Re Rock Creek Hotel

I wish to take this opportunity to let the general public know that I intend to take over the management of my hotel at Rock Creek this November, and will appreciate a renewal of former patronage.

Dated at Greenwood, B. C, Thursday, Aug. 12, 1926.

MRS. ALICE BJORKMAN.

"Don't try to get fresh," said the cheese to the sour milk.—Missouri Outlaw.

The Height of Embarrasment: Two eyes meeting through a keyhole.—Virginia Reel.

Of Local Interest

Miss Ethel Fraser, of Penticton, is the guest of Miss Sylvia Price.

Mr. and Mrs. T. E. Alty and family, of Trail, are visiting in town.

Mrs. A. Sater returned Friday from a pleasant holiday spent at Nelson.

Harry Bryan is back at work after a few days holiday at Kelowna.

The heavy rains of the first-of-the-week have put out most of the fires in this district.

B. P. Hardcastle, of Kettle Valley, spent a couple of days in town this week.

Matins and Holy Communion, St. Jude's Church, Sunday, Aug. 22nd at 11 o'clock.

Staff-Sergeant J. A. Fraser, of Penticton, is spending a few days in the district this week.

W. Ferrier, of the Ryan Fruit Co., Spokane, is spending his vacation in Greenwood.

Mrs. H. Hartley came back to town on Sunday having spent ten days visiting at the coast.

J. B. Desrosier has rented his store at Osoyoos to Mr. and Mrs. R. C. Hunter of Bridesville.

Miss Vera Kempston has returned to Bridesville from attending Summer School in Victoria.

Mrs. A. J. Morrison and three children and N. E. Morrison have returned from a visit to Spokane.

Attention is drawn to adv. on page four announcing Mr. Grote Stirling's meetings in this district.

Mayor T. A. Love, of Grand Forks, was a caller at The Greenwood Ledge office this afternoon.

Miss Ruth Axam, who has been attending Summer School in Victoria, arrived back in town on Friday.

Miss Lilly Pickthall left for Trail on Sunday after a pleasant holiday with Mr. and Mrs. G. S. Walters.

W. Watkins, of Nelson, is in charge at the local C. P. R. depot while W. Walmsley is on his vacation.

Mrs. Ted Clarke and Miss E. A. Olson returned on Saturday from an enjoyable motor trip to Spokane and other cities.

Mrs. A. Francis and two children, Donald and Marjorie, returned this afternoon from a six weeks holiday in Vancouver.

Mr. and Mrs. James Skilton and two youngest children, left by motor on Sunday morning to spend several weeks in Vancouver.

L. Portmann, who has been ill at the Greenwood and Distrcit Hospital, was able to return to his home today, greatly improved.

Mrs. R. Blundell entertained seven of her friends at dinner on the evening of the 8th inst., the occasion being the birthday of her daughter, Flossie.

Mrs. R. B. Stickney and daughter, Margaret, of Spokane, will spend several weeks in town, having rented the Gulley cottage on Government street.

Mr. and Mrs. G. S. Walters and Miss Lilly Pickthall returned on Saturday from a visit to Kelowna. They report having a wonderful time at the Regatta.

Miss Mabel Johnson who recently underwent an operation for appendicitis was able to leave the Greenwood and District Hospital on Thursday last.

Mr. and Mrs. W. Moll and two sons, Leonard and Billy, and Miss Lizzie McDonald are camping and picking cantaloupes at Osoyoos. They were motored over by W. C. Wilson on Wednesday.

F. J. Marriage, who has been in charge of the Rock Creek school for the past year has received the appointment of musical instructor in the Kelowna public school for the coming term.

Beer Parlor Plebiscite Vote Saturday, Aug. 21st

Geo. H. Gray, returning officer, has everything ready for holding the vote under the Liquor Control Plebiscite Act, in the Grand Forks - Greenwood riding on Saturday, Aug. 21st.

The question to be answered is: "Do you approve of the sale of beer by the glass in licensed premises without a bar under Government control and regulation?"

The poll will be opened at eight o'clock in the forenoon and closed at seven o'clock in the afternoon.

It should be noted that all those whose names are on the provincial list are entitled to vote, but no others. There will be the absentee ballott for voting within the constituency but at a poll other than the one at which the voter is registered.

The local vote will be held in the Greenwood Theatre.

Miss Cleo Toney, who recently underwent an operation for appendicitis, is progressing favorably at the Greenwood and District Hospital.

O. Lofstad returned to town on Saturday from a two months rest at the Government hot springs near Nakusp. Olie says he was completely cured of his rheumatism during his sojourn there.

Miss Helen Barton, formerly school teacher at Ingram Mountain, is spending a few days with Miss Vera Kempston at Bridesville, en route to Clinton where she has accepted a position as teacher.

Rev. Andrew Walker was very sorry that he was unable to fullfill his engagements at Westbridge on Saturday evening and Beaverdell on Sunday morning, owing to his car stalling on the Christian Valley road on Saturday.

Mr. and Mrs. J. H. Goodeve have as their guests, Mrs. W. L. Toney and Mrs. R. V. Toney, of Haines, Ore., Mrs. C. Keene, of Boise, Idaho, Mrs. J. S. Storer of Princeton, and Mrs. J. C. Smith and son, Irvine, of Beaverdell.

Mrs. K. M. Spence and children left on Sunday for Trail where Mr. Spence is in the employ of the B. C. Telephone Co., having been transferred from here the week previous. The Spence family will be greatly missed by all.

D. Lindberg, mining engineer, an operator at Camp McKinney 30 years ago, and A. Cousens who kept a general store, visited Camp McKinney and the oldtimers in the neighborhood this week. They also took in Wallace Mountain where they have interests.

Miss L. E. Bawtinheimer returned to town Wednesday evening accompanied by her brother, W. C. Bawtinheimer and Mrs. John Fowler, R. N., of Armstrong. Mrs. Fowler is visiting in town for a few days, while Mr. Bawtinheimer returned home on this morning's train.

F. F. Smith of Kamloops, inspector for the Great West Life Assurance Co., of Winnipeg, spent a few days in town this week, and in company with Chas. King, the local agent, visited different parts of the district. Mr. Smith left for Rossland this morning accompanied by Mrs. Smith.

Dick Pasco, who had his left eye injured while in the employ of the Government Forestry Service last week, is under the care of Dr. R. B. Boucher at the Vancouver General Hospital. Frank Maletta who accompanied Mr. Pasco to the coast returned on Saturday.

Beverley Powell and Dr. R. R. Kerkow drove to Beaverdell, Sunday returning by way of Greenwood. They were posting bills and spreading publicity for the Oroville Fall Fair and the annual smoker. They report that our Canadian neighbors are deeply interested in the fair, and that a large number expect to be here.—Oroville Gazette.

Protesting Blue and Willow Grouse Regulations

A strong protest against the recently published game regulations as affecting the blue and willow grouse in this district is being initiated by the Greenwood and District Rod and Gun Club; and is receiving the unanimous support of all who are desirous of having a little shooting during the fall. The regulations prohibiting the shooting of willow grouse in this district are absolutely contrary to the recommendations of the Rod & Gun Club and of the local game warden, and the date for the opening season for blue grouse was recommended to be two weeks earlier than the one set by the Board. There are practically no other variety of game birds in this district and it is inconceivable that sportsmen should be deprived of the privilege of getting willow grouse, when by consensus of opinion, they are more plentiful in the Greenwood District this year than ever before. Blue grouse are reported full grown even now and in big coveys on the benches and in the grain fields, but by Oct. 1st they will be back on the high points and feeding on pine and tamarac needles and it is safe to say that not five per cent of the sporting public will be tempted to go after them.

The Rod and Gun Club succeeded last year in having an amendment made to the regulation prohibiting shooting of willow grouse, resulting in an open season from Oct. 1st to 15th.

A determined effort will be made to have another amendment made this year to the existing orders and Sept. 15th to Oct. 15th is the season suggested for both willow and blue grouse. Anyone feeling like joining in this protest should write their opinion direct to M. B. Jackson, chairman of the Game Conservation Board, with a copy to D. McPherson, Grand Forks, the local M.L.A., and Supt. J. H. Mullin.

Hospital Dance Friday, Aug. 27th

Great interest is being shown in the forthcoming Hospital Dance on Friday, Aug. 27th. Reports from outside points indicate there will be many visitors at the Masonic Hall and Bush's orchestra can be depended on to provide the latest and best music. Supper arrangements are in the hands of Mrs. G. S. Walters and Mrs. Geo. Clerf and they are receiving splendid support from the ladies of the town district allotted for this affair. By means of these monthly dances a get-together spirit is being more and more evinced and the need for continued help and interest in the hospital work is kept before the supporting public.

Word has been received from the western district that a shower will shortly be held for the benefit of the hospital and this together with one to be promoted by the Greenwood Ladies Auxiliary will undoubtedly result in a splendid replenishment of the daily necessaries of the hospital. Empty fruit jars are available at the hospital and the staff will gladly supply information as to the goods most urgently needed.

Everybody keep in mind the date of the Dance and if unable to attend, a dollar forwarded by some friend or direct to any member of the auxiliary or to the hospital secretary will be greatly appreciated and show that suitable recognition is being made of the support deserved by this new institution.

Edgett Drops Out In Yale Riding

F. B. Cossitt, of Vernon, the Liberal candidate for Yale, was in town last night. Mr. Cossitt stated that he had received word from his headquarters that Col. C. E. Edgett, the Independent candidate, has withdrawn from the field.

Notice of meetings in the interest of the Liberal candidate will be announced very shortly.

How Do Your Children Grow?

Only a few more days remain of the summer holiday season, and soon boys and girls all over the land will be trooping back to school. Johnny, who was in the fourth grade last year, has passed into the fifth, while Bessie has moved from the eighth grade into high school. They are looking forward to meeting their new teachers and becoming acquainted with new school mates. Their advancement from grade to grade are milestones along the way indicating one form of growth.

In our modern school system both Johnny and Bessie were examined last term by the school nurse and their height and weight recorded to ascertain if they were normally developed for their ages or underweight. From time to time their weights were checked to determine if they were making gains or losses. Johnny gained nearly five pounds during the last term, but Bessie did not do quite so well. The same system of checking up their physical condition will be continued this term. Thus is growth in another way revealed and recorded.

From year to year teachers and parents can follow the growth of the children under their care in these two respects. Examination papers, marks received, application displayed in studies, passing from grade to grade, into high school and college, tell the story of mental growth, increase in knowledge, and development of those powers of thought and concentration which mark the advancement of our modern civilization. Measurement charts and weight tables, increased application in study, more vigorous enjoyment of sports and all forms of outdoor recreation, in like manner reveal physical growth. These two things are fully demonstrable, and through our modern methods in education we demonstate them. We know, by comparison of records extending over a period of years, that the standard of intelligence is higher and that the span of life is being lengthened.

It is well that these tests and measurements of the mental and physical development of the younger generation should be made, that records be kept, and that these be compared and analyzd so that we may know where strength and weakness exists, and thus learn the correctness of falsity of the methods being employed.

Our school system, however, has a greater function to perform than the giving of knowledge, the development of boys' or girls' mental faculties, and the encouragement of right living leading to physical health and strength. These things are, after all, but the foundation stones upon which to erect that noble structure which true education is designed to build—character.

Our examination tests and physical records do not, and cannot, reveal whether as a result of the school term any hardening iota of character has been added to the wobbly parts of any boy's moral backbone, or any of the essence of spirituality made more fragrant any girl's standard of conduct. Intellectual equipment and bodily vigor without character only serves to launch into the world a man or woman capable of doing greater harm than they could otherwise do. On the other hand, the development of a fine character, supported by bodily vigor and those attainments and refinements with which education endow, results in giving to the world the greatest of all gifts.

Character training should be the aim of education, first, last, and all the time. No child is too young to begin it; no student is old enough to dispense with it. Those who provide education, whether it be the teacher, the parent, boards of school trustees, or the taxpayer whos money maintains our educational system in its entirety, are engaged in fitting others to take their places in the life and activities of the world. They must not forget the fundamentals.

Life is becoming more strenuous year by year; the newcomer must be better equipped than the one whose place he takes. Activity crowds upon activity, distraction upon distraction. Science and invention is setting a swift pace which calls for all the resources of mental and physical power of which the race is capable. But above all it calls for strong characters, men and women of sterling honesty, uprightness of purpose, high ideals and noble ambitions.

Within the first quarter of this present century greater advancements in science and invention have been made than in any like period in the world's history. The world has moved forward at an unprecedentedly rapid pace, and the developments of the past twenty-five years have but opened the way to even more momentous and still more rapid strides in the years just ahead. The boys and girls of today must be fitted for the great responsibilities which will be theirs. If they have character they will rise to the occasion; lacking it, danger signals can be seen on every hand.

Character is the perpetual reminder that education carries with it a responsibility. How do your children grow? In mental attainments; towards physical perfection; in strength of character?

"That's a good one on me," said the bee, as the minister sat down on him.

Many women would rather break a $5 bill than a 10-cent dish.

Bootleg Booze Is Fatal

Alcohol Causes Third of the Heart Disease Mortality

One-third of the 116 deaths attributed to heart disease and the same proportion of 49 laid to apoplexy during July were traceable directly or indirectly to alcohol, according to Health Commissioner Francis E. Fronczak, of Buffalo. He expressed the opinion that physicians failed to give the real causes of death in many instances to protect the names of families of the dead.

Out of the 29 deaths admittedly due to alcoholism during the month, 14 were caused by wood alcohol poisoning, the commissioner's report says.

Railmen Leader to Tour Canada

J. H. Thomas, general secretary of the National Union of Railwaymen, is about to embark on a tour of Canada, says the Westminster Gazette. Mr. Thomas, who was instrumental in ending the British general strike, is booked for a six weeks' tour of Canada.

Wrinkles caused by worry are the result of worrying over something that worry could not help.

Has Established A Record

Paris Clerk Gives Gallons of Blood To Heal Sick

Having given 22 liters, roughly five gallons, of his blood in 87 transfusions and operations since November, 1924, Reymond Briez claims to have established a record. Briez is a healthy looking, fresh complexioned young man, employed in the clerk market of Paris. He is 29 years old, is married, and leads a normal life, going to the office every day.

He happened one day to visit a sick friend in a hospital and met Dr. Becart, who stopped him and said, "You have a splendid looking pair of cheeks, I have good use for you."

He had his blood analyzed and the first operation was performed, which since then he has repeated almost continuously. Dr. Becart presented him to the International Congress on Surgery in 1925 and an American doctor offered him $25,000 to come to America.

Sour Stomach Risings Subdued by "Nerviline"

A Few Drops Bring Relief

The wonderful relief you get from twenty drops of Nerviline will surprise you. Take it in sweetened water, and almost immediately you feel better. Nerviline brings up the gas caused by fermenting food, and, relieves that distressed feeling in the stomach. When colic or cramps strike you at night, Nerviline is a sure relief. For general use in the family, for emergent ills, always keep trusty Nerviline on hand. 35c at all dealers.

Bridges Built In Dark Ages

Eighteenth Century Engineers Had To Re-invent Principles Of Construction

It is a curious light upon the interpretation of our common term "the dark ages" that those "dark ages" should have given England nearly all the bridges she had till the time of the Georges, for bridge building perished with the destruction of the monasteries, and even the principles had to be re-invented by eighteenth century engineers.

RUN DOWN IN HEALTH

Why Many Men and Women Are Badly Handicapped

When you are so run down in health that it impairs the efficiency of your work as well as your power to enjoy your leisure hours, or obtain rest, it is time you looked to the cause. If you do not, a serious breakdown is almost sure to result. In nearly all cases this condition, which doctors usually describe as general debility, is due to poor blood—blood that is deficient in red corpuscles. When the blood is thin and weak your whole system suffers. You lose appetite, have no energy, your nerves trouble you and you feel restless.

What you need is help to build up your blood and you should begin at once to make your blood rich and red by taking Dr. Williams' Pink Pills. You will soon notice the difference in your health by a better appetite and increased vigor. The reason is that the new blood created by Dr. Williams' Pink Pills stimulates all the organs of the body to healthy activity and so the system gains nourishment and strength. If you are weak or out of sorts, begin gaining new strength to-day by taking Dr. Williams' Pink Pills. "I was in a badly run down condition," says Mrs. J. Potter, of Winnifred, Alta., "when I began using Williams' Pink Pills and they fully restored my health. I strongly recommend this medicine to all weak people."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Queen "Hat" Reconstructed

Queen "Hat," who was the Queen Bess of ancient Egypt, has been reconstructed by Mrs. Winnifred Brunton, and Londoners are now able to get some idea of the appearance of the strong-minded ruler who dressed as a man on state occasions. The real name of this queen was Hatshepsut. But Egyptologists have nicknamed her "Hat."

Minard's Liniment for Corns and Warts

Porter.—This train goes to Buffalo and points east.

Old Lady.—Well, I want a train that gets to Syracuse, and I don't care which way it points.

A woman's long tongue is often responsible for her shortness of breath.

PAIN.

Minard's relieves pains and aches, is highly beneficial for stiff joints, sore muscles.

MINARD'S "KING OF PAIN" LINIMENT

WILSON'S FLY PADS

Will kill many times more flies for the money than any other fly killer. Each pad will kill flies all day, every day, for three weeks. At all Grocers, Druggists and General Stores — 10c and 25c per package.

Encourage Canadian Authors

Assistance Should Be Given To Canadian Writers Dealing With Canadian Material

The advice of Robert Watson, Canadian novelist and poet, given at a session of the Canadian Authors' convention in Vancouver, was to make literature a crutch rather than a staff. The Canadian reading public was limited and where two or three well known authors had their works distributed years ago, there were scores today. He thought, however, that Canadian writers should get a number of level-headed businessmen to take up the question of syndicating by Canadian newspapers, Canadian material by Canadian authors. He laid special stress upon the fact that while the American Government taxed the work of Canadians going into the United States, the Canadian Government put no taxes upon the enormous flood of American literature circulated in Canada.

A very interesting talk upon his experiences with publishers was given by Arthur Hemming, noted Canadian author and illustrator.

The Many-Purpose Oil.—Both in the house and stable there are scores of uses for Dr. Thomas' Eclectric Oil. Use it for cuts, bruises, burns, scalds, the pains of rheumatism and sciatica, sore throat and chest. Horses are liable very largely to similar ailments and mishaps as afflict mankind, and are equally amenable to the healing influence of this fine old remedy which has made thousands of firm friends during the past fifty years.

To Make Startling Discoveries

Sir Oliver Lodge Gives Address Before British Association For Advancement of Science

A prophecy that within the present generation science will make revolutionary discoveries in the realm of the spiritual, was made by Sir Oliver Lodge in an address before the Britsh Association for the Advancement of Science. Sir Oliver pointed out that other meetings of the association had been followed by startling new discoveries in science. Sir Oliver Lodge was president in 1913-1914.

"If I had to make a guess," said Sir Oliver, "I would say that whereas, through the nineteenth century and to the present we have been dealing chiefly with a material world, there lies before us a discovery of a spiritual world.

"Before this association meets again in Oxford our views of the universe will be revolutionized once more, and this time beyond all the previous scope. We shall rise to become beings of a higher order and once we have stepped over these limits—the grave, the gate of death—there is no end to the ascent."

The British Association last met at Oxford in 1894, when Sir Oliver gave the first demonstration of wireless signalling by means of electromagnetic waves.

Not Following Golden Rule

Says Many Americans Agree With Stand Taken By Clemenceau

Richard H. Edmunds, editor of The Manufacturers' Record, Baltimore, in a cablegram to Georges Clemeneeau, told France's wartime premier, "Millions of Americans agree with every word of your letter to President Coolidge."

"Millions of Americans deeply regret," he said, "that for its own honor this country has not cancelled the alleged indebtedness of France and other allies for the money it advanced with which to carry on a war for world-civilization and our national safety.

"So long as we seek to collect these debts we are not following the Golden Rule but are violating every principle of humanity and Christianity. Millions of Americans take heart in the belief that your appeal will stir to the deepest depths that sense of honor and responsibility to the world which command us to realize that unto whom much has been given, of him shall much be required."

Nearly eight Canadians out of 100 owned motor vehicles last year.

It takes a woman to do things properly without knowing how.

Britain Will Pay War Debts

To Show Example of Highest Standard of International Honor

Defending the accuracy of Winston Churchill's statement in his controversy with Andrew Mellon, secretary of the treasury of the United States, as to whether Great Britain's war debt was for commercial purposes, Sir Austen Chamberlain, foreign secretary, replying to a question in the House of Commons, has re-affirmed Great Britain's full intention to pay its debt without whining.

The debt controversy was raised just before the House of Commons adjourned until November 9, when Captain W. Wedgwood Benn, Liberal, said it was unfortunate that Mr. Churchill had been drawn into the squabble with Mr. Mellon and later the undignified broadcasting challenge to Senator W. E. Borah.

Captain Benn agreed that the settlement was straightforward and business, and that Prime Minister Baldwin has voiced the whole sentiment of the country.

"We got a material reward in a very strong credit position, strong exchange and stronger world commercial position," he said. "This motive is recognized by the United States and President Coolidge himself declared it was an example of the highest standard of international honor."

Captain Benn pointed out that the United States was extremely liberal with its money in other ways, aiding Europe since the war. The Baldwin settlement also was defended by other Liberal members, who said the prestige thus gained was worth the price.

Advance Of Aviation

World's Record For Successful Landings On Deck of Carrier

What is said to be a world's record for successful landings on board an aircraft carrier at sea was made by aviators of the U. S. aircraft squadrons of the Pacific fleet, when sixty planes were landed on the flying deck of the carrier as it was steaming ten knots an hour, twenty miles off Point Loma.

The feat is considered unusual, as the pilots of the planes were comparative novices. Only one minor mishap featured the performances.

Reduced by Asthma. The constant strain of asthma brings the patient to a dreadful state of hopeless exhaustion. Early use should by all means be made of the famous Dr. J. D. Kellogg's Asthma Remedy, which more than any other acts quickly and surely on the air passages and brings blessed help and comfort. No home where asthma is present in the least degree should be without this great remedy.

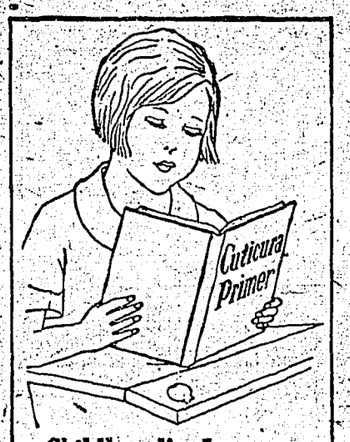
Rather Hard to Answer

Emily had been fascinated by Uncle Will's stories. Particularly was she impressed with some exploits of Teddy Roosevelt before he became president of the United States.

"And do you remember him?" asked the little girl.

"Yes, indeed," replied her uncle. "You see, I'm much older than you."

"Well, then," she asked, "how much older will I have to be before I can remember him?"—Christian Science Monitor.



Childhood's Lessons Affect The Whole Life

Teach your children to use Cuticura Soap daily to keep the skin clear. Soothe and heal rashes, eczemas and other irritations with Cuticura Ointment. Shampoo with Cuticura Soap to keep the scalp in a healthy, hair-growing condition.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c.
Cuticura Shaving Stick 25c.

Fair Dates For Next Year

Managers and Officials Already Making Plans For 1927

Fair managers and officials of the Western A circuit fairs met at Regina during the Regina fair to consider dates for next year and any other pressing business. Owing to the agreement made last year that no fair will be expected to include in their dates more than three days in June, the western circuit next year will start at Brandon, July 4. The Calgary fair will follow, July 11 to 16 inclusive; Edmonton, July 18 to 23; Saskatoon, July 25 to 30; Regina, August 1 to 6.

It was recommended by the meeting that the officials go back to their boards of directors with the suggestion that two representatives from each of the A circuit fairs make a tour of the large United States fairs, Iowa State Fair at Des Moines; Wisconsin State Fair at Milwaukee; Michigan State Fair at Detroit, and then go through to the Toronto fair. The suggestion is that these delegates go in a body, with the idea of picking up suggestions for their own fairs.

There may be other corn removers, but you will not be completely satisfied until you have used Holloway's Corn Remover.

New Air Service To Red Lake

Flights by regular aeroplane service into the northern goldfields of Manitoba and Ontario will soon be as common as stepping on the gas of any motor bus travelling into all districts surrounding Winnipeg. The newest route through the air to be organized for business is that of the Patricia Airways and Exploration Limited, which promises a daily service from Sioux Lookout, on the Canadian National Railways, to Pine Ridge, Red Woman, Birch and Cat Lakes. Special stamps have been issued and necessary permission to carry mail has been given by the post office department.

Keep Minard's Liniment handy

Canada's Highways

Canadian highway development last year cost $150,000,000. There are 400,000 miles of highway in the Dominion, 55 per cent. of which are unimproved earth, 10 per cent. gravel.

Bakers Everywhere Are Adopting The Tiffany Bread Wrap

BECAUSE its lacy appearance appeals to all customers, and especially to women.
BECAUSE its wrinkle-proof quality prevents a loaf from looking shabby.
BECAUSE it is so different and so attractive that customers show it with pride to non-customers.
BECAUSE its distinctive appearance tends to put a baker's business on a higher quality basis.
BECAUSE the lacy edges of the wrap permit its use as attractive shelf paper—a constant reminder of the baker to all who see it.

Write for samples and prices to-day.

Railway Gas Cars

Australian Railways Interested In Canadian National Internal Combustion Engines

"Australia may, in the near future, introduce internal combustion engines to the arid plains of the country," said George Gahan, chief mechanical and civil engineer of the Commonwealth Government Railways of Australia, while in Winnipeg recently on his way east.

One of the main objects of Mr. Gahan's journey through the Dominion is to make a thorough inspection of gasoline cars in operation on various parts of the Canadian National Railways.

In Australia the water is so poor that it plays havoc with the steam locomotives at present in operation, the visitor stated. In an effort to offset this the government is seriously considering introducing the gas car. The Australians have received splendid reports from the Canadian National on the operation of similar cars in Canada and Mr. Gahan is making a personal inspection. While he is in the Dominion, he will also look for material to be used by the Commonwealth in the extension of 900 miles of railway trackage.

On completion of his trip through Canada, Mr. Gahan will proceed to Great Britain, Europe, and India, returning to Australia in three or four months. Accompanying him as far as Montreal is Gordon F. Johnston, of Sydney, general passenger agent of the Canadian National Railways in Australia.

Hobson.—So your wife is convalescent. That's fine! I heard the doctors made a great fight for her life.

Dobson.—They did, and they almost got it too.

YOUNG WOMEN SUFFER MOST

These Two Found Relief by Taking Lydia E. Pinkham's Vegetable Compound

Ayer's Cliff, Quebec.—"I have been teaching for three years, and at the end of the year I always feel tired and have no appetite. I was awful sick each month, too, having pains in my back until sometimes I was obliged to stop working. A friend recommended Lydia E. Pinkham's Vegetable Compound to me and I heard many women telling how good it was so I thought it would help me. And it did. Now I take six bottles every year and recommend it to others."—DONALDA FANTEUX, Ayer's Cliff, Quebec.

"Unable to Work"

Canning, Nova Scotia.—"I had irregular periods and great suffering at those times, the pains causing vomiting and fainting. I was teaching school and often for some hours I would be unable to attend to my work. Through an advertisement in the papers I knew of Lydia E. Pinkham's Vegetable Compound, and it has been of great benefit to me, the troubles being completely relieved."—LAURA J. EATON, Canning, King's County, Nova Scotia. C

Great Pyramid May Be Chart

Experts Contend History of Human Race Is Outlined in Stone

The idea that the Great Pyramid of Cheops is not a mere huge tomb but a chart in stone outlining by a system of uncanny mathematical dimensions the history of the human race is not new. The late Pastor Russell advanced the idea and calculated from the number of inches in the passageways and corridors when the present dispensation would come to an end and when the great events of history would take place. It cannot be denied that by his peculiar method of reckoning he arrived at the year 1914 as the date for a great catastrophe. The contention of the experts is that the ancients had such a profound psychic insight into the future that they wanted to warn the human race as to what was in store for it during the ages, and so they fix 1928 as the year of the greatest holocaust of all history, 1936 as the end of the time of tribulation and the beginning of the millennium. They have even determined the exact date, Sept. 16, 1936. Only the future will tell whether they are right and whether it will be just a beautiful autumn day, no different from the others, or the "Day of Wrath, that Awful Day" of which the old hymn speaks.—New York Evening World.

The Finest Embassy

Canada House In London Is In Keeping With Importance of Dominion

Canada House is the proudest and finest "Embassy" in London, and is likely to remain so despite the determined effort which America has decided to make to achieve the distinction for herself. That the American ambassador would soon be flitting was certain, for of late the accommodation at Crewe House has been found to be inadequate, as well as exceedingly expensive. A move is therefore being made to Prince's Gate, one of the few thoroughfares which still preserve their atmosphere of pristine massiveness and grandeur, where the late Mr. Pierpont Morgan owned two houses, which he bequeathed to the American Government. These two houses have now been knocked into one and converted into a splendid establishment, with a wonderful staircase and the huge, luxurious rooms which are the delight of the American heart. No less a sum than £70,000 will have been spent on the building when the necesary alterations are completed in ten weeks' time. But where the Canadian building has the advantage is in position and in its impressive exterior. One can only fully appreciate the beauties of the Prince's Gate mansion when one has crossed the threshold.—Glasgow Herald.

Insurrection In Russia

Reports of a serious widespread insurrection in Russia in which peasants and intellectuals are lined up against Soviet extremists are reaching the Rumanian Government. Details are lacking, but the Rumanian Government seemingly attaches sufficient importance to the situation as to consider strict measures along the frontier against an influx of refugees.

The man who never does anything wrong has probably never tried to do anything.

Insulating Lumber

Production of Useful Material Which Is Made Entirely From Wood Waste

An interesting development in the utilization of wood waste is the recent establishment of a Canadian plant for the production of insulating lumber made from sawdust, coarse fibre screenings from pulp mills, shavings and mill waste.

In the process of manufacture the wood waste is thoroughly reduced to fibrous pulp in disintegrators. The pulp is then cooked in digesters to remove wood juices and resins, the fibres freed from excess moisture, waterproofed and forced into a solid board under enormous pressure by hydraulic machinery. The board is finally prepared for the market by baking for several hours in steam heated kilns. This lumber is used for insulation, sound deadening and in some cases acoustical correction and is usually sold in large sheets which may be sawn and nailed like ordinary lumber.

For certain purposes in building construction it may be used to replace lumber and lath, releasing an equal amount of lumber for other purposes and thus enables a 25 per cent. greater utilization to be made of the timber cut. Over four million feet of this "man made" lumber was used in the Canadian Building at Wembley.

A noteworthy and practical example in forest conservation is thus afforded in the production of this useful material which is made from wood waste. As pointed out by the natural resources intelligence service of the department of the interior at Ottawa, at this time of the year, when forest fires are ruthlessly eating into our timber reserves it is somewhat comforting to feel that industrial science is accomplishing something to curb that second great destructive agent of our forests—waste.

An Ingenious Contrivance

Wonderful Provision of Nature For Seals and Camels

The fact that the seal gets credit for being the cleverest diver in the animal world may be due to a very ingenious contrivance in his nose, each nostril being provided with muscles which close it hermetically at the owner's will. And the shape of the nose is such that when the nostrils are closed not a drop of water can enter. With seals the closing of the nostrils at the moment of diving has become an automatic process. There is a still more remarkable application of the same principle in an animal far removed from the seal. The seal is a water animal. The other owner of trapdoor nostrils is the camel, an inhabitant of the waterless sandy deserts. The camel is not troubled with water, but he is troubled with dust. If the camel had not nostrils which were perfectly dust-tight he could never endure the dreadful sand and dust storms.

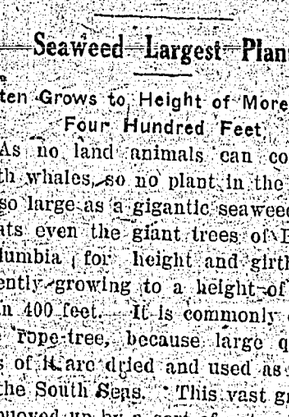
Seaweed Largest Plant

Often Grows to Height of More Than Four Hundred Feet

As no land animals can compare with whales, so no plant in the world is so large as a gigantic seaweed. It beats even the giant trees of British Columbia for height and girth, frequently growing to a height of more than 400 feet. It is commonly called the rope-tree, because large quantities of it are dried and used as ropes in the South Seas. This vast growth is buoyed up by a sort of natural balloon, which grows towards the surface and increases with the size of the plant until it is sometimes over six feet in diameter. A grove of these submarine trees may become a hindrance to navigation.

A process has been developed for rubber-plating metallic articles in much the same way that metals are silver-plated.

FOR
"Cholera Infantum"
MOTHERS SHOULD USE



This valuable preparation has been on the market for over 80 years, and has no equal for offsetting the vomiting, purging and diarrhœa of cholera infantum.

Houses That Draw Millions

Nearly All Tourists Visit Historical Places In England

Few persons go to Great Britain at any time of the year without paying flying visits to several of the small towns and out-of-the-way hamlets.

They go to these places in order to gaze just for a moment on the homes that once sheltered Britons whose names are now known the world over.

Foremost among these places is Stratford-on-Avon, of course. This little town practically spells Shakespeare.

The little Lincolnshire village of Somersby is another famous place of pilgrimage, for here Alfred, Lord Tennyson, was born. Probably not many people know much about Tennyson beyond the fact that he was Laureate and the greatest poet of his age.

No charabanc trip in the Lake District is complete without pulling up at Rydal Mount. It is a private house today, but Wordsworth used to live there.

Another of Britain's Poet Laureates, at his official visit to Court, he wore the same levee coat as Tennyson, and it had been somone else's even before!

Thousands of people go every year to Scotland by a way which takes them longer than need be. They are glad to do it, just to have a look at Abbotsford, the huge house which the great Sir Walter Scott built for himself from the proceeds of his writings. It is a private house now, but so many are the visitors, that part has been fitted out as a regular Scott museum, where the tourist may pay an entrance fee to gaze at the relics of the great author.

Anti-British Sentiment

This Propaganda Is Spread All Over France

The British Government was seriously exercised by the flood of anti-British propaganda which is spread all over France, stimulated by the fall of the franc.

While Paris has shown particular antagonism to Americans, the French people in the country attribute the rise in the cost of living to the pound sterling and are still inclined to regard most foreigners as Englishmen. The result is a feeling of irritation and hostility towards Britain all over France.

This is due, of course to ignorance of the situation, but its existence is nevertheless disquieting.

The Boundary Line

A Path Leading From One Neighbor's House to Another

Speaking of that boundary line—where in all the world is there a boundary line between two countries that means so little of what international boundary lines all too often do mean—jealousy, suspicion, hate, fear and all the ugly devils the human mind produces to lead it into wars and other troubles?

Why, the boundary line these Duluth good-will caravaners cross is not a dividing line at all, not a bit more than the friendly path that leads from one neighbor's house to another's.—Duluth Herald.

Cultivate Cotton

To foster Australian cotton cultivation the government is introducing a bill seeking legislative authority to expend in the next five years £900,000 in bounties on seed cotton and manufacture of cotton yarns. It is stipulated that half the raw material used in this manufacture must be the product of Australia.

Noted Poetess Dead

Eva Gore-Booth, poetess, essayist and sister of Countess Markievicz, Irish Republican, died in London recently. Amongst her better known poems are, "Unseen Kings," "The One and the Many," "The Egyptian Pillar," "The Sorrowful Princess," and "The Agate Lamp."

Waiter: "A customer wants to know how the tongue sandwiches are."

Proprietor: "You tell him that the tongue sandwiches speak for themselves!"

New Theory About the Moon

Was Formed From Layer of Earth's Crust is Belief

A new theory is now being put forth that the moon was formed from a layer of the earth's crust, about 41 miles thick, and covering about two-thirds of its total area, and which was pulled off by the attraction of the sun. The crustal area left on earth formed the continents. This theory also accounts for the fact that while, according to generally accepted ideas, masses of lighter density such as make up the earthly continents should cover the entire surface of the globe, they actually cover only about a third, the missing two-thirds consisting of the moon. The new theory also fits in with the ideas of a German geologist, Professor Alfred Wegener, who believes the American continent was originally united with Europe and Africa, and that it floated away to its present place. This would not have been possible so long as the entire earth was covered with such a crust, but after the moon had been torn away it was possible for the continents to separate from their long embrace.

Little Helps For This Week

There shall be one fold and one shepherd.—John x., 16.

Wild bird flying northward, whither thou?
And vessel bending southward, what thy quest?
Clouds of the east with sunshine on your brow,
Whither? and crescent setting in the west?
Still we pursue while the white day is ours;
The wild bird journeys northward in his strength;
The tender clouds waste in their sunny bowers;
One shepherd guides and gathers them at length.
—Annie Fields.

He will guide us in a sure path, though it be a rough one; though shadows hang upon it, yet He will be with us. He will bring us home at last. By His eye or by His voice He will guide us, if we be docile and gentle; by His staff and by His rod, if we wander or are wilful; anyhow and by all means He will bring us to His rest.—Henry Edward Manning.

Minard's Liniment for Dandruff

Of eight Londoners who had made a promise to meet at the steps of St. Paul's Cathedral, 20 years afterward and sing, "Auld Lang Syne," four kept their word recently. Three were dead and the other disappeared.

A Remedy for Earache.—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it work for a doctor. Dr. Thomas' Eclectric Oil offers a simple remedy. A few drops upon a piece of lint or medicated cotton and placed in the ear will do much in relieving pain.

New Zealanders Patriotic

Few German goods are entering New Zealand, merchants declare. Before the war the importation of German hardware was very considerable, but it is now very small. The average artisan refuses to buy tools unless the name of a British manufacturer is branded on them. Germany has lost all the cutlery trade.

Sweet and palatable, Mother Graves' Worm Exterminator is acceptable to children, and it does its work surely and promptly.

Some people never succeed in finding out which side of their bread is buttered until they drop it.

A woman can keep an expense account almost as long as a man can keep a diary.

A Queer Old Document

Professes to Trace Saxon King's Pedigree Back to Adam

In the library at the Herald's College, Queen Victoria Street, E.C., London, Eng., is a queer 16th century document, the history of which is unknown. It professes to trace the pedigree of the early Saxon kings right back to Adam and Eve, among the names of those appearing in the genealogy being Our Lord, Alexander and Nebuchadnezzar. It contains some beautifully executed and well-preserved pen and ink drawings of subjects which include the fall, the building of the Tower of Babel, and the Ark. Adam is stated to have died from "gowte," and to have been buried at Hebron. The document has been in the possession of the Herald's College for 200 years.

SAVE THE CHILDREN

In Summer When Childhood Ailments Are Most Dangerous

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, cholera infantum and diarrhoea carry off thousands of little one every summer, in most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets relieve these troubles, or if given occasionally to the well child they will prevent their coming on. The Tablets are guaranteed by a government analyst to be absolutely harmless even to the new-born babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

C.N.R. Earnings Show Increase

The gross earnings of the Canadian National Railways for the period ended July 31, 1926, were $7,408,639, as compared with $7,059,027 for the corresponding period of 1925, an increase of $349,612, or five per cent.

Miller's Worm Powders, being in demand everywhere, can be got at any chemist's or drug shop, at very small cost. They are a reliable remedy for worm troubles and can be fully relied upon to expel worms from the system and abate the sufferings that worms cause. There are many mothers that rejoice that they found available so effective a remedy for the relief of their children.

"You say Cohen was so badly injured that he lost his speech?"

"Yes, both his arms were broken."

Minard's Liniment for Insect bites

Don't imagine that because one of the participants in a quarrel is wrong, that the other is altogether right.

Most men are as anxious to get rich as most women are to be beautiful.

Federal Election Registrars

Registrars and Deputy Returning Officers for the Grand Forks-Greenwood division of Yale federal district were sworn in office last week and the work of preparing the voters' list is now being proceeded with by the various officers. Any person who may not be clear as to whether or not their name is on the voters' list should get in touch with the registrar of their district. It should be noted, of course, that any person whose name is on the provincial voters' list of any part of British Columbia will have their name on the Dominion list automatically.

Registrars in this division are as follows:

Greenwood—Fred J. White.
Eholt—Morley W. Ludlow.
Boundary Falls—J. C. Casselman.
Midway—Gordon McMynn.
Riverside—Mrs. I. V. Shillcock.
Rock Creek—R. C. Johnston.
Bridesville—Mrs. E. Johnston.
Westbridge—Louis Clery.
Christian Valley—Mrs. Joseph Christian.
Beaverdell-Carmi—W. J. Reid.
Grand Forks—D. McCallum.
Paulson—D. B. Merry.
Fife—O. Tambellini.
Cascade—Isaac Crawford.
Brown Creek—W. F. Evans.

Allan Eustis Dies in Trail

The sad news was received in town on Monday of the death of Allan Eustis in Trail. Allan was born in Copper Cliff, Ont., and spent ten years of his life in Greenwood attending both public and high schools. His friends and acquaintances here were very sorry to hear of his untimely death.

In referring to the deceased young man the Trail correspondent of the Nelson News says:

"Allan R. Eustis, who had been seriously ill with kidney trouble for six weeks, died at 7 o'clock on Aug. 16th at his Columbia Heights home in Trail. At 6 o'clock his condition was very satisfactory, and arrangements had been made to remove him to hospital at 9 o'clock to relieve his wife, Mrs. Iris C. Eustic, who had been his constant attendant. Death followed the second of two heart attacks, unexpectedly occurring.

The late Mr. Eustis was the son of Mr. and Mrs. R. Eustis, also of Columbia Heights. He was 26 years old. On coming here from Greenwood five years ago, he was first employed by the smelting company. For the last three years he was employed in the Dominion customs office, where today his chief, P. R. McDonald, had the flag lowered to half mast in mourning. A year ago last June he married Miss Iris C. Ewing, daughter of Mr. and Mrs. Alex Ewing of Pine avenue, Trail.

Besides his parents and his widow, he is survived by three brothers—Russell, Sam and Lloyd. His only sister, who was a nurse at the Vancouver General Hospital, died there 20 months ago, following typhoid infection from patients, and subsequently pneumonia."

Kettle Valley Golf Club

It is proposed to hold a knock-out tournament on handicap for ladies and gentlemen, this fall, starting on Aug. 29th. The Secretary, G. B. M. Gane, requests all members, who intend competing, to send in their names by the 22nd inst. There will be no entrance fee.

Fox Film of North Is Shot in Canada

A large company of stellar players and extra folk spent weeks in the Canadian big timber country shooting exterior scenes for "When the Door Opened" the William Fox photoplay version of James Oliver Curwood's dramatic story of the woods, which will be shown at the Greenwood Theatre on Saturday, Aug. 21st.

It is a story filled with daring action and thrills, with diverting bits of comedy to relieve the tenseness of the situations. Added to this is an engrossing love story which runs through the whole play and which is saved from a very unhappy ending by a totally unexpected turn of affairs in the last reel or two.

Midway News

Mrs. E. Hawkes and children left on Tuesday's train for Nelson.

Mrs. H. Pannell and children arrived home from the coast on Tuesday.

GOD SAVE THE KING

PURE BEER

THE TRUTH ABOUT PURE BEER

IN the past several years the public has been told many things about beer, yet it is not surprising that many people should not know what beer really is, for the merits of pure beer have been almost entirely neglected by controversionalists.

Pure beer is a scientifically made malt solution, derived from malted barley and flavored with hops. In this malted condition the grain is much more nourishing than in its natural state and the beer has many beneficial activities when taken as a beverage.

PURE BEER

In the first place pure beer is in itself a complete food, rich in proteins, maltose and dextrin, mineral salts and organic phosphorous compounds. It is superior to either cider or wine in its nourishing qualities. Consumed at the rate of one bottle per meal, it would replace 300 grammes of bread in food value, because of its content of extractives, carbohydrates and proteins.

PURE BEER

Pure beer assists valuably in the assimilation of other foods, for, by reason of its hop-bitter principles, its weak alcoholic strength and its dissolved carbonic acid gas, it exerts a beneficially stimulating action on the stomach.

Beer is a beverage rich in vitamines, so necessary to the well being of the human organism and as a defense against disease. It is aseptic, for the wort has been completely sterilized by prolonged boiling in the presence of the hop bitters, which are strongly antiseptic.

The health-giving qualities of the pure beer sold to the people of British Columbia are secured and maintained in the model plants of the Vancouver Brewery Limited, Rainier Brewing Co. of Canada Limited, Westminster Brewery Limited, Silver Spring Brewery Limited, and the Victoria Phoenix Brewing Co. Limited, members of the Amalgamated Breweries of British Columbia, which are models of scientific care and cleanliness. They are open for inspection at all times, and visitors are gladly welcomed.

PURE BEER

This advertisement is not published or displayed by the Liquor Control Board or by the Government of British Columbia.

SYNOPSIS OF LAND ACT AMENDMENTS

PRE-EMPTIONS

Vacant, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation, and improvement for agricultural purposes.

Full information concerning regulations regarding pre-emptions is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., or to any Government Agent.

Records will be granted covering only land suitable for agricultural purposes, and which is not timberland, i.e., carrying over 8,000 board feet per acre west of the Coast Range and 5,000 feet per acre east of that Range.

Applications for pre-emptions are to be addressed to the Land Commissioner of the Land Recording Division, in which the land applied for is situated, and are made on printed forms, copies of which can be obtained from the Land Commissioner.

Pre-emptions must be occupied for five years and improvements made to value of $10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.

For more detailed information see the Bulletin "How to Pre-empt Land."

PURCHASE

Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes; minimum price for first-class (arable) land is $5 per acre, and second-class (grazing) land $2.50 per acre. Further information regarding purchase or lease of Crown lands is given in Bulletin No. 10, Land Series, "Purchase and Lease of Crown Lands."

Mill, factory, or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.

HOMESITE LEASES

Unsurveyed areas, not exceeding 20 acres, may be leased as homesites, conditional upon a dwelling being erected in the first year, title being obtainable after residence and improvement conditions are fulfilled and land has been surveyed.

LEASES

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

GRAZING

Under the Grazing Act the Province is divided into grazing districts and the range administered under a Grazing Commissioner. Annual grazing permits are issued based on numbers ranged, priority being given to established owners. Stock-owners may form associations for range management. Free, or partly free, permits are available for settlers, campers and travellers, up to ten head.
