The Copper Situation

The president of one of the leading copper producers says: "I have just returned from New York, where I made a rather exhaustive study into the copper situation. As a result, I do not believe that the market at the present time would stand any very heavy selling of the metal if such selling were forced, but as all the larger selling interests are well sold through September and partially in October, there is no reason to anticipate any forced selling.

"I am told that the business of the brass manufacturers is showing a very satisfactory improvement, but that the electrical end of the business, which gave quite a pronounced spurt several months ago, showed only a false start, for the business has fallen off again. However, it is generally estimated that the consumption of copper in this country is in the neighborhood of from 35,000,000 to 40,000,000 pounds per month, or from 75 to 100% larger consumption than was the case the first part of the year.

"It is rather unfortunate that some of the large new producers could not have held off a little longer, as this new copper from Bingham, Ely and Cananca, amounting to not far from 10,000,000 pounds per month, has undoubtedly been a considerable factor in causing production to run ahead of price for the metal.

"The leading foreign interests in copper inform me that the foreign supply of the metal is no menace to the market, Famous Hend Hunters Among the Attracbecause of the way it is carried. It is well distributed and in strong hands, and is not held for speculation, but is fast going into consumption, as at the time most of this copper was purchased foreign stocks were absolutely ex-

Ralph Smailes, who is interested in the charter, made arrangements in New Vork a few weeks ago for all the capital needed to link Vernon with Midway. During his stay there he closed a deal with the representatives of an English syndicate. It is not unlikely that construction work may be undertaken shortly. The proposed railway will ascend the valley of the west fork of Kettle river, and, crossing a low divide at its headwaters, make the descent to Vernon by an easy grade. It will open up an important mining and grade mines along the route now transport their ores forty miles in sleighs in winter time and derive a profit, the values per ton often exceeding \$150 in gold and silver. The Sally mine is one of the best mines up the west fork.

Editor of Globe Offess to Resign.

In an article in the Toronto Globe, A. MacDonald, managing editor, under his own signature, says that if Premier Roblin's charges as to the Crow's Nest Pass railway and the Globe, and Mr. Jaffray's connection therewith are true he will resign. He leaves the issue to Mr. Willison, editor of the News, and former editor of the Globe, who was on the platform when Mr. Roblin made his charge that the Globe was given 250,000 acres of the best coal land in America for its advocacy of the Crow's Nest railway in

MAGIS RATE SPEAKS FOR ZAM-BUK

Magistrate Percy, of Goldfields, B.C., believes in making a Writing of Zam-Buk, the great household balm, he says :- "After a very tair trial I have pr. ved Zam-Buk eminently satisfactory. In my case it cured a skin rash of five ding which no doctor had been able to do any good I would certainly encourage any person to keep Zam-Buk his home." The magistrate is quite right. Every home needs Zam-Bok! Unequalted for cuts, burns, bruises, eczema, blood poisoning and all skin diseases. All stores and druggists sell it at co cents a box. Sure cure for piles.

DON'T NECLECT THAT SURE!

A Chicago man has just died from blood poisoning arising from neglect of a small sore. Don't neg cet a cut, a patch of cezema, or an open sore of any kind. The air is fall of poison germs, waiting to start up their evil results in neglected sores, wounds, etc. In Zam-Buk is safety. Zam-Buk is so highly antiseptic that applied to any skindisease or injury it makes blood poisoning impossible. In using Zaur-Buk you have three processes going on at once for Zam-Buk is healing soothing and antiseptic. Try it without delay,

The ceremony connected with the first degree, it was learned, was called Picciotto, and was comparatively simple. All present divested themselves of any weapons which they might have on their persons, a guard being left over these. A circle was then formed by joining arms. It was then pointed out to the new member that the space in the centre of the circle represented an abyss in which everything spoken was understood to be for ever buried. An incantation in an unknown tongue little later you may find it hard to even weeks is found reading matter in six by the leader of the society followed,

> The conferring of the final or "car full membership in the society was gruesome indeed. A circle was formed as in the previous case, but, on the floor in the space five knives were placed on the ground with the points radiating on the outside of the circle. Upon these a handkerchief was placed, leaving the points exposed, and on top of that a stiletto was laid. Lots were then drawn and the man upon whom the choice fell had to bare his arm whilst his neighbor seized the stiletto and stabbed him in the wrist until the blood flowed freely.

> Again the cabalistic incantations were brought into play, and while these were being recited, the candidate for initiation had to suck the blood that was spurting from the wrist of the man who was stabbed.
