## CERTIFICATE OF IMPROVEMENTS

COPPER CROWN MINERAL CLAIM.

Situate in the Illecillewaet Mining Division of West Kootenay District. Where located: Being a northerly extension upon the Silver Bow mineral claim.

Take notice that I, Walter Scott, acting as agent for the Fish River Copper and Silver Mining Co., Ltd., Free Miner's Certificate No. 9194, intend, 60 days from the date hereof, to apply to the Mining Recorder for a certificate of improvements for the purpose of obtaining a crown grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements. Dated this 29th day of September, 1897. 2021v.

SILVER BOW MINERAL CLAIM.

Situate in the Illecillewaet Mining Division of West Kootenay District. Where located: Being a southerly extension upon the Silver Bow mineral claim.

Take notice that I, Walter Scott, acting as agent for the Fish River Copper and Silver Mining Co., Ltd., Free Miner's Certificate No. 9194, intend, 60 days from the date hereof, to apply to the Mining Recorder for a certificate of improvements for the purpose of obtaining a crown grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements. Dated this 29th day of September, 1897. 2021v.

COPPER HILL MINERAL CLAIM.

Situate in the Illecillewaet Mining Division of West Kootenay District. Where located: Being a southerly extension upon the Silver Bow mineral claim.

Take notice that I, Frank Stillman-Barnard, Free Miner's Certificate No. 8804, issued at New Westminster on the 17th day of October, 1896, managing director of the Lilford, Fraser River and Cariboo Gold Fields, Limited, Free Miner's Certificate No. 6118 A, issued at New Westminster on the 20th day of June, 1897, intend, 60 days from the date hereof, to apply to the Mining Recorder for a certificate of improvements for the purpose of obtaining a crown grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements. Dated this 20th day of Sept., 1897. 22565v.

Sutton Mineral Claim

Situate in the Illecillewaet Mining Division of West Kootenay District. Where located: On the northeast side of the mountain between the south fork of the same, about five miles northeast of Illecillewaet.

Take notice that I, Frank Stillman-Barnard, Free Miner's Certificate No. 8804, issued at New Westminster on the 17th day of October, 1896, managing director of the Lilford, Fraser River and Cariboo Gold Fields, Limited, Free Miner's Certificate No. 6118 A, issued at New Westminster on the 20th day of June, 1897, intend, 60 days from the date hereof, to apply to the Mining Recorder for a certificate of improvements for the purpose of obtaining a crown grant of the above claim.

And further take notice that action, under section 37, must be commenced before the issuance of such certificate of improvements. Dated this 20th day of Sept., 1897. 22565v.

Notice

Notice is hereby given that 30 days after date I intend to apply to the Hon. the Chief Commissioner of Land and Works for a special license to cut timber on a certain tract of land situated on the east side of Upper Arrow Lake at Galena Bay, about seven miles north of the mouth of Deep Creek, and about 1/2 mile from the mouth of the same, containing about 1000 acres more or less.

Arrowhead, B. C., Oct. 5, 1897. 9041w

## MINING RETROSPECT

The prospecting season is over; mining except in the case of such properties as have already undergone considerable development is closing down for the winter; miners and prospectors are coming into winter quarters and the season of 1897 is practically over. As far as North Kootenay is concerned it may be principally noted as a year of great activity in the prospecting line. The district has never been so thoroughly gone over as it has been this summer. On the other hand the difficulties of transportation have prevented as much development work being done as was anticipated at the beginning of the season.

In the Big Bend country two entirely new sections both highly mineralized with ore carrying a very considerable proportion of gold as well as silver, copper and lead have been located, and a number of claims staked in both of them, as well as in other and better known portions of the district. In development work the Carnes Creek Co. have met with very gratifying success in their operations on the Roseberry mine, and the Last Chance placer claim has given the strongest indications that success will ultimately crown the perseverance of the company, which has stuck to the work on their deep diggings on the property so long. On the Old Bull the operations set on foot by Mr. J. C. Ferguson will give a good test of the permanency of the quartz leads in the Ground Hog Basin, while the French Creek Co., after an heroic struggle with the difficulties of transportation into the country, have at last made such progress that next season will be almost entirely devoted to the work of hydraulicking the pay gravel on their claims. Every step gained in the development of the Big Bend country is of vital importance to the progress of Revelstoke. The question of transportation into that district is one, in which every business man in town is directly interested and it is one, which they should set themselves to help to solve with rather more energy than they have hitherto expended upon it.

As soon as incorporation is obtained one of the first questions, which should be put before the people, will be the desirability of this town giving some direct aid to a permanent steambath service as far as Laporte. The Big Bend is quite obviously one of those cases in which facilities of transport will have to precede development, and this place will have to spend money in order to make money in the future.

In the districts tributary to Revelstoke in the east two events have been most prominent in the history of the season, the partial closing down of the Lanark and the opening up of the North Fork section by the construction of the wagon road and the operations on the Waverley. While it was an unfortunate thing that the Home-Fayne syndicate found it necessary to suspend a large proportion of their work at Laurie, yet it is very well known that their decision was in no way due to any defect in the property itself, but simply to the way in which the mine has been handled. There need be no misgivings, lest under more careful and scientific management the Lanark will not again come to the front among the shipping mines of West Kootenay. The operations up the North Fork of the Illecillewaet by the important English company represented by Mr. Grant-Govan and of the Waverley mine under Mr. John Grant cannot fail to bring North Kootenay prominently before the notice of London capitalists. Both the Waverley and Tangier are fully answering under development to the high expectations, which the extraordinary richness of their surface indications had led the owners to form.

Taking it altogether the retrospect of the season in the Big Bend and Illecillewaet districts is very gratifying, and gives great promise of increased activity next season. The new discoveries will stimulate prospecting, and it may be noted in this connection that there is an enormous area scarcely examined at all, while the capital already operating will reveal, as the HERALD confidently expects, the permanent character of the extraordinary surface indications of the country and induce other investors to take hold of the field awaiting them. With one lamentable exception, the wild cat company has been conspicuous by its absence and mining has been pursued, so far as it has gone, as a business, and not as an opportunity for gambling in shares. Development has been

steady and solid, and we have nothing to dread, but everything to hope for, in our anticipations of the probable course of events in the future. A sketch of the season's work in the Trout Lake and Lawton districts will appear in our next issue.

Woolley and warm Mackinaw underwear and top shirts at Coursier's. A performance of "Our Boys" in aid of the building fund of the English church is on the tapis. The Premier went through to the coast on Thursday. He was very well satisfied with his trip through Kootenay. Miss Anna Carlson, sister of Mr. C. E. Carlson, arrived in town on Monday, and registered at the Victoria. She will reside here in future with her brother. A vacancy is last appearing where stood the stoves in Coursier's hardware room. Harry and get one before the opportunity is past and cold weather comes. The Edmonton, Peace River & Yukon Railway Co. are seeking incorporation, to construct a railway from Edmonton, N. W. T., to a point on the navigable waters of the Yukon. Coole & Burditt are Ottawa agents for the company. On Thursday Rev. J. A. Wood tied the knot which made Mr. Thos. Taylor, the popular manager of C. B. Hume & Co's. store, Trout Lake City, and Miss Georgie Larson, also of that rising centre, one. The happy pair left for the south the same evening. The HERALD extends congratulations. Coursier is constantly opening up something new for ladies and children. The Australian Variety Concert Co., which will play here on the 2nd and 3rd Nov., have received the most flattering notices in the States and Australia. Their company comprises several first-class artists, whose singing and dancing have attracted hearty praise in such well-known centres as San Francisco, Melbourne, Panama and Hawaii. Mr. R. Samson, agent for the Standard Oil Co., took a trip to Kamloops on Tuesday evening in company with Rev. J. A. Wood. Next day he and a reverend gentleman performed the wedding ceremony between Mr. Samson and Miss Ella Loftsgold. The happy couple are spending the honeymoon at the coast. Another bad accident occurred Monday morning this side of Golden. A freight train was coming down the hill, and owing either to a defective brake or wheel, ran off the track. The mogul engine tumbled over on its side and eight loaded cars were sent down the bank some of them into the river. Among the freight was a car of beer and a car of flour and feed from Kelowna. No passenger was injured. No lives were lost, but the loss to the company is considerable. - Odrury Herald. A change has been made this week in the management of the popular and old established hotel, the Columbia House. Mrs. Barbara Clark, who as partner with Mr. Brown has held the reins so long, has retired from business and Mr. W. B. Pool, who has acted as manager for some time past, has become partner in the hotel. Mr. Pool's enterprise and energy in business will sustain the old time popularity of the house under the former management. Mrs. Clark will continue to manage the hotel, and her partner, Mr. W. B. Pool, will manage the flat over C. B. Hume & Co's. store on Front St. According to the interior exchanges a Port Hope man is at the present time making his way into the Rocky Mountains near Peace River, in the expectation of finding a rich gold deposit that he says an Indian told him about for a consideration. This Indian would appear to have left his trail all the way westward to the Coast from the Lake of the Woods. He has a good thing in that gold mine of his - Victoria Colonist. Is he an aged chief of the Stwah persuasion? - HERALD. Last Monday a fracas occurred in the Springs Hotel between Geo. F. King, who was acting temporarily as bartender for J. S. Sloganson, and a Swede named Wels Olesen, which resulted in the latter getting an ugly cut on the neck with a glass, as he was trying to help himself to a cigar. F. Fraser, J. P., went up to try the case, information having been laid against King, and the trial resulted in King's getting sentenced to two months imprisonment. A warrant on a counter-charge of assault against the Swede was refused. The Canadian Pharmaceutical Journal and Gazette contains the following answer to a correspondent asking if the undermentioned prescription contains incompatible ingredients. The answer is of interest in its bearing on the Sheard inquest. "Fig. styrac. 1 drs. Tr. capsici 2 drs. Pot brom. 2 drs. Fla. cordial 2 oz. Aq. ad 4 oz. Ft. mistura. Sig. 2 drs. every three hours." Bromides and alkaloids are incompatible. In this case you will have formation of strychnine hydrobromide, which would be precipitated, but as the kolanut contains a large proportion of alcohol, the new compound may remain in solution, as twelve to fifteen per cent. of alcohol is sufficient to do this. Another incompatibility is that between tannic acid and alkaloids; in this case you may have reaction between the kolanut-tannic acid and the strychnine solution. For security this mixture should not be dispensed without a "shake" label.

## FORTY DOLLARS TO YUKON

An Interesting Interview with Mr. P. Williams of the Yukon Mining and Mercantile Co.

With reference to our advertisement, which appeared in our advertising columns on Saturday last, offering transportation to Dawson City from Seattle for \$40, and referring the public for further particulars to Mr. P. Williams, general manager of the Yukon Mining & Mercantile Co., P.O. box 512, Seattle, the following interview in the Seattle Post-Intelligencer is not without interest:

As soon as the advertisement was brought to the notice of the Post-Intelligencer, search was instituted for "Mr. P. Williams." He could not be found through the ordinary channels, but a letter addressed through the post office box received a response from Mr. Williams, stating that his "temporary office" was in the Russell block.

There a reporter called yesterday afternoon in search of information. Mr. Williams proved to be a foreigner, with a pronounced German accent. On his desk was a pile of letters. Almost his first question was: "What is your nationality?" "American," responded the reporter. "We cannot take you," said Mr. Williams promptly. "No Americans; only Englishmen. You see it is an English company. The fare charged is only nominal, but the passengers must agree to give to the company a one-fourth interest in all claims they may discover on the Yukon. It is on that account that we wish Englishmen, as there will then be no trouble with the Canadian government. You are no prospector, eh? We want prospectors; English prospectors. The company makes nothing from the sale of passages. It will profit by the labors of those who go north in its vessels, and general merchandise will be shipped to the Yukon for stores to be located by the company at Dawson City and other points."

"From your advertisement, one would think you intended to make the entire voyage from the Sound to Dawson City in one steamer. How can you get a single vessel combining seaworthiness with the light draft necessary for the navigation of the Yukon?" "Not so fast," interrupted Mr. Williams. "There is a test. We will have the steamer New York, for at least when we purchase the steamer in San Francisco, we will name it the New York. It will be fitted by carpenters with two hulls, a round flat-bottom outside and a round inside. When we get to St. Michaels, we will remove the round or deep water hull, and there you have it, the flat bottom, all ready for the river. When we come down again there is our round hull waiting. We clap it on over the outside and we are ready for the ocean. A great idea, don't you think so? It took well in London, where I have just been. They are crazy about Alaska. A company can be formed on any kind of a proposition in a week."

"Why do you have your office here, when the company is in Seattle, an Englishman?" "Why not have your office in Victoria?" "Oh, the freight will be taken from here; the passengers from Victoria. Only seventy-five passengers will be taken. I carry on my business by correspondence. How many? Oh, about forty have said they are going. But no Americans; all English. I am not American myself, but it is for the company to say. As for me, I am a German, and by profession a mining expert."

The Badshot Mine. Mr. F. P. Johnson of the Badshot mine, was in town this week. Since last July he and his partner F. C. Campbell and three men have been working steadily on the mine. The development done at present consists of a tunnel 80 feet long run on the ledge, a 75 foot tunnel run at right angles on to the ledge and a 60 foot shaft sunk at the point of junction. The are now drifting from the bottom of the shaft. Mr. Campbell and one man will continue work on the mine all winter. Mr. Johnson is well satisfied with the result of their work, at which they have now been steadily engaged for nearly four years.

See those beautiful new plaid dress goods opened up yesterday at Coursier's. Mr. R. H. Trueman has pitched his photographic tent in our midst again and intends to remain here till the 22nd, positively not later. Come early as this will be the last opportunity.

Mr. William Blackmore, 1st Pres. of the National Association of Colberg Managers, who has just returned from inspecting the coal areas in the Crow's Nest Pass for Mr. Anson, president of the Toronto company, who have acquired the C. P. R. coal lands in the pass, was in town yesterday. The coal is of excellent quality and the fields are of immense extent. Some of the seams run from five to thirty feet in thickness. The coal is bituminous and the Coal Creek seam is particularly well adapted for smelting purposes.

THE BRITISH ARMY TO BE INCREASED ONE THIRD IN NUMBERS.

A Dead Set by the English Banks and Press Against the White Metal - The Canadian Bankers Chime in in the Hostile Chorus - The Government will Abide by the Single Standard. (SPECIAL TO THE HERALD.)

LONDON, Oct. 16.-In the government estimates of 1898 there will be an appropriation to increase the English army by one third.

LONDON, Oct. 16.-The Globe says that the government may be depended on to maintain the Gold standard inviolate. Views of individual members of the cabinet on the subject count as nothing.

Today there was presented to Sir Michael Hicks-Beach, Chancellor of the Exchequer, a memorial signed by the leading bankers and financial houses in London. They urge that no alteration be made in the circulating medium except after a full discussion by parliament and the people, and under no circumstances to set aside the Gold standard, and now that its Indian mints are closed to take no retrogressive movement. The resolution passed at the Canadian bankers' association was also submitted. It denounced the double standard as a delusion and impracticable, and declared that the Dominion of Canada having all its obligations on a gold basis, any attempt to disturb the same would be met with strong resistance.

TROUBLE AMONG WHEELMEN

The Fool Killer is Badly Needed Right Now in Montreal.

VANCOUVER, Oct. 16.-President Orr of the C. W. A. is here adjusting the difference between the P. W. A. and the C. W. A. at the coast and their Chief Consul. The C. W. A. rules against the seceders from law. At the Victoria meet all were suspended by Chief Consul Fullerton and they then declared war against the Canadian association. President Orr wants them back.

MONTREAL, Oct. 16.-The Canadian Independence Club have been widely circulating flashy circulars urging "Separation from England, severing the bonds of slavery, and raising the national flag of a free people."

NEW YORK, Oct. 13.-Bar silver, 53 cents. Lead, \$3.75. Copper, \$11.15.

The slipper Slater shoe at Coursier's.

Col. Baker, the Provincial secretary, was in town yesterday and registered at the Hotel Revelstoke.

A special train with 270 officers and bluejackets for the Pacific squadron passed through yesterday afternoon.

Sir William Van Horne reached Rossland yesterday on his annual tour of inspection of the C. P. R. main line and branches.

The following locations were recorded this month: Oct. 7.-Elk Creek, L. T. George. Oct. 9.-Mozart, Lorraine creek, W. R. Lu Paso.

Kaslo people are holding a meeting tonight to discuss ways and means for opening up communication with the upper Duncan and south Lardeau districts.

Prof. Lu Paso and Fred Ahlin, left town on Thursday evening to furnish the music for the dance, which took place last night in McLennan & Black's hotel at Trout Lake City.

Only six men are now at work on the Lanark. The costliness of sinking a shaft in the old tunnel, and the fear that water might interfere with the operation, have deterred the management from undertaking this plan of development. The men are at present employed opening up a fresh drift.

Mr. Cochrane, a Scotch mining expert from Glasgow, who bonded the Donald claim for Tetley & Ross, is up at Illecillewaet, now looking up properties, and is negotiating to buy the Round Hill from Potts & McCullum. He is inspecting other properties in the vicinity for capitalists in Scotland, who may be induced to take hold next year. Mr. Cochrane considers North Kootenay to be the finest mineral district in Kootenay.

Work on the power house of the Revelstoke Water Power and Light Co. is being actively pushed forward, about 25 men being constantly employed on the work. The dynamo has been shipped from Peterborough, Ont., and is on the way but the wheels, which should have been here on Thursday are delayed, as the Hamilton Mfg. Co. of Peterborough cannot get iron owing to the strike of the Pennsylvania miners. A carload of bolts, etc., which is badly needed on the work is delayed for the same reason.

A Semi-Weekly Journal, published in the interests of Revelstoke and the surrounding district, Wednesdays and Saturdays, making closest connections with all trains.

Advertising Rates: Display ads, \$1.50 per column inch, \$2.00 per inch when inserted on title page. Legal ads, 12c per (non-paralel) line for first insertion; 8c for each additional insertion.

Our Job Department: THE HERALD Job Department is one of the best equipped printing offices in West Kootenay, and is prepared to execute a kind of printing in every class style at honest prices.

To Correspondents: We invite correspondents to send us material of interest to the general public, and desire a reliable regular correspondent in every locality surrounding Revelstoke.

REVELSTOKE HERALD Revelstoke, B. C.

NOTICE TO CORRESPONDENTS.

1. All correspondence must be legibly written on one side of the paper only.

SAURDAY, OCT. 10, 1897.

SILVER

The outlook for silver is becoming decidedly brighter. The Bank of England does not appear to have been scared either by the threats or the cheap ridicule of the gold party and its rabid press, and will evidently carry out the intention lately announced by its governor to use silver for a portion of its note reserve.

The Daily News of the 4th instant in its financial article refers to the rumor that an active correspondence is proceeding between the home and Indian governments and that the concessions to America will include the holding of one-fifth of the Bank of England's reserve in silver, raising the amount of the legal tender of silver coin from £2 to £25 and reopening the Indian mints and says: "It is very much to be desired that an end should be put to the present mischievous agitation and its attendant disquieting reports."

The most effective way to put an end to the "mischievous agitation" is to treat the silver cause with the simple justice to which it is entitled, that is, restore it to its old time standing by opening the mints to the free coinage at a reasonable ratio with gold. At the present stage of the game silver is depressed owing to unfair and oppressive legislation. Allowing it to be coined, and giving it a status as legal tender, at a ratio which would make say 18 or 20 ounces of silver equal to one ounce of gold, would once more restore the balance by making money more plentiful, by encouraging the important industry of silver mining, and last but not least by putting an end to the "mischievous agitation" which during the past few years has done so much to unsettle both commerce and politics.

ABDUL SEDET

Abdul Aziz sat on a wall. And didn't care aught about storm or equal; He laughed at the Powers, who made much brag, And defiantly waved his Moslem flag. He laughed, for he knew that his game was won, That wolves (with the sheep) were foiled and done, That whenever he wanted a card to play He'd only to get up a fresh affray. Armenia! Greece! What mattered the spot? So long as the battle was fierce and hot. So Abdul Aziz sits on the wall And don't care a rap for the Power's call; He'll sit, and he'll sit till the crack of doom; For he knows that there's never a foe with a broom! FROM PUNCH.

FALL AND WINTER STOCK

We now beg to call the attention of the Public to our New Lines just received in the following articles:

DRY GOODS--Comprising the latest designs in Dress Goods, Cashmeres, Flannelles, Laces, Ribbons, Embroideries, etc., etc., imported direct from Scotland.

BOOTS AND SHOES--Large shipment of Fine Boots and Shoes from best Canadian makers.

GENTS' FURNISHINGS--The stock in this department is most complete. Shirts, Ties, Collars, Socks, Hats, Ready Made Clothing, etc. in great variety.

HARDWARE AND HOUSE FURNISHINGS--Parties furnishing are invited to inspect our Stock of Stoves and Heaters, including the new Air Tight Heater, Granite Ware, Cutlery, Silver Ware and Crockery. Carpets, Oil Cloth and Linoleum. An extensive selection.

GROCERIES--Our Stock of Groceries is always fresh and first-class, being constantly renewed by consignments from the best houses in the Dominion. We lead in Tea and Coffee.

Agents: RAM LAL'S TEA C. B. HUMME & COMPANY Agents: Victoria Powder Co.

AN EXPANDING BULLET

Invention of a Montreal Militiaman--A Missile That Will Quickly Stop an Enemy

Montreal Star: At St. Helen's Island on Thursday, Colonel Lake, the Quartermaster-General of the Canadian militia, witnessed a test of a new bullet invented by a member of one of the local militia corps. The bullet, fired from a Lee-Enfield rifle at a joint of beef, tore open a wound at the point of the impact fully four inches across and two inches deep.

One of the most perplexing problems before the military men of the world at the present time is to provide a bullet for the new long-distance rifles with which all the armies of the great powers are armed which will stop an enemy on hitting him.

The Canadian accent sounds American at first to English ears, though a difference is soon perceptible. To American ears the difference is very great. They are fond of saying "any resemblance, but that is all nonsense. Granted that the two are distinct, yet the Canadian speech is nearer to American than it is to English, and the fact is rather a disagreeable surprise.

There is no object attained in filling him full of bullet holes if he can continue the fight on his own part. A gunner in A Battery R.C.A. wounded by a round bullet from a fowling piece at the action of Fish Creek in 1885 told a correspondent half an hour afterwards that when hit it was as though a red hot cricket ball had hit him and forced an entrance into his body.

The shock was so severe that he spun round on his feet and fell senseless to the ground. In a few weeks he was discharged cured. Another gunner in the same battery, wounded in the same action by a Winchester rifle bullet when struck, and kept his place in the ranks for some time, not realizing that he had been seriously wounded, until the effect of the hemorrhage began to be felt. The old military bullet was of soft lead with a hollow base, the sides of which were "seen" or expanded outwards and pressed into the grooves of the rifle. The bullet itself consequently fired at a high or low velocity, was sufficient to make a painful and stopping wound. The new rifle uses a long slender bullet or shaft, the lead being encased in a thick covering of nickel. When it hits a man he hardly feels it unless a bone is struck, so minute and clean cut a wound does it make.

CANADA'S LIGHT DRINK RATE

Mr. James Whyte, of the United Kingdom Alliance, says in the Times: Canada has, I believe, the lightest drink rate and also the lightest death rate of any nation in Christendom. For the ten years ending 1890 her death rate was only 14.01 per 1000 of population living, and her drink was the equivalent in absolute alcohol of 1,340 gallons of proof spirits per head per annum. For England for these same ten years, the drink rate was equal to 3,800 gallons of proof spirits

yearly per head and the death rate to 20.08 per annum per 1,000 of the population; for France both the drink rate and the death rate were considerably higher. The death rate was 21.96. It may be taken that the Canadian death rate was, in proportion to population, equal to about two-thirds of the average death rate of the principal European nations, and her drink rate to about one-third of their drink rate.

It is possible that the age distribution may account to some extent for the abnormal smallness of their rate of mortality. No doubt it does but not to any great extent. I am convinced that the smallness of the drink rate is the main factor. In this connection it is important to note that Quebec, the province of Canada in which the temperance movement has made the least progress, has by much the highest rate of mortality. For the ten years in question it averaged 18.91 per 1,000 per annum, or 4.90 per 1,000 more than Canada as a whole. Its drink rate yearly was the equivalent in absolute alcohol of 1,433 gallons of proof spirits. Of course, as Quebec drank so much more than the average, the rest of Canada must have consumed considerably less than the average.

THE CANADIAN ACCENT

AS HEARD BY AN ENGLISHMAN.

An English visitor, writing from Montreal to the St. James's Gazette, says: The Canadian accent sounds American at first to English ears, though a difference is soon perceptible.

The city of Toronto is, and there all classes, except the highest, speak in a highly-seasoned form of "American." They call their town "Terahio," as near as spelling can make it, which is not very near, but a sufficient indication; they do not say "the second turn to the right," or "a hundred yards further on," but a "hockannah," "lift," "elevator," "tram," "stretcher," a bag is a grip; and "right here" occurs every third sentence.

I am not cavilling these expressions except "elevator," which is an indefensible substitute for "lift." I merely mention them as specimens of the Canadian vernacular, and they are certainly Americanisms, and a number might be given. In the States great ingenuity has been expended on the invention of terms differentiating the language from English, and the Canadians have caught them all. They also use the Yankee inflections, and no little of the Yankee twang. The lower you go in society the more marked is the tendency. Yet the Canadian accent is quite different from the American, even among the lower classes. The more one gets accustomed to it the more plainly one hears the difference. It is broader, less sharp and pinched, and I must add, much less distinct. Of all the forms of speech I have ever heard, that of the common Canadians is the most indistinct.

There is, in short, a Canadian accent compounded of Yankee and broad English. It is not precisely any of the voices of the women very harsh. To an English ear it is so strange as to seem quite foreign, and that impression is heightened by the pains the natives take to let you know that your English is strange to them. I have been told several times with a sort of friendly pity that I speak with an English accent. The first time I replied rather dryly, "Yes, I do; very much as a Frenchman speaks French with a French accent. I don't know what accent you would prefer." The most refined and cultured Canadians, I should add, generally speak perfectly pure English without a trace of accent. Scotsmen preserve their own with marked tenacity.

# DESPATCHES

## FLOATING THE NEW LOAN IN LONDON

### A FATALITY AT EDMONTON

The Prince of Wales and the Engineer's Strike—An Indian Boy Shot at Morley—An Attempted Murder at Victoria.

OTTAWA, October 11.—After considerable cabling between London and Ottawa, the Deputy Minister of Finance last night received particulars of the proposed new loan. The rate of interest as anticipated will be 2 1/2 per cent. minimum. The offer which will be considered is \$91 for each \$100 and duration of loan is fifty years. The first loan of Foster's was for \$25,000 at three per cent. at the minimum rate of 4 1/2.

The average price realized was \$97.5, and it is generally considered that the condition of the London market today is favorable for a good price.

### HE BROKE HIS BACK

EDMONTON, October 11.—A young man named Bernard, while seated on a water-closet and leaning over the tub, was caught between the seat and the top of the door, resulting in his back being broken.

### NATIONALISTS PARADE

DUBLIN, October 11.—Five thousand Nationalists paraded yesterday to commemorate the sixth anniversary of the death of Parnell. His grave was decorated with flowers sent from all counties in Ireland.

### COMING WEST

WINNIPEG, October 11.—Sir William Van Home reached here on Saturday and left this morning for the west. He had nothing very interesting to say.

### WOULD BE IMPROPER

LONDON, October 11.—The Prince of Wales has refused to meddle in the engineers' strike, saying that while he deeply sympathizes with the workers of all ages, he does not think it would be at all proper for him to mix up in the trouble.

### INDIAN BOY SHOT

MORLEY, N. W. T., October 11.—An eight-year-old Indian boy was shot through the back by another pupil at the McDougall orphanage here on Saturday last. Death occurred shortly after. An inquest will be held.

### ATTEMPTED MURDER

VICTORIA, October 11.—Thomas Ginn, a Canadian, returned home on the Umbria last Wednesday, made an attempt on Saturday afternoon to murder a man named H. Bailey, with whom he was eating lunch in a private box. He fired three shots at him, but only grazed the leg of his intended victim.

### A TRAMWAY FOR CHILCOOT

#### JAMIESON FINDS FAULT WITH HIS CO-MEMBERS

Yellow Fever Still Spreading—Grener Asks for a New Trial—Conservatives to Contest Turtle Mountain—Aid for Fire Sufferers.

### WINNIPEG, October 12.—At a meeting of the Liberal Association last night, R. W. Jamieson, the member for Winnipeg, said the Liberal members of the West did not give proper support to the St. Andrew's lock.

### HAVE CLOSED THEIR CONTRACTS

TACOMA, October 12.—The Chilcoot Transportation Company have closed contracts with the contractor for the construction of eight miles of tramway over Chilcoot Pass to be finished by January 1st. The company calculate to carry two hundred miners and outfits over the new road daily at cheap rates.

### YELLOW FEVER SPREADING

NEW ORLEANS, October 12.—Yellow fever is still spreading, 31 new cases being reported yesterday.

### A NEW TRIAL

MONTREAL, October 12.—A motion was made yesterday for a new trial in the case of the Libel case. Judgment is reserved till Wednesday.

### THE SAUSAGEMAN'S CASE

CHICAGO, October 12.—Evidence in the Lutger trial ended yesterday with the examination of witnesses for the defence. No evidence being produced, arguments commenced and the case will go to the jury by next Saturday.

### MANITOBA POLITICS

BOISBYAAN, October 12.—The Conservatives are coming to the Manitoba constituency in the local legislature. Jas. Johnston, reeve of Morton municipality, was chosen at the convention last night as the standard bearer.

### LOSING UP

TORONTO, October 12.—The city board of control voted \$500 each for the Manitoba and Cassel sufferers. Lieutenant Governor R. Patterson gives \$50 to the Cassel sufferers.

### SILVER

MANCHESTER, October 9.—Members of the Royal Exchange are memorializing the Government to carry out its pledge to establish a staple of exchange between gold and silver and suggesting compromise between the extreme views of both parties. Considerably over a thousand signatures have already been obtained to this memorial including the names of several monometallists.

New York, October 9.—Closing quotations yesterday. Bar silver 58 cents; copper 110; tin \$11.20; lead 10.50; zinc 10.50; exchange price \$1.50.

An additional number of men are wanted on the Crow's Nest. The contractor has indicated that the contractors estimate that no transportation fare will be deducted from the men's wages.

# A STRANGE REQUEST

## A Calgary Rancher Who Has Killed Two Men Wants to Get His Gun Back Again.

NEW YORK, October 8.—District Attorney Olcott received this letter yesterday:

"Headquarters for Yukon travel. To the hon. district attorney of the city and county of New York: HONORABLE SIR.—Will you kindly send me by express the revolver with which I shot Anthony F. O'Neill in 1872. Having been pardoned and believe I'm entitled to it. The Hawaiian government returned the one I shot Capt. Stolt with, and in both these affairs time has justified my action.

I am living alone on my ranch, and am bothered with peckers, thieves and burglars. I want something to protect my life and property with, therefore I make this request, assuring you that only a proper use will be made of the weapon.

Yours respectfully,  
JAS. O'NEILL.

Calgary Alberta, Sept. 30, 1897.

The shooting to which King refers occurred on the afternoon of Nov. 18, 1872, at Pine street in the office of Judge Joseph Sutherland, in this city. King was at that time a lawyer, and was killed by Anthony F. O'Neill. A month previous to the tragedy King's wife began a suit for divorce. Judge Sutherland was appointed referee in the case, and the hearing was held in his office on Pine street. O'Neill, who was a detective, loved the referee, and was very cruelly on King's part towards his wife. When the hearing adjourned for the day that O'Neill gave his testimony, King followed O'Neill out of the referee's office and shot him as he was passing down the stairs. O'Neill immediately fled, King walked back into the referee's office and handed the pistol to Judge Sutherland.

Mr. Olcott directed his stenographer to notify Mr. King that revolvers used in shooting cases in New York were very seldom returned to the person who used them, and that the shooting referred to in Mr. King's letter had occurred so long ago that the revolver had probably been sold.

### CITY VERSUS COUNTRY

The opinion prevails generally that residents in cities are a less healthy class than those who live in the country, but statistics do not sustain this view. Country people, it is true, should possess the better physical development and the more robust vitality is quite often the case in proof of their disregard of hygiene rather than of the advantageous conditions of city life. In other words, there can be little doubt that with equally intelligent observance of the laws of health, the country would win in the competition of bone and brawn.

Few of those who live in cities realize what benefits they enjoy in the way of scientific cookery and ample market resources. The cuisine of the farmer is so limited that his household falls into a diet of plain food, which is monotonously unhealthful. Different sections have their own characteristic peculiarities, but everywhere the frying pan and its dripping, indigestible products hold first place. The expense of city people to give proper care to the preparation of food. On the other hand the urban family has the widest scope in the selection of edibles, and the sources of the food supply are watched by municipal specialists, who are quick to trace the relation of any article between tainted milk or water and a rise in the death rate. Then, again, the competition among producers is so keen that the great city markets are loaded with the best of everything available.

Another advantage of the city is its potential in turning the hygienic balance in favor of the city. Oddly enough, this is the question of ventilation. One would suppose that people brought up in the open air would appreciate the value of well ventilated rooms, but as a rule they do not. The open air has been rigorously excluded. In some that we have seen the window frames had been deliberately sealed down with a thick coat of paint, which from easily gathered dust and filth had not been disturbed for years.

The statement that country life possesses superior possibilities of health finds confirmation in the recognized fact that rural infants are harder and better conditioned than their city brethren. On the other hand among the applicants for admission at a number of women's colleges, the city girls show better averages in health and physical development than the candidates from the country. If this is fair evidence—and it would be easy to multiply instances—it appears that country people, starting in life with better promise for good health, quickly fall behind in comparison with city folks simply because they fail to observe the elementary principles of hygiene.

Nearly all children today are taught a matter of hygiene, and it is to be hoped that each successive generation will possess a more abiding sense of the necessity of eating the right things at the right times, and breathing the best kind of air at all times. When these conditions are fulfilled, the small expert to see a standard of physical development among farmers and dwellers in country towns superior to that of city people.

### Sir Wilfrid and Lady Laurier have left for Ottawa.

The badgering of Conservative government officials is still going on. Charges against the postmasters at Yorkton and Moose Jaw have lately been the subject of investigations. A perusal of the evidence in the show that the postmasters in question neglected their duties in the slightest particular. In the case of Postmaster Gass, of Moose Jaw, a couple of very serious charges were made, but the complainant was unable to produce a single witness to substantiate his statements. The worst of the matter is that the victims of political malice have apparently no resource against their would be traducers.—Moosomin Spectator.

# DISCUSSED IN LONDON

## THE FINANCIAL NEWS DEALS WITH THE CALGARY ROUTE

Canadians Will Come Out on Top—Some Inside History of the C. & E. Ry.—A Hint That Jim Hill May be Approached to Extend the Railway South.

The Calgary-Yukon route is already attracting attention in England, as the following article from the Financial News, of September 22nd, will show:

### "CALGARY TO CLONDIKE"

The Canadians and the Americans are playing a game of bluff with each other over Clonclike, and the Canadians may be safely backed to "come out on top," as they say across the Atlantic. There is no longer a doubt that the new goldfields are in Canadian territory. The Americans may discover others for themselves on their Canadian side of the boundary.

have the moving of an exceptionally good wheat crop. Only \$5,000 per month will be needed up to the end of October to raise the net earnings of the road to the same amount as the Government subsidy, namely, \$50,000. The divisible balance of \$100,000 thus secured would yield pay three per cent. on the bonds.

But their future possibilities are not limited to a question of mere yield. The essence of their value continues to be what it was originally—the prospect of their being absorbed by the Canadian Pacific. That question was not settled last year, but merely postponed. It will have to be settled, however, before the Canadian Pacific commits itself to the proposed extension from Edmonton to Athabasca.

# TU SCALE MOUNT ST. ELIAS

## Plans of Prince Luigi di Savoia to Reach the Hitherto Untrodden Summit.

The Appalachian Mountain Club of Boston is looking forward with great interest to the coming of Prince Luigi di Savoia, and is preparing the outfit for the trip of his party to Mount St. Elias, the giant of the Alaskan border. The prince is the youngest son of the king, and is a man of great energy and high attainments in all the sciences. He is a member of the Italian Academy of Sciences, and has a great reputation as a mountain photographer, and also comes of a noble family. He will be the principal companion of the prince in his expedition to the summit of the mountain, which is a peak of 10,322 feet. He is a member of the party which will also include five professional guides and a retinue of porters, twenty-five men in all. It will be the best equipped expedition that has ever entered the district.

Eleven years ago the first expedition to the region was sent out by a New York newspaper, which equipped Schwatka and Stetson-Karr for the trip. A height of 7,200 feet was reached, less than half the actual height of the mountain. The foothills were entered since been called the Karr hills. In 1888 Topham and a few friends made an expedition to the region. In 1890 the Government, in cooperation with the Government, sent out Prof. Israel C. Buswell. This intrepid explorer and his companion remained thirty-five days on the snow line, and at one time Russell was for a number of days alone at the highest camp, where he was covered with so great a fall of snow that he was compelled to tunnel his way out. Two years later Russell made a second trip with the Government's aid and attained a height of about 12,000 feet. It will be seen that the highest point attained and the summit there has an important climb, which the mountaineers of the world have not lost sight of. The Government intend to send another expedition to Mount St. Elias.

The peak was first seen by Bering in 1741, and received its name at that time. The first estimate of its height is 15,000 feet, which makes it the highest mountain on the continent. From St. Elias there extends to the shore the great Malspina glacier, a level ice field which covers the entire coast. The motion of which is so slow that the mountains have become covered with forests of trees. A Russian expedition will leave Boston in the latter part of May and will make the start from Seattle on June 12.

The calculations of astronomers extending over many years have fixed the weight of the earth at 6,000,000,000,000,000,000, or six thousand and sixty-nine quintillion tons.

The weight of the earth is a subject which has attracted the attention of many of the figures of the earth. The earth is a sphere, and its weight is a subject which has attracted the attention of many of the figures of the earth. The earth is a sphere, and its weight is a subject which has attracted the attention of many of the figures of the earth.

**LOCAL AND GENERAL NEWS**

An Interesting Budget of Local, Personal and General Items Round and About Revelstoke.

"Very pretty" those fall blouses at Couriers.

Mrs. E. Knowlton is building a large boarding house on First St., east.

A. J. Lapworth is erecting a large addition to the Rhodasia restaurant.

10 tons of cabbage for sale this month at 1 cent per lb. R. Tapping.

G. McTavish, Imperial Bank clerk, took in the bicycle races at the Kamloops fair.

R. Howson & Co. are offering a variety of bedroom sets at \$15 and upwards. See them.

Mr. J. H. Woodside, of the C. P. R. Dining Hall, spent a few days at the Kamloops fair.

M. Benton, packer, of this place has the contract for freighting out the Waverley ore this winter.

R. Howson & Co. have just opened out a nice line of reed and rattan chairs and rockers.

There was a social hop at Tapping's Theatre on Thursday evening, about twenty couples taking part.

Mr. C. E. Shaw went to Kamloops on Wednesday night with a prisoner, returning yesterday morning.

A nice centre table will improve the looks of your parlor. R. Howson & Co. have them for \$2 and upwards.

W. H. Vickers has gone up to Albert Canyon to inspect the new wagon road up to the Waverley mine for the Provincial government.

If your lounge or arm chair needs re-covering, see the stock of crests, silk plushes and tapestries which R. Howson & Co. are showing. \$t

Mr. R. L. Patterson, the well-known manager of the world-renowned Scotch firm of type foundry, Miller & Richards, was in town yesterday and paid the HERALD a call.

Mrs. J. Herchimer, wife of Conductor Herchimer, left on Thursday evening for Kamloops, where she will visit for a couple of days before leaving for a visit to Minneapolis.

Seven of the men, who have been working on the Albert Canyon road, came in on Thursday night. There was 6 inches of snow on the Downie creek divide, when they left.

Recorder Scott is in town from Illecillewaet. He has just returned from a revenue tax collecting trip up the new wagon road to the Waverley mine. About 21 miles were finished when he left.

Dave Wolseley is working away at the 30 foot tunnel on the Blue Bell mine at Illecillewaet. Six men are employed and will continue work all winter. The property is under bond to Tetley & Ross of Vancouver.

The Kootenay Lodge of the A. F. & A. M. will attend divine service in St. Peter's church in their corporate capacity on the evening of Sunday, 24th inst. The vicar of St. Peter's will preach a special sermon on the occasion.

The bishop of New Westminster left town on Wednesday evening for Enderby, where he will spend Sunday, and go on thence to the coast. He will pay Revelstoke another visit before Christmas and administer the sacramental rite of confirmation.

We cannot tell you all, but look at some of those new lines in hats, dress goods, mantles, blouses, dresses, gowns, wraps, fur capes, fascinators, health bread, underwear and soft underwear, comforters and cushions at Couriers.

P. McCarthy, Q. C., and Major Walker returned this week from a prospecting trip in the copper district north of Banff. They had an arduous trip but succeeded in staking some fine claims, bringing back some excellent samples of ore.—Calgary Herald.

The Nelson Economist suggests that a certain open space in Nelson be named the "Banner Circus in compliment to the provincial premier. Why not Bostock's Circus in compliment to the great Liberal convention of happy memory.

Stylish and becoming hats in Couriers's millinery department.

Hon. D. W. Higgins, speaker of the local legislature is in town on his way south. He is much impressed with the rapid progress made by this place since his last visit in the spring.

There is a good deal of complaint, and well founded at that, as to the slaughter of horses and cattle by trains in this vicinity. It is a matter of frequent occurrence and the owners find it impossible to obtain any redress. It would not be a very great matter for the railway to fence their lines near the town as they have done in other places, where posts and rails were a good deal more difficult to obtain.

The Karncliffe private car was attached to the west bound train last night. It carried Lieut. Col. Domville and party bound for the coast to make arrangements for transportation next spring for an expedition to the Yukon to be fitted out by an English company, of which the Col. is the representative. Mrs. Domville, A. T. Salisbury-Jones of the firm of Jones, Bidwell & Co., London, Eng., Prof. Agassiz and J. Mortimer were of the party.

Dr. Sutherland, of Laurie, is arranging for a syndicate to take a large party to Yukon next spring. He is at present organizing about the best route and will go to Edmonton to find out all about that means of access. He is invoking the aid of some eastern capitalists in promoting his scheme. It is the doctor's intention to accompany the party and to settle in practice in Dawson City.—Golden Era.

Mrs. Patmore, of Donald, has the honor of being the first lady who has ascended Bald Mountain. She went with a party who visited the Bald Mountain Company's Mine a fortnight ago. They camped the night at Old Man's Creek going up, visited the mine the following day and returned in three and a half hours. The climb is a very hard one but Mrs. Patmore stood the journey splendidly and was the life and soul of the party.—Golden Era.

Patterson Bros. of Albert Canyon, have rented the Springs Hotel from J. Skogstrom, who will give his whole attention to his ranch in future. At least so the Pattersons had it figured out. But Mr. Skogstrom thought otherwise and contended that the outcome of the King assault case, the other day placed matters in statu quo ante bellum. In fact he argued that the cheese was off. The Pattersons, who had the key proceeded to take possession imagining that the contract held good. Fred. Fraser, J. P., made his second trip to week to the mine but lively camp at the forks of the Illecillewaet, and the key was restored. Now is the turn for the lawyer to sit into the game.

**MARRIED**

SAMSON—LOFSVOLD—On the 13th inst. at Kamloops by Rev. J. A. Wood, Robt. Samson of Revelstoke, to Miss Ella Lofsvold of Kamloops.

TAYLOR—LARSON—On the 14th inst. at Revelstoke by Rev. J. A. Wood, Thos. Taylor to Miss Georgie Larson, both of Trout Lake City.

**WRECKED**

Mrs. Harkley, the wife of Capt. Harkley, Well-known Lake Captain of Owen Sound, Ont., tells how La Grippe left her, and how she and her children were left in a desolate and dreary place. Her husband and her family and friends despaired of her recovery.—The Great South American Nerve was the Beacon which Directed Her into the Good Health Harbor.

"About four years ago I was afflicted with a severe attack of kidney disease, which left me almost a complete wreck. I was prostrated for weeks. I doctored with several physicians and used many remedies, but none had any lasting effect. My friends began to be alarmed for my recovery. The doctors shook their heads, and said that I had little hope. I was attracted by an advertisement of South American Nerve, and as my trouble was of a nervous nature, I decided to try it. The first bottle helped me greatly. I persisted in its use and this great remedy has completely built up my system, and I positively declare that it is the only remedy that gave me any relief." Sold by Canada Drug and Book Co.

**WORTH ITS WEIGHT IN GOLD**  
Is the Testimony of Frank S. Emerick of Alvinston, Ont.—Says South American Kidney Cure Saved His Life.—It Relieves in Six Hours

"For two years I was greatly troubled with kidney disease. I suffered intense pain, and frequently was unable to work. I doctored at intervals, but got little or no relief. I began to give up, and the pain was very frequent and intense. About this time I saw South American Kidney Cure advertised as a specific relief for all kidney troubles, and I purchased a bottle, and it gave me wonderful relief in a few hours. I improved steadily, and after taking four bottles I am completely cured. I consider it worth its weight in gold, for it assuredly saved my life." Sold by Canada Drug and Book Co.

**WILL CARRY THE SCARS TO HER GRAVE**

Spent Thousands for Health, but did not Obtain this Greatest of all Blessings Until She Used the Great South American Rheumatic Cure Suffered Intensely for 12 Years.

Mrs. F. Braley of Tottenham, Ont., states: "I suffered almost continually for 12 years with rheumatism, the effects of which I will carry to my grave, and while the joints at my elbows and wrists are stiff I am entirely freed from pain in the use of South American Rheumatic Cure. It has indeed proved a wonderful cure in my case. I have spent thousands of dollars in doctors' bills and medicines without avail. Five bottles of this wonder-worker has cured all pain. I am better in health generally than I have been for ten years." Sold by the Canada Drug and Book Co.

**AN INSURANCE MAN'S STORY**

J. J. Hanratty, Inspector for the Standard Life Assurance Co. at Peterborough, Cured of Muscular Rheumatism by the Great South American Rheumatic Cure

"It Turns the Midnight of Suffering Into Middy Brightness of Good Health—These are His Words.

I was a great sufferer from muscular rheumatism in my arm; so much so that for days at a time I could not sleep. I worked the floor in pain the greater part of the night. I procured a bottle of South American Rheumatic Cure and found great relief after a few doses. It is a sure cure, and I heartily recommend it.

**Skin Eruptions Cured for 35c**—Eczema, Tetter, Salt Rheum, Barber's Itch, all itching and burning skin diseases vanish when Dr. Agnew's Ointment is used. It relieves in a day and cures quickly. **When buying a Cook or Heating Stove**

**Why not buy the Best?**

We sell only such stoves as we can guarantee. If you want to have stoves that you know your great-grandchildren will warm their toes at, buy a "Gurney." A cook stove to be durable must have weight; we mark the weights on all our stoves. A stove to please your wife must be a work of art; no expense is spared in the decoration on our heaters. A stove to give universal satisfaction must perform the duty assigned to it without inconvenience to the owner and with economy in the use of fuel; in this respect our Souvenirs stand unrivalled in the world today. Then, brethren,

Oh I think of the stove over there, A model of beauty and grace; No stove in the world will compare With the stoves we have in our place.

**W. M. LAWRENCE,**  
Sole Agent for the Gurney Stoves, Revelstoke Station, B. C.

**L. LAMA THIBET'S OVERCOATS**

It has always paid us to look out for our customers' interests.....

That is one of the reasons why our sales keep increasing day by day.

WE ARE SELLING MORE LIGHT AND MEDIUM WEIGHT OVERCOATS THIS SEASON than ever before. L. Lama Thibet's are the favorites—stylish all over, not affected, but with that easy grace that we've been nearly 15 years perfecting. The cloth woven from long, fleecy wool that needs but little dyeing—it can't fade. Farmer's satin and fine serge and wool linings made in the best possible manner. Medium and extreme length—well worth the price. The exclusive tailor will ask for coats made from the same material. Look at them and decide their worth.

**R. S. WILSON, Merchant Tailor, Revelstoke Station, B. C.**
