THE PHOENIX PIONEER is published in the highest municipality in Canada—altitude, 4,800 ft. The city has a population of 1,600, and possesses first-class hotels, opera house, schools

SEVENTEENTH YEAR

PHOENIX, B. C., SATURDAY, JULY 17, 1915

NUMBER 1

## LOON LAKE TO BE FISHING RESORT

### Government To Stock It With Kamloops Trout.

The suggestion of the Pioneer, which was taken up by the local Conservative association, relative to the stocking of Loon lake with some variety of game fish, bids fair to be immediately acted upon. It will be remembered that R. K. McCammon, secretary of the above association, communicated with Hon. Martin Burrell on the matter, and the latter took up the question with the Ottawa Fisheries authorities, who this week ordered J. McLeod of the department to visit the lake and investigate. That official was here on Tuesday, and in company with the mayor, J. E. Thompson and N. J. Carson motored to the lake to size up its piscatorial possibilities. Although the stretch of water has an area of over two hundred acres, the visitor was not at all impressed, but promised to recommend a trial of 10,000 of what are known as Kamloops salmon trout, 750,000 of which are awaiting distribution at the Gerard fish hatchery on Kootenay lake. It is unfortunate that no other smaller species were available, but we understand that Jas. Schofield, the provincial member for Ymir district, has communicated with the department, only recently, strongly recommending that steps be taken to secure a few thousand speckled trout fry from Sheep creek for distribution in the waters of his district, and if this is done it might be possible to secure a few thousand for Loon lake. The latter would be infinitely more suitable for such a small lake as they rarely average over 6 lbs. while the run for the Kamloops trout is from ten to thirteen pounds. Mr. McLeod stated that the latter were a splendid game fish, full of fight, and the flesh was of a dark rich red color. They have been caught at the hatchery weighing nearly forty pounds.

## Returned From Sweden

Miss Esther Ericson, neice of A. O. Johnson, returned to Phoenix on Monday, from an extended visit to her home in Sweden. While there she took the opportunity of being present at one of the lectures delivered by an emissary of the German government. These discourses are a part and parcel of the energetic pro-German propaganda that has been launched by the kaiser in Sweden, Norway and Denmark, ostensibly for the purpose of educating public opinion to the German point of view, but in reality they are a kind of veiled terrorism to keep those countries on the neutral list. In the case of the lecture Miss Ericson heard, the speaker was evidently of the die-hard military class. He told his audience that if the German forces were driven out of Belgium and France, they would back up their armies across the Rhine and blow up and burn every city rather than leave them intact behind them, which after all is exactly the thing the allies would like to see them do. Crossing the North Sea, Miss Ericson said they were visited by a couple of zeppelins; an incident that almost scared some of the lady passengers to death. Sweden, she says, was very much pro-German during the first few months of the war, but at the time of her departure for Canada, Swedish public sentiment was undergoing a remarkable change in favor of the allied nations.

## Will Hold a Bazaar

The next venture of the Patriotic Society will be a bazaar, on or about the 1st of December. The ladies forwarded another consignment of six parcels to the boys at the front on Thursday. One of them was for Teddy Hurrell, who is a prisoner in Germany. We are requested to publish the thanks of the society for the generous patronage accorded their social.

Oats seven feet high are to be seen growing near Kelowna.

## B. C. Mining

Near Silverton, in the Slocan, 40 men are working at the mine called the Galena Farm, and a mill is now being built. In the boom days of 1897 the property was floated in London by a company with a capital high in the millions. The company was afterwards disincorporated. At that time Charles Callahan was the engineer.

A rejuvenation of the Portland Canal mining district seems imminent. The camp has lain dormant for the past four years, but this spring there have been several representatives of investors looking over the claims, and some important developments which will result in transforming ore into real money are now under consideration. Province.

Colin Munro came down from Saboli this week after spending some time in that district preparing camp and getting ready for the season's work. He stated that there is still more or less snow up there, but that in another week or two it should be all gone. A number of people are in there now, and a lot more are preparing to go in. A number of New Hazelton boys are interested in the district, and there is a good deal of confidence expressed in the country becoming a noteworthy gold camp. Gminca Herald.

D. J. Williams, superintendent at the Rocher Debole mine, was a visitor in town last week. He went up the line accompanied by W. S. Sargent to look over a big mineral deposit which is of promising appearance. In speaking of the Rocher Debole mine, Mr. Williams informed the Herald that they had increased their daily output to seventy tons a day—five tons more than two weeks ago. The increase in production is improving, and he is confident that the present month will see the hundred ton per day output reached.

Work is to be resumed at once on the Yankee Girl and Yankee Boy, situated on Hardy mountain, about a mile from the western city limits. W. J. Campbell, the present owner of the property, arrived in Grand Forks this week from Republic, accompanied by J. S. Bedin, who will act as manager. Mr. Campbell has since purchased a supply of lumber for buildings at the property. A wagon road will also be built from the mine to the government road. The development work done on the property up to the present time consists of a 200-foot tunnel, connected by a shaft. The lead is not very wide, but the ore is all high grade, and with the improved smelting facilities in this country the mine should prove a profitable investment to the new owner.—Grand Forks Sun.

## Successful Patriotic Social

The flag day social organized by the members of the Women's Patriotic society, was such another of the successes that has marked the career of that society. The rooms were thrown open about 2 p.m., and seldom were the tables unoccupied throughout the day and evening. The ladies worked industriously, and although the result of their self-denying labor will not be seen so much in Phoenix, its effects will be pleasantly experienced by our boys in the French trenches and hospitals.

The receipts from the sale of flags, which by the way were generously donated by Messrs. Eddie Murray and Jas. Leslie, were \$31.10, and the sum realized from the sale of ice cream, cake, strawberries, tea and coffee, added \$81.25 to the day's total. The following ladies were in charge of the arrangements: Mrs. C. M. Campbell, Mrs. A. F. Geddes, Mrs. J. A. Morrin, Mrs. Frank McDonald, Mrs. Fred Weir, Miss N. McGeer, Mrs. Ingram, Sen., Mrs. Tilton and Mrs. Jas. Bateman.

## Address On Korea

Miss McCully, a Canadian missionary in the Korean field, was a visitor in Phoenix, over Sunday, and entertained a large and appreciative audience in the Presbyterian church with an address on the work now going on in what used to be known as the "Hermit Kingdom." The speaker told her audience that the whole of the scriptures were now available to the Koreans in their own language, which by the way, is the same as that of the Manchurians. They were a kind, hospitable people, entirely free from a military spirit, and readily absorbed the message from the missionaries. Few of them were unable to read and write. Their religion was that of Buddha and Confucius, while the priests were about the lowest in morals and education in the whole populace. They had absolutely no power over the people at all. The best dressed, and strange to say, highest educated among the women were the dancing girls, and as a consequence the rest of the women-kind, except the upper class, arrayed themselves in rags and tatters in order that they may not be taken for such characters. Some of them did not know the names of their husbands, and Miss McCully said she had met quite a number of children who were facing the world without a name. The great aim of the men was to be a scholar, but their so-called scholarly attainments were of absolutely no practical value to them whatever. They were simply ornaments, and although the wife might be in rags and unwashed for a couple of months, she usually managed to make a fashion plate out of the old man. They were a teachable people, and contrary to conditions elsewhere, they carried the message home to their villages and taught their neighbors. The temples were very small, and all the priest did was to keep the place clean, chant a lot of meaningless phrases and sponge on the people. There were 300,000 converts in Korea, although it was one of the newest mission fields, or 50,000 more than the empire of China can show for over 100 years of missionary labor.

## Patriotism and Production

Geo. W. Rumberger, who returned this week from Regina, where he has important business interests, says that he never saw the north west crops looking so well. Speaking of what he saw in Saskatchewan and Alberta, he says the trip provided the surprise of his life. As far as the eye could see, there was nothing but grain, grain and more grain. Even the stretches of land in the possession of speculators, are all under cultivation, and the owners of virgin land have been inundated with offers to lease their property on shares. It is the same story with the hay crop, particularly in the irrigated areas of Alberta. The yield is enormous. "The farmers over there have risen to the occasion," says Mr. Rumberger, "and Hon. Martin Burrell is to be congratulated on the splendid response they have made to his appeal for an increased acreage under crop. I consider Mr. Burrell has done more for the general advancement of agriculture than any three of his predecessors. He told the farmers it was their patriotic duty to increase their acreage, and from conversations I had with some of them, together with what I saw with my own eyes, I think they have done their duty to Canada very well."

After eight years of negotiations to effect reciprocity permitting licenses of medicine, in Ontario, to practice in Great Britain, with similar privileges to British doctors in Ontario, the question has been settled by the ratification of the Ont. Medical Council.

## Want More Machine Guns

Alive at last to the gravity of the task that confronts the Empire's troops, the people of British Columbia are making a determined effort to add to the number of machine guns carried by the regiments of this province. The military regulations ordinarily call for four of such guns to each battalion, but the Canadian military authorities have decided to increase that number to twelve. Already the people of Vancouver have subscribed sufficient to purchase fifty guns, and other cities are following suit. New Westminster is making an effort to buy twenty, Rossland thinks they will be able to buy a couple, Greenwood has already sent the money for one, in fact from all accounts there does not appear to be a single town or city in the province but what is doing something in the matter.

The promise has been given by Ottawa, that all such guns provided by popular subscription, will be in addition to those furnished by the government. It is also advised that the money be sent to the militia department, who in turn will purchase the gun or guns and forward the weapons to the regiment for whom they are intended. As showing the value of such pieces, it is but necessary to record the statement of hundreds of our soldiers of their inability to fire their rifles fast enough to stem the massed attack of the German infantry.

## Crop Less Than Last Year

The apple crop reports says: Vernon and West Kootenay points report slight increases, while other sections, except the coast, will have a decreased production. The coast apple crop will be about equal to that of last year. In general the old orchards in the province have a lighter crop than last year, but the young trees are expected to bring the total production to 650,000 boxes, or about 33,000 less than last year.

Labor produces all wealth.

## NEW BASEBALL ORGANIZATION

### J. J. Strutzel President—To Secure Good Pitcher.

A meeting of local baseball enthusiasts took place recently for the purpose of organizing a team to represent Phoenix in that particular form of sport. Teams have been arranged in all the small communities on both sides of the boundary line, and the fans of this city are of course naturally anxious to be in line with them. The great local want, however, revealed at the meeting, was that of a pitcher, and it was decided to strain every effort to recruit one at the earliest possible moment. The remainder of the team will be picked from among the already large number of artists that are here. The local diamond is in splendid condition, but unfortunately the ground is not enclosed, and this makes it difficult for the club to make any revenue from admission fees. To overcome the difficulty the promoters propose to partly meet the expense by the sale of membership tickets, and partly by voluntary collections on the ground while the game is in progress. The meeting elected the following officers: President, J. Strutzel; Vice-Pres., J. McLaughlin; Hon. Vice-Pres., J. W. Thompson; ditto, T. S. Quance; Manager, Ed. Deichert; Sec. Treas., Thos. Oxley; Captain, P. McWha.

## Granby Shipments

The following are the monthly shipping figures from the local Granby mine to the Grand Forks smelter:

SATURDAY, JULY 17, 1915.

"On November 3, 1914 (note the date,) England declared the North sea a war area," says the German note to the United States, "and by poorly anchored mines, and the stoppage and capture of vessels, made passage extremely difficult and dangerous for neutral shipping contrary to all international law."

Von Jagow must possess a convenient faculty for forgetting facts, and no doubt the United States naval experts will have reminded the President ere this of the destruction on Aug. 5, of a fully-equipped German minelayer that the British cruiser Amphion discovered scattering mines indiscriminately, sixty miles off Yarmouth, England. It will also be recalled that during this action the Amphion ran into two of the mines and was sunk. So after all, by the Germans own showing, the British government were rather slow in declaring the North Sea a war zone. It is also a significant fact that Von Jagow terms that stretch of water the North Sea, as in all German atlases it is described as the German Ocean.

Editors of newspapers in British Columbia must be careful in future when penning articles having reference to the sweet kulture of the kaiser and the German nation. The fateful sword of Democles hangs over one and all of their devoted think tanks, and vengeance dire and

dreadful awaits the one who in an unsuspecting moment publishes anything derogatory to the God-given and divine dignity of "William, the second to none." Like the wicked Pooh Bah of Gilbertian fame, the chief of the Huns is also compiling a list, and according to accounts it is not a small one. Chief among the malefactors is our British friend Punch, whose cartoons of late have offended the delicate susceptibilities of the Berlin butcher. As for ourselves, we have dealt leniently with Bill, although we plead guilty to cutting off one of our subscribers in Rhenish Prussia, but Oh! the tranquillity of our life is upset, and our soul is harrowed, when we think of what is in store for our friend Col. Lowry of the Greenwood Ledge.

What a splendid record! What a magnificent vindication of the British reformatory school system. We are told that 19,649 former bad boys, inmates of British truant schools, reformatories, etc., have answered the call of their country and rallied for the defence of the flag and all that that ensign stands for. Twenty-five of those naughty boys are wearing the Distinguished Service Medal, eight of them hold the King's commission, twenty of them have been specially mentioned in dispatches, and three of them have been decorated with the Victoria Cross. Many of them will never look again on the white cliffs of Old England and the great majority of even those are asleep in nameless graves amid the cruelly scared orchards and fair fields of a foreign country. Reading of such a sacrifice, one is almost impelled to cry out: "God give us more bad boys."

A certain provincial city councillor found a good deal of fault with the way his flights of oratory were reported, so the reporter made it his business to report the irate alderman's speech ad verbatim, and the following was the result:

"The reporters—ought not to—the reporters ought not to be the ones to judge of what is important—not to say what should be left out—but—the members can only judge of what is important. As I—as my speeches—as the reports—as what I say is reported sometimes, no one—nobody can understand from the reports—what it is—what I mean. So—it strikes me—it has struck me, certain matters—things that appear of no importance—are sometimes left out—omitted. The reports—the papers—points are reported I mean—to make a brief statement—what the paper thinks of interest is reported."

The lines of the editor of the Enderby Press are truly cast in a particularly pleasant place. In a recent issue of that paper, he acknowledges with the customary Canadian editor's graciousness, no less than three handsome bouquets from the fair sex. We heartily commend the action of the Enderby ladies, and sorrowfully recall the bouquets that were once thrown at us by certain damsels of the local Spinsters club.

The statement made a few weeks ago by a British statesman, that the Germans had exploited every field except that of private murder, is worth recalling just now.

#### Released From Vernon

The Vernon internment camp was visited this week by Geo. Millonckevich, who came under authority of the military authorities to inspect the camp here, and secure the release of a number of Montenegrins and Serbs from Bosnia, who while nominally Austrian subjects are in hearty sympathy with the Allies, and are anxious to serve on the fighting line against the Austro-German foe.

Forty-two of such men were found here, and their release was at once obtained by Mr. Millonckevich. They will leave in a few days for the camp at Three Rivers, where several thousands of such reservists are now assembled, joining at Sicamous a large number of their fellow countrymen who are going forward from the coast. As soon as all such men in Canada are brought together

at Three Rivers, they will be shipped across the sea to join the armies of the allies at the front.—Vernon News.

#### Motor Boat vs. Submarine

Representatives of the allies' governments have requested the G. C. Smith Boat and Engine company, to submit estimates for the construction of upwards of 150 powerful motor speed boats for war purposes. The craft must be strong enough to carry two or more light guns, and are to be used in seeking out and destroying German submarines in waters about the British Isles and France as well as the Baltic sea. The plans call for vessels of 500 horsepower and a speed of 50 miles an hour.

The meal ticket prize fighters are coming to the front along the Canadian western front. We would like to see the people of Vancouver and Victoria give some indication of their desire to see these noble heroes go to the front. They would have an opportunity in France or Belgium of becoming real heroes, with the positive assurance of a meal ticket each week. Your King and your Country need you.—Victorian.

"A factory for manufacturing pickles is shortly to be erected in Vancouver." This is the chance for the Ministerial Association. They can have their "crisis" rods preserved until after the war. They might eventually be sold as best B.C. "Cooked."

"British Columbians capture an orchard," was the war headline of a great daily this week. But it was better than paying a thousand dollars an acre for it anyhow.

Sir Hiram Maxim, inventor of the rapid fire gun, announces that he has discovered a very simple and serviceable device for counteracting the effects of German gases.

#### SYNOPSIS OF COAL MINING REGULATIONS

Coal mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta, the Yukon Territory, the Northwest Territories and in a portion of the Province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2,560 acres will be leased to one applicant.

Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In surveyed territory the land must be described by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked out by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not being operated, such returns should be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10.00 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.

W. W. CORY,

Deputy Minister of the Interior.  
N.B.—Unauthorized publication of this advertisement will not be paid for.—30669.

### Concentrates

Extensive forest fires are raging around some of the logging districts up the coast.

On account of the demand for war nurses, there is a dearth of nurses for general purposes in London, England.

The spring and summer halibut fishing on the coast has proved a dismal failure. The fishing grounds are steadily being depleted.

The dead body of a twelve-year-old boy, was found last week a few miles from Revelstoke. He had been shot with a .22 rifle.

On the advice of the city attorney, the Victoria council refuse to admit any liability for damages done to the breweries during the recent anti-German riots.

Authority has been received to recruit the 72nd Seaforth Highlanders (Vancouver) to full war strength. The battalion will now proceed to the front as a unit.

Two men, who were up before the Vancouver magistrate for vagrancy, were allowed to go on condition that they immediately joined the army.

General Sir John Maxwell has prohibited the sale of alcoholic liquors to the soldiers in Egypt between the hours of ten at night and five o'clock in the morning.

The acceptance of "moderate drinkers" into the benefits of the American Temperance Insurance Association of New York, has put the company on the bankrupt shelf.

While smoking on his verandah at Twin Arm, last Monday, the Rev. H. P. Dixon was shot in the face by an unknown person. He is at present a patient in one of the Vancouver hospitals.

The Russian authorities at Tientsin have cleverly intercepted and confiscated a big consignment of gold from Mongolia, destined for the German bank. It was despatched under cover of a Chinese name.

The president of the Delaware and Hudson Railway company, who has recently completed an investigation into foreign holdings of American securities, announces that the amount held by foreigners is about \$2,576,401,342.

Another of Britain's airmen has gone. This time it is Commander Soames, who was killed recently by a bomb which he was examining. He was the officer who led the squadron that flew from England to France at the beginning of the war.

It is officially announced in Berlin that no honor has been conferred on any submarine captain for the destruction of the Lusitania. Capt. Hersing, of the U21, who is stated to be the officer of the plunger that accounted for the liner, has been awarded the Order of Merit because of his trip passed Gibraltar into the Mediterranean.

The tune of "God Save the King," was a favorite with several of the great German composers. Weber introduced it in one or two of his works, and Beethoven, besides writing seven variations on it for the piano, used it in his Battle Symphony, apropos of which he said in one of his letters, "I must show the English what a blessing they have in 'God Save the King.'"

Dr. Chaillon, head of the anti-rabies department of the Pasteur Institute, and one of the most brilliant young scientists in France, has met death under extraordinary circumstances. He had personally volunteered to disinfect a stretch of ground lying between the French and German lines, and while at work among the putrifying bodies he was killed by a shell.

The incendiary bombs, used by the German airmen are simply a vessel containing thermite. The receptacle was wound tightly with tarred string. Thermite is a mixture of iron oxides with finely granulated aluminum and is chiefly used for welding iron rails. The heat generated is intense, about 5000 degrees centigrade. When lighted with a fuse of barium peroxide, it is converted into a molten mass. The fuse is ignited by percussion of the phosphorus in the base of the shell.

## Boundary District of British Columbia

**RICH IN MINERAL, AGRICULTURAL AND LUMBERING POSSIBILITIES--  
A MOST PROMISING FIELD FOR THE INVESTOR.**

Probably no district in the Dominion of Canada possesses so great an array of potentialities as the above. The mountains throughout its entire length and breadth, are almost without exception mineraliferous, containing gold, silver, copper, iron and other valuable ores, while in a few localities there are more than surface indications of the presence of coal.

### FOREST AND MINERAL WEALTH

Its forest stretches are among the richest in the province, and what is of great importance, easily accessible to river and railway. There is scarcely a square mile of it that is not either equipped with high tension wires, or which could not be reached by the expenditure of the smallest outlay. Not the least attraction from the point of view of the investor, is the sites for water power, which abound in this district.

Just at present an immense amount of interest is being directed to the recent free gold discovery in Greenwood, while in the same district is to be seen one of the best equipped free gold properties in the west, a not inconsiderable asset in these days of industrial depression and shrinkage of gold reserves. It is in this district where is situated the Phoenix and Grand Forks properties of the Granby Consolidated, together with those of the British Columbia Copper company. In the former camp, and surrounding it for miles on all sides, are acres of crown-granted mineral claims, all awaiting the advent of the investor. The title deeds to these properties, thanks to a beneficent series of mining laws, are unimpeachable, and if proof is wanted of the statement, let us point to the almost entire absence of mining litigation in the courts of the province.

### AGRICULTURE AND FRUIT-GROWING CENTRE

The possibilities of the Boundary as an agricultural and fruit-growing centre are also worthy of investigation, and a visit to some of its splendidly equipped orchards will prove a revelation to the stranger. The highways throughout the Boundary makes this section of the province the motorists paradise, millions having been spent on the construction of government roads.

No locality is better served with railroads than the Boundary district. At present this section is served by two of the greatest systems on the continent, the C. P. R. and Great Northern companies, while within a few months the route to the Pacific coast will be commercially curtailed by the opening of the new K. V. V. branch of the former.

### Local and General

Mrs. T. Lyons was a visitor in Grand Forks on Wednesday.

Mr. and Mrs. M. Olson left Tuesday for a visit to Spokane.

Mrs. M. Kibby left Monday for a visit of two weeks with friends in Spokane.

The next meeting of the Women's Patriotic Society will be in the Presbyterian church, on July 22nd.

Furnished house for sale; chicken coop and root cellar. Can be had for \$250 cash. Apply J. Bellis.

Mrs. W. Rosine and family left on Tuesday for California, where they intend to make their home.

Cecil Martin of the Granby engineering staff, returned to town on Saturday from the Coeur d'Alenes.

Fred Daly left on Saturday morning for Vernon to enlist in the 54th Battalion.

Mrs. O. D. Bush was the guest of her sister-in-law, Mrs. Ralph Coutts, of Columbia, over Monday.

Mrs. A. Gustafson, accompanied by Mrs. H. Bakke, are in Spokane for a few days.

Bernard Morris, formerly on the line-up of the local hockey club, came in on Tuesday from Victoria.

W. Mix, fire warden of Grand Forks, spent a couple of days this week in this locality.

Mrs. J. Kempston and children, who have been spending a few days at Bridesville, returned home on Saturday.

Last Saturday was the 16th birthday of the Phoenix Pioneer. Like the Irishman's glass of ancient whisky, its rather small for its age.

The service in St. John's church on Sunday, July 18th, will be at 11 o'clock, followed by the administration of Holy Communion.

Miss McKnight, matron of the general hospital, has resigned the appointment and expects to leave

on Tuesday next for the home of her brother, at Ninga, Manitoba.

Special for today. New potatoes; eight pounds for 25c. Knight and Barnes.

Mrs. McGeer, of Vancouver, arrived from the coast last week, and is the guest of her daughter, Mrs. Chas. M. Campbell. Her son, D. McGeer, accompanied her.

C. Rundberg, formerly foreman of the Brooklyn mine here, left for Chewelah on Friday after a week's visit to his daughter Mrs. Jos. Ingram.

The Miners' Union have generously arranged for a dance on Wednesday next, July 21st, in aid of R. O. Vick, one of the members, who has been incapacitated for many months by an accident.

F. J. Lake requests us to announce that on account of the recent disagreeable weather, which interfered with the taking of pictures, his free offer will be extended to his next visit on July 25th and 27th inclusive.

Sergeant Jory writes that he has been transferred to the pioneer detachment of the 54th Battalion. Among the local boys in the same battalion whose name has not been published is Ed. Summers, son of Jas. Summers of this city.

All members of Phoenix lodge, Knights of Pythias, are requested to meet in the lodgeroom at 7 p.m., on Sunday, July 25th, when they will march in a body to St. John's church for their annual memorial service.

Some old-time faces are in town. Louis Jones came in on Wednesday after an absence of over six years, and the same day J. Coulthard came in from Hedley. The latter was a familiar figure in town from seven to ten years ago.

Mrs. N. E. Cronant, of Grand Forks, announces she will be in Phoenix on July 21st, 22nd, 23rd, and 24th, with a line of ladies' and children's dresses, waists, skirts and middie blouses. Call early and get your choice. At the Brooklyn Hotel sample room.

The Rev. D. K. Roberts, of Spokane, will conduct services in the Presbyterian church, on Sunday next, July 18th, as follows: Welsh service, 10.30 a.m.; usual service in English at 7.30 p.m., followed immediately after its conclusion by a service in Welsh; Sunday school at 2 p.m. All welcome.

### HAVE YOU WEAK LUNGS?

Do colds settle on your chest or in your bronchial tubes? Do coughs hang on, or are you subject to throat troubles?

Such troubles should have immediate treatment with the rare curative powers of Scott's Emulsion to push against consumption which so easily follows.

Scott's Emulsion contains pure cod liver oil which peculiarly strengthens the respiratory tract and improves the quality of the blood; the glycerine in it soothes and heals the tender membranes of the throat. Scott's is prescribed by the best specialists. You can get it at any drug store. Scott & Borne, Toronto, Ont.

Druggists and Stores everywhere

**Zam-Buk**

"Rough on Rats" clears out Rats, Mice, etc. Don't Die in the House. 15c. and 25c. at Drug and Country Stores.

### Send For One

The British Columbia Fruit Growers' Association have just issued an interesting 78 page illustrated booklet (a copy of which has been received) containing some 225 tried and tested receipts for preparing apples, peaches, plums, strawberries, raspberries, and other fruits, information as to varieties of apples, and when to use them, how to store them, how to preserve fruits without sugar, and many other data of special interest to the housewife.

The article "Preserve your Fruits without Sugar," on page 7, possesses a special significance in these days of financial depression and increased cost of living. The treatise was prepared in collaboration with prominent domestic science experts, and is absolutely reliable. Copies of this valuable little book may be obtained free of charge on application to the "Provincial Horticulturist," R. M. Winslow, Department of Agriculture, Victoria.

### PHOENIX BAKERY

W. WILLIAMS, PROP.

A new line of Bakery and Confectionery just arrived. Fresh Bread, Cakes and Cookies; just like mother-used to bake; delivered daily to any part of city.

The PHOENIX DAIRY  
W. A. McKay & Sons, Props.

**Strength and Beauty**

Come With Dr. Pierce's  
**Golden Medical Discovery**

This is a blood cleanser and alterative that starts the liver and stomach into vigorous action. It thus assists the body to manufacture rich red blood which feeds the heart, nerves, brain and organs of the body. The organs work smoothly like machinery running in oil. You feel clean, strong and strenuous instead of tired, weak and faint. Nowadays you can obtain Dr. Pierce's Golden Medical Discovery Tablets, as well as the liquid form from all medicine dealers, or trial box of tablets by mail, on receipt of 50c. Address R. V. Pierce, M.D., Buffalo, N.Y.

Dr. Pierce's Great 1008 Page Illustrated Common Sense Medical Adviser will be sent FREE. Cloth Bound for 31 One-cent Stamps.

### Opinions on Copper

Opinions as to the immediate future price of copper are somewhat contradictory. Ex-Senator Clark thinks that "at the present rate of output it seems a question whether prices will hold up. Outputs were absorbed at their former rate of production when the war broke out, and there is a question as to whether there will be absorption of the augmented production."

Geo. L. Walker in his Boston Commercial copper letter says: Copper has continued relatively quiet during the past week and a tendency to shade prices slightly has developed.

It is reported that the largest producers and selling agencies are now beginning to book orders at a concession of about half a cent from the quotations recently prevailing. Lake is 20 1/4 to 22 1/2 cents and electrolytic is 19 1/4 to 20 1/4 cents a pound. So far as can be seen the only reasons for the price reduction are the successful manipulation of the standard market in London to an extraordinarily low level, the reduced volume of exports of raw copper, the slight increase in the foreign visible supply and the shattered confidence of consumers, due to these seemingly unfavorable developments.

## We Recommend the Oliver No. 7

IT'S SO QUIET! Just a pleasant little tapping—just the purring of the type against the platen—that's all.

This model means Lighter Touch, Improved Base, Greater All Round Efficiency, Less Mental and Physical Effort. Speed records that have never been equalled.

The first thing which invariably strikes the attention of one examining the "Silent Seven" for the first time is the wonderfully responsive touch. No one dreamed that such a delightful touch could be embodied in the mechanism of a machine.

The new tabulator is a marvel of efficiency. The carriage slides noiselessly to the appointed place and stops without a jar—an accomplishment which will lengthen the life of the machine. The left marginal release key is now placed in just the right position to act as an anchor for the fourth finger of the operator, and no competent touch operator will have any difficulty in changing from any other keyboard to this one.

Ten year old Florence Field, daughter of Cyrus Field, Professor of Shorthand in Detroit Commercial College, wrote 59 words per minute on The Oliver after two weeks' practice.

PRINTTYPE IS OWNED AND CONTROLLED EXCLUSIVELY BY THE "OLIVER TYPEWRITER COMPANY."

Can You Spend 17 Cents a day to better advantage than in the Purchase of this Wonderful Machine.

No child's education is complete without a Knowledge of the Oliver Typewriter.

Call or Address, G. Kay, Agent, Phoenix, B.C.

P.O. Box 234
