ESTABLISHED 1892 — TUESDAY MORNING, OCTOBER 1, 1901 — DAILY EDITION

RESPECT NO LAW

NEW MINERS FIGHT UNDERGROUND IN JOSIE.

A HUNDRED MORE MISSOURIANS ARRIVE AT NORTHPORT.

ROSSLAND, September 30.—[Special to The Tribune.]—A disgraceful fight occurred in the 600-level of the Josie on Saturday night between the shift boss and some dozen or more of the new miners, ending in the boss being pretty roughly handled and having to skip to the surface. The class of miners heretofore at work at the mines here have always obeyed the unwritten law which prohibits fighting underground under all and any circumstances, but the Missourians, apparently, have no regard for mining laws, written or unwritten.

Some 75 of the Rossland miners have returned from outside camps in the past three days. None of them, however, have gone to work.

Mr. Frecheville has been at the Le Roi offices all day, but has made no statement at the present time of his intentions.

Another consignment of a hundred Missourians arrived at Northport yesterday, and some of the men have come here direct today. The union are getting very impatient over the delay of the Dominion government in enforcing the Alien Labor Act, but until William's report reaches Ottawa no move need be expected here.

The charge of embezzlement preferred by the postoffice department against W. H. Lewis of Trail, who is accused of taking a registered letter packet containing several hundred dollars from the Trail postoffice, was gone into before police magistrate Boultbee this afternoon. The court sat from 2 o'clock until nearly 6, when an adjournment was had until tomorrow. Postmaster Brown of Trail and Miss Jones, a clerk in the Trail postoffice, were the only witnesses examined today. The whole matter, turns on what has become of a lost package, which has mysteriously disappeared. Lewis's friends are confident that the investigation will clear him in the matter.

Three Carloads of Strike-Breakers.

NORTHPORT, Washington, September 30—[Special to The Tribune.]—Deputy United States marshal Oliver G. Lamb arrived here Saturday afternoon on a Great Northern special, bringing with him another shipment of 95 strike breakers from Joplin, Missouri. The train was run past the depot without stopping, and the new men were unloaded at the works of the Northport Smelting & Refining Company without an incident of note. The new men are undoubtedly intended for Rossland, but the company cannot take them through direct on account of the Alien Labor Law. The men are given work here for a time at wages less than are paid in Rossland, and as a consequence they soon quit and cross the line to seek work at Rossland. Probably 300 to 400 of the 950 men hired by the smelter within the past ten weeks have followed this course and are now in Rossland. Much interest is taken here in the attitude of the Canadian authorities on this question, and it is felt that they have not enforced the law very strictly.

Underwent a Hard Experience.

VANCOUVER, September 30.—[Special to The Tribune.]—Fred Larone, a French Canadian, arrived here today from the North by the steamer Comox, after undergoing a frightful experience. He was lost in the woods back of Wulfsohn bay for 46 days, and during that time lived on berries and bark. He killed a porcupine once and lived on its meat for four days. It took him a week after he first heard the whistling of a logging engine at the shore to crawl on his hands and knees to the railway track. He weighed 210 pounds when he was lost and now weighs only 140, losing 70 pounds. He was long ago given up as lost.

Receipts and Shipments.

NORTHPORT, Washington, September 30.—[Special to The Tribune.]—For the week ending Saturday, the following were the ore receipts at the smelter from the Le Roi mines at Rossland:

	Tons.	Cars.
September 23	9	249
September 24	10	238
September 26	10	230
September 27	8	225
September 28	10	231
Total	47	1173

The receipts from Nelson en route to Newark, New Jersey, and San Francisco were: 4 cars bullion to the former and 7 cars ore to the latter.

The Countess Laid the Corner-Stone.

REVELSTOKE, September 30.—[Special to The Tribune.]—The corner-stone of Queen Victoria hospital was laid yesterday by lady Minto before a large concourse, which then adjourned to welcome the duke and duchess at the station. Everything passed off well, the weather was perfect.

Schooner Foundered and Lives Lost.

ST. JOHNS, Newfoundland, September 30.—Three survivors of the crew of the schooner G. W. Roberts, who arrived yesterday, tell a sad tale of shipwreck. Their vessel was bound from Sydney to Cupid's Conception loaded with a cargo of coal. When eastward of the Island of St. Pierre she lost her rudder in a heavy breeze and became unmanageable. She managed to reach Hellgate, between the islands of St. Pierre and Miquelon. Three men went ashore for a tug to tow them to St. Pierre. The captain and two men remained in the ship. Two hours elapsed before a tug was secured, and when she reached the place where the vessel was left there was no trace of the vessel. The supposition is that the schooner foundered with the captain and the two men on board. The captain's name was Stanley Cooke, and the names of the men were William Adams and Thomas Ashward. Three hours after the survivors landed at St. Pierre a pilot boat picked up some wreckage which was identified as belonging to the G. W. Roberts.

SESSION OF CITY COUNCIL

By-Law Given Six Months' Hoist.

At the meeting of the city council last evening the local improvement by-law, which had for its object the introduction of the frontage tax system for the carrying on of improvements, was given a six months hoist, which effectually disposes of it as far as the present council is concerned. This by-law, which had been advanced several stages, has been shunted forward from month to month. It was down for reconsideration last evening and alderman Selous, who has stoutly opposed it from the start, moved that it be reconsidered at a special meeting to be held on the evening of Wednesday, November 20th. This was seconded by alderman Paterson.

Alderman Gillett resented this treatment of the by-law. He intimated that he saw in the repeated adjournments an attempt to kill the by-law. In reply alderman Selous acknowledged the corn. He reminded alderman Gillett that he had consistently opposed the measure, and added that he would take the greatest pleasure in withdrawing, with the consent of his seconder, the motion which he had made and substituting one which would kill the by-law effectually.

Mayor Fletcher expressed himself as of the opinion that the frontage tax question was one which would have to be taken up by the council at some time if the ratepayers did not wish to have their taxes doubled. If the motion was carried to give the by-law a six month's hoist it could be taken up next year by the succeeding council.

Alderman Selous then withdrew his former motion and moved the hoist. This was seconded by alderman Paterson, who remarked that it would give the incoming council a chance to wrestle with the question.

Mayor Fletcher remarked that it was evident that the members of the council were becoming tired of by-laws, but alderman Gillett would not accept the hoist so easily. He thought the council should at least have an expression of opinion on the question.

Alderman Selous rejoined that the members of the council had had the by-law before them for several months and if there had been any desire on the part of the members to press the by-law the desired expression of opinion could have been secured. Alderman Hamilton assented to this. Personally he said he had endeavored to understand the by-law as the result of a number of readings of it, but he had not succeeded. In fact he had not been able to grasp its provisions so readily as those of his cemetery by-law. Alderman Paterson said he was in the same fix. The motion giving the by-law the six month's hoist was then put and carried, all of the members voting in the affirmative, with the exception of alderman Gillett.

Tenders for the repairing of the city wharf were opened, but as they were not in such shape as enabled the city council to understand them, it was decided upon motion of alderman Selous to have the mayor work them out and accept whichever he considered the most advantageous. The tender of D. McArthur & Company was based on measurements. It was $17.50 per thousand feet of lumber required, including lumber, iron, and labor, with piles at the rate of 20 cents per foot. D. B. Murray had two tenders in covering the original and alternative plan. The first was for the lump sum of $1493, and the second for $1269. Harry Stutter had a tender in for $845, and John Toye had a tender in for $890.

In some discussion that followed the reading of the tenders it was decided that it would be better to have the new deck laid on the old planks with a view to securing stability, it being understood that the surface of the same should be dressed up and planks that were too much worn replaced.

The report of the finance committee recommending the payment of the current accounts as well as the city's half of the architect's second estimate upon the high school building, was read and adopted. In connection with the school estimate mayor Fletcher informed the council that the provincial government had expressed its willingness to pay the whole of the successive estimates of the architect up to the amount of $5000. In view of this the school trustees had suggested to him the advisability of the city council paying the whole of the second estimate, which would only be in the nature of an advance for five or six days until the money could be received from Victoria. This was agreed to by the members of the council.

John Boyd, the driver of the fire department team, had a request before the council for an increase of $10 per month in his present salary of $75. He added that he had received an offer of this amount, and requested the council to accept his resignation forthwith "if the members could not see their way clear to meeting the advance. The council decided to accept the resignation, and applications will be called for a new driver for the fire team at $75 per month, to be in for the next meeting of the council.

Norman T. McLeod had a request before the council for assistance for the Nelson Rifle Association in connection with the annual meeting of the association at the ranges this month. Alderman Selous opposed the request on the ground that the city had better pay its debts before putting up for prizes of any kind. This was seconded by alderman Madden and carried.

Mayor Fletcher stated that owing to the burning out of one of the armatures in one of the dynamos last week he had been obliged to make a temporary arrangement with the West Kootenay Power & Light Company for a supply of power. The dynamo had to be sent to Spokane to be rewound and unless something was done the residential portion of the city would be without light for ten days or two weeks. The management of the power company had met the city in a very friendly spirit and he had no doubt but that arrangements could be arrived at with the company now for supplying such surplus power during the winter months as might be required, upon terms which would be advantageous to the city.

James McPhee, city electrician, reported that at the time of the accident to the armature all of the machines in the power house were overloaded. Each of the direct current machines were carrying 100 lights above their nominal capacity. All told the present load upon the machines was 700 lights above their nominal capacity, and in addition to this there were applications in for 250 additional lights. This, he said, would bring the present demand upon the city plant to 900 lights above the nominal capacity of the machines. From the remarks of the mayor in connection with the arrangements made for the present temporary service it is likely that an offer will be forthcoming from the power company to supply the city with such surplus power as it may require, which will be considered in connection with any offer which the gas company may make for furnishing power.

CHALLENGER AND DEFENDER

Both Ready for Today's Race.

NEW YORK, September 30.—Everyone is whistling for a favorable wind, when Columbia and Shamrock II. meet tomorrow in the second race for the America's Cup. Interest is tuned to the highest pitch, as the result of the grand contest Saturday. Confidence is supreme on board the Erin and Shamrock, as it is with all yachtmen. There is to be a triangular 10-mile to a leg, a beat to windward and the two reaches, or a run and a reach; this however, depending upon the wind. The start may be expected about 11:30 o'clock. A rattling wind without too much sea were the conditions on the course today while the two yachts lay at anchor in Sandy Hook. It was such a day as made the sailors on both the challenger and defender furious. Sir Thomas Lipton called it Shamrock weather, and said that with such a clinking breeze tomorrow he would surely give the cup a lift. On board Columbia there was no boasting but a comfortable degree of confidence and a certainty that if the defender wins tomorrow, there will be nothing in it but three straights.

The crews of the yachts were kept busy, as the racers laid at their moorings in Sandy Hook, most of the day overhauling the standing and running gear and sails. They were getting the big racing crafts in the best possible trim for what all believe will be the greatest of sailing—the 30-mile contest over a triangular course. It is said Shamrock is to have a new mainsail and jib for tomorrow's race, but no move was made during the day to change these sails. Some jibs were hoisted and stretched and some wire rigging was spliced and served. Captain Sycamore and sailmaker Rattray were in conference during the day, and it was agreed that a grand strong breeze from the northwest or southeast, with smooth water, is what the Shamrock wants for the triangular track.

Mr. Jameson and designer Watson came to the city early and remained all day. Sir Thomas Lipton, when asked what weather he would like said: "Give us a good scupper breeze from the northwest, and I'm sure Shamrock will win. She is very fast on the reach, and in smooth water or a sea she will go well."

Fatal Result of a Quarrel.

HOBART, Indiana, September 30.—F. W. Hartman, an aged farmer living near here, fatally wounded his wife, aged 59, by striking her several times on the head yesterday with a piece of iron. Leaving her for dead, he went into his bedroom and committed suicide by shooting himself. Mrs. Hartman's skull is fractured. The couple had been married 45 years and had raised a family of five children. Of late they have quarrelled over money matters.

Weavers Go on Strike.

ST. HYACINTHE, Quebec, September 30.—The weavers in the Canadian Woollen Mills Company have gone out on strike. The company wished to reduce wages by a graduated scale from 5 to 25 per cent according to the pay received, the larger reduction only being made on salaries over $18 a week. The men refused to go back until the old rates are restored.

VANCOUVERITES

HOBNOBBED YESTERDAY WITH ROYALTY.

THE DUKE AND DUCHESS OF YORK WERE GIVEN A CORDIAL WELCOME.

VANCOUVER, September 30.—[Special to The Tribune.]—The royal party arrived at Vancouver at 11:45 today, completing their railway journey across the continent exactly on time. The train with her excellency the countess of Minto, sir Wilfrid Laurier, the pressmen, and the eastern Canadian politicians aboard arrived half an hour earlier, and had only just pulled out of the platform when the whistle of the royal train was heard. Each train consisted of ten cars, and the entire arrangements of the Western Division were carried out by superintendent Marpole. The weather was perfect, and crowds thronged the streets on the route of the procession everywhere. Order was perfect, however, and regulations were carried out to a nicety. As the royal train pulled in, a royal salute of 21 guns was fired by the Warspite and other ships in the harbor. The vessels were superbly decorated, and the harbor scene joined with the one on shore made the finest display ever seen in Vancouver. About thirty citizens were on the platform and were in turn presented to the royal visitors. They were sir Hibbert and lady Tupper, colonel and Mrs. Warren, George McL. Brown, J. F. Garden, M. P. P., and others. After the admiral and the officers of the navy had been presented, the duke walked along in front of a guard of honor of blue jackets, and then opposite the mounted police, numbering 65, in charge of major Perry and eight officers. The duke then walked back to the royal carriage, and the procession immediately started up town at a brisk trot. Sir Wilfred and the countess of Minto being in the leading carriage. As they came up the station hill, the crowd began cheering and shouting, which lasted all the way down to the Court House, where the civic address was presented by mayor Townley. The crowd was thickest at this point and the crush was intense. One of the particular decorations at the Court House was the Jananese arch, easily the finest sight in the city. The duke's reply was brief and formal, and most of the time was taken up in shaking hands of the royal guests. The procession then went down Hastings street towards the east end, returning through Cordova street, then to the drill hall, where the duke opened the hall and presented medals to South African heroes. Lunch was served at 1 o'clock in the different apartments of the drill shed. In the afternoon the party went for a drive to the Hastings sawmill, and later to Stanley park.

Coming down from Kamloops, guards were in sight one after another all along the line and stood at attention with lanterns and flags as the train passed. This was particularly remarked by the duchess.

Victoria All in Readiness.

VICTORIA, September 30.—Victoria is ready to receive their royal highnesses the duke and duchess of Cornwall and York. The city has been gaily decorated and thousands of electric lights and Chinese lanterns have been strung for the illumination at night. The lights were turned on tonight to try them and the city was in reality ablaze with lights. The parliament and other buildings are covered with lights, and with the searchlights of the ships of war playing on the city it will indeed make a brilliant appearance. The royal party is scheduled to land at the outer wharf at 10 a. m., and when the lieutenant-governor and cabinet ministers have been presented, the royal procession will proceed to the parliament buildings, where the civic authorities will be presented and the medals will be presented to the men who fought in South Africa. Thence the party will proceed through the city to Esquimalt to lunch with the admiral. In the afternoon the duke will open the provincial exhibition, and after the official dinner at Government House there will be a reception at the government buildings. Wednesday the party will be left to their own devices.

NOTICE TO SUBSCRIBERS BY CARRIER.

On Saturday next, subscribers whose Tribunes are delivered by carrier will be expected to pay the carrier TWENTY CENTS, the subscription price for the current week.

The Story Discredited.

CANTON, Ohio, September 30.—The friends of the family of the late president McKinley emphatically discredit belief in the idea that the shot reported fired by guard Duprend at West Lawn cemetery last night was on account of any attempt to desecrate the tomb. They do not attempt to explain the strange story of the guards, but they do not believe that two men would make an attack upon the vault with soldiers on guard or near at hand. It is believed that the military authorities will make a thorough investigation. There are unconfirmed rumors that the shot was fired on account of an accidental fall, and also that it was the result of personal differences. The officers in charge early instructed soldiers not to talk of the affair. The statements of the guard on Sunday night were made in the presence of the officers and with their knowledge.

CANTON, Ohio, September 30.—Captain Riddle, commanding the guard at West Lawn cemetery, said today after a careful investigation: "I think the sentinel deceived himself in the occurrence. I don't think it probable that an attack such as he stated, actually occurred. When daylight came we could find no evidence of a struggle."

Fighting Desperately.

DURBAN, Natal, September 30.—A force of 115 Boers commanded by general Botha made an attack which lasted all day long, on September 26th, on Portitala, on the border of Zululand. The burghers were repulsed, but at a very heavy cost to the garrison, whose losses were 1 officer and 11 men killed, and 5 officers and 38 men wounded. In addition, 63 men are missing, of which number many are believed to have been killed or wounded. The Boer commandant, Opperman, and 19 burghers are known to have been killed.

Confederate Soldiers' Home Destroyed.

ATLANTA, Georgia, September 30.—The Confederate Soldier's Home was destroyed by fire today. There were no lives lost, but several narrow escapes. About 70 veterans were inmates of the building. Loss $25,000, covered by insurance. The home was opened for the ex-Confederate veterans of the state of Georgia on June 30th, and was built by popular subscription.

Horse Trainer Will Quit England.

LONDON, September 30.—It is announced here that in spite of William C. Whitney's offer to allow Higgins, his trainer, the Heath house estate rent free, and although there was a disposition on the part of the several owners to entrust horses to his care, Higgins has determined to return to America.

SUMMIT CREEK PROSPECTS

Have Good Things.

A. L. Davenport returned yesterday from a trip to the Columbus, Bayonne, and Oxford claims at the head of Summit creek, which he has under bond. These are the claims which Marc Gilliam recently took an option on as the agent for Mr. Davenport, and the latter was highly pleased when he looked the properties over. Mr. Davenport says the ledge on the claims is fully 20 feet wide and yields remarkably high assays. Nothing in the way of a sample test of the ledge has been made but the assays received from it are all uniformly high. Mr. Davenport says he has the best looking prospect he has seen for some time in the Summit creek property and no time will be lost in opening it up. There are a number of men at work repairing and building new trails and cabins are now in the course of erection so that work can be carried on all winter. In speaking of the Keystone group, near Erie, in which he and Robert Ewart are interested, Mr. Davenport said that work was going ahead nicely. Owing to a slip in the lead nearly all of the work that had been done on the property had been wasted. The Keystone was opened up first with an incline shaft run down on the vein for 30 feet. To catch the vein at depth a tunnel was run in for 200 feet at which point it was expected the vein would be encountered. The vein was not in evidence, however, and a drift was run in each direction for 100 feet to strike it but without result. An upraise was then made to the surface but no ore was encountered until the bottom of the incline was reached. This meant that over 600 feet of work had been performed without getting a pound of ore, and there was every prospect that the bond which Messrs. Davenport and Ewart had given Finch & Campbell on the group would be thrown up. Some exploratory work was then done in the bottom of the incline shaft, when it was discovered that the vein had slipped for a distance of 45 feet, after which it straightened up again. This decided the holders of the bond to continue the crosscut for another 150 feet when the vein was caught. An upraise was then started and continued to the surface. The result was a fine showing of ore running from three inches to two feet, samples from which give an indicated value of from $150 to $600 in gold. From the level of the present tunnel the owners have a back of about 150 feet to work, which should give them very handsome returns.

Slocan Making Strides Upward.

John L. Retallack returned to Kaslo yesterday. He expresses himself as well satisfied with the way in which the Washington mine is turning out under his system of development. The property remained idle since 1898 until Mr. Retallack secured a lease and bond upon it this summer. He is now working a development crew of 12 men on it. During the course of the past month he has taken out three cars of high grade ore which is now on the way to the Nelson smelter. This ore carries 100 ounces silver and in the neighborhood of 60 per cent lead. Just for the winter will be depends very largely upon how the property continues to open up and the condition of the metal market. Mr. Retallack says the outlook in the Slocan is much brighter than it has been for some time. The most important matter in connection with mining during the past few days has been the strike at the Surprise mine. On this property a new ledge has been discovered, and so far proven for a depth of 50 feet. It consists of an ore body from 18 inches to 2 feet in width, which assays up close to 300 ounces silver to the ton. People who have been at the property say it is one of the prettiest showings in a district noted for good showings. The vein has been traced for a considerable distance on the surface and it is said that the Noble Five ground catches a good deal of it. Work at the Noble Five is going ahead well and confidence in this well-known property is rapidly being restored.

ARE BUILDING RAILWAYS

In South Africa.

Captain Charles J. Armstrong, who left Montreal as senior lieutenant in the Montreal company of the Royal Canadian regiment, and who accepted a position under sir Percy Girouard following the fall of Pretoria, is now home on leave of absence. He is district engineer of the railway construction department, and speaks in the highest terms of his chief, saying that the appointment of sir Percy was a fortunate one for the Empire.

Regarding the work that has already been done captain Armstrong said that when the closing down of the Rand mines had thrown thousands of blacks out of employment, and as the British authorities did not care to have them roaming about the country, sir Percy Girouard suggested that a new stretch of railway be built from Johannesburg to the Vaal river, and this proposition being accepted, work was started, captain Armstrong being engaged on the road in question. The line will be about forty miles in length, but, although thirty miles have been graded, the rails are not yet laid. This is on account of getting the steel on the ground, the rushing of supplies into the country being of more importance at the present time. Captain Armstrong has a good idea of the character of the work done on the railways in the several colonies of South Africa, and says that many of them are better built than some of the Canadian lines. He also brings the news that practically all of the bridges, culverts and tunnels which were destroyed during the war have been placed in as good condition as before, and that the train service all over the country, taking the unsettled condition of the colonies into consideration, may be considered good. He visited Natal a short time before leaving, and the railways in that colony were found to be in excellent condition.

"Of course," he said, "the heavy grades lessened the rate of speed to some extent but the time of the fast train between Bloomfontein and Pretoria is about forty miles an hour."

Captain Armstrong is of the opinion that when peace becomes an actual fact railway development will proceed apace. A most important line has, indeed, already been undertaken. Formerly there was no direct land route between Cape Colony and Natal, but now a railway is projected and even commenced, that will be about 400 miles in length, and bring these two colonies into direct communication. The terminus of the Natal end of the railway will, probably be Pietermaritzburg.

Captain Armstrong says that it is generally estimated that besides what the ex-president had "salted" away before, he carried to Europe no less than £2,500,000.

The Phillipine Disaster.

MANILA, September 30.—General Hughes, from the Island of Samar, reports the arrival of sergeant Markley and one private at Tannan from the fight at Balangoga, where over 40 men of company C, Ninth infantry, were killed by insurgents, who attacked the troops while at breakfast on Saturday last. The men who have reached Tannan say that the officers of the company, who were at first reported to have escaped, were killed with the majority of the company. The troops were attacked while unprepared by 400 bolomen, of whom the Americans killed about 140. Many of the soldiers were killed in their quarters before they had time to grasp a rifle. General Hughes is going to the scene of the disaster and will personally command the troops.

Comment Epitomized.

LONDON, September 30.—"Both antagonists are to be congratulated on proving themselves so worthy of each other," is the message of lord Dufferin, the former governor-general of Canada, sent to America through the Associated Press. This epitomises the general comment of the afternoon papers here on the first cup race. They agree that both yachts were handled with consummate skill, and that nothing remains but to congratulate the club and whistle for a stiff breeze, in which some people think that Shamrock will have a good chance of winning.

Weather Forecast for Today's Race.

WASHINGTON, September 30.—At 10:30 a. m. off Sandy Hook on Tuesday morning the weather will be fair with light to fresh northerly winds in the morning, which will be diminished in force and will become variable in the

A MINE ON FIRE

ADDS TO PREMIER DUNSMUIR'S WORRIES.

REPORTS ARE CONFLICTING, BUT INDICATE LOSS OF LIFE AND PROPERTY.

VICTORIA, September 30.—Premier Dunsmuir, president of the Wellington Colliery Company, received the following despatch from Alexander Bryden, manager of the Extension mines of that company situated near Ladysmith. "Fire occurred in No. 2 slope at No. 3 level which made such headway that in half an hour it was half way up the slope and spread to the air-ways and workings of both Nos. 2 and 3 mines. I was obliged to stop both mines after two explosions had occurred. Have lost some men; cannot say how many." Mr. Dunsmuir left by special train with a staff of engineers.

VICTORIA, September 30.—The reports from the Extension mines as to the fire there are very conflicting. Those on the scene apparently knowing little of what has occurred. A dispatch received late tonight says the fire is still raging in No. 2 slope, the fire being near where No. 2, No. 3 and the tunnel converge. It is said now that the fire started from a miner's lamp coming in contact with a blanket. The following additional names are included among the lost: A. Pistello, Charles Noye, Ed Hazel and J. Patterson. It is said by men who know the mine that if the fire cannot be controlled immediately the mine, the largest on Vancouver Island, will be a total loss. There is a scarcity of water at Extension, and even if the water could be poured in it would not do any good, as there is a natural incline and the water would run out, and the mine could not be flooded. The mine was first opened in 1898, but it was not until last year that it was developed to any extent. The most improved machinery was installed and the Wellington Colliery Company abandoned their mines at Wellington and shipped entirely from Comox and Extension.

Experts from the east who have visited the mine say it was the best equipped on the continent, having electric locomotives and being lighted by electricity and having natural drainage which is a very cheap mine to work. If the mine is destroyed, as feared, it will mean the ruination of the town of Ladysmith, until at least the company can open up the seams which were recently discovered between Extension and Ladysmith.

There is one report that all who were in the mines at the time the fire broke out escaped, and those who were lost were members of relief parties who went down and were caught by the explosions. There were a number of narrow escapes. One miner running from the mine fell exhausted, and falling against the door leading to another working, broke it open and thus escaped. Very grave fears are entertained for the safety of the men, in fact it is taken for granted by the manager's telegram that they are lost, and as to the mine, if not entirely destroyed, it will be badly damaged.

There is a mountain of coal at Extension, and the workings in which the fire occurred are near the top. The only way to flood the mine would be to stop all tunnels and stopes, and even then there would not be enough water to fill it.

Additional names received: MacCallum, Reeves, Watson, Tony, an Italian name unknown, David Griffiths Blakely, David Mottison, and Mike Dokno.

Has a Golden Opinion of Alaska.

SAN FRANCISCO, September 30.—Lieutenant J. C. Cantwell, who for three years has been in the revenue cutter service in Alaskan waters, has returned to this city and is preparing his official reports to the treasury department. He was warm in his praises of that undeveloped country, and predicted a new future for it. He made tests of coal found along the Yukon river. It was found to be unsuitable to burn on steamers unless the latter are fitted with special funnels. There is a large amount of carbon in the coal. In the Koyukuk and Tanana districts there are large tracts of rich land, which are undeveloped owing to the enormous expense of getting in supplies. From what little prospecting has been done in the districts, it has proved that the land not only contains large quantities of gold, but other minerals. The prospects in Nome are favorable, and lieutenant Cantwell says the newly built city will doubtless be a permanent one. A pilot chart of Yukon has been perfected by Cantwell and will be issued shortly.

Celebrating an Anniversary.

MADRID, September 30.—The anniversary of the revolution of 1868 was celebrated at Madrid and other towns in Spain yesterday. At a meeting of 20,000 Republicans and Socialists at Barcelonia the crowds proceeded to lay a wreath upon the monument of general Prim, the once famous insurgent leader in Spain. The mob collided with the police, who fired in response to a volley of stones. Three of the persons participating in the demonstration

NOTICE TO SUBSCRIBERS BY CARRIER.

On Saturday next, subscribers whose Tribunes are delivered by carrier will be expected to pay the carrier TWENTY CENTS, the subscription price for the current week.

The Tribune is the only daily paper in British Columbia that gets its advertised rates for advertising from eastern advertising agents. This is because it has a bona fide circulation in Kootenay and Yale exceeding that of any other daily paper, and because it does not accept advertisements that are classed "objectionable." Those who advertise in

WALL PAPER

This is usually the dull season for Wall Paper. But to keep it moving we have made up bundles of all lots that have run down in quantity. We place these on sale at prices that will certainly move them; original cost has been quite lost sight of in making the price. In many of these remnants the quantity is sufficient for even a large room. The high standard of our papers is now well known and not often does an opportunity offer to buy such papers at from 5 to 12½ cents per roll. If not ready to paper just now anticipate your fall wants.

THOMSON STATIONERY CO. Ltd

NELSON, B. C.

The Tribune know it circulates among people who can afford to purchase the best goods made, and pay cash for their purchases.

For four months Bernard McDonald has waged war on the smeltermen's union at Northport, and on the miners' union at Rossland for a shorter time. Before he began the war, he had approximately 1100 men on the payrolls at the mines and the smelter, every man of whom quit when the order to strike was issued. After scouring California, Colorado, and Missouri, he has succeeded in gathering 650 men to begin work at the smelter, fully half of whom have been sifted through to Rossland to work in the mines. These men are drawing the same wages as were paid the union men, but are they producing as much per man as did the union men? Before the strike at the smelter, the tonnage smelted averaged from 700 to 800 tons a day, all of which was received from the mines at Rossland. The average smelted now is less than 200 tons a day, much of which is drawn from the supply of ore at the smelter before the strike commenced. Before the strike, 1100 union men mined and smelted 5000 tons of ore a week. Since the strike, with 650 strike-breakers at work in the mines and smelter, the weekly record is less than 1500 tons. Does it pay to smash unions?

The "Liquor License Act, 1900," should be so amended as to make it impossible for speculation in licenses. As the act now stands, licenses are granted to individuals who neither have hotels nor money with which to build hotels, but once the license is granted, the license is something on which money can be realized. Recently a license was granted in the Fort Steele license district to an individual who had neither a house nor money to build one. The license was hawked around, and finally, it is said, was disposed of for $1000. The attention of the attorney-general is called to this practice, so that the act can be amended to prevent such deals in the future.

The record of ore receipts at the Northport smelter tells how the management of the Le Roi mine at Rossland is succeeding with imported strike-breakers from Joplin, Missouri. The total shipments last week aggregated 1173 tons, or very little more than was shipped daily before Bernard McDonald began his campaign of union smashing. Someone is paying for this mismanagement, but disgruntled mine managers will refer to it as another evidence of our bad mining laws.

The Boundary newspapers are all crying for a redistribution measure, as they do not want to be tacked on to Rossland any longer. Is this an intimation that they are becoming wearied of the services of Smith Curtis, the discoverer of the jumping-off pass through Hope Mountains?

An Empty Concession.

British Columbia need not go into ecstacies over sir Wilfrid Laurier's hint that the west is to be honored with a representative in the cabinet. Sir Wilfrid Laurier may make good his promise to recognize the importance of British Columbia in the way of cabinet representation, but compliance with this pledge would be giving something in shadow and nothing in substance. As a province British Columbia has suffered more humiliation and disregard of interest at the hands of the Laurier government than any other part of Canada. Violation of the British Columbia interests has been flagrant and persistent, and yet there is not a Liberal representative of British Columbia in parliament today who has had the courage to publicly resent these infringements on the rights and interests of his province. Giving representation to British Columbia would mean conferring cabinet rank on Aulay Morrison, Liberal M. P. for New Westminster, or Ralph Smith, M. P., the alleged Labor representative for Nanaimo. Government disregard for British Columbia interests has been flaunted in the face of Aulay Morrison, M. P., and Ralph Smith, M. P. Neither of these representatives had the courage to speak out for the outraged interests of his province and what has British Columbia to expect from promotion of either of them to cabinet rank?—Toronto Telegram.

FALL MILLINERY OPENING

THURSDAY, FRIDAY AND SATURDAY

We will hold our regular Fall Millinery Opening on Thursday, Friday and Saturday of this week, when we will show the finest collection of French and American model hats, toques, turbans and bonnets ever put on display in this city, having been selected by our Miss Darveau while attending the openings in New York, Montreal, Toronto and Chicago.

Some of our models are from Madame Louise Sullivan Drew, of New York, and Paul Virot and "Pouganne," of Paris.

We specially invite all the ladies of Nelson and other towns to call and inspect this magnificient collection.

FRED IRVINE & CO.

36 Baker Street, Nelson.

THE SOLE OF COMFORT

YOUR foot sole is curved and soft.

Your shoe sole is flat and hard.

Walking with such a foot sole on such a shoe sole, is like sleeping on a plank, instead of on a mattress.

Cut open an old shoe at its most comfortable stage, and you will find its insole shaped by wear, to ball and heel, great toe, and outer edge.

You will also find it burnt up and eaten, through accumulated sweat, which must have gnawed the foo., when it so ate the leather.

The Resilia Sole, is placed between insole and outsole, instead of the usual scrap leather filling.

It is an elastic spring centresole, which collapses and shapes up round foot-curves like an old shoe, the first moment it is borne upon.

The foot sinking into the sole, at the very time the ball of the foot spreads, makes the shoe a size larger inside, when the foot needs most room.

The foot lifting, permits the insole and outsole to expand apart, and in so doing they pump in fresh air through a hidden valve in the heel.

This fresh air circulating through insole perforations, around the stocking, keeps the foot dry, clean, hardy, and healthy.

The Resilia Ventilating Sole can be had only in the $5.50 grade of that Good-year Welted leader.

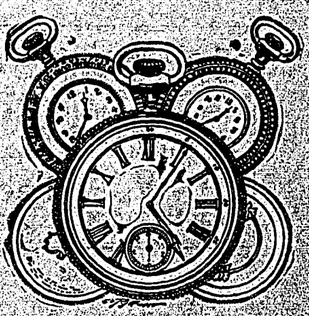
Hurry up!

We are Waiting for You, and will Give You "White Treatment."



You never hear of our customers kicking. Not much! They all get "White Treatment"—big and little alike—that's why. The man we have never seen, who sends his orders by mail, is served with the same satisfaction as the man who buys over the counter. The "Best in the House" goes out on "memo" if the customer orders "The Best in the House." We're not afraid of losing outright sales between the going out and coming back of the goods. You don't have to send a dozen times before the right thing is delivered. Our stock of Watches and Diamonds is so large that goods out on "memo" don't handicap us once in a dog's age. Ought to be pretty good people to deal with, don't you think?

Elgin and Waltham Watches, all manner of Cases, and Diamonds. A big and wisely chosen assortment.

Our Watch and Jewelry Department have no equal in B. C. All work guaranteed. Mail orders receive our prompt and careful attention.

Jacob Dover, The Jeweler, Nelson, B.C.

SESSION OF COUNTY COURT

The Docket.

The accommodation of the court house was taxed to its utmost capacity yesterday upon the opening of the county court before judge Forin, and although the greater part of the day was taken up with the hearing of the case of Nipou vs. the Jenckes Machine Company, the list before the court was more than cut in two by reason of the settlements announced, and the agreements arrived at with respect to adjournments.

The reading of the applications for naturalization was the first business of the session. The applicants are Richard Pape, Carmini Gisi, Michael Henry Glazier, Nels Nelson, Charles Ernest Snyder, Ralph Gillette, and John Holm. Their certificates, making the applicants British subjects, will be issued on the last day of the court's session.

After the settled, adjourned and non-contested cases had been disposed of from the list, the case of Nipou vs. the Jenckes Machine Company was taken up. This was an action for damages brought by the Nelson Laundryman against the defendant company for damages resulting, as he claims, through the action of the defendant company, supplying him with a second-hand engine instead of a new engine, which was to be made to order for him. It was a jury case, the following jurors being selected: John Rae (foreman), W. E. McCandlish, George W. Steel, A. G. Fox and J. H. Love. The case for the plaintiff occupied the whole of yesterday's session, a mass of evidence being put in. From it the engine in question evidently received a great deal of attention from local engineers of all kinds. One of them, S. Duval, gave his testimony in French, and J. Paquette, local manager for the Spokane Falls & Northern Telegraph Company, was requisitioned to put it into English. "Joe" knows more about French than he does about mechanics, and as the evidence under cross-examination became very technical, the interpreter was very tired.

An evening session of the court was held for the purpose of hearing the case for the defence, which was conducted by A. H. MacNeill, of Rossland. It required about two hours to complete the hearing of the evidence. The jury brought in a verdict for the defendant company.

Of the other cases disposed of for the present the most important was that of Smith et al vs. Stewart Brothers and the Noonday-Curley Mining Company, an action brought by the plaintiff and a number of other miners to enforce a mechanic's lien against the Noonday-Curley group of claims for wages amounting to $1540. This case promises complications by reason of the fact that the property upon which the work was performed is not the property of the company which contracted for the labor. The case has been adjourned till a day to be fixed. Macaonald & Johnson appeared for the plaintiffs, and Elliot & Lennie for the defendant Stewart Brothers.

With respect to the several cases against the Chapleau Mining Company, the announcement was made that in all of them judgments would be signed by consent for the balances remaining unpaid. Since these actions were started the defendant company has made substantial payments on account, and the prospects are said to be good for the payments of 100 cents upon the dollar of the claims.

The cases announced as settled were: Hazelwood Dairy vs. Minielly, Campbell vs. Fairweather Lumber Company, Martyn vs. Roche, Morrison vs. Lawr, Chang vs. Luthwaite, Benny vs. Anderson, Vincent vs. Grier, Lawrence vs. Fairweather, McLean vs. Morrison, Vaviaux vs. Crease, and Shaw vs. McGraw.

The cases adjourned were: Irvine vs. Allen, Bank of Montreal vs. Conan, Turner, Beeton & Company vs. Flynn & Coulter, Lin Hun vs. Uyclería, Peterson vs Kee, and Whitehead vs. McNaill.

Judgment by default or consent was given in the following cases: McArthur vs. Doyle, Nelson Saw & Planing Mills vs. McLeod, Hickmett vs. Dawber, and Twiss vs. Limburn.

In Tattersall vs. Hauck, the defendant Paul Hauck was examined as a judgment debtor. He was garnisheed in the case of Tattersall vs. McMillan, but ignored the order of garnishment and paid over the money owing by him to McMillan to other persons. Judgment against him for $390.20 was secured, and yesterday judge Forin made an order requiring him to pay $15 per month upon the judgment, the time for the first payment being fixed for December 1st. In the course of his examination it was brought out that Hauck had disposed of his mining property, and that he had no means out of which to pay the amount of the judgment save his labor.

Of the other cases disposed of, in Taylor vs. Hey, leave was given to prove the claim in chambers, and in Dunn vs. Clarke leave was given to prove claim by affidavit.

Following the case of Nipou vs. the Jenckes Machine Company, the jury case of Hall vs. LaBau will be taken up. The jurors in this case will be drawn from the following panel: F. M. Chadburne, John Blaney, George S. Kellaway, H. H. Avery, Duncan McFarland, Levi Pogue, F. J. Squire, George W. Hale William Waldie and Eli Sutcliffe. This is an action for damages brought by the plaintiff against Dr. LaBau for the fumigation of the plaintiff's office. The action is being defended by the city, as it arose in connection with Dr. LaBau's duties as health officer.

The other cases remaining on the list for this session of the court are Arnot vs. McMillan, Zattoni vs. Western Canada Insurance Company, Allenberg vs. Ritchie, Allenberg vs. Benson, Robitaille vs. Mason and Young, Coombs vs. Callaghan, Bartlett vs. Palmer, and Malone vs. Ferguson.

NOTICE TO SUBSCRIBERS BY CARRIER.

On Saturday next, subscribers whose Tribunes are delivered by carrier, will be expected to pay the carrier TWENTY CENTS, the subscription price for the current week.

DEVIL-THROWN MISSILES

Are Family Jars.

Family jars are missiles thrown by the devil to destroy homes.

Pandora's box contained no more mischief than does the family jar.

A lover's quarrel may lead to a better understanding, but the quarrel between husband and wife rarely does.

It may be in the early honeymoon before the two really learn to know each other as one, but the frequent repetition of domestic misunderstandings is like the frequent rent in a rare and costly fabric.

There are lace menders who repair lace so it defies the casual observer's detection, but the delicate material of marital happiness, if rent often by hasty words, cannot be so easily restored.

It has always been a source of wonder to me that people—the majority of even the cultured and refined—treat their casual acquaintances with so much more courtesy and kindness than they bestow upon the members of their own household.

If a man is the guest of a friend and finds no soap on his washstand or no matches in the smoking room, he assures his apologetic hostess when she refers to the subject that it is of no consequence, and begs her not to give it a second thought. Accidents will occur. But if the same accident occurs in his own home—nine men of the proverbial ten make it the occasion of a "family jar."

What in another home was the merest trifle is a grave and serious misdemeanor in their own. Yet they love their own families and value their own homes.

In the small occurrences of daily life wives and mothers are prone to be less considerate of the feelings of their own near ones than of strangers who sit as guests at the board.

The careless tone, the unrestrained temper over a small fault, the severe criticism, the nagging impulse let loose, are for the members of the household—not for the stranger within the gates.

Still if the need came these women would die for their families.

But to live the highest ideal of agreeable womanhood for them proves too serious a strain.

The beginning of all trouble—money—is not unfrequently the chip on the domestic shoulder which leads to family quarrels.

The husband is inconsiderate, or the wife extravagant, or the sons and daughters improvident. The husband doles out a pitiful allowance to the home, while he expends a liberal fortune on himself, or the wife contracts bills which would be suitable for a lady of fortune, while her husband earns only the salary of a clerk. Indeed the complications are innumerable where money proves the bone of contention in a home. It is impossible for cupid to keep his abode where such quarrels are of frequent occurrence.

Cupid likes the benefits and luxuries and refinements which Mammon can bestow, but he has a horror of his vulgarities. And what is more vulgar than dissentions and quarrels over money matters?

Jealousy, which is the offspring of selfishness and vanity, is another source of family fusses.

Cupid sits in the corner for a while during these scenes and holds his sides with laughter. But after the performance becomes continuous he yawns and slips away—not to return.

Relatives figure largely in family disagreements.

Mothers-in-law, fathers-in-law, husband's sisters, wive's brothers are all subjects of contention in many homes.

Although the lover finds them charming before marriage and the sweetheart is devoted to "Jack's folks," the husband finds them bores and the wife cannot endure their presence. This is the result of selfishness and lack of tact on the part of either couple or their relatives.

The husband should treat his wife's relatives with the same consideration he did as a lover, but he should not permit the interferance in his domestic affairs of either her relatives or his own, nor should she request him to. Once this rule is established by a husband and wife and adhered to all possibility of family jars on this subject vanishes.

Dunsmuir's California Partners.

A. D. Shepard, who has just resigned his post as general freight agent for the Southern Pacific at San Francisco, is coming to Victoria for the Pacific Improvement Company, the name under which the directors of the Southern Pacific, who hold the minority interest in part of the Dunsmuir properties, are known. They have 49 per cent of the stock in the Union colliery, the E. & N. railway and the E. & N. railway land grant, and it is their interests which Shepard will safeguard. He is expected about the end of the month. He has been 27 years with the Southern Pacific and is regarded as one of the smartest railway men in the west. He will not be salaried by the companies in British Columbia, but by the Pacific Improvement Company of California.

Hays Well Treated.

SAN FRANCISCO, September 30.—In connection with the retirement of president C. M. Hays of the Southern Pacific the Chronicle will tomorrow say: "Hays, it is learned, was treated very generously by Harriman in their financial settlement. As is well known he accepted the presidency of the Southern Pacific from the Speyers at a salary of $55,000 a year, with a contract for five years. Harriman, it is stated, decided to allow Hays his full salary up to the end of the present year, and half of his salary for the remaining four years covered by his contract."

Germans Will Withdraw.

PEKIN, September 30.—It is asserted here on high authority that the German garrison in Shanghai and the German troops who are guarding the railroad beyond the Kiao Chou boundary will be withdrawn soon. At the request of Dr. Mumm von Schwartzenstein, the German minister, seven Chinese have been tried and sentenced to be beheaded for complicity in the murder of a German trader in a village near Pekin last month.

NOTICE.

In the county court of Kootenay holden at Nelson, in the matter of the estate and effects of Alexis Swanson, late of the city of Nelson, deceased intestate.

Notice is hereby given that by an order by his honor Judge Forin, dated the 22nd day of August, A. D. 1901, Charles Swanson was appointed administrator of the personal estate and effects of said deceased. Notice is also hereby given that all persons having claims against the said deceased are required within thirty days of the date hereof to forward them with full particulars duly verified by statutory declaration to the said administrator at Nelson aforesaid.

And notice is also hereby given that after such last mentioned date said administrator will proceed to distribute the assets of the said deceased according to law without regard to any claims of which he shall then not have received notice.

Dated this 29th day of August, A. D. 1901.

ELLIOT & LENNIE,
Solicitors for the Administrator.

J. A. IRVING & CO. Houston Block, Baker St.

CITY AND DISTRICT.

Mark B. Thomas has arrived from Toronto. He will succeed Fred Burnett as manager of the Nelson Gas & Coke Company.

Brown Brothers, jewelers, announce in another column that they can explain how you can procure a good timepiece without cramping yourself financially.

J. G. McLean, who has the contract for two or three miles of the rock work on the G. N. R. extension in East Kootenay, is calling for 500 day and station men. He states that there will be eight months work on the job, and the wages for day men is placed at $2.25 per day. Any desiring work should apply to J. G. McLean at Elko.

Word was received in Nelson yesterday of the arrest of a number of men in Nelson, Washington, upon a charge of stealing a number of horses, saddles and blankets from Richmond Travis of Fairview. At the time of their arrest the men had considerable of the stolen property in their possession. They are being held at Nelson awaiting extradition proceedings.

Herb Irvine and George W. Robinson nave formed a partnership and will open a shoe store in the premises to the east of the Hudson's Bay Company on Baker street. Mr. Irvine leaves this evening for the east to purchase a stock of goods. The new firm will make a specialty of American lines and will buy from the manufacturers. They expect to have their premises fitted up and their stock in Nelson so that they can open by November 1st.

John Gallagher, the man who created so much excitement in the city on Saturday by his story that he had been shot in Kaslo and that he was carrying about a couple of bullets in his body, was fined $10 and costs in the police court yesterday morning for being drunk and disorderly and also required to pay for the damage done to the door in the city hall, out of which he smashed a panel. He could give the police no information as to how he came by the three knife wounds which were dressed by Dr. LaBau on Saturday.

Chief Jarvis yesterday received word that Robert, Thompson, the man wanted in this city for the forgery of a check, to which the name of William Waldie was attached, was in Curley, Washington. Thompson is the man who served a six month's sentence in the city jail for a petty theft from the Manhattan saloon. A few days after his time was out he secured work on the government road, under the foremanship of Waldie. Instead of going to work he loafed about town and forged Waldie's name to a check covering several days work. This he induced H. A. Prosser to cash, and got out of town with the Norris dog show, going with them to Rossland. At Rossland he is said to have stolen a horse from the show people and made his way across the line. As there is considerable uncertainty in connection with extradition proceedings it is not likely that the city will make any effort to bring Thompson back.

A special meeting of the Nelson Wholesale Grocers Association will be held this evening in the office of the A. Macdonald Company. It is understood that the meeting has been called for the purpose of taking action as an association upon the move made by some of the retail merchants of Nelson and surrounding towns, which in the opinion of the Nelson wholesale houses was directed with a view to preventing them from securing from the Canadian Pacific Railway Company a wholesaler's tariff to apply on all goods reshipped from Nelson to bona fide retail merchants. It is thought by some of the local wholesale men that when the matter is explained to the retailers in its true light much of their opposition will be disposed of. The call for the meeting, which is to be held at 8 o'clock this evening, has been issued by R. J. Hamilton, secretary of the local wholesale association.

Fall Millinery Opening

Mrs. Enfield desires to announce to the ladies of Nelson that her Millinery Opening will take place on

TUESDAY AND WEDNESDAY, October 1st and 2nd.

in the Opera House block, next door to Postoffice.

Good . . . Timepieces

On Saturday next, subscribers whose Tribunes are delivered by carrier will be expected to pay the carrier TWENTY CENTS, the subscription price for the current week.

PERSONALS.

Oscar White, superintendent of the Slocan Star mine, Sandon, was in town yesterday, en route home from Spokane.

Miss Moir of Montreal has arrived in Nelson to take charge of the trimming department in Mrs. E. McLaughlin's millinery parlors.

B. J. Perry, lawyer, politician, mine manager, and philanthropist, passed through Nelson yesterday en route to Victoria. He had been at the Noble Five mine, Slocan district, on a trip of inspection.

Dr. Rose and wife are at present residing at Dr. Hall's, on Silica street. Mrs. Rose will be at home on Tuesdays.

Fred Bosquet has arrived from Trail to take charge of the hard work in P. Burns & Co.'s meat market in Nelson. Mrs. Bosquet and the children will be here in a day or two.

Putting the Church Choirs in Uniform.

TORONTO, September 30.—The choir of the Sherburne Street Methodist church were gowned yesterday. Both male and female members were dressed alike in black gowns, like those of university accessories, with the white collars and ties. The ladies had no hats, but wore black velvet ribbons in their hair. The church authorities are following out the custom in vogue in several of the leading Methodist churches in the United States.

Bernier Gets a Starter.

MONTREAL, September 30.—Lord Strathcona today promised captain Bernier $5000 towards outfitting his Polar expedition. As the public subscriptions remaining to be raised amount to $55,000, which sum, with the $60,000 promised by the Dominion government, will outfit the expedition.

Will Not Send Delegation.

LONDON, September 30.—"Mr. Kruger," says a dispatch to the Daily Mail from Brussels, "has abandoned the idea of sending a delegation to the president of the United States, having ascertained that president Roosevelt will pursue the policy of non-intervention."

Mrs. E. McLaughlin Will Display Today an Attractive Stock of Hats, including all the Newest Models.

Parlors in West Block, Corner Baker and Hall Sts.

Notice of Millinery Opening Will Appear Later.
