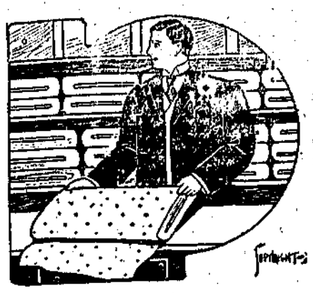
VICTORIA, B. C.

EIGHTH YEAR. PHOENIX, BRITISH COLUMBIA, SATURDAY, MARCH 9, 1907. No. 1

NEW ARRIVALS IN THE

DRY GOODS DEPT.



This week has been a busy one at the BIG STORE, opening up new spring goods, which we have displayed throughout the department for your inspection. Below we give a few reminders as to your wants at this season of the year.

New Nottingham Curtains
New Irish Point Curtains
New Bobbinet Ruffled Curtainings
New Madras Curtainings
New Swiss Spot Muslins
New Persian Lawns
New Victoria Lawns
New Linen Lawns
New Organdies
New Allover Laces
New Val. Laces
New Torchon Laces
New Pongee Silks
New Linen Waist Patterns
New Printed Silks
New Wash Silks
New Art Silks
New Cretonnes
New Art Denims
New Art Sateens
New Silk Kimonos
New Silk Windsor Ties
New Jap. Cotton Crepe
New Turkish Towels
New Table Linens
New Crash Towellings

The new samples for
CAMPBELL'S MADE-TO-MEASURE
Clothing are now in.

The Hunter-Kendrick Co. Ltd.
THE BIG STORE

Grocery Dept.

Ashcroft Potatoes
California Celery
California Oranges

RUSSET
ROMAN BEAUTY
MISSOURI PIPPIN
GREENING
} APPLES

Swift's Hams, Bacon and Lard

Tartan Brand Canned Goods and Groceries.

These goods cost you no more than others and are always reliable.

Hardware Dept.

We have just received a shipment of Fancy Glassware that should have been here for Christmas trade. We are selling this at a special price. Its worth while to look this lot over anyway. Our New Wall Papers are expected any day--better wait till you have seen them.

Morrin Thompson & Co.
GROCERS AND HARDWARE MERCHANTS

B. C. COPPER AND DOMINION CO.

May Be Some Basis For the Talk of Consolidation.

Are About Ready to Produce 25,000,000 Pounds of Copper Yearly.

Some weeks ago the Pioneer referred to the possibility of a consolidation of the B.C. Copper and the Dominion Copper Companies, and the following from New York, compiled to a large extent from the recently issued Pioneer Annual, and based on what the two corporations have accomplished, as well as on what they are expected to do in the future, will be found of interest in this connection:

New York, Mar. 1.—There are rumors of a merger of the British Columbia Copper Company and the Dominion Copper Company, and the talk is not altogether without foundation.

It can be stated with authority, however, that no definite steps have been taken or overtures, with a view of consolidation, yet been made by either of these two interests. There is reason to believe that a consolidation of the companies may take place, however, during the coming year.

A combination of the smelters and mines of these companies would result in an enterprise that would compare favorably with the Granby company, both as to size and the amount of output. The Granby mines and smelter are located in the same district in British Columbia, as are the bulk of the British Columbia and all of the Dominion properties.

The maximum capacity of the combined smelting plants of the B.C. and Dominion companies is 3,000 tons ore per day. With the furnaces working at their full capacity they should produce at least 25,000.000 pounds of copper annually. This production is figured on a recovery of only 20 pounds of copper per ton of rock treated, which is undoubtedly two or more pounds less than what is actually recovered from these ores.

PROSPECTIVE EARNINGS.

As both companies anticipate reducing the cost of producing copper to eight cents a pound with their improved smelting plants, the above mentioned production (25,000,000 pounds) would give the combined companies' net earnings of $3,000,000 or 30% on a capitalization of $10,000,000; 25% on a capital of $12,000,000; 23% on $13,000,000, and 20% on $15,000,000.

Placing the recovery of copper at 22 pounds per ton of rock treated, the annual production with present facilities would be approximately 27,720,000 pounds of copper.

Figuring again on a 20-cent market, with cost of production at 8 cents, the net earnings would be $3,326,400 or 33% on a capital of $10,000,000; 27% on $12,000,000; 25% on $13,000,000; 22% on $15,000,000.

With a yield of 24 pounds of copper to ton of rock treated the production would be increased to over 30,000,000 pounds of copper, and the net earnings $300,000 to $3,628,000.

The Granby ores yield on an average 24 pounds of copper to the ton treated, and there is a good possibility of the combined Dominion and British Columbia companies' ores being made to yield a like return.

QUESTION OF CAPITALIZATION.

While there is nothing at present to base any assumption as to what a British Columbia-Dominion company consolidation would be capitalized at, the foregoing figures are presented merely to convey an idea as to what the earning power of the combined companies would be under the various capitalizations mentioned, with their present mining and smelting facilities and with copper at 20 cents per pound.

Including the recent stock issue of the British Columbia Copper Company, there will be outstanding 503,360 shares of the total authorized issue of 600,000 shares of the company. There are 96,640 shares of unissued stock in the British Columbia treasury.

COMPARED WITH GRANBY.

At 8½ the 503,360 outstanding shares have a market value of $4,278,560. At 7¼ the stock of the Dominion company, with its $1,000,000 of bonds, are selling at a market value of $4,625,000. The present market value of the two companies combined is $8,903,560.

There are 135,000 shares of Granby stock outstanding. At $150 the company is selling at a market value of $20,250,000, or a difference of $11,346,440.

The Granby company is at present paying dividends at the rate of 12%, and it is expected that it will earn during the coming year at the rate of 24% to 30% on the stock.

The smelting plants of the British Columbia and the Dominion companies are but a short distance apart. The former is located at Greenwood and the latter at Boundary Falls, three miles distant. Both plants are on the same branch of the Canadian Pacific.

MINES IN SAME DISTRICT.

At Deadwood, three miles from the B. C. Copper Co. smelter, is located the Mother Lode group, the principal mine of the B. C. Copper Co. This mine is thoroughly equipped, and a large tonnage of ore is being taken from it daily. Directly adjoining the Mother Lode group is the Sunset group of mines, owned by the Dominion company, which includes the Crown Silver, Florence fraction, C. O. D. and Sunset mines.

Important developments have taken place in these properties during the last year. The Dominion company owns the Morrison group, which is also located in Deadwood camp.

At Summit camp the British Columbia company owns some very valuable properties, which include the B. C. group, the Oro Denoro and the Emma group, the latter of which the company owns a three-quarter interest. In this same camp is located the Mountain Rose mine, which is owned by the Dominion company. Summit camp is served by both the Canadian Pacific and Great Northern railways.

GREATER ECONOMY POSSIBLE.

It is quite obvious that, with the smelters and a number of the mining properties of both companies in such close proximity that larger operations with increased results and a corresponding degree of economy would occur under a single and capable management.

Following are the approximate areas of the several groups owned by the British Columbia Copper Company:

	ACRES
Mother Lode group	80
Emma group	140
Oro Denoro	50
Napoleon group	100
Lone Star and Washington	30
Total	400

The properties owned by the Dominion company cover some 500 acres in area, and all are located in the Boundary district.

The Brooklyn, Stemwinder, Montezuma, Idaho, Standard and Rawhide properties are located at Phoenix, and adjoin on two sides the Granby mines.

The claims in the Sunset group adjoin, as before mentioned, the Mother Lode group of the British Columbia company. The Dominion company also owns the Morrison group in Deadwood camp, and control in the Athelstan group in Wellington camp, and owns the Mountain Rose in Summit camp.

During the past year both companies have remodeled and thoroughly modernized their respective smelting plants, and when these improvements are completed the plants will compare favorably with the best in British Columbia, namely, the Granby smelter.

Under the conditions noted, it seems that a consolidation of the two companies would result in a strong combination, and with efficient management would, in a short time, make favorable comparisons with its very successful neighbor, the Granby Consolidated.

February School Report.

Total daily attendance, 1530; total actual attendance, 1496; average daily attendance, 76.50; average actual attendance, 74.80; number of pupils actually attending, 97.

Mining Paper for Spokane.

The Pioneer is in receipt of the first issue of the Northwest Mining News, published in Spokane by E.H. Hutchinson, a monthly that is chock full of mining information from Washington, Idaho, Montana, British Columbia and other localities. This is the first business like attempt in many years to publish a mining paper in Spokane, and the initial issue gives evidence of intention to stay and be a mining and financial success—not an easy combination in any part of the Northwest.

Latest Prices in Metals.

NEW YORK—Copper, electrolytic, $24-87½ @$25.12½; lake, 125.25 @ $25.50.
Bar Silver, 68⅞
Lead, $6.20 to $6.30.

Boundary Mining Notes

At the Snowshoe mine the force is now about 80 men.

It is expected to have two furnaces in operation at the B.C. Copper Co.'s smelter early next week.

This week the Granby No. 3 tunnel has been worked with three shifts for the first time in some months.

A Greenwood syndicate is being formed to work the Dimond fraction, which adjoins the Providence mine.

The B.C. Copper Co. has about 50 horses hauling ore from the Napoleon mine to the Great Northern, over bad roads.

Granby's shipments for February—28 days—were the smallest for many moons, being but 32,465 tons, thanks to the crippled railway traffic generally.

It is said that the ore now being worked on in the Strathmore is exceedingly rich, running high in native silver. About 15 men are employed at this property.

From Greenwood comes the report that the B.C. Copper Co. will mine and ship some of the sulphur ore from the Morrison mine, Deadwood camp, for a time, while the roads to the company's Napoleon mine are in such bad shape.

Ore is being stoped from the Riverside and Badger group, near Rock creek, and shipments are to be made before long. This is the high grade galena group that was bonded to P. J. Dermody and Spokane associates for $60,000 a short time ago.

It will be a month or two yet before the mammoth new furnace is ready for smelting operations at the Dominion Copper Co.'s Boundary Falls smelter. The delayed car loads of steel and other material having finally arrived, no time is being lost in the installation.

On the 1st of April the final payment of $3,000 on the $30,000 bond on the Skylark mine will be due, and the company now has the money in the bank to meet it. For the last thirty months the company has paid $1,000 per month on the bond, and has taken it out of the mine.

In about two weeks Manager Hodges expects to be prepared to operate all eight of his battery of enlarged furnaces at the Granby smelter, when he can handle about 3,000 tons of ore each twenty-four hours. It all depends on the supply of coke as to the time of getting the complete battery in blast, the railways falling down somewhat this week again.

Development at the Jewel mine, the only property being worked in Long Lake camp, is reported to be showing up very satisfactorily under R. R. Roberts, the superintendent. This property, which was formerly owned by the Jewel Gold Mines, Ltd., is now said to be controlled by W. Galloway, a banker living in Scotland.

Last week a rather bad rock slide occurred at the B.C. Copper Co.'s Mother Lode mine, by which the ore crusher building was damaged and put out of commission for a few days. A slide had never occurred there before. Fortunately, no one was hurt, the men in the building being warned by unusual noises as the rock began to give way.

The active work of laying the six-inch compressed air line from the Dominion Copper Co.'s new Idaho compressor to the Rawhide mine, something over a mile, is now under way. When completed and the compressor is in operation, the Rawhide will be operated with more machine drills than at present, to supply the increased ore tonnage.

The new electric hoist for the Moreen mine, Deadwood camp, being operated by the Alliance Gold and Copper Mining Co., has arrived at Greenwood, and is being placed in position at the property. A. J. Morrison, the superintendent, is preparing to resume active operations at the property, where extensive development will soon be under way, some men going up to the mine this week. Officials of the company are expected in the Boundary from Minneapolis in a few days.

New Officers for Miners' Union.

The semi-annual election of Phoenix Miners' Union No. 8, W. F. of M., took place here last Saturday, and there being considerable interest in the outcome, a large vote was polled. The following were chosen to have charge of the affairs of the union for the ensuing six months:

President, W. J. Louttit; vice-president, Dan Paterson; financial secretary, Walter Morrison (re elected); recording secretary, Carlton H. Cook; assistant recording secretary, D. J. Weir; treasurer, Walter S. Cook; conductor, H. Walsh; warden, S. S. Vanbuskirk; trustees, J. McIver, Angus McPherson, W. S. Cook, Frank Knott and D. W. McKenzie; delegate to Denver convention, Robert D. Mitchell; delegates to annual meeting of district association No. 6, meeting this week at Rossland, Walter Morrison, Neil McBeth, J. Frank Jones W. D. McKenzie and J. C. Halsey.

GRANBY CO.'S NO. 6 DIVIDEND

$405,000 Declared this Week.

Brings Total Dividends Up To $2,158,360.

Last Tuesday at the regular monthly meeting of the board of directors of the Granby Consolidated, held at the company's New York office, 52 Broadway, a regular quarterly dividend of two per cent was declared and an extra dividend of one per cent upon the par value of the stock outstanding, payable out of the net earnings of the company on March 30th, 1907. For this purpose the transfer books of the company close March 15th and reopen April 1st. As there are now issued 135,000 shares of the new par value of $100, this dividend amounts to $405,000, or exactly the same as for each of the four dividends declared by this company during 1906. The company's first dividend was paid in December, 1903, and was at the rate of one per cent.

For the lest two or three months the company has been operating with great difficulty, owing to weather conditions and car, fuel and coke shortage, common all over the west, and it must be pleasant to shareholders to note that, notwithstanding these adverse matters, the company is able to continue its dividend paying policy. With the above difficulties done away now very shortly, it would not be surprising if the June extra dividend was larger than the one per cent now declared in this way. The stock is now on a regular eight per cent basis, with "extras" liable to be added at the time of any regular declaration.

This makes more than $2,000,000 that the Granby will have paid in profits to the shareholders, the payments and amounts being as follows:

No. 1—December, 1903	$133,630
No. 2—January, 1906	405,000
No. 3—May, 1906	405,000
No. 4—September, 1906	405,000
No. 5—December, 1906	405,000
No. 6—March, 1907	405,000
Total	$2,158,630

Phoenix Club Officers.

At the annual meeting of the Phoenix Club, held in the Club Rooms in the McHale block last Monday, the following officers were elected: President, James Henderson; vice-president, E. A. Black; sec.-treas. and steward, T. B. Cosgrove; board of trustees, Martin McHale, C.J. McAstocker and Dan Biner.

COMING AND GOING

Mrs. J. B. Boyle and little daughter left for Vancouver on Monday, where they will spend some little time.

Wm. Yolen Williams, engineer for the Jay P. Graves mining interests, with headquarters in Spokane, spent a few days in camp this week.

Rev. Samuel Lundie returned Saturday from the meeting of the Rootenay Presbytery which was held at Nelson, and which was very successful.

Mrs. P. F. Roosa, wife of the paymaster of the Dominion Copper Co., left Boundary Falls last Monday on a visit to her former home, Salt Lake City.

J. L. Martin, of the Phoenix Electric Lighting Co, has been confined to his home for about ten days with an aggravating attack of mumps, but is now improving.

A. W. Haley and wife expect to leave Monday or Tuesday for Coeur d'Alene, Idaho, where they will make their home in the future. Mr. Moir, of Sandon, succeeds Mr. Haley as C.P.R. agent here.

H. S. Turner and wife started last Sunday on a trip that will take them as far as Southern California. They will visit friends in Oregon and look after some business matters there before proceeding further south.

John L. Parker, superintendent of the Dominion Copper mines several years ago under James Breen, but who latterly has been with the Brown Alaska Co., at Hadley, Alaska, has resigned and opened an office as consulting engineer in Seattle.

Thomas R. Drummond, local manager for the Dominion Copper Co., according to Boston reports is slated for a similar position with the Nipissing mine at Cobalt, of which company Samuel Newhouse is the president and M. M. Johnson the consulting engineer.

Ralph Smailes, of Greenwood, who has been absent since last August, working on Midway and Vernon railway affairs, was in Greenwood last week for a few days, departing again on the same business, which he feels confident of bringing to a successful issue at no distant dnte,

Dr. R. B. Boucher and wife left last Saturday for Vancouver, for a visit. In a couple of weeks, or thereabouts, they will start for the east, whence they go to Vienna, Austria, where the doctor expects to be for a year or two. On their way east they will likely stop in Phoenix again for a few days.

R. H. Anderson, at one time in charge of the B.C. mine, in Summit camp, has resigned his position as superintendent of the Sullivan Group Mining Company at Kimberley, and James Finley, mayor of Cranbrook, B.C., has been appointed to succeed him. Mr. Anderson has accepted a position in the Coeur d'Alenes.

Did you labor last Sunday? If so, you had better watch out or the Sunday Observance Act will catch you—and then there'll be trouble.

Cobalt is undoubtedly a great mining camp, but it differs from most mining camps in that it does not have many booze shops. A few days ago the conductors of several "blind pigs" in that locality were fined $11,000. If accounts are reliable, they should be able to dig this small sum out of almost any of the prospects in a day or two.

Hereafter, in referring to the member for Yale-Cariboo, one should be particular to specify which Duncan Ross is meant, as Duncan C. Ross, son of ex-Premier Ross, of Ontario, was returned to Ottawa week before last in West Middlesex. However, our own Duncan will not be likely to allow his light to be hid under a bushel, for he is not built that way.

Spring has been tapping at the back door of winter of late with some success. The rest of this year, with the weather conditions settled again, promises to be a record breaker in copper production in the Boundary. In another month or two, there should be at least 5,000 tons of ore mined, shipped and treated every twenty-four hours in this district.

Recently the Pioneer remarked on a flotation that is doing extensive stock advertising in the east under the title of the British-American Mines and Smelter Co., purporting to have rich copper properties in East Kootenay, alleged by close to the Granby. The concern still seems to be angling for suckers through publicity in papers that do not care whether their readers are bitten or not, and the latest issue of the B.C. Mining Record gives it a great setting out. The sooner such concerns are exposed and forced out of business the better for the investing public.

As foreshadowed a month ago in these colums, this week the Granby Consolidated declared its first "regular" quarterly two per cent. dividend, with an extra dividend of one per cent. This dividend is payable March 30th. Like the last four previous declarations, this profit sharing amounts to $405,000, and makes a total of $2,158,630 so far declared by the Granby in dividends. Heretofore these declarations have been called "a dividend," but this declaration is entitled "regular," and means that they may be expected hereafter every three months.

While it is probable that but few Granby shares are now held in the Boundary, local holders having taken their profit when Granby shares began to soar a couple of years ago, it is pleasant news here just the same.

Eczema, Tetter, Salt Rheum, Itch, Ring Worm, Herpes, Barbers' Itch.

All of these diseases are attended by intense itching, which is almost instantly relieved by applying Chamberlain's Salve, and by its continued use a permanent cure may be effected. It has, in fact, cured many cases that had resisted other treatment. Price 25 cents per box. For sale by all druggists.

THINKS IT BEST AND MOST USEFUL.

Opinion Regarding Pioneer's Fourth Annual.

The following article appears in the current issue of the British Columbia Mining Record, published at Victoria:

The "Fourth Annual Holiday Number" of the Pioneer, published at Phoenix, Boundary district, is the best and most useful publication dealing with the important mining and smelting industries of the district from which has been obtained during several recent years the greater part of the copper produced in Canada, that has come under our notice. Freely illustrated descriptions of mining camps, individual mines, smelters, electric power systems, railways, etc., together with valuable and instructive statistics relating to the mineral production of the Boundary, fill most of the pages of this special number which contains between 60 and 70 pages.

There are nearly 100 half tones of mine, smelter and other views, representative men, and including line cuts of modern maps of the district and of different sections of it, prepared specially for the Pioneer, consequently up-to-date and giving the leading features of this big mining district. The outlying camps—Franklin, up the north fork of Kettle river; Beaverdell and Camp McKinney—all have attention. Prominence is given, as well, to what are known as the "high grade" mines of the Boundary, these including a number of silver-gold quartz properties in Greenwood, Phoenix and Beaverdell Carmi camps. A brief historical account of the district, some information concerning its chief "parliamentary friends," and particulars of several of its towns and their institutions are also given.

Altogether the "Annual" is a publication that is distinctly a credit to its enterprising publisher, W. B. Willcox, while the wide distribution of the 6,000 copies printed cannot fail to be of much benefit to the district, especially since much care has been taken to make the information reliable. For all interested, or likely to be, in the mining district producing the larger part of the ore mined in British Columbia, this number will be found worth far more than the 25 cents price at which it is published.

Do Not Crowd the System.

The first warm days of spring bring with them a desire to get out and enjoy the exhilirating air and sunshine. Children that have been housed up all winter are brought out and you wonder where they all came from. The heavy winter clothing is thrown aside and many shed their flannels. Then a cold wave comes and people say that grip is epidemic. Colds at this season are even more dangerous than in midwinter, as there is much more danger of pneumonia. Take Chamberlain's Cough Remedy, however, and you will have nothing to fear. It always cures, and we have never known a cold to result in pneumonia when it was used. It is pleasant and safe to take. Children like it. For sale by all druggists.

An exchange tells of a newspaper reporter who interviewed thirty successful business men and found that all of them when boys had been governed strictly and frequently thrashed. He also interviewed thirty loafers and learned that twenty-seven of them had been "mamma's darling," and the other three had been reared by their grandmothers.

GOOD REPORT FOR YEAR 1907

International Coal Has $393,469 Surplus.

Net Profit Last Year Was $198,192.

Boundary stockholders of the International Coal and Coke Company were pleased with the annual report of the company, which was presented at a recent meeting in Spokane. The mines are located at Coleman, Alberta, and during the three years that the company has been working a surplus of $393,469 has been accumulated. A. C. Flumerfelt, of Victoria, and H. N. Galer, of Coleman, president and vice-president of the company, attended the Spokane meeting. The leading features of the report follow:

A dividend of $28,000 was paid on February 1st of the present year, and the surplus at the close of 1906 was $393,469. The company has been in active operation just three years, and the present plant cost $429,707. During the last year $35,000 was spent in extending the plant, including the construction of 90 coke ovens.

The net profit of the year was $198,192, being over 7 per cent. on outstanding capital. During 1906 334,230 tons of coal were produced and of this 49,638 tons went to the company's coke ovens, producing 31,066 tons of coke, the balance being disposed of on the market.

The company's payroll for the year was $360,874, the average number of men employed being 365, who worked 249 days.

The company suffered for want of cars to carry away their output, an incident that prevented their working the men full time, and which cut down their profits.

The directors elected were: H. N. Galer, Coleman; W. G. Graves and D. Schultz, Spokane; C. S. Houghton, Boston, and D. M. Rogers, Victoria. The officers elected are: A. C. Flumerfelt, president; H. N. Galer, vice-president, and W. G. Graves, secretary.

OUR COPPER CORNER

Copper is now the most important metal in the world, says the Mining and Engineering Review. A shrinkage in production immediately affects all of the industries, as electric power has become a vital factor in trade, commerce and manufacture. To such an enormous extent has the demand grown that it is impossible to create a surplus and there is absolutely no "visible supply" as in former years. The product is purchased for months ahead in many of the big mines. It is true that many important discoveries were made within the past two years, and the mines of Inyo county, California, and Ely, Nevada, will add much to the production. But discoveries do not mean that copper can be immediately produced and become a marketable commodity. Development, no matter how active, cannot put big copper mines on a producing basis in a year or perhaps not in two, three or five years, everything depending on conditions, finances, facilities for transportation, cost of mining, etc.

When production begins in the newly discovered camps it will be unprecedented. But in the meantime consumption is ever on the increase, and since the fact began to be recognized, about 1903, that the world's normal production, with the mines then in operation, could not keep pace with the demand, the price has advanced rapidly from 11 cents in 1903 to 12 cents in 1904, 14 cents in 1905, 18 cents in 1906 and 25 cents in 1907 approximately in round figures. And the end is not yet, for consumers cannot hope for help from Greenwater, Ubeheba, or Ely this year, and perhaps not next, for the impediments which confront the men who are putting their money in those camps are more than can be conceived by the ordinary layman. So that those who are predicting 30 and 40 cents for copper this year may not be so far from a good guess as may be imagined.

The incentive to mine for copper at the present time is greater than any thing which could be presented to capital. The facts that the copper mines of the United States produced in 1906 $185,000,000 worth of the red metal and that dividends to the amount of $58,000,000 were paid are considerations worthy the attention of financiers.

Another fact which is attracting investors to copper securities is that at no time in the world's history have the stocks of any industry advanced in such proportion as have copper shares within the past few years. In 1900 100 shares of Calumet and Arizona sold for $125. In 1907 the same shares are worth $14,000 to $15,000. That is given as an instance of the enhancement of the values of copper stocks as the mines pass from the development to the productive stage. It is an old story, but a true one, nevertheless, that Calumet & Hecla shares sold at 10 cents when the mines were said to be wildcats. The quoted price today, $960 per share, has been an advance worth waiting for.

Cheap copper is a thing of the past. The progress of the electrical industry as applied to manufacturing, transportation and illuminating has placed it far ahead of all the useful metals, and no man living can see far enough ahead to venture a prediction as to when the increase of consumption shall cease.

Printing That Counts

A creditable job of printing on the stationery you use, is like a good suit of clothes when one is doing business—first impressions count.

If you use a rubber stamp on your letter heads or envelopes, you will be put down as of the rubber stamp calibre. If you are a business man, and use no printed stationery, it is natural to suppose that your business is not of sufficient importance to require it, and your credit likewise.

If you wish Modern Stationery, gotten up by competent workmen, worked on the best of stock, imported or domestic—stationery that does not have the earmarks of the Cheap John printery, we can furnish it from the only print shop in the Boundary operated by electricity.

We know that business men of Phoenix have sent to Spokane, Chicago, Detroit, Hamilton, St. Louis, Omaha and other places, in the past, for printing that could have been done right here—and probably in better style. We'd charge a little more, of course, just as the merchant must charge more than Cheap John Tim, of Toronto—and its worth a little more. Besides, if you spend your dollars here for printing, you have a chance to get them back some day through the Pioneer and its employees. If you spend them in the East, you'll never see them again. We have print shop facilities that no other office in this section possesses. Come and see us.

THE COPPER HANDBOOK

(New Edition Issued November 15, 1906.)

Is a dozen books in one, covering the history, geography, geology, chemistry, mineralogy, metallurgy, terminology, uses, statistics and finances of copper. It is a practical book, useful to all and necessary to most men engaged in any branch of the copper industry.

Its facts will pass muster with the trained scientists, and its language is easily understood by the everyday man. It gives the plain facts in plain English without fear or favor. It lists and describes 4626 copper mines and companies in all parts of the world, descriptions running from two lines to sixteen pages, according to importance of the property. The COPPER HANDBOOK is conceded to be the

World's Standard Reference Book on Copper.

The mining man needs the book for the facts it gives him about mines, mining and metal. The investor needs the book for the facts it gives him about mining, mining investments and copper statistics. Hundreds of swindling companies are exposed in plain English.

Price is $5 in buckram with gilt top; $7.50 in full library morocco. Will be sent, fully prepaid, on approval, to any address ordered, and may be returned within a week of receipt if not found fully satisfactory.

Nervous Prostration

IT IS WORRY THAT KILLS, NOT WORK

Work without worry usually tends to prolong life. On the other hand, worry, with or without work, is fatal, because it uses up what the Doctors call the "Lecithin," a phosphorized fat which is the chief constituent of the brain and nervous system—a waste which, if not stayed in time, means complete nervous wreck. The evident moral is "don't worry"—advice easy to give, and in these days of stress and strain practically impossible to take. The alternative is: find some way of replacing the wasted Lecithin—the phosphorized fat. This absolutely essential element will be found in its most perfect, palatable and assimilable form in

FERROL

an emulsion of Cod Liver Oil and Phosphorus (phosphorized fat) together with Iron, the recognized blood builder—making FERROL the ideal nutrient it claims to be.

For the prevention or treatment of nervous prostration FERROL is absolutely unequalled—it is safe, sure and speedy.

The formula of FERROL is freely exposed, consequently

Big Deal at Republic.

Harry L. Rogers, of Butte, backed by Montana and New York capital, recently took a five-year lease and an option to buy the Republic mine in that camp for $50,000, and it is reported the purchasers are furthering a deal to take over and consolidate the principal mines of the camp, including the Quilp, Pearl Consolidated, Ben Hur, Trade Dollar and Tom Thumb. It is also stated that a 500-ton mill will be constructed at a cost of about $250,000, and that the expense of treating the ores will be less than $3 per ton. It may therefore be possible to mine and treat Republic ores at from $4 to $5 per ton, which would permit of a profit, without counting on new developments.

Chamberlain's Cough Remedy is Both Agreeable and Effective.

Chamberlain's Cough Remedy has no superior for coughs, colds and croup, and the fact that it is pleasant to take and contains nothing in any way injurious has made it a favorite with mothers. Mr. W. S. Pelham, a merchant of Kirksville, Iowa, says: "For more than twenty years Chamberlain's Congh Remedy has been my leading remedy for all throat troubles. It is especially successful in cases of croup. Children like it and my customers who have used it will not take any other." For sale by all druggists.

The man who went out to milk and sat down on a boulder in the middle of the pasture and waited for the cow to back up was a twin to the man who kept a store and wouldn't advertise because he reasoned that the purchasing public would back up to his place of business when it wanted something.

LONDON ON THE DOMINION CO.

Thinks Well of Boundary Country.

Gives Striking Features of The Property.

The London Mining Journal, the oldest and most conservative publication of its kind in the world, recently had the following about the Dominion Copper Co. and its properties:

Attention has recently been directed in influential quarters to the prospects of the Dominion Copper Co.—a concern which, as its name implies, is working under the British flag in a colony remarkable for its great mineral wealth—and inquiries having been made as to the position and character of the undertaking, the following details, based on official statements, will doubtless be of interest to our readers.

The kernel of the position of the company, which is registered under the laws of British Columbia, is its possession of properties containing large deposits of low grade copper ore that are being worked at an ample margin of profit, and furthermore, the strength of its financial position, the $750,000 remaining in the coffers of the company enabling the necessary provision to be made for the progressive increase and improvement of the plant which is essential to cope with an expanding scale of operations, without trenching upon profits available for dividends.

The present and prospective growth of the company's operations forms the most striking feature of the concern. Until recently the plant had a capacity of 650 tons per day, and the net earnings for the month of November last were $30,000 upon this basis. As a result of arrangements made for increasing the output, the blowing-in of an additional furnace early in the present month will increase the capacity to 1,500 tons a day. Taking, however, an average of 1,200 tons of ore treated per diem, thus making a liberal allowance for the minor accidents which are certain to occur in the conduct of a big industrial enterprise, the company will produce between 750,000 and 800,000 lb. of copper per month, at a cost carefully calculated at 8 cents per lb. Upon this scale of increased production, and assuming that no further diminution of reduction costs occurs, the net earnings will rise from $30,000 per month on an average to $75,000 or $80.000, sufficient to pay 14 per cent. upon the par value of the stock, and a substantially higher percentage upon the present price of the shares. With copper reckoned at its present price the return would be still higher. Speaking of the recently added furnace, M. M. Johnson, the company's consulting engineer said: "This new furnace will give us an additional capacity of from 700 to 900 tons per day, or a total capacity, with the furnaces now running of frem 1,300 to 1,500 tons daily. The new furnace will be mechanically fed, eliminating hand labor almost entirely. As soon as practicable, the mechanical feed will be applied to the furnaces now in use also." The operations of the company, however, are projected upon a far broader scale than this, and plans are being prepared and estimates being made for the increase of the plant to a capacity of 3,000 tons a day. With a capacity of 3,000 tons of ore daily the Dominion Copper Company would be in a position to produce 25,000,000 lb. of copper per annum. On 18-cent copper this production would give the company net earnings of $2,500,000, or 50 per cent on the par value of the stock—$5. per share. These are big figures, and point to the expansion of the concern upon lines of great magnitude; but it is pointed out that they are carefully calculated from data composed of the present product of the company combined with the known ore content of the mines and the designed capacity of the additional plant. Already the smelter and mines are equipped with the most modern plant, driven by hydro-electrical power, which has resulted in reduced costs.

The properties of the company are situated in British Columbia, Canada, and cover an area of 360 acres. They adjoin the property of the Granby mines whose ore values are the same as those of the Dominion Copper Company, and who have a smelter capacity at the present time of 2,700 tons per day, while their net earnings were over $1,850,000.

The company's chief mines are the Brooklyn, the Idaho and the Rawhide. The Brooklyn has been the principal producer to date, averaging 500 tons of ore per day. There are calculated to be 450,000 tons of ore in sight above the 400-foot level. The average values in this mine are returned at: Copper, 1.43 per cent.; gold, $1.32; silver, 25 cents. The Idaho mine is a most important asset, and is confidently expected shortly to produce a large tonnage daily. Cross-cuts show ore bodies similar to those in the Granby's mines, which adjoin this property, and from which 2,000 tons per day are being mined. The Idaho claim is 1,500 feet square.

Describing the situation at the chief mines, Mr. Johnson recently said: "The Rawhide mine is looking well. We have pushed development work on this property during the past few months, and the surface work is very satisfactory. We are getting a splendid tonnage of ore there, and the four tunnels are opened up all in solid ore. We expect to take about 400 tons a day from the Rawhide when the new furnace is blown in. We are getting the most of our ore at present from the Brooklyn. The Idaho and Stemwinder claims are being rapidly developed. We are taking about 50 tons a day from the Idaho, and the shipments from this property will be gradually increased.

"Important developments have taken place at the Sunset group, which includes the Sunset, C.O.D., Florence Fraction, and Crown Silver claims. The ores from this group run heavy in iron, and have been used only as a flux, but during the past 60 days the copper content in these ores has increased, and it is now running between 1.14 and 1.25 per cent. copper. There are good indications that these ores will show increased copper values at depth. At the Athelstan mine the shaft is being unwatered. This shaft is down to a depth of 250 feet. We will start cross-cutting at the 200-foot level in order to develop some good backs of ore."

With the present figures of production and profit dividends are considered to be well within sight, and while the management of the concern is officially silent on the subject, a well known Boston paper reproduces a statement to the effect that the directors have decided, barring accidents, to pay dividends commencing with the second quarter of the current year, at the rate of 10 per cent. on the par value of the stock.

It will not cost you a cent to try Chamberlain's Stomach and Liver Tablets, and they are excellent for stomach troubles and constipation. Get a free sample at all drug stores.

The Pioneer Wonders---

Why Greenwood needed two chiefs of police last week.

—

When we can expect to see every furnace in the three Boundary smelters in blast at the same time.

—

How closely the Dominion Sunday Observance bill will be enforced in British Columbia.

—

If residents of Phoenix appreciate the climatic conditions here over most places in this province.

—

How much "ice" the three Socialist members will cut in the provincial legislative assembly, which began its session this week.

—

Why Greenwood and Phoenix should not combine and secure an adequate water supply, as both places have shortages at times.

Rheumatic Pains Relieved.

B. F. Crocker, Esq., now 84 years of age, and for twenty years Justice of the Peace at Martinsburg, Iowa, says: "I am terribly afflicted with sciatic rheumatism in my left arm and right hip. I have used three bottles of Chamberlain's Pain Balm and it did me lots of good." For sale by all druggists.

PROVINCIAL.

A civil and criminal assize court is to be established in Fernie.

There is a movement on foot to institute a Rebekah degree lodge in Trail.

The Fernie Ledger has passed into the hands of the United Mine Workers of America.

Moyie wants a bank, telephone system, electric lights and a fire-hall—and proposes to have them.

A Vancouver paper says that W. A. Galliher, M.P. for Nelson riding, will shortly open a law office in Vancouver. It is said that his principal client will be one of the new transcontinental railways.

The Outcrop, a weekly that was published at Wilmer, in the Windermere district, for a number of years, has become tired of waiting for the construction of the Kootenay Central railway, and is reported to have turned up its little toes in the journalistic graveyard.

Mail Service in Yale-Cariboo.

An illustration of the excellence of the mail service in Yale-Cariboo is that of the six local newspapers published in the electoral districts of Grand Forks and Greenwood, not a single copy of one of them published subsequent to the election on the 2d of February reached this office before the 16th. And yet Duncan Ross feels very sore if any paper in Yale-Cariboo complains of the rottenness of the mail service.—Hedley Gazette.

Tea is a mental and physical stimulant. It is an appetizer and a refresher of the spirits. It is recognized by the most prominent physicians to have nutritive value through its gluten and nitrogen. According to Dr. John Coakly Lettsom, a noted medical writer, its staying powers and capacity for repairing the body's wastes are very great, but all this is dependent upon the tea being grown at a high elevation, and therefore of fine quality, and this you can always rely upon obtaining when your tea is gotten in the well known sealed lead packets of the "Salada" Tea Co.

CAUGHT BY THE GRIP--RELEASED BY PE-RU-NA.

La Grippe Is Epidemic Catarrh.

LA GRIPPE spares no class or nationality. The cultured and the ignorant, the aristocrat and the pauper, the masses and the classes are all subject to la grippe. None are exempt—all are liable.

La grippe is well-named. The original term, la grippe, is French, but it has been shortened by the busy American to one word "grip."

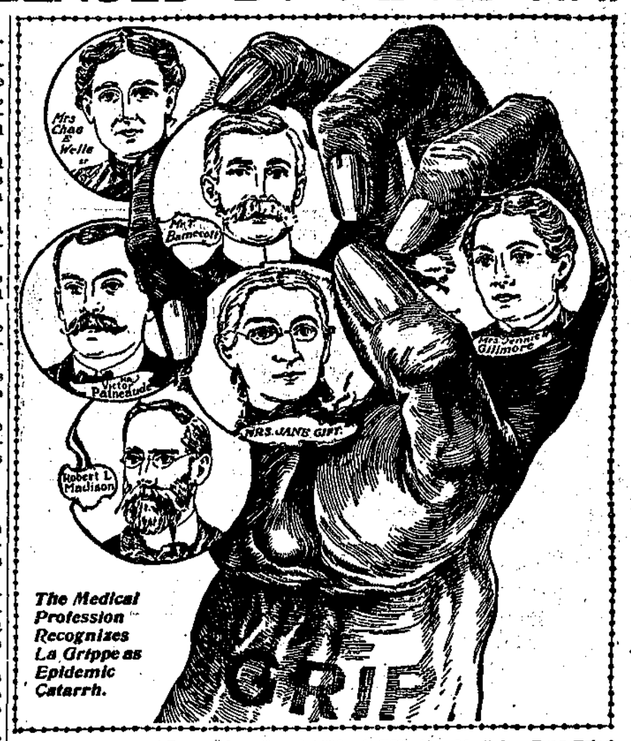
Without any intention of doing so, a new word has been coined which describes the disease exactly.

The ailment clings to the patient as tenaciously as if some terrible giant had clutched him in a fatal clasp.

Men, women and children—whole towns and cities are caught in the baneful grip of this terrible monster.

Have you the grip? Or, rather, has the grip caught you? If so, read the following letters.

These testimonials will show you the quickest and best means of ridding yourself of this tenacious disease and its after-effects.



Suffered Twelve Years From After-Effects of La Grippe.

Mr. Victor Patneaude, 878 Madison St., Topeka, Kas., a well-known carpenter and member of Knights and Ladies of Security, writes:

"Twelve years ago I had a severe attack of la grippe and I never really recovered my health and strength—but grew weaker every year, until I was unable to work.

"Two years ago I began using Peruna and it built up my strength so that in a couple of months I was able to go to work again.

"This winter I had another attack of la grippe, but Peruna soon drove it out of my system.

"My wife and I consider Peruna a household remedy."

Pneumonia Followed La Grippe—Pe-ru-na, the Remedy That Brought Relief.

Mr. T. Barnecott, West Aylmer, Ontario, Can., writes:

"Last winter I was ill with pneumonia after having la grippe. I took Peruna for two months, when I became quite well, and I can say that any one can be cured by it in a reasonable time and at little expense.

"Every time I take a cold, I take some Peruna, which makes me well again.

"I also advised it for my daughter who was so ill with prostration that she could not follow her trade of dress making.

"A bottle of Peruna made such a change in her that she has been able to follow her trade ever since.

"I also induced a young lady, who was all rundown and confined to the house, to take Peruna, and after taking Peruna for three months she is able to follow her trade of tailoring.

"I can recommend Peruna for all such who are ill and require a tonic."

Systemic Catarrh, the Result of La Grippe. Pe-ru-na Receives Credit for Present Good Health.

Mrs. Jennie W. Gilmore, Box 44, White Oak, Ind. Ter., formerly Housekeeper for Indiana Reform School for Boys, writes:

"Six years ago I had la grippe, which was followed by systemic catarrh.

"The only thing I used was Peruna and Manalin, and I have been in better health the last three years than for years before.

"I give Peruna all the credit for my good health."

Pe-ru-na—A Tonic After La Grippe.

Mrs. Chas. E. Wells, Sr., Delaware, Ohio, writes:

"After a severe attack of la grippe, I took Peruna and found it a very good tonic."

Judge Horatio J. Goss, Hartwell, Ga., writes: "I had a severe spell of la grippe which left me with systemic catarrh. A friend advised me to try Peruna. The third bottle completed the cure."

"Most Effective Medicine Ever Tried for La Grippe."

Robt. L. Madison, A. M., Principal of Cullowhee High School, Painter, N. C., is chairman of the Jackson County Board of Education. He has for nearly six years been teaching in Painter.

He is a writer of occasional verse and has contributed to a number of leading papers and magazines,—religious, educational and secular.

In speaking of Peruna, Mr. Madison says:

"I am hardly ever without Peruna in my home. It is the most effective medicine that I have ever tried for la grippe.

"It also cured my wife of nasal catarrh. Her condition at one time was such that she could not at night breathe through her nostrils.

"In consequence, an inflamed condition of the throat was brought about, getting worse and worse, and yielding to no remedy until Peruna was tried."

For special instructions, address Dr. Hartman, President of the Hartman Sanitarium, Columbus, Ohio.

Skin Protection

For skin comfort, skin health, skin beauty and for protection against hard water, strong sun and wind use

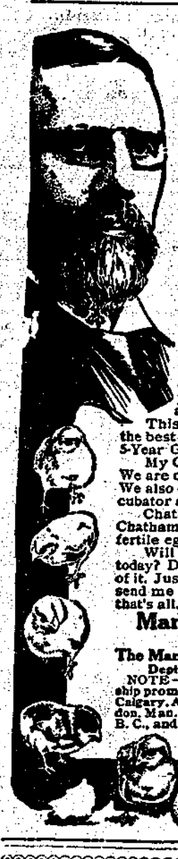
Let Me Sell You a Chatham Incubator —On Time



Do you know there is big money in raising poultry? Do you know there is more money in running a good incubator than in almost anything else you can do for the amount of time and trouble it takes? Do you know my incubator will pay you a bigger profit than any other thing you can have on your place?

Well, all these things are true, and I can prove it. Thousands of people all over Canada have proved it every year for the last five years.

I want to quote you a price on my Chatham Incubator, —sold ON TIME. I want to send you my Chatham book. This incubator book is *free*— I'll send it to you for just a postal card. It tells you a lot you ought to know about the Poultry business—it tells you how to make *money* out of chickens—it tells you how my Chatham Incubator will make you *more* money than you can make with hens—far more, and with less trouble.

This book tells you how my Incubators are made—why they are the best ever invented—and why I sell them ON TIME and on a 5-Year Guarantee.

My Company has been in business in Canada for over 50 years. We are one of the largest wood-working factories in the country. We also operate a large factory at Detroit, Mich. We have the Incubator and Brooder business down to a science.

Chatham Incubators and Brooders will make you money, for a Chatham Incubator will hatch a live, healthy chicken out of every fertile egg put into it, in 21 days.

Will you write for my book today? Do it now while you think of it. Just say on a postal "Please send me your Incubator Book"—that's all. Address me personally.

In and Around Phoenix

BRIEF TOPICS OF LOCAL AND GENERAL INTEREST TO PHOENICIANS.

Don't forget Boyle is the Druggist.

Hannam's milk suffers no addition or subtraction.

March 15th, St. Patrick's concert in St. Andrew's church.

Sparkling Irish wit and humor at St. Patrick's concert.

Dry wood in car lots. Apply to J. Trombley, Phoenix, B. C.

Before buying your furniture elsewhere, call on R. J. Gardner.

Ireland in Song and Story, next Friday evening, at St. Andrew's.

Prescriptions properly prepared by Boyle, the Druggist.

Burton's and Bass' Ale on draft ta the Hotel Brooklyn.

Woodchoppers wanted. Inquire of J. J. Bassett, Hartford Junction.

See Miss McDonald, milliner, for sewing machines and supplies.

Sewing machines to rent at $3 per month. See Miss McDonald, milliner.

Bert Tatham went to Halcyon Hot Springs yesterday, for a course of the waters.

Rev. C. W. Whittaker will preach in the Methodist church in Grand Forks on Sunday.

Miss McDonald, milliner, announces that her spring millinery has arrived and is now on display.

The local fire brigade has handed in its resignation in a body to Acting Mayor McAuliffe.

Encyclopaedia Britannica, 26 vols, for sale at less than half cost. Inquire at Pioneer office.

With the melting of the heavy snow of this winter, the local water situation improves somewhat.

One night last week, about three o'clock, a physician was called by the parents to attend little three year old Percy Johnstone, on Brooklyn avenue, who was ill from lobar pneumonia. The doctor advised immediate removal to Greenwood to a lower level, as the child might not live a couple of hours The father at once took the little one in a rig to Greenwood to the hospital there, but the child died after being there half an hour. The funeral was held in Greenwood.

Dr. Mathison, dentist.

Boyle, the Druggist.

Dr. Mathison, dentist, Bank Block, March 10th to 14th, inclusive.

Refreshments served at St. Patrick's concert, March 15th, in St. Andrew's church. Admission 25c.

Rev. E. Manuel, of Grand Forks, will preach in behalf of missions at the Methodist church tomorrow.

Miss Murray, of the staff of the Phoenix general hospital, went to Nelson this week, to spend a well earned vacation.

G. W. Rumberger is reported to have extended his trip, which took him to Regina, as far as Cobalt, where it is understood a prospector whom he backed has made good.

Contractor T. J. Gallagher, who is working about 70 men on the Granby's Victoria shaft spur grade for the Great Northern, does not propose to operate on Sundays. Blasts from the new work are heard six days in the week.

McRae Brothers & Smith, Ltd., with stores in Greenwood and Phoenix, is applying to the lieutenant-governor in council for permission to change the name of the corporation to McRae Brothers, Limited. The headquarters of the company are in Phoenix.

W. D. Willson, who had the contract from the Great Northern for moving the Granby stables 25 feet, to avoid the right of way for the new Victoria shaft spur, has finished the job, the stables being used continuously during the moving operations.

Ladies taking part in the Calico ball of the Catholic Ladies' Aid on April 1st, should wear a calico dress and bring a calico four-in-hand tie to match. Tickets are selling so well already that a second instalment has been ordered.

Violet, the two year old daughter of Angelo and Mrs. Schulli, of the Golden hotel, died last week Friday at the Grand Forks hospital, of lobar pneumonia. The child was ill here for several days and was taken to Grand Forks on Thursday. The funeral was held last Sunday, interment taking place in the Phoenix cemetery.

Boundary Side Lights

The Greenwood Times states that there is a good deal of complaint in that place about the local milk supply.

J. Burtt Morgan, formerly a minister of Grand Forks, is now editor and proprietor of the Chilliwack Advance, a paper recently acquired in the Fraser river valley town.

Greenwood's reorganized board of trade has a membership of 28, and is actively preparing for the annual meeting of the Associated Boards, to be held there next Wednesday.

Midway is not likely to contribute so generously to the support of the Dominion government this year as it did last, when $30,783 were collected at the local customs office.—Midway Star.

It is said that the Yale-Columbia Lumber Co., with mills at Cascade and other points, has unfilled orders on its books amounting to some 600 cars, the delay being largely caused by the car and fuel shortage.

The big log jam in the Kettle river near Westbridge, which has obstructed the stream for years, has just been sufficiently broken up by the lumber company, so that the logs now being cut in that neighborhood can be driven down the river in the spring.

The wedding is announced of A. T. Thomas, of the Thomas Drug Co., of Greenwood and Phoenix, to Miss Nellie McCreath, daughter of James McCreath, a well known Greenwood business man. Both bride and groom are well known in the Boundary, and will make their home in Greenwood.

Report has it that the South Kootenay Power Co. is considering the extension of its high-tension hydro-electrical lines from the Boundary into the Similkameen district. The company now serves the Granby and B.C. Copper smelters, besides a number of the mines of this district with this Bennington power.

In Greenwood the new police commissioners are Alderman Jas. Sutherland and Philip McDonald. In Grand Forks they are Alderman P. T McCallum and Robert McIntosh, the latter being also licensing commissioners. Greenwood's licensing commissioners are Ald. John B. Desrosiers and William B. Fleming.

The Midway & Vernon railway project, which has been in a soporific condition for a year or two, is likely to become active this spring. It is said that the only thing now being waited for is the extension of the Dominion subsidy, a bill for which has already been introduced at Ottawa and has every likelihood of passing.

The Yale-Columbia Lumber Co. is preparing for its big log drive down the North Fork of Kettle river, which will take place as soon as the water is high enough. At the company's three mills, Nelson, Robson and Cascade, it is expected to cut about 40,000,000 feet this year. At Cascade the mill has a capacity of 100,000 feet in twenty-four hours.

Boundary Customs Receipts.

R. R. Gilpin, customs officer at Grand Forks, makes the following detailed report of the customs receipts at the various sub-customs offices, as reported to the chief office for the month of February:

Greenwood	$2,125.27
Phoenix	1,162.39
Grand Forks	957.49
Carson	277 87
Midway	190.08
Sidley	37.75
Osoyoos	16.91
Keremeos	10.40
	$4,778.16

Amsden Opera Company.

Last evening, at the Lyric theatre, the Amsden Musical Comedy Company presented the second of the series of a two nights' engagement, entitled "The Mascot." It certainly was musical opera, and gave one a stitch in the side all the while with laughing. The costumes were good, and some of the specially laughable stunts were distinctly good. The plot of the opera itself was, of course, slight; but considering all the fun presented in the second and third acts it did not matter whether there was any plot at all so long as the principal artistes were on the stage.—Calgary Herald.

This company will play a two nights' engagement at the opera house, Phoenix, Wednesday and Thursday, March 13th and 14th. Wednesday the comic opera "Mascot," and on Thursday the musical comedy success "The Governor's Wife." The company numbers twenty people. Seats on sale at Tom Brown's. Prices 75c and $1.00. Children 50c.

Get To Work.

If the skies look dull to you
Get to work;
If the atmosphere is blue,
Get to work;
Fostering your discontent
Will not pay the landlord's rent,
Will not gain for you a cent—
Get to work.

Brooding doesn't help your cause!
Get to work;
Nothing gained by picking flaws,
Get to work;
Weak are trampled by the strong,
You a victim of man's wrong?
"Stand the storm, it won't be long;"
Get to work.

If success shall come you must
Get to work;
There's no other way but just
Get to work;
It may yield not wealth nor fame;
Much or little just the same,
If you perish you'll die game—
Get to work.—Ex.

Chamberlain's Cough Remedy is Both Agreeable and Effective.

Chamberlain's Cough Remedy has no superior for coughs, colds and croup, and the fact that it is pleasant to take and contains nothing in any way injurious has made it a favorite with mothers. Mr. W. S. Pelham, a merchant of Kirksville, Iowa, says: "For more than twenty years Chamberlain's Cough Remedy has been my leading remedy for all throat troubles. It is especially successful in cases of croup. Children like it and my customers who have used it will not take any other." For sale by all druggists.

Strathcona Hotel Sold.

The Strathcona hotel, at Nelson, the oldest first-class hotel in the interior, was sold this week for $40,000 cash to R. G. Webb, formerly of Perth, Australia. Mr. Webb takes possession Monday and will manage the property personally. He will make a substantial addition to the present building this spring. The house was built in 1891 and leased by E. E. Phair as the Hotel Phair until 1903, when a new manager came in and the name was changed. Bellevelle Tomkins, who at one time conducted the then B. C. hotel in Phoenix, has been manager of the Strathcona for the last three or four years and has conducted it with success.

One who has tried it and knows whereof he speaks, says that trying to do business to the best advantage without advertising is like trying to kiss a girl over the telephone.

Your Doctor

Can cure your Cough or Cold, no question about that, but—why go to all the trouble and inconvenience of looking him up, and then of having his prescription filled, when you can step into any drug store in Canada and obtain a bottle of SHILOH'S CURE for a quarter.

Why pay two to five dollars when a twenty-five cent bottle of SHILOH will cure you as quickly?

Why not do as hundreds of thousands of Canadians have done for the past thirty-four years: let SHILOH be your doctor whenever a Cough or Cold appears.

SHILOH will cure you, and all druggists back up this statement with a positive guarantee.

The next time you have a Cough or Cold cure it with

SHILOH

695

The Granby Consolidated Mining, Smelting and Power Co., Ltd.

Notice is hereby given that, at a meeting of the Board of Directors of the Granby Consolidated Mining, Smelting and Power Co., Ltd., held this day, a regular quarterly dividend of two per cent and an extra dividend of one per cent upon the par value of the stock outstanding, was declared out of the net earnings of the company, payable March 30th, 1907, to all stockholders of record at 3 p.m. on March 15th, 1907.

For the purpose of the dividend, the transfer books of the company will close at 3 p.m. on March 15th, and reopen at 10 a.m., April 1st, 1907.

NORTHRUP FOWLER, Secretary.
