

The Mining Review.

VOL. 5.—NO. 34.

SANDON, B. C., SATURDAY, FEBRUARY 8, 1902.

\$2.00 PER YEAR.

Town Jottings.

Business appears to be getting "no better, fast."

The refinery at Trail is going ahead as fast as it can.

The sun is commencing to make its influence felt again.

Work on the Payne concentrator is going ahead steadily.

Mrs. Geo. Ransom and family are now living at New Denver.

See the fine stock of new ingrain wall paper at Cliffe's bookstore.

A. B. Dockstader went to the Liberal convention at Vancouver.

Curling, as an amusement, seems to be taking the lead this winter.

A sleighing party on Tuesday night took a dozen or more of our young people to a dance at Three Forks.

Sandon's senior hockey team has notified Rossland that they will enter the lists in the hockey tournament.

A slight accident occurred to the Minto near Arrowhead on Sunday evening, which delayed service a little.

The C. P. R. is completing arrangements to build a line of railway between Spence's Bridge and Midway.

The arch vilifier says he is employed editing Lowery's Claim. That's natural; "birds of a feather flock together."

Several cars of an express were derailed on the Crow's Nest line on Monday morning, but fortunately no one was hurt.

The Chinese held their New Year's this week. There are only a few white ones in Sandon, and they did not celebrate.

The freezing of Kootenay lake the past two or three weeks has materially interfered with the regularity of the mail service.

About the end of the month several Sandonites will commence to move to Ashnola, the new town in the Similkameen district.

The "Dynamite Queen" has been in the vicinity for some time. She had a set-too with Brother Steel at the American Boy the other day.

We would advice those parents who desire to have the second teacher retained to petition the city council to that effect. We will give them the names of many who have no children to send who will sign it.

Mr. W. H. Sandiford, manager of the Bosun, has gone to England, to lay before the company who own the Bosun and other properties, some matters of importance to them. In his absence Mr. Sandiford, jr., will look after the Bosun and other interests.

At a meeting called for last Monday evening to resuscitate the band but three players—H. Sharp, J. Gable and Wm. Cliffe put in an appearance. These three were appointed a committee to see what players were in town, and J. Vallance, F. Ritchie and C. Walmsley were selected to look after finances. If the boys see financial success ahead a band can be secured.

Col. Brayton, of Kaslo, has great faith in the smelter proposition.

Thawing out water pipes is the leading enterprise in the city these days.

The back of the cold weather appears to be broken, for the present at least.

John Buckley has taken out a license for the Clifton, and is now on the ground floor for business.

Lead has gone up 2s 1d in London. It is now quoted at £11 12s 6d. Silver is 55½ in New York.

The Cosgrove Merry-makers, one of the best troupes on the road, will play here in a few days.

Rossland's hockey tournament will consist of the Sandon, Nelson, Rossland and Phoenix teams.

Some Sandonites declare they felt the slight vibrations of an earthquake on Monday night. They were perceptibly felt in Montreal.

The Rossland Miner quotes local stocks this way, asked: American Boy, 9¼; Rambler, 8¼; Noble Five, 1; Payne, 32; Wonderful, 5 cents.

The Rossland Junior hockeyists that Sandon licked three years in succession hands down, defeated the crack team of Nelson easily the other evening.

The Sunset will pay G. W. Hughes and partners a handsome dividend the early part of next week; Mr. Hughes is working that property quietly, but all the same to good advantage to the owners.

Geo. Creech gave a house warming last night to a number of young people and others not so young, in his new residence on Sunnyside. They had an enjoyable time. The building will be completed in about two weeks.

Our hockey kids went over to Kaslo to play a match with Kaslo kids, but when they got there they found themselves up against a posse of giants—the largest men in the town, and compelled to battle with them the best way they could. They claim that after a fiercely fought contest it was a tie—four goals each. The Kaslo people contend they scored but three times and were defeated by one point. As a war of words will not change the matter, we simply give the two sides of the story, leaving it for future contests to decide who are the better club.

The curling match of the season was played on Thursday evening when the "crack" curlers of Sandon skipped by Compeau and Cawley spread themselves on the ice, there being so many players available, five on each side were chosen and the game was a "buster" in earnest. It was a case of "in and out turn, put this fellow out of business, Jim, take a smash at that one Pete, and Jack come straight down on a whirl," from start to finish. When time was called Cawley had vanquished Compeau by a score of 11 to 4. We have not heard what trophy was played for or when a return game will be played, and beyond a good test the stones were none the worse of the shaking up they received, as upon examination they were all found to be intact.

Mines and Mining.

The Marion is shipping 100 tons of ore.

The Neepawa is shipping 100 tons a month.

The Ivanhoe has 40 men at work in the mine.

The Ottawa mine at Slocan City has been rebonded for \$45,000.

Silverton and New Denver hockeyists defeated Slocan the other night in a score of 11 to 7.

The Slocan Star people are now working on the Slocan King with excellent prospects before them.

The ore body in the Silversmith is still widening out under the drills. It is now nearly five feet of clean, solid steel galena, the best every got in that locality. The indications are that this claim will outstrip all the past fame of this celebrated mine.

The McGuigan Basin is assuming new life and has now as many men working as ever in its history. The Rambler-Cariboo has over 100 men on the pay roll, and will increase it in the early spring when the concentrator is started. The Washington that lay idle for years, is showing up large bodies of ore under the hammers of the 16 men J. L. Retallack has at work on the property. Mr. Smith has a number of men working the Surprise, which promises to become a large property, and a few men are at work on the Soho, the Red Fox and the Dardanelles. Greenough Bros. of this city, have a crosscut of 110 feet driven on the Antoine. This extensive work means the heaviest shipping in the history of the camp.

Tom McGuigan, of the American Boy, on his way home from Spokane, gave the following to the Nelson Miner:

"Mr. McGuigan stated the ore shoot found at a depth of 500 feet in the American Boy is the largest and best body of silver-lead ore he has yet seen in the Slocan so far under ground. Nearer the surface he says, he has seen larger ore shoots, but none that come up to it at the same vertical depth. The ore shoot is 2½ feet in width and has been drifted on for a distance of 45 feet, and it looks as though it is going to widen out. The ore is of a high grade, too, carrying about 150 ounces in silver to the ton and from 75 to 80 per cent lead. The ledge in which the shoot was encountered in the American Boy is the same one that runs into the Last Chance and from which so much high grade ore has been extracted by the Last Chance management. It is not the same ledge however, as the one on which a strike was made at a depth of 1600 feet in the Last Chance."

Sandon Ore Shipments.

The following are the ore shipments from Sandon, for the week were:

Mine.	Tons.
Ivanhoe.....	25
Sunset.....	60
Reco.....	20
American Boy.....	20
Payne.....	50

School Matters.

The most contemptible of all curs is the creature who is ever bent on injuring a business rival by innuendo, never daring to make a charge. Here is a specimen from McAdams print:

"It is rumored that the old accounts are not all settled, although the provincial government is supposed to have forwarded the money for the purpose and the new board proposes to find out if Mr. Cliffe has been guilty of irregularity."

There is enough in this to lead the public who do not know the calibre of the writer to believe. Mr. Cliffe may have done some things wrong; but not enough to leave him liable to an action for criminal libel.

Although secretary-treasurer of the school board for the past six months, Mr. Cliffe is accountable no one but the government for school monies, to satisfy the curious he gives the following statement, as comprising all the money he has handled:

DR.

Sept.—To received from Mr. Lovering.....	\$50 00
Jany.—To received from govt.....	5 00
To balance.....	10
	\$55 10

BY.

Paid Cameron, coal.....	\$34 00
Paid Walmsley, scavenging.....	5 00
Paid 4 lights glass and puting in.....	4 00
Paid cleaning stoves and pipes for 1901.....	7 50
Paid advertising.....	2 00
Paid chalk for 1901.....	1 40
Paid Hunter-Kendrick Co.....	1 20
	\$55 10

A man with an ounce of honor would publish this statement, and if found correct after investigating, offer an apology; but an arch vilifier of human character never. We wait to see which McAdams will prove himself to be. The charge that Mr. Cliffe refused to deliver the books is a malicious lie out of whole cloth, as he was never yet asked for them. It will be seen by the foregoing until Mr. Cliffe received \$5 from Mr. Lovering out of concert funds his expenditure exceeded money received by \$5.10, which is the experience of most school boards.

Spokane, Jan. 31.—W. D. Wrighter, W. O. Jones and M. C. Dunne, of Spokane, W. J. Wilson, of Nelson, and Thos. McGuigan, of Sandon, were elected trustees of the American Boy Mining company at the annual meeting of the stockholders at room 515, Hyde block, yesterday afternoon. There were 1,166,204 shares represented at the meeting out of 1,286,000 shares issued.

The report of manager, Thomas McGuigan, shows 1738 feet of tunneling and drifting, 1360 feet of raise and 5422 cubic yards of stoping. The mine shipped 1743 tons of ore, netting the company \$45,962.28, or a net profit, after paying all the expenses at the mine, of \$5887.

Mr. McGuigan said: "I estimate that the ore in transit to the smelters will clear off the indebtedness at the mine. Aside from this the company had an indebtedness of about \$1600. With the splendid showing in the mine there is every reason to believe the property can be made a dividend payer within the next few months."

"There is between \$50,000 and \$60,000 worth of ore in sight, and steps are to be taken at once to drive tunnel No. 5, which we estimate will strike the same ore shoot in which we are now working in tunnel No. 3. This tunnel to the ore body will not exceed 120 feet in length. The paystreak in tunnel No. 3 averages two and one-half feet wide and assays from 75 to 81 per cent lead and 150 ounces in silver. We have already followed the paystreak in tunnel No. 3 a distance of 35 feet."

The Mining Review.

SATURDAY, FEBRUARY 8, 1902.

WORK THE MINES.

By this time nearly every man in British Columbia has come to the conclusion, that much of the froth and fury of the last two years over the industrial question, has been so much energy thrown away. As far as this paper is concerned, nothing would be more pleasing than to see every available miner getting his \$3.50 for an eight hour day, which would imply profitable wages for all the other industrial classes, but conditions must be changed to render this possible—the mines must be worked, and before they can be, investors must be assured of some interest on the money they have invested. There is not a man in the country that can gain-say this, and still it only earns reproach from certain parties who know better, for saying it.

It is quite true that most of our mines that have been extensively worked have paid dividends, but it was under different conditions—it was when minerals brought better prices, legislation was less exacting, and when the agitator had not yet commenced to ply his calling.

From the indications, our legislators have come to the conclusion they must make up the taxation they have tried to exact from the mines from other sources on which so many vital interests are not centred. The agitator we are to bear with yet a little longer, and legislation must be secured to compensate in some measure for our reduced prices of minerals.

If the Ottawa government can secure an equitable reciprocity with the United States, that will meet all requirements, as then our mine owners as well as the American producers will get American prices for silver and lead.

If reciprocity of trade cannot be had, we must have reciprocity of tariff—a duty that will exclude foreign lead in any form, manufactured and otherwise from the Canadian markets. There is no other hope for the country, and the sooner our government grapples with the question the better for the whole of Canada. With proper protection we will have full control of all our own markets, instead of sending our cash to the United States for American goods; and Canadian manufacturers being able to buy raw lead at \$2.50 per cwt. at least, should be able to compete in any outside market with American manufacturers who would have to pay a third more for their raw materials. We, at least, can see this matter in no other light.

It is not a question for our governments to consider what is or what is not an equitable tax for our mines to pay under present conditions. The question is to start them properly, that they may give life to the rest of the commercial machinery of the country, and when they are once running on a paying basis, taxation will be fully in order. If it was a fact that a mine was simply an institution like a farm or a general store whose opening or closing affected no one but the owner himself, it would be a small matter; but when their operation or inoperation means life or death to all other enterprises—to the whole country for that matter—their treatment should be considered on a broad national basis.

WHITE AND RED

Pale blood—pale face—poor health; Scott's Emulsion—red blood—rosy face—good health; that's the order of events.

Our first lines give a condensed history of many cases, chiefly young girls at school. For some reason girls of that age are frequent sufferers from pale blood—a real blood starvation.

Scott's Emulsion, a clean white medicine, makes rich, red blood and rosy faces. It is blood food.

We'll send you a little to try, if you like.
SCOTT & BOWNE, Chemists, Toronto.

From what we can learn of the proceedings at the Liberal convention at Vancouver this week and the general trend of sentiment in the country, it is evident the next provincial elections, and they are not likely to be long deferred, will be fought out on Federal party lines. If our representative men were moved by principle only there is no necessity for this, for there are none of the issues that have given rise to the Federal party names all right in the provincial arena; but if there is no means of keeping these men from jumping from side to side, as a squirrel jumps from branch to branch, without any apparent reason for doing so, let us have the Federal lines. Although the

Love is unequally yoked with sickness. Labor is lightened by love, but love cannot lighten pain or relieve it. Many a man looks on at his wife's suffering willing to do anything to aid her and able to do nothing.

Sometimes, however, the husband's attention is directed to Dr. Pierce's Favorite Prescription and its remarkable cures of womanly diseases. He may not have much hope of a cure, but he is led to try the medicine, with the result that in almost every case there is a perfect and permanent cure.

Dr. Pierce's Favorite Prescription cures irregularity. It dries the drains which weaken women, heals inflammation and ulceration, and cures female weakness.

As a tonic for women who are nervous, sleepless, worn-out and run-down "Favorite Prescription" is unequalled.

"In answer to your letter I will say, my wife commenced to complain twenty years ago," writes Lewis A. Miller, ex-Chief-of-Police, of 33 Prospect St., Westport, Pa. "We have tried the skill of twelve different doctors. She took gallons of medicine during the time she was ill, until I wrote to you and you told us what to do. She has taken eight bottles of Dr. Pierce's Favorite Prescription and six of the 'Golden Medical Discovery.' She can do her own work now and can walk around again and is quite smart."

"Favorite Prescription" has the testimony of thousands of women to its complete cure of womanly diseases. Do not accept an unknown and unproved substitute in its place.

Dr. Pierce's Pleasant Pellets invigorate stomach, liver and bowels.

edit of this paper has been for upwards of thirty years a writer for the Conservative press, in the approaching elections he will be guided by the necessities of the situation alone. If the Conservative party comes out with capable men, on a platform calculated to encourage the mining industry so as to set the other industrial and commercial industries of the country in proper motion, with ample protection to the country for all the advantages conceded to railways, a proper revision of the taxation laws of the country and proper economy consistent with efficiency in the public service, it will have our best support. If it decides otherwise, we hold ourselves free to do the best we can for the future of the country. Experience has long since taught us that virtue, capability and honor in men are not all embodied in party name. It requires more than a name to make a man, and more than declared principles to make a party—it requires action in responsibility.

We call the attention of the public to the economy of the new school board, as announced in their estimates in another column. Deducting \$25 for water service, \$50 for insurance, and \$100 paid an assistant for two months, they propose to have the school with one teacher cost \$1,400. Last year the school with two teachers cost just \$1,690, and out of that sum, according to the insinuations of the Public Slanderer, Mr. Cliffe had a chance to steal a lot of money besides. Now, we all felt the principal was insufficiently paid, but adding \$150 more for him, the school with two teachers and last year's management could be run for \$1,740. According to what is now known the attendance with one teacher will be from 7 to 10 less than with two, reducing the government grant by at least \$150. By cutting off one teacher the city will save under the new rule \$190 a year. We ask the ratepayers, one and all, if it will pay to drive families away from the place for the sake of saving 78 cents a day in taxation of the whole city? The public must be ready with their own answer.

If the arch vilifier of human character knows of any accounts created by the Sandon School Board between the 30th of June and the 31st of December, 1901, let him bring them to Mr. Cliffe and they will be promptly settled. If he finds none, he should at least acknowledge his last paper was intended for vilification. We may say here that this is the first time in the history of Sandon's school that it was clear of debt. We have been told there is one account still outstanding, of \$3 for a half cord of wood, but as it was created some two years ago, Mr. Cliffe is in no responsible for it.

Smellfungs is now trying to explain away the mistake he made in his scoop on freight and treatment rates. Mr. Johnson, of the Everett smelter, who it is alleged gave the local chap his scoop, declared in Nelson that he made no statement in Sandon to any one that could be construed into a statement he had offered lower rates than the schedule announced by the B. C. smelters in December. The trouble is McAdams is becoming such a notorious fabricator that he cannot believe a word he says himself.

NOTICE.

Notice is hereby given that I intend to apply at the next sitting of the board of license commissioners for the City of Sandon, to be held after the expiration of thirty days from the date hereof, for a transfer of the retail liquor license now held by me for the Star Hotel, situate on Reco Avenue, in the City of Sandon, on block 4, West Kootenay district, to Michael Kirlin, of the City of Kaslo.

ARCHIE FULMORE.

Dated this 15th day of January, 1902.

Wanted—A Husband.

Handsome American lady, independently rich, wants a good, honest husband. Address, Eric, 193 Washington street, Chicago, Ill.

To the Deaf.

A rich lady cured of her Deafness and Noises in the Head by Dr. Nicholson's Artificial Ear Drums, gave \$10,000 to his Institute, so that deaf people unable to procure the Ear Drums may have them free. Address No. 14525, the Nicholson Institute, 780, Eighth Avenue, New York, U. S. A.

Farmers' Names Wanted.

Send us the names and postoffice addresses of ELEVEN FARMERS who have land to clear or who use a STUMP PULLER, and we will mail FREE to your address, a copy of our STORIES of the GREAT NORTHWEST, now going to press. Write plainly, and address the W. SMITH CRUB BRECO., LA CROSSE, WIS.

Spokane Falls &

Northern R'y.

Nelson & Fort

Sheppard R'y.

Red Mountain Railway.

The only all rail route between all points east, west and south to Rossland, Nelson and intermediate points; connecting at Spokane with Great Northern, Northern Pacific, and O. R. & N. Co.

Connects at Rossland with the Canadian Pacific Railway for Boundary Creek points.

Connects at Myer's Falls with stage daily for Republic.

Indirect service on trains between Spokane and Nelson.

Effective November 10th, 1901.

LEAVE	Day Train	ARRIVE

The Mining Review.

SATURDAY, FEBRUARY 8, 1902.

It is amusing to hear people say, when they learn certain men are worth several million dollars, that they made it by robbery, they could not have made it any other way. They never think of blaming the profit system of the world, and never make a calculation to learn the foundation for their charge. Let us look at the matter, however. Supposing Tom Jones at 21 years of age, with \$1000 cash, who bought part of his stock at least in a commercial business for cash, at the end of one year made 25 per cent. profit on his capital, or \$250 and no more, there is no one who would say he was a thief for making it; but there would be many who would say he was a bad business man if he did not make it. Supposing again he met with like success and no better the second year, he would then be worth \$1,565. It will surprise the masses if we say that if he kept on this way year after year, adding 25 per cent. to the capital he had the year before, at 71 years of age, or 50 years after starting, he would be worth just one hundred and ten millions of dollars. It is a fact all the same, however. It is not the rate of profit made, but the capability to handle large capital that makes the money. There are thousands of men that can well handle a few thousands of dollars, a reduced number who can take care of the hundreds of thousands, and but very few who can in the same way handle the millions. If the man who made the \$110,000,000 in a life time left all to a son 21 years of age, at his death, who could handle the wealth as the father had done, and so on, three or four generations there would be one man who would own the world, and be in a position to drive, in a court of law, all others off the face of the earth.

The governments and political parties of the eastern provinces are shaken to the foundation over suitable legislation to enforce prohibition. It is not worth a continental. The Dominion government controls the manufacture, so a man can get a Dominion licence to make the "craythur" anywhere in Canada, even in the most prohibited localities. The only cure for intemperance is education as to its evils. When mankind is convinced it is a mistake to drink alcoholic liquors they will quit drinking, and then temperance will follow without legislation to enforce it. A man is not honest who is prevented from stealing through fear of the law; neither will intemperate men become temperate through prohibitive legislation as long as liquor is made and to be had.

Dr. Dowie, the faith healer of Chicago, is up to his neck in trouble. According to a publication he publishes, there is no necessity for "Christ coming to Chicago" for he is there, and he owns a lace factory and other property valued at about \$10,000,000. Of course to begin with all this ownership is very Christ like. However, a brother-in-law accuses him in the courts of having wheedled him out of \$100,000 for the lace factory. The courts have decided the "Dr's" Christ like action did deceive the brother-in-law. They have appointed a receiver for the estate until claimants are paid the money fraudulently taken from them.

The Nelson Tribune says that if the Crow's Nest Coal company would reduce the price, the smelters would get cheaper coke. In turn the Nelson Miner says that if the C. P. R. would reduce its freights the same end would be secured. As it is generally believed the C. P. R. and the Crow's Nest Coal Co. own or nearly own the two papers, an explanation for the tit-for-tat argument can be easily understood. It seems to us that if both companies made a reduction it would greatly benefit the country and do away with the argument.

City Council.

Met Monday evening, the Mayor and Alds. Jalland, Brown and Stein were present.

COMMUNICATIONS

From E. M. Sandilands re insurance, laid over.

From deputy provincial secretary re appointments, filed.

From R. F. Green saying he would endeavor to get the government to pay over balance of \$435 claimed on the city hall.

Estimate of school trustees read and filed.

Chief Waite reported collecting \$16 of a dog tax, also \$70 in fines.

Finance committee recommended payment of following school accounts:

Cameron, coal.....	\$ 22 50
Walter Cliffe.....	15 00
Miss Dalby.....	50 00
Mr. Lovering.....	85 00
	172 50

The new trustees (?) estimate is as follows:

Principal, Jan. and Feb.....	\$ 170
Assistant " ".....	100
Janitor, two months.....	30
One man, ten months.....	1000
Coal, one year.....	100
Water installation.....	25
Contingencies.....	100
Insurance.....	50
	\$ 1575

The finance committee passed these bills and they were ordered paid:

Waite, salary for Jan.....	\$100 00
C. E. Lyons, do.....	60 00
H. Byers & Co.....	9 50
Paystreak.....	31 20
Cameron, coal.....	15 00
Post office.....	3 00
B. C. Gazette.....	2 50
M. L. Grimmett.....	165 00
Water and Light.....	130 35
Geo. Waite, feed.....	25 88
Hospital.....	50 00
Nickershaw.....	22 50
	\$ 452 93

ASHNOLA!

A CITY OF WONDER, PROGRESS AND PROSPERITY.

The Smelting Centre of the Similkameen Valley. Backed by the payrolls of two gigantic coal companies and the Copper and Kennedy mountain mines.

Surrounded by the following resources, coal, gold, copper, silver and fine agricultural countrys. Large herds of cattle, fruit in abundance with a climate almost southern and all that could be asked.

Ashnola is owned and backed by the payroll of the Similkameen Valley Coal Company, Limited, which is a guarantee in itself of its success. The equipment and development of their coal mines, installing of water, electric light and power plants are already arranged for. The development of the Ashnola Coal Company's mines by the Toronto capitalists who have established their payroll at Ashnola, make it the coming city of the interior of British Columbia.

Lots in Ashnola are Safe Investments.

In blocks 1 to 4 and 13 to 20 the price will be advanced 25 per cent per month until May 1st, 1902, and 10 per cent in the remaining blocks. The present price is from \$50 to \$225, 25 per cent cash, 3, 6 and 9 months without interest.

Arrangements are already completed for 38 buildings, including cottages for the employees of the company at Ashnola. This work will be under full headway by May 1st. The company's stock is now selling at \$1, 10 per cent down, balance in 9 equal payments.

On and after February 15th the company's stock will be withdrawn from the market in British Columbia. Four years ago the Crows Nest shares could be bought and were sold at 11 cents. Today they are quoted at \$80. With the advent of transportation Similkameen Valley coal can be delivered at any point in West Kootenay or Yale as cheap as any other company in Canada. For further information apply to

Dominion of Canada.

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the North-West Territories, and the Yukon Territory.

COAL.

Coal lands may be purchased at \$10.00 per acre for soft coal, and \$20.00 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at such rates as may from time to time be specified by order in council shall be collected on the gross output.

QUARTZ.

Persons of eighteen years and over and joint stock companies holding free miner's certificates may obtain entry for a mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of \$10.00 per annum for an individual, and from \$50.00 to \$100.00 per annum for a company, according to capital.

A free miner having discovered mineral in place may locate a claim 150 x 1500 feet by marking out the same with two legal posts, bearing location notices, one at each end on the line of the lode or vein.

The claim shall be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is \$5.00.

At least \$100.00 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When \$500.00 has been expended or paid the locator may, upon having a survey made and upon complying with other requirements, purchase the land at \$1.00 per acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory of an area not exceeding 100 acres.

The patent for a mining location shall provide for the payment of royalty on the sales not exceeding five per cent.

PLACER MINING, MANITOBA, AND THE N. W. T., EXCEPTING THE YUKON TERRITORY.

Placer mining claims generally are 100 feet square; entry fee \$5.00 renewable yearly. On the North Saskatchewan river claims are either bar or bench, the former being 100 feet long and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 1,000 feet. Where steam power is used, claims 200 feet wide may be obtained.

DREDGING IN THE RIVERS OF MANITOBA AND THE N. W. T., EXCEPTING THE YUKON TERRITORY.

A free miner may obtain only two leases of five miles each for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The lessee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have, or who may receive entries for bar diggings or bench claims, except on the Saskatchewan river, where the lessee may dredge to high water mark on each alternate leasehold.

The lessee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease one dredge for each fifteen miles or fraction is sufficient. Rental \$10.00 per annum for each mile of river leased. Royalty at the rate of two and a half per cent collected on the output after it exceeds \$10,000.00.

DREDGING IN THE YUKON TERRITORY.

Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The lessee's right is confined to the submerged bed or bars in the river below low water mark, that boundary to be fixed by its position on the 1st day of August in the year of the date of the lease.

The lessee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental, \$100.00 per mile for first year, and \$10.00 per mile for each subsequent year. Royalty, ten per cent on the output in excess of \$15,000.00.

PLACER MINING IN THE YUKON TERRITORY.

Creek, gulch, river and hill claims shall not exceed 250 feet in length, measured on the base line or general direction of the creek or gulch, the width being from 1,000 to 2,000 feet. All other placer claims shall be 250 feet square.

Claims are marked by two legal posts, one at each end, bearing notices. Entry must be obtained within ten days if the claim is within ten miles of mining recorder's office. One extra day allowed for each additional ten miles or fraction.

The person or company staking a claim, and each person in his or its employment, except house servants, must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim 1,000 feet in length, and if the party consist of two, 1,500 feet altogether, on the output of which no royalty shall be charged, the rest of the party ordinary claims only.

Entry fee is \$15.00. Royalty at the rate of five per cent charged on the gross output of the claim, with the exception of an annual exemption of \$5,000.00.

No free miner shall receive a grant of more than one mining claim for each separate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners, not exceeding ten in number, may work their claims in partnership, by filing notice and paying fee of \$2.00. A claim may be abandoned and another obtained on the same creek, gulch or river, by giving notice and paying fee.

Work must be done on a claim each year to the value of at least \$200.00, or in lieu of work payment may be made to the mining recorder each year for the first three years of \$200.00 and after that \$400.00 for each year.

A certificate that work has been done or fee paid must be obtained each year; if not, the claim shall be deemed to be abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made, and publishing notices in the Yukon Official Gazette.

HYDRAULIC MINING, YUKON TERRITORY.

Locations suitable for hydraulic mining, having a frontage of from one to five miles, and a depth of one mile or more may be leased for twenty years, providing the ground has been prospected by the applicant or his agent; is found to be unsuitable for placer mining; and does not include within its boundaries any mining claims already granted. A rental of \$150.00 for each mile of frontage, and a royalty of five per cent on the gross output, less an annual exemption of \$25,000, are charged. Operations must be commenced within one year from the date of the lease, and not less than \$5,000.00 must be expended annually. The lease excludes all base metals, quartz and coal, and provides for the withdrawal of unoperated land for agricultural or building purposes.

PETROLEUM.

All unappropriated Dominion lands shall, after the first of July, 1901, be open to prospecting for petroleum. Should the prospector discover oil in paying quantities he may acquire 640 of available land, including and surrounding his discovery, at the rate of \$1.00 an acre, subject to royalty at such rate as may be specified by order in council.

The Canadian Northwest HOMESTEAD REGULATIONS.

Any even numbered section of Dominion Lands in Manitoba or Northwest Territories, excepting 8 and 26, which has not been homesteaded, reserved to provide wood lots for settlers, or for other purposes, may be homesteaded upon by any person who is the solehead of a family, of any male over 18 years, to the extent of one quarter section of 160 acres, more or less.

ENTRY.

Entry may be made personally at the local land-office for the district in which the land to be taken is situate, or if the homesteader desires, he may, on application to the Minister of the Interior, Ottawa, the Commissioner of Immigration, Winnipeg, or the Local Agent for the district in which the land is situate, receive authority for some one to make entry for him. A fee of \$10 is charged for ordinary homestead entry.

HOMESTEAD DUTIES.

Under the present law homestead duties must be formed in one of the following ways, namely:

(1) By at least six months, residence upon and cultivation of the land in each year during the term of three years;

(2) If the father or the mother (if the father is deceased) or any person who is eligible to make a homestead entry, resides upon a farm in the vicinity of the land entered for by such person as a homestead, the requirements of the law as to residence prior to obtaining patent may be satisfied by such person residing with the father or mother.

(3) If a settler has obtained a patent for his first homestead, on a certificate for the issue of such patent countersigned in the manner prescribed in the Dominion Lands Act, and has obtained entry for a second homestead, the requirements of this Act as to residence prior to obtaining patent may be satisfied by residence on the first homestead.

(4) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements of the law as to residence may be satisfied by residence upon the said land.

APPLICATION FOR PATENTS.

Should be made at the end of three years, before the Local Agent, Sub-Agent or the Homestead Inspector. Before making application for the patent the settler must give six month's notice in writing to the Commissioner of Dominion Lands at Ottawa of his intention to do so.

INFORMATION.

New-arrived immigrants will receive at the Immigration Office at Winnipeg, or at any Dominion Lands Office in Manitoba or the Northwest Territories information as to the lands that are open for entry, and from the officers in charge, free of expense, advice and assistance in securing lands to suit them; and full information respecting the land, timber, coal and mineral laws, as well as respecting Dominion Lands in the Railway Belt in British Columbia may be obtained upon application to the Secretary at the Department of the Interior, Ottawa; the Commissioner of Immigration, Winnipeg, Manitoba, or to any of the Dominion Lands Agents in Manitoba or the Northwest Territories.

JAMES A. SMART,

Deputy Minister of the Interior.

N. B.—In addition to Free Grant Lands to which the Regulations above stated refer, thousands of acres of most desirable lands are available for lease or purchase from railroad or any other corporations and private firms in Western Canada.
