FOURTEENTH YEAR — PHOENIX, B. C., SATURDAY, FEBRUARY 8, 1913 — NUMBER 30

GREENWOOD HOCKEY TEAM AGAIN DEFEATED

Greenwood Has Strong Defence —Score 11 to 1.

Once again the Phoenix hockey artists showed unmistakable signs of being the champions for 1913 in the Boundary Hockey league. The game which was played on the local ice was stubbornly contested by the visiting puck chasers, but on every point whether it be in accurate shooting, stickwork or combination play the Greenwood bunch were hopelesly outclassed. The defence of the latter, however, was particularly good, but the forward operators, owing either to the superior tactics of Mitchell, or else by reason of inferior shooting, failed repeatedly to take advantage of their opportunities. The game was noticeable for one thing and the Greenwood point and cover point are to be congratulated on it, and that is that they can consider themselves superior to the Forks team in checking the breaks and skilful dodging of Neil. The latter has admitted this fact and if there is any solace in it the Greenwood boys are welcome to it.

Moore on the right was a puzzle for his opponents and his sudden and remarkable speedy shots were the bane of the visitors net-tender. Sayers, Bassett and McKelvey worked together in great style while Davidson caused some considerably trouble by his lightninglike descents into the Greenwood territory. In spite of all drawbacks the visitors at times gave us a good exhibition of the game, and the cause of their decisive defeat is difficult for some to understand.

A few minutes after starting it was plainly to be seen what the outcome was to be. The home bunch swarmed around the visitors' net and for some little time the latter were engaged at close quarters, the goal tender having his work cut out in defending his trust. No goal resulted, however, and the opposing forces finished up the spurt on centre ice, where some long range shots were directed towards Greenwood's net, one of them being the subject of an appeal which Referee Quance allowed. A smart attack on the home end then took place and in a pass from someone in the scrimmage Davidson hooked the puck and almost carried it to the other end of the ice. A little later the scoring commenced with a couple of Moore's rapid shots, while a third followed in quick succession from McKelvey's stick. Play for the remainder of the first twenty minutes proved uninteresting, each receiving attention. It was probably during this period that the poor shooting of Greenwood was apparent to all, as their visits to the opposite end were almost as frequent as their opponents were to their quarters. McKelvey added a fifth goal, and a minute before the end, Bassett registered a sixth, the Greenwood boys not having secured a single point.

The second spasm was slightly more interesting and almost all the play was on the visitors' ice. The shooting of Greenwood even from favorable positions showing no improvement. Mitchell nearly froze to death. It was quite different, however, in the case of Dowe, who from this time on was nobly engaged in a vain effort to keep the score within reasonable limits. After some 15 minutes of strenuous play, Greenwood managed to score their first and only goal when Neil coming along nicely was checked by McDonald, who took the puck at breakneck speed to the other end and plumped it squarely into the net. They had little luck after that, and a couple more goals by Moore and Bassett found the second period score 8-1 in favor of the home seven.

The visitors kept things going nicely throughout the final stage and appeared to be by no means disheartened. Each end was visited in turn and the visitors appeared to be moving with caution. McKelvey was remarkably successful and when any sort of opportunity was offered him he made the most of it. On a pass from Sayers Davidson pounced on the rubber and for the fourth time came within an ace of scoring. Even play in the center was now on, and some how Neil again tried his hand with a shot from the right which was stopped before the goal tender had a chance to try his luck. Back came the puck to the local end, but its stay was short and McKelvey from the centre sent it spinning into the net. A few minutes from time Moore sent it again on its errand, and when the gong sounded the registered score stood Phoenix 11 Greenwood 1.

The band boys are making arrangements for another of their popular and heretofore highly successful dances and as on former occasions the Ironsides orchestra will furnish the music. The proceeds are to be devoted to the purchase of additional music and instruments. That the band has made good is plainly apparent to all who visit the rink, where their music has contributed so much to the enjoyment on hockey nights.

B. C. Mining

With the object of opening up the huge bodies of unbroken marble, believed to lie a few score feet from the surface, a new tunnel, seven by thirty feet, is being driven at the Marblehead quarries in Lardeau, according to G. B. Wilson, manager of the property. About 17 men are at work at the quarries. "There is no doubt about the magnitude of the market for the Lardeau marble, said Mr. Wilson, "as during the last year we could have secured orders aggregating, I estimate roughly, over $1,000,000. For banks, insurance buildings and similiar constructers, the Lardeau marble is being specfied in many cases, and directly we have reached the solid marble I see no reason why our quarries should not emnloy 400 men; most of whom would be of the skilled class."

From a number of well informed sources, says the Similkameen Star, it is learned that the Voigt camp deal is nearing consummation and that a definite announcement may be made any day. In any case the annual report of the B. C. Copper company to be presented in February at a general meeting of stock holders in the company, will allude to the purchase and in all probability finally dispose of the question. The magnitude and far reaching effect of the deal may be guaged by the public interest taken in the transaction. The B. C. Copper company is making good progress with preliminary work on Copper mountain claims bonded some time ago. Full gangs of men are at work and with an anticipated early spring much will be accomplished in proving the various mineral properties. The possible location of a smelter in Princeton district is given rise to consiberable individual opinion as to a suitable site. The necessity for one is unboubted. A smelter receiving custom ore must be central and with down grade hauls. Many ideal locations can be found near Princeton.

The Omineca Hearld has been informed by Duke Harris, manager of the Harris mines that they are ready to bring down several more tons of ore to add to the carload they have had at New Hazelton for the past three months waiting for the railway to take it away. Mr. Harris was greatly pleased to learn that the order had been issued by the railway commission and he stated that from now on his mine would be a regular shipper. Shipping ore means that more men will be employed at the mine and that more ore will be brought down and that the Grand Trunk Pacific will get more business. It will mean that New Hazelton will get more business and that there will be more building going on. The Harris boys are only waiting for the train to take their ore away and they will build an office here and put up a residence. The whole district has been held back by the infernal fight by the railway company. Now that the town is to have a service right away the district will begin to pick up a little and the boom which has been expected for the last two years will come in the spring.

Lieut.-Col. A. J. Matheson, Provincial Treasurer of Ontario, died suddenly of heart trouble on Jan. 25, in his 76th year.

Fernie's Septette to Play at Phoenix, Feb. 11.

Definite arrangements have been completed for the appearance in Phoenix on Tuesday, Feb. 11, of the crack Fernie hockey team, and while no definite date has been set in the case of the Nelson seven, we are officially informed that the visit has by no means been called off, the only consideration now being one of convenience. Letters sincerely regretting their inability to keep their previous appointment have been received by E. A. Black, secy.

Uses of Copper in 1913

Considerable attention has been directed of late to the increased use of copper, resulting from the manufacture of automobiles. It is estimated that 40,000,000 pounds of copper will go into the making of automobiles in 1913, and it is anticipated that in the next five years this amount will be increased 20% as the demands for automobiles increases.

Increased production to meet the consumption is not materializing as fast as anticipated. The porphyries are really only filling up the void caused by the old mines, such as Calumet & Hecla, Quincy and Wolverine, showing reduced outputs. Twenty-seven of the largest producers, representing over 90% of the total output of the United States, Canada and Mexico, produced approximately, 1,128,417,559 pounds of copper in 1912, an increase of 14% over the previous year. The porphyries increased their outputs by 68,390,000 pounds, of which Chino contributed 27,740,000 pounds of the increase, while [illegible]

After Stock-Taking Sale
AT THE BIG STORE

We are just through Stock-Taking, and have found a number of lines which we wish to clear. Most of them we offer to you for less than cost.
Look this list over, and visit the store, we are sure it will mean a saving to you.

GROCERY DEPARTMENT

	REGULAR PRICE	SALE PRICE

SYNOPSIS OF COAL MINING REGULATIONS

Coal mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the Northwest Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of $1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of $5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of $10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,
Deputy Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.

Electric Restorer for Men

Phosphonol restores every nerve in the body to its proper tension; restores vim and vitality. Premature decay and all sexual weakness averted at once. Phosphonol will make you a new man. Price $3 a box, or two for $5. Mailed to any address. The Scobell Drug Co., St. Catharines, Ont.

DO YOU WANT TO MAKE MORE MONEY

IN placing your Newspaper Advertising, place the greatest value on the paper with the greatest influence on its readers.

¶¶¶

Use the medium that is watched for every week by the people of your community.

Spend the money with the paper that is read with interest. It reaches the people and you know that you're getting into the homes of the people you want to reach.

¶¶¶

Quality has not yet become popular, but the day is not far distant when this will be one of the main features of Newspaper Advertising. In the meantime business men, who have faith in quality, are reaping huge returns.

¶¶¶

Remember first, last, and always, that circulation counts; that quality of service gives quality in returns. The high priced medium pays. Like the high priced servant, you will find money well expended.

¶¶¶

You can make more money by selling more goods; you can sell more goods by advertising in The Phoenix Pioneer, whose constituency is the Boundary district.

¶¶¶

The way to test the truth of this statement is to send us the copy for your ad. right away. The experience would not be an expensive one, and satisfactory results are assured.

¶¶¶

We use the most modern type and machinery money can buy, combined with thorough workmanship—a combination which enables us to do the best work at a moderate cost.

RECENT PROCEEDINGS IN PROVINCIAL PARLIAMENT

Government Grapples with Vexatious Indian Question—McLean of Nelson Speaks of Doukhobor Commission, and Attacks the Methods Employed during the Investigations—Royal Commission on Better Terms Decided Upon—Coal Shortage to Be Probed.

(Special to Phoenix Pioneer)

Recent proceedings in the local house are chiefly notable for several announcements of government policy. Those of primary interest being the formation of two Royal Commissions one to investigate the financial relation of this province in connection with the securing of better terms from the Federal authorties, while the other will adjudicate all questions of Indian land rights and reserves. The former will, it is understood, be constituted of three members, one being named by the Dominion, one nominated by the province and the third to be selected by those two or, failing their agreement, to be chosen by the Colonial secretary.

The tribunal for the investigation of Indian rights will be composed of five, two each to be named by the interested governments and the fifth selected by those four appointees, or failing agreement by them, by the Colonial secretary. This commission will go exhaustively into all grievances of the Indians, who, at the suggestion of a number of whites miscalling themselves "The Friends of the Indians", advance extravagant claim of legal right to all lands of British Columbia, but at the outset the provincial premier has intimated that any land title claim will be opposed and fought to the uttermost by the British Columbia administration.

As to reserves, the commission will have power to augment or diminish areas according to the necessities of the Indian occupants. Wherever a reserve is reduced in size, the residue lands will be sold at auction by the provincial minister of lands and the proceeds of such sale be equally divided between the province and the Dominion, the latter holding its part in trust for the benefit of the local Indians. These may hereafter, at the discretion of the department of Indian affairs, to be given clear Crown grants to their respective holdings, which they may utilize, sell or otherwise dispose of in the same manner as white citizens of the province.

The prime minister also intimated that, despite commissioner Blakemore's sympathetic report as to these colonists, the government will henceforward insist upon full Doukhobor compliance with every detail of common and statutory law while these people are residents of this province. Because Mr. Blakemore had asked that further prosecutions be not initiated during the progress of his inquiry, the attorney-general had temporarily suspended the operations of the registration and the school law in specific instances. No precedent was thus to be created, however, and no Doukhobor would be excused hereafter for disobedience of any law or obligation to which Canadians in British Columbia generally are expected to subscribe.

This Doukhobor problem in British Columbia was also touched upon at some length by Mr. McLean of Nelson, who displayed an intimate first hand acquaintance with his subject and, while speaking for a first time in parliament displayed none of the usual nervousness of the novice or any lack of complete self-confidence. In unqualifiedly dissenting from the conclusions reached by commissioner Blakemore, he said that this gentleman had refused his (Mr. McLean's) proposal to secure counsel for independent witnesses, declaring himself abundantly competent to protect all interests affected in his own way. While counsel was thus refused the independent witnesses, the Doukhobors were not only represented by one of the ablest lawyers of the Kootenay, but in addition had the special advice of Mr. A. M. Evalenko, a distinguished member of the New York bar, whom (while retained by the Doukhobors) Mr. Blakemore nevertheless accepted as interpreter during part of his inquiry.

As a result, the noncommunity Doukhobors, retaining their superstitious reverence for Peter Veregin and overawed by his supporting legal talent, had withheld much information that should have been brought out. Other witnesses, too, were not altogether unprejudiced, for some of these (land agents and others) had heavy business with the Doukhobor "father." One, indeed, and this one was the mayor of Nelson at the time, had even one gone so far as to grant a written paper to a Doukhobor couple which they regarded as a decree of divorce, and which awarded the custody of their minor child to its father, the woman subsequently marrying a Pole, with whom she is now living in Nelson. Yet this usurper of the functions of the divorce court was one of the most esteemed witnesses that Mr. Blakemore heard!

The member for Nelson urged strongly that paternalism should not be permitted to secure a foot hold in this British province, that Peter Veregin must be recognized and dealt with solely as an individual alien resident, not as the dictator of the actions of thousands; and he was glad to see that the government accepted this view of the situation and of its duties, despite Mr. Blakemore's report.

Probably the best non-cabinet offering in the session's inaugural debate was that of Mr. Tisdall, third member for Vancouver city, who dealt at some length with the intricacies of world finance, showing British Columbia's exceptionally high credit in a period of world wide money stringency to be the highest possible testimony to the progressive and yet conservative business methods adopted in this province during a decade past. He also advocated provincial control of the borrowing powers of municipalities, and carefully studied measures for the encouragement of expansion and development in the farming industry. His speech, indeed, so fully exemplified a critical review and commentary upon provincial affairs from the special viewpoint of a minister of finance and agriculture that it is by many taken as a bid for this portfolio in the event of a senatorial toga decending shortly upon the broad shoulders of the present administrator of this dual department, as not a few now expect.

Mr. Tisdall also brought to the attention of parliament the serious situation at Vancouver arising through a coal famine there coincident with exceptionally bitter weather. He subsequently headed a deputation of Vancouver's private members with the member for Richmond, who urged the government if possible to induce the C.P.R. to grant a reduced special rate on Nicola coal to Vancouver, by which the unfortunate shortage might be to a large extent relieved. Sir Thomas Shaughnessy was at once communicated with by the prime minister, but has replied that the present rate of $1:80 per ton on the 225-mile haul from Merrit to Vancouver will not admit of cutting. The government has now decided upon, and will shortly announce, the creation of a special commission of inquiry into the coal situation generally in this province, particularly in respect to the cost of production, the alleged existence of a combine, and the bearing of all related conditions upon the high ultimate cost to the coast consumer.

Government measures are coming down especially quickly this session, there being no fewer than eight before the members ere the speech had formally and unanimously been disposed of. These include the measures for the creation of an independent audit system and the necessary amendment of the revenue Act in consequence of the removal of the audit branch from the treasury machinery. The session will not be notable for conspicious legislation, the chief items being those for the improvement of the taxation scheme in various particulars, upon the recommendations of the commission on revenue matters; bills for the amendment of the lands, water, forestry, schools, health and municipal acts, and several pieces of railway legislation sought by the Canadian Northern Pacific notably to provide for their Victoria, Vancouver and New Westminister terminals and for the Victoria-union Bay branch, to give the capital access to its ferry terminal. Sir Donald Mann is now in the city dicussing this legislation with the premier, and also hoping to carry his Canadian Northwestern project forward in the not distant future. The suggestion that local service might soon be inaugurated between Yale and the coast he dismissed as impracticable for the present, owing to lack of terminal facilities at Port Mann.

There is also to be certain amendment this year of the statute law dealing with provincial aid to various associations operating in connection with the department of agriculture, and it was in this connection that Mr. Ellison spoke at the recent meeting of the central farmers' institute here. His remarks on that occasion appear to have been misconstrued into an announcement that legislation providing for government loans to farmers would be brought down during the present session. That there is no intention of this nature is emphasized by Sir Richard McBride, the government's attention being to defer all special legislation devoted to the encouragement of agriculture until the report of the Royal commission is available to form a safe foundation for helpful parliamentary action.

COPPER

The New Edition of the

COPPER HANDBOOK

just published, is Volume X, for the years 1910-1911, and required nearly eighteen months in preparation.

IT HAS 1902 PAGES

containing nearly one and a half million words, or about twice as much matter as the Bible. There are 25 chapters, and the book covers the

Copper Industry of World

The book covers Copper History, Geology, Geography, Chemistry, Mineralogy, Mining Milling, Leaching, Smelting, Refining, Brands, Grades, Impurities, Alloys, Uses, Substitutes, Terminology, Deposits by Districts, States, Countries and Continents; Mines in Detail, Statistics of Production, Consumption, Imports Exports, Finances, Dividends, etc.

Vol. X of the Copper Handbook lists and describes

8,130 Mines & Companies

these descriptions ranging from 2 to 3 lines, in the case of a dead company, in which case reference is made to a preceding edition giving a fuller description, up to 21 pages in the case of the Anaconda, which produces one-eighth of the copper supply of the world. The chapter giving mine descriptions, which lists the largest number of mines and companies ever given in any work of reference on mines or mining investments, has been

Fully Revised.

The new edition of the Copper Handbook is a dozen books in one, covering all phases of the copper industry of the entire world. It is used as the

World's Standard Reference Book on Copper

by the managers of the mines that make ninety-odd per cent. of the world's output of copper, and is used in every civilized country of the globe. It is filled with FACTS vital importance to

DR. PRICE'S CREAM Baking Powder

Purity in food, lower cost of living—these are the demands of the day.

Pure food is health, and health is economy itself. We cannot have health without healthful food.

The most healthful foods are the quickly raised flour foods—biscuit, cake, muffins, crusts and other pastry, when perfectly made from wholesome ingredients.

Dr. PRICE'S baking powder makes these foods in specially attractive, appetizing and wholesome form, and for both economic and hygienic reasons, such food should be more largely substituted for meat in the daily diet.

But bear in mind that alum, or unwholesome baking powder, can never make pure, wholesome food.

Pioneer Ads. Reach the People

Don't Look Old Before Your Time

WOMAN'S delicate system requires more than ordinary care and attention—more care and attention than it is given by the average woman.

Neglect it and ills soon creep in, and the look of old age, sometimes quickly, sometimes gradually follows.

That backache, so common among women, brings with it the sunken chest; the headache, tired muscles, crow's-feet, and soon the youthful body is no more youthful in appearance—and all because of lack of attention.

There is no reason why you should be so unfortunate, when you have at your disposal a remedy such as **Dr. Pierce's Favorite Prescription**—recommended for over **40 years** as a remedy for ailments peculiar to women. We have thousands upon thousands of testimonials on file—the accumulation of 40 years—testifying to its effectiveness. Neither narcotics nor alcohol are to be found in this famous prescription. Regulates irregularities. Corrects displacements. Overcomes painful periods. Tones up nerves. Brings about perfect health. Sold by dealers in medicines, in liquid or tablet form.

Dr. Pierce's Medical Adviser, newly revised up-to-date edition, answers hosts of delicate questions about which every woman, single or married ought to know.

SATURDAY, FEB. 8, 1913

Geological Congress

Within the last twenty or twenty-five years, the science of geology has developed in a direction that has brought it into direct and serviceable association with those classes of commercial enterprise that are dependent on engineering. While this is especially true in respect of mining, it applies almost equally to railroading, municipal engineering, and other activities of a like nature. The dependence of mining on geology is attested, for instance, by the fact that a geologist is now invariably included in the permanent staff of every mining company of importance; and the demand in recent years for the services of capable men to occupy such positions has been quite out of proportion to the supply. It is recognized universally, in short, that the debt of the mining industry ot geology is enormous, and the obligation continues to increase steadily. This largely explains the circumstance that the invitation to the International Geological congress to hold its next meeting in Canada was made, not only at the instance of the Canadian and Ontario governments, and the Royal Society of Canada, but at that of the Canadian Mining Institute, an association representative, in a truly national sense, of the mining industry of the country.

It is believed that this meeting will immensely benefit mining in the Dominion. From the educational and the scientific standpoints, much is to be expected from the enterchange of views on Canadian conditions and problems, by men of international reputations. On purely commercial grounds, the interest and attention will be directed to the mineral resources and to the opportunities for the investment of of capial in mining undertakings in Canada, in themselves fully justify the extensive perparations that are being made and the expense that is being incurred in anticipation of the event. Judging from the character of the attendance in the past, almost every civilized nation will be represented at the Canadian meeting by men of recognized eminence, includiug distinguished government officials, geologists and mining engineers in consulting practice, geographers, great edncationalists and writers of text-books. Thus surely, never a better, a more effective opportunity has presented its self of providing for the wide-spread dissemination of authoriatative information on Canadian resources and potentialities.

On these grounds, a general appeal for sympathetic co-operation is made to all classes and to the mining community in particular. The congress has held many meetings in other countries. In all, it has been welcomed with open arms. That record mnst be at least maintained.—H. Mortimer-Lamb.

Bank Act Revision

The Bank Act revision introduced by Hon. W. T. White, Minister of Finance, before the Christmas recess is being well received by the people of the country at large. It is seen that there will be no disturbing effect upon money and the delicacy of the financial machine will in no way be impaired.

One feature which has been praised is the establishment of a "Central Gold Reserve." The result of which will be that there need be no apprehension of a scarcity of currency at a time, when the emergency provisions are not operative, for with the deposit of gold or Dominion notes in the custody of trustees the banks will have the privilege of issuing their own to the full amount thus deposited. This will undoubtedly be a very important step towards ensuring that the general business of the country should not be hindered through lack of currency.

Hon. Sydney Fisher is quoted as having told a Quebec audience that the Opposition might make it so hot for the government on the naval question as to bring about a dissolution of Parliament. This statement confirms the impression generally prevaleut at Ottawa as to the source from which Sir Wilfrid Laurier has been getting advice to force an election. The strongest advocates of a forced dissolution are known to be a few ex-ministers who have no seats to lose and who are eager for any sort of chance of getting back into the House from which they were banished by popular vote.

In the movements of the markets wheat for delivery in May is again quoted at higher figures in Winnipeg than in Minneapolis, the former being an export and the latter a milling centre. This has happened many times since politicians of the Liberal party discovered that the commercial salvation of Canada depended upon the acceptance of the Taft-Fielding plan for putting the Canadian farmer on the same level as his neighbor in the United States.

The recent declaration by the German authorities to the effect that all nations must keep their hands of Asia Minor, is a fine bid for new Turkish concessions to the Fatherland. But the statement must have provoked a sad smile on the face of the principle Turkish commanders when they called to mind those fake "made in Germany" cartridges and that much-vaunted military system, likewise made in the same country. Like the rest of us the Turks will much prefer an enemy in the open in preference to one skulking behiud a transparent screen of neutrality.

Do you Believe

in going straight to the weak spot in treating disease? If so, you will never use anything but Peps for coughs, colds, bronchitis, and throat and lung troubles. Listen why!

Peps are tiny tablets, which contain rich medicinal ingredients, so prepared that they turn into vapour in the mouth, and are breathed down to the throat, the breathing tubes and lungs direct.

Cough mixtures go—not to the lunge and cheet at all, but to the stomach. There is absolutely no direct connection between stomach and lungs.

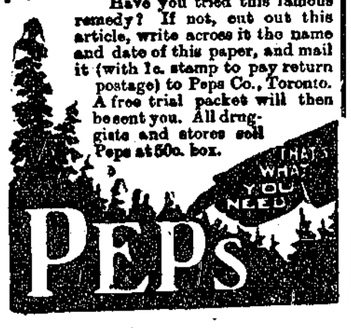
When you have a bad cold, your digestion is weakened. You lose appetite, and if a man, your usual smoke does not "taste good." In other words, your digestive system is lacking tone. All cough mixtures make this condition worse.

Don't ruin your stomach to heal your lunge. Take a remedy that goes right to the spot—Peps.

Surprising how they end coughs, catarrh, bronchitis, sore-throat, "clergyman's throat," asthma, and all lung troubles. Contain no poison, and are best for children.

Dr. Gordon Stables says:—"If you wish to ease and end a cough, if you desire to loosen tickling phlegm, and clear the throat and the breathing tubes, use Peps. The pine fumes and balsamic fumes, so beneficial in throat and lung trouble, which are liberated when a Pep is put into the mouth, also serve another good purpose. They are strongly germicidal, and germs of disease in the mouth, on the palate, in the throat, and in the breathing tubes, are at once destroyed by their action."

Have you tried this famous remedy? If not, cut out this article, write across it the name and date of this paper, and mail it (with 1c. stamp to pay return postage) to Peps Co., Toronto. A free trial packet will then be sent you. All druggists and stores sell Peps at 50c. box.



YOUR BLOOD IS TAINTED

ULCERS, BOILS, SWOLLEN GLANDS, BLOTCHES, PIMPLES, AND ALL SKIN AND BLOOD DISEASES ARE COMPLETELY CURED BY THE NEW METHOD TREATMENT

We desire to call the attention of all those afflicted with any Blood or Skin Disease to our New Method Treatment as a guaranteed cure for these complaints. There is no excuse for any person having a disfigured face from eruptions and blotches. No matter whether hereditary or acquired, our specific remedies and treatment neutralize all poisons in the blood and expel them from the system. Our vast experience in the treatment of thousands of the most serious and complicated cases enables us to perfect a cure without experimenting. We do business on the plan—**Pay Only for the Benefit You Derive.** If you have any blood disease, consult us **Free of Charge** and let us prove to you how quickly our remedies will remove all evidences of disease. Under the influence of the New Method Treatment the skin becomes clear, ulcers, pimples and blotches heal up, enlarged glands are reduced, fallen out hair grows in again, the eyes become bright, ambition and energy return, and the victim realizes a new life has opened up to him.

Local and General

Don't forget to take a look at E. A. Black's advertisement this week.

Isaac Crawford, of Carmi, arrived in town on Wednesday and has commenced the annual audit of the municipal accounts.

Geo. W. Wooster of Grand Forks, treasurer of the Granby company visited the burg during the course of the week.

Jas. McGregor, inspector of mines under the provincial government, was a visitor to the mines of the camp during the week.

Geo. Rumberger is a guest at the Brooklyn hotel. He hadn't been ten minutes in town before "Ark." challenged him to a game of solo.

A couple of Servian patriots left the city during the week to join the army of King Peter that have been making turkey hash of the Sultan's troops in the Balkans. We understand that an urgent summons has been sent to all Servians in the province eligible for military service.

The members of the Scandinavian Aid and Fellowship society have recently organized a dramatic society and purpose giving a couple of plays in the near future. A similar organization was formed a couple of years ago and some very creditable productions were presented. The president is John Ericson and the secretary, Louis Carlson.

We are requested by D. Vigneaux, secretary of the Phoenix branch of the W.F.M., to announce that at tonight's meeting of the union, matters of especial interest will be discussed, and a full attendance is requested. The proceedings will commence at seven, precisely. After the business of the evening has been disposed of, a social "smoker" will be held.

The following officers of Mountain Temple, Pythian Sisters, were installed on Thursday evening, Mrs. Edith Elkins, P.C., presiding: P.C., Mrs. Carrie Geddes; M.E.C., Mrs. Elizabeth Pope; E.S., Mrs. Julia Docksteader; E.J., Mrs. Susan Mattinson; Manager, Miss Morfydd Bateman; M. of F., Mrs. Effie Marshall; M. of R. & C., Mrs. Mary McKenzie; Pro., Mrs. Beatrice Barnes; O.G., Mrs. Mary Bateman.

The annual Shrove Tuesday social given by the rector and Woman's Auxiliary of St. John's church, took place on Tuesday last. A short program of vocal, instrumental and recitative numbers preceded the dance which closed at one o'clock. The following ladies and gentlemen contributed items on the program: R. K. McCammon, Mr. and Mrs. Hawthorne, Mr. and Mrs. P. Crane, Mr. and Mrs. McDavies, Miss M. Bateman, Miss Dora and Fred Wilkinson. The music for the dance was furnished by Mrs. W. S. Cook and Chas. McKay.

The Phoenix Ski club have arranged a competition solely for the youngsters, to take place tomorrow, Sunday. Owing to the new course on Montezuma mountain having proved so unsatisfactory, the events will be pulled off on a special course near to the C.P.R. depot. After the above contests are decided, the seniors will repair to their old practice ground on Pike's peak, where last Sunday they made some excellent jumps, some of them being 90ft, but as the take-off has been considerably improved it is expected to exceed even the 100ft mark.

On Saturday evening the match between the school boys of Phoenix public school and those of Greenwood was pulled off on the local rink, and resulted in the defeat of the former by a score of 8 to 1. The Phoenix boys, however, have nothing to be ashamed of, when the size and age of the visitors are taken into account, one or two of whom might easily have been taken for the father of a large family, that is of course to judge by their looks and bulk. Peter Miller on centre was the hero of the match and had he been supported, the score might have been vastly different. The Greenwood boys behaved very well on the whole and some of their combination and stickwork was surprisingly good. S. Moore refereed the game, and with the exception of Shaw of Greenwood, who mistook Pete Miller's bread basket for the puck, he had no penalties to hand out. Walker McCammon, in goal, and rigged out in approved hockey harness, closely resembled an ancient Jap warrior and behaved as such, considerable credit being coming to him for his many close saves. The game was an exciting one and at times quite interesting, but the boys were disappointed at the small number of spectators. During the first interval, Dooley Deane, who apparently was laboring under great excitement, appeared on the ice, and treated the crowd to an exhibition of speed and fancy skating and on leaving the arena was accorded an ovation.

Phoenix Public School

For the past month of January, the attendance banner was captured by Division I by the narrowest of margins. Division I had the excellent percentage of 95.06, while Division II ran an almost neck to neck race with a percentage of 95.05. The keenest of rivalry existed between the two above mentioned divisions and as the relative standing of each was announced as is the custom, on Friday's the absence of a single member was keenly felt and deeply resented by the pupils of the delinquents division. The percentage of Division III was 87. The following are the names of those in each of the three divisions who are credited with perfect attendance;

E. Blundell, J. Dermody, Kathleen Draisey, Marjorie Elkins, Annie Hendrickson, F. Hufty, Margaret Jarrett, Letha Johnson, K. McKilla, Mary McKinnon, G. Neugebauer, F. Nicholson, J. Owen, W. Owen, M. Vezzetti, Cora Pearson, Mamie Silverthorn and F. Walters.

Division II (46 pupils) Enis Abranson, Evelyn Draisey, Helen Elkins, Bessie Austio, Elizabeth Hanson, Ebith Johnson, Essie Johnson, Myrtle Johnson, Martha Jackson, Effie Larson, J. McDonald, C. McGeugan, D. Matheson, Muriel Miller, R. Owen, J. Rowlands, O. Rowlands, Ingrid Peterson, Ethel Silverthorn, W. Suzzda, Margaret Suzzda, J. Suzzda, H. Stafford, J. Strutzel, O. Vick, R. Wilson and Hannah Wilson.

Division III (45 pupils) H. Bakke, D. Draisey, O. Docksteader, Anna Johnson, Ella Johnson, H. McDonald, Olive McIntosh, R. Nakwas, Meriana Rukas, V. Smith, C. Smith, C. Stafford, C. Vick and N Vick.

Boundary Ore Tonnages

Following are the returns of the output of the Granby mines and smelter for the week ending Feb. 2nd, and the B.C. Copper company for the week ending Jan. 26th, and year to date:

Granby	24,616	138,655
Mother Lode	3,956	36,740
Rawhide	4,857	24,161
Napoleon	717	4,028
Queen Victoria	231	3,029
Others	119	621
SMELTER TONNAGES		
Granby	23,860	136,513
B. C. Copper Co.	11,287	61,310

B. C. Copper Treatment

The B. C. Columbia company's smelter treated 11,287 tons of ore this week, as follows: Mother Lode, 5,789; Rawhide, 4,752; Napoleon, 666; Queen Victoria, 80; others, ...

Mrs. W. A. Hufty left town on Friday for a few days visit to Mrs. H. A. Nichols of Grand Forks.

A Parcels Post in Canada

The announcement by Hon. L. P. Peletier, Postmaster-General, in the House of Commons, that Canada is to have a system of parcel post, is one of the most important declarations of government policy made for years. Parcel post benefits have already been conferred upon the people of many other countries, and an experiment is being made in the United States.

Mr. Pelletier's statement shows that he is taking up the question from a sane business-like standpoint, and will acquaint himself with the results of systems already established before finally determining upon the system to be adopted in this country. His object is to work out a system by which not only those districts now served by the express companies, but other districts as well will have the advantages of the new postal service.

It will mean that wherever there is a postoffice some of the advantages of the parcel post will be felt, although it has not been deemed feasible to have each postoffice the centre of a parcel post zone as in the United States. Nor is it likely that the scheme can be worked out on a flat rate basis.

The intention of the government is to work out a plan by which a fair share of the parcel carriage business of the Dominion will be transacted through the postoffice. This will no doubt be brought about by some arrangement with the railways so that all the paying basiness will not be left to the express companies. Mr. Pelletier is expected to have his plans completed before he makes his final announcement.

Boundary League Hockey Rules

The rules of 1911-12 governing hockey in the Boundary were adopted for the present season, with the exception of an amendment governing the time limit for registerng players, which was changed from Jan. 10 to Jan. 20. The following constitute a few of the most important rules of the league, and include section three, the amended rule:

1. That the referee be picked by the home team, and that the visiting team be notified at least three days before the date of the game who this referee will be. If said referee is not satisfactory to the visiting team, said team will notify the secy-treas. of the league, who will have a referee appointed by the neutral team, said referee to be a resident of the neutral town. If a referee be appointed by the neutral team said referee's expenses be paid by the visiting team; the expenses to be $10.

2. That should the visiting team wish a judge of play, said judge of play will be picked by the visiting team from either the visiting or home team.

3. That all players must be registered by January 20th, and that any player or players not registered by January 20th, must be registered 15 days before any game they play. Said certificate to be signed by player, registering and registration date from date of registered letter. Any team playing a player who has not been registered shall forfeit the game.

4. That no team shall play an unregistered player in case they do, the game shall be forfeited and a fine of $50 be imposed, made payable to the league.

5. That the deposit rule of last year be endorsed, and that $50 be deposited with the treas. on or before date of first game.

6. That no players can play with more than one team during the season.

Operation for Piles Failed

Zam-Buk Was Then Tried and Worked a Cure

Writing from Poplar, B.C., Mrs. C. Hanson, wife of the proprietor of the Commercial Hotel, says: "I suffered for years with bleeding piles. The pain was so bad at times that I could hardly walk, and ordinary remedies seemed utterly unable to give me any ease. Finally I decided to undergo an operation, and went to the Sacred Heart hospital in Spokane. There they performed an operation and did all they could for me. For a time I was certainly better, but within twelve months the trouble started again and the piles became as painful as ever. I tried liniments, hot poultices, various 'pile cures,' nnd indeed everything I could think would be likely to do any good, but still I continued to suffer, and the shooting, burning, stinging pains, the dull, aching and wretched 'worn-out feeling that the disease causes continued as bad as ever.

"One day I read about Zam-Buk and thought I would try it. The first one or two boxes gave me more ease than anything else I had tried, so I went on with the treatment. In a short time I began to feel altogether different and better, and I saw that Zam-Buk was going to cure me. Well, I went on using it, and by the time I had used six boxes I was delighted to find myself entirely cured. That was three years ago, and from then to the present time there has been no return of the trouble."

Zam-Buk is a sure cure for piles, eczema, ulcers, abscesses, cold sores, chapped hands, varicose sores, burns, scalds, bruises, inflamed patches, and all skin injuries and diseases. Druggists and stores everywhere, 50c. box, or Zam-Buk Co., Toronto, for price. Refuse harmful substitutes.

Sunday's Sermon spoilt by Coughing

A dose of Mathieu's Syrup of Tar and Cod Liver Oil taken before leaving for church will check that service spoiling cough.

This preparation acts as a tonic as well as a cough cure and its use soon enables the system to throw off all signs of cold.

Keep it in the house—large bottle 35c at all dealers.

J. L. MATHIEU CO., Prop., Sherbrooke, P.Q.

P.S.—Mathieu's Nervine Powders cure headache and dispel fever. Invaluable for feverish colds to take in connection with Mathieu's Syrup. 25c Box of 15 Powders.

1-f-13

PRESBYTERIAN CHURCH CONCERT

We have much pleasure in publishing the program of the forthcoming concert to be given on Thursday next, February 13, under the aupices of St. Andrew's Presbyterian church. Among the ladies and gentlemen who are expected to contribute is Mrs. E. Logie. The latter lady, who is the wife of Rev. E. S. Logie, Presbyterian pastor of Nelson, is exceptionally well known among music lovers of the Queen City, where her rich and splendidly trained soprano voice has charmed and impressed her numerous audiences.

PART I

NYAL'S CHERRY COUGH CURE

What's the use experimenting with medicines? Why be persuaded to try something just because it is new, when you can get a medicine that has stood the test of use for years, and which has never disappointed?

We know what Nyal's Cherry Cough Cure is. Nothing else will so readily relieve a tight, dry, hacking cough.

Contains Wild Cherry, Bloodroot and other valuable sedatives and expectorants.

So stop that cough or cold before it leads to serious illness. Stop it with experimenting. **PRICE 50c.**
