacott Block. Engineers of the Canadian Marconi Company are now at Yorkton installing the broadcasting equipment and it is expected that the station will be in operation some time during the second week of August.

With the establishment of this broadcasting station, the Winnipeg Grain Exchange will inaugurate a service of disseminating market prices and information direct to the farmers, in a more efficient way than has heretofore been done in the West. It is understood that in addition to the closing market prices of the day, the opening of the market and mid-session prices will be broadcast as well. The station will also provide musical programmes and other classes of entertainment at regular times on week nights, details of which will be announced later.

Asthma Can be Cured. Its suffering is as needless as it is terrible to endure. After its many years of relief of the most stubborn cases no sufferer can doubt the perfect effectiveness of Dr. J. D. Kellogg's Asthma Remedy. Comfort of body and peace of mind return with its use and nights of sound sleep come back for good. Ask your druggist; he can supply you.

Real glory springs from the silent conquest of ourselves; and without that, the conqueror is naught but the veriest slave.

Complete in itself, Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

No pleasure is comparable to the standing up on the vantage ground of truth.

Men's wives, like their sins, are sure to find them out.

Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

The Future Of Canada

No Hopeless Poverty For Any Who Are Willing To Work

What of the future? It is a very conservative estimate that when the hundredth anniversary of Confederation is celebrated in 1967 there will be twenty million people in Canada, with a great increase in our already remarkable volume of agricultural, mining and manufacturing production, and in commerce. There is no evidence that Canadians in their eagerness for material development are inclined to neglect the development of human resources, the most important of all. More than a hundred million dollars a year are spent on education, and money can be spent in no wiser way. Attention should be paid to the quality as well as to the numbers of our people. By this is meant not only care in choosing immigrants, but care as to their welfare when they are established among us.

There are food and other natural resources enough for all if justly distributed. There need be no hopeless poverty for any who are willing to work. No faculty of mind or spirit need be starved; no genius or talent lost to the nation through lack of a nourishing soil. "Youth no longer stunted and starved; age no longer harried by avarice; the child at play with the tiger; the man with the muck-rake drinking in the glory of the stars. Foul things fled, fierce things tame; discord turned to harmony." A Utopian picture it may be said. But why should Canadians aim at any destiny lower than the highest? Why should they not carry the pioneering impulse into things of the spirit and the mind? Why should they not in promoting the welfare of the people display the same daring and initiative as in exploring the vast area of their land and spanning it with railways?—Ottawa Citizen.

Most men are better acquainted with faith and hope than they are with charity.

Fully one-third of India's great population is totally illiterate, 150 dialects being spoken.

RESTORED TO GOOD HEALTH

Mother of Eleven Children Praises Lydia E. Pinkham's Vegetable Compound

Her Interesting Experience

Buckingham, Quebec.—"I am the mother of eleven living children, and my baby is five months old. I am only 38 years old and I have taken Lydia E. Pinkham's Vegetable Compound for weakness and my nerves. I knew of it from my sister, Dame Edouard Bellefeuille of Ramsayville. For five years I was in misery and was always ready to cry. Now I am so happy to have good health. My daughter, who is 18 years old, has also taken it and will be happy to recommend it to all young girls."—Dame WILLIAM PARENT, Box 414, Buckingham, Quebec.

Why suffer for years with backache, nervousness and other ailments common to women from early life to middle age, when Lydia E. Pinkham's Vegetable Compound will give you relief?

In a recent country-wide canvass of purchasers of Lydia E. Pinkham's Vegetable Compound, over 250,000 replies were received, and 98 out of every 100 reported they were benefited by its use. C

W. N. U. 1692

Prince Keeps Record Of All Engagements

Diary Consulted By Secretary Before Making Any Arrangements

The Prince's regular diary is the book in which he enters up daily his future engagements. He does this in the briefest way. For example, when he had fixed up his Canadian visit he simply wrote against a date in July the word "Canada" and drew a blue pencil line down the left margin of each page to October 1, when he expected to be back in England. The blue pencil simply indicates that he cannot enter into any engagement at home during the period marked by it.

All the details of his Canadian tour are set out in the journal kept by Sir Godfrey Thomas, the Prince's private secretary, the arrangements for which the Prince has left entirely in his hands.

Some dates in the Prince's diary are marked with the word "uncertain." This means that he has some kind of future engagement public or private, in his mind which he has not definitely decided to enter into.

Other dates in the diary here and there are marked simply with the word "engaged." This usually means that the Prince wants to be able to do exactly as he pleases on these particular date, and probably one in his household learns what he intends to do then until the time arrives.

Very probably the Prince does not know himself. He simply likes to do able occasionally to spend a few days as he pleases without any pre-arranged plans being made for him.

Every day his diary is seen by Sir Godfrey Thomas, who is responsible for making all arrangements in connection with the Prince's official and social engagements. When Sir Godfrey sees a date marked "Engaged" or "Uncertain" he knows that he cannot enter into any engagement for the Prince on those dates.

Suspicious People Are Usually Miserable

Those Who Distrust Fellow-Creatures Are Never Happy

The advice is often given to young people, as by a police chief the other day. "Trust no one!" But such advice must not be taken too literally. A man or woman who trusted no one would have an utterly miserable life. All their energy would be taken up by suspicious watching of their fellow-creatures. They would certainly become morbid, they would probably go mad. And the very fact that they expected the worst would make many people inclined to take advantage of them, who would otherwise have been true and just in all their dealings. Far better to be deceived now and then by trusting too much than to go through the world lonely and furtive and unloved, trusting no one.

There's a Difference

When motorists who are addicted to speed are remonstrated with they usually retaliate by denouncing the jay-walker. But the difference between the jay-walker and the speed maniac is that whereas the former endangers but himself, the latter is a peril to many. His passengers, pedestrians, little children—he menaces them all.

"I'm happy and all that, of course, old chap; still, I wish my wife would'nt talk so much about her last husband."

"Forget it, old man—mine's always talking about her next."

More copper has been produced in the last 20 years than in 7,000 years previously.

Fools sometimes rush in and win while wise men are investigating.

New Form Of Motoring

British Invention Just Tested Allows Car To Coast

The motoring correspondent of The London Daily Mail gives the result of a practical test of a British invention that promises to provide a new and fascinating form of motoring.

It is called the Humfrey Sandberg free-wheel clutch, and if developments prove satisfactory it should do for the motor-car what the free wheel did for the bicycle.

Motor gliding is probably the best term for describing this new development. It has been fitted experimentally to several private cars and lorries with satisfactory results, and it now remains to be seen whether it can be produced on a commercial basis.

Briefly the free-wheel clutch operates as follows:

While the engine is pulling the car it acts in a normal manner, but as soon as the engine speed is reduced to the point when the car is pushing against the engine the free wheel operates and the car automatically "coasts."

With an ordinary clutch the engine in similar circumstances acts as a powerful brake.

If you take your foot off the accelerator of an ordinary car it quickly slows down, owing to the braking effects of the engine compression. But with the new device, when you throttle down the engine slows but the car continues under its own momentum.

There are times when it is necessary to use the engine as a brake, and for this purpose a control is fitted which enables the driver to do so.

The car I tried, fitted with a free-wheel clutch of this description, was an ordinarily small family touring model. A point that impressed me was the very long distance it is possible to "coast" even at speeds of 20 miles an hour and under. Driving was a series of glides.

Motoring Unsafe In Persia

Roads Are Different and Traffic Worst in World

There are still a few adventurous occupations left in the world for those who care to seek them.

Carrying the Persian mail is one, for Persia has few railways and only one or two open ports. Teheran, the capital, is 500 miles from the Iraq frontier, and once a week the consular mail leaves Bagdad for Khaniquin on the Iraq-Persian border, and is there transferred to motor transport. In three days with luck it will reach Teheran.

Nowadays the Persian roads are "safe." That is, they are normally free from brigands, for Reza Shah has instituted several reforms in connection with the surveillance and improvement of communications. But safety has a restricted meaning when applied to motoring in Persia, for a Persian road is different from all others.

Here and there it is bare earth level by the passage of countless caravans on the Golden Road; here it is roughly fortified by metal thrown down for future caravans to flatten; and there it is a mountain track sloping dizzily to alarming precipices. And the traffic on the Teheran route must be the worst in the world.

Long strings of camels amble along at two miles an hour, and when alarmed by the hoot of a motor-horn struggle with incredible clumsiness to the wrong side, and then, still more clumsily, back again. Processions of carts fill the whole road, carts drawn by two horses and large covered wagons drawn by four horsss abreast, with an extra pair led behind to assist in uphill work.

The Greatest Investment

World Buys On Information Obtained From Newspaper Advertising

Investments in newspaper advertising last year amounted to $235,000,000. That was a gain of $15,000,000 over the previous year. Big figures, those. But remember that the world buys on information. It travels because it knows when and where and how—through advertisements. It builds because it knows how—through advertisements. It dresses through thoughts suggested by advertisements. And so on through the activties of life. Think of what the world would be without newspapers. Think of what the newspapers would be without advertisements. Great is advertising, and the greatest of all advertising is newspaper advertising. —The Fourth Estate (New York).

Canada's Fish Culture Service

During 1926 the Department of Marine and Fisheries, Canada, through the Fish Culture Service, operated 39 hatcheries, 4 salmon-retaining ponds, and several smaller stations, and distributed over 724,246,000 eggs and fish in different stages of development.

"Swat the fly" with GILLETT'S LYE

A teaspoonful of Gillett's Lye sprinkled in the Garbage Can prevents flies breeding

Use Gillett's Lye for all Cleaning and Disinfecting

Costs little but always effective

Canada's Student Body

Eighty-three Colleges In Operation In Dominion Last Year

Canada had eighty-three colleges in operation last year. Of this total, there were 42 affiliated institutions, including 31 classical colleges, little seminaries and independent non-subsidized classical schools in Quebec, 30 theological, 1 agricultural, 2 law, 1 military, 1 technical, 1 commercial, 1 pharmacy and 1 veterinary.

The total registration of these colleges was approximately 7,752, in addition to 3,039 included with secondary technical institutions. This registration, according to the Dominion Bureau of Statistics, composed about 5,600 doing work of university standard, 6,200 work preparatory to matriculation, and the remainder taking vacation courses, extension courses, evening courses and the like.

Of the students of university standard, by far the largest group were in arts, with a total of 3,053. Theology, philosophy, medical and missionary courses and related subjects ranked second with 1,154. Agriculture was third with 450, and law fourth with a total of 404. Pharmacy had 144 students, commerce 112, veterinary science 66 and engineering 39. Practically all the students of university grade were full time students.

Will Be Great Advantage

Steam Cooled Auto Engines Possible In Few Years

We'll have steam-cooled engines in our automobiles within a few years, is the prediction of Prof. Edward P. Culver, of the Princeton School of Engineering.

There will be no change in the engine, except the transfer of the hose, that enters the present radiator at the top, to the bottom, and the conversion of the radiator from a cooler into a steam condenser.

The greatest advantage of steam-cooling, says Prof. Culver, is it maintains the engine at a constant and most efficient running temperature, no matter what the temperature is outside.

Good Business

Some people make chicken breeding pay; others find it a losing venture. But scarcely any one of whom we have heard ever did so well with them as the boy, Dawkins by name. Someone asked his father whether chickens reaaly paid. "They pay my son," said the old man. "I bought him the chickens; I supply the feed; I buy the eggs from him, and he eats them."

We cannot hear a sound if it has less than about thirty or more than 40,000 vibrations a second.

ECZEMA LASTED TEN YEARS

On Knees, Would Itch and Burn. Cuticura Heals.

"From the time I was a small child I was troubled with eczema on my knees. It broke out in a rash and would itch and burn so that I would scratch it and cause eruptions. My stockings aggravated the breaking out, and I lost my rest at night on account of the irritation. Later it broke out on my arms. The trouble lasted about ten years.

"A friend recommended Cuticura Soap and Ointment so I purchased some, and after using one box of Cuticura Ointment and two cakes of Cuticura Soap I was completely healed." (Signed) Miss Kathleen O'Connell, Port Dufferin, N. S.

Rely on Cuticura Soap and Ointment to keep your skin clear.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c. Cuticura Shaving Stick 25c.

History Of Aviation

The Evolution Of Flying From Its First Inception

The first to fly:

—in a dirigible balloon was Henry Cliffard in 1852. It had a three-horse power steam engine.

—in an aeroplane driven by an engine was Orville Wright, on Dec. 17, 1903. He used a 16-horse-power engine.

—ten miles in an aeroplane in Europe was Delagrange on June 22, 1908, at Milan.

—an hour in an aeroplane was Orville Wright, on Sept. 9, 1906.

—over 1,000 feet high was Orville Wright, on Oct. 3, 1909, at Berlin.

—across the English Channel was Bleriot in a monoplane on July 26, 1909.

—across America from the Pacific to the Atlantic, over 4,300 miles, was Rodgers, 1911.

—across the Atlantic in a seaplane was Commander Read, R.S.N., in 1918.

—direct from Newfoundland to the British Isles in an aeroplane were Alcock and Brown, in 1919.

—an airship across the Atlantic were General Maitland and Commander Scott, in the British R-34.

—direct from the United States to Europe in a monoplane was Colonel Lindbergh in 1927.

Enthusiastic Over Farming In the West

Representative of Norwegian Government Favorably Impressed With Conditions

Capt. K. S. Irgens, of Oslo, Norway, who made a tour of Western Canada along the lines of the Canadian National Railways as the representative of the Norwegian government, for the purpose of determining the advantages of this country for Norwegian farmers, has returned to the East to pursue his investigations. The captain expressed himself enthusiastically regarding the prosperous and progressive conditions he found wherever he went, and took away with him favorable impressions of the West generally. He is likely to desert the sea for a farm somewhere in one of the Western provinces. He met many of his countrymen during his trip, and everywhere found them doing well and very contented with the land of their adoption.

SAVE THE CHILDREN

In Summer When Childhood Ailments Are Most Dangerous

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, cholera infantum and diarrhoea carry off thousands of little ones every summer, in most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets relieve these troubles, or if given occasionally to the well child they will prevent their coming on. The Tablets are guaranteed by a government analyst to be absolutely harmless even to the new-born babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Reindeer Ranch

Raising reindeer for commercial purposes in Canada will be undertaken this year by the Dominion Reindeer Co., with headquarters at Vancouver; the company having imported some 5,000 head of reindeer from Alaska. This herd will be located on the vast grazing areas between the Athabaska and Great Slave Lakes on three million acres secured for that purpose.

Minard's Liniment for burns.

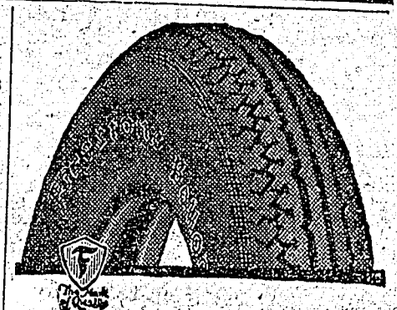
For Restless Babies

Warm weather is a trial to both mother and babe and the task of keeping the little one in perfect health is often very difficult. Probably the matter of proper food for the infant is of greatest concern to the average mother.

If you cannot nurse baby and it does not gain upon the breast milk give him Borden's Eagle Brand Milk—the food that has successfully reared hundreds of thousands of babies. Easy to prepare—just add boiled water as directed.

In this paper from time to time you will find an advertisement of Borden's Eagle Brand Milk, a food that has raised more healthy babies than all the prepared infant foods combined. Cut out the advertisement and mail it to The Borden Company Limited, Montreal, and they will send you, free of charge, instructions for feeding your baby, and a Baby Welfare Book and Baby Record Book. Or, just write the Company mentioning this paper and they will be sent.

Minard's Liniment for cuts and bruises.



Things Worth Knowing About Firestone Gum-Dipped Tires

Firestone pioneered, developed, tested and placed on the market the Balloon Gum-Dipped Tire—the genuine FULL-SIZED Balloon Tire.

With but half the usual air pressure, these tires are very soft and yielding. They absorb the holes, ruts and bumps in the road. They cushion the car and and passengers from shocks and vibration.

Firestone Gum-Dipping—by which each fibre and strand of cord in the tire is impregnated and coated with pure gum—adds the extraordinary strength and flexibility which makes the Balloon construction practical.

Firestone Dealers are kept up-to-date on tire development and service—continually progressing and improving their ability to serve you better and save your money. See the nearest Firestone Dealer and let him handle your requirements.

Little Helps For This Week

Teach me to do Thy will, for Thou art my God.—Ps. cxliii. 10.

Small service is true service while it lasts,
Of friends, however humble, spurn not one,
The daisy, by the shadow that it casts,
Protects the lingering dew-drop from the sun.
—William Wordsworth.

We can all be servants of God wherever our lot is cast; but He gives us different sorts of work, according as He fits us for it and calls us to it. —George Eliot.

Service is our destiny in life or in death. Then let it be my choice. Living to serve the living, and be fretted uncomplainingly. If I can assure myself of doing service, I have my home within.—George Meredith.

Produced In Every Province

Alfalfa can be grown over the widest range of climatic conditions of any legume yet grown in Canada. It is now being produced in every province from the Atlantic to the Pacific.

It Testifies for Itself.—Dr. Thomas' Eclectric Oil needs no testimonial of its powers other than itself. Whoever tries it for coughs or colds, for cuts or contusions, for sprains or burns, for pains in the limbs or body, well know that the medicine proves itself and needs no guarantee. This shows why this Oil is in general use.

Millions From Cowdray Estate

Eight million dollars will go to the Exchequer as death duty on the $20,000,000 estate of Viscount Cowdray, who died in London, May first.

Uncle to Niece—"Are you enjoying the winter sports, my dear?"

Niece—"Rather; I'm engaged to three of them—already."

DYSENTERY WAS SO BAD BECAME ALARMED

Mrs. Wallace Pepper, R.R. No. 6, Simcoe, Ont., writes:—"Last summer I was very bad with dysentery. I lost my appetite, and had such severe pains in my abdomen they made me very faint. I passed blood which greatly alarmed me, so I hurried to the doctor. He told me the quickest way to get rid of it would be to take

"I took only part of a bottle and was completely relieved. I feel I cannot recommend it too highly."

This wonderful bowel complaint remedy has been on the market for the past 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Our First Birthday

With this issue The Greenwood Ledge celebrates its first birthday and the editor would like to take this opportunity of thanking all our patrons for their kindly support and hopes they will continue to help make the paper the success it has been. With the new Linotye installed recently and with our daily increasing knowledge of same we have every belief to feel that we can serve our customers well in every way.

Sheep Protection Act

Several warnings have been given by the B.C. Provincial Police through the medium of The Greenwood Ledge to those persons who keep or have in their possession unlicensed dogs. Any person failing to take out a license forthwith will be prosecuted.

Game Board Head To Tour Province

To study game problems in many parts of the province, members of the Game Conservation Board under Chairman M. B. Jackson, K.C., will start on a comprehensive tour of the province this week. They will visit Prince Rupert and many points along the Canadian National Railways, turning south at Prince George to hold meetings in Cariboo towns. From there they will go south to Kelowna to hear Okanagan sportsmen.

"The purpose of the tour is to give the board direct contact with sportsmen, trappers and others," Mr. Jackson explained. "In the north we are particularly anxious to see how our new system of registering trap lines is working out. We are also interested in the virtual disappearance of grouse in many parts of the north."

Members of the Greenwood District Rod and Gun Club hope that the board will visit this district.

File Turnover Tax by Tenth

Victoria.—The last day for filing returns under the new turnover, or gross income tax, is August 10th.

The Finance Minister says that, this being a new tax, every consideration will be given to taxpayers, especially those who suffer physical or other disability. Dr. MacLean hopes all will file by then. He says, in a statement issued at Parliament Buildings, that the public response has been very gratifying, and that the tax is regarded more favorably than the personal property tax it replaces.

"As the department realizes," said the minister, that some uncertainty and misunderstanding is bound to crop up in respect of the first returns under a new tax of this kind, due allowance will be made for this, and strict enforcement of the penalty clauses will be postponed for a few days, but under no circumstances can this be extended beyond August 10th. It is hoped that any who may have overlooked the filing of their returns will avail themselves of this opportunity."

Heat Wave Increases Fire Hazard in Province

Victoria.—While outbreaks so far have done no serious damage, officials of the forestry service watched the forest fire situation with concern as the week ended with eighty-eight new fires reported.

"The present fire situation is not serious as far as fires themselves are concerned," said P. Z. Caverhill, chief forester, "but weather conditions are serious in the extreme and anything may happen if the present heat continues. Whether a bad fire situation like that of last year will develop or not will depend upon weather during the next few weeks."

A fortnight of drought and heat has dried the woods to a marked degree and from now on travellers and others in the forest can not use too much caution with fire."

The Pole Drive

On Friday, July 29th, W. C. Wilson accompanied by the editor and J. Holmes motored to Canyon City. At that point was situated the camp of W. E. McArthur's pole drive. The party left the auto in camp and proceeded through the woods to the river in order to get some first hand information regarding a business venture which if successful will mean a great deal to this District.

There has been log drives and tie drives but the driving of long cedar poles is a new industry around here.

When you consider the distance from Christian Valley to Midway (50 miles) through log jams, over riffles, through canyons, etc., it is no task for the faint hearted. The veteran logger E. L. Steves is in charge and is supported by a first class crew of river drivers so there is every reason to believe they will bring this venture to a successful termination.

Picnic at Loon Lake

On the 31st ulto at Loon Lake near Eholt was held the Annual Scandinavian Picnic. This was well attended as cars from all over the Boundary were in evidence Refreshments were served at noon after which several performers on the accordian, banjo and saxophone dispensed sweet strains of music. An affair of this kind where people meet at least once a year to discuss old times and old friends is a wonderful institution in the promotion of a friendly feeling in the community.

Runs Over a Blue Grouse

On Monday while motoring at the north end of town W. C. Wilson noticed a blue grouse in the middle of the road. He did not slow down expecting the bird to fly. Instead the car went right over it with disastrous results to the said blue grouse. This is no new circumstance as each year at this time they will sit on the road and allow themselves to be run over while a month later a hundred yards is about as close as they care to come in contact with a human being.

A Popular Summer Resort

The season at Christina Lake is in full swing. On Saturday last there was a dance at each of the two pavilions. Pearson's orchestra played at Biner's while Werner's orchestra played at Butterfield's. The Lake is a very cool place to dance so the public is availing itself of the opportunity, many people coming from the American side as well as from long distances in Canada.

Custer's Historic Last Stand Filmed

A reproduction of Custer's Last Stand is one of the many thrilling features that makes "The Scarlet West," a First National picture coming to the Greenwood Theatre on Saturday, August 6th, one of the outstanding film productions of the year.

This episode in American history has no dramatic counterpart, and the producer, Frank J. Carroll, has reproduced it with a fidelity that only six months of research could insure. The camera has visualized this memorable event with such graphic vividness that it is a sight never to be forgotten.

Time to Begin

Jones was suffering from digestive trouble and the doctor told him that if he laughed fifteen minutes before each meal his condition would improve.

One day in a city restaurant Jones was having his little laugh when a man from the opposite table walked over to him.

"What the dickens are you laughing at, sir?" he enquired angrily.

"I'm laughing for my liver," declared Jones.

"H'm!" said the stranger. "I'd better start, too, because I ordered mine twenty minutes ago."

Job Printing

The Greenwood Ledge

Mr. and Mrs. John L. Coles left this morning, for Ontario on a visit to relatives at Hamilton, Woodstock and Brantford. Five brothers of Mr. Coles reside in the places mentioned; a sister is coming out from the old country on a visit and a happy time is looked for at the reunion they have planned.—Princeton Star.

LAND REGISTRY ACT

(Section 160)

IN THE MATTER of Lot 3342 Group 1, Osoyoos Division Yale District.

PROOF having been filed in my Office of the loss of Certificate of Title No. 1969D to the above-mentioned land in the name of Nancy Jane Gillespie and bearing date the 21st, July, 1913, I HEREBY GIVE NOTICE of my intention at the expiration of one calendar month from the first publication hereof to issue to the said Nancy Jane Gillespie a provisional certificate of title in lieu of such lost certificate. Any person having any information with reference to such lost certificate of title is requested to communicate with the undersigned.

DATED at the Land Registry Office, Kamloops, B.C., this 19th day of July, 1927.

E. S. STOKES,
Registrar.

Date of first publication, Thursday, July 28th, 1927.

NOTICE

UNDER and by virtue of the powers contained in a certain chattel mortgage which will be produced at the time of sale, I hereby call for tenders for the purchase of the following property situate on Lot 2527, Group 1, Similkameen Division of Yale District, known as the "Rock Creek" Mineral Claim, namely:—

The whole of the Portable Saw-mill, machinery and outfit now standing or being or lately standing or being on said Lot 2527, and all other the goods and chattels of whatsoever kind and nature which are the property of Joseph Peter Keane, now in, upon, or around and about the premises above described.

Terms:—10% of the purchase money to be paid down at time of sale, balance to be arranged by monthly instalments.

For further particulars and conditions of sale apply to

MORRIS C. JEWELL,
Bailiff.

Dated at Rock Creek, B.C., the 13th day of July, A.D., 1927.

MINERAL ACT

Certificate of Improvements.

NOTICE

ACME MINERAL CLAIM

Situate in the Greenwood Mining Division of Yale District.
Where located: Near Bridesville.

TAKE NOTICE that I, C. A E. Shaw, agent for Joseph Pringle, Free Miner's Certificate No. 335D, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action, under section 85, must be commenced before the issuance of such Certificate of Improvements.

Dated this 4th day of June, 1927.

CROWN COLONY DAYS

Away back in the late sixties thousands of acres of British Columbia's timber were sold for one cent per acre, which looked like a fair price—then. To-day similar timber is worth from $150 to $200 an acre, so tremendously has timber appreciated in value within the scope of an average lifetime.

What the young growth of to-day will be worth sixty years from now is beyond computation if it is protected from fire and allowed to reach maturity.

The moral is obvious

BRITISH COLUMBIA

The Mineral Province of Western Canada

TO THE END OF DECEMBER, 1926

Has produced Minerals as follows: Placer Gold, $78,018,548; Lode Gold, $126,972,318; Silver, $80,787,003; Lead, $106,976,442; Copper, $209,967,068; Zinc, $50,512,557; Coal and Coke, $284,699,133; Structural Materials and Miscellaneous Minerals, $50,175,407; making its mineral production to the end of 1926 show an

Aggregate Value of $988,108,470

Production for the year ending December, 1926, $67,188,8

The Mining Laws of this Province are more liberal and the fees lower than those of any other Province in the Dominion, or any colony in the British Empire.

Mineral locations are granted to discoverers for nominal fees.

Absolute Titles are obtained by developing such properties, the security of which is guaranteed by Crown grants.

Full information, together with Mining Reports and Maps, may be obtained gratis by addressing

THE HON. THE MINISTER OF MINES,
VICTORIA, British Columbia.

N. B.—Practically all British Columbia Mineral Properties upon which development work has been done are described in some one of the Annual Reports of the Minister of Mines. Those considering mining investments should refer to such reports. They are available without charge on application to the Department of Mines, Victoria, B. C. Reports of the Geological Survey of Canada, Winch Building, Vancouver, are recommended as valuable sources of information.

Reports covering each of the Six Mineral Survey Districts are published separately, and are available on application.
