Govt Library

The Mining Review.

VOL. 5.—NO. 2. SANDON, B. C., SATURDAY, JUNE 29, 1901. $2.00 PER YEAR.

THE LOCAL BUDGET.

This must have been a wet moon.

Nakusp will celebrate Dominion Day.

J. P. Martin, manager of the Slocan cigar factory, left last Monday on a business trip to the Lardeau.

Mr. Pitts has sold the remnants of his clothing stock to Rossland parties, who have moved it over there.

Martin Clair, well known in the Slocan, was suffocated by gas in a mine near Dawson the other day.

It is not improbable Mr. Ransom will be appointed book-keeper at the Payne, though there is nothing certain yet.

Probably 40 Sandon people all told went over to the Slocan to take in the holiday sports over there this week.

Miss Sophie Vallance, who has been the guest of Mr. and Mrs. Jas. Vallance, for about six weeks, left on Tuesday for Vancouver.

Mr. Gintzberger, of the Monitor Mine, Three Forks, was in town the other day on crutches. Cause: a broken tendon in one leg. He is building a fine new residence at the Forks.

The Dominion government have now the Assay Office in Vancouver, and in future a large quantity of the gold shipped from the Klondike will be taken to that port. Heretofore the bulk of it went to Seattle.

Ira W. Black, an old timer of Sandon, but now in the hotel business in the Boundary, was in town the first of the week. He built the old Reco hotel, which was first called Black's, and sold it later to J. M. Harris, who changed it to the Reco.

The C.P.R. are selling tickets to Cincinnati, Ohio, and return, July 1st, 2nd and 3rd, for $74.10, and to Detroit and return, July 2nd and 3rd, $76.85; good for two months. There will also be an excursion to San Francisco, July 13th, 14th and 15th, rate $50.95.

Madame Camilla Urso, one of the best violinists living, appears in the Miners' Union hall on Monday evening. She has with her a Miss Helen Hall, vocalist, and Miss Sheldon Pearce, pianist. From the press notices to hand, it is quite evident this concert has never been equaled in this city by any other performers.

Dominion Day.

Camilla Urso,

—THE—

Grand Concert Recital

—AT THE—

MINERS' UNION HALL,

—ON—

Monday, July 1st,

AT 8:30 SHARP.

Reserved Seats at Donaldson's Store.

Mike Kerlin has purchased D. P. Kane's residence in Kaslo and will reside there in future.

A number of Sandon people intend taking in the Nelson celebration next Monday and Tuesday.

Alex. Crawford has the contracts for packing supplies to the Canadian group, Trade Dollar and Mountain Con mines.

Don't forget the concert in the Miners' Union hall next Monday evening. It promises to be one of the best ever held in Sandon.

A social will be held in the Reading Room shortly, the proceeds of which will be used in furnishing periodicals and other literature for that institution.

The Sandon baseball team will play a game of ball with the Kaslo club tomorrow and will then proceed to Nelson to enter the tournament there on July 1st and 2nd.

The new law increasing the extent of placer mining location in the Atlin district, B. C., goes into effect about July 1st of this year. It permits the location of claims 250 feet.

Col. Brayton says that 12 miles of the Crawford Bay railway will be built shortly and that trains will be running next fall, and when the line is completed to Fort Steele it will be 76 miles in length.

The city schools closed yesterday until the 11th of August. A most successful closing was held in each department showing that Mr. Lovering and Miss English have put in most diligent and effectual work the past six months. It now becomes the duty of parents to see that all children of school age attend on August 11th, and regularly that the best results may follow.

Young Sandiford, of New Denver, while returning from the Slocan sports last Wednesday afternoon on the C.P.R. steamboat, was leaning over the deck-rail when he lost his balance and toppled over into the lake. A life preserver was immediately thrown out to him and with the aid of Russ Thompson, who happened to be near by in a canoe, he was pulled out none the worse of the incident beyond a good ducking.

Frank Lowes received the distressing news on Monday from Tim Lane, that his brother John, who left here for Dawson some time ago, was drowned between Skagway and Dawson on the 18th. Nothing further will be known of the incident until a letter is received. The deceased was an old timer of this district, having lived for some time at Three Forks, Slocan and other places.

John Daly, who has been book-keeper at the Payne for five years or more, severs his connection with that institution, for a time at least, tomorrow. John is a very popular fellow, and he has friends by the legion, who will be glad of his success wherever he goes. We understand he is pretty well healed as far as mining interests go, and under the circumstances he will be quite busy here for a time anyway looking after these.

The Sandon football team were defeated in a friendly game with Slocan by a score of 3 to 2 in the sports at that city on Tuesday. The boys claim the referee of the match was very unfair, and towards the end his partiality became so glaring that he was replaced by a more reliable man. While the match was in progress a heavy shower of rain came down, which drenched the players to the skin, but the game continued throughout the downpour to allow time for baseball between New Denver and Slocan. This football match was not for the cup and medals; the boys expect to play for them on July 12th, when with a fair field and no favor, they feel confident of carrying home the prizes. In the athletic sports Jack Gusty carried of about $40 and C. Brett $20 of the prizes offered.

At the Mountain Con.

H. C. Riehle, M. E., has just commenced extensive exploiting work on the Mountain Con with 16 men, for the new English company who purchased it some months ago. The workings on the property so far are three tunnels on the lead, in respectively 33, 89 and 211 feet, with one upraise and a back stope. Ore more or less pockety so far has been encountered in the two upper tunnels. It is not the intention of the company to do any extensive mining this year, but merely development and prospecting work to enable them as far as possible to ascertain the capabilities of the property.

Mr. Riehle has had an extensive and varied experience in mining as a business, having spent some time in placer mines in California, and miscellaneous quartz properties in Norway. Besides this he has been in many of the mines of Africa and Europe, handling machinery for manufacturers. He says two things strike him forcibly in this country—the quietness and orderliness of the camps and the superior way in which the men are treated. In all cases the board is better than anything he has ever seen before.

After a thorough exploiting of the property has been gone through with, a complete report will be sent to the company, upon which will doubtless depend their future course of action.

A Pleasant Surprise.

George W. Grimmett, a well known business man of Sandon, and Miss Kate Almira Brooks, of Winnipeg, Man,, were quietly married yesterday afternoon at the residence of Melville Parry. The ceremony was performed by Rev. J. H. White, and immediately after it was over the happy couple left for their home in Sandon, going by way of Kaslo. —Nelson Tribune.

And thus it is that G. W., who used to be considered invincible, has succumbed to the darts of little Cupid. Cupid did his work well, as no one in town, save G. W. himself, knew of "the change of heart" until the arrival of the K. & S. on Thursday. All the same, however, the whole city wishes Mr. and Mrs. Grimmett all the happiness of wedded bliss.

Want a Commission.

Some of our exchanges are advocating the appointing of a commission composed of miners and mine owners to look into the mining laws of the country, and see if some changes cannot be made that will help the country out of its present difficulties. But what is the use of all that. The first thing necessary is to blow the brains, or at least the heads off some of our representatives, and teach the electors to select men of common sense in their places. As our representation stands at present, if the necessary changes were made in our laws tomorrow, troublesome acts would only be passed the next day to corral the labor vote of the country again. There is scarcely a man in the country who will deny that if the laws were now as they were four years ago, every mine in the country would be working; the miners of the country would be all employed, and the business people would be making some money. The laws were changed at the suggestion of the political tinkers of the country, and if re-established would be changed again by the men who changed them before, if placed in position to do it. No; there is no use in tinkering even with the present laws until the country has some assurance the people will elect representatives who "will let very well alone."

MINING NEWS

David Ferguson is now assaying for the Payne mine.

The Hartney and the Bosun mines at New Denver keep shipping steadily.

The Hewett and the Emily Edith are principal mines working at Silverton.

The Last Chance Mining Co. will hold their annual meeting some time in July.

The Urban Mining Co. are applying for crown gants for the Donnelly group.

Ore shipments for the week were: Slocan Star, 126 tons; American Boy, 40.

The American Boy shipments for the month to the Nelson smelter were 160 tons.

So large has the business of the Rambler-Cariboo mine at McGuigan grown, that they find it necessary to build a concentrator.

It is rumored the silver-lead mines of the Slocan have combined, and will establish agents in the principal markets to handle their output.

F. P. O'Neil, of Spokane, is in the city for the purpose of opening up the Chicago mine, which adjoins the Freddie Lee. He was one of the locators of the Ruth.

The mine owners had a meeting in Nelson yesterday. H. B. Alexander, Geo. Hughes and David Heap, all of Sandon, and Dr. Hendryx, of Los Angeles, Cal., were in attendance.

The St. Eugene at Moyie is to close down for an indefinite period. The mine for some time has been shipping its concentrates to Belgium for smelting and refining, but this is found to be too expensive for operations.

W. H. Brandon has let a contract for 200 feet of tunneling in the lower workings of the Canadian group. Some 600 feet of work has been done in this level since the property was first opened up. Timbering will be done in the old workings where needed.

Wm. Karr has just finished assessment on his claims, the Maple Leaf group, on Lemon creek. The property is a gold one. He has done 40 feet of tunneling on two of the claims, and on the lower ledge he found the ore continuous. The property is situated near the Cameronian.

The Monitor at Three Forks has done no shipping since rawhiding. It has, however, some 20 men stoping, and now has a complete wagon road finished. This will enable the mine to ship summer as well as winter, and even cheaper in the summer. One strange feature of this valuable mine is that it carries a gold value often as high as $27 to the ton, the gold being found, not in quartz as is the usual order, but in the galena and carbonates. This mine will now be a regular shipper.

Certificates of Improvements.

NOTICE.

Daniel, Gordon, Galt, Donnelly and Crawford Fractional Mineral Claims.

Situate in the Slocan Mining Division of West Kootenay District. Where located: adjoining the City of Sandon on the North West.

Take notice that the Urban Mining Company Limited, Non-Personal Liability, Free Miner's Certificate No. B 52337, intends 60 days from the date hereof, to apply to the Mining Recorder for Certificates of Improvements, for the purpose of obtaining a Crown Grant of each of the above claims.

And further take notice that action under Section 37 must be commenced before the issuance of such Certificates of Improvements.

Dated this 28th day of June, 1901.

THE URBAN MINING COMPANY, Limited, NON-PERSONAL LIABILITY.

PITIFUL CASE OF A LITTLE GIRL.

Child at the Age of two a Crippled Victim of Disease.

Edna Rathburn, of Hampstead, N. B., fell and broke two ribs—Injured the Kidneys and Diabetes Developed—Dodd's Kidney Pills in curing the Kidneys straightened injured spine.

Hampstead, N.B., June 10.—Special.—Little Edna Rathburn of this place has had a sad experience for a child so young. She is now nearly eleven years old. Eight of her few short years have been passed under the saddest cloud possible in life.

At the age of two the child met with an accident which left her with two ribs broken, split off at the back bone. Though they were set and healed her little body did not straighten. For eight years she could hardly walk, being almost doubled up. The accident affected her Kidneys and Diabetes set in. Diabetes is a particularly dangerous form of Kidney trouble, in this case particularly severe by nature of injuries to the spine.

The family doctor was, of course, consulted. He diagnosed her case correctly, but couldn't cure it. She was sent to the Public Hospital at St. John, in the hopes that the greater skill and facilities there would avail. They could do nothing for her. The authorities advised the mother to take the child home to nurse her and give her good care while she lived, which would not be very long.

The suffering of the little one was heart-rending to the mother and friends. She cried with pain night and day. The mother grew desperate and determined she would find a cure for her child if it took every cent she possessed.

She saw Dodd's Kidney Pills advertised and immediately purchased some. From the first they were beneficial. The little girl commenced to get better. Every day saw an improvement. Dodd's Kidney Pills were doing the work. Six boxes in all were used and once more Diabetes was conquered.

Not only that but with the return of health the spine commenced to straighten. The little girl is now almost physically perfect. Says the grateful mother in her own words: "There is nothing to be compared to Dodd's Kidney Pills. We thank God we heard of them. Edna is now full of color, runs and plays about as smart as a whip, where once she was a puny little thing as pale as a ghost."

WHEN IT CHANGED.

An old Yorkshire artisan persuaded his wife to move out of town, where rents were high, to a neighbouring village, where a roomy cottage was to be had for three shillings a week.

But there was one unlooked-for drawback to the new dwelling. Standing as it did on the top of a steep hill, it was exposed to every blast that blew, and the good wife was often seriously hampered when working in the backyard, by winds that nearly took her off her feet.

They had not been there many days before the artisan, who had made light of his wife's troubles, asked for a clean collar.

Ah, can't lay my hands on one just now, said the old lady, methodically pouring out a cup of tea. Tha'll hev to wait till t'wind is in t'east.

Her husband stared at her queerly. Th'art talkin' some funny stuff, lass he said, fearing for her sanity, What's amiss, eh?

Nowt to make a song abart, she answered with studied calmness, only thy clean collars hev blown off t' clothes line into t'valley. But neer need; when t'wind changes happen they'll blow back again!

They returned to town very shortly after that.

Western Australia has in York a well-known pastoral district which bears a peculiarly appropriate name in association with the visit to Australia of the Duke and Duchess of Cornwall and York. It was first peopled by immigrants mainly from Yorkshire.

CANADIANS IN WEST AFRICA.

Major W. C. Heneker and the Officers of the Third West African Force Enjoying a Meal After a Hard Day's March.

The West African expedition now progressing towards Benin City is of especial interest to Canadians, because its commanding officer, Major Heneker, is a Canadian son of Mr. R. W. Heneker, of Sherbrooke, Que., and the transport officer is Lieut. W. F. W. Carstairs, formerly a captain in the 56th Prescott Battalion Canadian militia. The expedition started from Old Calabar for Benin City early in February, and had, up to recent advices, a very hard time of it. Lieut. Carstairs, under date of Immertermiga, March 25, said: "For the past two weeks it has been fight, fight, fight, every day, but we have wiped the enemy out or nearly so. I was wounded on the 20th inst. in the right forearm and left leg, but am happy to say, that I am fast recovering." In another letter from Ekisiga, on February 14, Captain Carstairs, said: "We have just captured this town of about 30,000 or 40,000, without a single casualty. We expect to add at least 4,000,000 people to the empire in this expedition."

The scene of the above illustration is laid in the Ubiom country to the north of Opobo, in Southern Nigeria. A truculent tribe had closed the mail route, and threatened to kill any white men and soldiers who appeared. Major Heneker was ordered to take two companies, one seven-pounder, one Maxim, and one rocket tube, and to proceed to the place, and there bring the tribe to its proper state of submission. This was achieved with twenty casualties only, after twelve towns had been attacked and destroyed.

While not as exciting in the way of sensational incidents as Sir Frederick Hodgson's journey to the coast from the Ashanti capital, this expedition, in which Canadians have figured so prominently, has been of great value to the Empire, and proves once more how capable the Sons of the Maple are to do any work that they may be called upon to do in behalf of the flag and the extension of the Empire.

AN ENGINEERING NOVELTY.

An interesting engineering feat was accomplished recently in Redheugh Bridge, between Newcastle and Gateshead, England. A new bridge was built in exactly the same position as an old one while traffic went on uninterruptedly. New piers were erected round about the old ones, and spans and a roadway built a little above and 4½ ft. to one side of the old roadway; then the old piers and roadway were removed, the new roadway lowered into position, and the work of moving it into place was accomplished. The weight moved, 1,600 tons, was pushed over by hydraulic jacks exerting a pressure of 1,500 lbs. to the square inch.

Cheap round trip rate between St. Paul, Minn., and the Pacific coast.

On July 6th the Northern Pacific Ry. will place in effect a low first-class round trip rate of $45.00 from eastern terminals to Seattle, Tacoma and Portland. Dates of sale at eastern terminals will be from July 6th to July 12th inclusive, and the final limit for return will be Aug. 31st, 1901. Destination must be reached not later than July 18th, stopovers being allowed IN EITHER DIRECTION within the transit limits.

This offers an unsurpassed opportunity for those desiring to hunt new homes and farms to go into the northwest and look over the country, or for those wishing to visit relatives or friends or to make pleasure trips, to do so.

Eight British brewers turn out over a million barrels each in the year.

When you write to an advertiser tell him that you saw his advertisement in this paper. It is to your interest to do so, as Our Folks are treated honestly and served with the best.

AGENTS WANTED—TWENTY DOLLARS a week—Regular customers; freight charges prepaid; outfit free or returnable; no capital required; exclusive territory. G. Marshall & Co, tea importers, London, Ont.

FOR SALE.—A fine hundred acre farm in Huron county, near Goderich. Good buildings, good fences, well watered and underdrained, large orchard, no waste land, with or without this season's crop. Apply, WM. GOULD, Goderich, Ont.

LOSS OF SHEEP IN AUSTRALIA.

The Australasian Banking Record gives some extraordinary figures relating to sheep raising in Australia. It appears that during the past eight years the stock of sheep in the Australian Federation has diminished from 124,500,000 to less than 93,000,000 an dthat it is now probably less owing to the destruction by fire of the Queensland pasture last year. At the end of 1899 there were, according to Government returns, 15,226,479 sheep in Queensland; and the number is now estimated at only a little more than half. But for the advance in the price of wool owing to the South African War and other causes, it is said that bankruptcy must have overtaken the squatters and sheep raisers; and the damage to the industry must in any case take years to repair. The same number of the Record which gives the figures of the losses of sheep state that the indebtedness of Australian population to the banks is now about $25 per head, which is in addition to the public debts, amounting to nearly $200 per head.

A CAGE FULL OF PRISONERS.

A very sensational murder trial is now being heard at Palermo, Italy. The accused are fifty-one in number, and they are arraigned for a whole series of murders and other crimes. Many known participators have not yet been captured. One of the alleged crimes is the wholesale suppression of entire families in order to avoid discovery. Among the crimes, a wealthy young English lady was seized and held to ransom of 80,000 francs, which was paid by her relatives. Disputes over the division of the booty led to many murders among the criminals. The Assize Court presents an extraordinary spectacle. It is filled with soldiers, in order to resist any attempt at rescue, and the accused, who are too numerous to be placed in the dock, are enclosed in a huge iron cage. The trial is expected to last some days.

Western Australia's aborigines, notwithstanding many years of missionary work, are, with the exception of fifty-one, returned as pagans.

South Australia holds the best honey record of the colonies, nearly 250,000 lbs. being produced in one year alone.

HALL & RUCKEL, Montreal.

PULLS TEETH WITH HIS FINGERS.

The Chinese Plan Far Superior to the Forceps, Says a Dentist.

Dr. Charles E. Coughlin, of Indianapolis, has discarded the forceps in pulling teeth, and has adopted the primitive rules of the Chinese by using nothing except his thumb and index finger for the purpose. He believes that the sight of the forceps constitutes the harrowing part of tooth pulling and that many nervous persons are almost as shocked at the sight of the instrument as they would be if a cocked revolver were presented at their heads. He can take out the most firmly-rooted double tooth in a few seconds, and that without causing pain, comparatively speaking.

"It is all done with the thumb and forefinger of the right hand," he said, "and does not require any great strength, for it is not performed by main force.

"In pulling a tooth by hand, it is first worked around with a gentle motion, and there is absolutely no violent wrenching or tugging. In a surprisingly short time the largest and most firmly-rooted molar will show evidences of being loosened. The motion is then continued with an increased pressure outward from the pivot of the tooth, as it were, until it seems actually to come out of its own accord. It is brought out with a final circular twist, not more violent than the gentle working which is required to loosen it, and it is all over before the patient realizes that his tooth is being extracted.

"It is ridiculously easy when you have got the hang of it. The tooth always comes out, and my patients testify, that it is a comparatively painless process, the movement of the tooth being so gradual as not to produce any shock even to the most nervous person.

"I learned the process from a Chinese practitioner. It has been practised by the Chinese from time immemorial. Our method seems as crude and as barbarous to them as theirs seems antiquated to us.

"In many cases we are getting too far away from nature with our complicated apparatus and highly scientific way of going at things, and I have found that extracting teeth by hand is not only better for the patient, but also for the practitioner, for a man of sympathy must necessarily feel some of the horrror caused by the forceps in an extremely nervous person, and just to the extent that he is unnerved he is incompetent to perform his duty well."

WHY SHE WAS SO ANXIOUS.

The other day a party were on a boating excursion at Hastings, England, and by some accident the boat suddenly upset to the great distress of the people on shore.

One old lady surpassed all the others in her appeals to the crowd to render assistance, and she seemed to be particularly anxious about "the young man with the red hair."

Her appeal was heeded and the young man, was brought safely to shore. The onlookers congratulated the old lady on her rescue of her son, but she said he was not her son.

Your nephew, then?

No; he don't be any relation of mine. But he happens to owe me a matter of 17s. 6d. for board and lodgings!

PRISONS WITHOUT WALLS.

ODD EXPERIMENTS AND PRACTICES IN CONVICT HOTELS.

Possible to Keep Convicts Without Bars and Bolts—Strangest Prison in the World—Prison for First-Class Misdemeanants Only.

When a convict bolted from one of the old-fashioned convict settlements in Australia or Tasmania, all he could do was to take to the bush, where he probably starved, or died a lingering death of thirst. But the convict who manages to escape from an English prison, like Soar and King the other day from Borstal, may get to London, and possibly

NEVER BE CAUGHT AGAIN.

So strong walls and locked doors seem, at first sight, to be absolutely necessary to keep prisoners safe in victs, and not an escape was at- For all that, it has been found perfectly feasible to keep convicts in mere sheds and huts, sometimes even without bars and bolts, and to treat them very much like an ordinary gang of navvies.

When Borstal Prison was built, all the work was done by convict labour. Parties of convicts were sent from Chatham, a distance of four miles, in open vans. They were under escort, of course, but were unchained. Temporary huts were put up, and it was sixteen weeks before the buildings of the new prison were far enough advanced to accommodate the workers. Every bit of the work —from making the bricks to digging the foundations—was done by convicts, and not as escape was attempted.

The prison at Chattenden, near Upnor, on the Medway, was built in similar fashion, and a number of large ammunition magazines built by the same gangs, who were at the work for about ten years. Although the tramway on which these men travelled up and down from Chatham passed through thick woods,

WITH HEAVY UNDERGROWTH,

there were no attempts at escape.

Since these works have been finished, the convicts lodged in Borstal have been employed upon a fort at Luton, a mile from the prison, and the workers have been taken up and down a little narrow-gauge railway. The signals which have been put up to warn the warders of attempted escape are actually worked by good-conduct prisoners, who are entrusted with field-glasses,

One of the strangest prisons in the world is the Australian convict-prison at Fremantle: It has walls, the biggest perhaps of any prison in the world. They are granite, and seven feet through. But they are no longer needed for guarding the few tottering remnants of the once immense convict population which inhabited the place. When the Duke of Edinburgh visited Fremantle, the warders who went down to the wharf to meet him did not trouble to lock the gates behind them, and a few of the old convicts walked down after them, and then returned "home." There have been no new inmates of the Fremantle Gaol for many years and the old ones are all "lifers," who have been there so long that they know no other home. They potter about, and

CULTIVATE THEIR GARDENS.

and have altogether a much easier time than the average workhouse inmate.

Italy lately tried the experiment of settling about a thousand Anarchists and other undesirables upon the Island of Tremeti, in the Mediterranean. The attempt was a ghastly failure. Quarrels began, and throwing all their beautiful theories of humanity to the winds, the whole number entered upon a savage battle, which ended in the death of four, and serious injury to a large number of others.

Extreme experiments in prison reform are to be found in France. At a place called Jommelieres a kind of prison colony was started some years ago. The convicts lived in nice little houses. Each had his or her own garden. They kept poultry and pigeons, sold eggs, and anyone visiting the place could hardly have distinguished it from any other village. And yet it was found that abuses crept in. Liquor was sold on the sly. An official inquiry was held, and one fine day up drove a dozen prison-vans, and the whole colony returned to a securer prison;

Oak tables, surmounted with mirrors, and piled with papers and magazines, a conversation-room, a bathroom, a beautiful garden planted with shrubs—all these sound like

A HANDSOME CLUBHOUSE.

rather than anything else. They, and other luxuries, are, however, to be found, in the new Parisian Sante Prison, in the Pont Royal Boulevard. The Government is even going to supply a band during the summer months. The Sante Prison is a sort of glorified Holloway, and, needless to say, is only for first-class misdemeanants.

The inmates of the Finnish prison at Helsingfors are provided with what is practically a cheap and pleasant boarding-house. They may furnish their rooms as they like, buy what they like, go out when they like. The only restriction on their liberty is that they must sleep in prison, and that when they do move abroad they must be accompanied by a warder. The latter, however, dresses always in plain clothes, so the prisoners' social status does not suffer.

Games, besides work, are provided by the authorities of the Rauhshaus Juvenile Prison, at Hamburg. Music, mathematics, languages, and gymnastics are taught. The warders are practically schoolmasters, who live with the young convicts, and share their sports and work. There are twenty-five houses, standing in the middle of a beautifully-cultivated farm of a couple of hundred acres. No prisoner ever runs away from this

LUXURIOUS CONVICT HOME.

But it is, after all, to the United States that he who wishes to see how far prison reform can be carried should go. In Sing-Sing, the Dartmoor of America, cakes, sweets, and fruit may be sent in from outside: also newspapers. There is an excellent prison library provided with electric light. Carpets may be brought for the cells. And, though letters are read by the authorities, there is no limit to correspondence on the part of the prisoners.

But the world's record for luxury belongs to the Reformatory Prison at Concord, in the State of New Hampshire, where the prisoners have been allowed by the authorities to form a club. Admission to this is by ballot, and members can be expelled by a general meeting. The club gives evening-parties, which the prison authorities attend only by invitation. The prisoners wear correct evening-dress, white ties, and flowers in their buttonholes. There is a capital piano, and songs and music continue till eleven o'clock.

KEEPING BUTTER.

The delicious aroma of the well made, new butter is not a lasting property. We contend, therefore, that too much credit is given for this volatile property that to-day you have and to-morrow is gone, while comparatively too little is laid on those conditions which caused the product to stand right up to its merit through the time needed to reach the consumer. Keeping quality is certainly a high merit in butter, and we know of no good reason why it should not receive credit in scoring.

The British Postmaster-General, the Marquis of Londonderry, is essentially a man of method, a stickler for neatness and correctitude. If you could see him in his study, says a writer in the 'Universal Magazine," you would notice at a glance how methodical he is. Everything is in its proper place. There is no searching for pens, book-cutter, or letter-weight; all are within his reach. His lordship is a voracious newspaper reader, as a statesman should be who desires to keep abreast of all public movements.

Queensland has ten vessels for coast defence.

DON'T WAIT TOO LONG.

When You Get Hold of a Good Idea Push It Along.

Don't be too careful Thousands of fortunes are forfeited every year through excessive caution. "Nothing venture, nothing have' is the law of life. The man who waits too long gets left.

When in the autumn of 1899, the Boer commandoes swarmed into Natal and Cape Colony, they might have "swept the English into the sea." The few thousand British soldiers then in South Africa could not possibly have withstood their overwhelming numbers.

But the Boer is a cautious man. He waited to weigh his chances. Whilst he weighed they went. Buller, Roberts, and thousands of British soldiers poured into the defenceless country, and brother Boer had to make strategical movements Pretoriawards. His overcarefulness restrained him from dealing that early blow which might have changed the whole conduct of the war.

Contrast Lord Roberts' action after the convoy disaster at Sanna's Post when he found himself suddenly stranded with only a few biscuits per man. Heat, hunger and active enemy lay ahead of him, but a comparatively safe line of retreat was open in his rear.

Nine commanders out of ten would have flunked it and retreated. "Bobs" thought otherwise. To have retreated would have worked demoralization throughout his ranks, and imperilled the Army of Natal. He took the risk, fearful though it was, and triumphed.

The battle of life is continually repeating these lessons on a smaller scale with each one of us. Despite copy book maxims to the contrary, it is not the careful man who scores best. The prizes go to the dashing,

GO-AHEAD FELLOW

who flings old-fashioned conventionalities to the winds; who acts upon his ideas as soon as they mature, and before they get stale and out of date.

Do not confuse this with slapdash. It is better to be overcareful than a "slasher." The first man can generally make a competency, although he will never set the world on fire. The "slasher" usually ends in the workhouse or the lunatic asylum.

The great thing is to get right away from the notion that "to-morrow will do." That is a national Spanish proverb, and it is eminently descriptive of the characteristics which have placed proud Spain where she lies to-day. Learn to recognise your chance on sight; and, having recognised it, lose no time.

Do not "sleep upon it." That may have been a good plan for the early Victorians, but it won't do now. To-day the telegraph and telephone can forestall your idea in a few seconds. Therefore, having got your idea, start right away, and push it along.

"Ah! But suppose it is a mistaken idea, and I lose money over it," says the careful man. That sir, is where your carefulness must come in. Learn to be careful quickly. Treat your business puzzles not as mathematical problems to be pondered over for days, but as real things. With a little practice you will be surprised at the rapidity with which it is possible to weigh the pros and cons of all but the very deepest questions.

Of course you will have to take risks. Every man has to do. One of the most successful men of his generation, the late Prince Bismarck, held the most pronounced views on this matter. No one ever taxed the Iron Chancellor with rashness, yet he summed the whole philosophy of his life in these words:

"With dutiful trust in God, dig in the spurs and let Life like a wild horse, take you flying over hedge and ditch, resolved to break your neck, and yet fearless, inasmuch as you must at some time part from all that is dear to you on earth—though not forever."

New Zealand has so many rapid streams and rivers that their water might easily be utilized to supply motive-power for machinery.

Weak from Infancy

THE UNFORTUNATE CONDITION OF MISS ERNESTINE CLOUTIER.

As She Grew Older Her Troubles Became More Pronounced—Doctors Said Her Case Was One of General Debility, and Held Out Small Hope of Recovery—She is Now Well and Strong—A Lesson for Parents.

From the Telegraph, Quebec.

No discovery in medicine in modern times has done so much to bring back the rich glow of health and the natural activity of healthy young womanhood to weak and ailing girls as has Dr. Williams' Pink Pills. Girls delicate from childhood have used these pills with remarkably beneficial effects, and the cherished daughter of many a household has been transformed from a pale and sickly girl into a happy and robust condition by their use.

Among the many who have regained health and strength through the use of Dr. Williams' Pink Pills is Miss Ernestine Cloutier, the fifteen year old daughter of Mr. G. A. Cloutier, residing at No. 8 Lallemand street, Quebec city. Mr. Cloutier in an interview with a representative of the Telegraph gave the following account of his daughter's illness and recovery: "Almost from infancy my daughter had not enjoyed good health, her constitution being of a frail character. We did not pay much attention to her weakness as we thought that she would outgrow it. Unfortunately this was not the case, and as she grew older she became so weak that I got alarmed at her condition. For days at a time she was unable to take out of doors exercise: she became listless, her appetite failed her, and as time went on she could not stand without supporting herself against something and at times she would fall in a faint. I called in a doctor, but his medicine did not help her and she was growing weaker than ever. Another physician was then consulted who pronounced her case one of general debility, and gave me very little hope for her recovery. Some months ago while reading one of the daily papers I came across the case of a young woman cured by the use of Dr. Williams' Pink Pills, so I determined to give them a trial. After she had used about three boxes the color began to come back to her cheeks and she began to grow stronger. Greatly encouraged by this, she continued to use the pills for several months and now she is as well as any girl of her age. Her appetite is good and she has gained twenty-five pounds in weight. Dr. Williams' Pink Pills have built up her system and have made her healthy and active after doctors failed to benefit her. I believe that Dr. Williams' Pink Pills are the greatest known medicine for growing girls and I would advise their use in all cases similar to that of my daughter's."

Miss Cloutier's story should bring hope to many thousands of other young girls who suffer as she did. Those who are pale, lack akpetite, suffer from headache and palpitation of the heart, dizziness, or a feeling of constant weariness, will find renewed health and strength in the use of a few boxes of Dr. Williams' Pink Pills. Sold by all dealers or sent by mail, post paid at 50 cents box or six boxes for $2.50, by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

New South Wales has about 7,000 aborigines.

Tasmania, in proportion to its area, is the richest of Australasia's colonies in mineral wealth.

Victoria has nearly 500 public libraries, containing considerably over 1,000,000 books.

Tasmania instituted the colonial tabulation of the conjugal condition of the people as unmarried, married, widowed and divorced.

How do you like your new Chinese servant? So much! Why, he can do almost anything. Did you notice how sharp the carving knife was at dinner? Yes. Well, he used to sharpen the swords of the public executioner!

The Mining Review.

SATURDAY, JUNE 29, 1901.

CIVIC AFFAIRS.

The REVIEW has constantly shown that from the date of incorporation, civic matters have been handled too extravagantly all around, and for our trouble, we only aroused hostility. Aldermen got it into their heads that if a newspaper pointed out that some of their official acts were injudicious, that paper was an enemy of theirs and resolved on doing them personal injury. Of course, this is not the case, but it is hard to convince some people otherwise. All the facts have, however, now come to the surface. The truth is the place owes $8,500 and has about $2,500 of unpaid taxes against it; it is even worse off than that—it owes $15,000 of flume debentures, and the old flume for which the money was borrowed did not cost that money. But this is not all, there is absolutely no way for recovery while things are run as they are—big salaries and high expenses at every turn, to meet sentiments.

The situation is, the place has, and will have, revenues not exceeding $10000, and if the expenditures are not kept below these figures, it will only be going on from bad to worse. Our realty tax to depend on will not exceed $3,500 a year, liquor licenses $6,000, business licenses $250, and other revenues $250. Of this total, interest on debentures and sinking fund will consume $1,700 a year; water and light $1,800; fire department $500; public works $500; feed of city team $250; annual outlay on flume when extended $1,000; printing, stationery, postage and telegrams $300; hospital grant and medical attendance $300. This brings expentures to $6,351, and leaves but $650 a year for salaries, fuel and other incidental expenses.

Heretofore, and to the present, the council has been paying to an auditor, clerk, &c., 50 per cent. more than the work was worth, and observing but little regard for economy in the combination of other offices and incidentals. Looseness in these respects will bring even larger places than Sandon to grief.

Drawing on license or other revenues to come in next month to pay past due debt is like a sleeping man pulling up his blankets to cover his head, exposing his feet to the weather. All of the revenues of the next six months will be required to meet future expenses, so that this is as affairs stand, an absolute deficit and no possible means of providing for it.

We are advised that some members of the council knowing the cocked hat into which the financial standing of the place has been thrown, intend to apply to the provincial government for aid. While matters are as they are they might as well keep their breath for their porridge. In defiance of the explanation of some members of the council, who suggested safety for the flume, they wasted $1,000 on a structure that lasted a week, destroying another party's sidewalk, for which the corporation will have to pay some hundreds of dollars. They wilfully pay much more for salaries to inexperienced men than competent, experienced men can be got to do the work for; they vote $900 at one stroke for a "smallpox?" bill in violation of the law, and some of the members sit at the board with a full knowledge they are violating the law of the land. Others again take a declaration of office to work in the interest of the place, and keep nothing before them but the pleasure, not of sensible members, but the noisy members, of the Miners' union, whose tools they are. Does any sane man think the government dare throw money into a bottomless boot like that. There is now but one of two things to be done, either the people must elect as representatives fair minded men who respect the laws of the land and rigid economy in all departments, in the interest of the creditors, or the creditors must appoint a receiver. But one of the two things must be done, and the sooner a proper move is made the better for all concerned.

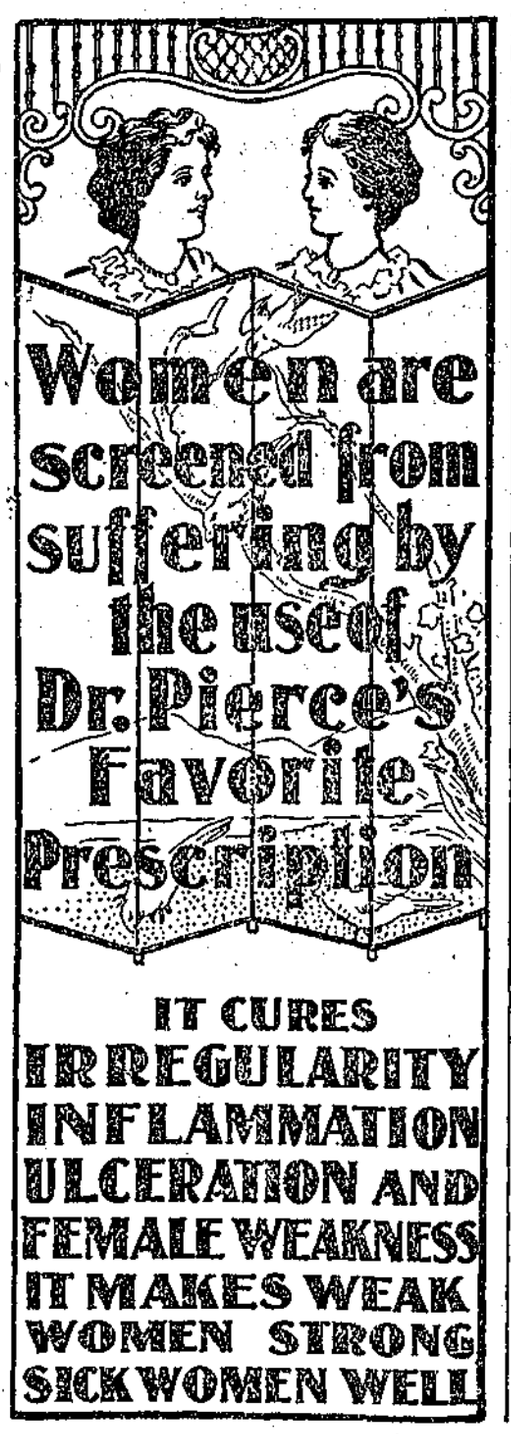
FOOD MEDICINE

Scott's emulsion of cod-liver oil is equally food and medicine.

A little of it sets the stomach at work on some easy food—that is medicine.

How does it "set the stomach at work?" By making strength: by creating strength: by turning the oil into body and life—that is food.

We'll send you a little to try, if you like.
SCOTT & BOWNE, Chemists, Toronto.



Houston is what a printer would call a double-leaded liar. He says the MINING REVIEW supported John Keen in the last election. In consequence of the plant being destroyed in the fire, the REVIEW during the last campaign never had a line on the contest, and only published a small sheet at an outside office to meet the requirements of the law on certain advertisements. Houston was elected as a Cotton man, and had he stayed as elected, his paper would be getting today even fewer advertisements than the MINING REVIEW. After election Houston flopped and became a Dunsmuirite. The government now pays him for flopping in advertising galore. The papers that were consistent and supported candidates in the contest who were Dunsmuirites are left out in the cold. Dunsmuir & Co. appear to have read the Bible saying "There is more joy in heaven over one sinner that repenteth than there is over ninety and nine just" persons. The papers of these parts that have remained consistent are ignored by Houston and Mr. Green apparently, and the rewards are paid to floppers. Supposing the MINING REVIEW did support Keen last year, Keen was a supporter of the Dunsmuir party that that the REVIEW now supports. The REVIEW is then consistent, and for its consistency it should have the government favors. Instead of that they are given to turncoat Houston, as a reward for his Jim Crow flopping.

We should not think any one would be very anxious to take a situation from our city council now. As we pointed out last week the liabilities now due are $7,872, with about $2,683 of assets, in back realty taxes. If $2,000 of this latter sum be taken for sinking fund there will be $683 left to pay $5,872 of debts. It will take every dollar that will come in from every possible source between now and January next, to pay back taxes, leaving not one cent to pay salaries or other expenses between now and January, which will run pretty well up to $5,200, including sinking fund and interest on debentures, to say nothing of rebuilding the flume and the Harris' sidewalk probably $300 more. If the flume be rebuilt, the liabilities will reach $8,000, and with nothing to meet them. The best thing all around is to place affairs in the hands of a receiver, and end the agony, as it will come to that in any event.

Houston is showing his teeth and declaring that the other unions of Nelson that are assisting the clerks in forcing the Thursday afternoon closing are doing a great injury to that city. We believe that coercion of every class is an injury to any place. When, however, a few months ago the miners were getting the help of business people to down the mine owners, coercion and even physical force were all right. The chickens are coming home on Houston's head fast and furious.

The Nelson Miner must be a very scurrilous print, as John Houston claims it has libeled him, and he is looking for damages. Any print that can damage John must be "a son of a——" What is it John, you are quite familiar with the expression, you used it in Tolmie's presence?

The Miner says Nelson is going to have the refinery, and J. P. Graves says he is going to build a smelter and refinery at Vancouver. Where will Kaslo's refinery come in at with things this way?

COMMUNICATION.

To the Editor of THE MINING REVIEW:

DEAR SIR;—I notice in the Ledge of the 19th inst. a communication written by the principal of New Denver public school re the recent High school entrance examination.

I have no inclination whatever to enter upon a newspaper controversy about the matter; but I deem it my duty to defend my pupils and myself against such misleading statements as Mr. Irvin's letter contains.

He says that Sandon school has had better advantages than Denver school. This may be true to a certain extent, it has had two teachers for some time; but if Mr. Irvin will stop to think for a minute he will see that Sandon school has also had many disadvantages.

A year ago last 1st of May the school in this city was burnt; and the pupils were really without a school until some time in October, when the new one was built, and even from then to the 1st of January, for some cause or other, the attendance was very small. This is a hard place for a teacher to show very good results, as the population is not all permanent. Half of the children that were attending Sandon school before the fire have left for other places such as New Denver, which is fortunate enough to possess a more favorable location, and better school facilities.

Mr. Irvin states that the ages of my pupils ranges from 15 to 17 years. Now this is not so, as two were 16, two 15, and one 13 years of age. The youngest being one of the successful pupils.

Last year three candidates for High school entrance wrote from New Denver; three from Sandon, and two from Three Forks. Out of the eight candidates only one was successful; this one being a pupil of mine from Three Forks; my other pupil obtaining 48 per cent.

This year the last mentioned pupil obtained 63 per cent., gaining 15 per cent. during the year. One of Mr. Irvin's pupils took 60 per cent. last year, and this year the same pupil took 67 per cent., gaining 7 per cent. during the year.

In regard to the insinuation that the principal of Denver school has cast upon my having seen the examination papers before the examination. I can only state that such a statement is utterly false and misleading, and without any foundation. If I had seen the papers, and wanted to act dishonestly, I can assure Mr. Irvin that all pupils would have passed, and with a much higher per centage.

But sir, my pupils passed honestly, not with any pre-knowledge of the questions on the examination papers, but rather by means of hard study on their part, and by my untiring efforts.

With me the interests of my pupils come first, my own second, and other matters last; and if teachers would take more interest in the welfare of their pupils, and less in other matters, they would probably meet with better success.

JAS. E. LOVERING.

The meeting of the Selkirk mine shareholders advertised for Monday, has been adjourned, as the stock was insufficiently represented.

FOR OVER FIFTY YEARS

Mrs. Winslows Soothing Syrup has been used by millions of mothers for their children when teething. If disturbed at night and broken in your rest by a sick child, suffering and crying with pain of cutting teeth. Send at once and get a bottle of "Mrs. Winslow's Soothing Syrup" for children teething. It will relieve the poor little sufferer immediately. Depend upon it, mothers, there is no mistake about it. It cures diarrhoea, regulates the stomach and bowels, cures Wind Colic, softens the gums and reduces Inflammation, and gives tone and energy to the system "Mrs. Winslow's Soothing Syrup" for children teething is pleasant to the taste and is the prescription of one of the oldest and best female physicians and nurses in the United States. Price 25c. a bottle. Sold by all druggists throughout the world. Be sure and ask for "Mrs. Winslow's Soothing Syrup."

HOUSEHOLD

ABOUT KEROSENE.

Kerosene might well be called the housekeeper's friend, for if it is used intelligently it is a great labor *lightener*, and may be used to good advantage in the house, kitchen or laundry. It is better than soap, ammonia, or alcohol for washing mirrors and window glass. Add a few drops to a pint of clear hot water and wash the glass without using soap. Then wipe with one dry cloth and polish with another, and the glass will be clear and bright. Kerosene is excellent for cleaning iron sinks, or zinc lined bath tubs. First dip a cloth in the oil, rub thoroughly over the surface, then scrub with hot suds. It is also good for cleaning oil cloth; dip a cloth in the oil and use the same as if using water. By this method of cleaning, the oil cloth will last longer and the colors are preserved.

But where it helps most of all is in the laundry, as it whitens the clothes and saves rubbing if used in the right way. The best results are obtained when the clothes are put to soak over night. It lessens the amount of rubbing that must be done the next day if the clothes are put to soak over night in luke warm water to which has been added a small quantity of household ammonia or of some trustworthy washing powder.

Clothes washed in the following manner are beautifully white and clean, and there is not the slightest odor of kerosene about them, as it soon evaporates in the open air. If the clothes have been put to soak over night the next morning put on a boiler of rain water and for every pailful used add one tablespoonful of kerosene and one of some soap powder. Stir well so the ingredients will be thoroughly mixed, and let the water boil before using the suds. Put the nice white clothes in the boiler without rubbing, and let boil 15 minutes, then take out, rinse in clear water, then in blueing water and they are ready to be starched. Rub the most soiled spots from table linen and clothing before putting in the boiler, using some of the hot suds for washing. The suds is excellent for washing the most soiled colored garments, but nice colored garments should always have clean suds prepared especially for them, and it is best to wash them separately from the regular weekly washing.

GREEN PEAS.

Ramekins of Green Peas: Cook the peas till tender, and season. Place a layer of rolled cracker into each ramekin, bits of butter and a teaspoon of the peas liquor, then add a layer of the cooked peas and bits of butter, continuing till they are full, and ending with the cracker crumbs Garnish by placing upon the top of each dish three stuffed olives, just before serving. Serve hot.

Creamed Green Peas: First cook the peas and season to taste. Into a frying pan put 1 teaspoon butter, and when hot add 1 teaspoon flour. Mix till perfectly smooth. Be careful it does not brown. Add 1 cup cream gradually, let it come to a boil, then add the peas, cover and heat thoroughly, serve hot.

Green Peas Salad with Pickled Butter Beans: Cook the beans till tender, and pickle, adding a little sugar to the vinegar. Cut into small pieces, and mix with well-seasoned cooked peas. A pint of beans to a pint of peas makes a good dish. Blend thoroughly with the following dressing: Beat 2 eggs well, add 1 teaspoon sugar, ½ teaspoon salt, the same of mustard, and 3 teaspoons vinegar and 1 tablespoon butter (melted). Stir constantly while on fire. Cook till creamy. If too thick, add cream to thin to desired consistency. Garnish with whole butter beans placed in points around the edge of salad dish.

Escalloped Green Peas with Egg Garnish: Prepare a cream dressing thus: One tablespoonful flour, 6 of melted butter, 1 cup milk, salt and pepper to taste. First mix the flour with a little cold milk, till smooth. Then add remainder of milk. Let

MAJOR-GEN. O'GRADY HALY
General Officer Commanding the Canadian Forces.

come to a boil. While warm, stir into this dressing 1 qt. cooked peas, adding butter the size of hen's egg. Place all into baking dish and bake 20 minutes in oven. Boil six eggs hard. When cold, cut into rings and place on top of escalloped peas before serving.

Cream of Peas Puree: Cook the peas with celery till both are tender. Remove celery and peas from the water and add a cream dressing as given for escalloped peas. Put the peas through strainer and add to the same. Serve very hot, with wafers.

WASHING SUMMER GOWNS.

So many pretty light flannels and thin woolen fabrics are now offered for sale in stores that all women possess one or more gowns of these and mothers find them very useful throughout the summer for children's wear. The only objection to them is the difficulty in getting them washed without drawing up and fading, which is the fate of such articles entrusted to the ordinary laundress. These garments may be easily washed in the home laundry under the direction of an intelligent housekeeper; hence it is well to understand how the work should be done. Flannels should be washed in warm suds to which a little powdered borax is added. Soap should never be rubbed on them, nor should they be rubbed on the washboard, nor between the hands, and dipped up and down until they are clean. The suds should be squeezed out, and each piece immediately rinsed in water of the same temperature as the first; then wring again and hang in the shade. They should be removed when partly dry and ironed while damp, on the wrong side. If both colored and white flannels are to be washed, separate waters should be used, as that in which the white are washed will lint the colored. If much soiled, the flannel garments should be well shaken and brushed before being washed.

SUGGESTIONS FOR CHERRY DESERTS.

Cherry Puffs: Two eggs, 1 cup milk, ½ cup butter, 2 cups flour, 2 teaspoons baking powder, 1 cup sugar, 1½ cups stoned cherries. Mix the butter, sugar and flour well together. Put the baking powder into the milk and add to butter, sugar and flour. Then add the eggs well-beaten, last the cherries, having first rubbed them with flour. Mix all well together. Steam one-half hour in jelly tumblers. Serve with sugar and butter sauce.

Cherry and Currant Dumplings: Stone one pint of cherries and stem the same amount of currants. For the crust use 1 pt flour, 1½ teaspoons baking powder, 2 tablespoons sugar, ½ tablespoon salt, 1 tablespoon each butter and lard, ¾ pt sweet milk mixed with one egg well beaten. Wet the flour with this and mix to a soft dough. Rub the cherries and currants well with the flour, then divide the dough for the dumplings, and fold the fruit in, sugaring well. Butter well the tin, and bake in moderate oven. Serve with sauce same as for puffs.

HOUSEHOLD HINTS.

An attractive dish for a luncheon table may be made of lemon and any cardinal colored jellies cut into blocks and piled rock-work fashion on a flat plate, the amber and pink blocks alternating in the mound. This may be garnished with asparagus fern studded with carnations.

CEYLON AND INDIA TEA,

GREEN OR BLACK.

SALADA Ceylon Teas are sold in Sealed Lead Packets only. Black, Mixed, Uncolored Ceylon Green. Free samples sent. Address "SALADA," Toronto.

WINDSOR CASTLE TREASURE.

Priceless Prints and Books; a Fortune in Plate.

The King is taking much interest in the contemplated extension of the Royal Library at Windsor Castle. It is situated at the west end of the state apartments, and overlooks the North Terrace. The number of volumes contained in the library is estimated at 100,000, and they are daily added to. Many of these, as may be imagined, are of great rarity. There is a splendid copy of the famous Metz Psalter, a unique Caxton on vellum, Charles I., Shakespeare, Mozart's first oratorio, a letter of indulgence from Leo X., papyri from Herculaneum, etc.

On a lower storey is one of the richest and most extensive collections of prints in the country, including the Raphael collection, formed by the Prince Consort, together with more than 20,000 drawings of the old masters. The late Queen had also here a collection of about 1,000 miniatures, containing some of the very finest specimens.

The rooms forming the library have some interesting historic associations. In one of them Queen Anne was drinking tea when the news reached her of the victory of Blenheim; another used to be the bed chamber of King Charles I.'s queen, and a third was Queen Elizabeth's picture gallery. Queen Elizabeth used some of these rooms as her private apartments, and one contains a very handsome stone chimney-piece, still in perfect preservation, which was made for her.

The view from the window is magnificent, embracing as it does the whole of the west, north, and north-east of the country around the royal borough.

The King has made a minute inspection of the Gold Pantry, where the royal collection of gold plate, estimated to be worth £1,800,000, is kept in two large fireproof storerooms. It includes a dinner service of gold for 140 persons (added by George IV.), some thirty dozen plates, valued at £10,000; a shield formed of snuff boxes, valued at £9,000; the St. George candelabra; many beautiful cups, salvers, epergnes, tureens, etc.

There are few antiquities in the collection, owing to the circumstance of the royal plate having been melted down in the civil wars of Charles I. There is, however, an ancient cup said to have belonged to him, and another said to have been Henry's VIII.'s. Nell Gwynne's bellows are also preserved here.

IT PAYS TO SMUGGLE CHINAMEN.

Large Profits for Canadians and Others Engaged in the Business.

An investigation of the methods employed by the people engaged in smuggling Chinamen from Canada into the United States shows that large profits are made by them. The headquarters of the smugglers are at Montreal where the executive force of the Chinese Smuggling Trust is stationed, though its owners are the big Chinese companies of the United States.

Chinese representatives in Montreal furnish to each individual Chinaman bound for the other side of the boundary line by the underground route the necessary cash with which to pay for being smuggled through. This money has to be returned out of the first earnings of the immigrant, and as failure to pay would simply lead to the defaulter's being denounced to the American authorities and expelled from the country, no risk is run by the advancers of the money. The total cost of smuggling a Chinaman from Montreal to the United States is about $200, of which $85 goes to the individual who actually puts the Chinaman across the line.

For a year or two there was a lull in the actual smuggling methods adopted during that period being the swearing of their countrymen into the United States by means of Chinese witnesses procured by border lawyers. The discovery of the fraud in a few instances, and the necessary locking up of the immigrants, during the investigation of each case, in Plattsburg Jail, have resulted in a return to the direct plan of smuggling.

The boldness with which the white men employed in this business in Montreal are now acting, encourages the hope that some of them may fall into the hands of the United States authorities ere long. Yet so well do they lay their plans, that in the last ten years only two white men of this class were ever caught red-handed by the United States officials, and these two walked out of Plattsburg Jail one rainy night, about a month after they were captured, and returned to Montreal.

A STRANGE FLOWER.

One of the strangest botanical curiosities in the world is the "Wonder-Wonder" flower found in the Malay Peninsula. It is simply a blossom, without leaves, vine, or stem, and grows as a parasite on decayed wood. This extraordinary flower is something like a yard in diameter, and has a globular cup in the middle with a capacity of five or six quarts.

Did you ever compare Blue Ribbon Ceylon Tea with other much advertised brands?
Don't you think they owe an apology to the public?

SMITH, THE DIPLOMAT.

A Mr. Smith, of Gateshead, partook of a good dinner in a well-known restaurant in that town, and then moved gingerly towards the door.

Excuse me, sir, said the vigilant waiter. You haven't paid.

Mr. Smith looked confused.

Well, he explained, fact is, I've forgotten my purse. I'll pay to-morrow.

No, sir, said the waiter loftily. We give no credit here.

But what can I do? I've no money!

The waiter went to the speaking-tube and called to his master:

Is Mr. Smith to be trusted with a fifty-cent dinner until to-morrow?

Has he had it? asked the master.

He has, was the reply.

He is, said the master resignedly.

NOT SO SERIOUS.

It is related that two persons, one of them a wheelman, and the other an opponent of bicycling, were discussing the chances of injury through riding a bicycle.

Injury? Pooh! I've been riding three years, and I've had only one accident, and that wasn't serious.

What did you break in that?

Only a leg.

Only a leg! I should think that was enough for any ordinary person.

Oh, but it was the leg of the man who taught me to ride.

SPECIAL TRAIN TO SAN FRANCISCO.

For Canadian delegates and all others going to the Epworth League Convention, via Chicago and North-Western Railway, to leave Chicago Tuesday, July 9th, 11.59 p. m. Send stamp for illustrated itinerary and map of San Francisco to B. H. Bennett, Gen'l Agent, 2 King St. East, Toronto, Ont.

WANTED A BIG SLICE.

Scene—Little Willie sitting down to tea with his grandmother, who is just about to cut the cake.

Willie (hastily)—"Grannie, before you cut my piece of cake I want to ask you a qutstion?

Grannie—Well, dear, what is it?

Willie—I want to know if your spectacles magnify?

Grannie—Yes, a little, dear.

Willie—Well, then, will you please take them off while you cut my cake?

A BIG LIFT.

They were having a botany lesson, and the boys all sat with open mouths.

The growth of a few tiny rootlets, observed the teacher, has been known to lift a heavy rock from its place, and the root of a tree growing out under a stone pavement will sometimes push it up and break it. Other cases of a like nature, showing the strong uplifting power of vegetable growth have occurred, I doubt not, within your own observation. Is it not so?

Yes, miss, said the boy with the freckles, I've heard my pa say his last year's corn crop lifted a mortgage off the farm.

CALIFORNIA AND RETURN.

On July 5th to 12th, the Wabash Railroad will sell round trip tickets to San Francisco, California, at single first-class fare, good to return any time up to August 31st, 1901. Diagram of through sleepers now ready. Stop over en route west of first Colorado point. Everything will be first-class and up-to-date. This will be by far the most comprehensive trip ever offered to visit this golden land of sunshine and flowers. Free reclining chairs on all trains.

Full particulars at Wabash office, Northeast corner King and Yonge streets, Toronto.

J. A. Richardson,
Dist. Pass. Agt.

The Duchess of Fife is facile princeps among the Royal fisherwomen. Most of the Duchess's angling is on the Dee, where she can play and land a salmon with the best of her guests. The Princess Victoria is very nearly as keen an angler as her sister. The Queen also knows how to handle a rod.

A VERY SMALL HORSE.

The smallest horse in the world is a little animal that is carried around by its owner in his arms as a child might carry a kitten or a pet pig. It is the offspring of a pet Shetland pony that takes part in the production of a drama in a New York theatre. The little animal is extremely lively and is a great favorite with the members of the company.

Beware of Ointments for Catarrh that contain Mercury

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Sold by Druggists, price 75c per bottle.
Hall's Family Pills are the best.

South Australia has never been visited by any great epidemic and is naturally very healthful.

COMMENT.

Even the Silvertonian is growing disgusted with the state of things in the country. This is certainly very strange. A few months ago all that print wanted was the eight hour law, and everything would be happy. At that time it used to say the eight hour law has come to stay. Well, we believe it has, and so has the destruction of the Slocan. The one will no doubt compensate for the other.

Does it ever occur to Messrs. Green and Houston that if the owners got the same return for wage expenditure they got four years ago, and that the increased government tax was wiped out, all our mines would be running today to their full capacity. If this be the case, will either of these gentlemen say the legislative restrictions are paying even the miners themselves to say nothing of the country at large.

W. E. Gomm, M. D., took a certain party into his confidence the other day, and told him all the statements in the MINING REVIEW, with regard to himself and city matters, were a whole tissue of falsehoods from beginning to end. If this is the case, W. E. Gomm, M. D., with all his oratorical brilliancy should have no trouble in proving it. Come, W. E. Gomm, M. D., let us have the proof: that's just what the people want.

Some people say they smell a revival of business in the air. As far as we can see things the revival is limited to the smell. One of three things has got to happen before business in the Slocan will revive. Either lead or silver has got to go up in value to the producer, or the government has got to relax its mining laws. The people are powerless to effect either of the first two conditions, but they can the third, and it remains to be seen whether or not they will stir in the matter. Of course, if men of the Houston stamp can help themselves they will hold the country down by the neck for the votes the destruction of business may bring them.

Labor organizations have some very inconsistent streaks in their makeup. John L. Wilson, president of the Brotherhood of Railway Trackmen, who has been inciting C.P.R. trackmen to strike, says the C. P. R. is paying higher wages than other roads, but this is not the question. "The question is, is the C. P. R. paying its men a fair share of the wealth they are helping them to create?" Then Wilson thinks hiring men is simply taking them into partnership. If this is so, and all partners are to receive share and share alike in all profits, with their employers, they must also share in losses when losses are the result of operations. To be consistent, Wilson should go down to the Intercolonial railway and tell the men on that road they must refund part of their wages to the government from the first, as the road has been run every year since its first operation at a financial loss. If Wilson wants laborers to share in profits when they are made, he must also see they share in losses when losses are the result of operation. There is nothing new in this principle; it has existed from the time of Noah.

Slocan's First Mayor.

Slocan held its first civic election under the new incorporation last Saturday. A public meeting was held on Friday evening that was exceedingly hot with numerous warm incidents. The election was spiritedly contested and resulted in the return of A. York as Mayor; W. E. Worden, R. A. Bradshaw; A. C. Smith, A. B. Barber, D. Nicholl and T. D. Woodcock as aldermen. The new council met for the first time last Monday.
