

Special to The Tribune.
ROSSLAND, May 17.—The water and light agitation in Rossland is becoming warm. The attitude of the city council is not, by any means, generally improved. A very large payroll was disbursed Monday and Tuesday, and consequently places of amusement and saloons are very lively. Richard Shea, who has now sold out of the Rambler-Cariboo, is sojourning in Rossland. "Dick" is now a capitalist, not in mining stock, but in hard coin.

A painful incident in connection with Greensell's supposed drowning is reported from Ymir. It appears that one of Ymir's most prominent citizens was awakened by what he thought was a cry for help. He got up and went out with a candle in his hand. After going some little way in the wet and dark he heard somebody muttering close to him, and as the cry was not repeated, he concluded it was the usual Saturday night drunk. He went back to bed feeling angry at having been disturbed. Now he is troubled with the thought that if he had pursued his investigations a little further he might have saved the unfortunate man's life.

Sandon.

SANDON, May 17.—The Slocan Star mill is closed down for a day or two on account of a scarcity of water. The Sandon footballers defeated Silverton by a score of three to two. The differences arising out of the seizure of the Spencer hall have been settled, Mr. Spencer paying all claims due J. M. Harris. The new hose and nozzles for the fire brigade have arrived.

New Denver.

NEW DENVER, May 17.—M. L. Grimmett, barrister, of Sandon, will open a branch office here. Captain Jefferys of Nanaimo, father of the late Fred Jefferys who was drowned in the lake some time ago, is at present in town settling up the estate of his son. E. Atherton, ex-mayor of Sandon, is having a neat cottage erected for his family on Nob Hill, overlooking Bigelow bay. M. McLean is erecting the grand stand at the ball grounds. It will accommodate several hundred people. Rev. R. N. Powell, Methodist, has been moved by conference to Greenwood. He is to be succeeded here by Rev. A. Sanford of Sandon. Building operations are more brisk now than for a year past. Every carpenter in town is employed. The painters also are busy, and there is a general sprucing up in all quarters of the town. The treasurer of the celebration committee reports funds coming in in a satisfactory manner. Several teams and a gang of men were putting the final touches on the ball ground yesterday, and everything is now in readiness for the big event on the 24th.

Slocan City.

SLOCAN CITY, May 17.—A payment on the Evening Star bond on the 15th, and from appearances must have been promptly met, as the work goes steadily on. Peter Luan returned last night from the Victor, on Ten-mile creek, and reports the snow as being fully a month later than last season.

Ymir.

YMIER, May 17.—No trace of the body of J. N. Greensell can be found. His friends are thinking of offering a reward for its discovery. His people in England have been written to, apprising them of his disappearance and almost certain death by drowning.

At the Miners' Union this evening the wage question will be discussed, and the delegates to the Nelson convention will make their report.

R. C. Pollett is here in connection with the Nevada mineral claim, operated by the American Eagle Company, and work will be started almost at once. The Rising Star group, consisting of the Rising Star, Rising Sun and Topsy L, adjoining the Porto Rico, are under a short option for stocking, subject to an engineer's report, for \$500,000 in one million shares of fifty cents each. A lot of development work has been done, sufficient to apply for a crown grant. The ledge which is fourteen inches on the surface and four feet at a depth of thirty feet assayed from \$8 to \$50. James Oleson is here and intends to commence work on the Last Chance on Round mountain.

Concentrates are being steadily shipped from the Ymir mine and when that is finished the ore will be commenced on. The month of May will be a record one for the Ymir Mines, Limited. W. Burke and L. Dewey, both of Rossland, have been paying the camp a short visit to look up their mining interests. J. Goodlad and Hector McClarty are back from the Union Jack group, but they report the snow is still too deep for operations. S. S. Fowler is busy making a survey and report upon the Dundee mine. It would not be a surprise if the London & British Columbia Goldfields acquired that property.

Kaslo.

KASLO, May 17.—The Kaslo & Lardo-Duncan railway people continue to "cinch" their big opponent at every chance. Notwithstanding that they succeeded in getting an injunction restraining the C. P. R. from building their line through the pass at Duncan City, for the

present at least, they are after them now on the Duncan City townsite. The C.P.R. have almost completed the grading of their roadbed at Duncan City, on the other side of the pass, and now the Kaslo & Lardo-Duncan people are establishing a grade a little higher, and in making the same will make it very unpleasant for the C. P. R., as the two lines run close together. At present the Kaslo & Lardo-Duncan railway people seem to get considerably the best of their opponents. Over a hundred men are now working at the Duncan City end of the Kaslo & Lardo-Duncan line and considerably more than this on the C. P. R. line.

H. Key Stovel came down from Duncan City yesterday and reports all kinds of excitement there just now. The steamer Marion is going to attempt to make the run from Kaslo through the Lardo river to Duncan City tomorrow. This run has only been made once, and that was by the little steamer Idaho two years ago in high water. She had considerable difficulty in getting up and has remained on Duncan lake ever since. However, the river has been improved since then, and with the high water that is expected this season, the captain of the Marion thinks he will have no difficulty in making the run up the Lardo river daily. The experiment will be watched with interest.

Green Brothers have moved their retail stock to their new premises opposite the Bank of British North America, and now have one of the best business stands in town. The city has a gang of men at work building a cribwork in the cut on A avenue. This is a much needed improvement, as ever since the cut was made the sides have been continually falling in, making traffic up to the hill very difficult at times, and the dirt and stones were always a source of annoyance to residents on the hill.

The Czar Much Pained.

BERLIN, May 17.—The Local Anzeiger today prints an interview with William T. Stead, who recently interviewed the czar for the second time, in which the newspaper is quoted as saying the czar read with much pain the pamphlet of professor Stengel, one of the German delegates to the peace conference, who defended war and declared that eternal peace ought not to be the aim of culture. Throughout Russian official circles Mr. Stead found a conviction that professor Stengel's appointment meant a slight to Russia.

Does it Mean War.

LONDON, May 17.—Three batteries of field artillery have been ordered to South Africa and will leave England next Monday. Their destination is the national arsenal, which is near the Boer republic. Although the dispatch of these troops is part of a plan to strengthen the British forces in South Africa, the hurry orders under which they have been made makes their departure significant. Their arrival in Natal will give England six strong batteries at the particular point, which is easy of access to the Transvaal.

Cause of a Fatal Railway Accident.

POTTSVILLE, Pennsylvania, May 17.—Albert Ohl, a lad seventeen years of age, living near the spot, was arrested and held without bail today by the authorities at Tamagua, charged with putting the spike on the rail which caused the accident on the Little Schuylkill branch of the Philadelphia & Reading railway yesterday at Zehners, whereby one man was killed and several injured. Ohl admitted the charge. His excuse for placing the spike on the rail was that he wanted to flatten it.

The Peace Conference.

THE HAGUE, May 17.—All the delegates to the international peace conference have arrived. Today was spent in a general exchange of visits. The permanent president of the conference will be M. de Staal, Russian ambassador to Great Britain and the leader of the Russian delegation. The honorary chairman, who will open the proceedings, will be M. de Beaufort, president of the council and minister of foreign affairs of the government of the Netherlands.

Two Foolish Young Men.

PLATTSBURG, New York, May 17.—George Patnode and Ernest Gongin, both aged twenty-three years, of West Chasey, visited Plattsburg Monday afternoon. They found a bottle of what they supposed to be port wine in the Commercial hotel barn and drank freely from it. Soon after they were taken violently ill and died today after suffering terrible agony.

The Result of a Divorce.

DAYTON, Ohio, May 17.—Frank Campbell killed his former wife and sister-in-law and then committed suicide at West Alexandria this afternoon. He had recently been divorced.

Silver.

NEW YORK, May 17.—Bar silver 61c. Mexican dollars 48 3/4c. Silver certificates 61c.

GRITS GET ALL THE JOBS
IN THE CIVIL SERVICE.

VICTORIA, May 17.—The feeling in political circles here is that the trouble over the Deadman's Island lease will be made the excuse on the part of premier Semlin and minister Cotton for calling attorney-general Martin to account. Those who should be in a position to know say that the attorney-general is making himself solid with a certain wing of the Liberal party in the province by appointing men of that particular political stripe to all the vacant offices in the government service. This the Conservative members of the cabinet resent, and in their protest they will doubtless be backed by the entire Conservative party of the province.

It is said that minister Cotton sought to force the attorney-general into a corner over the Deadman's Island matter and that he inspired the telegram to the attorney-general which gave him the choice of deciding as between Ludgate and the province. In this case however the attorney-general proved to much for his colleague from Vancouver in that he promptly took up the provincial government's side of the case and threw his private client overboard. It is now said that Martin will have a conference with the Liberal members of the cabinet and discuss the situation, and that he has wired the minister of mines to return to Vancouver for the purpose.

The Queen Lays a Corner-Stone.

LONDON, May 17.—Queen Victoria laid the foundation stone of the Victoria and Albert museum today. She drove through the streets lined with troops from Buckingham palace, the royal carriage being escorted by a detachment of the Life Guards. Her majesty was accompanied by several princes and princesses, and other royal personages met her at the museum, where a raised dais was reserved for them. The houses along the route were decorated and there were strings of flags across the roads. The sun shone brightly. A gaily dressed assemblage witnessed the ceremony, which the queen performed without leaving her carriage, and amid much enthusiasm her majesty afterwards took the train to Windsor. The ceremonies resembled a miniature jubilee. Inside the museum the scene recalled the spectacle at St. Paul's cathedral upon the occasion of the jubilee. The marquis of Salisbury, lord Rosebery, all the cabinet ministers and the diplomatic corps were present, nearly all of them wearing brilliant uniforms. The arrival of the ministers in splendid equipages with footmen were very picturesque. Her majesty looked remarkably well. She was dressed in black, except for a white plume in her bonnet. She took the greatest interest in the mechanical part of the stone-laying, talking lengthily with the prince of Wales on the subject. The queen was seated in a four-horse open carriage, with Scotchmen on the rumble and escorted by outriders. The national anthem was sung by pupils of the Royal College of Music, and afterwards a madrigal, specially composed by the poet laureate, was sung to music written by sir Alexander Mackenzie, principal of the Royal Academy of Music. The archbishop of Canterbury, primate of all England, read the prayers.

Getting After the Chocolate King.

ST. JOHNS, Newfoundland, May 17.—The British admiralty has ordered the armed sloop Alert, now inspecting the fisheries along the treaty coast of Newfoundland, to visit the island of Anticosti after the fishing season, and to investigate the condition of affairs there, and especially with respect to the enforcement of sovereign rights by M. Menier, the owner of the island, as claimed by a section of the press and public men of Canada.

Marchand Receives His Honor.

JIBOUTI, East Coast of Africa, May 17.—Major Marchand, the French explorer, who has just crossed Africa from the Atlantic coast, has arrived here. The insignia of commander of the legion of honor was handed to him on board the French second class cruiser D'Assan, without any ceremony.

Conference Not Yet Arranged.

CAPE TOWN, May 17.—The expected conference between president Kruger, of the Transvaal republic, and sir Alfred Milner, governor of Cape Colony, has not yet been arranged. The president of the South African league repudiates any connection with the enlistment of men for any purpose. The excitement is abating.

Schooner Sunk in Lake Erie.

DETROIT, May 17.—The schooner Ganges sank in Lake Erie last night as a result of a collision with the steamer Presque Isle. The crew of eight men was taken off by the Presque Isle and landed in Detroit today.

MAY ARBITRATE THE QUESTION
OF THE BOUNDARY LINE.

WASHINGTON, May 17.—As a result of a conference at the foreign office in London between lord Salisbury, sir Julian Pauncefote and ambassador Choate, it can now be predicted that the high-joint commission to adjust issues between the United States and Canada will be re-assembled during the coming summer or early fall. This outcome is not positively assured, but Mr. Choate's report of the exchanges at the foreign office certainly conveys great encouragement to the officials here, and warrant the expectation that negotiations may be again taken up with some prospect of reaching an arrangement. It can be stated that if the commission re-convenes it will only do so upon a complete abandonment of the old basis, which proved to be unsuitable to the creation of a complete agreement, and the United States will have some sort of assurance in advance of the nature and degree of the concessions that may be expected from the other side, the lack of which, it is said, caused the failure of the first negotiations.

The boundary question is said to be the main obstacle to an agreement between the governments of the United States and Canada, so much so that the commission took its last adjournment because of its manifest inability to come together on this point. Since then the two governments have tried to settle the question and some progress has been made. A final agreement does not appear to be in sight, but a temporary adjustment of a modus vivendi is still open. Under the circumstances the officials concerned in the negotiations are favorably considering arbitration as a means of securing a settlement of the boundary matter. If that plan could be affected it is said that the commission would not only be sure of re-assembling, but it would meet with every prospect of winding up all the outstanding difficulties between Canada and the United States. While the plan of arbitration is most favorably entertained by many of the officials, it is not known how far it has gone in the way of negotiations with lord Salisbury. The negotiations have taken a new turn by the suggestion that the Alaskan boundary question be submitted to arbitration independent of other issues involved, thus leaving the commission free to resume its work on the many other pending questions.

Buffalo Strike Spreading.

BUFFALO, May 17.—The strike situation here was further complicated tonight by the action of the firemen on the lake boats, in deciding to go on strike at noon tomorrow if the other strikers had not secured a settlement of their grievances by that time. There are fully 1000 of these men connected with the Buffalo union, and if they go out it will prevent the movements of boats either in or out of the harbor. Anticipating this, the owners of several vessels ordered their boats from Buffalo today, and they are now making for Cleveland and other ports in an endeavor to get cargoes.

Prisoners Remanded.

CAPE TOWN, May 17.—Fries was the only prisoner who did not appear today at the Pretoria court for arraignment. The streets were thronged and the prisoners were escorted under a strong guard from the jail to the court house. A remand was granted and the prisoners were returned to jail.

A London despatch says that the impression is gaining ground that the alleged plot was prepared by president Kruger's agents to discredit the South African League. The officers of the Liverpool regiment and an artillery regiment who were to have left tomorrow, under orders to proceed to the Cape, were stopped at the last moment.

Striking for Four Cents.

GLASGOW, May 17.—The dock laborers employed by the Anchor line and the Allan line have gone out on strike. Thirteen hundred men are idle. Three Anchor line steamers, two Donaldson line vessels, and three Allan liners are blocked. The dockers demand ten pence per hour instead of eight pence, which is the present rate. At the conference today the Anchor line officers offered the men nine pence an hour, but the dockers' representatives refused to accept the proposition. At a second conference, however, the Anchor line officials conceded the demands of the dockers.

Explored the Amazon.

WASHINGTON, May 17.—The navy department has just received from commander Todd of the Wilmington an interesting account of the remarkable voyage of the exploration up the Amazon river made by that vessel in April last. Manaus, at the junction of the Rio Negro, with the Amazon, has heretofore been regarded as the head of navigation for steam vessels, and from that fact has

grown to be a prosperous city of 40,000 inhabitants, consequently the intention of captain Todd to ascend above that point led to adverse demonstrations against the American consul and the native pilots who assisted the Wilmington to make the voyage. Captain Todd succeeded, notwithstanding these obstacles, in ascending the Amazon for 1000 miles above Manaus, and had it not been for lack of fuel he could have steamed 300 miles farther. He believes the possibilities of the successful navigation of the vast and hitherto unknown interior of South America will be of the greatest commercial importance, and the navy department probably will take steps that they are made known to the maritime world.

LOCAL NEWS AND GOSSIP.

An employee of the Lakeview hotel was taken suddenly ill last evening, and the proprietor asked a well-known physician for medical aid. The physician refused on the ground that it was after office hours.

THE TRIBUNE is not the official organ of the city council, but it is the only paper in the town that can print the by-laws passed by the council in type of one size, and on paper of good color. THE TRIBUNE could even print that wonderful special edition of the Miner without taxing its typographical resources to any great extent.

W. F. Anderson, travelling passenger agent of the Canadian Pacific Railway Company, returned last night from a business trip through the Boundary district. He reports that good progress is being made on the Robson-Penticton extension and that trains will be running into Cascade by July 20th. Pending the construction of the iron bridge over the Kettle river, false work is being put in to enable trains to cross the river temporarily. A branch line of railway is being graded to the Mother Lode mine from Greenwood.

'Come Here! Hash and Chew!'

An enthusiastic Scotchman wishes us to reprint the following, under the above heading, from an old number of Canada's late comic paper, "Grip": "Obviously, the Jaudivore of Mr. Beignough. What it is all about, only a Hielonnan himself would know, but, as our enthusiastic Scotch friend (and, doubtless, 'there are others') swears some copy, to paste, in his hat, we are not hard-hearted enough to deny his request."

Toronto, June 20th, 1897.

ATLANTIC "Grip"—I was never so envious, and the rays of my life since I would come to Canada, either before or since, that I was the day before tomorrow, at the Gaelic Society's excursion to Victoria Park, which was also the same day in 1818 that so many of my clan and a few others too, moreover, put so much powder and put into a large number of little Frenchmen at a place they'll call Waterloo, which perhaps you would have heard of before, what- ever, because all the past historians of the Highlands and the Highland clans agree and confess that if there was not a life or four thousand fine fellows there from Argyleshire, including Oban and Tobermory, forsy Campbelltown and the rest of Cantyre to the Mull itself, which is a part of the country where the fery anichells, mappes, would not desire for a more better place, and where there is not in any other half of the world so good whiskey as the Campbelltown or the Isk, moreover, so sweet as milk and that could make you feel twice so strong as a strike, although the Lowland creatures was not incapable of using it without a large quantity of common water.

Oh, yes, Mustur "Grip," you can assure me it was a fine picnic, a fery fine picnic indeed, and if we'll spare the Almhichty o another year this time twelvemonth I hope to see twice as more at the Gaelic Society's next annual excursion, so I do. DUNCAN McPHELAN.

The Miners Will Take Prompt Action.

It is reported that the members of the Nelson Miners' Union will hold a meeting on Saturday for the purpose of considering what action shall be taken with respect to the statement of the mine-owners that they will not pay more than \$3 for miners for eight-hour shifts. The members of the union say that it is the general opinion that the mine-owners will close down their properties about one week before the eight-hour law comes into effect, and that they will offer the miners employment at the scale set out in the statement. No inkling can be had as to what the probable action of the local union will be.

A Celebrated Doctor Dead.

NEW YORK, May 17.—Prof. William Hale McPhree, one of the foremost authorities on therapeutics in this country, died suddenly of heart failure at his home in this city. He received a signal compliment last evening in the shape of a message offering him the professorship of Materia Medica in the New Cornwell medical college with a salary of \$10,000.

Alderman Charles Hillyer returned from Vancouver last evening where he spent several days in furthering the interests of the Nelson Saw and Planing Mills Limited, and of Charles Hillyer & Company contractors. He reports the sawmill business on the coast as enjoying the most prosperous period in several years, and says that he experienced no little difficulty in securing a supply of cedar for the factory of the local mill, the sawmills having orders ahead to keep them running at their full capacity for six months. He ultimately succeeded in placing an order with the Royal City Planing Mills for the delivery of one carload of cedar per month, so that the local company will have a regular supply of material for its factory.

On Monday alderman Hillyer witnessed the fight on Deadman's Island between the forces of the provincial police and those of Theodore Ludgate. It was an exciting affair. The sawmill man had a force of sixty men at work felling trees at 6:30 o'clock in the morning. The city police were on the island at the same time and formally arrested all the Ludgate men but did not interfere with their work. When his men had all been arrested Ludgate informed the police that he did not propose to submit, and that the only way he could be taken from the island for which he had a federal lease was by force. The few policemen did not relish the job of forcing some sixty sturdy workmen to do their bidding and they retired to the city for reinforcements. The men then continued their work until about 9 o'clock, when attorney-general Martin, R. A. Anderson, a stipendiary magistrate, and Colin Campbell of the provincial police, put in an appearance. The provincial officer accosted Ludgate and read a warrant for his arrest. Ludgate replied that he would not submit to arrest and would not order his men to stop work. The officer then proceeded to execute his warrant and was promptly knocked down by the mill-man. Constable Baines of the city police was then called upon to assist in the arrest, and he went down also, but in the mix-up officer Campbell got upon Ludgate's back and held him while Baines put the handcuffs upon him.

While this was going on R. A. Anderson read what is known as the riot act, and the attorney-general who was formerly Ludgate's legal adviser advised all the men to get off the island. As an incident he said that all who remained more than thirty minutes would be shot down by the officers. Ludgate was then taken off to the city with the handcuffs still upon his wrists and his workmen quietly dispersed.

On the following day he was arraigned before the police magistrate. Attorney-general Martin appeared for the province, city solicitor Hammersley for the city of Vancouver, and solicitors Bowser and Godfrey for Ludgate. The sawmill man's lawyers were not ready to go on with the case and an adjournment was granted until Thursday. Just what the outcome of the case will be it is difficult to say as the federal government will, it is said, defend the action of its lessee in his attempt to retain possession of the island.

Alderman Hillyer says that the majority of the people of Vancouver are in favor of Ludgate being permitted to retain the island. The nabobs of the west end oppose him to a man but the workmen are in his favor to a man. Since the attorney-general has flopped on the question, however, the local papers are all against him. The Vancouver World has opposed the granting of the island lease from the first, the News-Advertiser has opposed it on the ground of provincial ownership, and the Province is opposing it because the attorney-general has been obliged to oppose it. Public feeling is so strong on the matter that should an election be precipitated it would largely be a case of Ludgate and anti-Ludgate with a big majority in favor of the mill man.

Seeing for Themselves.

W. S. Stout of Toronto, general manager of the Dominion Express Company, accompanied by J. H. Boswell, G. A. Newman, W. H. Burn, H. L. Meyer of Toronto, S. T. Stewart of Montreal, J. Sheppard of Chicago, and S. A. Davis of St. Paul, all of whom are interested in express companies as stockholders or as heads of divisions, are making a tour of Kootenay. They came over the Crow's Nest Pass road, and after visiting the main towns will go north to Revelstoke and proceed to the Coast. Mr. Stout has visited Nelson every year for the last eight years, and says that every year has shown a marked improvement, which is a pretty good indication of the growth of Kootenay. The gentlemen who accompany him are seeing the country for the first time, so that they will be in a better position to decide questions relating to the express business of this country than from time to time crop up, and which cannot well be settled on lines that would be satisfactory to patrons in the East, as the conditions here are somewhat different to those prevailing in the East. Mr. Stout seemed to be pleased to hear that there were few complaints made against his company. The party left for Rossland last evening by the Canadian Pacific.

NOW IN STOCK

A FULL LINE OF

- Ladies' White Duck Skirts.
- Ladies' White Duck Suits.
- Ladies' Shirt Waists at 50c, 75c, \$1 and \$1.25.
- A few Spring Capes left, which will be sold at cost.

DAILY EDITION..... FIRST YEAR, No. 115
WEEKLY EDITION..... SEVENTH YEAR, No. 25

THE DAILY TRIBUNE is published every morning (except Monday), and will be mailed to subscribers in Canada or the United States for \$5 a year, and to subscribers in Great Britain for \$8 a year; or it will be delivered to subscribers in Nelson for 25 cents a week, \$1 a month, \$2.50 for three months, \$5 for six months, or \$10 for one year. Payable in advance.

THE WEEKLY TRIBUNE is published every Wednesday and Saturday, and will be mailed to subscribers anywhere for \$2 a year, payable in advance.

REGULAR ADVERTISEMENTS printed in both the daily and weekly editions for \$4 per inch per month.

LOCAL OR READING MATTER NOTICES 25 cents a line for each insertion.

JOB PRINTING at fair rates. Accounts for job printing and advertising are payable on the first of every month. Address—THE TRIBUNE, Nelson, B. C.

The debate in the house of commons on the Columbia & Western Railway bill showed very clearly that the people have few champions in parliament, John Gos-tigan, the recent convert to Liberalism, moved the third reading of the bill, and Frank Oliver moved that the bill be re-committed to the railway committee. This motion was seconded by Hewitt Bostock. The object of the motion for recommitment was to reduce the bonding privileges of the road to the actual cost per mile. Mr. Oliver, in his speech, stated that the Calgary & Edmonton railway, according to the company's returns, had cost \$3,700,000, yet it had been bonded for \$5,450,000, on which six per cent interest is paid. In other words, the people who furnish the traffic for that road are required to pay six per cent on \$1,700,000 more than the road actually cost. The Columbia & Western railway will probably cost \$25,000 a mile, yet it is to be bonded for \$35,000 a mile, and the mine owners and business men of the Boundary Creek country will be required to pay interest on the \$10,000 a mile that was not used in building the road. The members who voted for the Oliver-Bostock motion were: Bostock, Barnett, Casey, Christie, Clarke, Douglas, Fitzpatrick, McCarthy, McMillan, Oliver, Richardson, Robertson, Rogers and Wood. Sixty-one members voted nay, among their number being the following ministers: Laurier, Sifton and Joly.

In today's issue of THE TRIBUNE will be found six bylaws that require the approval of the ratepayers before they become effective. Two grant franchises to private companies, and four are for raising money to be expended on public works. As we believe they are to be printed in the Miner and the Economist as well as THE TRIBUNE, there is no excuse for any ratepayer not being posted as to their objects. THE TRIBUNE will oppose the money bylaws, with the exception of the one to raise money to be expended on sewer construction.

THE Economist goes to the extreme in declaring the eight-hour law an iniquitous measure. A similar law has been in effect in Utah for a number of years. A like law goes into effect in Colorado on June 5th. The great copper mines in Northern Michigan are worked on the eight-hour system. The greatest pro-

of them. The matter goes farther, indeed, for many papers are full of the very ordinary proceedings of people known to nobody but their friends, but presumably known by sight to the strange witness; you read how some young man, who is very likely a minor clerk in a bank or a subaltern in a militia regiment, has been "seen walking in Sloane street." Or you read how some half-dozen people, whose reputation is, or should be, entirely private, were "the only men I saw" at the opera. I venture to suggest two improvements on all this. One is that the names should be fictitious; they would mean quite as much as the others to the general public, and an advantage would be that weird and fascinating stories might be told about them without risk of libel actions. The other improvement is that all little societies and coteries should hire columns in newspapers to be filled exclusively with their picnics and "at homes." It might end in free publicity being granted, like education, by the state. In this way we all, from Tooting to Tennessee, would have the gratification now enjoyed by the subaltern in Sloane street, of seeing our doings, our shoppings and summerings, and supper-parties, recorded in print, and so at last the spirit of the age would find complete expression.

A PARLIAMENTARY WHIP'S TROUBLES.

No member of parliament has more arduous or more anxious duties to perform than the Whips, who from the beginning of the session to the end of it, have to work like horses. Yet the public hears very little of these indefatigable members. Parliamentarians of long experience always declare that good Whips are born, and that they cannot be made.

Each of the two great parties in the house of commons has three or four Whips, one of the number on each side being recognized as the chief, and these Whips have a large staff of messengers, who are in constant readiness for any emergency.

It is the Whip's main duty to hunt up as it were, the members of the house on the occasion of special votes by forwarding "whips" or circulars, which request their special attendance. As a rule it is the government Whips who are the hardest and most anxiously worked, especially when the government's normal majority is a small and precarious one, for it is their duty always to see that a majority is preserved in the house.

Consequently they send out a "whip" every night to their own members, giving a short outline of the business to be transacted the next day. At the top is the word "important" in big capitals, and under this will be drawn either one, two, three, four or five lines, and it is according to the number of these lines that the member knows the urgency of the request that he should be in his place the next day. Very seldom is a one-line whip sent out, for it is tantamount to telling the member that he may stay away. A two-line whip is scarcely more pressing, for a translation of the two lines might be said to mean, "Well, you might as well come if you are not doing anything else of a particular nature." Three lines amount to "You had better come, hadn't you?"

When the hon. member receives any of the foregoing "whips" he may very likely light his pipe with them; but four or five line "whips" have to be taken more seriously. The former means, "Unless circumstances of a most exceptional character prevent you, you must be in your place, certain." The five-line is all that a whip can be. It will take no refusal. It says simply, "If you are alive you must come." One or two of the sentences on the "whip" may be underlined as well, indicating, perhaps, what part of the business it is that is most pressing.

Many times, however, members receive four or five line whips, and find, after all that the occasion was really not one of such great importance. Consequently they are inclined to treat the next one of its sort that comes along with some contempt and stay away from the house. If it should so happen that many members should be so carelessly minded at the same time, the Whips that night may be driven wild by the discovery that their party is in such small numbers that it must be defeated if the opposition forced a snap division.

To avoid such a calamity every means is resorted to for fetching the truants to the house. Messengers are sent after them in all directions, telegrams are sent to them addressed to all places which they frequent, private houses are disturbed, the clubs are scoured, and if the members are found they are metaphorically dragged out by the hair of their heads and rushed breathlessly to St. Stephen's.

Then the Whips must always be in attendance when the house is sitting, or at all events when business specially concerning their party is brought up. Sometimes, on questions which are not very well understood the rank-and-file have to be told how to vote, and when the division bell rings they look to the Whips to tell them which lobby they must go in.

Of course the house sometimes gets very thin at dinner time, and when the members leave for an hour or two to fortify the inner man, their destination is made a note of by the government whips, who have particular regard to the number who are dining in the house itself, or at a club just across the road which is government in politics. In an emergency, these members are snatched away from their tables by the merciless whips without a second's warning, even though some tempting morsel of food should at the time be undergoing transit from plate

THE BANK OF BRITISH COLUMBIA NELSON

Is now prepared to issue Drafts and Letters of Credit on Skegway, U. S., Atlin, B. C., and Dawson City, Yukon District.

to month. At the club referred to, there is a bell which rings when divisions are being taken in the house, and, moreover, in the session dinner is provided in the basement for honorable members who may be wanted suddenly. This is simply that they may be a few feet nearer the door than the dining room is, and from this point, if not over corpulent, and able to do something resembling a sprint, the house of commons may be gained within the two minutes which elapses between the ringing of the bell and the taking of the division.

But besides all this, the Whips have even more responsible duties to perform, for the party leaders often depend upon their own Whips in the formulation of a policy which will "go down" with their followers. The Liberal and Conservative leaders cannot mix up with the throng and find out exactly what their parties want and don't want, but the Whips can and do. They converse with everybody, and when they find their leaders going off on the wrong tack they tell them about it and bring them round till they are sailing with the wind again.

When a very important division is coming on, the Whips usually know almost to a man how the voting will go and what the majority on either side will be. But sometimes their best-laid plans go wrong. There was a remarkable case in point when the last Liberal government fell, on the cordite division in 1895. The famous Liberal Whip, the late Mr.

NOTICE

NELSON, B. C., May 18th, 1899.

As the announcement has been made that the government of British Columbia purpose enforcing the amendment to the Metalliferous Mines Inspection Act, making eight hours a working day for those employed underground in metalliferous mines; Sec. 13 "No person shall be employed underground in any metalliferous mine for more than eight hours in every twenty-four hours;" the undersigned, as representing one of the two parties mainly affected, consider it advisable to make public their views on the situation created by this uncalculated legislation, and to indicate what their line of action must inevitably be.

When the undersigned are determined to respect, and adhere to the laws of the province, it may be pointed out that this law is trenching on the injuries it must inflict upon the mining interests of the province; and on the amount of wages earned by the men.

It means reducing the hours of labor in the mines from twenty hours a day to sixteen hours, as many of the mines are so circumstanced that three shifts cannot be worked to advantage. This means a reduction of twenty per cent in the amount of the production of many mines, and a reduction of twenty per cent in the development work being carried on in mines preparing for production, and a reduction in the supplies used in the mines.

The most amicable relations existed, and still exist, between the employers and employed at the mines. The men were earning good wages, equal to any being paid in camps in the United States, and higher than those paid in many, and they were rendering good services for those wages. If any discontent was felt at the existing state of affairs, it was not generally known. It is therefore deeply to be regretted that the legislature has seen fit to disturb the existing harmony, to interfere with the growing prosperity of the mining districts, to reduce the wage-earning power of the men employed, and to interfere with the free right of contract hitherto enjoyed.

As to the future, after the 1st June next, at the mines represented by the undersigned, the standard rate of wages that will be paid to skilled miners for an eight-hour working day will be three dollars (\$3.00), and other labor will necessarily be also paid for according to the time worked.

EYESIGHT

Have you ever experienced any trouble with the usual acuteness of your eyes, such as the blurring of vision, fine print appearing to run together, a tired feeling after reading for a short time, apparent blotches or a hazy mist before reading matter; do you have pains in your forehead near the sides, between or above the eyes; do you ever have intense pains in the head, especially after using your eyes for some time; did it ever occur to you that nearly every one of those headaches are caused by some defect of the eyes; do you find that it tires your eyes to look down, or that it makes you dizzy to look up; is one eye better adapted for close work than the other; are you so far-sighted that you cannot distinguish small articles close at hand; are the refractive powers such that you can only see objects in close proximity to the eyes; are you wearing a pair of spectacles that are ruining your eyes for all time to come? If so consult Prof. Harvey, F. C. M. C. I., at Vanstone's drugstore, every day until May 24th. Consultation free.

Ellis, looked sorrowfully at his book when it was all over and said, "There, anyhow, I had a majority." Some of his party had "gone out at the back door."

LOST.

LOST—A broad silver brooch, on Monday night. The finder will be suitably rewarded by returning it to Mrs. George Stephenson, Water street, Nelson.

LOCAL NEWS AND GOSSIP.

There is said to be a hitch in the awarding of the Bank of Montreal building contract. The lowest bidder is reported a Coast contractor whose work in Nelson has not been at all satisfactory.

R. D. Anderson, business manager of the Miner, has gone to the Coast to arrange for the printing of the Miner's special edition. So the work, after all, is not to be done in Toronto.

R. C. Ferguson, manager of the Royal City Mills of Vancouver, is in Kootenay inspecting the company's branch office at Rossland. He reports the mill business as good, in fact so good that orders are turned away. Vancouver is growing very fast, and all lines of business are apparently in a healthy condition. Mr. Ferguson left Nelson for home yesterday.

John Cholditch & Co., the Nakusp firm of general merchants, who have removed from Nakusp to Nelson, yesterday received five carloads of general merchandise over the Canadian Pacific railway. R. J. Hamilton will be the local manager for the firm, and pending the erection of suitable warehouses the company will do business in the Turner, Beeton & Company warehouse on Water street.

The Western Canada Press Association, made up of editors of Manitoba and the Northwest Territories, will visit Nelson and other towns in Kootenay in June. Preparations should be made to give them a cordial reception, for it is no telling the amount of free advertising the town and country will get if only the boys are made to feel at home.

John Walbey and George Keefer have secured a lease on the Collin ranch from Onslow Newling and will run the place as a summer resort.

The members of the fire brigade tried their new rubber play-pipes for the first time last evening. As the play-pipes are very pliable, several of the nozzlemen received a drenching before they realized the advantage of an overhold on the pipe.

The framework of the sampling works, in course of erection by the Slocan Ore Purchasing Company, was raised yesterday. Twenty men are employed on the work and over fifty thousand feet of timber have been placed in position. The building will be rushed to completion with all possible speed. Two carloads of machinery are expected to arrive today and will be placed in position at once.

Farmer Bunker has planted 1100 pounds of seed potatoes on his ranch below Nelson, and he will also plant in autumn or two in mixed vegetables. He reports little growth, however, owing to the backwardness of the spring.

Gentlemen

If you want a natty, stylish suit of clothes for spring and summer, I have over 500 different patterns of Scotch and English tweeds, which I will make to your order at the low price of \$25. Black velvets make a nice suit for summer wear at \$20. Black serge suits in sack or morning coat, \$21. A heavy Scotch tweed, nice patterns for business suits, \$18. Trousers at equally low prices. Fit and finish no better in Canada. Ladies' fine tailoring a specialty. Clement block, Baker street.

Stevens, The Tailor

BOY WANTED.

A T Plain Hotel, a boy is wanted who will make himself generally useful.

CORPORATION OF THE CITY OF NELSON

BY-LAW NO. 42

A By-law respecting an Electric Street Railway in the City of Nelson.

Whereas, Thomas J. Duncan and Francis W. Peters, both of the City of Nelson (representatives of the British Electric Traction Company, Limited), hereinafter called the "applicants," have applied to the City of Nelson for the right of constructing, equipping, maintaining and operating street railway lines in the City of Nelson, and

Whereas, the applicants have applied for the authority, right and privilege to build, equip, maintain and operate, and from time to time remove and change, a double track or single track railway or tramway, with all necessary sidetracks, switches and turnouts, poles, wires, conduits, and all appliances for the running of cars, carriages and other vehicles on, over and along the streets or highways of the City of Nelson, and

Whereas, it has been deemed advisable to grant the request of the said applicants, subject to the terms and conditions and provisos hereinafter contained, and on the distinct agreement that the fulfillment of said terms, conditions and provisos in so far as the same are prior in point of time to construction and operation of such railway line or portion thereof shall be conditions precedent to the construction and operation thereof, and in so far as the terms and conditions hereinafter contained relate to the operation, conduct and management of said railway lines or system, or any part thereof, the same and the fulfillment of the same, shall in all cases be conditions precedent to the continued enjoyment of the rights and privileges of the applicants under this By-law.

Now, therefore, the Municipal Council of the Corporation of the City of Nelson enacts as follows:

1. Subject to the fulfillment by the applicants of the terms, conditions and provisos hereinafter contained, which terms, conditions and provisos and the due fulfillment thereof are to be taken as hereinafter stated as conditions precedent to the enjoyment of the rights and privileges hereby granted, the applicants are hereby given and granted the exclusive right and privilege to construct and maintain, complete and operate double and single track railways or tramways, and from time to time to change a double to a single track railway or tramway, and vice versa, with the necessary sidetracks, switches, turnouts, poles, wires, conduits, and all appliances for the running of cars, carriages and other vehicles adapted to the same on, over and along any of the streets or highways of the City of Nelson, and to run their cars, take, transport and carry passengers and freight on the same, by electric power or such other power as may be found practicable, but such power other than electric power shall before being used, be first approved of by the City Council.

2. The lines of said railway are to be built, equipped and operated subject to the following regulations, and the applicants are to conform thereto:

(a) The applicants before entering on any street to construct any line of railway shall make application to the city for permission so to do, naming the street or streets across or along which they desire to operate their works, and before in any way proceeding with the work shall receive the approval of the City Council.

(b) The construction of any line of railway on any street or highway shall not be commenced until a plan thereof showing the location on street, position and style of track, road bed, rails, poles, wires, and all other appliances shall have been submitted to and approved by the City Engineer.

(c) No approval either of the City Council or the City Engineer shall have any force or effect if the railway line for which the same has been given has not been fully constructed and in operation within twelve months from the time of such approval.

(d) The location on streets, the position, style and gauge of the tracks, road bed, rails, poles, wires, and all other appliances shall conform to and agree with the plans approved by the City Engineer, and the gauge shall be the standard gauge (4 feet 8 1/2 inches).

(e) No new line or extension of existing line shall be opened for traffic until the applicants have obtained a certificate in writing from the City Engineer that the same has been constructed to his satisfaction, subject to appeal from the decision of the City Engineer in the event of refusal to grant such certificate.

(f) The overhead or trolley system is to be adopted.

(g) All poles erected shall be so placed as to interfere as little as possible with all other uses of said streets, and both material and workmanship of said poles shall be of first class quality, and on all graded streets said poles shall be painted; the applicants shall have the use of all electric light poles owned by the city for street railway purposes, provided the same are properly braced and protected by the applicants, with the approval of the City Engineer.

(h) The coaches and cars to be used on the said line of railway shall be of the most modern style and construction, suitable for the safety and comfort of the passengers; shall when in operation be

always sufficiently lighted and heated, and shall have painted on conspicuous parts thereof in large plain letters, so that the same may be readily seen by day or night, the route or street on which the same are to be operated,

(i) Each car is to be in charge of a uniformed conductor, who shall clearly announce the names of cross streets as the cars reach them. Conductors shall only receive and discharge passengers on the right or curb side of the cars on double track routes. Cars are not to be overcrowded (a comfortable number of passengers for each class of cars is to be determined by the City Engineer and approved of by the City Council). Cars shall be stopped at every cross street clear of such cross street for taking up or letting off passengers; provided no car shall be required to stop at such cross street unless signalled by a person or persons desiring to board such car, or by a person or persons on such car desiring to be let off. Cars are to commence running daily on all routes not later than 6:30 a. m., and to run until 11 p. m., and each day at least 15 cars shall be run each way on each route, and when a census taken by the City shows that the City has a population of 12,000, then at such intervals between 6 a. m. and 11 p. m. as the City Engineer, with the approval of the City Council, may from time to time determine.

(j) The tracks of said railway line shall be laid on streets improved and graded, so that carriages and other vehicles may easily travel over and across at any or all points thereof with the least possible obstruction, and on streets not constructed according to any established grade the said tracks of said railway lines may be temporarily laid, but shall be so constructed as not to interfere with or obstruct the crossings of any streets intersected by said line, and on such streets between such intersections the said railway shall be laid so as to impede as little as possible traffic thereon, and according to plans approved of by the City Engineer; and as soon as such streets are graded, the said tracks shall be altered to conform to such grade, and the said tracks shall then be so laid that carriages and other vehicles may easily travel over, on or across them.

(k) Upon streets which are not yet improved and opened up by the City of Nelson the tracks of said railway lines may be temporarily laid according to plans approved of by the City Engineer, and may be thereafter altered by the applicants and the City of Nelson will assist the applicants by paying one-half the cost of clearing trees and stumps and ditching such portion of the streets as may be required to be so cleared and ditched, or, at the option of the City, such work may be done by the City and one-half of the cost thereof shall be defrayed by the applicants, and should the applicants require to do such work in connection with the opening up of such streets, the city will give the applicants the free use of earth and rock on the streets which they may need for ballast or otherwise, and which in the opinion of the City Council is not required by the city for street purposes; but such material is not to be taken so as to bring the streets below the grade as established for such street or streets.

(l) Ordinary carriages and other vehicles may travel on, over and across the said tracks, and it shall be lawful for all and every person and persons whomsoever to travel upon and use the said tracks with their carriages or other vehicles, loaded or empty, when and so often as they may please, provided they do not impede or interfere with the cars of the applicants running thereon, and subject at all times to the right of the applicants to keep upon the said tracks with their cars when meeting or overtaking any carriage or other vehicle thereon. The cars of the applicants shall be entitled to the right of way on said tracks, and any vehicle, horseman or foot passenger upon said tracks shall turn out on the approach of any car so as to leave the said tracks clear; due warning being given at the intersection of streets of the approach of said car by the ringing of a gong or bell.

(m) Said applicants shall at all times maintain the ties, stringers, rails, turnouts, curves, sidetracks, poles, wires and conduits in a state of thorough efficiency and to the satisfaction of the City Engineer, and shall remove, renew and replace the same as circumstances may require and as the City Engineer may direct.

(n) Said applicants shall at all times keep so much of the graded streets occupied by their said lines of railway as may lie between the rails of every track and between the lines of every double track and for the space of eighteen (18) inches on the outside of every track in good repair cleared of snow, ice and other obstructions, and shall cause the snow, ice and other obstructions to be removed as speedily as possible, the snow and ice to be spread over the balance of the street so as to afford a safe and unobstructed passage way for carriages and other vehicles. Should the City Engineer at any time consider that the snow or ice so obstructing the said portions of the said streets has not been properly or as speedily as possible removed from or about the tracks of the said railway lines or not properly or as speedily as possible spread over the said streets, he may cause the same to be removed or spread as aforesaid and charge the expense thereof to the

applicants, who shall at once pay the same to the city. If, however, the City Engineer is of the opinion that such snow or ice should be removed entirely from the streets so as to afford a safe passage for sleighs and other vehicles, the said applicants shall at once do so at their own expense and charge, or in case of their neglect the City Engineer may do so and charge the expense to them, and they shall pay the same.

(o) The Mayor, the Chief of Police or the Chief of the Fire Department of the said City may order a suspension of the running of the cars on the streets used by said lines of railway, or any of them, as he or they may deem necessary during any fire on such street or streets. In case of fire the Chief of the Fire Brigade, or all officers of the city authorized by the Mayor, may cut or pull down any wires, poles, structures or appliances used to operate the cars on said lines, or any of them, or incidental thereto, and neither the city nor such officers shall be liable for any loss or damage resulting from the cutting or pulling down thereof, but shall only be liable for the actual cost or expense of repairing or replacing the same. The members of the Police or Fire Departments of the City of Nelson, when in uniform, and the policemen and detectives exhibiting a badge, are to be carried free of charge on all of the street cars operated by the said applicants.

(p) The line of railway of the applicants, for the conveyance of passengers, shall be operated daily, and should the said railway cease to be operated at any time for a period of two (2) months in any one year, the applicants shall lose all rights and privileges hereby granted under this by-law. Such failure to operate the said railway lines during said period mentioned is not to cause a forfeiture of the franchise and privileges hereby granted, if the same should result from failure to obtain electric power, or from any other cause for which the applicants are not in any way liable.

3. Single cash fares are not to be more than ten (10) cents each, and fares on any cars operated after eleven p. m. are not to be more than double the ordinary maximum single fare. A class of tickets must be sold at not less than twelve (12) for one dollar. School children are to have the right to buy tickets at a rate not exceeding six (6) for twenty-five cents, to be used only on school days between the hours of eight a. m. and five p. m. A ticket shall be deemed a fare. A class of tickets must be sold to bona fide workmen at the rate of twenty (20) for one dollar; the same to be used only by workmen when travelling on the cars between the time the cars commence running in the morning and eight a. m., and between 6 p. m. and 7:30 p. m. Such tickets to be sold only at the offices of the Company within the City of Nelson to bona fide workmen. Who must state their names and occupation, and comply with other reasonable conditions. The classes of tickets above named, except workmen's tickets, shall be kept for sale on the cars of the applicants at all times. In case of failure to supply such tickets for purchase by passengers, then said passengers shall be carried free until such tickets are provided.

4. The applicants shall have the right to charge and collect from every person on entering any of their cars a fare, and any person refusing to pay such fare may be removed from the car. The rate of fare for each passenger traveling on any one of the said lines shall not exceed ten cents, including ordinary hand baggage, except on night cars as above provided; provided that no fare shall be required for a child under five years of age while travelling in the care of an older person, and provided that when the same passenger travels over two or more streets or lines in the City there shall be but one fare for the whole distance so travelled, and the applicants when desired by passengers shall issue transfer tickets at the point of connecting or crossing line to any passenger who has paid one fare on any line operated by the applicants in the City of Nelson, which transfer check shall entitle the passenger so receiving the same to a passage on any connecting or crossing line operated by said applicants in said City. A passenger shall be entitled to as many transfers for one fare as shall be necessary to allow one continuous trip or passage over the lines of the railway from any one point on the said lines within the City of Nelson to any other point on their said lines within the City, and such transfer checks shall be used only by the person receiving the same, and shall be used within ten minutes, or upon the next available car departing upon a connecting or crossing line upon which it is to be used.

5. The property of the applicants, consisting of real estate used in the operation of their railway and necessary for such purpose, road bed (which shall include also the rails, poles, ties and any part or share of the pavement which has been constructed by the applicants) shall be exempt for the space of ten (10) years from municipal taxation, and no municipal taxes or licenses shall be levied or collected from the applicants during said period upon said property, or for operating and carrying on said railway.

6. Whenever the City of Nelson decides to pave any street or highway traversed by any of such railway lines the applicants shall at the same time pave in a similar manner, or in such other manner as may be approved by the City Engineer (provided that such pavement shall not be of a more expensive kind than that

adopted by the City) those parts hereinafter referred to, and in case any streets in which the applicants shall lay a railway track shall have been paved previous to the laying of such track the applicants shall upon laying their track, repave the same and keep in repair the same as hereinafter provided. The parts referred to shall be:

In case of a single track: between the rails and eighteen inches on each side of them.

In case of a double track: between both sets of rails and eighteen inches on each side outside of both tracks and between each inside of both tracks commonly known as the "devil" strip.

The parts referred to as aforesaid shall be kept constantly in good repair by the said applicants, who shall also construct and keep in good repair crossings of similar nature to those adopted by the City within the limits aforesaid at the intersection of every railway track and cross street. In case the City Engineer considers that the paving or repairing of pavement of streets within the lines above mentioned has not been properly or sufficiently done, the City may direct that the work may be done and completed under the directions of the City Engineer, and in such cases all expenses and charges to which the City has been put shall be forthwith paid to the City by the applicants, it being the understanding that any question as to whether repairs are necessary or have been properly done by the City shall be subject to the decision of the City Engineer.

The City shall upon reasonable notice of their intention so to do, have the right to take up and replace the streets traversed by the railway line for the purposes of altering the grades thereof, constructing or repairing pavements, sewers, drains or conduits, or for laying down or repairing water or gas pipes, and for all other purposes within the powers of the Corporation, the same being replaced by and at the expense of the City without being liable for any compensation or damage that may be occasioned to the working of the railway or the works connected therewith, and such work shall not be unnecessarily delayed, but shall be carried on and completed with all reasonable speed, regard being had to the proper and efficient execution thereof.

The privilege granted under this section is also subject to any existing rights (statutory or otherwise) of any other corporation which now has or hereafter shall have power to open or take up streets of the City, such rights to be exercised with the permission and under the direction of the City Engineer.

7. The applicants shall commence the actual building and equipping of their lines of railway in the city within a period of four (4) months after the final passage of this by-law, and such construction shall be thereafter carried on continuously and diligently until the applicants shall have completed at least two miles of their line of railway in the City of Nelson, and should any question arise as to whether said railway is being constructed continuously and diligently the city engineer shall have the power to decide upon said question, and his decision shall be binding upon the applicants unless appealed from as hereinafter mentioned. All repair and construction shops, offices, car sheds or barns and general buildings (except power house) used by the applicants in the operation of their railway shall be within the limits of the City.

8. The applicants shall be liable for and shall indemnify the city for all damages arising out of the construction or operating of their railway.

9. The Council may, after the year 1900, by written notice served upon the applicants, or any one of them, or any one of their officers or agents resident in the City, or any person whom they shall by written notice to the City designate to represent them, to receive notices or process, demand the construction of any new line or lines within the City limits on any street or streets as hereinafter provided. Line or lines must be designated as to route and terminus, and must extend from line or lines already in operation. At the date of such notice there must be an average actual bona fide resident population of at least five hundred persons of above five years of age, for each half mile of proposed line, living within a distance of one quarter of a mile on each side thereof, and not within one-eighth of a mile of any parallel line already in operation, that is: an average of five hundred for each quarter square mile, measured as above. The applicants shall construct and operate such new line or lines within twelve months from such notice. A bona fide commencement must be made within such reasonable time as may be fixed by Council when giving notice.

10. The applicants shall within four months after the final passage of this by-law deposit with the City Treasurer two thousand (\$2,000) dollars to be retained by the City as security for the payment of any damage that may result to the City from the commencement of the building of such railway, and a failure to complete said two miles as hereinafter provided, and in case of such failure to complete the said two miles within the time hereinafter limited, the City shall repay to the applicants the said sum of two thousand dollars and interest at the rate of five per cent per annum, less any damages payable as aforesaid. Upon completion of such two miles of railway said sum of two thousand dollars shall be repaid to said applicants, or

their assigns, with interest in the meantime at the rate of five per cent per annum.

11. If the applicants comply with the provisions of this By-law and shall operate the said line or lines of railway in accordance with the same they shall be entitled to enjoy the rights and privileges granted under this By-law exclusively for the term of thirty-five (35) years, and at the expiration thereof the City of Nelson may on giving one year's notice of their intention so to do, assume the ownership of the said railway and personal property in connection therewith of every kind and description upon payment of the full value of the same, including the value of any pavement made or done by or at the expense of the applicants, to be determined by arbitration, and in consideration such value the franchise, rights and privileges granted under this By-law, and the revenue, profits and dividends derived, or likely to be derived, are not to be taken into consideration, but the arbitrators are to consider only the actual value of the actual and tangible property, plant, equipments and works connected with and necessary to the operation of the said railway, including such pavements, if any, and after the end of the said term of said thirty-five years the City shall have the right at the end of each succeeding five (5) years to take over, assume and purchase the said lines of railway and railway system, and all the plants, appliances and other property connected therewith upon the terms hereinafter mentioned, provided for as to arbitration, and the notice required in such case shall be one year, and until such assumption and purchase the rights and privileges are to be extended to the applicants beyond the said period of thirty-five years, on and subject to the terms and conditions herein contained.

12. After the expiration of fifteen years of the said thirty-five years the City of Nelson may for fifteen years thereafter at any time on giving one year's notice of their intention to do so, assume the ownership of the railway and all real and personal property in connection with the working thereof of every kind and description as a going concern upon payment of the full value of the same, including the value of the pavement made or done by or at the expense of the applicants, to be determined by arbitration, and shall upon the expiration of such year's notice pay to the applicants in addition to the actual value of the actual and tangible property, plants, equipments and works connected therewith and necessary to the operation of the railway a further sum of five years' prospective profits in connection with the business as a going concern, and such five years' prospective profits shall be arrived at by calculating the average profits of the railway three years previous from the date of such assumption and three years from and after the date of such assumption; and such prospective profits so to be paid shall be deemed to include all rights, benefits and advantages conferred under the franchise granted by this By-law.

13. The decision of the City Engineer with respect to the provisions of sub-sections "R," "G," "H," "T," "J," and "N" of section two (2) of this By-law shall be final and conclusive, subject only to appeal to the City Council, and should any dispute arise between the City and the applicants with reference to the carrying out of any other portion or portions of the provisions of this By-law, or should there be an appeal from the decision of the City Engineer with respect to the carrying out of any other portion or portions of the provisions of this By-law, then such dispute or appeal shall be settled by arbitration, and such arbitration shall be conducted by three arbitrators, one to be chosen by each of the parties hereto, and the third to be appointed by the two so chosen as aforesaid. In the event of either party hereto failing, neglecting or refusing to choose an arbitrator for fifteen days after being requested in writing by the other party to do so, then the party who makes such request shall appoint the arbitrator for and on behalf of the party so failing, neglecting or refusing as aforesaid, and in the further event of the said two arbitrators being unable or failing to agree upon the said third arbitrator for one week after their appointment, or the appointment of the one of them who was last appointed, then such third arbitrator shall be chosen and appointed by the Chief Justice for the time being of the Supreme Court of the Province of British Columbia, or in the event of the Chief Justice being sick, absent from the province or otherwise unable or refusing to act, then such third arbitrator shall be appointed by the senior judge of said court. The decision or award of any two of the said arbitrators shall be final, subject to arbitration to be in other respects governed by the provisions of the Arbitration Act, Chapter 9 of the British Columbia Statutes of 1897, or its amendments.

14. Any person or persons who shall in any way or manner willfully obstruct the free passage of cars on and along the track or tracks upon any of the applicants' lines of railway shall be liable upon conviction before the City Police Magistrate, the Mayor or any Justice or Justices of the Peace having jurisdiction, to a fine not exceeding twenty dollars and costs for each offence and in default of payment of said fine and costs to be imprisoned in any police station or lock-up house in the said City for a period not exceeding

twenty-one days, unless such penalty and costs shall have been sooner paid.

15. The City will not, during the currency of this franchise grant any permit or franchise to any person or persons, or corporation for the operation of a street car system in the City, or in any way authorize the construction of a street railway system by any other person or persons or corporation.

16. The City hereby consent to this By-law being ratified by the Legislature of the Province of British Columbia, and so long as the applicants comply with the terms of this By-law will not consent to, nor approve of, or confirm, or in any way assist any other party or company or corporation in obtaining from the Legislature any rights or privileges to enter upon or occupy any of the streets of the City of Nelson for the purpose of operating a street railway system. The cost of legislation to be paid by the applicants.

17. All provisions of this By-law shall apply to any extension of this railway beyond the limits of the City, or any line or lines acquired, owned, controlled or operated with or adjoining a city line or lines when such streets or routes come within the limits of the City of Nelson.

18. All rights and privileges under this by-law may be transferred to and become vested in a company to be formed and organized by the applicants and their associates, and such transfer and all benefits and obligations arising under this By-law shall be transferred to the said company, which shall thereupon become and be liable in the place of the applicants for the proper carrying out, and fulfillment of this By-law.

19. Nothing in this By-law shall be construed as giving the applicants any right to utilize or dispose of power for any other purpose than the operation of their railway or incidental thereto, or to permit any person or corporation supplying them with power to have any such rights.

20. A contract embodying the provisions hereof, and a covenant on the part of the applicants to conform to and fulfill all the matters and provisions hereby required of them, shall be drawn and shall be executed by the city and the applicants within four (4) months from the passing of this by-law.

21. In this By-law the expression "City" shall mean the City of Nelson, "City Council" the City Council of the City of Nelson, "City Engineer" the Engineer of the City of Nelson, and the word "applicants" shall include, refer to, and be in every way binding upon the applicants, their and each of their heirs, executors, administrators and assigns whose names are mentioned in connection with the words "applicants," wherever the same occurs in this By-law, and shall also wherever referred to be binding in every way upon a company to be formed and organized by the applicants and their associates.

Done and passed in council at the city of Nelson, this 14th day of May, A. D. 1899.

NOTICE

Take notice that the above is a true copy of the proposed By-law upon which the vote of the Municipality will be taken for the East Ward at the Fire Hall on Josephine street, for the West Ward at the office of the Exchequer Gold Mining Company, on north side of Baker street, between Stanley and Kootenay streets, on the East half of Lot 9, Block 11, on Monday, the 29th day of May instant, at 8 o'clock in the forenoon.

J. K. STRACHAN, City Clerk. Nelson, B. C., May 16, 1899.

CORPORATION OF THE CITY OF NELSON

BY-LAW NO. 44

A By-law to raise ten thousand dollars (\$10,000.00) for the erection of Public Buildings.

Whereas, a Petition has been presented to the Municipal Council of the Corporation of the City of Nelson, signed by the owners of at least one-tenth of the value of the real property in the said City, as shown by the last revised Assessment Roll, requesting the said Council to introduce a By-law to raise the sum of ten thousand dollars (\$10,000.00), for the purpose of erecting Public Buildings in the City of Nelson or for extending and improving the present buildings.

And, Whereas, it is deemed expedient to borrow the said sum of ten thousand dollars (\$10,000.00), for the purposes aforesaid.

And, Whereas, the whole amount of the rateable land of the said City, according to the last revised Assessment Roll, is eight hundred and six thousand, eight hundred and seventy dollars (\$806,870.00).

And, Whereas, it will be necessary to raise annually by rate the sum of eight hundred and sixty dollars (\$800.00) for paying the said debt and interest.

Now, Therefore, the Municipal Council of the Corporation of the City of Nelson enacts as follows:

1. It shall and may be lawful for the Mayor of the Corporation of the City of Nelson to borrow, upon the credit of the said Corporation, by way of the Deputies hereinafter mentioned, from any person or persons, body or bodies corporate, who may be willing to advance the same as a loan, a sum of money, not exceeding in the whole, the sum of ten thousand dollars (\$10,000.00), and to cause all such sums so raised or received to be paid into the hands of the treasurer of the said Corporation, for the purpose and
