Camp of Boundary.

THE BIG STORE

Buy Your Fruits and Vegetables

... HERE

For the reason—that as soon as they arrive in the Spokane market, we get them. We make special efforts to obtain Fruits and Vegetables—not for a few weeks in the fruit season—but all the year round for the accommodation of our customers.

This season will see us carrying a larger and a better stock of Fruits than we did last season. This is saying a good deal—both for quantity, quality and assortment. We now have

Fresh Strawberries 30c a box

Large Bananas	60c a doz.
Extra Large Navel Oranges	50c a doz.
Choice Green Apples	\$2.00 a box.
California Dry Onions	3 lb. for 25c.
California New Cabbage	6c a lb.
Lettuce, Spinach, Rhubarb, etc.	

You save money by dealing here.

The Hunter-Mendrick Co., Ltd.

PHOENIX. GREENWOOD. GRAND FORKS.

House- Cleaning

Made Easy

By a visit to our HARDWARE DEPARTMENT.

We have all the requisites for the Spring "Clean-up."

PAINTS of all colors in handy sized packages.

KALSOMINE in pretty shades—5c packages.

WHITING, PAINT BRUSHES,

PASTE BRUSHES and WHITING BRUSHES.

Call and get a color card for paints and kalsomine.

Grocery Dept.

Another shipment of Fearman's Hams and Bacon.

Fresh Ontario Butter in 1 lb., 15 lb., 30 lb., and 56 lb. packages; and don't forget

"Anchor Brand Flour"

MORRIS, THOMPSON & CO.

TUNNEL 1,500 FEET LONG

No. 4 Level of the Granby
Mines.

CONNECTION MADE LAST SATURDAY

Makes 2,000 Feet in Length on that Level
—Work of Widening and Timbering Tunnel Now Proceeding.

Last Saturday night, as expected, the last shot was fired in the No. 4 tunnel at the Granby mines, the portal of which is at the back door of the Pioneer office, which connected the new tunnel with the 300 foot level of the Old Ironsides mine—that is, with the workings of the No. 2 shaft at that level. Early this week the two horses which were lowered down the No. 2 shaft to do duty on the 300 foot level, were brought out through the tunnel to get a whiff of fresh air. They were in the mine a couple of months.

The completion of this tunnel will give one more most important opening through which the ore from the Granby mines can, in due time, be shipped to the company's smelter at Grand Forks. The Great Northern railway survey connects with the No. 4 tunnel, and while nothing is said about it at present, it is fully expected that whatever tonnage the Great Northern secures from the Granby mines, will be taken out through this lowest opening, at least, for the present, after completion of the tunnel some months hence.

The Granby mines now have over 2,000 feet of workings in an almost straight line on the 300 foot level alone, while on the several levels, the workings extend a distance of more than 3,000 feet. It is significant, also, if not new to those resident here, that nearly all of this 3,000 feet is in ore of a shipping grade. For some distance in from the portal of the No. 4 tunnel the ore is not in ore, but it is known that the ore is at one side and can easily be reached by crosscutting, as it will be in due time.

In order to break the tunnel through and improve the air therein as soon as possible, as well as on the 300 foot level of the Old Ironsides mine, the last several hundred feet of the No. 4 tunnel was driven only half the regulation width. The force of miners is now busy widening this tunnel, so that it will be the full double track width, and it is also being timbered substantially for several hundred feet where the ground is not as firm as it might be. The portal of the tunnel is about 1,500 feet from the No. 2 shaft of the Old Ironsides, and the work of driving has been going on both inside and outside since February. When, after a few months, the tunnel is complete in every respect, and it has been decided whether to use steam or electricity as motive power on its five per cent. grade, extensive ore bins will probably be erected in the valley, according to plans already prepared, and this will be one of the important shipping openings of the Granby mines.

**"I ARREST YOU
AND YOUR DOGS."**

**Amusing But Costly Episode
for P. Burns & Co.**

"In the name of the King I arrest you and your dogs." This was the greeting that an employee of P. Burns & Co. received a few mornings ago at Midway. Just why R. Gardom, the customs officer, arrested the inoffensive though expensive, shepherd dogs does not yet appear, but, according to His Majesty's servant, they had to be arrested also. The man said that it was the first time he had ever been classed with dogs.

The case was an amusing one, even if somewhat costly for the meat king of the Kootenays before he got through with it. It appears that P. Burns & Co. were importing something like 300 sheep from the other side of the line. They came by rail to Curlew, and were driven up to the slaughter house near Boundary Falls. The driver was a Yorkshireman, green as grass and ignorant of the ways of the country.

The band of sheep stayed over night at Midway, and there was no attempt at smuggling.

But the driver, instead of entering them at the customs at Midway, as usual, came through to the slaughter house without saying a word to the man who collects duty at Midway. The result was that Mr. Gardom required the sheep to be driven back to Midway, arrested the driver and dogs, and P. Burns & Co. had to deposit a check equal to the value of the four-footed beasts before they were allowed to go. It was right after the railway washouts, too, and mutton was a scarce article in the Boundary. The chances are that hereafter all sheep will be carefully entered before being taken beyond Midway, so that the majesty of the law shall have no infractions.

**BONDED MAVIS
FOR \$11,000.00**

**Claim Was Discovered By
Accident**

Last fall while installing the poles for the Cascade Water, Light and Power Company, a gang of men uncovered a small lead of gold ore on the Mavis mineral claim, belonging to E. T. Wickwire, over which the right of way passes, says the Greenwood Times. The other day Mr. Wickwire gave a bond on this property to Mike Kane and associates for \$11,000, the payments of which will cover two years. The first payment is to be made at the end of six months and balance in twelve and twenty-four months respectively. The bondholders have the privilege of shipping ore up to any amount they can mine upon the payment of ten per cent. royalty, and in every way the terms of the bond are such that the parties taking hold of the property will be able to meet their obligations out of the ore should the claim turn out as expected.

The sale was the direct result of the accidental uncovering of this lead by the power company's men. Assays taken by Mr. Kane ran as high as \$99 gold and silver, and the boys are satisfied they have a "good thing." There is no reason why it should not be, as its locality is favorable, lying as it does midway between the E. P. U. and Skylark. A gang of men will be at work in a few days on the property and prospecting and development carried on in a systematic manner.

**MASONS GAVE
A BANQUET.**

**On Occasion of Visit of Deputy
Grand Master.**

Wednesday evening James Schofield, deputy district grand master, A. F. & A. M., was in Phoenix, the occasion being his annual visit to King Edward Lodge No. 36. He was driven up from Greenwood by W. G. Fraser, master of King-Edward lodge, and W. L. Dunn, a prominent member. During the evening the third degree was exemplified, visiting brethren being Thos. Byers, of Trail, and G. C. Hodge, of Nelson, and others. A banquet was also served in honor of Mr. Schofield, in Masonic hall, in the excellent style set by W. S. Macy, of the Granby hotel.

Mr. Schofield expressed himself as well pleased with the progress being made by the five lodges in his jurisdiction, namely, Trail, Rossland, Grand Forks, Greenwood and Phoenix. Monday evening he visited Harmony lodge at Grand Forks, and Tuesday evening he was also entertained by the Masons of Greenwood.

Mr. Schofield, who occupies the position of mayor in his home town of Trail, states that business in the smelter town is getting in better shape gradually, and the business people generally take a better view of business conditions, and they are justified in doing so.

Notice of Police Meeting.
James Punch, police commissioner, requests the Pioneer to give notice of a meeting of the board of police commissioners, to be held Friday evening, May 17th, in the city council chamber, at 8 o'clock. Any person or persons having charges against C. H. Flood, chief of police of Phoenix, will please present them in writing at that time.

MCGILL BOYS WERE HERE

Party of 19 Visited Our
Mines.

ARE TRAVELLING IN PRIVATE CAR

In Charge of Prof. J. B. Porter, Who Visited
Phoenix Three Years Ago With A Similar
Party.

Thursday afternoon the party of students, from the McDonald School of Mining of McGill University, Montreal, who are on a six weeks trip in the west, arrived in Phoenix, to look at the big mines of this camp. The entire party consists of 19 young men, with Prof. J. B. Porter in command, assisted by J. F. Robertson, a brother of the provincial mineralogist for British Columbia. Travelling in their private car, which was switched to the compressor spur while they were here, the party is comfortably fixed with a cook, etc.

The students in the party are as follows, most of whom are in their third year of mining course: C. L. Cantley, C. C. Churchill, J. G. Dickinson, H. L. Forbes, W. Dickinson, J. H. Gripe, A. M. Hamilton, E. N. Howell, G. O. McMurtry, J. M. McPhee, N. Martin, A. B. Ritchie, A. L. Sharp, E. E. Winter, M. H. Sullivan, George P. Sharp and A. W. G. Wilson.

As far west as Sudbury, Dr. Ames, lecturer in geology, and Dr. Stanfield, lecturer in metallurgy, were members of the party, subsequently returning to Montreal.

By courtesy of W. V. Williams, superintendent, the entire party was conducted through the Granby mines, being the first party to go through the No. 4 tunnel. They also visited the surface workings, and noted the method of conducting the extensive operations in and around the glory holes with steam shovels, etc.

Yesterday the party walked to Greenwood, the car being taken around by rail. The mines and smelter there will be looked over, and a day will be spent at the Grand Forks smelter, when the trip will be over. All but two of the students have secured positions in the mines of British Columbia for the summer for the purpose of getting a practical knowledge of the business.

On this trip the students have visited the coal mines at Lethbridge, Frank and Mitchell, and the St. Eugene at Moyie. Then from Nelson the Venus and Athabasca mines were taken in and the Highland mine at Ainsworth. After going over the Rossland mines and the Trail smelter the party came direct to Phoenix. Something like five or six thousand dollars is being spent on this trip, to give the students a practical view of mining and smelting.

McCloskey's Columbian Comedy Co.

J. M. McCloskey, who lost his sight in an explosion at the mines of Phoenix two years ago, will bring the Columbian Comedy Co. to Miners' Union hall next Wednesday, May 25th. The company is headed by the talented young vocalist and dancer, Miss Laura Courtney, the favorite exponent of national dances, introducing the Highland fling. She will be supported by Guy Watkins, the most eccentric and successful Dutch and black-face comedian; "Little Lloyd," the boy soprano, the illustrated song singer; Walter Watkins and Arline Courtney, formerly of the Big Four Comedy Co., in sketches and duos, solos, operatic selections, etc. If you wish to hear the latest songs and jokes, and see the most popular and cleverest dances, do not miss this performance. An open air concert will be given by the band. The manager has spared no expense in procuring the best and cleanest show on the pike this year. Everything refined and up to date.

Phoenix may have a team on the base ball field at Midway next Tuesday. The Maxwell Photo Co., of Spokane and Walla Walla, have removed their studio from Greenwood to Phoenix. They are occupying the Martin building on Dominion avenue and intend remaining here permanently.

Boundary Mining Notes

Both steam shovels are now at work at the Granby mines once more.

Both furnaces at the Greenwood smelter are running in good shape once more, after being repaired.

Wm. Fowler now has the Marguerite machinery transferred to the Defiance, and is having the same installed.

The total output for the Boundary mines is now close to 2,000,000 tons—and this is less than four years actual shipping time.

A meeting of the executive of the Provincial Mining Association was held at Nelson Thursday and Friday. The Boundary was not represented.

Development work on the Minnehaha and Hercules claims near Danville, Wash., not far from Grand Forks, is in progress. Seventeen men are employed.

It is said that the Combination, a well known high grade claim near the Elkhorn, will be worked before long, it having been under inspection by several parties of late.

It is said that there are still from four to six feet of snow in Franklin camp—so much that Thos. Newby and others had to postpone some development work after proceeding thither.

The B. C. Copper Co., Ltd., has taken a bond for \$20,000 on the Roderick Dhu claim, one of the high grade properties in Long Lake camp, that is owned by Greenwood and Phoenix men.

In the Providence the main shaft is now down 325 feet and the drifting is in splendid ore. Now that a lot of dead work has been done in this property, it is confidently anticipated that the payment of dividends will soon be resumed again.

Supt. Willie, of the Cascade Power Co., was in the city this week, in connection with connecting up the new machinery at the Mother Lode smelter. Out of a dozen motors that have been ordered for this smelter for the electrical equipment, less than half have arrived so far.

When the 21 ten-ton steel ore cars, recently purchased by the Granby mines, are placed in use after changing gauge of tracks, etc., they will do duty in the No. 2 tunnel. If they are loaded and dumped once daily, the amount will equal the normal tonnage output.

As far as heard from, nothing new has transpired this week in connection with the merger of the Montreal and Boston Copper Co. and the Brooklyn group in this camp. Those in a position to know, however, believe that even if the present deal should not go through, the building of the Great Northern to Phoenix, now assured, will result in the active operation of the Brooklyn group of mines.

Wednesday evening Snowshoe Lodge No. 46, I. O. O. F., gave a social to its many friends at Hardy hall. Over 100 persons were present, and after 10:30 the hall was cleared for dancing, refreshments also being served.

Last week Thomas Berg, owner of the Norden hotel, on Dominion avenue, died in the Medical Lake Hospital for the insane, 17 miles west of Spokane, after being in the institution but 48 hours. His trouble was Bright's disease, superinduced by alcoholism. He was committed to the hospital by judges in Spokane.

NO DOUBT ABOUT IT

New Railway To Phoenix is
a Certainty.

WILL BE BUILT THIS SUMMER

Pat Welch & Co. Now Preparing to Bring in
Extensive Grading and Construction
Outfits.

The exclusive announcement last week's issue of the Pioneer that the Great Northern railway branch to Phoenix would not only be built, but would be built this year, created no little interest, especially when it was corroborated a few days later from Spokane.

G. W. Rumberger returned this week from a trip to the outside, and in speaking to a Pioneer man, stated that it was a certainty that the road would be constructed at once. It is not known, however, that anything besides the surveyed line from Grand Forks to Phoenix and the Granby smelter will be constructed at this time, unless probably the grading up Kettle river from Curlew to Midway may be undertaken.

P. Welch & Co. are understood to have been awarded the contract for this line a long time ago, and the firm is now making extensive preparations to get grading, paraphernalia, etc., on the scene of action as soon as possible, so as to get the work as far along as may be while the good weather lasts.

Jay P. Graves, manager of the Granby smelter at Grand Forks, B. C., and Pat Welch, manager of the railroad contracting firm of Foley-Bros., & Larson, returned from St. Paul yesterday said last Tuesday's Spokesman-Review. A financier of the city, who is close to both the railway and the Granby mining people, says they were east to confer with James J. Hill on the building of a spur of the S. F. & N. into the Granby mines at Phoenix, B. C., and succeeded in their mission.

When asked of the construction of the spur Mr. Graves did not deny it, but said he had nothing to say on the subject now. The Canadian Pacific has a 25 mile spur from Grand Forks into Phoenix, but the mineowners have been working for several years to have competition in the ore hauling by inducing the Great Northern to build into the camp. The project also calls for extending the Great Northern tracks from Grand Forks to the smelter, four miles away.

WILL HAVE NEW CITY ELECTION.

Expected That Judge Williams and Chief
Flood Will Resign.

It is generally understood that a new election for the five vacant aldermanic seats has been ordered by the government, but as the city clerk is absent no definite news in this regard is obtainable. Mr. Matheson may be back next week.

In this connection it is generally understood that Judge W. R. Williams will resign as police magistrate and that C. H. Flood will do likewise as chief of police. If this is done there will probably be no trouble to fill the chairs of the councilmen, but otherwise it is a question whether they can be filled at all.

BOUNDARY ORE TONNAGE.

The following table gives the ore shipments of Boundary mines for 1900, for 1901, for 1902, for 1903, and 1904, as reported to the Phoenix Pioneer.

Mine	1900	1901	1902	1903	1904	Week
Granby Mines, Phoenix	64,533	231,762	309,858	393,718	220,606	11,190
Snowshoe	297	1,731	20,800	71,212

THE OBSERVATORY

THINGS TALKED OF AT HOME AND ELSEWHERE

Six years ago last February William P. Tye, an engineer in the employ of the C. P. R., started to make the final survey for the C. P. R. branch into the Boundary. In the following June actual construction was started and kept up till completed. Mr. Tye having constant supervision of the work. After the work was finished Mr. Tye was removed to the head offices of the company in Montreal, and was promoted. Now comes word that he has been made chief engineer of the C. P. R., an honor that he certainly deserves. Many friends of Mr. Tye in the Boundary will rejoice at his good fortune.

John Houston stepped down and out of the Liberal-Conservative organization at Nelson, but he stepped so hard that it seemed to have the effect of jarring things a little. At any rate, he said a few things in his Nelson Tribune that must make highly edifying reading to those specially interested. When John hails in, some one generally knows something about it, and this case is no exception.

Ymir has seemingly ever been a difficult field for a newspaper. One after another has been forced to give up the fight, after a more or less protracted period of agony. The soil there does not seem to be conducive to newspaper growth. The latest to turn up its pink little toes to the daisies in British Columbia's newspaper graveyard is the Ymir Mirror. For two or three years C. Dell Smith a bright member of the fourth estate, tried to keep the Mirror afloat, with indifferent success, but when the paper was boycotted, as Mr. Smith alleges, that was one straw too much. Therefore he shakes the dust of Ymir from his feet.

Evidently, there are people who think that the report that William Randolph Hearst and James J. Hill will jointly start a daily in Victoria, will be believed. At any rate, the report was sent out a few days ago, even if it does lack confirmation. If Willie Hearst does a thing of this kind he must have grown looney. Heretofore, in starting daily newspapers, he has selected locations where there was an extensive field, and for him to pick out good, old, conservative, sleepy Victoria, with its scant 20,000 people, is indeed ludicrous. Tell that to the marines.

Hickory Walnut Chestnut Jackson, as Elber C. Smith used to delight to call him in the palmy days of Rossland, is quoted in the Spokesman-Review as saying that he will shortly begin the publication of a Liberal daily in Nelson, having obtained an option on the plant of the Nelson Tribune, and being now out on a quest for a couple of linotypes and other items.

With the Nelson Daily News, a staunch Liberal organ, and a good little daily anyway, it would seem that Mr. Jackson must have money to burn to undertake the publication of a second daily paper in Nelson. Either that, or someone must be aching to be separated from a goodly amount of "dough" in the issuance of a daily where one cannot possibly survive by any stretch of the imagination. There need be no mistake about it, either.

If such a paper is started, some one will be poorer and wiser in a few short months. But it is remarkable how such people will tumble over themselves to part with their cash in ventures of this kind, where there is not one chance in a hundred of making a success.

Whooping Cough.

"In the spring of 1901 my children had whooping cough," says Mrs. D. W. Caps, of Capps, Ala. "I used Chamberlain's Cough Remedy with the most satisfactory results. I think this is the best remedy I have ever seen for whooping cough." This remedy keeps the cough loose, lessens the severity and frequency of the coughing spells and counteracts any tendency towards pneumonia. For sale by all druggists.

OLLA PODRIDA.

The pull of a politician is as remorseless as the pull of a dentist.

If men received everything they pray for they would soon become too lazy to go out of each other's way.

"Nine men out of ten," said Uncle Eben, "honestly think their misfortunes is owing to luck and their successes to personal smartness."

The war news jumps the open switch.

And scares the heathen jossy;
But I can't tell a fakeovich
From a canardovsky.

A notice reading thusly, "Old ladies who fear they will take cold need not remove their hats," posted in the lobby of a New York theater, serves its purpose well. Every hat comes off.

Found a Cure For Indigestion.

I use Chamberlain's Stomach and Liver Tablets for indigestion and find that they suit my case better than any dyspepsia remedy I have ever tried and I have used many different remedies. I am nearly fifty-one years of age and have suffered a great deal from indigestion. I can eat almost anything I want to now.—Geo. W. Emory, Rock Mills, Ala. For sale by all druggists.

STRICTLY BUSINESS

If you get up a poor ad you score one point—for your competitor.

It ain't always the biggest ad that says the most, any more than it is the fellow with the biggest head that has the most brains.

Nerve is often worth more than knowledge in advertising. Makes no difference how much money a man may have or how good his business and his plans may be, when his nerve deserts him, the battle is lost.

A prominent physician recently remarked that a diagnosis of the cerebral molecules, assimilated in the radioactivity of publicity, would display a disintegration of decomposing contamination and a depletion in subcutaneous action. We agree with him heartily.

P. S. He was speaking about advertising.

Every Lady Should Know

That Ferrozone removes the causes that interfere with the proper discharge of all womanly functions; it corrects irregularities and is especially good for women who are nervous and subject to headache, lame back, bearing-down pains, dysmenorrhea and tiredness. Ferrozone is a blood purifier and can't be excelled for the complexion. For your good looks and health use Ferrozone. Price 50c. per box at druggists.

MANY PEOPLE SUFFER WITH CATARRH OF KIDNEYS.

Pe-ru-na is Invaluable in Such Cases.

FRED R. PENNELL

Backache is Often the First Symptom of Catarrh of the Kidneys.

THOMAS M. HICKS.

DANGEROUS KIDNEY DISEASES CURED

Pe-ru-na Creating a National Sensation in the Cure of Chronic Afflictions of The Kidneys.

"Fred R. Pennell, Pianist, Grand Opera House, Hot Springs, Ark., writes: 'Two years ago I came to Hot Springs to take the baths and be treated for bladder and kidney trouble. After spending two months here under the care of one of the most prominent physicians and receiving little or no benefit, I was persuaded to try Peruna. I had little faith in it, but after using one bottle I noticed a marked improvement. Three bottles entirely cured me. I can cheerfully recommend Peruna to any one afflicted as I was.'—Fred R. Pennell."

Thomas M. Hicks, 1131 13th St., Louisville, Ky., writes:

"Neglected colds, irregular habits and overwork brought on serious kidney and bladder trouble. My blood seemed

inflamed with poison, my stomach became entirely demoralized, a bad odor emanated from my urine, and I realized I was a sick man. The doctors dosed me to their heart's content, but I kept growing worse. Then fortune brought Peruna to my notice and I at once began to mend. I kept taking it for five months before I was completely cured. I feel now that I owe my life to Peruna and will never cease to be grateful."—Thomas M. Hicks.

S. L. Earle, Superintendent of Streets, Jacksonville, Fla., writes: "I am a firm believer in Peruna. I find that it has been of practical benefit to a number of the men employed in the Street Cleaning Department in the city of Jacksonville. They are especially exposed to the inclemency of the weather and a number who caught cold, which later developed into pneumonia, kidney or liver trouble, were cured through the use of Peruna."—S. L. Earle, Superintendent of Streets.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a

full statement of your case, and he will be pleased to give you his valuable advice gratis.
